And since this world, as Maxim said, is materialistic, materialism has been introduced into science and politics, education, and many other spheres of social life, it is important through contactees of various kinds - through esoteric, religious figures, authors of books, films - give the idea that Spirit is primary and matter is secondary. In the sense that the Spirit creates matter for the needs of its development. For the purpose of sharing information.

Maxim : Raising your children.

Oleg: Thank you.

18:58 How long have aliens been visiting Earth?

Oleg: Please tell me more, your contact is now taking place. Now, we live in the 21st century. How long do you think representatives of other civilizations or the Interstellar Union have been visiting Earth and why?

Maxim : I told you how many of us were burned at the stake by the Inquisition, how many of us were kept in psychiatric hospitals in the Soviet Union. Let Raom Tiyan tell you.

Irina : Since earthlings were created three million years ago, at that time there were already numerous bases of the Interstellar Union on Earth, on the Moon, on other planets and satellites of the Solar System.

Maxim : I'll clarify. On the Moon 12,000 years ago.

Irina: He means planets. Yes.

19:56 Solar system before the war 12,000 years ago.

Irina: I'll clarify now. At the time we were created, the Moon was not a satellite of the Earth, it was a planet between the Earth and Mars. Another planet rotated between Mars and Jupiter, from which the asteroid belt now remains. This is a change in the solar system, that the Earth acquired the Moon, that a single continent broke into continents, you can even mentally assemble them and see what the first continent looks like, which was at that time.

All these changes in the solar system and on Earth occurred quite recently by geological and, moreover, cosmic standards, 12,000 years ago, and they did not occur naturally, but occurred as a result of an attack on the solar system, specifically on Earth, by the reptilian race Selbet.

Maxim : One of the races of our creators.

21:07 Causes of war 12,000 years ago. Earth's climate before the war.

Irina : They attacked us to destroy earthlings. They had their own reason, there is a video about this too. Now I will tell you briefly.

The reason was that they considered hybrids like us dangerous, this is the first reason. And the second reason is that the representatives of Burkhad and Tumesout did not give the reptilians the opportunity to experiment with our dinosaurs, who were around at that time, in order to create an intelligent race and reptilians, also on Earth. There was a struggle, political, so to speak. When a ruler came to power on Selbet who was opposed to anthropomorphs (that means the Burkhadians, they are also anthropomorphs, like us, and the Earth was then considered a colony of Burkhad), they attacked the Earth, timing the moment when there were no Interstellar warships around the Earth Union. There were only scientific ships and research bases. Selbet sent an entire military fleet. Their weapons are not like those of earthlings; they were not nuclear weapons. There were gravitational bombs that changed the orbits of planets.

In addition to the Earth, the planets Venus and Mars suffered in this war. 200,000 years ago, that is, long before the war, Venus and Mars were terraformed by the forces of the Interstellar Union, and planets suitable for life were created from them. On Venus and Mars there was a completely different atmosphere, there was a different climate. By the way, there was also a different climate on Earth, for example, there was no winter, and where the poles and ice caps are now, there was a tropical forest. That was all.

23:06 Changes in the solar system as a result of the war.

Irina: As a result of the attack of the Selbetites, the planet Venus turned into what we see. That is, they created a poisonous atmosphere, with their weapons they influenced its orbit in such a way that it began to rotate too close to the Sun, and the rays began to fall on it at a different angle. The greenhouse effect that is created on Venus is also due to the influence of their weapons. But from Venus, before such consequences occurred, our creators managed to remove almost all the inhabitants from the planet Burkhad. There are deaths, but few died there. Almost all the inhabitants were taken to the planet Disaru. It also exists now and is part of the Interstellar Union, where our genetic almost complete relatives live. You cannot distinguish them from earthlings, they are the same. But these are already the descendants of those who were taken out 12,000 years ago.

Mars was an inhabited planet. There were also descendants of earthlings who were taken to Mars 200,000 years ago. In general, the aliens set the task of settling us throughout the solar system so that we could not only be fruitful and multiply on Earth, but also on other planets that were suitable for this.

Maxim : The task of the Interstellar Union is to populate our Galaxy, and not only our Galaxy, with intelligent life.

Irina : They built cities there, planted forests and gardens. The fact that the Bible says that God grew a garden means that Gods are written as God, because the ancient peoples, one of whose representatives later wrote the books of the Bible, imagined aliens, aliens, as Gods who had descended from the sky. In allegorical form, the Bible tells the true history of mankind, but in such an allegorical metaphorical form.

Yes, the planet Mars also suffered. Almost everyone on Mars died because the Selbetites flew from the edges of the solar system. Their first strike was on the planet now called Phaethon, between Jupiter and Mars, where the asteroid belt is now. They broke it. The Interstellar Union, which existed in the solar system at that time, needed time to call in warships. This war happens very quickly, in seconds, the use of these weapons and their consequences.

Maxim : Irish, we can talk about this for a long time, we have a video on the channel.

Irina : We have a video on the channel about Mars, everything is very detailed. A participant in the war tells - Ashtar.

Maxim : I want to inform everyone that we do not use drugs, we are not members of any sects, and we do not read science fiction books, so that people can understand. This question is very often asked: what do you smoke, or where do you get such interesting information? This information is from a contact. Irina is in this contact 24/7 and, it seems to me, sometimes even 25/7, because when we go into sleep, we go on astral travel unconsciously and return from there.

Therefore, Irina can go into the Astral, and look in the Astral, and visit other planets, other worlds in the Astral, but she does this not only in the Astral, but also in the physical body.

27:08 Consequences of the war 12,000 years ago.

Irina : More about reptilians. Because they started this war, then the ships of the Interstellar Union arrived and they defeated the Selbetites. Now I'll tell you this very briefly.

A lot of millions of people died on Earth, because there was a population of many millions, but those whom they managed to take out - tens of thousands, they took to Mars or to a lunar base. There was a very large Interstellar Union base on Mars.

The Earth began to move away from the Sun, the Burkhadians stopped it with their gravitational field so that it would not fly far and lose heat. But the Earth attracted the Moon. They almost collided and were on the verge of disaster.

Selbet was a member of the Interstellar Union at the time, but for these military actions he was expelled from the Interstellar Union. He hasn't been there for about 250 Earth years. Then on Selbet, this reptilian planet, with the help of representatives of Tumesout, another group came to power.

Maxim: Tumesout are giants.

Irina: We managed to arrest and send to the planet the criminals who started the war, and they were again accepted into the Interstellar Union.

Maxim : We can talk for a long time. The guys have a lot of questions, I'm sure.

28:41 The process of astral contact with extraterrestrial civilizations.

Ella: You mentioned a little, but I would like to clarify: tell me, how does communication with representatives of extraterrestrial civilizations take place? Is this somehow figurative, do you hear a voice in your head or intuitively, through telepathy? How does the process itself happen?

Irina : Now I am in mental contact, this is a type of mental contact. Now Raom Tiyan is standing next to me, I feel his presence.

Maxim : In the astral body.

Irina: He is in the astral body. My chips are tuned to its frequency, so to speak. He transmits to me a stream of mental images, they pass through my brain, through my consciousness. I see not just images, but as a stream of mental images, both thoughts and images together, and the interpretation comes from my vocabulary. What he conveys, I see and convey.

Maxim : If there is no word in the contactee's database that can express what he says, he selects it from the contactee's database.

Irina : Yes, he picks up. Moreover, you can talk with a plasmoid, with a representative who has never seen an earthling, who not only does not know the Russian language. He will convey images at his level of concepts, and I will convey them at mine. These are the features of the chips. The chip I told you about was installed in 2019. After we had already met Maxim, representatives of the planet Esler installed two more chips, this is where MidgasCaus is from.

30:40 The use of chips for contacts with aliens.

Maxim : We decided for a very long time whether to do this or not, to overload Irina with contacts or not to overload.

Irina : Because without these two chips the contact was difficult, Maxim knows.

Maxim: The contact was terrible. You can, indeed, have a psychiatrist nearby and give diagnoses: both by the physical reactions of the body, and by conversation, speech during contact. We decided for a long time whether to install these two chips or not. On one of Irina's physical contacts, she was taken to the planet Esler, and two more physical chips were installed there.

Irina : I became more or less in contact, because then I was in a state of altered consciousness, it was difficult for me to navigate the physical world, I perceived it only in fragments, that is, I was both here and here.

Maxim : For our scientists who want to cut Irina open and get the chips, I want to say right away that the chips are at a very high biological level. Our instruments do not detect them like metal objects.

Irina : They are made of biopolymers.

Maxim: They are made of biopolymers, they are already built into the structure of Irina's tissues, so there is no need to look for Irina and try to get chips out of her.

Ella: Thank you.

31:33 "Crop circles" phenomenon. What is this?

Ella: The topic of crop circles is very interesting to us. We know that crop circles form luminous balls. These balls are sometimes called plasmoids, sometimes ball lightning, because they behave intelligently. What can you say what it is?

Maxim : One of the possible methods of drawing crop circles is using drones.

The ship itself is in orbit, sending drones. These can be small round flying objects, which, due to changes in the plasma field, the gravitational field, create these crop circles.

Irina : Everything you see, like luminous balls and like plasmoids, is reminiscent of those plasmoids that are representatives of subtle-material civilizations. But most often, crop circles are left by representatives of humanoid alien civilizations: both from the planet Tashig and from the Pleiades, too.

Maxim : Guys, they are looking at our awareness. They are not interested in how we decipher it. They are interested in the process, how we decipher it. That is, what conclusions we make, the reaction to this circle, to the appearance of this circle, the reaction to the conclusions.

Irina : To the scientific community, how will they explain to the people where this circle came from if there are no traces of people nearby, cars, etc.

Maxim : Crows are taught to collect lids, they give us crop circles and see our reaction, what we will do, how we will decipher.

Irina : They are sending, he is now showing me, as Maxim said, a drone is an automatic probe, of which there can be many dozens on an aircraft-ship. They have a diameter of about 30 cm. But around themselves they create a plasma field of bright white or yellow color, and it changes.

When a ball hangs on a field, for example, cereals, its plasma field changes intensity. A vortex electromagnetic field is created, which changes the structure in plants. And this is why they form a pattern. This pattern is already included in the program of this ship in advance.

34:10 Luminous balls over the pyramids, on Kailash. Types of plasmoids.

Ella: Tell me, often luminous bright balls are seen above the pyramids, on Kailash and in other places. What are they for?

Maxim : Anything, guys. On Kailash there is one of the portals of plasmoid subtle-material civilizations, there are bases in the mountains. It could be an alien ship. We have more than 400 bases throughout our planet. All over our Earth, there are alien bases that are located under the Earth. Either deep or very deep.

Irina: Underwater, in the mountains.

Maxim: This can be like a manifestation of a subtle civilization on the physical level, as a ball of light of different colors, different structures. It can be like lightning, it can be like luminous elongated objects. These can also be physical ships. There may be representatives of subtle-material civilizations in their bodies, manifested in the reality in which you and I find ourselves.

Irina : Yes, they do. Plasmoids, as we call them, representatives of subtle-material civilizations, are of the earthly type and of the cosmic type. In common parlance they are called Nature Spirits. Maybe you have heard the Spirits of forests, houses, there are Spirits of the stars.

Maxim: Leshy, brownie, mermaid are plasmoid civilizations that are visible. In order to see them, you need to change your vibrations a little, not to see them with your eyes, but internally. It's like Irina says: I accept information where there is a flow of both thoughts and images. This is how contact with subtle-material civilizations occurs. A person who says: "I saw a brownie," received that image, that thought package that the plasmoid gave him in relation to the structure that it represents.

The brownie is basically the balancer of the house, that is, the balancer of the energies of the house, the space in the house. These are earthly civilizations that help us, that supervise us. They can also be called our creators. Why? Because their lifespan is from 200-300 years to millions of years, such as solar plasmoids.

Irina: They can create Galaxies.

Maxim: Yes, they can create Galaxies, these plasmoids, as energy-information formations. This is a very interesting separate structure for explaining and understanding what it is.

Irina : Raom Tiyan says: "To understand what plasmoids are, you have probably heard about the expression "dark matter" and "dark energy." This is that part of the Universe that is not yet accessible to scientific knowledge. It is simply recorded that it exists in the Universe. It is recorded that its total mass occupies 95-96% of the mass of the Universe. And all the galaxies, stars and planets are 4-5% of the world we see.

This dark mass of matter and energy is (and not even all, but only some part of) plasmoid civilizations that can be noticed by our instruments, simply by their presence.

Most have such high vibrations that cannot be recorded in any way by our eyes or our instruments, because they are tuned to our third-density three-dimensional world."

Maxim : The word "vibration" is a fairly broad concept. We are in the third level of density. There are 59 total levels, 56 subtle levels.

Irina: And we are on the third.

Maxim: And we are on the third level of physical reality in dense matter, embodied from the Spirit, transferred to the body, called the Soul. Representatives of the Interstellar Union give us this entire structure of the Universe very well and describe it.

Irina : This is not the Spiritual world. This is precisely the subtle world. Here we are a dense material world, we have dense matter. They are a subtle world. And there is the Spiritual world - the world of disembodied Spirits, where Souls come from, there is no matter there.

Maxim : This is even higher in vibration. This is exactly the Light of true Love of our Creator that we are talking about.

Irina : There are also 24 levels there, from where we all incarnate, either into the subtle material world, that is, we acquire a subtle body, or into the dense material world, that is, this is already the level of the Earth, any other planet, any Galaxy.

38:48 The origin of the pyramids. Purpose of the pyramids.

Denis: Thank you. You talked a little earlier about pyramids. There are many different pyramids on the planet. Why were they built, and is there a connection to the pyramids on other planets?

Maxim : What does it mean “is there a connection on the pyramids on other planets”?

Denis: Connection between buildings. We see that there are similar ones on Mars.

Maxim: Is there a connection between the pyramids on Mars, for example, and on Earth?

Dennis: Yes.

Irina : I’ll tell you where this form for the structure came from. It was only in the later times of the Egyptian pharaohs that these buildings were used as tombs. In earlier periods of human history, they were used as temples, libraries, and educational institutions.

Where did the shape of the pyramid come from on Earth, in the solar system? People from Earth also lived on Mars and were transported there. So where did this form come from on Earth?

On the planet of one of the creators of your bodies, on Tumesout, which Maxim spoke about, which is located in the constellation Orion, there are houses of a pyramidal shape.

Maxim : These are giants, I remind you once again, Tumesout, so that it is clear in our

terminology.

Irina: Yes, they are called Tumesoutians, they are giants, giants from Orion.

Maxim : These are exactly those whom we called cherubim and seraphim.

Irina: Yes, we called them.

Maxim: Have you seen the Egyptian pyramids with such large entrances?

Irina: Irina was physically taken to Tumesout. Yes I remember. This planet is located in the constellation Orion, 1068 light years from Earth. The houses of representatives of this planet are almost all pyramidal in shape. They live in such houses. Not like us, square ones, or, for example, like Esler's representatives with domes. Burkhadians love to live in such places. And they have houses since ancient times, from their ancestors it came down that they live in houses of a pyramidal shape, considering this the most harmonious form of space, where the vital energy of its inhabitants is correctly distributed and contact takes place. At the top of this pyramid, a harmoniously tuned, as they say, true, correct channel is built, tuned to both subtle civilizations and the Spiritual world. They have this, not just a belief - they feel this way, they live this way. This is their reality.

Therefore, when the Tumesoutians arrived here three million years ago, then, when people began to reproduce on Earth, the Tumesoutians became gods among them, since they knew more, they flew from the stars on huge ships. They had advanced technology, robots, etc. For earthlings, they were gods who conveyed to them primary knowledge about the Universe.

Why did they start building the ships initially, and not immediately? Because it was believed that the newly created civilization itself should go through this path, just as our creators themselves went through. This is a more harmonious path of development, a trial and error method, when we ourselves gain experience of what is good and what is bad.

Maxim : The path of development through our conscious perception of what we do ourselves, and what happens in the surrounding space from what we have done.

Irina : They believe that, for example, first civilization, like an individual person, must first go through the path of childhood, the path of adolescence, the path of youth in order to become a full-fledged employee, worker and family man, and civilization must also go its own way. They think so.

Not only do they have houses, but the Tumesoutians even have pyramid-shaped ships.

Maxim : Let me tell you clearly, quickly. Because Raom Tiyan and Irina can talk for a long time.

Once upon a time there was a direct relationship between the pyramids. In the space of the pyramid you could turn on your mental energy. Through the structure of the pyramid, this mental energy was easy to receive on another pyramid, relatively speaking.

Irina: Then they started building. When they arrived on the pyramids, for people these were the houses of the gods.

Maxim: Yes, yes. And in these houses there are special places where, relatively speaking, the Tumesout people went to sleep; they harmonized there in the energy space of the Earth. Plus, these pyramids are located throughout the Earth, forming the Earth's ionosphere and the Earth's energy sphere, that is, they harmonize the Earth in the structure of our Galaxy itself.

This is such a mixture between transmitters, between harmonizers, between energy storage devices. These are also the homes of our creators. Why? Because 12,000 years ago, before the war, they were next to us. We lived and existed together. We earthlings were in a different form, we were taller, from three to four meters, we had more air and oxygen, and we lived longer, up to 600 years. Such nuances are very interesting.

We can talk about this for a very long time.

Yes, pyramids-harmonizers, transmitters and much, much more that are connected specifically with them, as with the structures of objects. They are also directed along the constellations and along magnetic lines. After the war 12,000 years ago, many of the pyramids that stand, they are under water now, deep somewhere, somewhere near the surface. When there was a single continent, these pyramids generally stood in a certain sequence, in a certain structure to harmonize the continent on which they were located.

Denis: Okay. So they are so multifunctional?

Maxim : They could be used as a resting place for our creators, a place for transmitting energy to planet Earth, a place for receiving these energies on the planet from the Universe, from space, from the subtle worlds that we talked about.

This could be a separate program, a separate topic on the pyramid, what it is and how it functions.

Denis: Okay.

45:50 Irina's movements in space during alien travels.

Denis: Irina, you often talk about traveling on ships with alien civilizations. How does this happen: physical movement or some other way?

Irina : When I have physical contact, yes, physical movement occurs.

When I lived in the city of Povorino, for this purpose I went alone to a designated place for contact: in the forest, in a vacant lot, I was not supposed to bring anyone with me, I was not supposed to take a camera with me, take pictures, record. Just come to this place. A saucer flew in, and I climbed up the stairs, and I was transported to some planet that we were studying.

Maxim : Taking the devices is pointless, useless, in any case they turn off. Do you think no one tried to provide evidence at that time, until Irina met me? Do you think ufologists didn't try to use Irina to obtain this evidence?

Irina : Yes, I contacted ufologists.

Maxim : And I'm very interested. They sit two and a half kilometers away with a camera and think that they are not visible from the height of orbit. Interesting ufologies, I really like them. Especially when they realize that she has a chip, and they definitely have all the information that is on her. Just film, get evidence, and everything else. Therefore, no one gives evidence for one simple reason, written in the blood of contactees. Giving evidence is like death. Anyway. Everyone understands perfectly well why and for what.

There are certain rules, I call them games. We play by these rules, we try to comply with the laws of the state, we don't interfere anywhere: neither in politics, nor in finance, we don't give evidence. We are not destructive or negative, but at the same time we are bringing information, and we are not forcing anyone to believe it or not.

We do not use the NLP method, psychological methods, or persuasion to achieve some of our incomprehensible internal goals. We have no other goal other than carrying information and providing this information, because our task is to increase the level of awareness of the perception of every person on this planet. And due to the information that they transmit, this can be done if you turn on your head.

48:28 Correspondence of the level of terrestrial civilization to the level of extraterrestrial ones.

Denis: The question was born here. Does the level of our civilized society correspond to the level of extraterrestrial civilizations?

Maxim : My favorite topic. I'm sorry that I often get involved in conversations, I get scolded all the time, why don't you let Irina speak? Because Irina can talk for a very long time.

I structure everything quite briefly, and I've been living with them for a year now. I see these contacts every day, I feel these contacts, I receive feedback every time. We have already shot a huge number of videos, answering questions with representatives of various civilizations.

Sorry, I forgot the question when I was on the channel.

Irina : Does our level of civilization correspond to their level of civilization?

Maxim : Yes, that's it. According to the structure of the universe, we have existed as a civilization for only 3 million years. If we break down some of our creators, they have been around for 25 million years. Approximately the level of a three-year-old child and the level of a twenty-five-year-old child, this is just conditional, I can give feedback in relation to how we look to them. We look like three year olds who would love to stick their fingers in a socket, set off a nuclear bomb, watch them destroy another planet, drop a couple bombs on the moon and see if anyone lives there. For this purpose, just drop a bomb to see if anyone lives there.

The level of our civilization is a very young civilization, but very promising. If we nevertheless reach the level of deep awareness of perception, then four civilizations are inherent in us. That is, the mixture of genes, the mixture of energy structures and the mixture of the capabilities that were laid in us exceeds all possible limits and ideas about who we are, what we are, and how we can develop.

We, in fact, use only 3% to 5% of all our capabilities, both mental, astral, spiritual, individual. We just see this socket, we haven't even really put our fingers into it yet, although we are already trying. This is the level of our civilization compared to the level of their civilization, I mean dense material civilizations. Subtle material civilizations have completely different levels.

For our form of perception, it is very difficult to imagine a plasmoid the size of a Galaxy that forms these Galaxies, that is, I cannot even explain to you what the Earth is and what our city is. For him there is his internal structure, that is, for him we are a grain of sand in his structure. There is nothing to say about who we are for him and who he is for us. Very often, human contactees who are in contact with subtle-material civilizations or with humanoid civilizations in the Astral Plane say that we are in contact with God. They have no gradation, they have no understanding, they have no structure of who, what, what kind of civilization, subtle material, dense material. One of the goals of our project is to provide clear feedback to every contactee on the planet. And a contactee is both a healer and an energy practitioner, a sorcerer, a sorcerer, a shaman - these are all contactees, just with different kinds of civilizations. Give each contactee clear feedback from the structure with which he is in contact and why he has contact. Even to the point of helping to build this contact and adjust it to a higher level for energy transfer. In order for these energies to help people, lead them to higher vibrations, lead them to a higher level of awareness of perception. This is also part of the project's objectives.

52:53 Necessary conditions for open contact between earthlings and alien representatives.

Denis: Guys, what conditions do we need to fulfill in order for open contact to take place, so that we can openly communicate with representatives?

Maxim: Let's do it this way. We have an article on this matter, but we will ask Raom Tiyan to voice these conditions again for your channel. Because I, as the Project Manager, don't watch your channel, because, probably, you don't watch our channel. We're just looking at each other. Therefore, I will ask Raom Tiyan to voice these conditions live. There aren't many of

them, but there are some.

Irina : Yes, conditions for open contact and for the subsequent entry of the Earth into the Interstellar Union of the Milky Way Galaxy.

The first condition is the absence of organized military action on Earth for five Earth years. There should be no military action either between countries or within countries, meaning civil wars.

Why exactly five years? Because a five-year period indicates a higher level of awareness among governments. The level of awareness of the government depends on the aggregate level of awareness of the entire people. Awareness of their spiritual essence and where they are, that they are immortal Spirits and came to this planet to incarnate in order to fulfill their task, and not to deprive each other of incarnation.

The second condition is the absence of the death penalty for crimes in all countries. Murder is possible only for the purpose of self-defense, if it is impossible to neutralize a criminal who is making an attempt on the life and health of people in another way. Only in this case is it justified, for the purpose of protection, as in war.

If the criminal has already been detained, then the death penalty is prohibited for him, because this is not in the Interstellar Union, and because this does not allow the Soul of this criminal to realize what he has done and reach higher vibrations.

Maxim : I want to add that they have a planet for criminals, where criminals work for the benefit of the Interstellar Union. It's like Stalin took out everyone he considered criminals to work for the good of our Motherland. They also have planets where these criminals work. They don’t just consume food, they don’t just sit in a cell, they work and make it possible to build other planets, factories and much more.

Irina : But they have medical care there, they have information, that is, they can develop spiritually. They have special psychologists there who work with them. They work with their Spirit, help them realize why they came to this, etc. But they do not have the opportunity to leave this planet until their term ends. Depending on what crime they have, there are certain deadlines. If the crime is serious, they can send him there for life.

Maxim : Also, the lifespan of different civilizations is very different. From 600 to 15,000 years, and, as I understand it, the punishment is given not only according to the crime, but also according to the race in which he is located. But these are my personal thoughts. From what I understand.

Irina : Raom Tiyan says: “This planet is located in the constellation Aries. If a criminal has a long life span, and he got there at a young age, then he can through the Astral (he physically cannot leave the planet), and through the Astral he can contact friends, his relatives. If he believes that he has reformed (and he was given a life sentence for a serious crime, murder, for example), and he regrets it, he looks for five representatives of the MS who know him

personally. Not necessarily from his planet who worked with him. Usually not relatives, employees who worked with him and know him well, and who are ready, in an earthly way, to vouch for him.

But before that, he has a conversation with a criminal psychologist, who decides whether to cancel this term or not. Like us, we have an amnesty. This is possible by decision of the Interstellar Union. But there it is individual in each specific case.

Maxim : Irish, we can talk for a long time. We need to tell you all the conditions in time, if I'm not mistaken, there are about seven or eight of them.

Irina: No death penalty. The third condition is respect for human life from the moment of conception. It is believed that the Spirit has already come to incarnation. It is wrong to end his life, just as it is wrong to end the life of an already born child.

Maxim : No abortions.

Irina : Well, yes.

The condition is the absence of wars and the beginning of the destruction of especially dangerous types of weapons, when we show a desire to disarm the army, for example, especially nuclear weapons, which can cause irreparable harm to the entire planet.

The fourth condition is to restore order in the ecology of the Earth. Treating the Earth as a living being, and not just as a resource that can be constantly consumed, i.e. purification of the atmosphere, rivers, lakes and so on. Construction of plants for processing waste and household waste. The Interstellar Union has this. A more environmentally conscious approach.

The next condition is to stop creating a negative image of alien civilizations in films and in the media. Nowadays, most films on this topic are science fiction and create a negative image of an alien.

Maxim : We are told that aliens are bad, they capture us, they kill us here, they cut us up on plates, they do experiments. It is imperative to remove the negative image of aliens.

Irina : The next condition is the coming to power of governments that will introduce laws that will actually improve the life of society. For example, protect the weak, help them. Laws on compulsory education, which is paid for by the state, medicine, etc. That is, so that there is real protection for the weak. So that not a single member of society is

forgotten, no matter what social role he has, so that there is social equality and equal rights.

And also - freedom of speech, the absence of totalitarian regimes, and at the same time respect for every nationality, every religion and non-discrimination of a person on these grounds.

Maxim : These are general requirements. We were told, at least make the basic demands, at least stop the wars for five years, and then we'll talk. I communicated directly with both the security service of the planet Burkhad and representatives of the planet. Fulfill at least one condition, then we will think further. Because, they say, it is very difficult to work with you in this regard, you are monkeys with grenades. Still, primacy prevails in us, and we are ready at any moment to take out this grenade, throw it at a neighbor, or take away tomatoes with a stick so that we, as primates, get more. We do not think about the neighbor as the same incarnate Spirit, that all Spirits, all Souls in the Spiritual world are a single whole, that by killing a neighbor, you remove from the incarnation a part of the Spirit, which is your common part in the structure of the Creator.

Such interesting, subtle nuances. Therefore, these conditions must be fulfilled in order to create a harmonious society, and then with us, as full members of this society, they can conduct dialogues, enter into agreements to join somewhere, and transfer technologies.

By the way, after joining the Interstellar Union, they completely transfer to the planet that joined all their technologies that they use.

Irina : Yes, and interstellar flights, and medical technologies.

01:03:06 Tasks of Irina Podzorova's contact. Goals of the Cassiopeia project. Cassiopeia projects.

Maxim : And interstellar flights, and medical technologies, and much more. Plus, in our project "Cassiopeia", in the Wellness Center for Spiritual and Physical Development, I have the idea of involving new technologies in terms of healing the body. Not medical technologies,

but new technologies that are not used in our medicine, but are used for health purposes to harmonize the energy structure and physical structure of the body.

Irina : This is information medicine. We are only at the beginning of this information medicine, when the influence of these devices or so-called information drugs, they are not drugs, they are information - dietary supplements.

These are informational drugs. They have a level of influence not on the physical body, but on the etheric body, that is, on the vital energy of a person, changing its vibrations. In the etheric body there are etheric matrices of all organs, even in every cell of our body, on the basis of which the physical body is built.

Maxim : Structures such as Cosmoenergetics, Cosmohealing, Synergy, and work with the Intergalactic Medical Service with the help of curators began to be added to our project, which enable a person to self-adjust and self-heal.

The Cassiopeia project is exactly what Ella was talking about, it's all unknown, we're slowly starting to turn it on and little by little we're starting to explain what it is. Not from the point of view of madness and incomprehensible nonsense that many people carry and try to explain what they themselves do not understand, but to explain everything in a structured way from the point of view of the structure of the space that is explained to us, told to us, laid out on shelves.

We can ask absolutely any question, and I have never heard that we were given any kind of inadequate answer. We are always given an answer to the question we ask from the point of view of our awareness, perception of this process, and many points fall into place.

Sometimes it happens that at first they answer the minimum, give the opportunity to realize, accept this structure, and the next time they give more, because without this minimum it is impossible to even understand if he immediately said so. Such subtleties and nuances of communication with extraterrestrial civilizations exist.

Irina : Another goal of our project and the goal of the Interstellar Union in contacts with me is not just the transfer of information about other worlds, about other star systems, about their life, but also the transfer of information about the world from which we all came into embodiment: and they , both us and any representatives of plasmoids. This is the Spiritual world. These are ways of communicating with the disembodied part of your Spirit, in which the memory for passing experience in this body is not blocked. The memory is not blocked, you can communicate with it. We call it the Higher Self. This is the Self of the person himself, this is his Spirit, his Soul, but a disembodied part of him.

I want to say right away that the Spirit is embodied in the body of an earthling by 30%. 70% of his mind, feelings and energy remains in the Spiritual world at the level from which he incarnated. For the most part. By establishing conscious contact, not at the level of subconscious reactions, drives and feelings, in the form of an unconscious attitude towards certain phenomena, but by establishing conscious contact with the Higher part of one's essence in the form of dialogue, a person himself can receive answers to all his questions.

For us, in different religions of the Earth, this contact is called differently: contact with the Holy Spirit, contact with the inner Buddha, contact with Krishna consciousness, etc. This is a part of God in us. This part of God in us begins to activate when we ourselves love and accept ourselves and others as we are. We feel like children of God, that is, God in our world, which we create with our thoughts.

Talking about this is also one of the tasks of my contact and the entire Cassiopeia project. Another thing to explain to people who are in unconscious contact with any civilizations, or with the Spiritual world in semi-conscious contact, who are afraid of this, deny it, think that they have gone crazy. Explain to them what is happening. Set up these people with their curators (we call mentors curators) conscious contact through their Higher Self, that is, train people in practices. Not only to talk theory, but we also have the task of teaching practice. And it's not just teaching practices. We recently had the first graduation from the school of contactees, where I teach a person not just to communicate with his Higher Self, but we teach each student so that he himself teaches this to others and guides others.

Maxim : Just as you form a Creative Society, disseminating information about what it is, we also form, add to what you form a Creative Society, our structure, in which a person begins to communicate with his light of true love, with his inner God, with your Higher Self, with the Spiritual Self of this person. He himself finds contact with him. Has the opportunity to introduce another person to the Higher Self, take him to this structure.

01:09:35 A person's responsibility for his choice.

Irina : Our task is also to explain that the person himself is responsible for his problems and illnesses in his life. No evil forces, no reptilians, no masons, no demons are responsible for the state in which man has put himself by his free choice.

He makes free choice in the conditions provided to him by his parents and society. However, there is not just one way out of any situation, but several. And a person chooses this way out freely. A person is responsible for this choice.

We explain that man bears consequences, and in order to get out of problems and illnesses, one must first realize their true spiritual cause. Then it will become clear to him how to come out of this most harmoniously and gain good experience in solving problems for his incarnations in the future.

Maxim : That is, awareness of the root cause of the disease on a spiritual level is half of the solved problem for understanding how to get rid of this cause.

Irina : Nothing happens by chance on Earth. There is always some experience, there is always some lesson for the Soul or, more often, for several Souls.

Each of you who are listening to me now, you too are a spiritual being. You have your Higher Self, you have your curators, you have mentor angels, your guardian angel, and perhaps representatives of other civilizations, because each of you has had long-term experience of

incarnation in different worlds.

Maxim : In these different worlds, he built his contacts, built these contacts. He has already come here with this energy structure built. We also want to say that many regressologists begin to look for problems in past incarnations.

I want to say that the biggest problem is not in past incarnations. In past incarnations, you were just developing a program for implementation here and now. The problem itself is formed from your perception of this program and from the implementation of this program.

That is, the problem never goes into the past, never goes into the future, but it is here and now, in this incarnation, that you form your problem. This problem begins to be reflected at different levels, respectively, on the body, on physiology as a disease, as many other things.

Irina : So our task is to realize ourselves as an immortal Spirit who came in this incarnation to solve our tasks of developing Love in ourselves, to tell other Spirits about this who do not yet realize this. Explain to other Spirits how to tell about this to others who have not seen us yet. So that everyone along the chain can pass it on to others.

Ella: Thank you.

Oleg: Thank you!

01:12:40 Changes in people for the further development of humanity.

Ella: Tell me, Irina, Maxim, how do you think we need to change in order to reach a new level of development?

Maxim : In general, the main task for change is finding Love in yourself. We have forgotten what it is, we have forgotten that Love is

the energy of our Creator that created everything that happens around you. And if you don't have Love, you cannot share this Love, you lack it. You cannot enjoy it. Therefore, in order for us to build a new creative society, we need to teach every person to love themselves.

If a person learns to love himself, not to engage in self-love, but to love himself in the manifestation of God within himself, then he will be able to transfer this love to other people.

I believe that the main task of entering a new level of creative society is finding Love within yourself. When a person finds Love in himself, he deals with all internal destructive blocks. This is pain, resentment, hatred, anger. And through Love these blocks dissolve in him. He no longer needs to hate anyone, he no longer needs to offend anyone, because he will treat every person as if he were himself. And if he loves himself, then he will love another person.

Irina : Truly loves herself.

Maxim : Yes, he truly loves himself. Therefore, I believe that to build a creative society, you need to find Love in yourself.

1:14:17 Earthly science, the science of the Interstellar Union.

Irina : We raised the issue of science. Your society is engaged in this, in matters of science. Earthly science is purely descriptive, that is, without penetration into the spiritual essence of things.

For example, when scientists see a star or the sun, they simply describe its mass, size, temperature, location, spectral class and other characteristics, but at the same time they do not come into contact, for example, with subtle-material civilizations that existed in the space where it is now located. star many millions of years before its appearance.

A star is also born, goes through stages, and not only dies - nothing in the Universe dies, it just changes the form of its manifestation.

Maxim : It flows from one state to another, changes the level of vibrations, the level of energies, the level of space. We can talk about this for a long time.

Irina : If you take your Sun, your star. Your scientists only record its mass, size, luminosity, amount of energy produced per second, but they do not come into contact with representatives of plasmoid solar civilizations, of which there are 17 at the moment, which we have discovered. They don't ask how this Sun came into being, who created it?

If you look at the elements that make it up, your scientists only know that it consists mainly of hydrogen with a trace of helium and a small proportion of almost all the elements on the periodic table. What does it mean? Your scientists don't ask questions about where the natural elements that formed the atoms came from? Who created them?

From the point of view of the science of the Interstellar Union, those representatives of plasmoid civilizations who were in the still empty space of space where your Sun or any other arose, spent their energy in order to combine their subtle energies into hydrogen atoms. Heat them to a certain temperature to start a thermonuclear reaction, so that this thermonuclear reaction will then launch the process of long-term energy transfer into space. Including in order for the planets to be created for humanoid life forms, and in order to themselves incarnate in the chromosphere of the star, and to be able to feed on this energy. There were several such processes.

Maxim : God Ra is one of the reflected plasmoids of a subtle-material civilization.

Irina: The sun.

Maxim: Sun, yes. By the way, we communicated with him, he is more than a million years old. This plasmoid.

Irina : Why did they create the Sun? And don't your scientists wonder why human eyes see the Sun or a star as a luminous object? Why

light? Why are your eyes so adapted to this world, and by whom exactly?

We have the answer to this question. Because any Sun and any star in the material world is a reflection of the Divine light of the love of our Heavenly Father.

Ella: Thank you.

01:18:07 Creative and destructive associations. "Payment according to your heart." Managing through fears.

Ella: Why do you think it is important for people to unite on the basis of creative, spiritual and moral values, and what does this mean for the development of civilization?

Maxim : Good question. Why do people need to unite? Yes?

Ella: Yes.

Maxim: In general, in our structure, due to the fact that we were created from the structure of primates, this is one of the instincts: in order to build, to produce something, we must unite.

I cannot build a pyramid alone, because I need a partner who will supply at least cement for the construction of this pyramid. I will build, there will be a certain structure. To organize a structured society, we need to unite.

Irina : For the cart to travel, it is necessary for Swan, Pike and Cancer to unite in one vector direction. This is the essence of unification.

Maxim : Great! Why a creative society? I very often communicated with demonic structures, in all seriousness, we had different sessions.

Irina: With demons.

Maxim: Yes, with demons. They have very interesting logic. If you are at a low level of conscious perception, then you can believe them. They ask: why did God give you freedom of choice, and you only develop into high vibrations? Why can't you evolve into lower vibrations? This means you have no freedom of choice. You are just growing upward. From the point of view of the demon, when he told me this, I felt this energy, I thought: really, why can't we evolve upward and can't go downward? This will be our conscious choice.

But! When a person clearly understands what it means to increase the structure, his vibrations, what is a movement towards love, towards light, or a movement into darkness. What is darkness? Darkness is the absence of light, the absence of love. I, of course, will choose to move towards love, because on this planet Earth I have learned quite a lot of lessons that made me understand that pain, resentment, hatred and anger are much worse than love, joy and happiness.

Irina : I also talked a lot with them in the Astral, especially with the archons, there are such types of demons. When you start talking to them, as Maxim is doing now: yes, I choose the path of creation, because I love God, I love myself, I love people. They answer: "Okay, you have chosen the path of creation - this is your full right. We have chosen the path of destruction, such as ourselves and others. This is also a right given to us by God, because God gave us freedom of choice. If you chose your right, and we chose ours, why are you considered good by people, and we are considered bad?" Such questions.

I usually just answer them. Because if you are attacked and begin to destroy your world, you will also consider such a creature bad, no matter what it is. That is very simple.

Maxim : I believe that when we grow together towards light and love, when we are together in this light of love, we become the God we talk about. Each of us is an addition to another person, that piece that is missing to create a creative society.

Irina : There are people who like to argue that there is nothing good or bad, everything is the same. But usually such reasoning ends when, for example, this person's wallet is stolen.

Maxim : It's very difficult to keep high vibrations, they say, when you've been spat in the back.

Irina : They already clearly understand that this is bad.

Maxim : It's difficult to carry, for example, the project that we are carrying. And it's probably not very easy for you to carry out your project, because a large number of people are at a very low level of spiritual development. They see the motive behind everything, they see everything as making money, they see everything as a scam. With them, everywhere they look, it is necessary to do something bad to someone. They have no understanding that it is possible to live in love and happiness. And uniting us into a society where the majority of people are on a creative note makes it possible for these people to see a completely different world in which to live.

Irina : As Maxim said, we also talked a lot with people both on the YouTube channel and on our resources. The most common criticism that is leveled not even at me, but at Maxim and both of us, is making money.

Maxim : Yes, that we are a commercial project, that we are built to make money, and what we do is that we laugh and laugh at the suckers that we breed.

Irina : When I start talking to them, I ask: "Is making money bad?" They say: "No, but the method that you chose is fiction," (they call it fiction), I do not convince them of this, because I have no evidence, so for them it will still be fiction. And they have every right to think so. It is the right of any person to consider this fiction, let them think so.

And then I ask them, at their level of awareness: "Fictions are the work of the imagination. So, making money with the help of imagination is bad?

Maxim : When creating this project, I learned to respect the opinion of even that person who consciously shits his pants and walks, scattering from his pants legs what he did in all directions, wherever he goes, no matter what he does. I even respect this person's choice.

Irina : And to this they answer: “No, it’s not bad to make money with fiction, provided that you call it a fantasy, a fiction, and not the truth, as you call it on your channel.”

I say: “Okay, but if I myself consider this to be true, is believing my own invention bad?” Such questions.

Maxim : This is a completely different topic for conversation. This is called the heavy burden of bringing the light of true love to these masses, because the masses are basically in the absence of this light. And what we are doing in our project, I am sure that what you are doing in your project is precisely what gives a small piece of this light, in which any negative block, a negative person and the hatred that is in people to each other.

Irina : From negative experience and from the information in the media, which is both in the media and on the Internet, there are people who not only earn money, they abuse their spiritual power over unconscious people. They start not only pumping them out, they set a higher and higher price for them, intimidating them.

Maxim : The most interesting thing is that we are controlled through our fears.

Irina : There are people like that.

Maxim : We are controlled through our fears. And the more we fear, the easier it is to control us. In order to manage us competently, we need to be well intimidated. People who have more pronounced abilities, superpowers, as I say, begin to increase their spiritual ego and use their spiritual privileges over other people in order to simply make money. In order to make money, you need to create a bunch of problems for you that supposedly can be solved. And only the person

who saw these problems will solve them.

Therefore, in our structure we came up with such an interesting point that will not be interesting for the projection of swindlers in terms of spiritual development. This is “payment according to the heart”, this is donation. Each person who turned to our project for spirituality, for receiving spiritual knowledge, decides for himself how much the training, the knowledge that we give, costs.

Irina : Or a session with the Higher Self.

Maxim : Even the premises that I have now, people come to study there, live in this premises, even accommodation while studying on the terms of “payment according to their hearts”. In my structure, I do not set prices for spiritual knowledge only because this spiritual knowledge on our planet has begun to be heavily speculated upon. They are priceless to me, and I believe that this spiritual knowledge, this spiritual structure should be priceless for any person who receives this knowledge.

Irina : I have been asked many times: “What are scammers too, scammer contactors, scammer healers, what also allows them to work?” I always answer this question the same way: “Yes, of course, if they agree to work “pay according to their hearts.”

Maxim : Yes, it’s very interesting to spend 2.5–3 hours with a person, leading him to the Higher Self, without understanding how much he will pay you. This, I understand, is real work.

Irina : As I understand it, those who pretend that they are esotericists do not actually believe in it, for the sake of making money. If they switch to "pay by heart", I wonder how they can cheat on it?

Denis: Thank you for your answer.

01:28:28 Internal values of the Cassiopeia team members.

Denis: I would also like to ask Maria a question, she stayed too long and got bored. Since you are the administrator of the Cassiopeia project, you probably communicate with every person in this project and know almost everyone. Tell me, what do people live by, what are their internal values, and what are your values?

Maria : Do you mean our team now?

Dennis: Yes, yes.

Maria : As Maxim correctly said, nothing in our lives happens by chance. Therefore, all the people in our project, all the volunteers, all contactees are kindred Souls who found each other, who attracted each other in order to carry out their mission, to fulfill the plan of their incarnation.

These are very bright people who work and contribute to this project out of the conviction of their hearts. They are volunteers, they do not receive any salary, and they invest all their free time in this project, from their beliefs, from their desires to benefit not only the project, but also all the people who come to this project and ask for help.

We are all growing a lot in this project. I will say openly that we all have lessons to learn, we all face trials. We all gain our own experience, and this is very, very valuable because we help each other grow and develop through this experience.

And I also really, really want to thank those of our subscribers, all the people who come to our project for knowledge, sometimes with doubts, with criticism. These are also valuable Souls who help us pass their lessons and give us the opportunity to help them pass their lessons.

Therefore, we have very interesting people in the project, very versatile, from different industries, from different areas, and this is a symbiosis. This mutual assistance to each other is already for us a kind of mini-creative society.

Our project, our friends, our subscribers, we are already somewhere and that very creative society that you strive for.

01:31:08 How do the participants of the Cassiopeia project imagine a Creative Society?

Denis: Great. We just have a very interesting question that we ask everyone. How do you see a society where your friends, loved ones and all of humanity will live comfortably?

Maxim : Who is this question for now?

Denis: Let’s go first Maria, and then you.

Maria : Maxim already answered this question at the very beginning of our conversation. This is a society where people live in connection with their Higher Self, with their Spirit, with their Soul.

When a person is constantly in this connection, he knows exactly what Divine light is. All those criteria that we describe in our religions, in our philosophies, become a natural integral part of man. It is this connection with your Higher Self, with your Soul.

When all people, or the majority of people, let's say, the critical mass of our society will be in such a state, and this is the level of development of our interstellar friends, then we will come to a creative society in which people treat each other as themselves : with love, with respect, with understanding.

This does not mean that all problems will disappear, all people’s shortcomings will disappear, but there will be a conscious attitude towards them. They will understand why this happens and how to deal with it. This for me will be a creative ideal society.

Denis: Thank you.

Maxim : Irin, I'll come later, at the end.

Irina : Okay. What is a creative ideal society for me?

The first and most important thing is society. What is society? This is a collection, firstly, of individual families and individual groups. For me, an ideal society is when love and mutual understanding between individuals reigns in every family and in every individual team.

This is possible if every person is able to communicate with his Higher Self and realize the real picture of the universe, based on spiritual priority, the priority of spiritual values over material ones.

Why specifically spiritual ones? Because our Spirit, our true Self, our immortal spiritual essence has gone through, as I already said, many incarnations and came into this incarnation to solve its problems.

If she solves the problems of only her material body, its provision, its pleasure, then the material body and material things will remain on earth, while the Spirit will go to the Spiritual world. He will remain eternal, but he will not fulfill his tasks if he spends his time only on material things, and he will also lower his vibrations due to negative emotions, because the surrounding Spirits do not allow him to fulfill his goals. It so happens that the people and events around him interfere with his desires. To prevent this from happening (and in an ideal society this should not happen), this requires awareness of the real picture of the universe. A society where there will be spiritual priorities, where there will be education in schools based on knowledge of the Spiritual world, where there will be a caring attitude towards each other and learning to contact one's Higher Self in the family, at school, and in society.

Maxim : Well, now it's me.

You won't believe it, the material world interests me very much in terms of the fact that it provides an opportunity to convey spiritual knowledge. I do not shy away from the opportunity to earn money in this world, but not from spiritual knowledge, but in the structure in

which this is possible. And one of my tasks of incarnation includes the unification of both the material and the spiritual in me personally. I used to think that this was impossible.

I also think all the time what I would like to see in myself at the moment of leaving the incarnation, that is, disembodiment from this body. I'd like to look at Earth and say, "Wow, did we really do this?"

I'm not even interested in anything else, that is, some kind of wealth, houses, apartments, cars - these are just means to go out and say: "Wow, we did this!" We were able to do this. We were able to change the planet, we were able to give the planet air, we were able to give the planet nature, we were able to create a society in which each other is loved and appreciated, we were able to harmonize so much with the planet that the planet began to love us.

Not only we are the planet, but the planet is also us. I will say, at the end of this conversation, I really like the cartoon about the brownie Kuzya. There is a phrase there: "What is happiness?" He says: "Happiness is when everyone is at home."

All houses have different understandings of this word. If we each have all the houses in our heads, if we each have all the houses in our family, if everyone considers this planet to be their true home, loves it, appreciates and respects it - this for me is a real harmonious creative society.

When we all understand that we are in this world, and everything that happens in this world is just a reflection of our inner state. The more we gain this light, the more we gain this love, the more harmonious it will be to be in the space in which we find ourselves.

So for me it's all simple. Everything is Love, everything is Light, and with any of my powers, I also transform my ego. As an ape-like creature, I also have my own ego, this is normal. But I come to an agreement with my ego, I make contact with it, I go into dialogue, and I always ask my ego: "Max, what comes first for you - your Soul or your body?" And I immediately give myself the answer that, of course, my Soul. This dialogue ends with what I thought about, how a being on

low vibrations turns into the state of a being of high vibrations, and I try to carry these vibrations further.

I am not without sin. I'm not saying I'm perfect. I'm not saying that I'm some kind of confessor who carries spiritual knowledge. I just try to be, grow and develop in that environment, and create the environment in which I am comfortable.

And inside it is comfortable to live in love.

Denis: Thank you, friends. Oleg.

01:39:14 Fundamentals and stages of building a "Creative Society" from AllatRA. AllatRA website.

Oleg : I would probably like to add.

Maxim : I can add to this with pleasure.

Oleg : Yes. Let me add a little about the creative society. As part of the Creative Society project, a sociological study was conducted, the goal of which was to survey as many people as possible in different countries of the world with a simple question: "What kind of society would you like to live in?"

A lot of questions were asked over a wide geography: from east to west, from north to south, and by analyzing the answers that people gave, they can somehow be grouped into some four basics. Based on these questions, eight foundations of a creative society were identified. You can find out about them on the website https://allatraunites.com/ , where the corresponding article is "Fundamentals and stages of building a Creative Society."

I know that today our guests Maxim, Irina, Maria, you have become familiar with these basics. Please tell me what do you think about this?

Perhaps there was one foundation that caught your attention in particular?

01:40:31 The Cassiopeia team about the foundations of a creative society.

Maxim: Guys, great basics. If you build a society on these foundations, it will be creative, because you have a very interesting program, an interesting structure. The main thing is that in this structure what happens in many other structures does not happen.

When a person achieves something, a certain moment, certain heights, his ego begins to play very strongly. You did it so beautifully - you don't divide your overall structure into above and below. And it is right. Because at the level of the Spirit we are all equal, and you transfer this moment from the Spiritual world to the creative world, to this physical reality. And this is quite smart, because when we are together, we are strong. When we are alone, we can very easily be broken up and separated. In what I read, I did not see anything wrong with what was written there. I absolutely agree with these basics. Maybe I would have revealed them more, but I would have written no more. But it can be revealed, it can be described for a very long time, I'm sure you've described it somewhere. What you are doing is good. The main thing is that there are no subtexts in this creative society about why you are doing all this and for what purpose you are distributing it. Because I heard there is politics and something else.

I just don't get involved in politics myself for one simple reason, because I carry sacred knowledge, very slippery knowledge. And as soon as I get into politics, our society will begin to stick me with material things in what I do. It will be quite difficult for me to be there.

In your structure, I think this is normal. The main thing is that there is no underlying reason in terms of political society, reformation of the state system by force in some way or anything else. If everything is harmonious with you, if everything is in a creative manner, why not? Everything's great. I really liked everything.

Oleg: Thank you.

01:43:08 “Creative society” and open contact with extraterrestrial civilizations.

Oleg: Tell me, do you think that if we implement these eight foundations of a creative society throughout the Earth, throughout our entire planet, then the humanity that we have will be able to quickly come into contact with other civilizations? Will the disclosure of these eight fundamentals be some kind of condition for our further movement in dialogue with other civilizations?

Maxim : Any growth and opportunity for us to unite in a creative manner, any increase in our level of awareness regarding who we are, what we are and how, in any case, brings us closer to this contact. They will already be looking at how ready we are for this. And the more we show love, the fewer wars there are, the less destructiveness, the lower vibrations, the faster we will come closer to contact with our creators, with our parents, forefathers.

I think yes. Your creative society contributes to ultimately fulfilling the same eight conditions on our part for joining the Interstellar Union. They are very close in theme, structure, and everything else.

Maria : Oleg, when I read your eight conditions for a creative society, I saw a lot in common with the conditions for joining the Interstellar Union.

Irina : This is not surprising. After all, those who created this movement, and the one who wrote the book “Allatra”, are contactees. Or rather, there are two contactees there, they have united. This is a contactor with the Interstellar Union, and this is also a representative of the planet Burkhad. Not Raom Tiyan, but he was also in contact with them.

Maxim : Your creative society was formed and structured by one of the contactees, he is also in contact with the Interstellar Union. Therefore it's normal.

Irina : Raom Tiyan says: “Like in any society, and in Cassiopeia too,

there are contactees with civilizations of different levels: with the Interstellar Union, with the Galactic Federation of Light, with plasmoid civilizations, with the Spiritual World. There are universal contactees who contact with those, and with others, and with others."

There are (contactees) whose spiritual channel is tuned primarily to one type of civilization. Or two. In the same way, in your "Allatra" movement there are contactees with the MS, and with plasmoids, and with the Spiritual world.

Maxim : With GFS.

Irina : Yes. There are different levels there.

Maxim : I'll tell you more. All our religions are formed by our creators: Judaism, Christianity, Islam - this is all, relatively speaking, the transmission by our language of the information of our creators in the form that is contained in the books that we call the Bible, the Koran and other religious teachings. Textbooks. The fact that your one of the main ideological inspirers and the oldest person is a contactee, or on the basis of whose books all this was done, is normal.

Irina : Yes. Even Moses was, for example, a contactee of the planet Tumesout. He transmitted the Torah as contact information for the people, for the various classes of this people, which were called separate tribes, etc.

The New Testament, the Gospel - this was also conveyed by contactees with the Spiritual world, with the planet Burkhad, with the Angels. They also passed on information.

Eastern religions are the same, there are also contactees with Shimor, and so on.

Maxim : If you look, read correctly all the religious scientists that were given on our planet, then you will clearly see the presence of alien civilizations and the help of these civilizations to bring knowledge, to transmit this knowledge.

When Moses interacted with the firebush, what do you think was discussed?

Irina: Or that the cloud was moving.

Maxim: Or that the clouds moved in front of Moses and parted, all kinds of waters opened up. We are already giving an explanation for this with the help of our creators. They very competently explain all this to us, what happened, why it is reproduced in an allegorical form, and much more.

The biggest problem on the planet is that contactees cannot harmonize and unite. Due to different conditions. Because everyone has a different perception of this contact, everyone has different phraseological expressions for conveying this contact. There are a huge number of civilizations, and each is trying to convey its information in its own way. Plus, there are tens of times more subtle-material civilizations; they generally perceive our reality differently. For them the planet is flat. On an energetic level it looks flat, which is why they say the planet is flat. This information about the flat planet comes from contactees with subtle-material civilizations who see this planet this way.

Therefore, our task is to at least give feedback, structured in relation to the structure of the universe and contacts, according to the structure of the Interstellar Union.

Oleg: Thank you. Thank you for your understanding. We interrupted Maria a little.

Maria : Yes, I confirm once again that the criteria for both joining the Interstellar Union, which were passed on to us by our interstellar friends, and your criteria for a creative society, are very similar.

01:49:46 Plan for implementing the foundations of the “Creative Society”.

Maria: I, in turn, am interested to know if there are already specific strategies, specific plans to achieve these eight criteria? In what practical ways do you plan to achieve these goals?

Oleg : In fact, if you look at the plan, then globally for all of humanity the stages of building a creative society are spelled out in the article "Fundamentals and stages of building a Creative Society," which I have already mentioned, which can be easily found on the website https://allatraunites.com/

Briefly starting from this, the construction of a creative society universal for all humanity begins with the fact that every person learns about it, and every person makes a conscious choice to move in this direction.

After all, if each of us accepts these eight principles, each of us lives according to them and acts every day according to these basics - won't our society be creative? Will. Therefore, creation begins with each of us. And, as it always seemed to me, and as I believe now, there is no need to wait for someone to start creating. We are all starting to create now, starting with some basic help to our neighbor, starting with the fact that we change a little our attitude towards life, our understanding of life. We follow the eight principles that already exist, and thanks to which we can change the format of the entire society.

Therefore, there would be a desire, and creation begins now.

Maxim : Yes, now a lot of people are trying to teach others to live correctly. They themselves absolutely do not adhere to the rules they teach.

Oleg: Yes, yes.

Maxim: It is impossible to create a creative society by pretending that you are creating it. You must definitely participate in it and abide by the rules that you pass on to create this society.

Denis: Right now the most important stage is informing people all

over the planet. How important is this stage? This is how we start building a house. Before we build it, we have to sit down and discuss what we want. How many rooms, what kind of foundation, what kind of roof. We must clarify all this and must talk to everyone who will live there.

And so, since there are 8 billion of us living practically on planet Earth, we must talk to everyone, we must tell every person on the planet about the project, at least try.

Our task is to reach everyone. And after that, after as many people as possible learn about the project, we can begin the second stage - the political one, where parties will be created.

We cannot implement a creative society in one country. This can be done together all over the world, so it is very important for us to unite now.

And we have already started this. A conference was recently held on the AllatRa platform, on December 20, 2020, where we discussed exactly this. Guys from 180 countries of the world gathered virtually. The conference was translated into 35 languages. Everything was done by volunteers, without spending any money. Such a large-scale work is volunteer work, and the guys did it selflessly. This is already a good contribution to a creative society.

We talked, that is, we raised questions about what prevents us from uniting, what hinders us, and how to avoid this, what work we need to do on ourselves to change this format, these keys. Someone shared his experience of how he gets out of these situations, how he communicates with people, how he finds leverage for unification. People from countries that are at enmity with each other - Pakistan and India - took part. And they all said one thing: they want to live in peace.

We simply outlined our position, we want peace, we want to build a creative society that meets all the needs of humanity. And he answers that I liked, as you say, the requests throughout the Universe. These are the fundamentals of the Ecumenical, it is not made up out of my

head. They are exactly our inner self, we feel this way, we want to live this way.

On any planet, a person or some creature lives according to such principles. By honor and conscience.

Maxim : I'll tell you this: you and I are at the same stage. We are at the information stage.

Denis: This makes me happy.

Maxim : I have not yet intended to join political structures and do not intend to, but at the information stage. You, Denis, spoke in my words, you should have added the Cassiopeia project at the beginning. That is, to convey to every person on this planet out of eight billion people, to each one personally, that he is not only a physical body, but also an embodied Spirit, and that the Soul in this regard is primary. And you need to think first about the Soul. And then bring it all down to your body.

Unfortunately, our science, our perception of life is completely backward. First they stuff their body, and then they begin to think about their Soul.

And the more they fill their body, they think that they can buy this state of Soul. But the state of the Soul is an incorruptible thing, and you need to first take care of your Soul, and then think about your body.

But you don't need to forget the body, that's why our Wellness Center for "Spiritual and Physical Development". It is called "Cassiopeia" because it is a constellation. It's interesting. If you look at it, it is very interesting, like the W looks like a symbol of victory.

Therefore, Denis, we are on the same wavelength. You are in the structure of the research and creative society, and we are in the structure of the practical presentation of the esoteric society. We will be happy to continue communicating with you, we will be happy to continue helping you grow, and we will be happy to take something

from you into our structure. Communicating with you, I did not develop any negativity, any perception.

1:56:48 Attitude to the politics of the AllatRa and Cassiopeia projects.

Maxim: I don't see any subtext in this regard. There is, of course, about the political subtext, but again this is my personal perception, this is my personal structure, and I can make mistakes, which I sometimes often do, and how I learn my lessons.

Denis: Unfortunately, this is a forced stage for us, because without this tool - politics, we cannot move forward. It is needed as a temporary one. We use politicians in order to move to a creative society where there will be neither power nor politicians.

Maxim : So you want to transfer politicians to a creative society so that they don't exist later?

Denis: Yes. They will then understand that I can be a scientist, why should I be a politician?

Maria : But, probably, someone should structure this society, create some kind of foundation.

Oleg: Of course, there is always some coordination, this is normal.

Maxim : Sorry. Absolutely normal, I think, in our society in which politics exists, you cannot live without politics.

We are beyond politics. We are in a structure between madness and between the reality of this understanding, so we won't even get into politics.

Irina : We accept our power structures as they are, fully aware that those people who are there did not end up there by chance. This is

their implementation plan, these are their tasks. Whether they fulfill them or not, for this they must and will report not to us, but to God and their spiritual mentors.

And our business is to solve our problems of implementation. Specifically, Maxim and I have reviewed our incarnation tasks many times - this is the carrying of information in the unconditional light of Love, which we reflect. Including how to treat every person with kindness, no matter what he is, and how to pay according to the heart, so that anyone can go through, even those who do not have enough money for bread, a loaf of bread, necessary medicine, but who need spiritual help, so he can get through. This is also a form of Love.

Maxim : Yes. The main thing is to understand that the political system in which we find ourselves and the ruler we have clearly reflect the general egregorial state of the people. The people they rule.

Guys, there is no need to overthrow politicians, we are overthrowing ourselves.

There is no need to overthrow the president, we are overthrowing ourselves. We chose them. They always tell me that he is a thief, a swindler, a fraudster. I say that now put you in his place and, thank God, if you leave something for people.

When people begin to go into such destructive, judgmental modes, I clearly understand what he will do when he takes this place.

Irina : Yes. We all perceive the world differently. And every person sees in the world what is in himself, because he even calls things by the names that are accepted in his internal dictionary, in his lexicon.

And if it is in his vocabulary, then it is also in his Soul qualities. Because if this were not in his Soul qualities, he would have called it differently.

We see that when a person condemns someone, he very often communicates with himself, that is, this is clearly visible.

Maxim : I believe that when structuring a creative society there must be a spiritual basis, a psychological basis, and a material basis, but it should not interfere with the first two.

Irina : The material basis is very important. If an idea in itself gathers people, in order for this idea to reach people, it must be written in material books with material colors. Without these material books and without these material colors, there would be no book, no Bible, no AllatRa, nothing would exist. There would only be an idea in the head of the contactee who received it.

Maria : In general, it must be said that all processes in our material reality, and not only in material reality, are subject to the laws of the universe.

They are absolutely for everyone and everything, and they work relentlessly, regardless of whether we follow them or not. And, as Maxim rightly said, every nation deserves the ruler it has.

Therefore, it is necessary to change the consciousness of the population, the collective consciousness, the collective spiritual level of the population, so that the appropriate rulers can come to power. These are very interconnected processes. One is impossible without the other.

Maxim : We need to educate a new generation, mothers of young, growing people, showing them by example what a creative society is. For what? So that they can see and understand that things can be different.

2:02:35 Human self-creation. Esoterics as a science.

Irina : In order to show them what a creative society is, first they need to be shown and told how to build themselves, their character.

Maxim: Yes.

Irina: That is, it is correct to express your emotions. Don't hide them, but express them. How to work with your energies, with your emotions, with your feelings, thoughts. This is the creation of ourselves.

If every person in a society, at least a larger percentage of the population in any society, does not learn to create themselves in the light of Love, no creative society will emerge. Because by its material nature, by its instincts, embedded in the body, it is also not by chance that it was given to us this way, but for the passage of our lessons of the Spirit. There are five instincts embedded in this body. Going through these instinctual energies by which we survive, fight for our survival and so on. The passage of the spiritual energies of our consciousness through these instincts can give rise to egoism, for example, and there will be no creation for the benefit of society. There will only be an attempt to build oneself at the expense of this society.

Maxim: I would also like to add at the end, because I understand that we are running out of time, we have already sat a little, we did not expect such a long conference. Another most important task is to bring humanity to the conclusion that esotericism is also a science. Esoterics is a science that studies energies.

When I received my third higher education as a psychologist, I clearly understood that esotericism and psychology are absolutely two identical sciences that talk about the same thing, just in different languages.

If you take any book on psychology by a normal, good author, and replace the word “emotions” with the word “energies,” you will begin to read esoteric literature.

Irina : And for the esoteric author, replace the word “energy” with the word “emotions”.

Maxim : Yes, if you replace the word “energy” with the word “emotions”, you will be reading psychological literature, and not esoteric literature. Therefore, the main task is still the recognition that these energies exist, that the Soul exists, the Spirit exists, and the study of these phenomena at deeper astral levels.

That is, the recognition that there are seven levels of energy: from the physical body to the atmas. Recognition that there are astral travel, astral exits to explore space in this exit. This must be done, because evidence of the Spiritual world cannot be obtained in any way except through your own experience of touching part of yourself to this world.

Irina : And if you take a book like the Bible, which was written 2,000 years ago in an ancient, incomprehensible church language, if you just start translating words, for example, the word “sin” means a decrease in vibrations, the word “righteousness” means an increase in vibrations, the word “holiness, Holy Spirit" - superconsciousness, that is, put esoteric terms, the word "Soul" - aura, then you will start reading just an esoteric book.

Maxim : All these books were given at the level of conscious perception at the moment when this happened.

Irina: In their terminology.

Maxim: In their terminology, in their conscious monkey language, so that every person, even those who do not understand or are not educated, can more or less understand what they are talking about.

Irina : Yes, they did not understand our modern terms “astral, aura, Higher Self, increased vibrations.” They were born not in the 21st century, but in the 1st, when completely different philosophical categories, concepts and terms were in use.

Denis: Thank you, friends.

Maxim : Do we still have much time left?

Denis: We have a lot. We have a plan to talk and talk, but we will have pity on our viewers.

Maxim : In general, I try not to keep Irina in constant contact for more

than 2.5-3 hours, because she works all day, she is with people all day. They call her, write, come. I scold her for this. She doesn't have days off, really. She spends these weekends on people. She says, “I like it.”

Irina : I like this job.

Maxim : I like this work when I answer a person, and the person catches metanoia, awareness of a specific problem of his, and begins to solve it. But I often stop her and say: “Stop working so much.” I understand that this is a task for embodiment, but these tasks for embodiment also include rest.

02:07:51 Wishes to the audience from the participants of the Cassiopeia project. Retreat in Belarus.

Denis: And in conclusion, wish our viewers. What would you like to wish to the audience?

Maxim : Wow! I want to wish all our viewers a conscious perception of the feeling of their own Love. I want to send everyone this love that I have, so that you learn to accept this love and give it further.

And I would like to wish your “Creative Society” growth and development. Finally, Denis, convey to each of the eight billion, even to that person who sits on a palm tree and under a palm tree, that he can still move into this creative society. Because after sitting on a palm tree all your life, you won’t understand where this palm tree came from or what to do with it next.

I wish you all love, happiness, prosperity, growth in your structure. You guys are great, you are doing a great job, you are doing volunteer work. It all comes from the Soul. This is not manifested in the search for some kind of material gain. This is a spiritual benefit. This is a manifestation of oneself, a manifestation of one’s Soul and the unification of exactly the same Souls into a single structure, which can further be realized and grow. I think this is not the end on this planet, we will continue to do this on the next planet.

Irina : I would like to thank the organizers of this meeting, everyone. And you, Maxim, and Maria, and all of you. I would like to thank our viewers, both from our channel and from your channel. Even the viewers of our channels, who will unite in watching this video in which we are together with you, they will already be in a single field, in a single stream, in a single consciousness, one might say, which we have been creating here for two and a half hours. And I feel that this space, this consciousness, this field is filled with our vibrations of wishes for good, light, love. And I would like to join these wishes, strengthen this field and wish everyone who sees me now, who sees us all now, to learn to listen to themselves, in any, even the most difficult circumstances, not to lose the presence of the Spirit. What is the presence of the Spirit? This is not just a common expression, it is conscious contact with your spiritual highest essence, this is the presence of the Spirit. Do not fall into despondency, anger, or low vibrations.

I would like to wish everyone to go through any experience on this Earth, remembering that this is all no coincidence. This experience, even negative, will be useful to us for solving our problems on other planets, in other worlds.

I want to wish that happiness to each of you and each of us, which is possible only in the light of Love for yourself, for God, for the people around you and for nature.

Maxim : Yes, and I want to tell you a secret. You know, really, nothing just happens. We just found out today that we are moving the retreat from another country, do you know where? To Belarus.

We'll be with you soon. This is the end of May - the beginning of June, in these dates we will hold our retreat, but only you know about it. Nobody knows about this yet. And, thank God, our subscribers don't know yet, because I will again be lost for three days from calls. Irina doesn't know yet either. We just decided today that we will most likely focus on Belarus.

Behind the scenes: On the May holidays.

Maxim: Yes, for the May holidays. Oh, not at the end - at the beginning of May, that's right.

There is someone who gives advice; we also have volunteers who help our project. Lena came to us to help administer our project. She also travels all over the country, also helping the development of projects like ours and yours. He is creative with himself and helps to develop similarly creative societies.

Therefore, I hope that our subscribers will then see this video and make a small rush to our administrators by signing up somewhere in Belarus. It's still not even clear where and why.

Denis: Thank you for revealing such a secret.

Maria : Dear friends! I also want to thank all our viewers who will watch us on all channels. Each of these great divine Souls who came here, into this incarnation with us, here and now on this planet. I wish each of these Souls to remember why they came here, what their plan of incarnation is, to go through all their lessons in the light of God's love, to connect with their Higher Self. When this happens, each of them will understand that they came here to create creative society.

Maxim : I hope that people who have contact, or who want to develop themselves from the point of view of esoteric knowledge, from the point of view of the level of increasing the perception of their spiritual knowledge, they can also come to our channel "Cassiopeia - Irina Podzorova" on the channel YouTube, see all the information. We have channels on all social networks, groups on VKontakte, YouTube, Odnoklassniki, and Facebook.

You just need to type "Irina Podzorova - Cassiopeia".

Bye everyone guys, Love everyone!

Broadcast May 19, 2021.

Participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

MidgasKaus - representative of the planet Esler, biologist, psychologist, specialist in alien life forms;

Raom Tiyan is a representative from the planet Burhad, a specialist in energy interactions in the environment of the material world;

Maria Sokalskaya – moderator of the VKontakte group, manager of the online learning project and other projects “Cassiopeia”;

Denis – participant of the AllatRA IPM, Belarus;

Ella – participant of the AllatRa IPM, Ukraine;

Oleg is a member of the AllatRA IPM, Belarus.

#273 Elixir of youth from Saint Germain. How to discover the Divine Light within yourself? The beginning of the spiritual path.

https://blog.cassiopeia.center/ehliksir-molodosti-ot-sen-zhermena-kak-otkryt-v-se
https://www.youtube.com/watch?v=e0NHV-IWahY

0:20 The concept of youth. Physical aging. Decline of sexual function.

Olesya : Is there an “elixir of youth”?

Irina : Youth is a state of Soul. In fact, it is quite independent of the physical body. A person of any age can have this state of Soul. This is not a state of the physical body, because in youth it is, first of all, optimism, the desire to explore the world and create, and create the right divine wise things in it. This is the youth of the Soul.

When a person feels that he has already known everything in this world, he is not interested in anything - this is old age, aging. Such a person gives a signal to the Higher Self that he can leave the incarnation. On a subconscious level, a person who is despondent, depressed, gives a signal to his Higher Self: “I don’t like it here, take me to the Spiritual world.” This is aging.

Physical aging is a necessary physiological process for a person to reconsider his entire life during the last years or decades of incarnation on Earth. I analyzed, dissolved all the blocks, made peace with all people, one might say, gave away all my moral, energetic and karmic debts and came to a state of high vibrations, and in this state I left incarnation. A young, healthy, beautiful body can greatly distract the Spirit from performing its tasks.

Olesya : Okay. We still have a lot of time.

Irina : A young, beautiful, healthy body physically often evokes the admiration of others. Since admiration is a form of love, love will be shown for the body, not for actions, thoughts, but for the body, its structure, its beauty, its perfect forms. Often such admiration is calmed by love. She reassures a person that this is enough, and he strives to preserve this beauty for as long as possible, fearing to lose the love of the people around him.

Such a person often does not pay attention to the spiritual components in himself, because he is accustomed to the fact that in the world around him they pay attention only to his body, home, car, and financial component. And in order to earn and maintain all this, you need a healthy body.

Therefore, in old age, a person begins to get sick, his body weakens, and it is not his beauty that is lost, but his external attractiveness to others. Attractiveness and beauty are slightly different concepts.

His sexual function gradually fades away so that he can direct his energy to the seventh chakra. It's not just a matter of energy loss. Sexual desire is always involved in some kind of relationship between a man and a woman. Relationships are always filled with emotions. Emotions require time, their living, analysis. Relationships themselves take time.

If there are several decades left before leaving the incarnation, then the body’s time cannot be wasted on this. The Divine law that creates these bodies provides for the aging of the physical body - this is the first point. The second point is that people often ask why reproductive function stops or is weakened. Because the laws of God, which are manifested in the laws of nature and the body, provide that the cessation of conception and birth protects children who might have been born to elderly parents from being left alone at a young age. If an elderly parent, dad or mom, leaves incarnation, they may be left alone before adulthood, which will reduce their ability to survive and adapt. This is the law of nature.

Olesya : I see. Thank you.

07:03 How to get on the spiritual path of development? Self-love.

Irina : As I said earlier, a person's Spirit can be more attuned either to the wave of the physical world or to the wave of the Spiritual world. If a person is more attuned to the wave of the physical body, he feels himself as a body, is included in these events, he considers himself a physically person who lives according to the laws of the material world.

If a person is more attuned to the Spiritual world, feels his Soul and follows its advice, he follows the spiritual path of development. Each of you, dear TV viewer, can follow the spiritual path, become loving, for this you just have to really want to do it.

I want to say that it is not so easy to want. You need to interrupt, stop this inertia of materialistic consciousness, which whispers to you that everything is in order and you shouldn't change your life for the sake of some philosophical unverifiable judgments. There is such a voice of doubt in almost all of you. It is not so easy for many people to overcome the inertia of their thinking and enter the spiritual path of development.

How to do it? Dedicate at least 20-30 minutes a day to yourself and your spiritual development. Just sit in silence, tune into your spiritual channel. These exercises were given. Sit and talk to yourself. Ask yourself, what did I do on this high vibrational day? What high vibrations did I bring into the world, what low vibrations did I bring? Why? Do some simple self-analysis. Direct your attention to the top of your head, tune in to the feeling of the channel. Feel what you feel there, say: "I am!" I already told you.

Olesya : "I am" or "I am"?

Irina : "There is" or "I am" - it doesn't matter, you can call it in any language. "I am the essence of Divine Light." Listen, where are you essence? Who is speaking? And feel like a channel that goes up. Then look up and say: "Divine Light, I want to communicate with you.

Answer my questions: who am I? Where am I going? Am I doing the right thing? Am I fulfilling my purpose? Do this every day. The main thing is not to dream about it, but to actually do it. Just because you don't feel anything doesn't mean it doesn't exist. Give this at least 14 days. Dedicate two weeks of daily exercises, 30 minutes a day, to your Spirit, out of the 24 hours allotted to you for life on Earth, per day. Give at least 30 minutes to yourself in the Spiritual world.

Olesya : Thank you.

Irina : I'm talking about the necessary free time that a person should devote to himself, including for the development of his success in this world, for the development and strengthening of health, efficiency, and optimism. I repeat to you that the optimistic attitude that you will have after communicating with the Light will greatly increase your energetic life potential, allow you to achieve your goals and greatly reduce the amount of your check from the pharmacy.

Olesya : I absolutely agree.

Irina : "He will cut the check from the pharmacy," he says with humor. Improves human health.

Olesya : Yes, of course.

Irina : It will reduce the incidence of illness, because the cause of any disease: inflammatory, heart, brain, gastrointestinal - is, first of all, a lack of love. And if you do not have, dear friends, love for yourself, then you are not able to either love another or feel the love of others. Everywhere you will feel only dullness, irritation, despondency and hopeless melancholy. Look for the Light only within yourself. It's not difficult at all. You just have to take a step towards God, and He will take 10 steps towards you. When you find this Light within yourself, you will become a source for everyone.

Olesya : How inspiring. Interesting as always.

Irina : Thank you, dear viewers, for this meeting. I hope Saint Germain

was able to answer your questions. See you later, dear friends.

Olesya : Goodbye.

May 21, 2021

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Olesya Smelova – administrator of the YouTube channel, projects “Cassiopeia Level” and “Cassiopeia Color”;

Saint-Germain is a representative of the planet Disaru, a political scientist, sociologist, and specialist in contacts with alien races.

#274 Live broadcast. Experiment with questions.

https://blog.cassiopeia.center/pryamoj-ehfir-ehksperiment-s-voprosami

https://www.youtube.com/watch?v=pGwgO5yx30I

00:03 Introduction of participants.

Irina: Hello, dear friends. Greetings. How can you hear? Write please.

Maxim: Hello everyone. The most interesting question: “How can we be heard?” Turn on all the haters who say we can’t be heard. Vladimir says everything is fine. What kind of badge does he have? That he is repairing something.

Irina: This is the administrator icon, probably?

Maxim: Guys, we probably have an experimental broadcast today. The questions will now be chosen personally by Irina. I will sit aside, be silent, breathe quietly.

Irina: Hello, today we are having an experiment: I myself will read the questions from the screen and answer which ones I have time to answer.

The topic of the broadcast is free. You can ask our curators what interests you.

At the beginning, as always, I will introduce those who are present here in astral bodies: MidgasKaus from the planet Esler and LiShioni from the planet Shimor. They are ready to answer your questions. We'll start with galactic news. MidgasKaus and LiSioni, what galactic news surprised you most over the past week on Earth?

02:00 Checking Tashiga's genetic experiments.

Irina: MidgasCaus reminded me that last week there was news in the Galaxy that the Galactic Federation of Light (GFS) and the Interstellar Union (IC) began to unite. Now, on the basis of this association, a special commission for contacts has been created jointly with the State Fiscal Service and the MS. The work of this commission is to check the activities of representatives of the planet Tashig and its colonies in relation to genetic experiments, since this was one of the main contradictions between the MS and the GFS. Now all Tashig colonies in the Orion constellation, Tashig itself and its bases, almost throughout the Galaxy will be checked. This work will take about eight

Earth months. All electronic catalogs of such scientific experiments will be checked and conclusions will be drawn about the possibility of Tashiga's work in this direction.

Why was this question raised? Because some GFS civilizations have expressed complaints against the leadership of the MS. This was one of the main contradictions. Now the entire Galaxy is following the results of this research. I, as a biologist from MS, am part of this group.

Maxim: Very interesting. Will the issue of the Tashigan lawlessness finally be resolved? About some of them?

Irina: The group will check the legality of some experiments, including with earthlings, but not only. Tashig and its colonies conduct experiments with those civilizations that are not part of the MS. This is the news.

(LiScioni added) For this time, about eight earthly months, the MS commission for contacts with young races, in which we work as scientists, acts together with the newly created commission for contacts of the GFS, which, by the way, includes Ashtar and nine humanoids from his teams.

Maxim: Very interesting. I will tell you my earthly news. We have a report on the retreat in Belarus ready. Tomorrow we will post it on our channel.

Next week we are launching registration for a retreat on Lake Baikal. You will see a video on the channel, under which there will be a link. Using it you can sign up for an interesting retreat on Lake Baikal, at the datsan with Lama Itigelov. We will conduct training in a very interesting sanatorium.

People ask me about a retreat in Loo. 2 masters are going to Loo for a retreat who will conduct master classes: a trip to the Higher Self, energy practices. Detailed information can be found here. Where do we display information about these masters?

Irina: I heard from Alexey.

Maxim: You can call the administrator who registers for the Higher Self, and he will explain to you what date the masters go to Loo. Alexey is leaving soon. Are they leaving next week?

Irina: He spoke first.

Maxim: On the first day they will be in Loo, where you will be able to conduct interesting hikes to the Higher Self and morning energy practices in the evenings. Two masters are traveling: Alexey Morozov and Elena Sati.

Irina: Okay. Now you can write questions. I'll read it now.

07:19 Information electronic networks of aliens. Translators of alien languages.

Irina: Do aliens have social networks similar to ours, for example, YouTube?

Maxim: Who is responsible?

Irina: LiShioni. On the MC planets there are local electronic information networks that resemble your Internet in structure. The difference is that communication is carried out within the entire Galaxy. There are communication devices that transmit data not only on one planet. There are devices through which you can communicate with the help of translators, which are automatically built in, in text format, with video, that is, with the transmission of images to different planets. All this with automatic translation into the language of another race.

Irina: It is not customary for us to study an alien language, as you do in the case of a foreign language, because translators are common among us.

Yes, they have a similarity to our YouTube and VKontakte network, but this is on a galactic scale.

Maxim: Very interesting.

08:53 The spiritual meaning of coughing, sneezing, yawning.

Irina: Sneezing and yawning, physical and spiritual meaning? This is Midu. As a biologist, what would you say?

Sneezing, coughing and yawning are a type of unconditioned reflexes in the biological or, as you said, in the bodily sense, which are aimed at cleansing the body of various pathogenic agents and increasing the level of oxygen in the blood. The spiritual meaning in this is this: some spiritual or, as you say, psychological states of a person can induce these phenomena without a specific physical pathology. That is, a person will have such phenomena from some spiritual, energetic influences on him: when receiving energy, etc. It can be different. For example, a reaction to energy may be sneezing or yawning. This does not mean that his blood oxygen levels have dropped. This is the reaction of the etheric body, which manifests itself in this way on the physical.

Maxim: Yes. I wanted to say while you, Irina, are reading the question. We have an English-language channel "Cassiopeia". The link to this channel will be below after the broadcast. You can give this link to your friends who speak English. By clicking on it, they will find translations of videos with Irina.

11:03 Options and timing of mass contact.

Irina: I see the question. When will there be the first mass world-famous contact?

Mass contact can occur in two cases: your planet entering the MC or cataclysms and disasters on your planet. In the event of a planetary war, forced mass contact could be initiated to save the Earth's population: its evacuation to bases on Mars or the Moon, which are

built underground. The bases were prepared by representatives of the planet Disaru, mainly.

As for mass contact, in the usual manner, it is carried out no earlier, according to MS rules, than 5 years after the last military conflict on the planet. This is the main condition. This threshold of psychological and spiritual readiness is provided for mass contact with the MS civilization.

If your political and military forces, and you yourself, do not overcome the contradictions within yourself that lead to physical wars, this is a clear indicator that you are not ready for the MS technologies that would be provided to you in the event of mass contact and subsequent entry into MS.

13:06 Divorces on Shimora and Esler. Features of alien physiology.

Irina: How do aliens get divorced if they fall out of love? Do they ever cheat?

Maxim: Good question.

Irina: Since there are representatives of two civilizations here, probably everyone will be responsible for their own civilization. So I understand.

Maxim: Yes.

Irina: (LiSioni speaks). On Shimora, the life together of a man and a woman can be terminated by mutual decision of these humanoids. What does it mean to fall out of love? Now I will explain: “Some contradictions arose, and they lost the feeling of love.”

I have never heard of such a reason for “falling out of love” on Shimora. Our children have a different upbringing and understanding of family life. We teach our children how to distinguish true eternal love from falling in love. If the marriage is concluded at the stage of falling

in love, then this feeling may disappear. If during this time a man and a woman have not developed a feeling of love, that eternal energy that will preserve their union and give them true happiness, then they may separate. That happens.

According to statistics, about two percent of Shimora marriages during the first 15 years end with couples separating and looking for another husband or wife. This figure is considered low in our Galaxy. On some MC planets the rates are higher. We do everything to give our children knowledge about true Love, so that they can develop love from falling in love. Our society cannot force people to live in a union when it is no longer necessary. This concerns Shimora.

As for Esler, they have a different physiology (LiSioni is stroking a cat), not the same as on Shimora or on Earth. They, without a feeling of true Love, do not have a period of falling in love. This Love cannot be replaced by anything. It appears in a much shorter time.

Before getting married, on Esler, a man and a woman meet with their Higher Self (they call it the Inner Light). Through the Higher Self, they talk with the Higher Self of their future spouse, see how compatible they are in vibration. If they first had mutual sympathy, then love, only then do they develop sexual attraction to each other. Since it cannot arise for another being, for another humanoid, they cannot love another. If they have had sexual intercourse even once, this is an indication that their Spirit has loved them. They have practically no divorces, with the exception of cases, but this is not a divorce when one of the spouses is killed or dies, and the second is still relatively young. Then he can remarry. Everything is determined by their physiology.

18:30 “Twin flames.” Soul mates.

Irina: Do twin flames exist?

(MidgasCaus speaks) Do you mean that Soul, which, according to the teachings of some esotericists, is embodied in different bodies? The two halves are embodied in different bodies. Is this usually understood?

Maxim: Yes. If our Spirit is embodied by 30%, then maybe another 30% of the same Spirit is embodied somewhere in another person.

Irina: For an earthly intelligent being, for a person, it is necessary that 70% of the Spirit be in the Spiritual world and give him spiritual energy to maintain 30% in the body.

Maxim: What then is meant by “twin flames”?

Irina: If 30% is incarnated in one body and 30% in another body, it means that even less energy of this Spirit, the substance of this Spirit, will remain in the Spiritual world than in incarnation. This is impossible because they will not stay in their bodies.

Maxim: How then do we understand “twin flames”?

Irina: They have a different term: soul mates. We understand as intelligent Spirits who had either long experience of incarnation in different worlds next to each other and close relationships, or as Spirits who met in the Spiritual World and, for example, took care of each other. Spirit from a higher level came to Spirit at a lower level, and this happened over a long period of time, from the point of view of the material world. Or both together.

For example, the same two Spirits: one is incarnate, and the second may not be his Guardian Angel incarnate. After the first Spirit leaves incarnation, they change places: one remains in the Spiritual world, and the other incarnates. This is one example.

We consider them to be soulmates who not only have a similar vibrational frequency, as is usually the case at the same level, but also similar beliefs, thoughts, will, etc. When viewing such contacts on a spiritual level through the Higher Self, this Spirit can feel like a part of them because they have similar energies. It happens.

Maxim: Okay.

21:49 Causes of nosebleeds.

Maxim: My brother is bleeding from his nose. Is there a spiritual reason for this phenomenon?

Irina: I see intracranial pressure. If your brother has intracranial pressure, there may be bleeding and leakage of cerebrospinal fluid from the nose and mouth.

The cause of intracranial pressure at the physical level can be brain injuries, including in childhood or during intrauterine development various infections, for example, toxoplasmosis and some other infections of the spinal cord and brain, meningoencephalitis caused by atypical pathogenic flora. It happens.

Sometimes it is not possible to find a physical cause for this pathology. It is hidden in human genetics. On the spiritual level, this is a test or lesson of the Spirit, which itself voluntarily agreed to incarnate into such a body for various reasons.

I am saying that in this case it is necessary to deal individually with the mother of this child, to ask about the spiritual reasons for what is happening to him. And after that, carry out a comprehensive, full-fledged diagnosis of the person.

23:37 Alien bases on Lake Baikal.

Irina: Are there alien bases in the waters of Lake Baikal?

Maxim: We are going there in September. We will tell you the exact date next week and will present this retreat, describe it and collect applications. Are there military bases in the waters of Lake Baikal, Irina?

Irina: Not in the waters themselves. There is on the border of water and shore. Below the shore is the entrance to the base. Disnit's base is there. At the other end of the lake is the Tikhta base. These two bases

are far from cities, in deserted areas.

24:32 The originality of Christ.

Irina: Is Christ the firstborn in all cycles of the Universe or is everything reset to zero?

Maxim: Interesting question.

Irina: The meaning of the word “primordial” means the first Spirit that appeared before the first cycle of the Universe, when there was nothing yet. This is the Spirit that was born outside of space and outside of time, when there was no other Spirit. That is, all Spirits have always been in the form of Divine Light, but they have not yet realized themselves. They have not gained self-awareness. We were all in the form of Divine Light.

The firstborn son, the firstborn Spirit, was the first to realize himself. This happened not only before the first cycle of the Universe, but also when nothing existed yet. Since the development of the Universe is cyclical, it is not possible to establish this, because matter already existed. We can say that he arose from the Divine Light, the very first.

Regarding the question: “Will he be the firstborn in the next cycle of the Universe?” No, it won’t, because the firstborn cannot disappear. He appeared.

Irina: Tell me about the brownie. Is he moving... We need to look for short questions. Mid, you're right, I don't have time to read it.

Maxim: Should I stop you somewhere?

Irina: Yes.

Maxim: I’ll stop here.

Irina: Great. Look at the very first one.

27:32 Gases in the bodies of aliens.

Maxim: Do they fart? A person is interested in whether they have some other organism.

Irina: (LiShioni and MidgasKaus) Their bodies do not produce gases that can come out, like yours, through the anus. For example, in LiSioni's body, those gases that are released during the digestion of proteins combine with other substances from the blood and do not exit as gas. As for the Eslerites, they digest all proteins to other final stages of protein breakdown, and those substances that contain sulfur and nitrogen are processed by special microorganisms into amino acids.

Maxim: It turns out that the question was interesting.

28:45 Physical violence in the family.

Irina: My friend Lyudmila is being beaten by her son Andrei. Tell me how to help her?

Maxim: Yes, help.

Irina: If she cannot defend herself, if she has any physical injuries, it is better to involve law enforcement agencies to suppress these actions.

I believe that allowing yourself to be beaten is dislike for yourself. And if she doesn’t love herself, then she can’t love her son either. It’s one thing when there is misunderstanding at the verbal level and a completely different thing when there is physical assault. If she understands indulgence in this as love for her son, this is a completely wrong understanding of love.

The fact that she allows herself to be beaten and does not take any

measures to stop these actions only allows his heart to harden. Then it will be more difficult for him to overcome and harmonize his own cruelty and anger. Since he beats her, he is angry with her. Anger is a negative emotion.

He does not know how to work with his own negative emotions, since he uses physical violence. There are special laws in the ICJ legislation that help stop these actions. I think they are also in the legislation of the Earth.

I'll just say that allowing yourself to be beaten without taking any measures is a lack of love for yourself, as a daughter of God, as a being who has the right to love, acceptance and peace, just like a son. And if she, I repeat once again, does not love herself, she cannot show love to him.

31:23 Diagnostics of MidgasCaus. Diagnostics at the Cassiopeia Center.

Irina: Can Mead make a diagnosis from a photo, do diagnostics?

Yes, he can do it. He has a long waiting list for diagnostics, and I am now busy with school, as well as taking other people to the Higher Self and attending conferences.

We agreed with him that the diagnosis is now being carried out by a specialist from our Nadezhda Center using the Oberon device. Nadezhda agreed to become a MidgasCaus contactee. He helps her make a diagnosis using the device and give recommendations based on the results of testing the body for various energy disorders.

We have devices on Earth that do this in the same way as MidgasCaus through the Astral. Mead came earlier for diagnostics on the astral level. He did not have any instruments with him that he could, for example, take an analysis, etc. He made diagnostics using the frequencies of various organs, as well as microbes, parasites, etc. Anyone who has been diagnosed with him knows this.

We already have devices that record organ frequencies (they are known to our scientists) and the presence of parasites.

Our specialist Nadezhda is a certified doctor. She underwent certification and additional training to work on the Oberon device. Mead comes to her and gives advice if she asks a question about diagnosing a specific person.

But in special cases, when, for example, a person is seriously ill, has passed through the Higher Self, is at a distance and cannot come to the Center, MidgasCaus looks at him in an extraordinary manner, from a photograph. For this you need indications: the Higher Self and a diagnosis of a serious illness.

Maxim: Plus, we have other types of equipment in the Wellness Center, such as Crownoscope, Aurabook, where you can look at your etheric fields and energy structure. In our Wellness Center you can see the presence of any energetic and physical changes. Plus, in our Center there is, I call it, a rejuvenating wellness “Chamber of Light”. This is a biomagnetic resonance bag that rejuvenates cells and restores energy and physical structures in the body.

Come visit us, come to our Wellness Center. We will look at you, study you, find all your worms, bacteria in every body and give feedback. We are not a medical institution, so we do not prescribe pharmaceuticals, only dietary supplements, energy-informational drugs, which are already patented in the Russian Federation. Get recommendations from doctors: nutritionist, physiotherapist, etc.

35:22 Irrational fears of earthlings.

Irina: What is the percentage of xenophobia in the population of planet Earth?

Maxim: Good question.

Irina: Our MS specialists have not conducted such studies on xenophobia. Xenophobia is one of the types of irrational, irrational

fears, that is, unfounded, in terms of protecting human life. This is called “unfounded fears,” an unreasonable excitation of the instinct of self-preservation. There is no threat of death or harm to a person’s health.

The percentage of irrational fears among the Earth's population, approximately with an error of 10-15%, can be felt through the Earth's egregors, which are located in the astral atmosphere or in the noosphere of your planet. The percentage of the adult population that is susceptible to irrational fears is about 37%. This is not only xenophobia, it is also other irrational fears.

Among children, this figure will be even higher. About 60% if you watch with children.

37:03 Incest among aliens.

Irina: Is incest allowed among alien civilizations?

Maxim: What interesting questions are being asked today. Mead, is incest acceptable among alien civilizations?

Irina: This is not prohibited by law. Those who wish to give birth to a child in a consanguineous marriage must undergo a genetic examination, in your opinion, a genetic analysis, in order to find out, before entering into such a marriage, the genetic profile of each of the humanoids and correlate which recessive or suppressed genes may emerge if these humanoids are crossed. Which suppressed or recessive genes can become dominant, and whether these genes are dangerous for the offspring.

If this is so, then there are special genetic (you don’t have such devices yet) inductors that reduce this probability to almost half a percent, about 80%. But it is not safe for the health of the bodies of these humanoids. There may be various organ disorders. Everyone makes their own choice.

Maxim: Great. I stop chat anywhere.

Irina: Please tell us what the Great Attractor is? The terminology is not familiar to them. What is this? What is it about?

Maxim: I don't know this terminology either.

Irina: Unfortunately, they do not read books on modern esotericism or ancient occult teachings, especially since MidgasKaus is a biologist, and LiShioni is a specialist in astral interactions. Everything they know about our terms, they take either from the MS database or from the memory of contactees with whom they communicate. They had never seen anything like this.

Maxim: I'll translate and stop now.

39:55 Non-interference of aliens in the development of the Earth. Safety of contactees.

Irina: Why did our creators abandon us after the war 12 thousand years ago? We communicated normally?

They didn't abandon us. They gave us independence, approximately one and a half thousand years after the return of earthlings to their homeland, after the war 12 thousand years ago. We were returned to our renewed Earth, and we began to live independently.

About 1.5 thousand years later there was an attempt to build a starship or spaceship that could fly to the Moon, as to the city of the Gods. The spacecraft was built using technologies that people knew before the war. They were handed over by curators.

Since it was not built correctly, representatives of Burhad intervened. They told people that before flying into space, you need to develop your civilization, lay the foundation for the construction of similar ships, so that you can be equal partners with the MS.

To make development happen faster, people were given several

languages that were different from each other, and their genetics were slightly changed so that they could live in different parts of the Earth, which had changed climatically. And also so that people of different races can learn to interact with each other before joining the MS, where there are even more similar and diverse races.

After your people settled across different continents, which were already divided, they gave rise to different languages among tribes and peoples. At that time open contacts with your representatives still continued.

In the period from seven to six thousand years ago, many new people were born on Earth, who, for various reasons, began to fight among themselves and enter into conflicts over religious, territorial issues, laws of blood feud, etc. This happens at the initial stage of development of many civilizations.

At this stage, your representatives who were in contact with the Burkhadians were increasingly striving for independent development. There were even proposals that Burkhad's representatives leave Earth and not observe or influence your development.

The MC decided to limit its contacts with earthlings by creating, for example, religion, various philosophical movements, privately through contactees so that you yourself could go through a development cycle that will lead you to moral, spiritual and physical perfection.

Many MS scientists believed that it is impossible to interfere in the affairs of young races, this leads to their degradation and infantilism, preventing them from joining the MS on equal rights.

It was decided to leave bases for observation, for contacts, so that, in the event of any cataclysms, it would be possible to intervene, as happened, for example, at the time of the Chernobyl accident, as happened in many cases of battles between earthlings.

Our ships appeared. They were forbidden to interfere in the battle, but the earthlings could see them and disperse. This had no lasting effect.

Then the war continued anyway.

In the 20th century, when your governments decided to start a nuclear war, which threatened the destruction of the entire Earth, they entered into open contact with representatives of the two countries against their will: they were simply taken away. Tashig and Esler's ship transported them to the lunar base. They were warned that they could lose their power if they do not reconsider their policies and stop launching nuclear-tipped missiles towards their opponents. Several such missiles have already been intercepted. There were no such incidents after that.

Now official contacts of the MS and GFS and any other galactic or extragalactic intelligent force of a dense material type with your governments can only be initiated with the permission of the MS for the purposes that I spoke about earlier.

As for the safety of contactees in the conditions in which the Earth finds itself. Recently, a decision was made to allow physical contact only on special types of ships under electromagnetic protection from photon reflection. Antiphoton field. The ship will be invisible.

This happened because you have improved technologies for detecting flying objects, military weapons that are used in air battles. It becomes faster and more destructive. After the death of several hundred of our ships, the MS took such a step.

48:08 Testing at the Wellness Center.

Maxim: I see. Guys, I see you have a lot of questions about health and diagnostics. Our Wellness Center does not perform diagnostics. He's doing testing.

If you have any problems that other places have not found or identified, you can try getting tested. We will give you feedback and help you determine the cause of your physical ailments.

Through your Higher Self, we can determine the spiritual cause of your

illness. Both the Soul and the body need to be treated. Our doctors, unfortunately, forgot who Hippocrates was when they swore an oath to him. Hippocrates said that before treating the body, the Soul must be treated. Determining the spiritual cause of a disease is the main motive for the existence of a Wellness Center. Next, with the help of equipment, we will identify destructive causes that prevent the physical body from existing harmoniously.

I'm stopping, Irina.

49:19 5D. Incarnation of Spirits in worlds of different densities.

Irina: When will we move to 5D if there is no mass contact? What is 5D?

Maxim: What is 5D? They call it a new dimension. People think that we should leave our physical bodies and move into some new dimension.

Irina: Why?

Maxim: One of the contactees promises them a happy life in 5D.

Irina: What kind of happy life?

Maxim: I don’t know. No bodies, no problems, I guess. In 5D someone wants to leave. Leave this world of physical density, reality.

Irina: Physical World of 3rd density, probably. 3D - you name it. It was most likely created for a reason. It is created from the same energies that make up 5D, 10D, and 20D, only in a more dense form so that the Spirits who incarnate in this density can learn lessons in developing positive personality traits and harmonizing negative ones with the help of those tools. which a given planet, a given density provides.

Or do you mean (now Mead has suggested) not the entire planet, but

the Spirits that are embodied, that you want to move into 5D? Are you asking about those creatures, Spirits? All of them are known, those that are currently incarnated in third density on planet Earth. This whole gathering of Spirits you mean? When will they go into embodiment in other worlds, where there is a different density, that is, in our terminology, into plasmoid worlds?

If this question interests you, then any Spirit can incarnate in any density. After incarnation on Earth, he can move to the 5th density and to the 50th if this corresponds to his life task and is approved by his Consulting Angels, who help select an incarnation to solve his specific problems. That is, maybe you will move on.

Maxim: If you really want to, you can die and go to 5D.

Irina: Yes, you can incarnate as a plasmoid. We already had such people.

Maxim: They say that 5D is a state of consciousness, and not leaving the body.

Irina: Then explain how 5D differs from 3D, from our consciousness?

Maxim: Please give an explanation of how 5D differs from 3D in your understanding. Where are you going to move to?

Irina: You don't think that I, MidgasKaus or LiShioni study our entire Internet and know about the understanding that you mean? Explain in different terminology so that we can understand you.

Maxim: Yes.

52:37 Physical vibrations. Spiritual vibrations.

Irina: Can you define vibrations? What is vibration in spiritual terms? Interest Ask.

Maxim: He writes for the 10th or 20th time.

Irina: What is vibration in spiritual terms?

The word “vibration” is translated into Russian as vibrations or waves. The entire Universe consists of waves of energy of one or another vibration frequency. But only a limited number of vibration frequencies can be recorded by the 5 sense organs of a person or other material being, by instruments of the Earth or any other planet. There are vibration frequencies that cannot be recorded by material devices or body receptors. These are vibrations of that spiritual Light, of which the entire objective and subjective reality surrounding you consists. This is called spiritual vibrations.

Material vibrations are the vibrations of material forms of energy that make up individual electrons, from your physics - photons and atoms. Spiritual vibrations are the vibrations of your feelings, thoughts, emotions, will, desires, that which cannot be measured.

Maxim: I’m looking at the questions. Nobody explained anything about 5D. What do they mean by 5D? I'll stop all the questions for you.

Irina: Maybe they wrote something?

Maxim: No, I don’t see. Not a single explanation about 5D.

Irina: In the film “The Plan” by Dmitry Zodchy, I found answers to many questions, and it talks about a different frequency. This is the world of Spirits. To what percentage is this true?

Unfortunately, I haven't seen the movie "Content", so MidgasCaus and LiSioni can't count in my memory what you mean. But if you are talking about a different vibration frequency, then this is most likely a plasmoid world. Yes, this is the world of Spirits, but I want to tell you a little secret: our world is also the world of Spirits. We are all Spirits. Only we are embodied in a 3rd density body. They can be embodied in a body of a different density.

Irina: Definition of the word “subpersonality”?

Maxim: Let them open the Dahl dictionary and the Internet.

Irina: “Sub” is something nearby, right?

Maxim: I propose other questions, more specific.

Irina: “Drunk” forests.

Maxim: Mead or LiShioni, have you heard what “drunk” forests are?

Irina: If you pour mash on an apple tree, will a drunken apple grow out of it?

Maxim: Now they will throw rotten apples at us for such answers.

Irina: I don't know what it is. He did not see. What kind of question is this?

Maxim: Unfortunately, we don’t understand what “drunk forests” are.

56:16 Osho contactor. Consequences of increasing the amount of oxygen in the Earth's atmosphere.

Irina: About Osho? Osho was a contactee with plasmoid civilizations. He also had curators from the planet Shimor, Esler and Burkhad, but they came sometimes. He was a universal contactee.

Maxim: Did he receive information from plasmoids and humanoids?

Irina: And from the Spiritual world. We call them universal contactors. Civilizations of different types can come to them.

Irina: What will happen to people and animals on Earth if we increase oxygen by 20%?

Maxim: Yes, Mid, what will happen to us?

Irina: If it's 20%, nothing bad will happen, you'll just feel quite unusual for a while. It is possible that road accidents due to oxygen poisoning will become more frequent. In people who are born in the first two or three generations, a mutation will occur in the gene that is responsible for the transfer of oxygen by hemoglobin, and you will perceive it differently, you will be in a clear consciousness.

This is similar to a mutation in the genes of peoples who live in high mountains, where, on the contrary, there is less oxygen. In them, this gene has mutated in such a way that the red blood cells have a much larger area of contact with gases dissolved in the blood. They can carry more oxygen than the average population. People who descend from the highlands to the plains at first feel discomfort from the oxygen content being too high for them.

Maxim: From the highlands to the plains?

Irina: Yes.

58:42 Ways of communication between contactees and Christ.

Irina: Did any of the contactees visit Christ on Burkhad?

There were several dozen contactees on Burkhad, but Christ did not physically have them. Christ only had MC representatives on his island.

Maxim: Christ didn't have physical contactees?

Irina: Excluding his mother, whom he chose himself. She

communicated with him during her lifetime.

Maxim: I see. Do all other contactees communicate with phantoms?

Irina: With phantoms and with Christ consciousness.

Maksim. And with Christ consciousness.

Last question. Guys, we have very little time left, almost one minute. We will now randomly select one of the questions for today's broadcast. Write a question. We'll stop him. Read. Choose anyone.

Irina: Now. Oh, about 5D, they wrote.

Maxim: Plasmoids believe that 5D is a transition to a new level of consciousness. The quantum transition leads us to this. They say you need to raise your vibrations so as not to remain in this 3D matrix.

If 5D is a new level of awareness and a new level of vibration, then this is a different point.

Irina: Why not call it that: a new level of consciousness in Absolute Love, for example? Why do they call it a different density? Do they believe that there is more Love in their density? Maybe not so.

Maxim: The word “measurement” is very slippery in terms of understanding. Everyone understands it differently. What is measurement anyway? And how to measure this measurement?

1:00:44 The appearance of different races on Earth.

Irina: Were different races on Earth created by representatives of different planets?

No, the genetics are the same among representatives of the Earth. When the different races were created, the scientists were mainly from Burhad and their colonies. They changed human DNA, did not introduce new DNA, but changed existing ones in such a way that some characteristics increased or decreased.

Representatives of different races existed on Earth bases and came into contact with earthlings (at that time this was allowed). Joint hybrids were born, an example with Krishna from representative Shimora.

From the representatives of Tumesout came a tribe of taller and stronger people. There were already genetically modified ones.

At this time, the changes that were made by other races have practically disappeared into your DNA, because such experiments have not been carried out on Earth for a long time.

Maxim: If we get 1000 likes, we will extend the stream by 10 minutes. I promise you. Thanks to your likes, we have the opportunity to position ourselves.

Irina: A minute hasn’t passed. People, you surprise me.

Maxim: Did you dial?

Irina: Look what's going on?

Maxim: Almost dialed?

Irina: Thank you.

Maxim: I understand, we will dial.

Irina: I'll drink water for now.

Maxim: Yes.

Irina: Thank you.

Maxim: We thank you for your support. It is very important and necessary. I want to thank every person who helps our Project grow and develop with all my Soul, with all my heart.

1:03:32 Subprojects of Cassiopeia.

Maxim: Our Project already has a sufficient number of interesting subprojects. Such as “Meditation”, “Galactic Federation of Light”, “Cosmohealing”, “Cosmoenergetics”, “Calculation of the Tree of Life”, “Calculation of the Spiritual Level”. You can read about the subprojects below, after the video. The descriptive part contains absolutely all the subprojects of the Cassiopeia Project.

We extend the stream by 10 minutes. 21:05. We must finish at 21:15. I'm stopping.

1:04:18 Formation of religions on Earth. The concept of "sect".

Irina: Please tell us in more detail how religions are formed on Earth?

Religions on Earth are formed from small groups. We will tell you a little about who are called “sects”.

Maxim: Yes, a very interesting question.

Irina: Compatible, so to speak.

Maxim: Question about religions and sects.

Irina: You have all heard the word “sect”. It's on everyone's lips. It is

interpreted by modern people as a negative phenomenon. For different reasons. All major religions are formed from small sects.

Maxim: If you define a sect, we can definitely be called one.

Irina : A sect is a group of people who have accepted a doctrine about God or about Higher Powers, about the invisible world, invisible Spirits, about rituals of communication with them, which is not similar to the religious ideas of society. Buddhism, Christianity, Islam are the three largest religions. Judaism is the fourth religion.

There was a time when these religions did not exist. The prophets who brought these religions, the religious teachers who brought ideas, were only preachers of a new truth, which they received, most often, in contacts with their Higher Self, with the Consulting Angel, with the MS, with plasmoids, etc.

Most often, the founders of religions were universal contactees. Or, as in the case of Jesus Christ, they were half human and half alien. He has been a contactee since childhood. The group of followers that gathered around the founder of the religion was called a sect.

And only several centuries after the religious teacher came out of incarnation, a major religion was created by his followers based on his actions, words that were written down by his students or passed down from memory.

If people call someone a sect, this suggests that this is a small seed, perhaps, of a large tree of religion. Whether it will develop into a religion or not depends on many factors, the main one of which is the need and relevance of these ideas for planet Earth.

If it is relevant, the seed will germinate and bear fruit 30, 60 or 100 times, depending on how much this idea is accepted by the hearts of other people.

Each person explains religion to himself in his own way, gives his own interpretations of the meanings that he reads in religious books.

Religions are created by people like us, based on the messages transmitted by contactees, even with the Spiritual world. A person is in contact with Higher beings, higher vibration ones.

The purpose of creating a religion is to increase the awareness of earthlings, to increase their vibration level so that they know the commandments of God, that there is a Spiritual world, spiritual laws. Their violation, as well as the violation of physical laws, sometimes leads to the physical death of the organism. For example, you cannot jump out of a 10th or 14th floor window and remain alive and unharmed. This is a violation of physical laws. Also in the spiritual sphere there are its own laws, violating which the Spirit dies spiritually, that is, it departs from the Source of life. Religions speak about this in the language of their time, their country and those preachers who carry the ideas of this small sect further.

(MidgasKaus speaking). All religions began from small sects. The same applies to Christianity. 2000, even 1900 years ago it was a small sect within the Jewish religion.

Maxim: I'll stop the question, choose.

1:10:25 Consequences of actions and deeds. The "root" of character. Subjective personal world. The concept of "born in the Spirit."

Irina: Irina, please tell me, do I understand correctly that none of my actions have consequences, but only my emotions?

Actions also have consequences, but (LiSioni and MidgasKaus say) your actions on the physical level are a reflection and creation of your inner life. Your actions and deeds come from the root of your character, which includes emotions, desires, thoughts, aspirations, dreams and feelings. All this forms your subjective personal world, completely unique in the entire Universe. Based on this unique world, you make the choice that corresponds to the desire of your Heart. It is this choice that carries consequences.

Maxim : Thank you. Someone: “SOS!” - shouts.

Irina: What happened?

Maxim: Please tell me what it means to be born in another dimension while living here?

Irina: We ask too. What does it mean to be born in another dimension while living here?

Maxim: So we can ask the same question?

Irina: I understand. Mead tells me: “They meant that to be born in another dimension is to incarnate from a plasmoid.”

Maxim: I don’t know.

Irina: There is an understanding of being born in the Spiritual world. There is an understanding - “born in the Spirit.” This is a Christian expression. Maybe you understand this Christian mysticism esoterically? How to be born in another dimension? If this is so, then “born in the Spirit” is one who has realized himself as a spiritual, eternal, immortal, loving and beloved being.

Maxim: We need to clarify. You probably were at someone’s reception, and someone said this phrase to you: “You were born in another dimension.” Let the person who told you this phrase explain it, because there are many different understandings of it.

Stopped it. Choose any question.

Irina: We’ve already talked about the negative Rh factor. Again.

1:13:24 Negative Rh factor.

Irina: Why is the Rh factor negative?

At first, all people were Rh positive. Then, as a result of close family ties, a number of mutations occurred in some tribes. This is where hemophilia came from. This is a mutation of genes - it has several forms that are responsible for proteins and help in blood clotting and protein synthesis. The same is true for negative Rh factor.

What is the Rh factor? This is the factor that is in the blood of all representatives of earthlings from the moment of creation. A whole chain of DNA genes encodes the appearance of this factor in the blood, its synthesis in the blood. This mutation occurred as a result of mixing of similar genes during closely related marriages and contacts. This gene has disappeared from people's DNA. Then the DNA with the altered genes began to be transmitted further throughout the population, but this gene is recessive, suppressed by other genes with a positive Rh factor, so it appears only in individual cases of the birth of a child.

What is it given for? Here the question needs to be asked differently. Why does the Soul choose a body with similar characteristics? This happens for various reasons. Since the negative Rh factor affects negatively, mainly on the offspring, the birth of a child with a positive Rh factor. The Spirit of the mother and the Spirit of the child who will be born from such a mother can choose. The spirit of a mother may choose to be born in a body with a negative Rh factor so that the child that is born to her will acquire a body property that will create a danger for him to leave incarnation. This is the same as with congenital karmic diseases. This is a lesson for the Spirit of the child who will incarnate - for various reasons he needs to pass certain tests - and for the Spirit of the mother and other relatives, so that she takes care of him, as with congenital diseases from karmic knots.

Maxim: Irina, I found an extreme question for you.

Irina: Read.

1:16:21 About the upcoming meeting with Mitya.

Maxim: When will the meeting with Mitya take place?

Irina: Soon.

Maxim: Rafael how he feels.

Irina: Very, very soon.

Maxim: We will not say the date. We have our reasons. In the near future.

Irina: I'm also looking forward to this meeting. It is very interesting to me.

Maxim: We agreed on everything, agreed. We were given consent to meet with Miti on the ship near Ashtar. Irina will see Ashtar and Mitya for the first time.

Irina: Yes, physically.

Maxim: We have prepared a number of questions for Mitya: about the contradictions that arise when transmitting information to the MS and the State Fiscal Service and information from Mitya's contactee. Guys, thank you all so much for the broadcast and for your support.

The haters who are trying to convict us of lies, deception, and everything else, I also say to you: "Thank you very much!" You also provide an opportunity to advertise us in those circles that have not yet heard or understood us.

Guys, I give everyone a big hug, no matter how obsolete you are or want to lower your vibration. I send you my Light of Love.

Irina: I also thank you for the interesting questions. A very interesting experiment when I read the questions and answered. I will say hello to

Ashtar, Kirchiton and Mitya from all of you. I'll be sure to tell you what I found out. See you again!

Maxim: Look next week for a report on the retreat, on Monday, tomorrow. There will be a short video about Belarus with feedback from people.

Next week, catch the video where we will sign you up for a very interesting retreat on Lake Baikal, about a datsan with Lama Itigelov. We are going to talk to him. Bye everyone. Once again, thank you very much for watching, believing and supporting us.

May 23, 2021.

Participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia Project and the Center for Spiritual and Physical Development;

MidgasKaus - representative of the planet Esler, biologist, psychologist, specialist in alien life forms;

LiShioni is a representative of the planet Shimor, a specialist in the astral world and its interactions with the material world.

#275 Irina Podzorova and Nikolai

Papiyants (Papijanc). Kundalini energies. How to become the Creator of your Universe?

https://blog.cassiopeia.center/irina-podzorova-i-nikolaj-papijanc-ehnergii-kundal

00:04 Introduction of the conversation participants.

Irina: Nikolay, we now introduce ourselves and begin.

Nikolai: Okay.

Irina: Hello, dear friends! My name is Irina Podzorova, I am a contactee with extraterrestrial civilizations. Today we will have a conversation with a specialist from our Cassiopeia Center, whom many of you already know well. His name is Nikolai. Hello, Nikolay! Tell us a little about yourself and what you do.

00:33 Work by Nikolai Papiyants, a specialist at the Cassiopeia Center.

Nikolay: Good evening! I help people build a connection with their Higher Self, with their Spirit through various practices. Who is already ready, who is already built, for that practice of the same level. When people come who have recently learned about the Higher Self and really want to build a connection with it, then these practices are quite complex. It requires building and activating the lower bodies first, reaching the middle body, raising the crystal of love, and activating it. You need to activate Kundalini, sexual energy, and then go to the upper bodies.

Irina: Great. You correctly noted that without adjusting the first three energy centers, it will be very difficult to exit through the upper energy

center, through the spiritual channel into the Spiritual world to your Higher Self. Because simply there may not be enough energy to support the channel.

Does it immediately become clear to you that the lower energy centers need to be adjusted? Are these people somehow different?

Nikolai: I always talk to people first. The person is immediately visible. Firstly, I feel it energetically. Secondly, it is immediately clear how developed a person is and what kind of practice he needs. There are people who have been practicing for decades, and they have almost everything built, but some details are missing to go out and hear their True Self, their Divine Self. But for some, you need to start almost from scratch.

What are the benefits of these practices? They speed up the process. If you take our elders, monks or yogis, who sit in cells or caves for decades and raise their Kundalini energy, their vibrations. This practice can literally activate this process in one or several times. As a rule, I record this practice, and then the person practices for 21 days. Even if it doesn't work out the first time, then from the 3rd, 5th or 10th he will definitely be able to if he does everything correctly.

This practice helps to raise the Kundalini energy and expand the central Sushumna channel. Through the central channel Sushumna, the Kundalini energy can calmly rise and fall. The assemblage point depends on what a person does. If, for example, a person is engaged in his everyday earthly affairs, then naturally his assemblage point is on the lower 3 centers.

When he needs to communicate with his Soul, some spiritual tasks, then he enters the heart space. When he needs creativity, then he goes higher - to the 5th chakra. And when he wants to demonstrate telepathic or some kind of extrasensory abilities, then the assemblage point automatically rises higher, and it is easy for him to enter any portals and connect with those with whom he wishes, if, of course, he knows how to do this.

04:04 Universal practice "Acquiring the Holy Spirit."

Irina: Thank you! Can a person himself, through some independent practice, adjust his three lower energy centers and raise the Kundalini energy?

Nikolay: I have a lot of audio recordings that I give to people to listen to in advance. Some people succeed.

Anastasia gives me my information, my page. Some come to my page, look, see something, and they don't even need me anymore. There are such people. They themselves, communicating with my audio files, build and turn on the channel. It's easy for them to build it. But not everyone succeeds, of course.

Irina: And besides audio recordings? In any esoteric, religious teachings of the Earth, are there any other practices, besides yours, for pumping up these energy centers? If yes, then name them, please.

Nikolay: There are a lot of these practices, a large number of them. For example, the practice "Acquiring the Holy Spirit." This is a universal practice when a person is in a harmonious, even state. He simply with his state attracts, draws in, twists this Divine spiral, creating a torsion field when his energy structure, energy system, system of channels, meridians, parallels, chakra system twists this spiral and draws it in through the crown or through the skin, through every cell and every atom of this universal Divine energy, the energy of the Creator, the energy of the Holy Spirit.

There are many special and yogic practices. I don't do these practices now. My practices came to me in meditation. I don't count them among myself, but I haven't read about them anywhere or heard about them anywhere. They just came to me from the Higher Powers.

06:12 The spiritual path of Nikolai Papiants. Curators N. Papiyanets.

Irina: This is already very interesting. Next question: tell us a little about yourself. How did you become aware of yourself as a spiritual being? How did you realize that you wanted to follow the path of

developing love, and how did you understand that these practices are necessary? Tell us a little about your journey.

Nikolai: I realized myself, one might even say, by accident, as usually happens to everyone. At one fine moment you became interested in something, something unearthly. You thought that you are not only what you see in the mirror. Then - some little book, some brochure, you start to dig deeper about yourself, about others, and gradually, little by little, thread by thread, ball by ball, you unwind and gain some knowledge.

At first this knowledge is superficial. And then interest comes, and you understand that you somehow cannot and cannot live without it. It generally becomes your way of life. And then it turns out that you, it turns out, are completely different from who you thought you were up to a certain point in time, i.e. your supernatural becomes natural for you. It is present in you every day.

Then all sorts of wonderful things come when you receive some information from the flow of energies. And at one fine moment you realize that these energies are not just energies, but they help fill not only you, but also the space around you. And those people who communicate with you also begin to build up.

Then I discovered that I am a conductor of the Divine channel of the Creator's love. As if by chance, but in fact it was not by chance. Then I discovered my curators, mentors.

Irina: Yes, we know that you are a contactee, you have curators. Who are your main supervisors, and how do you communicate with them?

Nikolay: My main curator is Archangel Michael. I have many curators and mentors. Almost the entire hierarchy of Light are my mentors, curators and friends.

08:45 Nikolay Papiyants' communication with the curators.

Irina: So, you have curators from the Spiritual world. How do you

communicate with them? Do they come to you at a certain time, or do you call them?

Nikolai: They are always with me. In general, all our Guardian Angels, our mentors, Archangels are always nearby. When we pay attention to them, with this attention we seem to activate this connection.

In fact, the subtle world is always within us. We constantly think that it is somewhere far away, high up. In fact, it is among us, it is in us. God is within us. And the Higher Self is within us. Therefore, when we turn within ourselves through our portal, through our spiritual heart, we can connect with anyone, anytime. But this usually comes spontaneously.

09:39 Communication with the Higher Self. Acceptance.

Irina: You help other people go to their Higher Self, to the True Self. Tell us what the Higher Self is for you, and how do you distinguish the thought of your Higher Self from the thoughts of your mind?

Nikolay: Our Higher Self is who we are, i.e. we are. Our Spirit delegated us here as a Soul, gave us four lower bodies, i.e. The Earth gave us these 4 lower bodies so that we could undergo some experiments, programs, and solve problems. Therefore, the Higher Self is the True Self. This is my light of Divine love. That's what I am. It’s just that to a certain level, not every person understands that he is not only what he sees in the mirror, but that, in addition to this, he has 6 more bodies.

Therefore, in order to reach the Higher Self, you must first accept your true self, the way you are here on Earth, accept everything as it is, everything completely, from the first inhalation to the last exhalation. To do this, you need to accept all your mistakes, everything that happened to you in this life. Just have to take it all in at once.

There are many practices when a person begins to obtain his various experiences through regressive hypnosis. But you can accept everything at once. Agree that everything that happens happens according to the will of God, and you are God’s messenger. You have

come here to this world only to help yourself as a Spirit reach a higher level and help other people, if you understand this.

11:23 Confirmation of contact with the Higher Self. Level of consciousness.

Irina: Now you said that the Higher Selves are who we are. We are constantly in contact with our Higher Self. But for what reason is this so unconscious for many people that they need specialists to talk to themselves?

Nikolai: I agree. For example, if I hear prompts from my Higher Self through my inner voice, first of all, they never raise any doubt. When the slightest doubt appears, it means you need to think: is it coming from the mind or from the Higher Self? As I understand it, if you hear a hint from the Higher Self, it simply does not raise any doubts, even if the person, for example, does not possess any energies and is not hypersensitive. A simple person does not engage in any spiritual practices.

But if a person engages in spiritual practices, then he receives confirmation through the flow of energy. For me this happens in a powerful vertical flow. A powerful stream of energy penetrates me from top to bottom, and I understand that this is confirmation that I am communicating with my Higher Self. Some people feel through some parts of the body. You can ask questions and ask questions. For example: “Show me those feelings so that I understand that I am communicating with you.”

For each person, confirmation appears differently and in completely different places. Someone sees the pictures. Someone hears some clues in their head. It's different for everyone. There is not a single person who is the same so that he can say: “It’s like that for me,” and someone else can say: “It’s like that for me, too.”

Irina: What prevents us from communicating constantly, consciously with our Higher Self?

Nikolay: Firstly, the consciousness is not built. When consciousness is not completely pure, it does not allow complete perception. Spiritual knowledge is never given to anyone just like that. As a rule, if a person reads spiritual books, but he is unconscious, his consciousness is polluted, then he simply read it today and forgot tomorrow. Nothing even remains in his memory. Because this is how the system of the Universe is structured: until consciousness reaches a certain level of awareness and development, this spiritual knowledge is simply not given.

This is done, as I understand it, purposefully so that this spiritual knowledge does not harm both this person himself and others, because there are many side effects there. When we engage in spiritual practices, some sidhi may open up - this means beyond our capabilities, extrasensory abilities. Many people get carried away with this and forget about their spiritual development. They begin to develop horizontally. And this, by and large, leads to the side.

14:44 What pollutes a person's consciousness? Human chakras.

Irina: What pollutes a person's consciousness?

Nikolay: Firstly **,** information, education from childhood.

Irina: Information about what?

Nikolay: Information about how this world is created. If we take our whole world, watch television, read newspapers, and a person conforms and does what is written there, then we will never come to any awareness. When a person becomes aware of himself, he understands that all knowledge is within him. They appear spontaneously.

Irina: We all learn something in this world. What is information? This is a tool that can be aimed at different purposes. If we use information, this is one of the main characteristics of the Universe.

The material world has characteristics: energy, matter and information.

But information also exists in the Spiritual world. Indeed, there is information that can pollute our consciousness. What else can interfere with our communication with the Higher Self?

Nikolay: When a person is at low vibrations, at a low level of awareness, naturally, he perceives information at his level.

Irina: We talked about the three lower chakras, then about the three upper ones. This means that the human energy structure consists of chakras. These chakras contain different energies. What needs to be done to keep them clean?

Nikolai: The first chakra is the physical body. She is the lowest in vibration. When a person lives on the first chakra, this is life at the animal level. He simply knows how to defend himself, reproduce and somehow exist.

When a person reaches the second chakra, he can already show some small creativity, earn money, and improve his life. The third chakra has even higher vibrations, and so on.

When a person enters the heart space, he can already reach a higher spiritual level. When he goes even higher, his creative potential and talents are revealed. He may already be communicating with some supernatural or alien creatures, etc.

18:01 Purpose of the Human Soul.

Irina: I see. Please tell me what thoughts, feelings, and actions of ours can raise our vibrations? To pollute consciousness or, conversely, to cleanse it?

Nikolai: Naturally, spiritual practice is the path to God. What is yoga? Yoga is the road, the path to God. Therefore, when we engage in yoga or spiritual practices, this is the path of awareness, the path of development of the Soul. The Soul comes with the sole purpose of realizing its inner Light, its love, finding it and helping others also find this love and connect with their Spirit, with their Higher Self. This is the

task of any Soul.

Many people ask about the purpose of their Soul. The purpose for a person as a Soul is the same for everyone: to find his love and his Light. And his purpose as a person is to discover his creative potential. Because man came here not only to develop spiritually, but also to become a creator. First he must become the creator of his inner Universe. By the way, in these practices we activate our inner Universe, which over time develops into the outer Universe. Therefore, when we give birth to our Universe, we become creators. Therefore, when you come to higher worlds, you are already creating other worlds and other Universes there.

19:36 Practices of Nikolai Papiyanets. Archangel Michael, MidgasKaus, LiShioni and plasmoids - curators of Nikolai Papiyanets. How to get an internship with Nikolai?

Irina: Very interesting. Thank you! Nikolay, tell me, are these practices the same for you? Or do they change over time?

Nikolai: They are never the same. For each person, something is always added spontaneously. Somewhere less, somewhere more. There is no such pattern that everyone has everything the same.

Irina: Do curators give you information about them? Archangel Michael? Are you learning from him?

Nikolay: Yes, both from Archangel Michael, and, as far as I understand, I have curators from both LiSioni and MidgasCaus. I just don't have the same established contact as you, Irina. But, nevertheless, through some sleepers I myself intuitively understand that this information is coming. Then I find out that LiSioni spoke exactly as I do.

Irina: So your curators are: Archangel Michael, MidgasCaus and LiShioni.

Nikolai: Yes, including them too.

Irina: Very interesting, thank you.

Nikolai: I also have plasmoids.

Irina: And there are plasmoids?

Nikolai: Yes, you yourself said that I was a plasmoid of the 48th density level, so my plasmoid friends always help me. They participate in my practice.

Irina: Interesting. Tell me, if a person wants to come to your practice, how can this be done?

Nikolai: Firstly, the administration of the Cassiopeia project has a record. There is a wonderful Anastasia, can I make an appointment with her, please. Or some people just find out somehow. They're calling me.

Irina: You have one main practice that you can sign up for, i.e. are you ready to help people with this one thing? Or do you have a number of different practices?

Nikolay: I have a psychological, psychic structure of the body of Light.

21:40 Setting up the body of Light. Mer-ka-ba.

Irina: Attuning the body of Light - what is it?

Nikolai: This is the activation of mer-ka-ba. This is quite a difficult practice. It's not for everyone. Activation of the mer-ka-ba implies that the person is already very aware. Because if there is complete activation of the mer-ka-ba, this means that your thoughts should simply come true. Therefore, the Higher powers do not give full activation to everyone. And if they give it, then you'll think that you should be able to do it instantly. Your desires, your thoughts should

become material instantly.

22:17 Practices you can sign up for. Spiritual healing.

Irina: Almost God level. Please tell us what practices anyone can sign up for with you, and a little about them.

Nikolay: Those practices that you said. Cleansing, a comprehensive cleansing occurs. Recently there has been a universal practice - “spiritual healing”. I ask, turning to the Soul, to the Higher Self, and if the Soul is ready to heal, then spiritual healing occurs: alignment of the spine, alignment of all bones, muscles, tendons, joints occurs automatically. When healing occurs, when liberation from all infernal channels and subsoilers occurs, this happens in almost every practice for everyone. There are a lot of settlers. Almost everyone has them.

23:22 Residents, who are they? Larvae, infernal entities.

Irina: Residents, who are they? Who can join us?

Nikolay: When people live unconsciously, with their thoughts, their low negative emotions, they attract all sorts of entities, larvae and others. There are an incredible number of them.

And plus there are still real settlers. Spirits who, through infernal channels, when people engage in obscene activities, for example, are intoxicated with alcohol or drugs, or make love in the guna of ignorance, can allow infernal entities into themselves.

Therefore, before building the body, I always do cleansing. First comes cleansing, getting rid of all infernal channels, and then only construction and activation takes place.

Irina: Is this necessary for everyone who applies?

Nikolay: Yes, almost everyone.

Irina: If he has something, it will work out. If there is nothing, then it will become even cleaner.

Nikolai: Okay, it will become cleaner. Each person makes a conscious intention, expresses pure intention for everything to happen, what is needed. So that he returns his lost energies for all his lives since the birth of the Soul in all incarnations. There is a practice of forgiveness, filling, cleansing, deliverance and healing.

Spiritual healing occurs only when the Soul is ready to be healed. If a person does not want to change, he has not forgiven, has not accepted, accepts someone, does not accept someone. This will never heal. There may be some relief, some improvement in well-being, health status.

First of all, no one heals anyone. The Creator heals. And, in general, a person heals himself, he turns on the life program, and self-healing occurs. We only conduct these flows, i.e. these energies, that's all.

25:40 Working conditions for Nikolai Papiyants in the Cassiopeia project, the price of his services.

Irina: I see, thank you. Very interesting and correct. Please tell me, under what conditions do you work in our Cassiopeia project? Is there a price for your services?

Nikolay: The price is “donation”, “according to the heart”. Each person, how many opportunities he has, and what kind of heart he has. How he himself evaluates, how he himself perceives, how much this practice has benefited him. Everyone does it themselves. Some people just forget, and we also forget that they forget. Anything can happen.

Irina: There is nothing accidental in this world.

Nikolai: Of course.

Irina: So, this person was not brought in by chance either. So, the person decides how much to pay?

Nikolai: Only himself. This is practice “from the heart”.

26:38 Healing infertility.

Irina: I heard that you have a practice for those who cannot give birth to children, so that they find a child faster. Tell us a little about this.

Nikolai: I don’t do anything special for this.

Irina: What is required for this? Should you contact two?

Nikolai: Firstly, if a person harbors this idea, the thought, when he comes, communicates with me, firstly, and my plasmoids help, and the practice of raising Kundalini energy. Here the activation of sexual energy, the sexual chakra, occurs. People begin to feel better sexually. For some, frigidity disappears, for others, something else improves. The energy itself does this. The most important thing is that the person himself wants it, desires it. And most importantly, when there is faith.

I noticed this tendency: when there are doubts, a person at first seems to believe, and then after two or three days he has some kind of doubt, and he crosses out himself. It seems to block this flow.

When he believes, he opens, he connects to this Divine ocean of the Creator’s love, to this river of purification. Not only is he constantly purifying himself, but at the same time he is raising his vibrations. If he believes in all this, he simply works it out, burns his karma. When he doubts, the slightest doubt simply blocks this flow. Therefore, everything depends on each person, how much faith in himself and faith in God he has.

28:25 Wishes of Nikolai Papiyants to subscribers and viewers. Love for God.

Irina: Thank you, very interesting. What would you like to say to all our subscribers and all those who are watching us now?

Nikolai: I would wish for everyone that everyone strives to find their True Light, their inner Light and their True Love. Love for yourself, love for God. But love for God does not manifest itself simply as for some abstract God. God is everything! God is love. Love for one's neighbor is love for God. When we love those who are next to us, and next to us can be not only family and friends, but even those random people who pass by on the street. They are also our neighbors. If we love them, we show love for God.

Even when we may outwardly show some kind of confrontation with someone in society, not every person can be pure and bright both internally and externally. Until he has built himself, he can be whatever he wants externally, but internally he must respect his condition, monitor it. When his internal state is in constant love, in dissolution, sooner or later a moment will come when his internal Universe, internal state will flow into the external state. I would wish that each of us would be able to find our Divine love and transfer our internal state to the external as quickly as possible. Then it will become easier and better for everyone to live in this world.

Irina: Thank you for this story. You just spoke with your curators. I can feel it. You are in the flow, in contact.

Nikolai: Yes, Mikhail is standing behind me.

Irina: I thank all channel subscribers for your attention and ask everyone who wants to get an appointment with Nikolai to make an appointment with him through administrator Anastasia. See you again, friends!

Nikolai: Goodbye!

May 25, 2021

#276 Physical contact between Irina Podzorova and Mitya on the ship of Ashtar Sheran.

https://blog.cassiopeia.center/fizicheskij-kontakt-iriny-podzorovoj-s-miti-na-kor

https://www.youtube.com/watch?v=Z3Z3aFjXeg0

00:21 Greetings to meeting participants.

Vladimir: Dear friends, hello! To be honest, I'm a little worried today, for obvious reasons. Where I'm sitting, it's about five o'clock in the evening, and Irina's is deep into the night. Well after midnight, and, as I understand it, after one in the morning.

And, as we understood, and I understood, Irina recently came into the house after she arrived (twice "after," but excuse me), after physical contact. The same physical contact. She was on a ship near Ashtar Sheran, where she met with Mitya. With the same alien Mitya, about whom we know so much, and from whom we wanted to find out why the information known to us, transmitted by him through other sources, seems to differ from the information from the Interstellar Union (IC). I don't know anything yet, I don't know anything about his answers. Now we will find out everything first-hand. I will find out with you from Irina, who has just literally returned. Irin, come on, I won't ask my questions now. Please tell me in order how it all happened.

Irina: Hello, dear friends. My name is Irina Podzorova. I am a contactee with extraterrestrial civilizations. Today, literally 2 hours ago, I ended my first physical contact this year, in 2021, with Kirchiton. There was a break, as always, for the winter period, besides, according to the new rules of the Interstellar Union, now the

administrators of the Cassiopeia group choose where I will need to fly and for what. And then the Interstellar Union commission on contacts decides. That's what happened this time. The administrators suggested that I fly to Mitya. Since the planet Miti is in another Galaxy, and Kirchiton does not make intergalactic flights with contactees, it was decided that I would meet him on the ship of Ashtar Sheran, a good friend of Miti, who is now at a distance of 44 astronomical units from the Sun in outer space.

02:47 New protection technologies on alien ships - antiphoton field, artificial gravity.

Irina: I want to say that according to the new rules of contacts, physical contacts are now allowed only on ships that are completely shielded from the views of people and instruments by a special anti-photon field. Simply put, the ship at this place will not be visible, because we see light from objects only reflected, that which comes from the Sun and other natural sources of light, is reflected from objects and enters our eyes. An antiphoton field is created that does not allow light to be reflected, and we see emptiness in place of the ship.

It was my first time flying on such a ship. It is radically different from the small flying saucer that I knew during all 20 years of contacts. How is it different? This ship, on which Kirchiton came to pick me up, is also disk-shaped, but silver in color (it was a dark plate), I can't say twice the size, but it is significantly larger. You can say it is one and a half times more than it was then. Big enough.

There is not only an anti-gravity beam that lifted me aboard the ship the last time I made physical contact, but also, finally, artificial gravity has appeared. There is no longer weightlessness on the ship, as it was for 20 years. Kirchiton explained to me that without artificial gravity it is impossible to install antiphoton field devices; it will not work stably. When I found myself on this ship, I was surprised that there was no weightlessness there and told Kirchiton about this. He said, "You can turn off the artificial gravity if you want, I'll do it." To which I said: "No, it's better to leave everything as it is."

I convey greetings to you from Ashtar Sheran, from Mitya from the

planet Mantuk of the M31 Galaxy and from Kirchiton, my first curator.

I want to say that, unlike all my other contacts, when I came to contact this time, I waited in vain for that star and plate that appeared earlier. I didn't see anything. I saw only a greenish light, like a glow from phosphorus, like lights, which seemed to envelop me, and I began to rise upward. Imagine, I didn’t even see the plate. I haven't seen her myself. She was in front of me, but my eyes did not see her. The phone was already switched off at this point. But even if it was on, what would I photograph? Empty place? There is nothing to photograph there anymore.

When I boarded this ship, I immediately found myself inside. I don’t even remember how I passed through, as usually happens, the floor of the ship or some kind of hatch. They just lifted me into the air, and I found myself inside the ship, which already had silver walls inside.

I immediately saw that it was a different ship. Kirchiton stood. I told him: “Greetings. Oh, what technology you have! In my opinion, I came to this forest in vain. You can also pick it up from the balcony.” We joked a little about this. He said that, despite the invisibility, it is impossible to take it from the balcony, because it must be far from electrical appliances, generators, wires, they can be damaged by this antiphoton field. Some highly sensitive devices will turn off and be damaged, and he does not want to do this. Therefore, according to the rules of contact, he makes an appointment (meeting) away from power lines.

Then I sat down on a silver chair that had a curved back, it was already different. I was expecting weightlessness, but there was none. I said: “How interesting, you finally installed an artificial gravity installation.” He says: “If you want, I can turn on weightlessness.” I said, “No, thank you. Let's leave everything as it is." Then he explained to me that artificial gravity must be on the ship, where there is new equipment for creating an invisibility field, because otherwise it will not work correctly due to the difference in gravity.

During the conversations, I didn’t notice how much time had passed, but a few minutes in any case. Some form of gravity jump, I believe. When Kirchiton said to me: “Let’s go,” we left his ship. I saw that we

were indoors. The plate was already in another room. There were several standing in this room, I immediately realized that these were ships, spherical in shape, on three supports. About a dozen more, dark yellow in color, approximately 10-12 meters in diameter. I say approximately, because how tall is Kirchiton, he could easily fit there. There were also ships there, they reminded me of our boat. Like our boat, but with pointed ends on one side and the other. Like our rockets, only without wings and closed. They were gray and had blue stripes on the side. As I understand it, they are also space boats, or something similar. They were closed, only a dark window was on top, I remember. We passed by one.

Then I saw that there was a man standing at the end of this room. He has the same skin color as a human, but much more yellow. It's dark yellow. He's taller. At first I thought it was Ashtar, then I realized that it was not. He said something to Kirchiton in an incomprehensible language. We walked further along the corridor, turned somewhere, and found ourselves in an oval-shaped room. The walls are shiny, like polished metal, you can even see your reflection; towards the ceiling it turns white. The floor is also shiny, but the reflection in it is no longer visible, it is more matte. Ashtar Sheran and Miti were already standing there.

11:04 Appearance of Ashtar Sheran.

Irina: I immediately recognized Ashtar Sheran, because he looks almost the same as in the astral plane.

Vladimir: An alien with a yellowish face, who was that?

Irina: It was from the Ashtar team, also from his planet. Ashtar also has a yellow face and looks like a human. The only thing is that in the astral plane I didn’t notice his hair, he just had a helmet, and when I saw it physically, he had white hair thrown back, quite long. I saw his dark eyes, like black. Small nose. Human facial structure. One could say an elderly man, slightly shorter than Kirchiton. Maybe about two and a half meters, maybe a little lower. He is lower than Kirchiton.

Vladimir: Somehow his appearance corresponds to those traditional

images that circulate on the Internet, we see, is Ashtar Sheran there? Similar? Not like that?

Irina: My complexion is yellow. And the face is not round, but elongated.

Vladimir: Still, the growth is approximately. Below Kirchiton, but still approximately tall.

Irina: Maybe a little higher than 2 meters.

Vladimir: A little higher than 2 meters.

Irina: He was in such a suit, it reminded me of a medieval one, like the knights had, made of some squares, also a yellow suit.

Vladimir: Knight's armor.

Irina: And there was this helmet, but hair was visible through it from above. It was covered like a headdress, as I understand it. And at the same time, I realized that this is not like armor, but this is its form. He knows Russian. His voice is normal. Kirkhiton has a low voice, and this one is a little higher.

13:12 Mitya's appearance.

Irina: Mitya reminded me of Mida. Only he was a little shorter than him, he had no wrinkles, and his eyes were not yellow, but dark. He was also dressed in blue. By the way, I showed Kirchiton this costume, where it says "Cassiopeia". I say: "Look what they sewed," because Cassiopeia is a constellation. He was delighted and said: "I wonder how they are already sewing clothes." Mitya also had a tight-fitting blue suit, but it looked like oilcloth because it glittered.

14:07 High-tech translator in communication between Mitya and Irina.

Irina: Mitya didn't know Russian. Later I was informed that especially for this contact he had set up a translator device in his own language so that it would translate specifically into Russian. He didn't want it to be translated into Daraal, and already Kirkhiton or Ashtar for me, he wanted it to be translated straight into Russian.

Vladimir: Doesn't he know English either? Does he not know any of the earthly languages?

Irina: They just told me that it was the Russian language that was built into the translator. And it turned out so interesting that when I greeted Mitya, he said something. The sounds of his tongue (perhaps he spoke quickly) reminded me of a chirping sound, as if someone was chirping. And from the box there was a quiet female voice, it was clear that the robot was speaking, but not a metallic one, but like a female voice, but he pronounced the words clearly. Like an automatic machine.

He also greeted. He asked me whose initiative the meeting was and what it was for. I said that the initiative was mine and that of all subscribers of the Cassiopeia channel, since we need to understand some issues, unfortunately, there are contradictions in information. He said, "Okay. I listen to questions."

I took the questions that were written in advance and wrote them down here. I wrote down the questions that I had for him here, because I knew that I wouldn't be able to turn on the phone. And so I took a pen and this notebook with me. Perhaps, with your permission, I will read everything that is written here.

16:13 Real name Mitya.

Irina: The first question was: "Mitya, what is your real name, that is, how it sounds in your native language?" It sounded like Matthew Rouillon. He named these sounds slightly differently, I cannot repeat them, but this is what came out of the translator. He said that's what it sounds like on his planet.

17:02 Reasons for discrepancies in information from contactees of Captain Bill and Irina Podzorova.

Irina: The second question was: “What is the reason for the discrepancy in information from Captain Bill and me on the secret space government and the chemtrail?” And as soon as I read this, from the box (he had a gray box in his hands) came a series of sounds that Mitya made. He listened to this, made the same sounds, and when he fell silent, the box began transmitting in Russian.

This is what I conveyed, I wrote everything down. “There are no discrepancies. There is a lack of conscious perception of the same terms, plus my personal opinion about some things. There is also aggression from Bill's assistants, who have a religious hatred of any opinions about extraterrestrial life that do not come from Bill. This comes from jealousy, born of fear of devaluation of information dear to them.” I hope the answer is clear?

Vladimir: Is the answer clear? I understand, but what about others? We will hear comments later. I would not like to comment in any way.

Irina: I say that this was already translated into Russian, I emphasize again. And I wrote down everything that was said there. How to relate to this, it’s already...

18:33 About contactors of Myths on Earth.

Irina: Third question: “How many contactees do you have on Earth, besides Captain Bill? What information do they receive? I read it, he listened, and gave this answer.

“I have 45 contactees (as I understand it, this is together with Captain Bill). They all receive information about my planet and the laws of life on it. There are no differences in information, but there is a difference in its perception and interpretation. The remaining contactees are not yet ready to publicly announce themselves. I respect their choice."

Vladimir: Thank you very much. It's clear. I heard. Thank you.

19:26 Mitya's answer about meeting Irina to Bill's question. Confidentiality of contact information.

Irina: Fourth question: "Did you really say about contactee Irina Podzorova that you don't know her?" He gave this answer.

"Yes, Bill asked me about you. I honestly and frankly said that I have no information about the contactees of the local regional department of the Galactic Community. And that it is unethical to request information about his contacts from the commissions of regional departments of the Galactic Community without the permission of the contactee from Earth. Everyone must compare the information from the contactee with his own inner sense of truth and decide whether it contains distortions or is crystal clear."

Vladimir: I see.

20:17 Mitya's last physical contact with Captain Bill.

Irina: Fifth question: "When was your previous contact with Captain Bill? How did it go?"

Answer: "Without Bill's permission, I have no right, neither ethical nor research, to disclose details of contact with him. Let me just say that my last physical contact with him was February 21, 2021."

Vladimir: An absolutely exact date, however, has been named, and this is no small thing.

Irina: He didn't give details.

21:00 Mitya about the video with the interrogation of aliens.

Irina: Next question: "How can you comment on the video of the interrogation of aliens?"

Answer: “Ashtar told me about the video. I consider this a gross fake and a mockery of the memory of scientists who died from earthly weapons. They left in torture and suffering, but did not stop loving you. I ask you to honor their spiritual power, although I understand that for egoistic consciousnesses this is an almost impossible task.”

Vladimir: Thank you. Were there any comments from Ashtar regarding this that the Tashigans saw there?

Irina: He meant (as this device translated) not the materials that were used in the video, but the video itself when he said “fake.” That is why he said the word “mockery”.

Vladimir: So we still don’t understand whether, from his point of view, some original materials were used there?

Irina: He meant the video itself, as an integral structure.

Vladimir: I see.

Irina: There was no talk about materials there. He didn't ask him. I asked a question about the video. That’s why his machine translated it to him that way.

Vladimir: I see. We will receive further comments separately. For now, we are simply interested in Mitya’s direct answers.

22:30 The government of the planet Mantuk about the conspiracy of the reptilian races with the earth’s elites. Mitya about the need to check the activities of the reptilian races on Earth.

Irina: And the seventh question: “On what main points does the point of view of the Mantuka government and yours personally differ from the point of view of the Interstellar Union in relation to Earth?” I wrote verbatim what happened. I couldn't do anything else.

Vladimir: Of course.

Irina: Answer: “I treat all forms of intelligent life with equal respect, understanding their right to self-determination. Your regional Community Galactica, with its capital in the constellation Cygnus, is relatively young, which is not surprising given the younger age of the Milky Way compared to the M31 Galaxy where I come from. The government of my planet and I personally believe that the planet Pikran and its satellites are obliged to pay the closest attention to the activities of some reptilian races on Earth and other planets of the zero-cycle Galaxy.

I have data received from contactees that indicate a conspiracy of a part of the governmental, financial and mafia elites of your world, hidden from the eyes of earthlings, with leading experts in xenobiology of the reptilian intelligence services. The essence of this conspiracy is that some short-sighted reptilian politicians help build spaceships for your elites who are criminal towards their own people, and also help build bases for them on Mars, Venus and the Moon.

Their goal is to create a positive image of the Reptilian race in the eyes of the world elite, which, in their opinion, will play into their hands if the Earth joins the regional Galactic Community. They hope that the world elites of the Earth will assist them in this case in trade, research and other agreements, choosing reptilian institutions, communities, firms and factories from the entire diversity of galactic races. The earthly elites, in turn, hope for the protection and patronage of powerful extraterrestrial races, both in the face of the Galactic Community and their own people.

The Mantuka government and I personally consider such actions by representatives of the reptilian races to be a gross violation of galactic agreements on contacts with zero-level civilizations. As a scientist and humanoid who is guided by high moral standards, I have repeatedly reported the violations I have identified to the Security Service of the regional Galactic Community.

But authorized representatives of the Galaxy Security Service always answered me that at these bases there are immigrants from Earth from the constellation Hercules, as well as biorobots, representatives of

Pikran. Also, the Galaxy Security Service claimed that technologies for interplanetary travel are not provided to earthlings, and that earthlings visit these bases exclusively as contactees, and their stay on them does not exceed 3 hours, as required by galactic standards for contacts with earthlings.

However, I continue to receive from some of my contactees, including Bill, the information that I have outlined above, obtained by them from secret archives, personal conversations and information from sources open to everyone in the earthly global information network. I see no reason not to trust my contactees, so I ask the planet Pikran and all its satellites to carefully check the activities on Earth and in the Solar System of the following races: Cruomly, whom you know as Selbet, Savifa, Krushemon, Lorios, Sopitak. All names are given in the Pikran language.

I convey my greetings to all earthlings, and personally to Captain Bill. And I officially declare that I consciously and voluntarily made physical contact with the contactee of the regional Galactic Community in the constellation Cygnus, Irina Podzorova, in order to convey to her and her listeners the point of view of the government of my Motherland, the planet Mantuca, in a simple and accessible form. my personal. I thank its curator Kirchiton and my friend Ashtar Sheran for organizing this meeting. Good luck, friends."

27:48 Health equipment on the Ashtar Sheran ship.

Vladimir: I see. What happened next?

Irina: Then Ashtar and I went to another room. He began to show me the energy installations of the ship, which heal the physical body at the energy level, the energy plants somehow restore cells there. I stood under the rays. A spring chandelier descends from the ceiling, resembling a flying saucer. From it comes light in the shape of a spiral, pale violet. Reaches the body. A feeling of coldness, as if snow was sprinkled where she passes. Something a little prickly and cold enters you, as if invigorating you.

Vladimir: So you have already said goodbye to Mitya? You have

already left the room where he was, right?

Irina: Yes, we left the room where he was. Then Ashtar wanted to treat us with Kirkhiton, but Kirkhiton did not. He said it didn't suit him.

28:55 Treat on the ship from Ashtar Sheran.

Irina: He treated us to a drink. He gave us bowls that contained something similar to kefir. They have insects similar to our snails. They breed them on the ship. 52 cm long. They secrete something like milk from their bodies through their pores to feed their young. And special robots collect it from them, mix it with water, some substances, powder, and make such a drink. He said that it was quite suitable for earthlings. Gave it to me to try. I tried it, it reminds me a little of sour milk, but it's like they put lemon in it, and at the same time it smells like flowers, like daisies. I thanked him.

Then we talked a little about the Light Body practice. I didn't tell him what I wanted to talk to him about.

Vladimir: Please tell us so that we can move away from this topic. Was anyone else from the crew present during your entire communication with Miti and communication with Ashtar Sheran? Was there anyone else there?

Irina: There was only Ashtar, Kirchiton and Miti. We were the only ones in the room. But while I was recording, maybe someone came in, but I don't know, I didn't see anyone.

Vladimir: Didn't Ashtar introduce you to anyone from his crew?

Irina: Only the one who met us. He didn't give a name. He just said he was from his team.

Vladimir: Didn't name it.

Irina: And then, when we had already left, he showed me one room. There I saw several women, like young girls. They passed there, but they did not come.

30:58 A number of rules for physical contact from the Interstellar Union.

Irina: Then he told me that his ship was big, and if there was an opportunity for me, as a contactee, to stay there, for example, overnight, he would show me more rooms. But the rules for Kirchiton's contacts with the contactee say that he should not leave the contactee and return him to his base. A certain time is allocated for contact.

Vladimir: Yes, good. I understand.

Irina: I see. Mitya gave me 30 minutes. While I was recording, the translator was also speaking. It probably happened somewhere like that.

Vladimir: When he spoke, did you manage to write it all down quickly? I see you've captured it.

Irina: He said, I wrote quickly, where there were long words, I could shorten a few.

Vladimir: Summary, in short. Okay, I got it. Thank you. Now let's move on. Let's get back to what you wanted to talk about. About the practice that Ashtar passed on.

32:02 Practice of astral travel "Light body".

Irina: When we met in the Astral, it's surprising to me that I recognized him immediately, because in the Astral he actually looks the same. We met many times in the Astral. During one of my astral contacts with Ashtar, this was quite a long time ago, he gave me a practice for astral travel, which relates to his race, belongs to the Galactic Federation of Light, which is called the "Light Body".

With the help of the light body, you leave the physical body and fly to its ship in the Astral, and find yourself in inhabiting rooms that harmonize the astral body, etheric body and physical body. When the astral body returns and connects with the physical, this energy moves to the physical level. Ashtar said: “You can tell your students about this and conduct the Light Body practice with them.” You can all visit my ship together on astral travel.”

Just the day before yesterday, with the students of the seventh stream, with those who stayed until the evening and did not leave school, we just conducted such a “Light Body” practice. I saw her off. He taught me. You need to sit there, imagine the light body that is inside the physical, how it expands and comes out through the breath. Then I returned everyone: “You are returning to your physical bodies.” I started asking about my impressions.

There were 12-15 people there, only two did not come out, but they were not ready. They have never even visited the Higher Self yet. These were new people who arrived. But they still felt the expansion. Everyone else came out, saw Ashtar’s ship, they were healed there, that was the effect. Quite a simple way. You sit, imagine, breathe, go out.

It was taken from plasmoid civilizations, that is, plasmoid civilizations use it, the Galactic Federation of Light uses it, the Pleiadians. Ashtar also said that evening that this method, in addition to the astral exit and the ability to travel to it, suggests that the light body is not just a way to exit into the Astral, that it is much more. It increases the vibrations of the physical body when you imagine a light body, and helps you go through the quantum transition, taking you to a new level. A person will go through this quantum transition easier, he will have more energy for this.

35:06 Discussion of the Light Body practice with Ashtar Sheran.

Irina: He suggested that I do this practice in our Cassiopeia project. Such a new beginning. I should go on record somehow, on YouTube or something else, and conduct this practice with people who want it once a week for 30 minutes. As always, like our healers, access to this

practice is based on the payment system according to your heart, for a donation, and we sit for 30 minutes, I tell you how to do it, and we do it all together. It was his idea. I told Maxim. And I tell him: “I’ll talk to you when I physically fly to you.” He says: “You can bring these people to me for half an hour once a week, just warn me in advance so that I prepare the equipment in these rooms. And he prepared the greeters, his humanoid friends, many of them can come via video so that they can work with people.”

We also talked about this today. Details, for how many minutes, how to withdraw them. He told me: “Sit, don’t leave with them, be both there and here at the same time to control the time, their condition, and then take them out. Just don’t let them stay with me for less than 20 minutes. 10 minutes to prepare the exit, 20 minutes there, that’s 30 minutes. Maybe another 15 minutes to chat. Or they will already exchange impressions in the chat.” We talked about these details. How do you like this idea?

Vladimir: Great idea, I fully support it. I am ready with all my capabilities and strength, if this makes sense, and we understand this, to participate in this. I fully support it. Great idea. There's not even anything to discuss here. We will, I hope, do this. We thank Ashtar for this offer and for the opportunities it provides us with.

37:29 Summing up the meeting between Irina Podzorova and Mitya, thanks to its organizers.

Vladimir: Okay. I just want to wrap up our main topic. After that, you obviously broke up and returned. How it was, in a nutshell.

Irina: He said hello to everyone. He said that he comes to many people. From "Cassiopeia" many are curated or simply come. He can also make phantoms.

Then Kirchiton and I returned. I took a flashlight with me into the forest. When he brought me to Earth, Kirchiton told me to get up from the chair and stand in the middle of the room. A greenish beam began to shine on me from the ceiling. This room has disappeared. I didn't feel like it was there. The room just disappeared, and it was like I fell

through an elevator, not hard, but slightly lowered.

I already saw this situation: the forest where I was. I looked up, there was nothing there, like in August.

Vladimir: Approximately how long did the entire contact take from the moment of takeoff to the moment of landing in the forest?

Irina: I talked to him for half an hour. 45-50 minutes.

Vladimir: That is, about 50 minutes from the moment of takeoff to the moment of landing of Kirchiton's ship.

Irina: The thing is that I wanted to turn on the flashlight, unfortunately, they didn't hang lanterns in the forest. Not visible at this time. There, just stretch out your hand and you can (feel) the roots, the paths there are only apparent. I haven't gotten there yet this year.

Vladimir: In general, it all took about an hour.

Irina: After the first contact, the flashlight stopped burning, I didn't see anything, although it was completely new. I threw it away somewhere because I was upset that it stopped working for me. It's good that I took my phone with me, at least there was a flashlight. It also didn't turn on for about 5 minutes, but then it turned on. And I got there with this lantern. Otherwise, I would have gotten there, of course, but slower. You have to hold on there so as not to fall anywhere. It's just that I haven't been there yet this year, the situation there has changed, the path has become narrower, there are thickets. If you get hit in the face in the dark, it won't be very pleasant.

Vladimir: I see, then I reached the road where our friends were waiting with the car.

Irina: Of course, yes, our friends.

Vladimir: Our friends. We understand who these friends were, it's no secret, we thank them too, right?

Irina: I came to these friends. "How are you?" I say "Fine." I started talking. "Where is the flashlight?" They remembered that I left with a flashlight. I say: "I threw it out, it stopped working." "Wow, it's like new!" "Yes, it's good that you took the phone."

Yes. I also asked before this, when I got to Kirchiton, I said: "Oh, what technology. You can't see anything, even if you take it from the balcony." He says there should be no light, it might get bad. I say: "I have my phone with me, won't it get damaged?" He says: "The electricity there is of a different type, the battery is more modern, nothing will happen to it. But the lantern you are holding, I can no longer vouch for it."

Vladimir: I see.

Irina: Some other type. "In principle it should work, but I don't know." It still stopped working for me.

Vladimir: It's clear why it stopped working, under the influence of the ship's energy and other things. Okay, as I understand it, we've covered the basics. Essentially, we've told you everything.

Now I want to thank Ashtar Sheran from the bottom of my soul for organizing this meeting, I know that it was seriously organized. Of course, I want to thank Mitya from the planet Mantuk for his decision and the decision of the government of his planet to hold this meeting, give us the information that he gave, and answer Irina's questions. I understand that this was not an easy decision either. It's worth a lot. I would like to thank Kirchiton for being such a delivery person for Irina to such important meetings, for providing this physical contact on the ship, which is now protected. Of course, I want to thank both the Interstellar Union and the Galactic Federation of Light for the possibility of physical contact. We know that now this is not at all easy, this is Irina's unique case, taking into account all the prohibitions about which we have information. And, of course, I want to thank Irina for her courage, for writing all this down, for once again doing, I think, the

greatest thing for all of us, for our entire planet.

42:54 Appeal from Vladimir Goldstein to the Galactic Security Service of the Interstellar Union.

Vladimir: And after all this, after all my thanks, I want to do the following. As one of the administrators of the Cassiopeia project, on behalf of all participants in the Cassiopeia project, the project team and, I am not afraid of this word, on behalf of all humanity, I am sure that the majority of representatives of the earthling race will support me, I want to make an official request. I ask you to consider this an official appeal, although I am doing this on my own behalf and have not agreed with anyone. This is impromptu, but still.

I would like to make an official appeal to the Council of the Interstellar Union and the Council of the Galactic Federation of Light with a convincing request to hear Mitya now. To investigate once again everything that he talks about, connected, as he told us, with the activities of individual groups of reptilian civilizations, which he specifically named. If possible, provide us with information through Irina Podzorova about what is actually happening. To comment on the results of this investigation, the opinion of the alien Mitya and the government of his planet Mantuk, so that we finally, as convincingly as possible, understand that there is still some truth in these words of his, in these assumptions of his, not only of him, but also of his government . He says that he repeatedly addressed this to representatives of the Interstellar Union, but there was no answer.

And now we turn. In this case, I appeal, as a representative of the earthly race, to you, dear aliens, representatives of the Interstellar Union, and personally to Bergastre, as the representative and head of the Galactic Security Service in our sector of the Galaxy, with a convincing request to once again conduct this investigation based on the information provided from Mitya. Give us a clear answer. Still, is there, at least in some part, what he is talking about in terms of unauthorized actions by representatives of reptilian civilizations?

Obviously, here we need the participation of representatives of the planet Selbet, who would also do well to comment on all this, as the main reptilian race that we know. Perhaps there is some common

sense in these fears, and then we want to understand what the Interstellar Union and its Security Service are doing to control all this. And these attempts can either be stopped or directed in some positive direction. We must understand whether there is this danger of communication between these reptilian groups with the corresponding not-so-light forces on Earth, or whether this is not the case at all, and all these are some mistakes of the Mantuk civilization, speculation, fears transmitted through Mitya, and by himself.

In short, is there any truth to this? If so, how will you act with this grain of truth? I earnestly request that such information be provided to us. Now we, like your children, who want to know what is really happening on Earth. Because all these fears exist, and perhaps they are completely unfounded, and for some reason we do not fully know the truth. If this is not the case, then please clear my doubts. Irina, if you want to add something on your own, please.

Irina: I fully agree with the representatives of the planet Pikran or Burkhad in Vladimir's words. And I ask, even for the sake of Mitya himself, for the sake of his government Mantuk, for our sake, to still convincingly explain what is happening in the reptilian colonies from the point of view of what has been reported. Does this correspond, at least in part, to the truth? Perhaps there are already criminals who are before Selbet, etc., criminals of the Interstellar Union. Do they have any secret activities that are not known to the Interstellar Union? Find and isolate those who are guilty, including so that they stop degrading and raise their vibrations. If this does not happen, please explain so that we understand, and Mitya, and Captain Bill, and all his subscribers, followers understand, why these rumors are going on. Precisely, clearly, specifically.

Vladimir: I said, I was addressing the Council of the Interstellar Union in general, but obviously we need to be more specific. Indeed, this is an appeal specifically to representatives of the capital of the Interstellar Union, to representatives of the planet Burkhad or Pikran. This is where it should be addressed. And I will not hide that at our next conference with Jesus, which obviously will be, I will ask this question to the phantom, in fact, Jesus himself. I am also interested in his opinion on this matter, so that he would comment on it from his point of view, especially since he is physically located most of the time on an island on the planet Burkhad.

Irina: He also visited Selbet when he traveled. I remember it.

Vladimir: I am interested in his opinion as the highest Spirit, whom we undoubtedly trust very much, first of all.

Probably, if this is all for this contact, we will then complete it. It's already very late for Irina, just the middle of the night. It's not here overseas, but it's deep night there. Therefore, Ir, I once again sincerely thank you for your, I don't want to add or strengthen anything, this is so, for a real contactee feat. For the fact that you devote and continue to devote your entire life to this great cause, to all of humanity. Without any unnecessary pathos, this is simply reality. This is exactly the case. Thank you.

Irina: Thank you. Thank you everyone. I hope that with this we will build a bridge of understanding between us and contactee Bill, and his followers, as well as between the civilizations of different Galaxies.

Vladimir: Thank you, friends. Moreover, we know from the live news that cooperation between the Interstellar Union and the Galactic Federation of Light has now become much more intense. We hope that this cooperation will also allow us to more adequately monitor all information related to aliens and their actions towards us, including the concerns that Mitya expressed to us. Thank you.

Irina: Thank you.

Vladimir: All the best. See you again on air.

Irina: See you again!

Broadcast May 26, 2021.

Participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Vladimir Goldstein is a journalist and Facebook group administrator, assistant to the director of the Cassiopeia project.

#277 Children of aliens. How does school education affect a child's future? True spiritual life.

https://blog.cassiopeia.center/deti-inoplanetyan-kak-shkolnoe-obrazovanie-vliyaet

https://www.youtube.com/watch?v=xhtYQzw2_uI

00:21 Presentation of conference participants.

Irina : My name is Irina Podzorova. I am a contactee with extraterrestrial civilizations. Today with me is our common curator MidgasKaus from the planet Esler, a biologist, psychologist and specialist in alien life forms, as well as the father of two children. This is important at this conference because we will be talking about raising children with our wonderful administrator Elina. Hello!

Elina: Hello! Greetings, dear Irina, dear viewers, dear Mead!

00:57 Social attitudes on Earth. The main illusion of earthly society. How to feel the Spirit of the unborn child? The meaning of spiritual life.

Elina: Yes, indeed, today, regarding questions from our subscribers, we continue the topic: “On raising children.” A question. We know that Spirits with their Mentors, before incarnation, determine their tasks and ways to implement them, and then the appropriate conditions are selected: planet, country, place, family, etc. Considering that the majority of people on Earth do not know how to communicate with the Higher Self, and the period from the moment the Spirit chooses a family until conception is hidden from them, I would like to know some details about this. How, for example, can parents feel that they are chosen by the Spirit? Can they actually feel it?

Irina: If they don’t communicate with the Higher Self?

Elina: Well, somehow. In general, what conditions are necessary to feel this?

Irina: MidgasKaus says: “I greet everyone, dear friends! A very interesting question for me. How in a civilization that does not have social egregors, does not have the habit of teaching from childhood to communicate with your Higher Self, how in such conditions can you feel your Spirit, not to mention the Spirit of the one who wants to incarnate through you?”

Elina: Yes.

Irina: Here on Earth, much is hidden from you under the influence of those social illusions and misconceptions that replace your true spiritual reality. You call them “social attitudes.”

There are social attitudes that replace your spiritual reality. One of the main such attitudes is that the thoughts that come into your mind are considered imagination. That is, something unreal that does not affect real life. One of the most important misconceptions, illusions of most of your society is that consciousness is a great cosmic mind that has passed through many planets, Galaxies, and is considered a product of the material brain.

Elina: Yes, many people continue to think so.

Irina: Yes. You have a lot of research on this by scientists, etc. Is it possible in such conditions to feel that you are embodying a child? Undoubtedly, it is possible, under one condition, that a woman or a man, a man can also feel that a child will be incarnated through him, because through his seed his potential, like a man, is also embodied. Dad and mom can feel the child's desire to come true if they are attentive to themselves, to their Soul. And they will know what the Spiritual world is. They will love each other. A husband, a man will love a woman. A woman will love a man. Moreover, in their love they will not be self-isolated from society, but will carry this love into the world. They will understand that the true meaning of love is not pleasure, but distribution.

Elina: Yes.

Irina: They will feel the child's desire to come true. He can dream of them, come to them mentally.

Elina: Yes, I just wanted to ask about the dream.

Irina: They can feel his desire to be embodied as if they were their own. And even communicate with him. Even without being taught to communicate with the Higher Self, if they live a true spiritual life. And true spiritual life does not consist of wearing certain clothes or eating certain foods, but only of unconditional love, acceptance, forgiveness and doing good deeds.

Elina: Then they will be open and will be able to feel it all.

Irina: The meaning of spiritual life is to get closer to the Divine Source. And the Divine Source shows its love not with useless words, but with real actions that everyone can see in the world around them.

Elina: Yes, indeed. Thank you

06:12 A child is a gift from God. Is it known how many children there will be before the incarnation? About the path of Divine

development. What is true happiness?

Elina: Next question. Is it possible to consciously make a choice at this moment - agree or refuse, perhaps postpone it until later? Or is this a voluntary-compulsory decision? That is, how inevitable is the time and place of the Spirit's incarnation in the chosen family? Maybe there was already some kind of agreement initially?

Irina: The number of children is very often, in almost 80% of cases, known even before incarnation. Such an agreement with the Spirits regarding who will incarnate whom is established even before incarnation. Sometimes (much less often) the need for a certain Spirit to incarnate appears later, when that Spirit is already living in incarnation. But in this case, the Spirit at the level of the Higher Self still negotiates. Are we now talking about those who follow the path of development or the path of degradation? That is, there are slightly different things.

Elina: Probably through development after all. We are all on the path of development.

Irina: Those Spirits who live a true life follow the path of Divine development; the thought of denying another Spirit incarnation cannot even occur to them. Because incarnation through themselves they understand that they can make a gift to this Spirit, a gift to God. And at the same time perceive this child as a gift from God. That is, they give life to God. These are those who follow the path of development. And those who follow the path of degradation may refuse because of their selfish motives. They may refuse to incarnate, citing various difficulties or something else. But those who follow the path of spiritual development remember that the physical body is a tool for the development of the Spirit. That is, if the physical body undergoes difficulties, this does not mean that this person is more unhappy than one whose physical body is in comfort. Perhaps, on the contrary, true happiness lies in love and in getting closer to God.

If there really is an objective circumstance, then they can agree. If she feels that she cannot give birth to him, for example, because she is busy with work. And she feels that this work is for the public good, then it can come to the Spirit, and then they, together with the Angels-

mentors, decide what is more important for each of this Soul - for her, the child and the whole society as a whole, as a continuation of her social work.

Elina: So such an agreement is possible, right?

Irina: If she communicates with him mentally before incarnation, then this is possible. But even if she says, for example, that I cannot incarnate you this year due to such and such circumstances, or my father says so, this does not mean that they will completely deny him incarnation. For example, here at Esler, a woman from childhood understands perfectly well that by denying the Spirit incarnation, she may delay its development for several hundred years while it waits for the next incarnation. And if she delays his development, that means her own, because he is part of her.

Elina: How interesting!

Irina: Everyone is connected to each other.

Elina: Yes, everything is interconnected. Thank you

10:53 How does the energy of words and thoughts affect the unborn child? How to help a child follow the path of spiritual development? Dreams about the child's future.

Elina: The next question follows from the previous one. Can the thinking or words of parents during conception and pregnancy lead to an unfavorable course in the child's subsequent life? And is it possible to correct this?

Irina: Not only words, but also thoughts can lead, not to an unfavorable life, but to the aggravation of those negative blocks and qualities that he may carry with him from a past life in his energy bodies. And this can cause a worsening of his negative qualities or a weakening of positive ones, because any word is accompanied by thought forms. What is important here is not the meaning of the word itself, but the energy invested in it. If this is the energy of anger,

resentment, irritation, then it can act on the child's developing aura as a damaging factor. He is now showing me how the aura is such a whole cocoon, and this word seems to cut out a piece from it. She's getting thinner.

Elina: Interesting.

Irina: And not only a word, but also a thought can harm the fragile Spirit of a child. This influence extends not only to the period of pregnancy, childbirth and newborns, but also extends to the period of communication between the child and his mother up to 14 years of age. Among earthlings, a 14-year-old child is energetically connected with his father and mother.

Elina: It's in the parents' field.

Irina: Yes. And you raise your child not only through the body, not only with words and actions, but with every thought.

Elina: But I wonder, if you take the positive words, thinking, thoughts of parents, is it possible to raise a genius or a super happy, successful child in this way, that is, put some of your intentions, your thoughts into him, is this possible?

Irina: You can help him follow the path of spiritual development by recognizing his goals and objectives. And creating a positive image of that child in the future about how he will grow up. Simply composing in your mind, but not forcing the child to follow this image. Violence is not acceptable here. Just making it up in your mind like a dream. You have the term "dream". It only happens that you understand it in a negative sense, as some kind of escape from reality. This is also possible. But here the dream is connected with reality.

Dream about what your child will be like when he grows up, for example, a profession, not imagine a specific profession (which one he will choose for himself when he wants to leave), but how good he feels in the workplace. How happy he will be in his family. Again, not with a specific person, but with your beloved or loved one. How will he have

children? How he will love you. How will they treat you? Imagine all this, and at the same time not wish for it to happen, but send him the unconditional Light of Love. People have this problem: when they imagine a person in a positive sense, they begin to idealize him, and then get offended that he does not live up to the ideals. There is no need to do this. This will not lead to results. You don't need to build ideals, but you need to build a dream. This is distinguished by the lack of egoistic meaning invested in this dream. What is egoistic meaning? This is when only one's needs, attention, recognition of love are recognized, and the child's free will is ignored.

Elina: Without any benefit of your own. We need to learn to dream correctly. Thank you.

Irina: It's just easy to imagine these images and let them go – don't get hung up on them.

Elina: Yes, indeed.

Irina: It is not necessary that it will be exactly as you imagined. But this will help him follow the path of Light. Moreover, if you teach him from primary school age to communicate with his Higher Self.

And even before school age, you will tell him that he is the Spirit, that God lives in heaven, who sees his every action, etc.

Elina: Yes, this is the most important thing. I think so too. Thank you.

16:25 Planning pregnancy on Esler. The importance of the truth about the Spiritual world.

Elina: Next question. Is there any stage of pregnancy planning, time of conception and further management of pregnancy in the Interstellar Union?

Irina: Every woman and man decides for themselves, of course, together with their Higher Self and spiritual mentors. As I already said,

even at high school age, a girl is usually interested in getting to know her future children. And she goes out to them through her Higher Self. She can travel in her astral body to the world of disembodied Spirits and meet them there. In any case, this is astral travel.

Of course, the school does not teach a full course in astral travel. They don't teach you how to travel through all levels of plasmoids, etc. They teach a shortened course there, but it is quite enough to meet your favorite Spirits. And she can ask him: “Why did you decide to choose me for embodiment? Why our planet? They can even get to know each other (a guy and a girl on Esler), that is, a young Eslerite and a young woman can get acquainted on the basis that they will feel each other in the Astral when they communicate with their children.

Elina: How interesting! Yes, tempting. Why don't we have this?

Irina: Because for you to have this, this is a fairly high level of consciousness awareness.

Elina: Yes, of course.

Irina: For you to have this, the first thing you need is the first stage that your society needs in this direction. To every person who knows this truth about the Spiritual world, that we are immortal Spirits, that we reincarnate on different planets and choose our parents ourselves, these truths, without reference to any religious and philosophical systems, are simply truths, known to every Soul, which have become known to it. Now I say and feel how you, Elina, feel with all your Soul that this is the truth.

Elina: Yes, of course – this is true.

Irina: Because your Soul remembers how it chose its parents. I say hello to your beautiful Soul.

Elina: Thank you and I accept! It was so warm. Marvelous! Indeed, the heat just spreads out. I'm already in tears!

Irina: You see! The warmth of my heart, the warmth of my entire planet Esler. This is the warmth of your Soul too. And your specific task is to tell about this not only on video (this is also very important), but also to let every person in your environment feel it.

Elina: Yes, that's really true.

Irina: This will bring humanity closer to realizing that dream, so that every child knows what our child knows at Esler.

20:20 Communication between mother and child during childbirth on Earth and Esler. School preparation for family life in the Interstellar Union.

Elina: Here's an interesting question: do people in the Interstellar Union know about our earthly techniques for assisting pregnancy? For example, should you give birth lying down, sitting up, or in water (some people give birth)? Are there any recommendations or advice on what we, on Earth, should pay attention to in this matter? In general, are they aware of our techniques?

Irina: We are studying your society. And we know that the majority of women on your planet give birth in hospitals (clinics), that is, among medical personnel who provide the necessary assistance. This is an inevitable reality at this stage of development of your society.

There are several reasons. There is a reason - a spiritual one - that a woman who has not had contact with the Spirit of her child throughout her pregnancy will not be able to come into contact with him when he is born. He won't be able to talk to him, explain to him what's going on. This Spirit enters its body and does not understand what is happening. She will not be able to come into contact with him, let alone make contact, many do not even know that they can send him the Light of Love, call him to be born into this world. Assure him that it is safe here and that he is welcome, so that he is not afraid. He can stop the progress of labor with his thoughts and even weaken contractions. She experiences fear, pain, self-doubt.

Elina: Some, yes.

Irina: And from these negative vibrations and those factors that weaken your body (you have quite a lot of them on Earth), your birth should take place in the presence of specialists. Because there is a high risk that something will go wrong. On Esler, who already has quite high medical technologies and high medical literacy among the common population, that is, not medical, and as I already said, every woman can communicate with the Spirit of the child during childbirth. Girls are specially prepared for this process, that is, at school they are told what it is. There is such a subject at school, it is called “Family Life”.

Elina: At what age do they start teaching girls this?

Irina: If we translate it into earthly age, then it’s about 12 years old. This is approximately fifth or sixth grade for you. At this age, the subject “Family Life” is already introduced. Moreover, both boys and girls have it. It is general, but there are separate subclasses where only girls come - it’s like clubs. And where only boys come.

There is a general subject “Family Life”. And there is a special program where during the school year there are several such classes in circles. That is, they give material, for example, “physiology of the body”, “how to behave in various non-standard situations”. For example, at about the same age, boys are given information about “the physiology of the male body”, “what is the role of a man in the process of conception, and how he can help during pregnancy and childbirth” - the boy is told all this. We believe that it is important to impart this knowledge in childhood. Earthly civilization believes that this should be told in the family. But we believe that we should teach in school, as in a public institution, from the perspective of the latest scientific data. In general, our school does not teach any outdated knowledge. That is, very little is given from the history of science. Basically, only advanced scientific knowledge is given at school so that a ready-made specialist emerges.

Elina: Unfortunately, in Russia this is a rather controversial issue about the sexual education of children.

Irina: They don’t just teach about sex, but about family life.

Elina: Including, yes.

Irina: They don’t tell you how to practice.

Elina: Well, I see.

Irina: They simply mention how conception occurs, but the emphasis is on something else.

Elina: Yes, everything is correct. Thank you

25:56 About the periods of development of children in the Interstellar Union. Testing students - determining career guidance. MidgasCause's story about his family, childhood, choice of profession.

Elina: Well, the baby is born. Are there at least some approximate periods of child development indicated on the planets of the Interstellar Union? For example, as we have on Earth - infancy, the first crisis of 3 years, adolescence, youth, etc. Is there something similar in the development of children of the Interstellar Union? In particular, on Esler, what are the periods of development, crises?

Irina: We also have breastfeeding, that is, mammals, this is up to about 2 earthly years. But they begin to walk earlier than they reach this age. Then comes, one might say, the preschool period - this is approximately until the age of 5. Our school is divided into several training cycles, as on many planets of the Interstellar Union. We have 3 training cycles. Moreover, the 3rd cycle is already the initial degree of vocational education.

Elina: What age is that?

Irina: So, each cycle lasts approximately 6 Earth years. That is, we do

not have classes, but a cycle. One cycle passes. There are different ones, you call them “courses”. One course on this subject, one course on that subject.

Elina: It turns out after 12 years.

Irina: Yes. This means that their first year is from about five or six years old to eleven. Accordingly, the second year is up to seventeen years. And the third is after seventeen. About that age.

The cycle consists of several courses in different subjects. Moreover, closer to the beginning of the second cycle (course), general testing of students takes place - determining their career guidance. That is, there are conversations with each student, as well as with parents.

Parents come to a special school psychologist. But he is not just a psychologist. He is an educational psychologist. They call you an “educational psychologist.” That is, he studies teaching methods and their most effective assimilation, depending on intellectual characteristics. You call this a “profession”.

We have several such specialists in every school, in every city. They help teachers as a curator of the educational process. It will probably be your head teacher. But he himself does not teach the subjects - he is just a psychologist. During career guidance, the child makes his own choice of what interests him. And starting from the middle of the second cycle, courses for children of the same ages who have chosen different career guidance are already different. Those who chose natural sciences are given more natural sciences. They are given the minimum required science, but more time is spent on natural sciences.

When I studied and chose the “space” specialization, they told me everything about space. About Esler, about his history, I went through only the most general things. But mostly I studied space. Since childhood, when I was still little, my father and mother also work in space, on other planets. True, they had never been to Earth. But they work on the other side of the Galaxy. Mom is also a biologist, and dad works in geology. They are still alive and recently flew to Esler from an expedition. And now they are in the next city from me.

Yes, and therefore, from childhood, I was brought up in conditions where I was constantly told about space. Either dad was absent, then mom was absent - in turns. I also have two older brothers. One brother went to the Galaxy Security Service, and the second connected his work with a political, so to speak, career. He alone from Esler went to the Interstellar Union - as a diplomat. This is our family. But there are families on Esler who are not involved in space, but in their own specialization. We have a lot of arts professions. We have professions in history and linguistics. There are also professions - these are like spiritual numerologists who calculate spiritual levels. Psychology, astral travel, writers, etc. are developed.

Elina: In general, what determines the choice of profession? It turns out that Mead's parents told him about space since childhood, and he also wanted to connect his profession with space. They are also doing some testing. If, for example, based on testing, he would go to see a psychologist?

Irina: And he went to become a psychologist, but only to work with space civilizations.

Elina: That's it. Well, okay.

Irina: When I studied to become a biologist and psychologist and chose the "space" specialization, I could have simply chosen "cosmonaut researcher" who researches. Just some technician. Or a tourist guide who tells the Eslerites when he takes them around the Galaxy. Or a historian with some kind of civilization. But when I began to study more about space, the Galaxy, they told me about this, about the Interstellar Union. Already at school they begin to take us to other planets on excursions. It's like excursions for children now, when they are taken to another city, but here we are taken on a spaceship to another planet, without parents, just in the presence of teachers.

When I started studying space, in my senior cycle I already decided that my specialization would be "contacts." Yes, Irina has the word "extraterrestrial civilizations" in her vocabulary, but for us these are not extraterrestrial, but extra-Eslerian.

Elina: Yes.

Irina: Yes, that is, to contact aliens. And not just with aliens, but with those of them who are not part of the Interstellar Union. I told you that I studied the history of planet Earth. When I was studying the catalog of civilization, even as a child we were shown these catalogs, that is, my dad had them too. And there I already read that among other planets there is Earth. There were photographs of her. I admired how rich your nature is! And I thought that God the Creator endowed people living on Earth with perfect intelligence.

Elina: Yes.

Irina: As perfect as their planet – beautiful.

Elina: Unfortunately, this did not turn out to be the case, but we are striving for this.

Irina: Yes, but when I found out that she is not part of the Interstellar Union, I was very surprised. Why isn't it included? Although intelligent creatures live there. I read in the history of the Galaxy specifically about Earth, about the discovery, about the war. I read about everything. And I asked my Higher Self: “Is specialization in contacts with the Earth suitable for me?” And a positive response was received. That's how I came into this profession.

Elina: By the way, until what age do they last as students?

Irina: And it depends on the specialization. After completing the senior cycle, I studied for about 10 years. It took me about 10 more years to be given permission to contact you. I first flew to Earth only in 1983. That is, it happened even later. I studied and then took tests (exams). Then I studied the experience of other specialists in contacts with earthlings - I was already a specialist. And then he entered into astral contacts. And physically I first flew to Earth only in 1983. First I studied the language. I chose to study Russian because Russia has the largest population area. There I decided to look for contactees among this country. So I learned the language, studied the culture. We

studied together, I was not alone. But I studied it together with others - not only with Eslerites, but also with representatives of other planets. We had, one might say, general classes or general conferences where we were given information. Galactic security specialists worked with us. They talked about the rules of contacts, what is acceptable and unacceptable for the contactee, etc. They gave clear rules. I also studied astral travel. At the same time, I studied the biology of terrestrial organisms and people. And in general vegetation, the nature of the Earth. All this took 10 years. The fact is that an inhabitant of any planet - an Eslerite, a Burkhadian, and so on, who has not undergone specialization on the topic, no one will allow them to have contacts with earthlings, especially physical ones. You are considered alien beings. Only scientists come into contact with you.

Elina: I see.

Irina: But in astral contacts, if they can go to the Astral, they, of course, can come, because the Spiritual world is one. There you don't need to know the language, for example. We just communicate using mental images.

Elina: Well, yes. Thank you.

39:08 Methods of child development using Esler. Computer games: shooters, mazes, cartoons.

Elina: Let's return to younger children. This question is: how is the early period of life of children on the planets of the Interstellar Union, for example, on Burkhad? What, besides physical care, is paid the most attention to, for example, some methods of early childhood development, educational games, entertainment for the little ones?

Irina: On Esler.

Elina: Yes, let's use Esler.

Irina: On Esler, the best development method is constant communication with mom, dad, and parents. We do not have any

specialized techniques. We have like computers. Only he shows me that this computer does not hang on the wall like a TV, but as if they press on the wall and a screen appears there. There are different programs there. There are computer games there too, but not like yours, but with a reward, for example, in the form of some kind of educational program. For example, if he wins some logic game, then he is given a song to listen to that has not yet been released to the general public. Or read an interesting book, some poetry. But it is not pronounced in letters, but the robot reads it.

Elina: Do they have anything like our cartoons?

Irina: Yes, I understand - it’s like drawn pictures that move. These are not like cartoons, but like three-dimensional figures. Yes, we have similar ones - it’s like your theatrical performances. Yes, that counts too. For example, I saw your computer games, where a child wins and simply scores points. But he can't spend it on anything. But here in the Interstellar Union, similar games have long since passed on to the idea that it’s not just about buying glasses, that is, they don’t translate into real money, but ordering something useful for yourself in a computer program. As I already said, for example, a song or solving a problem, etc.

Elina: Okay.

Irina: They have these logic games. You could say it's like exiting a labyrinth, only three-dimensional. On the way out of the maze you need to solve various problems. For example, to choose objects by color, by shape, which will help or hinder him, there are such programs.

Elina: In any case, it turns out to be educational, educational games, right?

Irina: Yes. Or assemble certain shapes from a construction set for a while.

Elina: That is, there are no such games as our children play - crazy

shooters, some kind of adventure games?

Irina: Shooting games? There is a labyrinth shape. But we don't have that kind of thing to shoot. We don't produce this. They just won't play it here. Our children, if you invite them to play this, they will not play war. Because we have been in the Interstellar Union for many thousands of years, they don't talk about this in the news. On the contrary, in our news they say that any war is a disaster for the people.

Elina: That's right. Very wise.

Irina: This is not some kind of romantic hobby. They say that this is a disaster for both the attacking side and the defending side. And also for mothers, fathers and children of both sides, no matter what it started from. Therefore, playing some kind of war, shooting game, I know that this is common among you on Earth. But this is not something that is bad, I do not condemn it. It's just a level of consciousness. You already have wars, so you won't have it any other way. It's just that we also have our own level of consciousness, which is also determined by the ideology of this society. With us, for example, if I bring a game - a shooting game, a pistol or something else and invite my son to play, after everything he hears from friends, from his mother, from the media (they have news), from our books , I just already know what he will answer me. I would have answered that way myself at his age. He would say: "Dad, these are people dying! Is it possible to play this?

Elina: Our children would think like that.

Irina: They don't see it as entertainment. If they see how they play at war, and that those who have won are having fun, it will be strange for them. Not even just for children, but for many adult Eslerites. I am a scientist, I study your world and I understand that this is some kind of victory over the instinct of fear of death. That's why it makes you so happy. This is what I understand. From a psychological and spiritual point of view, I understand you. But I know my society too. Therefore, such games would simply not be sold or distributed there. They wouldn't buy them. They would not be banned there, but the one who created this game would be considered strange. They would think that they were joking about the grief of these people.

Elina: Over the grief of people, yes.

Irina: Something like this would be the idea.

Elina: We urgently need to learn from you!

Irina: Yes, do you think so?

Elina: Definitely. We need to come to this.

Irina: Characteristic games for children, whether they play on the street or on the computer, reflect the standard of living of society. In fact, even your chess and checkers are already built on ideas about war.

Elina: Yes, indeed, so. It all comes down to some kind of resistance.

Irina: For example, chess is really two armies that fight each other.

Elina: Yes, opposition from two sides.

Irina: Yes, even if we show chess and explain the rules, they will still play it. But if you explain the story that these are two opposing armies, then again there will be questions. This is such a memory of the war. It attracts people's attention to this egregor. In general, many of us would say so.

Elina: Yes, indeed. Thank you.

47:25 Children are contactees. Imaginary friend. How to properly communicate and support child contacts.

Elina: Many young children remember the Spiritual world and share

their memories with their parents. But this is either ignored, attributed to age, or even worse - it entails an attitude that traumatizes the child's psyche. This is what we mean on Earth. Children become isolated and lose touch with their Higher Self even faster. How to communicate correctly with such children? How to support them? And what do you recommend for establishing proper communication in society? After all, children are very tiny and understand little. How to teach parents to communicate with such children? What can you recommend?

Irina: Be natural. When he tells you about contacts with someone you don't see, be natural. Don't act like you're surprised. Just treat it like he's telling you about his friendship with the neighbor's kid. The more natural your reaction is, the less desire and attempts he will have to tell about it to those who do not understand him. That is, your reaction should be absolutely natural. For example, he would say: "I am communicating with a bunny or a doll. Or some other image will come to him, for example, with the sun. Or I lie in bed, and then I rise up and fly with butterflies. I talk to them. Or many people communicate with fairies. Or a boy wizard came to see me, he disappears and appears." You never know what images there may be sent by their curators. You can say: "Okay! Great! What's his name?" Just like they asked a friend. He will say: that's his name. Say: "Okay. What were you playing? How to show interest - do not ignore. Show interest without any judgment, especially without trying to somehow scare the child - be afraid, not play with him or anything else. There is no need to do this. This instills fear of the Spiritual world. You can even say, "Say hi to him." You can teach him. If a child says: "He somehow attacks me or looks sad, shows aggression." You can say: "Don't be afraid of anyone. He can't harm you. He is in a form of body that yours cannot injure or hurt. Just send him the Light of your Love!"

Elina: Calm the child.

Irina: Teach that he has Light in his heart. And there is nothing stronger than this Light in the world. Say: "There is Light in your heart - there is my love and daddy's love, and yours. The same Light as the sun, only even brighter. He is invisible with simple eyes, just as your thoughts and your mind are invisible. You have it, but you can't see it in your head." It is necessary to explain in simple language what the Spiritual world is. And if suddenly he says: someone is attacking me, someone is biting me, or something else. That is, he can experience different sensations. Say: "No, don't be afraid." Just the next time you

see him, say (teach him): “I greet you! I send you the Light of my Love!” And when he sends this sincere Light of Love to any entity, the low-vibration entity will leave him. She can't stand these vibrations. It will be unpleasant for her to be there.

This is the best protection for your child. Always teach him - never to attack first, but to defend yourself and protect the weak. This applies not only to entities, but also to other children in general.

Elina: Yes, I agree. In general, should parents somehow develop his vision further?

Irina: If he doesn’t want to, then there’s no need to force him to do it.

Elina: That is, if he tells it himself, he tells it. If not, then there is no need to beg him, question him, is that how it works?

Irina: Yes, if he talks, treat it calmly. If he talks to him in front of you, he can start talking to him in front of you and ask him at the table - here he is sitting next to you. Give him some food or something, I'll feed him, for example. You need to calmly turn to this place and say: “Greetings to you! Yes, I’ll put it down now.” You can put a spoonful of food and set it down. Say, “Well, yeah, feed your friend.” That is, as if without any laughter. It must be such a serious attitude. Because your irony in this case will violate the child’s intention.

Elina: Yes, the child will feel it.

Irina: If a child has doubts, then this open channel of communication with the Spiritual world will already be closed.

53:24 Preparing child contactees for society on Earth. How to talk to a child about contact?

Elina: How to prepare a child for society? Among his friends, he can begin to communicate with his invisible comrades. Let's say many parents will observe this picture. How will they react?

Irina: Let him make this choice himself. Of course, everything depends on the type of society. Many children understand much more what is appropriate to say and what is inappropriate in their group.

Elina: That is, trust the child in this regard?

Irina: Yes. Here, if he asks you this, for example: is it worth telling him about this? If he came up and said: “Dad or Mom, can I tell my friends about my friend, for example, a wizard boy or a fairy?” You can ask: “Why are you interested in this question?” Perhaps he has already tried to tell someone and met with a negative reaction. That is, for him to tell you what happened. And if he really met a negative reaction, then you can simply explain to him that he can only tell such things to you. But just be sure to explain why.

So to say that we now have such a time, such a world, when many people do not feel these friends, these entities - Spirits, helpers, curators. Many people have this vision closed, but you have it. If you tell your friends about this, they may be afraid of what is unknown to them. This will make them angry. Because of this, they can offend you, and you will be offended. And if you are offended by them, then you yourself will be like them. And you will stop seeing them too. That's roughly how it can be explained. Therefore, I would not advise you, I would not want you to talk about it. People are different. Our world is not ready yet, especially since you are still at that age, little. But, of course, you make the choice yourself. That is, do not insist on this, but simply warn, warn or something.

Elina: I agree.

Irina: For example, he will say: “Can I tell this friend? He won't tell anyone."

Say: “Son, I just told you what I think. The choice is always yours to make." If you give your child a choice, you will teach him to be independent and responsible. This will be very useful to him in his future life. Even if he tells someone something and starts to suffer harassment as a result, this will also be a useful experience for him.

If he has already told you and complains to you that he is being stalked. Then you calmly say that if you have made such a decision to tell about this friend to people who do not see him, then now be prepared for the fact that they will reject the incomprehensible. Because they are afraid of all this. Some are afraid, others want to be the same as you, but they cannot. And in order not to show this, they show that they are angry. Although even this is not in the Soul. That is, such feigned anger.

Yes, this exists in your world. Unfortunately it is so. And there is no need to hide this in front of the child. You need to tell it like it is. Then say: “But don’t be offended by them. Also send them the Light of your Love.” Teach him not to be offended by offensive words and, moreover, not to show aggression towards anyone. They will definitely understand you if, despite any hurtful words or ridicule, you continue to smile at them and send the Light of Love. So that he does not show any aggression. Because if he just gets offended, leaves and shows himself weak in front of them, then they may attack even more.

Elina: That's right. Thank you.

58:23 Why do we need the experience of remembering past incarnations?

Elina: Is the memory of past incarnations and the Spiritual world, and in general, the diversity of civilizations preserved among children in the Interstellar Union? Or is this impossible given the memory erasure?

Irina: The memory is erased in any case, that is, it is blocked.

Elina: That is, zeroing occurs in the current incarnation, right?

Irina: Yes.

Elina: And what are the parents’ actions in this case? What do parents and adults on the planets of the Interstellar Union do to preserve the memory of the incarnate Spirit about the Spiritual World?

Or do they start telling him about all this from scratch?

Irina: Memory is preserved in the form of qualities of the Spirit. Why does he need to know the details of his incarnations? He already has a different life.

Elina: I see. It's interesting, but here on Earth it happens that some children remember their past incarnations.

Irina: But it was their Higher Self that gave them such an experience to remember.

Elina: This is needed for something, right?

Irina: You need to go through this experience by talking about these memories.

Elina: I see.

Irina: Perhaps they have a mission to show people that reincarnation really exists. This is the mission of the Soul, to tell people about this, to provide some evidence that is so loved in the material world. But this evidence cannot prove anything if a person is not ready for this idea.

Elina: Does knowledge about a past incarnation help this person? That is, in his past life he made some mistake and must correct it in this life. Is this knowledge necessary?

Irina: If someone is simply interested in learning about a past life, then for this we have an institute that studies reincarnation. There are special psychologists there.

Elina: We're talking about karma.

Irina: Yes. It's like your psychologists-regressionists. Only they still

have access to the Spiritual world, that is, the ability to recognize these incarnations. But in order to qualitatively improve your spiritual level, it is not at all necessary to know exactly what mistake you made in a past life. Because if he did not correct it before leaving the incarnation, it means that it remained as a quality of his Spirit.

Elina: And the main task in this incarnation.

Irina: Yes, the main task.

Elina: Everything is clear.

01:01:18 At what age does a child connect with the Higher Self in the Interstellar Union?

Elina: At what age in the Interstellar Union, for example on Esler, do they connect a child with his Higher Self? Or is this quality already inherent from birth?

Irina: They deliberately connect?

Elina: Yes.

Irina: Like a question and answer, when he will be able to speak the language and speak, maybe around the age of five or six.

Elina: It turns out that his parents are introducing him to spiritual practices, right?

Irina: Yes, the parents themselves were taught what the Higher Self is and how to connect the child. All this is given in “family psychology” lessons.

Elina: I see.

01:02:08 Stages of teaching children at home and in public organizations on Esler.

Elina: Until what age is a child raised at home on the planets of the Interstellar Union? When does education and training begin in public institutions outside the home? That is, he is taken, perhaps, from home, and he is already undergoing training in another place.

Irina: It’s different on every planet. It is on Esler, somewhere until the middle of the 2nd cycle, that children live with their parents - this is approximately until they are 14-15 years old. Then they leave, perhaps to another city, as I already said, for more specialized courses. And then they just come for vacation. There are planets where children are educated in public institutions from the very beginning. And there are times where they walk or drive from home until the end of school, approximately until adulthood. It's different on every planet.

Elina: I see. Thank you.

01:03:23 What is personality? Child's personality. Formation of a child's character.

Elina: I will reformulate the next question a little: on Earth there is an opinion that the foundation of personality is laid at the early age of 6-7 years, just when the child is getting ready for school. Do representatives of the Interstellar Union agree with this? Their point of view is interesting. What are the basic qualities?

Irina: Personality is already inherent in past lives.

Elina: From the very beginning.

Irina: Personality is an embodied part of the Spirit. Her memory is blocked. But the whole personality does not consist only of the memory of this incarnation. Conscious character traits, you also know that each child is different.

Elina: Yes, of course.

Irina: This quality of the past incarnation is formed throughout life, but its foundations are laid in childhood. But only in the form of a worldview, which can also be changed. In the form of a worldview - the concept of good and evil. He usually learns all this along with the language and the socio-cultural norms that exist in a given family.

Elina: It turns out that it still depends on the parents, right?

Irina: What depends?

Elina: Formation of a child's character.

Irina: Not formation, but development of the character that he had in past incarnations. That is, the manifestation of negative or positive qualities, their strengthening or weakening, etc.

Elina: I see.

01:05:10 Scary dreams, sleepwalking, hyperactivity, shyness. Harmonization of parents from blocks. Practice for parents on healing the subtle bodies of the child.

Elina: Parents are concerned about the following points in their children's behavior: children's fears, fear of falling asleep alone, being alone, sleepwalking, talking in their sleep, hyperactivity or, conversely, excessive shyness. What should parents know in these cases? What should they do? And why is this typical for some children and completely unnoticed in others?

Irina: Because parents must harmonize themselves. First of all, dad and mom must clear themselves of blocks. To stop sorting out the relationship even mentally with each other - disputes, disagreement. Including not only with each other, but also with their parents. All this energy, which accumulates negative blocks, attracts various negative entities to children. They are in the same field. These negative entities

begin to come to children in their dreams, in the Astral Plane; they are not accustomed to such a sight. They quickly begin to return to the body, shudder, and scream. They are afraid to fall asleep later, because they already understand that they are waiting there. They really are waiting for them. As soon as you walk out the door, they will not only attack him, but will come close and interact with his energy. And he feels it. If this happens to your child, under no circumstances should you laugh at him, that is, make fun of him. This can greatly offend him that they do not believe him. It is not recommended to say: “You made it all up”, “some nonsense” - this is disrespect for the child’s personality. And it will sow the seed of disrespect for you in his Soul.

Elina: I see.

Irina: The best way in this case is to talk with the child about what exactly scares him.

Elina: And still figure it out in yourself, in your parental relationships.

Irina: Understand yourself and be sure to talk to your child: “What are you afraid of? Maybe you see something? Maybe you hear something? Some children are simply embarrassed to tell adults that they see something.

Elina: Yes, that's understandable.

Irina: Indeed, it happens that friends share with each other in kindergarten or on the street that they see something. But they told their parents, and they laughed at them. And they can tell your child this way, and he will think that you will laugh too. And this is always painful for a child, because he sees it as rejection from love. That is, if they laugh, it means they don’t accept it - that’s his understanding.

Elina: Thank you.

Irina: Therefore, you can carefully ask, if he cries, is afraid to fall asleep, ask: “What are you afraid of? Maybe you feel something? Maybe you see something? Tell me. I will not tell anyone. This will be

our secret." Then, perhaps, he will tell you who he feels. Seriously listen to this. Tell him that nothing threatens him. Tell him that he is under the protection of God. That is, what can control Light. This is if he sees something in reality and is therefore afraid to be alone.

Elina: I see.

Irina: If a child wakes up in a dream and is afraid to fall asleep, he may not remember. In this case, calm the child down. But at the same time, work on harmonizing your energy centers, both dad and mom, that is, forgiveness, reconciliation, love. During the day, try to walk more with your child in the fresh air, let him drink tea with lavender at night. It harmonizes contacts with plasmoids of all levels, if he has them. She will harmonize and calm him. And mentally, for example, in the evening before going to bed, dad and mom, holding hands, can imagine a child standing between them, whom they fill with Light. This is an energetic parental healing of all the subtle bodies of the child. They fill it with Light. It's more effective when they do it together. And if they are at a distance - mom and dad, when they do it at the same time. As if at one time they fill it with Light. And he feels it at the level of the Higher Self.

How to do it? Imagine the image of a child, greet his Soul, thank him for incarnating through his mother or father. And say: “I send you my Light of Love.” Imagine how a wide white ray comes from the heart of mom or dad, filling it, starting from the head. And do this for 21 days every day. You can spend at least 10 minutes in silence in the morning or evening for energy healing. There is absolutely no need to tell the child about this. This will harmonize it. And about 2 hours before bedtime, eliminate watching TV and computer games. They overstimulate the psyche of such children. They then find it difficult to sleep. Read a book with him, listen to songs. It's good to walk in the fresh air. Playing in nature also harmonizes children very well. That is, being in nature, playing with animals, plants, etc.

Elina: Thank you.

01:11:39 Indigo children, crystal children.

Elina: Here's an interesting question: we have the term "indigo children." There is also such a thing as "crystal children," that is, based on the color of the aura. Aura - indigo color, crystal.

Irina: These are high-vibration ones, from highly spiritual levels, who have had the experience of incarnation in highly spiritual plasmoid civilizations, the worlds of the Interstellar Union. They came to help the whole Earth, to bring them new spiritual teachings in the Light of the Creator's Love.

01:12:13 About the training of specialists raising children in the Interstellar Union.

Elina: Selected issues of training specialists raising children. How does this process occur in the Interstellar Union? Who is allowed to participate in the educational process?

Irina: The one who has been trained. It is the specialization - teacher, psychologist by training. They undergo the same training – in child psychology, family psychology. They, too, must communicate with their Higher Self, be able to go into the Spiritual world, etc. And naturally, they select for purity, I would say, for purity of heart. There they are selected by a certain commission. Parents of children also participate in this. For example, parents of all schoolchildren have the right to personally familiarize themselves with the questionnaires and talk with any teacher of the school where their child is, without sending him there yet.

Elina: Okay.

Irina: Yes, and I also wanted to say that in schools, during "family psychology" lessons (there is such a course - a "family psychology" lesson), when children under 12 years old, that is, primary school age (from 5 years old), have They also have a subject called "family psychology", where they teach how to interact with their own parents. What difficulties may arise, how to react to the words of mom and dad who forbid them something when they want something. It's not that they prohibit it, but they protect it from some dangers or something else. That is, what difficulties in education and mutual understanding

may arise. Teach children to interact with their own parents. There is such a subject at school, and it is considered very important.

How to understand what dad or mom wants when, for example, the parents' words seem too harsh to the child, etc. How to recognize this love? In these lessons they say that dad and mom love you. The main proof of this is that they care about you. They gave birth to you, etc.

Elina: Very useful lesson.

Irina: When I spoke at Esler, they asked me about education on Earth. And they didn't even believe that you didn't have lessons in "family psychology." For example, my wife and her friends are most surprised. My friends ask: "Who then teaches children how to interact correctly with their parents?"

Elina: Yes, unfortunately.

Irina: Good item?

Elina: Yes, very good and necessary.

01:15:29 Basic postulates in the education system on the planets of the Interstellar Union. Children's mistakes. Lies of children.

Elina: Well, and as a result of all of the above, what are the main postulates in the system of education, education of embodied Spirits on the planets of the Interstellar Union?

Irina: I'll tell you what the main postulates are. We don't have such a rating system. For example, some kind of rating system. We have a subjective opinion of each teacher, but which is not expressed in points, but simply in words. That is, in words, for example, as comments on the child's completed task or on his answers. And from childhood we teach children not to lie to anyone, including themselves. Because lying is a form of protection. And in our country, such a situation is almost unthinkable when, for example, one child began to

complete an assignment secretly from the teacher, copying it from another student. It's so common here.

Elina: We often have this.

Irina: Yes. Or, for example, he will secretly smuggle completed homework to some exam in order to secretly rewrite it. I just know that this is your practice. But this is practiced out of fear. From a very early age we are told in school that the main idea of education is that you should not be afraid of your mistakes. Just because you make a mistake and answer incorrectly, or if you ask 10 times something that you didn't understand but the whole class understood, it doesn't mean that you will be loved less. This instills in children a love of truthfulness, truthfulness, honesty and openness to the world.

Elina: Simply wonderful! Thank you, Irina, Mid!

Irina: And I thank you!

Elina: Very good answers to our difficult questions. We have a lot to learn from you. And these lines came to me. Can I read them out?

Irina: Yes, of course.

Elina: Children are our happiness! Children are our joy! Children are our strength! Children are our weakness! Children are our reward! Children are challenges! They just need care, affection and attention! And simple human understanding! Take care of your children!

Irina: I thank you, Elina and you MidgasCaus, and our dear TV viewers. See you again, friends!

Elina: See you again!

#278 Numerology of the Interstellar Union. Vibration of numbers. The meaning of each number.

https://blog.cassiopeia.center/numerologiya-mezhzvezdnogo-soyuza-vibraciya-chisel

https://www.youtube.com/watch?v=lgssK1bAMP8

00:21 Number is energy.

Irina : If we do not take the numerological qualities of numbers, which are manifested in different symbols of the planets, vibrations of character qualities, but simply take numbers as energy. Any number is a wave of energy that is different from another number. For example,

the numbers 1 and 2 differ not just in their design, but in the energy they contain. That is, when you write “1” on a sheet of paper, a completely definite energy appears in space, just like “2” or “3”.

If we consider sequentially a series of numbers from 1 to 10 in Arabic writing - they came from India and are called Arabic - this will reveal the whole series of transformations in the material world, which is caused by spiritual reasons. For example, this is a series of divine qualities that give rise to similar qualities in the material world.

01:44 The meaning of the numbers “1, 2 and 3”.

Irina: If we take “1” – this is the number of the Absolute, Divine Consciousness. It looks like a very bright white light. This is the point of non-existence and being at the same time. The non-existence of the material, but the absolute existence of the spiritual. Buddhists called it “shunyata,” but emptiness there is only for material manifestations, and not for spiritual ones.

After “1” “2” appears, and this is also not accidental. The very writing of “2” resembles a bird swimming on the sea. That is, this hints at some kind of wave. “2” is the number of the born Spirit, this is the number of the Soul. At first there was one God, and then there were two of them - God and the Son. “2” is the number of the one who is nearby. This is the number of the emerging Spirit, which is still aware of itself in unity with God, but, at the same time, is aware of its independence. That is, this is unity and separateness at the same time. Unity in energies, separateness in consciousness.

Vladimir : I see.

Irina : After “2” comes “3”. “3” is the number when two people decide to move together and combine their energy. From this the will to action is born, not yet the action itself, but the will to action directed outward. At first there were two, then a third appeared. This is reflected, for example, in the figure of a triangle: if “2” is a straight line on a plane, then “3” is an exit to another dimension, to height.

Vladimir : Everything is clear.

Irina : If “1” is a bright white light, “2” is the appearance of a bright luminous line, then “3” is a line that not only begins to rise up, it begins to pulsate. There was some movement.

04:44 The meaning of the numbers “4, 5 and 6”.

Irina: Then it goes to the number “4”. The ancient form of the number “4” is a square or a figure close to it, because a square has four corners. “4” is the emergence of energy that gives birth to the material world, that is, it is the number of the material world. For the first time, something solid appeared. “3” – the movement of the fine-material world arose, but without dense particles. “4” is the dense material world and structuring. From the Divine Absolute forms of space and matter arise that are familiar to us, which can be touched and felt. This is some sensation of matter. That is, it arises sequentially.

“5” is the number when “4” united with one: God united with matter, and incarnation arose. Or, for example, “2” - The soul has united with the will to action. She wanted to act - “2 + 3” turned out to be 5. The number “5” is the number of the incarnate Spirit. The spirit became incarnate for action. In the Spiritual world, this is also the number of the Higher Self - control over the situation, management of this situation. On Earth this is the number of man as a rational being. In ancient cultures, it was the number of a person, because a person has five fingers on his hand, which reflects the Cosmos. It’s the same for many creatures in Space.

Vladimir : Is there a correlation between these numbers and the chakra numbers, if you count from below?

Irina : No, not by chakra numbers, by chakra color. Each chakra has its own color, and each number has its own color. Color just shows vibration.

After the appearance of man, after “5” the number “6” appears. A person awakens a feeling of love and pleasure in the material world.

All forms of pleasure that he strives for in the body are only a vague reminder of spiritual experiences, of spiritual love. However, it is the same energy. It is simply manifested, just as light can be manifested through a lamp, through a lantern, through a torch, through the Sun. The energy of Love can be manifested through different things and combined with the energy of pleasure. Love and happiness make up one energy and that is “6”.

09:00 The meaning of the numbers “7 and 8”.

Irina: After “6”, “7” appears. After love, lessons and trials arise. After the pleasures, some tasks arise, tasks, upon completion of which the level increases. It does not increase from love and pleasure. A person remains at the same level because he does not need to make any effort to achieve what he did not know or learn anything.

Vladimir : I understand.

Irina : “7” is the number of learning new things; some energies that can be perceived as lessons, tests, sometimes even suffering. Buddhism puts it simply: the cause of suffering is desire, which grows when satisfied. Natural desire for pleasure.

Vladimir : Why then “in seventh heaven”? What is the understanding of seven as the highest Divine manifestation in Russian proverbs?

Irina : The divine manifestation of the seven and “in seventh heaven” arose due to the fact that a person has seven chakras, which are manifested through the physical body, and therefore seven levels, seven floors of the Astral world. The seventh floor of the Astral World, when you enter it in a dream or in a trance, is close to the highest experiences of the seventh chakra.

Vladimir : I see.

Irina : It depends not on the fact that the number is “7”, but on the number of floors of the Astral World. For example, on Esler - 12.

Vladimir : I understand. Fine. Further.

Irina : After seven comes “8”. The very writing of the number “8” indicates the endless circulation of certain energies. After trials, after lessons, comprehension of the Truth follows. The truth of the eight itself lies in the endless approach to it.

11:41 Features of writing the number “7”.

Vladimir : Let's go back to writing the number “7”. Why is there a crossbar, which is not in the American version? In the American version, "7" is written almost like "1", without the cross stick.

Irina : Previously, it was drawn as a staircase with a ledge at the top. By the way, previously it could be turned both to the right and to the left. Her writing was not strict. He is now showing me like the letter “T”. A platform and a slightly inclined stick, like steps.

Vladimir : In the American version, there is no transverse stick; a bar is written on top, then a line goes down. Almost like a unit. This is interesting. In Russian there is a transverse one.

Irina : This was previously indicated by stairs. The outline “1” was without a transverse line, it was a line from top to bottom, which showed the divine flow and the divine channel in the person himself.

13:09 “8” - comprehension of the Truth. The meaning of the number "9".

Irina : “8” is the comprehension of Truth, it is a certain secret that is inaccessible to those who are at other levels of awareness. Comprehension of the Truth leads to a state where the number “8” goes to the number “9”. The number "9" is an inverted "6", as you can see from the spelling. What does it mean? “9” is manifested spiritual energy, like Love.

Vladimir : Only it goes from top to bottom.

Irina : Unlike love with pleasure, which can be selfish.

Vladimir : It goes, on the contrary, from top to bottom.

Irina : “9” is absolute Love. If “6” is a certain circle, which means, in this case, the Higher Self and an attempt, a hook to the top, which can come out of the Higher Self and cling to pleasures. "6" is the search number. It is not for nothing that in the Tarot it is both a symbol called “lover” and “choice”. Sixth Arcana.

Vladimir : I understand.

Irina : “9” is a circle, energy comes down from it, so as not to seek, but to give; up and down. From nine energy goes to the Absolute and “0” is already assigned there. "0" is the number of infinity. The entire series that we have gone through and arrived at the Absolute is repeated an infinite number of times, already at other levels and turns of the spiral.

“11” is one Absolute, but at a different level in a more vivid manifestation.

Vladimir : I understand. Tell me, are these Arabic numerals? Did Arab contactees receive this information through the Islamic egregor?

Irina : They came to Europe through the Arabs. There were Indian ones. In Sanskrit there were exactly the same spellings in the Vedic books.

#279 Vedic astrology and its role for the Soul. Is a person's destiny predetermined?

https://blog.cassiopeia.center/vedicheskaya-astrologiya-i-ee-rol-dlya-dushi-predo

https://www.youtube.com/watch?v=xcPyJg4koZQ

00:21 Introduction of participants.

Irina: Hello, dear friends. My name is Irina Podzorova. I am a contactee with extraterrestrial civilizations. Today, next to me are my curator, MidgasKaus from the planet Esler, a biologist, a psychologist, a specialist in alien civilizations and a non-incarnate Spirit from the 22nd level, who is a Consulting Angel. His occupation in the Spiritual World is to calculate the conditions for the incarnation of Souls on Earth, based on the symbolic Teachings widespread on our planet, such as astrology, numerology and others. Today we will talk about Vedic astrology and its role for the Soul. Questions will be asked by our volunteer, specialist in Vedic astrology, Dmitry. Hello Dmitry.

Dmitry: Hello, dear friends. I'm glad to see you all. Glad to see Irina. Greetings to our dear mentors, curators, MidgasCaus, Alakhiel.

Irina: Level 22 angel's name is Alakhiel. We've already met.

Dmitry: Irina introduced me: I am currently a volunteer in the Cassiopeia project. I am also a practicing Vedic astrologer for more than 13 years. I provide astrological consultations. Today I have interesting questions for our mentors and curators, to which I think all viewers would be interested to hear the answers. The first question from the category of general questions. I will say right away that I will sometimes use Sanskrit terms, because astrology is Vedic, and all sacred scriptures are written in Sanskrit, an ancient language. But I will give a brief explanation of the words I use.

Irina: Yes, good.

02:18 Rishis are incarnate Angels and contactees with the Spiritual world. Selection of embodiments. Numerologists.

Dmitry: From general questions, the first question. Today, there are several main schools of Vedic astrology. Among them are the following: “Nadi Jyotish, Parashara Jyotish, Jaimini Jyotish, Tantra Jyotish and Tajika Jyotish.” They differ in their methods of interpreting horoscopes. Each of the teachings is based on the Teaching received from the ancient sage Rishi. There is a founder of each school, in the scriptures he is called Rishi - “Seer of Sage”.

Who were these Rishis, the sages who established this knowledge and passed it on to others? Who were the founders of Vedic astrology?

Irina: (Alakhiel speaks) I greet dear earthlings, I greet you, Dmitry, my brother in the divine Light of Love.

Dmitry: Thank you.

Irina: All people who carried with them the Teaching of numerology and astrology are divided into two categories. These are either incarnated Angels from the 22nd, 23rd levels, who brought with them knowledge that was not blocked by incarnation into the body, with the task of bringing it to Earth, or they were contactees with the Spiritual

world. This information was taken from the Spiritual world, based on terminology, scientific knowledge at the time when they lived, from the picture of the world.

Rishis are contactees or incarnated Angels. Most often, both: if he is an incarnate Angel, Angels begin to come to him, remind him, give information, etc.

Dmitry: That is, the source of knowledge is the Spiritual world. The knowledge came from there: either from the contactee, or through an incarnate Angel.

Irina: Yes, because we are Consulting Angels. In a group of 15 entities, I am engaged in what I embody, for example, in a certain area or at a certain time, the Souls of people, based on their incarnation tasks. Their Consulting Angels, who guide them through more than one incarnation, are already consulting with me.

When I say “we,” I mean myself and the other spiritual entities in my group. We are engaged in selecting the conditions for embodiment. Personally, I do calculations, that is, I look from the Spiritual world at the Time Tape, when there will be a coincidence of the positions of the planets and a coincidence of the numerical codes of the family, which will give it a certain name with the characteristics that I know about this Spirit.

Dmitry: Thank you. Next question.

06:20 Reasons for the emergence of different schools of Vedic astrology.

Dmitry: In former times, was there one school of Vedic astrology, that is, one single Knowledge. What caused the separation of these directions? What is the reason for the emergence of different schools?

Irina: There was previously a single Knowledge. (MidgasKaus speaking) This is a historical question. Unified Knowledge 10 thousand years before the war on Earth, which occurred 12 thousand years ago.

20 thousand years before the war there was no division into science, art, culture, esotericism and smaller Teachings. There was a single Knowledge of the Universe, as now in the Interstellar Union (IC). There was less knowledge, since your civilization had not yet accumulated rich experience in flying around the Galaxy and interacting with other Galaxies.

The civilizations that are members of the MS have already gone through a multi-million-dollar development path. And yours was just beginning to develop. However, this knowledge has not yet been shared in your consciousness. But for Alakhiel even now this knowledge is the same, because he is in the Spiritual world. He is at the angelic level of the Spiritual world. In the Spiritual World there is a different view of knowledge than that of those embodied on Earth. For him even now there is a single Knowledge: physics is inseparable, for example, from biology. In biology, there are also laws of physics. The laws of the cosmos, the laws of esotericism, sociology, everything is connected with the biological body and physical parameters. This is inseparable for him.

Why is your knowledge divided? Good question. (Alakhiel speaks) Our personal opinion. This is a feature of the manifestation of the mind of the Spirit in your material body. Firstly, you, earthlings, have two hemispheres of the brain. The activation of one is called logical thinking, and the second is called imaginative thinking. Although both hemispheres are involved in both, the structure of the brain already allows for the separation of information. This is not thinking in the flow, like in many other civilizations, when thinking simply depends on perception, and it happens continuously in the flow, and your thinking is divided, for example, into black and white, heat and cold. This is where all dualistic systems arose. Evil is good. This is a feature of your mind, your brain. At the moment she is like this. Why this is so can be debated for a long time, but now I'm talking about a fact.

Therefore, the unified Knowledge is perceived differently by different people, both in ancient times and now. Before the war 12 thousand years ago, there were also such divisions, but at that time there were no sciences, no institutes where they taught. All Teachings contained Magi, priests, who understood everything in their own way, but they did not argue with each other, but did their job.

Competition and dispute appeared later due to your difficult social conditions after the war. People were forced to compete with each other for survival on a suddenly cold and dead planet. This gave rise in your collective unconscious, your genetic memory, not just different understandings of the same thing, this was a feature of the mind, but a tendency towards competition, activation of the instincts of power, combined with the instinct of self-preservation. Thanks to which many of you began not only to share your opinion, I now mean earthlings, but to prove its superiority. From this came all the divisions into different Teachings.

Dmitry: Thank you. Everything is clear now. Next question.

11:56 Ganesha is an entity with many incarnations.

Dmitry: Vedic astrology indicates such a person as Ganesh. He is considered the patron of this science. But from the point of view of Vedic myths and legends, he is the son of God Shiva and goddess Parvati. Who is this person, Ganesh, who is considered the patron of science?

Irina: (Mead speaks) Parvati in many texts is called Shakti - the primordial divine energy, the female aspect of the Absolute. Shiva is part of the Trimurti, which was responsible for the destruction of already created forms for creation, which was performed by Vishnu, etc. Birth by these entities suggests that the Spirit Ganesha was born from the primordial energy of the Absolute, realizing itself at first as a feminine essence. He was born by Shiva, but not in the same way as a man gives birth to a man. He was born in order to be the destroyer of a certain World in his next incarnation. This speaks of the path of his incarnations that he went through after birth in the Spiritual World.

Who is this? This is a specific entity. Shiva is also a definite entity, but if you say that he gave birth, it acts as a symbol of energy. Under the name of Shiva, I know several entities of the humanoid and plasmoid type who represent themselves and feel this energy within themselves. As for Ganesh, this is a certain entity that has had many incarnations in different Worlds, on Earth. He has a long history of incarnations. For the last approximately 10,000 years, he has been embodied in a plasmoid civilization of the 24th density level on the planet Jupiter.

This is the Jovian plasmoid Spirit. He comes to Earth, he has contactees here. He endows them with his power of harmony, luck, etc. He has 108 names, although he had many more incarnations. He associates these names with the main incarnations in the material world. If you listen to Ganesha's mantra, which consists of 108 names, it will contain names that are difficult to pronounce and perceivable by human hearing. He transmitted them from plasmoid and humanoid worlds. This is the same entity. Now he is embodied, I communicated with him (MidgasKaus speaks). You can ask him, like any representative of a plasmoid civilization, to come and answer questions if you want.

Dmitry: Okay. Thank you.

16:12 Vedic and Western astrology.

Dmitry: The next question concerns two systems, which today are called “Western astrology” and “Vedic astrology”. Today in the world there are two largest and most powerful systems of astrology. The difference between these systems is the starting point of the Zodiac. There is "Western astrology", which uses the spring equinox as a reference point along the Zodiac, and there is "Vedic astrology", which uses the sidereal Zodiac and links it to the fixed stars.

Due to the fact that the reference points differ, the interpretations in these systems and the positions of the planets along the Zodiacs differ, it is as if there were two different Zodiacs, although it is one.

What caused the emergence of “Western astrology” if there was “Vedic”? It also appeared a long time ago and is fundamentally different in interpretations, in the Zodiac itself, in the counting of the positions of celestial bodies.

Irina: What you call “Western astrology” is not what exists now, like modern astrology. “Western astrology,” when it appeared, was also different from its modern counterpart. I have already said that those magicians and priests who studied “Vedic astrology” also understood this issue differently. After the war 12 thousand years ago, those who

remained alive and who were brought back by Burkhad's representatives included the wise men and priests, who began to tell the new generation, the children and grandchildren born, how to calculate the birth of a person using the stars. After the division of nations, some priests wrote everything down. Some continued to transmit orally.

Those that continued to transmit orally did not mention many details. This happened in the people who built Babylon, gave birth to the Sumerians, etc. Then it was Egypt. This is where the concept of “Western astrology,” as you called it, came from. It was then that one of the priests, who had his own personal opinion, took the spring equinox as the starting point. The real position of the constellations and celestial bodies began to be ignored. It was believed that this was the spiritual Zodiac. Not real physical, but spiritual. He passed it on to the children. Later, other changes appeared in astrology, for example, the “houses” of the horoscope began to be considered differently. They stopped being equal and starting from the first degree. There were many different changes.

As soon as in some countries the Solar calendar began to prevail over the Lunar calendar, in the astrological systems of these countries the Moon immediately lost the significance that it had originally. I would like to remind you that in “Vedic astrology” the Moon is much more important than the Sun. Largely because it is closer to the Earth and is responsible for the Soul, and the Sun is responsible for manifestation in the material world.

As for the different set of planets: in “Western astrology” for a long time only visible planets were taken into account. Much later, points on the celestial sphere began to be taken into account, including those that are not taken into account in “Vedic astrology”. I'm talking about Lilith now. Originally there were several planets. But there was no modern Pluto, Uranus, Neptune. They were not previously found in either “Western” or “Vedic astrology”. They weren't open. After the discovery of these planets, Western astrologers, who were astronomers in the scientific field, included them in their calculations. “Vedic astrology” remained in its original position, because astrologers who learned about the discovery of planets at one time considered that the functions of these planets in the horoscope were perfectly performed by two lunar nodes.

Dmitry: I see.

Irina: Such are the differences. "Western Astrology" is a partial teaching of "Vedic Astrology" because much of it has been lost. The concept of sub-horoscopes for every occasion was lost.

Dmitry: Is that what they call a fractional map?

Irina: Podhoroscope. (He told me) Knowledge was lost about how to harmonize a person with the planets, that not only different planets have different energy, but also different signs of the Zodiac. This energy influences each other. In Western astrology, aspectation has been preserved, that is, a description of the aspects of the planets, but it has been completely forgotten that a planet, once in a certain sign or house, influences not only the planet in the opposite house, but also the entire house. This is open radiation. Such moments were lost.

Dmitry: Thank you. The picture is becoming clearer. The last of the general questions.

24:30 Harmonious Calendars. Calculation systems.

Dmitry: I would like to ask about chronology systems. It is known that in the past different peoples of the Earth used different chronology systems. The most common ones are based on observing the movements of the Sun and Moon. Julian, Roman, Ancient Egyptian, Lunar, Sumerian, Mayan and other calendars were used. In Vedic astrology, much attention is paid to the Lunar calendar. Which calendar has ever been used by the inhabitants of planet Earth is the most accurate?

Irina: Most accurate for astrological purposes?

Dmitry: For the purposes of astrology, for life. People live according to the calendar. Now it is Gregorian. Maybe there is a recommendation on which calendar to use.

Irina: If this is simply the purpose of counting days, hours, minutes, etc., then Lunar and Solar are suitable. The main thing is to be adapted to the society in which he is located. As for convenience, if calculated from the point of view of spiritual development, then the calendar that takes into account the movement of the Sun and Moon is harmonious. Combined systems.

The Proto-Slavic and Proto-Indo-European calendar, which was introduced almost 500-600 years after the war, when the Moon was already present, is very convenient in this regard. When there was no Moon, they took into account the Sun and planets. When the Moon appeared, its movement began to be taken into account. The first such calendars appeared 500-600 years after the war, when there was no total settlement of peoples across the continents.

What was this calendar characterized by? It had 360 days, an equal number of days in each month. The movement of the Moon and the Sun was taken into account. And those remaining days that remained each year, because the Earth rotated in more days than 360, were simply added to the last day. These six days were the days of the so-called timelessness. Before the New Year, when the whole Earth moves into a new stage of existence, the year ends, then the stage of timelessness, when people finished all their business and prepared for the New Year.

This was considered a time not of physical cleansing, but of spiritual (they just called it) repentance. Only it was not before God, but before the ancestors, before the gods. Each person looked into his Soul. This is a period of timelessness. Then the first day of the New Year came, as a renewal of everything. Usually it was in the spring. It was tied to the point of the vernal equinox. The New Year was not in winter, as you have now, but in spring, during the renewal and revival of nature.

Dmitry: Thank you.

28:49 Calendars in the civilizations of the Interstellar Union (IC).

Dmitry: Question for dear MidgasCaus. What chronology system is used by civilizations included in the MS? Is there a single calendar that

these civilizations use?

Irina: We have computer calculation systems that can instantly show the local time and date of any planet after entering data. Each planet has different systems, since they are at different distances from their star, have a different number of satellites, are at different distances from the center of the Galaxy, etc. These civilizations have their own history of development, which has been inscribed in their societies for thousands of years, therefore, when joining the MS, they do not change anything, they simply enter data about their period of revolution around the central star, the seasons, the number of months, their duration.

They enter all the data into a computer, which will show, for example, how many Burhadian months are contained in the earthly one or vice versa. These calculations are performed by programs, not people. There is no single calendar, but this does not prevent humanoids of different races from finding their way, because they only need to enter the name of the planet into a special program. The result will be indicated: what is the local month, time of year, day of this month.

If you need to calculate the time, a dynamic wheel will be shown and it will be shown in what time zone. Many planets, since they are large, are also divided into time zones. Their Sun cannot illuminate these planets at the same time. One has only to enter the word “Earth” (by the way, earthly data is also entered, since MS specialists work here), for example, in Burkhad, it will be clear in which country what month is in, what time it is and what time it will be in three Burkhad hours. This is very convenient in contacts with earthly people.

Dmitry: Great. So, I will now proceed to the Jataka section. These will be specific questions.

31:50 The concept of a person’s “fate”. About the plan of implementation. Jataka.

Dmitry: Jataka is a section of Vedic astrology, the so-called birth astrology or natal astrology. The next question is for dear Alakhiel. What is fate? Is it destined? Are all life events from birth to death

determined for each of us?

Irina: The word “predestination” can only be called a spiritual being. What is "predestination"? You, as the Spirit, determine what will happen in life when you become incarnate. You can view your Life Plan using the Timeline. This will be predetermined for you. But the Time Tape has many different options. You can decide that the thickest branch will definitely come true because it is the most probable (a thick branch is a more likely event, thin branches are less likely events). This is very clearly visible from the Spiritual world. I've watched it many times. It often happens that some event occurs, and after this event the Probability Tape for you begins to unfold along a thinner line. The further it moves away from the thicker line, the less similar events are to what you predetermined. It's a game with yourself.

Destiny is the path of life. This word applies only to the incarnate Spirit. When we refer to the non-incarnate Spirit, we speak of the Plan of Incarnation. Some people call this a "script". But if anyone shot a film on Earth, they know that there are deviations from the script due to the speed of each actor’s performance, his speech, his manner of performance, perhaps those words or actions that were not included in the script. It is impossible to foresee everything. Also, each Spirit, when it decides to go for incarnation (what level are we talking about?), decides to incarnate not just to eat earthly foods and return to the Spiritual world. Some do this too, but this is not their main purpose.

The main goal is usually to reach a more conscious spiritual level, to develop. Some call degradation development into evil, this is also development. It depends on which side you look at: if for them it is development away from God, a decrease in vibrations. It all depends on the starting point. However, everyone sets more optimistic goals: usually completing their tasks.

What tasks might these be? Depends on the experience of the Soul. This is very clearly visible both in the astrological chart and in the “Tree of Life”. If in past lives a person has developed anger and hatred, then one of the tasks will be to take lessons on harmonizing this anger, directing the energy of this anger towards creation.

What is needed for this? Simply saying: “Develop Love” is not effective, because an angry person will not be able to develop Love until he harmonizes his anger. He will fall even lower, scold himself for not being able to do it. Therefore, his life task is divided into stages. The development of Love is a global task and sub-stages. We don’t call it “fighting anger,” we call it harmonization. To fight the manifestations of one’s own Soul is fraught with the fact that a person will drive them deep into his subconscious, and from this, blocks will form. This will not achieve any real results.

We are developing a plan for implementation using anger as an example. We look at who developed his anger: the circumstances of past incarnations. Or he's greedy. Where did this greed come from? Based on his characteristics, we choose the conditions for his incarnation, the people nearby, his parents, the conditions that will most favorably help him come out of low vibrations. Different ways. It depends on the type of Spirit.

If he is at the initial stage of harmonizing his anger, then with a calm environment, which will sow in him and develop a desire for tenderness and affection. But just because he became gentle and affectionate, the anger itself did not go away; it remained in the depths of his Soul. Therefore, as soon as he has passed this lesson, as soon as his Soul has become softer, more pliable, they begin to send him through his mentors, through the mentors of other people, such lessons and events in which he previously showed anger, but in a softer form, so that he I tracked my reactions and learned to harmonize myself. Well, and so on. There are many nuances there.

Dmitry: Thank you, thank you.

38:53 Horoscope and implementation plan.

Dmitry: Is it true that the birth horoscope is the plan of incarnation? And the events that can be shown by the birth horoscope can change, including the moment of death, which can be determined by the birth horoscope. Can he change too? Is this understanding correct?

Irina: Can the birth horoscope change?

Dmitry: Yes. A birth horoscope is a schematic representation of the planets and constellations at the moment of birth, place and time of birth. His analysis shows what events will happen in a person's life. You can determine the moment of death. Is this birth horoscope an indicator of the plan for incarnation, and can the events that they show change? As I understand, events can change. How true is it that the horoscope shows all the events that are planned, is it connected with the plan for implementation?

Irina: The birth horoscope reflects some part of the plan for embodiment, that which can be expressed through symbols. "Western astrology" can be expressed in symbols. It has a language and a slightly different approach. It can be expressed using numerology, runes, Tarot cards, various fortune-telling systems, etc. Can be expressed depending on the date of birth.

Only, for example, in Tarot it is no longer the characteristics of stars and constellations that are accepted, but the characteristics of the numbers that are included in the date of birth, depending on how the Tarot cards depict them. In particular, the 11th or 12th of any month will represent the same Tarot card. There are many nuances there. It also depends on the month.

Dates of death are determined in the Spiritual World, but with the help of such means as a horoscope, it can be approximately determined. Why is this done? Knowing the date of death is not useful for a person.

Dmitry: I understand.

Irina: Not only because of the fear of death, but knowing that he will die at a certain time, he can, when he is still far from death, not follow the spiritual path of development, but accumulate material wealth, blocks, thinking that he still has a lot time for spiritual perfection. If he acts in this way, he can harden his heart, fill his Soul with blocks, so that when he approaches the moment of death, he will not want and will not be able to change anything. It is more beneficial for a person not to think about death when he comes out of incarnation. Moreover, the period of exit from incarnation may vary depending on the actions of the one who is incarnated.

Dmitry: This is an interesting question.

42:38 Timing of the Spirit's exit from incarnation. Is it possible to change the date of death. Making a decision to exit incarnation.

Dmitry: Can representatives of the Spiritual world bring the Spirit out of incarnation ahead of schedule? Who makes the decision? For what reasons could this happen?

Irina: Of course, he can leave the incarnation ahead of schedule. This can happen for many reasons. But there are two main ones. The first reason: if he does not fulfill the task of incarnation, he is a high-level Spirit with a very important task. And after repeated warnings in the form of illnesses or accidents, or any thoughts, dreams, etc. from the Higher Self of a person, from his Angel, he still follows the path of self-destruction, then this incarnation can be interrupted ahead of schedule in various ways so that he does not significantly lower his vibrations. The second case is the opposite. For example, the Spirit successfully follows the path of implementing its incarnation plan, increases its vibrations, and reaches a new spiritual level. It happens that it is the personality of his spiritual level that becomes necessary either in the Spiritual world, or on some planet, or in some world. Then he is also taken out of incarnation ahead of schedule so that he appears where God needs him most.

Dmitry: I see. Does the Spirit Himself give consent to a premature exit from incarnation? Who decides such a question that one needs to leave the incarnation?

Irina: He may not give consent in the form of the embodied Spirit, because he does not know how to consciously communicate with the Higher Self. But in the form of the Higher Self, he is always warned. If he does not fulfill his task and degrades, then he may not give consent to leave the incarnation. His mentors can resolve the issue against his will upon leaving incarnation so that he does not lower his vibrations.

Dmitry : To protect.

Irina: Yes, it happens rarely, but they can do it.

Dmitry: Thank you.

45:06 The concept of karma.

Dmitry: The next question concerns the so-called “law of karma”, which in our interpretation, in the system in which I work, sounds like this:

“The present is the consequence of the past and the cause of the future.” I would like to know in more detail how this law works, and what this formulation means: “The present is the consequence of the past and the cause of the future.”

Irina: The present is a consequence of the past, most likely.

Dmitry: Yes.

Irina: The consequence of the past and the cause of the future. It's about choice. The meaning of the law of karma is free choice. Each person on Earth is given a certain amount of vital energy for incarnation, which is continuously replenished. A person, by his free choice, has the right to direct this energy to any action. I want to remind you that in the Spiritual world and in Vedic astrology, thought is an action of the mind. Feelings and emotions are the action of the spiritual heart. And physical action is the action of the body. If a person directs the energy of Light, which comes to him from the Higher Self through the spiritual channel, to fulfill his task, to increase his vibrations, then this creates positive karma for him, which will help him in his next incarnations. And since the Spirit is outside of time, positive karma affects its past lives and past incarnations. Spreads in both directions.

For example, you from the future can send the Light of Love to your past, remembering how hard it was. In the past, if you remember well, you will really feel that the Light has come to you. This is possible because the disembodied part of the Spirit is outside of time in the

Spiritual world. Therefore, for me, I am now at level 22 (Alakhiel says), it is not difficult for me to answer these questions. But it is difficult for me to talk about this in the language of a person whose perception depends on a material brain capable of thinking only in time. However, I understand that it is also difficult for you, the embodied Spirits, to understand me, who lives outside of time.

Positive karma is, in earthly language, those funds in the bank that you deposit. Just not in the material bank, but in the spiritual. Jesus Christ said: “Lay up for yourselves treasures in heaven, where neither rust nor moth destroys, and where thieves do not break in and steal.” This treasure in heaven in the Spiritual world is your own treasure, which is collected through golden thoughts. This is not material gold, but your golden thoughts, words, feelings, emotions, physical deeds. It’s impossible without them either. This process will not be completed here. They accumulate and are waiting for you there. They are not spent physically. If you have sent Light to someone, it does not mean that your treasure has been spent. It just got bigger. These are the characteristics of positive karma. This is how you shape your future.

As for negative karma. God gave you divine energy. You spent it not on Light, but on increasing your own degradation, on your own darkness. Don't think that God will be angry. It is your right. Your bag will be full of coal dust, which hangs on you and prevents you from going further. You will be able to develop spiritually, but it will be more difficult. It will take more effort to come out of low vibrations. For example, if you spent divine energy on anger, greed, judgment, or on a physical action that harms yourself or others.

Even if a person wished harm to someone, imagined a mental image that he would hit him, but physically did not do this. This does not mean that negative karma has not accumulated. It appeared, very small. She appeared in his thoughts. It will manifest itself in the fact that he spent his energy on this thought. This energy lowered his vibration. In the future, it will be easier for him to follow the beaten path and think the same way in a different situation. It will be harder to think and show Love. Possibly, but harder. This is what karma consists of.

Dmitry: I see. Can we say that the fruit of karma is the level of vibration, the state of the Spirit after performing some activity? That is, the fruit is an increase or decrease in vibrations and the development

or non-development of certain qualities of the Spirit. The fruit of karma is a certain level of vibration. Do I get it right?

Irina: You can say so. The fruit of karma is the Spirit itself, with all its vibrations, qualities, etc. But karma is not just a static process, it is a dynamic process. When the Spirit is incarnate, it is constantly changing. As the time on the clock changes, the second hand moves quickly. The change in karma changes even faster, depending on thoughts, etc.

Dmitry: I see.

53:32 Examples of monetary debt.

Dmitry: That's the question. From the point of view of "Vedic astrology," if a person borrowed something from another and did not repay it during his lifetime, he will have to return this debt to the lender in one of his next incarnations. How do you explain the concept of "rnanubandhana" - a Sanskrit term for unpaid debts from a past life? Who and how organizes the meeting between the debtor and the lender in one of the next incarnations? The question of debt and the return of this debt. Is this the case?

Irina: (Alakhiel speaks) There is a material debt, there is a spiritual debt. They are connected. When a person took money for himself, money is a form of energy that is embodied in some material image, he took energy. If he has not given it back, he has a debt of energy. There is debt in the energy sector. This is a preponderance of the energy of the Universe in his favor, if he did not give it up before leaving the incarnation. As for the consequences, it depends on the reasons: for what reason he took it, what he spent it on. This makes a big difference. For some reason he could not give. The external action is one, but the consequences are different.

If we take two debtors, one of whom borrowed money from a bank, for example, 10,000 rubles and spent it, for example, on the treatment of his daughter. And then he was fired from his job because he himself got sick and couldn't pay. In this case, good karma will be credited to him. How will this act affect the owner of the money who lent it? His

karma will depend on emotions. If he forgives, good karma will be credited to him. If he gets angry, allows negative vibrations, and cannot sincerely forgive this debt until the end of his incarnation, it means that he will lower his vibrations.

He valued his material possessions higher than the Soul of this person. Since he cannot forgive him like his brother. If he objectively cannot repay the debt. A lot depends on the circumstances. It happens that debts are not repaid for a reason. If someone who has money lends it, then the debtor's mentors make it so that he cannot pay back in order to teach a lesson in non-attachment to material means. It happens. This is one situation.

And the second situation is if a person borrowed the same 10,000 rubles from the same bank, but spent it on his own pleasures. They may be different. At the same time, he worked, and he had opportunities to return the money, but he continued to spend money on his pleasures. He was not disadvantaged in any way. He didn't pay it back because he considered himself higher and smarter than the one who lent it to him.

This is a different story, different karma and different responsibility. He lowered his vibrations. Became too proud and arrogant. He values material resources more than the Soul of this person. Money is a means to test your spiritual qualities. Maybe at some point one person has more money, another has less, and another day all this can change to the opposite.

Dmitry : I see.

59:13 Karmic knots. Money is a means of helping in spiritual development. Debtors and debt repayment.

Dmitry: In this case, if in the next incarnation there is a debt, does the person give it back to the person from whom he took it, or can he, by the decision of the Mentor Angels, give it to another person? Just go through this lesson: paying off debt? Or should I specifically give it to someone I took it from in the past?

Irina: Depends on the person's feelings and emotions. Many people don't even remember their debts, who owes them how much, after leaving the incarnation. They are busy with other tasks. And if he still remembers this, then he will really get into a karmic knot. In this case, mentors can bring these people together in incarnation, and the one who owes can repay his debt. Not necessarily money. For example, spend your energy, take care, for example, of a sick child who will be born, and this is his former lender. He will invest his energy in it, will spend his money on its treatment. Then at five or six years he will come out of incarnation. He will give everything. It happens.

Dmitry: Thank you.

Irina: He now says that it is better not to tie karmic knots, so that there are no such difficult lessons for the Soul. To do this, first of all, you need to treat money as a means of helping yourself and others in the spiritual development. This is their main purpose, like any type of material energy.

If someone asks you to borrow a certain amount, you first ask yourself, your Soul, your Higher Self, whether you can part with this money comfortably and harmoniously for yourself and your Soul forever. Don't tell him about it, ask yourself. Tell him: "I need time to think." Especially if we are talking about a large amount. And then ask yourself if you can get by if for some reason he can't return or something happens to him or he leaves. For example, he will have a child and he will need money. There can be many different circumstances in life. Honest analysis of yourself, ask your Higher Self, your heart: "If I give it to him now, and he doesn't return it to me at the agreed time, never, will I suffer much financially and morally? Will I be able to survive this? Will I be able to forgive him and maintain the same relationship with him? If it's a friend, for example.

If the answer is clearly "no," you shouldn't give it to him. You must come to him calmly. You have every right to refuse, because this is your money, money that you earned through your labor. The Universe gave them to you. It's yours now. You have every right to calmly say: "I cannot help you and give you this money, because... I'm making plans for my life. They are all in motion, in action. I can't give you this amount." Can you explain the reason? If you heard the answer "Yes", then give this amount. When you give this money, when it happens

from hand to hand, send a sincere Light with it. Mentally say: “May this be for the good of you and me.” And then, whether he gives it up or not, release it to the will of God. If he doesn’t give it back, mentally thank him for this lesson in testing his attachment to material values, fill him with the Light of Love. If he comes to you on the second, third, etc. again, same thing. Ask yourself the same questions as you did the first time. If the answer is “No”, don’t give it.

Dmitry: Thank you, thank you very much.

1:04:42 Planets as symbols of spiritual qualities in astrological calculations.

Dmitry: Knowledge about the influence of planets on our physical and mental state. Do they really have an impact? What makes a person act in one way or another? What Forces?

Irina: Books in Sanskrit were compiled by ancient rishis. They proceeded from spiritual concepts. When they said “Mars,” they didn’t mean this red planet. They meant the spiritual cosmos in connection with each person, the qualities of the individual. "Invader" is named after the planet. Something that captures attention and perception. This is the quality that is indicated by the planet.

You read that the Sun signifies such and such qualities. But this does not mean that the physical Sun in the sky has these spiritual qualities. It is said that the Sun, Moon or Venus are symbols of certain spiritual qualities. When we say invader, it has captured our attention. This is both a consequence of karma created in the past and creates a new one. It is not the real planets that influence, but the planets of the spiritual cosmos, as personality traits.

The Rishis knew about this. When they wrote, they assumed that their students knew about this and did not think about physical planets. The physical planets are calculated in the chart as symbols of time. Based on symbolism and his tasks, a person is born at a time when this planet will be in that house and that sign, which will indicate precisely his personality qualities, like letters in a book.

When you read the word “star” in a book, it doesn’t mean you are seeing a real star. There are symbols here. The fact is that the stars, the starry sky are also a book for the astrologer, and the letters and words are those combinations of planets that he sees. But there is a hidden spiritual meaning behind them. If you remove the words “planet Mars”, its qualities, also other planets, but leave all the other words, then you will simply read a book on deep human psychology, you just leave not “Mars”, but “energy of activity”, not “Venus” ”, and “energy of pleasure”, etc.

Dmitry: I see. I thank my dear mentors and curators. I sincerely thank Alakhiel, the 22nd level mentor angel, the respected curator of MidgasCaus, for your answers, for your help in deciphering such a complex science as “Vedic astrology” and I send you the Light of my Love.

Irina: They say: “We send you the Light of our Love. Thank you for your interesting questions and for the fact that you bring the Light of your Soul to every person you meet.”

Dmitry: Thank you.

Irina: See you again, friends!

May 29, 2021

Participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

MidgasKaus is a representative of the planet Esler, a biologist, psychologist and specialist in alien civilizations.

Alakhiel – Consulting Angel of the 22nd level, a specialist in calculating the conditions for the incarnation of Spirits on planet Earth;

Dmitry is a volunteer of the Cassiopeia project, a specialist in Vedic astrology.

April 19, 2023

#281 Broadcast with Irina Podzorova and Maxim Rusan on one of the most popular TV channels in Georgia.

https://blog.cassiopeia.center/ehfir-s-irinoj-podzorovoj-i-maksimom-rusanom-na-od

https://www.youtube.com/watch?v=mmx4vkyL5Qc

00:15 Presentation of Irina and Maxim.

Presenter: (speaks Georgian).

00:58 Fragment of the live broadcast of Andrei Malakhov's program. Letter from Kirchiton.

Irina : Just imagine, I was walking in the dark at the age of 13. Hello, forest, my first cosmodrome! How many times have I gone from here to deep space...

Narrator's voice in the film : While in alien ships, Irina visited many planets of our Galaxy, and also visited the planets of the Solar System. From the age of 13, Ira kept a diary where she wrote down flight reports, including a number of precise details, data in numbers, diagrams, and a dictionary of alien terms.

The main alien curator of Irina's astral contacts is a xenobiologist from the planet Esler named MidgasKaus. Kirchiton, Irina Podzorova's first curator, wrote this text in his own hand: "Hello, raise your face to the

stars. We remember you. You are not alone".

Andrey Malakhov : Hello, in our studio Irina Podzorova from Voronezh, who claims that she is constantly in contact with extraterrestrials, aliens. Good evening!

Irina : Hello.

Andrey Malakhov : The most interesting thing is that they told us about you from the United States of America.

02:33 First contact and acquaintance with Kirchiton (film fragment).

Irina : I saw some kind of triangular object. Then I saw that the doorway was open, the staircase was illuminated by the light from the door. Five tall people stood near the object. They were about three meters long.

One of them asked in Russian in a male voice: “Who are you?” I told him: “Who are you?” He says: “I am Kirchiton. Will you fly with us? It became very interesting to go into space with them, to see where they live.

After my first trip with Kirchiton, I thought for a long time about what it was? At first I doubted whether it was real or unreal? I didn't have any proof. But, going over the details of my journey in my memory, I did not find any reason to doubt. Everything was not in a dream, everything was real.

I continued to go to these contacts twice a week. I haven’t told my mother about this yet, knowing full well that she wouldn’t believe it. Indeed, it is difficult to believe, especially without seeing aliens. As soon as I returned from the next contact, I wrote down and sketched everything that I saw and heard there.

Kirchiton said: “We chose you. If you agree to become our contactee

with the planet Daraal, then we will fly to you twice a week and show you different planets. To do this, you must agree to three conditions and allow the chip to be installed on you." That's what he told me: "Chip."

"Why come?" "Because we have such a program for working with the Earth. It is not yet included in our community of intelligent planets of interstellar worlds. We can only show individual contactees the Universe." I say: "What is needed for this?" He told me: "We must agree to three conditions."

Do not tell anyone about the contact. That is, at first he did not advise me to do this. Visit him twice a week in the place he chooses during the summer, as long as there is no snow. The third condition is that contact is established for life.

The time has come to tell as many people as possible about this contact and the information of the Interstellar Union. This is what our spiritual mentors decided.

Presenter: (speaks Georgian).

06:36 Irina Podzorova's story about her first contact with Kirchiton. Participation in the Project.

Irina : Hello, dear friends. I remember very well my first physical contact. I was 13 years old. I met aliens while I was walking. It was in the evening in the park. They did not look like people, but, nevertheless, I did not have any fear or rejection. I understood that since they were aliens from another planet, their appearance could be completely different.

When they invited me to visit their planet, I immediately agreed because I was interested in visiting space. That's why I went with them. In all the years of my contact, 22 years to be exact, I have never regretted my decision. After the first contact there was a second, a third.

Many years later. I have new curators, a project in which I am participating. Working in this Project and my work as a contactee allows me to fulfill the task of life embodiment, which I am very happy about and wish for every TV viewer to find their path and fulfill their destiny.

Presenter: (speaks Georgian).

08:25 About the purpose of contacts between aliens and earthlings.

Irina : Of course, I asked them: “What are these contacts for, why was the chip installed for me?” So that I can transmit information more purely and without distortion, to monitor me and those people who are around. For them, this is studying our civilization and transmitting information through me. For what?

The main goal of the Interstellar Union is to change the development of our society so that we can join them. Information is given not only through me, but also through other people who are contactees with the Interstellar Union, the Galactic Federation of Light, and other civilizations.

Why do they contact contactees and not directly contact our authorities? I asked them. They said that mass, open contact with people, scientists, politicians would be contrary to our free development, because it would be interference in the affairs of civilization. When contactees convey their ideas to society, a choice is made whether to accept them or not. Free development is not impaired.

Presenter: (speaks Georgian).

10:21 Introduction of participants.

Irina : Next to us are our curators: MidgasKaus - a biologist, psychologist, specialist in alien life forms from the planet Esler and LiShioni - a specialist in astral interactions, in the study of the astral

world from the planet Shimor.

Presenter: (speaks Georgian).

Irina: They are ready to get in touch with you, talk with your curators and answer your questions. Through me, through my consciousness, they see you, your energy and say that you are very bright, positive people who want to bring good to your state.

Presenter: (speaks Georgian).

Irina : At the moment I am communicating with representatives of the Interstellar Union. This is a humanoid life form that lives in dense bodies like us on other planets. I communicate not with ordinary representatives of their races, but with scientists who study the world around us, including our planet and the Cosmos as a whole. They have answers about the structure of space, about the past of the Earth, which are included in the scientific knowledge base of the Interstellar Union.

12:28 Possible future. Time Tape.

Irina: As for the future, they can look at future options in the Time Tape. If there is such a request, they can come and have a look. The future has many options. The execution of one or another option depends on our choice. What choice will be made, and what the chain of these choices will lead to, is unknown to them, as well as to us, because they are limited in their knowledge of the future by God himself.

Presenter: (speaks Georgian).

13:20 Diseases of the Earth and disasters.

Irina : Whether or not a cataclysm occurs depends on the state of not only the biosphere, hydrosphere and earth's crust, but also the noosphere of the Earth, our thoughts, feelings and the energy of our

civilization. Natural disasters do not happen by chance. This is the reaction of the Spirits of the Earth - plasmoid civilizations to a large amount of negative energies in the noosphere. It is difficult for them to live in such an environment, they begin to get sick. When you hear that nature is sick, the Earth is alive, a figurative description of reality is true.

The Earth has a multidimensional consciousness of the totality of plasmoid civilizations that live on it. She begins to get sick not because we exploit her depths, extract the minerals we need, her consciousness begins to hurt from negative thoughts that are directed against the flows of the Creator's Love.

Why is she starting to get sick from this? Because all cosmic bodies, including planets, stars and galaxies, were created by God, who loves everyone. The Earth was created in such a way that it selflessly gives us its gifts, just like the Sun. This is a manifestation of unconditional Love.

If we cultivate selfish thoughts and negative feelings in our Soul, we close ourselves off from the Light, which makes it sick. In order to cleanse herself of incarnated Spirits who do her harm, she can, with the help of plasmoid civilizations, produce various cataclysms to bring them out of incarnation. If a cataclysm occurs, those people who died as a result do not enter the Spiritual World by chance, but at a time when they are ready. If they do not need to leave embodiment during this period, their Mentors will create such conditions that they will not end up in a place of cataclysm.

Presenter: (speaks Georgian).

TV channel guests : Can you hear us? We have paranormal phenomena, everything goes wrong with us.

Maxim : I'm not surprised, I've already changed a lot of equipment.

Maryam : We have the same thing here, lamps explode.

17:19 Curators of presenters. About the negative effect of predictions.

Irina : In addition to our curators, yours are also present here. Some of them are with you in the space you are in. Three of you came here, moved from your space to ours. These are representatives of plasmoid civilizations.

They heard everything I said about plasmoids, cataclysms and want to add that if you predict one of the future options where a cataclysm is likely to occur in advance, this can cause an even greater decrease in the vibrations of the Earth, because people will be afraid. If the total vibrations of people change, and this catastrophe does not happen, that is, the event will develop in a different way, then this will discredit the person in front of people. Although they themselves have raised their vibrations, they may not believe this person. There will be a negative prediction effect.

Levon : I suspect that my curators are present with me. In my opinion, from the Ra civilization. Plasmoids communicate with me. Is this true or not?

Irina : The Plasmoid that is here now, which came from you, Levon, his name is Kroy, and he said that he represents the planet Jupiter. This is the solar system, we can say that for them it is like a second Sun. 16th density level.

Guests: (Question to Irina in Georgian).

19:42 The concept of enlightenment. Evolution of the Spirit.

Irina : Before you reach any level of enlightenment, you must first explain to all people what it is. Enlightenment is the awakening of Light in the Soul. The Light is not electrical, physical or stellar, but the Light of your own Soul.

The evolution of the Spirit and the social evolution of any civilization is so that every incarnated Spirit, every person can reveal in himself the

potential that is inherent in him by the Creator. To do this, you need to explain to the child from childhood why he came here, that he is temporarily in this life. So that, with the help of the eternal love that he carries with him, he can change this world towards increasing the level of Love and awareness in it. If at least 70% of the adult population of the Earth does this, you will be ready to enter the Interstellar Union, because your wars will automatically stop, crime, injustice, etc. will sharply decrease.

Guests: (Question to Irina in Georgian).

21:01 Contactor, who is he? Contact with the Higher Self. Who is chosen as a contactee? Purposes of contacts.

Irina : Any person is a contactee. The level of contact, the level of purity of information transfer and the civilizations that come into contact are different for everyone. A contactor is a person who receives information from a source outside his physical brain, his embodied part of the mind, which is embodied in this brain, in his personality.

Each person is a conscious or unconscious contactee, at least with his Higher Self, a disembodied part of the Spirit. This manifests itself in the form of intuition, conscience, various dreams, etc. If a channel has not been built with one's Higher Self, that is, a spiritual channel, then it is almost impossible for a person to become a contactee with someone else. He will not be able to hear his supervisors, even if he has them, if he does not learn to communicate with his Higher Self on a conscious level, not in the form of intuition, but in the form of "question-answer". Conscious contact with your Higher Self is the first task on the path of development of any contactee.

Who do civilizations and curators choose? There are several factors. Contacting should be part of a person's life task. There is conscious contact with plasmoids, humanoids, the Spiritual world, disembodied Angels, etc. The purpose of this contact must coincide with the purpose of a person's life, why he came here. There is contact personally for a person, not public. They help him with some everyday issues and life tasks. It doesn't answer questions about the universe.

There is contact at the level of healing, when energies are supplied to a person so that he can heal people, so that he can receive information about the nature of herbs, etc.

There is a contact, like mine, informational. The goal is to transfer information from the Interstellar Union. I have three chips, so I can transmit information from humanoids, plasmoids and the Spiritual World.

To become a contactee with specific goals, contacting must be part of the task of embodiment. This is the first condition. The second condition: the contactee must desire this himself, give voluntary, informed consent to contact with some entity for certain purposes. The third condition: he must be a pure conductor, that is, his energy and purity coincide with his curators.

24:52 Causes and consequences of reducing contactor vibrations.

Irina : It happens that a person changes. Man is changeable. If at first he coincided in vibration with his curators, and then negativity appeared in him, then the contact itself does not stop, high-vibration ones continue to come to him and try to help, but low-vibration ones can also come to him and take the form of his friends.

If he does not distinguish between energies, he may not be able to do this, and may not consciously go into the Astral. In order to continue to carry out his mission as a contactee, to fulfill his task, he must learn to distinguish them by words.

Maxim : A lot of contactees descend to low vibrations only because their ego begins to work for them, or money begins to spoil it, or something else. Accordingly, reducing vibrations, he descends and begins to contact low-vibration entities.

Presenter: (speaks Georgian).

26:15 Curated by Maryam.

Marianna : I have contact with another civilization. I'm just interested in your opinion about me. Do you have any sensations? Maybe MidgasCaus can help me, who am I communicating with? In a trance state, names came to me. They said that they were from the Pleiades constellation, and I belonged to them.

Irina : Maryam, while you were talking, I asked my Higher Self, what is your energy, level of contact, civilization? The first thing that came to me was the Pleiadians. Now I can no longer distinguish what kind of civilization there is, there are quite a lot of them. But these are not only the Pleiades, not only aliens. You still have contact with the Spiritual world. Now let's see who the curator is. It seems to me that in the Spiritual world your curator is Archangel Metatron. You also met Saint Germain in the Astral. This is the planet Disaru.

Maryam : True, I met him and in a trance state I communicated with him.

Irina : Mead says he senses humanoids in you. If someone took you physically, then this happened more than once. What he feels from you is the energy of the Pleiades, but this is not Burkhad's colony, these are other aliens.

Maryam : I get goosebumps from what you say. My vibrations have increased.

Maxim : We can see later and send Irina to the Astral. She goes there quickly.

Irina : Yes, I can talk to them.

Maxim : Within a minute she goes into the Astral. This has always been surprising to me.

Irina : I can come with MidgasCaus and LiShioni to talk with your curators. Now MidgasCaus emphasizes that you have contact with the Spiritual world, with humanoids. This does not mean that you have no

contact with plasmoid civilizations. They may go out somewhat less frequently. In terms of energy, you are a universal contactee.

Maryam : Thank you very much. “What should we, mere mortals, do?” – Mariko asks.

Maxim : You don’t have mere mortals there.

Erekle: (speaking Georgian).

29:33 Quantum transition.

Irina : Greetings, Erekle. You are a contactee, as I already told you. You have your own curator, Orion, the planet Tumesout. We are now in the active phase of the quantum transition, that is, the level of vibration of each quantum that makes up the material plane of existence is increasing. This change in vibrations does not occur by chance, it is initiated by the Spiritual world, passes through all the subtle-material civilizations of 56 density levels and then passes to our dense-material plane.

What is the cause and significance of quantum transition? This was initiated so that Spirits could incarnate in such bodies and in such a world that are more conducive to spiritual development and overcoming those illusions that lead to the suffering of the Spirit.

30:39 Tasks of contactees.

Irina: The global task of all contactees is unification. We can help by uniting in common goals and objectives, in an alliance. By this we will show an example to the whole world that those people who follow the path of spiritual development can come to an agreement among themselves and create an alliance. Then we will become an example for those people who are in other egregors - religious, political. We are in front of the whole world. Not only people look at us, our curators look at us. We must see the Light in each other, recognize it, and only then will we be able to teach, through our examples, to recognize the Light in ourselves and in each other, all people. This is the first task.

The second task: not only learn to communicate with your Higher Self and curators, but, if possible, help others in this. Establish contact with your loved ones with the Higher Self, friends, relatives, children.

The third task is to raise your children in the spirit of love, unity, friendliness, hard work, interest in the stars, the Spiritual world, faith in God, etc. By doing this, we will not only fulfill the task of our incarnation ourselves, but also lay the foundation for a creative, bright, spiritual society on Earth.

Maxim : It is imperative to change the attitude towards aliens, because a large number of films and contactees carry a negative perception of aliens.

Presenter: (speaks Georgian).

32:58 Mass contact decision.

Irina : What you call is mass contact. I spoke with a representative of the planet Burkhad or Pikran in the constellation Cygnus. This is the capital of the Interstellar Union. The inhabitants of this planet, together with other civilizations, make the final decision on mass contact with any planet. They told me that mass contact with the Earth can only be for the purpose of joining the Earth to the Interstellar Union.

(There is a conversation between the participants of the television studio in Georgian).

35:10 Forecasts for the coronavirus pandemic.

Irina : Now I'll explain to Mid. Our interlocutors call a pandemic not a mass epidemic, but the social measures that have been taken. He understands the word "pandemic" as a biologist, in the classical sense. So he asked me: "Did it begin?" I can only guess based on the trends of what is happening in society now, that is, the measures of social restriction that have been adopted by your government structures. We ourselves expect their removal or replacement with softer measures.

Based on the trend of what is happening in the Spiritual World on the Timeline, we can say that within a year they will either be lifted or significantly mitigated. The implementation of this future option depends on earthly civilization. The less fear there is about the virus and physical death on Earth, the sooner you will pass this lesson. The power structures of the Earth with their laws will only confirm your spiritual growth.

(There is a conversation between the participants of the television studio in Georgian).

36:50 Wishes of the curators.

Maxim : Wishes from LiShioni and MidgasKausa.

Maryam : What can they wish for us?

Irina : I greet you, residents of sunny Georgia, a beautiful country and inhabitants of the Earth. I want to wish you that every citizen of your country and every inhabitant of the planet, every morning, watching the sunrise, remember your inner spiritual sun, which is located in each of you. So that he enters a new day with the understanding that it is given to him to do good, bright deeds. Just as the Sun gives him light, he is called to give light to those around him.

To the understanding of Light that LiSioni gave, I want to add the wish that everyone understands the degree of responsibility that each person bears for each of his deeds, words and for each of his thoughts. First of all, in front of yourself, as a part of God, a particle of which is in a state of embodiment at different levels of existence.

Presenter: (speaks Georgian).

Levon : I want to dedicate this song to MidgasKaus and LiShioni and all those who will listen to me. Love to everyone. (Sings).

Maxim : Very cool. Spiritual energy. There is something connected with energy, with love, as far as I understand. If they told me that this is one of the best singers in Georgia, I would believe it.

Irina : Mead says that you were now singing in front of the entire Universe, realizing that alien, spiritual entities were hearing you and your spiritual heart was completely open. You shared this happiness and light with every word, every emotion with those around you, wanting them to experience this joy.

Presenter: (speaks Georgian).

Maxim : See you again.

Presenter: See you again!

Broadcast May 31, 2021

Participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia Project and the Center for Spiritual and Physical Development;

Mariko is a TV channel presenter in Georgia;

Erekle Shonia - ufologist, specialist in anomalous phenomena;

Levon, Maryam – guests of the TV channel;

MidgasKaus - representative of the planet Esler, biologist, psychologist, specialist in alien life forms;

LiShioni is a representative of the planet Shimor, a specialist in the astral world and its interactions with the material world.

#282 Suicide: causes and consequences. The soul of a suicide after death. Responsibility for euthanasia.

https://blog.cassiopeia.center/suicid-prichiny-i-posledstviya-dusha-samoubijcy

https://www.youtube.com/watch?v=kDloXevE1y4

00:21 Greetings to meeting participants. World suicide statistics.

Vladimir: Hello, dear friends! My name is Vladimir Goldstein, I am in the suburbs of Chicago, today we meet again with our dear, beloved contactee Irina Podzorova. Hello Irina!

Irina: Hello!

Vladimir: I want to say that it is absolutely no coincidence that I am in front of you today in a not very ordinary form, because you see the color of my clothes today, and this makes sense. We may not have the most fun topic of the conference today, but this topic is also part of the Universe, and we could not ignore it, because there are also a lot of

questions from many of our listeners about this. So, today we will talk about suicide and everything that comes with it. Irina, please introduce our guests.

Irina: Hello, dear friends! My name is Irina Podzorova, I am a contactee with extraterrestrial civilizations. And today, present next to me in the astral bodies are MidgasKaus from the planet Esler, a biologist, psychologist, specialist in alien life forms, and LiShioni from the planet Shimor, a specialist in astral interactions and the study of the astral world. Hello, dear friends! They are ready to answer your questions.

Vladimir: First of all, I want to say that some of the questions were prepared by our volunteers, some were prepared by me, I am very grateful to our volunteers once again, who are always behind the scenes, they are not visible, but they greatly help the development of the project. And so they prepared information that, according to statistics, every 40 seconds in the world today someone decides to die. According to WHO, about 800 thousand people die annually for this reason, taking their own lives voluntarily, and among young people aged 15-29 years, it is the second cause of death after road deaths. First I want to ask, please tell Mead and LiSioni, have you had personal experience of communicating with Spirits who passed away in the format of suicide, from physical life, and you then either led this Spirit as Mentors, or simply communicated with such Perfume. Do you have such personal experience?

Irina: Mead says: “Since I incarnated from the 21st level, as a Guide Angel, when I was in the Spiritual World, I met such Spirits too.”

02:45 Suicide. Spiritual causes and consequences of suicide.

Vladimir: I see. Fine. Then we'll start asking questions. The first question is this. There is an opinion that suicidal behavior is predetermined, that it is karma. Is this really the case, and can suicide be written down in a certain way in the plan for the current life as one of the likely options?

Irina: In plans or options? Slightly different things.

Vladimir: Come on, then we will answer: both. In the plans, I realized that the Spirit is unlikely to plan this. I understand that it is unlikely that the Spirit plans such things, let's then talk about the options, and then say: "Can suicide in a past life influence the fact that a person will have a predisposition to this in this life?"

Irina: Suicide. What is suicide? This is the deliberate taking of one's life in order to get rid of any material or mental suffering in the body. The most general definition.

Vladimir: Yes, absolutely right.

Irina: The fact is that suicide is a visible action of the incarnate Spirit, but a sequence of reasons always leads to it. And these reasons themselves are deposited as a block in the astral body, influencing the mental attitudes of the Spirit, and suicide is only the material embodiment of these thoughts, feelings, desires and emotions that were not processed into Light. And if they are not processed into bright feelings, if they are not transformed into a feeling of love, acceptance, then they remain in the Spirit, that is, the body dies, life comes out of it, and it returns to the elements of the Earth, and the Spirit leaves with the same problems, which he did not solve. These were his lessons, but he did not solve them, he took them with him. This is the choice of the Spirit who postpones the solution of his problems to a subsequent incarnation, but he makes this decision difficult for himself because when he is born in the next life, the memory of these reasons will be blocked in order for him to adapt to the new body. The very character formed, which led him to this decision, will remain in this Spirit and, undoubtedly, will influence his attitude. It is not something that will determine the next suicide attempt, it may make the mood background somewhat depressive, for example, or make it an overly impulsive character with a tendency to some kind of affective reactions of the paranoid type, the so-called unstable personality type, and so on, then it is quite possible.

06:28 How do negative energy blocks from a past life affect the character of the current incarnation?

Vladimir: Is it possible then to say that people with this type of

personality, prone to depression or similar affective states, that with a high degree of probability they could have attempted suicide or successfully committed suicide in past lives?

Irina: The fact is that different actions can lead to such a character. The act of suicide itself is only a consequence, but blocks can lead to another act. For example, for different people, the same block can lead to suicide, to murder, to violence, or simply to some kind of depression, which will be experienced by a person until death, will not lead him to anything, it all depends from his beliefs, strength of character, environment. That is, the same blocks can lead to different actions. We can only say with a high probability that if the child has a character, and all children have different characters, right? If a child has the character of an unstable type of nervous activity, he has an overly impulsive psyche, attention deficit hyperactivity disorder, plus a tendency to depression - such a hypothymic personality, then we can most likely say that the Spirit has accumulated many negative blocks in a past life. And how he accumulated them, and how he realized them, remains a mystery to us.

Vladimir: I see. Fine. Who answered us now, MidgasKaus?

Irina: Yes.

08:14 What happens to the Spirit after suicide? Meeting of the Suicidal Spirit with the Guide Angel and low-vibration Spirits.

Vladimir: Dear MidgasKaus and LiShioni, please tell me, please describe more precisely, please, which of you considers it necessary, in more detail, some average, classic situation for a Spirit who has committed suicide. How do his impressions differ when he left his body from those of the one who left more naturally, that is, without committing suicide? Are there any nuances, are there any differences? So the Spirit committed suicide, the Spirit left, and what happens after it leaves the body, are there any special features for it?

Irina: If we take the most general situation, then after leaving the body, he may be surprised to discover that he continues to remain conscious. He can see his body, the room where he is or the place.

When he leaves the body, he will have greater contact with his Higher Self, and he may realize that he has blocked his opportunity to correct the reasons that led him to this act. He may even try to enter this body and fill it with life, but he will not succeed if it is already damaged. He may regret this, and since he came out in the low vibrations of resentment, anger, depression, he will attract low vibrational Spirits from low levels who will say: “We will be your guides, and we will bring you to your level.” But he will also be met by Angel Spirits from level 21. Even if he does this act suddenly, his Guardian Angel will still inform the Spirit Guides to come. Even if they weren’t expecting him at the exit, but he did it suddenly. But before they appear, he will still come into contact with dark evil Spirits, with demons. They can talk to him, judge him or laugh at him, or say: “Serves you right!” It happens differently there. But the only thing is that physically they cannot do anything to him, they can just talk to him, they can scare him, they can tell him something about his relatives, for example, that “we have brought you down and will do the same with your son,” call feeling of guilt, or rather, strengthening what is. But when the Angel-Guide appears, he guides him to the level where he should be according to his vibrations. He may not leave, he may refuse to go with the Guide Angel and remain in the Astral.

Vladimir: Will he be led to these lower levels by a Guide Angel, or, as many believe, will he be dragged there by these dark, evil Spirits who will be allowed to do this because his vibrations coincide with their vibrations? Who will lead him there?

Irina: Until the Angel-Guide appears, low Spirits can try to pull him up, depending on the reason, he left, depending on what vibrations he was in. If he was aggressive, for example, if he had a lot of suppressed aggression, he thereby gives the right to evil Spirits to also show aggression. But as soon as the Angel Guide appears, he will simply direct the Light at them, he will not show any violence, they will move away. They can shout: “Guide Angel, he is ours, you have no right, you have no right to interfere with us.” But he will say: “I will take him to that level, I will complete my task, and in the future let God deal with his sin - the deprivation of life.” “You are not his judge,” the Guide Angel usually answers, “only God is his judge.”

12:55 Meeting of the Suicidal Spirit with God in the Spiritual World. Where does unspent vital energy go during suicide?

Vladimir: Everything is clear. And what happens if this Spirit did not go into aggression, but for example, left because he could not withstand the loss of a loved one, or, let's say, he could not withstand severe pain from some fatal disease, or it was euthanasia, then That is, he did not leave in low vibrations and then immediately repented. After this, he himself called upon the Angel-Guide and is immediately in repentance, in the Light. Appeals to the Angel-Guide with prayer and with Light, and does not merge with low-vibration Spirits. Could this be an option, and what happens then?

Irina: Maybe, of course. As soon as he comes out, the Guide takes him to the level that he reached during life, to the level that he had at the time of death. Later, when he enters the Memory Room, in contact with God, God shows him the period that he should have lived according to his own plan, which was before this incarnation, and shows him the opportunities that were missed by him, when he left. God is not judging him for anything, he simply reveals to the Spirit options for the future that should have happened to him, and the Spirit himself begins, one might say, to regret these lost opportunities and is already thinking about it. Usually, suicidal Spirits begin to think about their next incarnation quite early. The whole point is that that vital energy, not spent by him, which was given by God for the incarnation and which had to be spent, and since he left on his own, arbitrarily decided by his will, then this energy remained in the Spiritual world, it remained with him, in him.

The next incarnation for his tasks cannot be assigned until he has expended this energy. He can spend it by incarnating in some body, usually on the same planet from which he left, but he must live there the same amount of time that he would have lived if he had not committed suicide. This can be either several months or several years, but then this incarnation is interrupted for a natural reason. Not because of a crime, murder, but because of a natural reason. The heart of this child or teenager, for example, stops, and he goes into the Spiritual world, having already completely spent this energy. Such Spirits are most often born to those parents who need to learn a lesson in coming to terms with the death of a child in order for them to realize that the Spirit is eternal.

16:32 Suicide as a type of self-sacrifice, heroic death.

Vladimir: I see. And there are some special cases in which the Spirit who has committed suicide does not fall into levels one through five, as we know, of low vibrations, but finds himself at significantly higher levels, despite the fact that he committed suicide. In what cases, if possible, examples.

Irina: They do. If this suicide was committed in order to save people, for example, in war. Many attacked the enemy when he was significantly superior to them in strength and power, but at the same time he understood that he was committing suicide, but he decided to give his life to stop the enemy, precisely for the purpose of love. Or, for example, this often happens on Earth, when a person commits suicide not on purpose, but in order not to betray his loved one to some enemies. He understands that this is not such a direct suicide, but for example, if some opponents, enemies told him: “If you do not give us the location of the person, then we will kill you.” And he doesn’t save his life, he doesn’t give it away, although he understands that this is also a form of suicide, he clearly understands that he will be killed.

Vladimir: In this situation, you can take poison in order not to give it away, that is, you can directly commit suicide, but in order not to harm others.

Irina: Yes, it’s all about the motive. If he does this out of love, and he is clearly sure that torture can force him to reveal some secret that will harm others, and he understands that this will not stand, that if he does not drink the poison, he will harm even more, then this is a feat. This is not any sin and it falls on a high level. But this energy, which is not spent, must still be realized; it does not disappear anywhere.

Vladimir: That is, he will still have to incarnate on the same planet in a physical body for some remaining time?

Irina: Yes. He will incarnate. And if he is an Angel, he himself will clearly understand that this is necessary in order to later incarnate for a full incarnation.

Vladimir: I see. What if he could not withstand just physical suffering, if it was euthanasia, that is, voluntary death, or he could no longer

withstand the pain from some serious illness?

Irina: Also, when he gets to a high level, this is in cases when he believes in something and in order not to renounce his faith, he allows himself to be killed or commits suicide, he understands that he will not withstand some kind of torture . There have been many totalitarian regimes on Earth before and there are now, which force a person to renounce what a person believes in, God or some idea, that is, out of love for God, an idea, when a person is not because that he had not come to terms with something, but because of not giving what he loved.

20:10 Euthanasia. Refusal to live in case of oncology or fatal diseases. Spiritual cause of illness. Illness is a chance from God for spiritual cleansing.

Vladimir: Yes, I understand, favorite beliefs and so on. I return to the question: if he could not withstand some unbearable severe pain that was not relieved by medications, it was simply unbearable suffering, and he committed suicide or asked for euthanasia to be given to him, what happens in this case to the Spirit?

Irina: If he has pain that is caused precisely by illness, not by reasonable people, then he must understand the reason. But if he does not understand that this is caused by a spiritual reason, and, without recognizing this spiritual reason, without making contact with his Higher Self, he simply gets rid of suffering, then the spiritual reason that led to this illness remains in him. He didn't recognize it, he didn't eliminate it. Any physical illness, especially a serious illness that is not just a minor injury or a cold or infection, but which is associated with mortal danger, severe pain, is already chronic, it has a spiritual cause. Pain, chronic pain that cannot be eliminated by medications is usually due to blocks that arise from feelings of guilt, and guilt requires punishment. And the feeling of guilt, the feeling of one’s own inferiority are all negative emotions that are put into blocks. And the blocks are not going anywhere. That is, the very act of leaving the body may not even be considered sinful, the same as due to depression without physical pain, but this reason will also go with him, that is, he missed the chance. Since God gave him life in this body and did not take him away from incarnation, it means that God gave him a chance to correct this reason that led to the disease. With this illness he points to this

reason. But the person abandoned this and went into the Spiritual world along with these blocks. He did not pay attention to this lesson, he did not try to find out its reason.

Vladimir: That is, in this situation, even when, let's say, he had cancer with metastases and severe pain, he could not suffer and voluntarily died, he will most likely end up on vibration levels from the first to the fifth.

Irina: We don't know what level he will get to. It depends, firstly, on the cause of that oncology, that is, what caused it, a spiritual reason, what emotions, and what caused them. If these are grievances, then it is not suicide, but these grievances will lead him to a lower level, he did not dissolve them, he did not forgive.

Vladimir: That is, not the fact of suicide itself, like a black mark, a tick that he killed himself, but the energy that led to this.

Irina: What led, yes.

23:25 Cases of suicide on the planets of the Interstellar Union.

Vladimir: I see, okay, I'm clear about this. Please tell me, here's a question for both LiSioni and Mead: are there at least isolated cases on the planets of the Interstellar Union when suicide occurs among your representatives?

Irina: Yes, this happens. But this happens to those Spirits who have committed some kind of crime, and, realizing that they will be sent to the planet of criminals, and that all their family and friends will know about it, they cannot imagine how they will look them in the eyes, and they may commit suicide.

Vladimir: Despite the fact that they are well aware of all the spiritual consequences?

Irina: Yes, this happens.

Vladimir: Specifically on the planet Shimor and on the planet Esler, let's say over the last ten Earth years, how many such cases have there been?

Irina: Yes, indeed, such cases are so rare that it will definitely be announced to the entire planet. On Shimora over the last ten years, maybe about thirty cases of this have happened; on Esler I can remember no more than five or six.

Vladimir: This is for the last ten earthly years?

Irina: You need to watch this, they roughly remember this.

24:50 What suffering does a Spirit who commits suicide experience? Unconditional love.

Vladimir: Everything is clear. I want to come back again. And what is the greatest suffering experienced by a Spirit who has committed suicide after reaching the appropriate levels of the Spiritual World or on the way there, what is his greatest spiritual suffering?

Irina: Feeling of powerlessness. A feeling of powerlessness to change anything, a feeling of powerlessness to go back and change your past, which led to the death of the body. And they immediately begin to think if they had stayed, how they would behave if they were alive now, and they begin to remember their life, they begin to imagine what they would do in this situation if they were alive now. This leaves them with the inability to do it.

Vladimir: That is, not the torment associated with the fact that they are overcome by low-vibration entities, not this incinerating fire that they experience the Love of God like fire, but precisely this feeling of hopelessness, the impossibility of fixing something, this is the main thing, right?

Irina: The fact is that this hopelessness and the inability to fix it, it is this burning feeling, one might say, but it is an internal burning.

Moreover, having already united with their Higher Self, having become a whole Spirit, they already understand the Love of the Father, that he loves them even despite the fact that they refused his gift of life. He loves them even despite this. And this unconditional love also causes suffering in them because of their conscience. And this is experienced as a burning sensation, but not physical, and if you had such a feeling when, for example, you did an act for which you were ashamed in front of your beloved father, and when you asked for forgiveness, he said: “I wasn’t even offended by you.” " And it hurts you even more. Was it like that?

Vladimir: Yes, of course, I understand what we’re talking about.

Irina: And you also had a burning sensation, but it would not have been physical, it was inside. It’s just that when the Spirit is in the body, it can be distracted by some external factors - pleasure, some activities. But in the Spirit he has no body, he will not be able to be distracted, he will be absorbed by this feeling.

27:27 Responsibility for euthanasia. The importance of prayer before battle.

Vladimir: I see. And those Spirits, people on Earth in this case, who, seeing the suffering of another person unbearable from their point of view, fulfilled his desire and helped him commit euthanasia, in fact, killed him at his request, do they bear karmic responsibility? Or if they really sincerely felt love for him and a desire to help, then their vibrations do not decrease after his exit from incarnation?

Irina: It depends, firstly, on their internal motive and on the situation too. If this was a person, for example, wounded on the battlefield, where there was no way to cure him and the person was taken from life, sparing him from suffering, because they understood that there was no help there, then this will not significantly lower his vibration if this was not done with feeling of hatred. And if this was in a modern hospital, in which they could assign the same psychologist to this person in order to psychologically work through the moment of pain with him and prescribe better, but more expensive painkillers, but in order not to do this, the doctor performed euthanasia, then this is completely different. Even if this is done less painfully than on the

battlefield, the responsibility here is still completely different. It's all about motive here.

Vladimir: Let me strengthen this question further. On the battlefield, this wounded man, who cannot be saved, suffers terribly and asks to shoot him. And a man in pain, with tears, his comrade in battle, he does this, he is in great pain, but there is no way out, and he helps him. So he will not lower his vibrations, or perhaps this will be a feat, thanks to which he will also raise his vibrations, because he helped his comrade escape from inevitable suffering?

Irina: Maybe raise your vibrations. But he can lower them not from murder, he can lower them from a feeling of guilt that he could not save, but killed, and from this he can also lower his vibrations.

Vladimir: Got it. Fine.

Irina: It depends on the personality and on the motive. And if he understands that there was no other way out, understands this objectively, and that if he had remained to live and suffered before his eyes, and this would have brought him even greater suffering due to the fact that he did not interrupt them, then he will raise your vibrations. If he did it precisely out of love and always accompanied by prayer for his Soul.

Vladimir: I see. And accompanied by a prayer for his Soul. Yes, it is very important. Probably, it is just as important as ideally to accompany with prayer the forcible removal from the incarnation of another Spirit, even a criminal, if there is no way out, and you just need to kill him in a simple way, so that he does not lower his vibrations and does not kill many more people, if you do it prayerfully and with love, then yes. In short, this is Arjuna's version of the Bhagavad Gita.

Irina: In general, prayer before a battle, which was traditional in all religions of the Earth, ideally and in the norms of religious veneration, it should have been accompanied not only by a request to God for strength to win, it should have been accompanied by a request for forgiveness for anger, for aggression, which almost inevitably accompanies a fight, because a fight is such an action, when you

dodge blows and inflict them yourself, it cannot but be accompanied by such actions. A prayer for the Souls of enemies was necessarily included in these prayers, so that the Lord would have mercy on them and endow them with Light as far as they are ready. And he forgave their sins.

31:38 Will repentance help a Spirit who committed suicide raise his spiritual level?

Vladimir: I see, thank you. Are there any known cases where a Spirit who committed suicide later repented so much that, ultimately, this served to increase its vibrations? Having gone through all the subsequent consequences, he greatly increased his level and even reached the angelic levels, and thus he, as it were, rewrote this act, and it became for him not for evil, but for good - already a successful suicide?

Irina: If in later life, when he is born to change vibrations, he goes through this experience to transform the energies of these blocks and it is on their foundation that he builds his path to Enlightenment, yes, this can happen.

Vladimir: That is, are there such very specific examples when Spirits from angelic levels, do you personally know Spirits from such high angelic spiritual levels who had suicide in their baggage in past incarnations?

Irina: You did not focus on the past lives of the Spirits. When you are in the Spiritual World, you concentrate on the “here and now.”

Vladimir: Do I understand correctly that you know your incarnations; in your past incarnations there were no suicide attempts or suicide itself, or is that not so?

Irina: As far as I remember... No, I don’t remember all my incarnations, but what I looked at in the Spiritual World was not like that.

33:14 Rescue of a highly spiritual person by Angels, Mentors from committing suicide.

Vladimir: I see. Another question. Could there be some special mission for the incarnate intelligent Spirit, in which he has already made a decision, commits suicide, and his Mentors, Angels did not allow him to leave, because he has some special mission that is important for all humanity or for some very high divine goals?

Irina: Sometimes they save you, yes. It happens that he is saved because of his mission or because of his high level, if he is an incarnate Angel, they do not allow him to lower his vibrations. It happens that some person comes and prevents him from doing this, and this happens completely suddenly for him. It happens.

Vladimir: If there was a sincere attempt to commit suicide, but it did not happen, does he have a chance to correct all this, to work it out in his current life so that it does not affect his further level of vibrations? And even on the contrary, if he processes it, it will serve to increase the level of his vibrations in the end, could this be?

Irina: If he later realizes that this salvation was so that he would change his vibrations and come to God, yes, this happens.

34:35 What is the reaction to the attempt and thoughts of suicide of spiritual Mentors, Guardian Angels and what is the reaction of low-vibration entities? How do low vibration plasmoids feed on life energy when killed?

Vladimir: Yes, I see. Let's then ask a couple more questions, then I'll ask another important question. We have a question from our volunteers, it consists of two parts. What is the reaction to the attempt and thoughts of committing suicide by this person's spiritual Mentors, his Guardian Angels, and at the same time, how do the low entities that are always around him react to this? The reaction of both?

Irina: You see, the reaction of the same demons and archons is unambiguous: many of them do not accept the laws of God, the laws

of life, the laws of love, therefore for them the suicide of the body is the recognition by the Spirit of the same idea as theirs, that life is meaningless and so on. For them, it's like an acquaintance with themselves, that the Spirit has come over to their side, they rejoice at this. As for plasmoids, if they feed, for example, on the energies of the life force that are released when killed. These types of plasmoids are often found, they used to feed on energies during sacrifice, and some of them feed on energy when killing a human body, some of them can lead to suicide in this way. Some plasmoids, spirits of nature, for example, seeing that a child is small, up to five or six years old, left without parental supervision, they can appear in front of him in some attractive guise, children still see plasmoids, and for example, lead him to a pond to a child went in there and drowned. There are such cases too, this cannot be considered suicide in the classical sense of the word, but they still feed on this energy.

Vladimir: So they are pushing for this by all means?

Irina: Or if a person is in an altered state of consciousness, for example, intoxicated, they can take him, if he is in nature, somewhere far into the forest, so that he will die there and not come out. If he is intoxicated, they can instill the idea that he should walk in the opposite direction from the house, instilling in him that his house is there. This is not murder in the classical sense, that is, they do not make such efforts, but they feed on this energy when a person dies.

Vladimir: If, on a subtle level, an adult is driven to suicide either by astral entities or entities from the Spiritual world, does this reduce his karmic responsibility for what he has done?

Irina: If, due to his youth, mental pathologies or intoxication, he did not realize what his actions would lead to, then he decreases, but the problems and reasons that led him to this state always remain with him.

Archangels, Guide Angels and Guardian Angels react to this with regret, they try, if such a thought appears in his mental field, they try to dissuade him, send him a thought so that he turns to God, goes to church, realizes his mistakes and etc. They can send him a person who will help him with something.

38:43 “Death groups” on the Internet, the motives of the organizers.

Vladimir: Our volunteers ask that there are many so-called “death groups” on the Internet, one of them is the exposed “Blue Whale”, the real organizer of which, apparently, has not been found. What is the motive that drives those people, the physical people who are behind these groups, who organize and motivate teenagers, and possibly mature people, to commit suicide?

Irina: If any other people are pushed to commit suicide, then there is definitely a 90% chance that they are under the influence of low-vibration plasmoids connected to them, which feed on the energy of the Spirit leaving the body precisely at the moment of its physical pain. Pain, the energy of suffering, which charges his etheric energy, are low-vibration plasmoids, because high-vibration plasmoids will not be able to assimilate such energy, but low-vibration plasmoids will be able to assimilate it.

39:45 Suicidal acts of religious fanatics, suicide bombers.

Vladimir: I see, thank you. In the same context, please tell me what happens to those sincerely believing people in different religious spiritual traditions, they are sometimes called fanatics, who, as we said, decided to commit suicide, but at the same time take other people with them, whom they believe , will bring good. A simple concrete example, a suicide belt and shouting: “Allah, Akbar!” - a person undermines himself and the people around him, sincerely thinking that by doing this he serves the Almighty. What happens in this case to his Spirit?

Irina: But they believe that they bring benefit to those other Souls; after all, they kill people who, from their point of view, do not believe.

Vladimir: They don’t feel guilty, they themselves don’t feel guilty.

Irina: They kill non-believers, from their point of view, people. But non-believers, from the point of view of their faith, their religion, their

beliefs, cannot be accepted into heaven by God as they are.

Vladimir: Nevertheless, they believe that they are bringing benefit to these people and themselves too.

Irina: What good can they bring to these people, that's the question, if they deprive them of incarnation, and therefore the opportunity to come to the God in whom they believe?

Vladimir: I would just like to hear the answer about this. There are a number of nuances there, if we are talking about those direct representatives of the radical branches of Islam who instill in these people why this is good. But that's not what I wanted to discuss now. And I wanted to find out what was actually happening. So they believe that they are benefiting themselves and doing it for the sake of the Almighty, they do it sincerely, do not feel guilty, absolutely sincerely. But what actually happens to their Spirit? Is it really true that since they sincerely believe in it, then there is no responsibility for it, or it is less, or they dampen their vibrations, or is everything different? What is actually happening?

Irina: If a person's faith is accompanied by love for God, but at the same time disdain for the children of God, this does not lead to a decrease in his responsibility or an increase in his vibrations. Because if a person does not love his neighbor, but loves God, then in fact he does not love the God who is embodied in this neighbor. He kills him too, if it is not due to protection, as we have already said. I say again that if he kills non-believers for their lack of faith, it means that he does not really wish them good, because the faith of such people assumes that non-believers will go to low states, to hell.

What if there are unrepentant sinners among those he kills? He can't if he is a terrorist who blows up a crowd of people, even if he imagines that he will blow them up and they will go to heaven, but he knows very well that if a sinner does not repent before God, he will go to hell. For example, he killed someone, he deceived someone, and so on, that is, he did not fulfill the commandments of God, is this so according to his ideas? And if he kills these people, he didn't ask everyone beforehand whether he had repented before God? This means that he cannot know in what state he sends the Soul to God. Or does he know it?

Vladimir: Of course, he doesn't know that.

Irina: And if he doesn't know this, then the fate of these Souls is indifferent to him. What matters to him is only his fulfillment of the commandment of love for God, as he understands it. In the context that if he kills them, then he loves God. But at the same time, he treats with indifference the fate of other Souls, who are no less loved by God than himself. This is neglect of their destinies, and neglect is already a decrease in vibrations, he has no longer fulfilled the law of God, and this will not lead him to the highest level. If it was self-defense, then yes, he did it out of defense, but they did not threaten him in any way.

44:12 Thoughts of suicide. How to get rid of mental suffering? The uniqueness of human life.

Vladimir: To those people who may be listening to us now, who are in a depressed state and are thinking about: "But maybe I will die, and everything will get better for me." Give specific recommendations, as much as possible, about what you would advise them to do.

Irina: LiSioni wants to say.

LiShioni says: "Hello, dear friends! Remember, no matter what happens to you in the earthly world, you can fix it while you are still alive. Your human life is unique in the eyes of God because in such an environment and in such a body it will not be repeated. Your body was given to you by God through the creation of elements by his children, plasmoid civilizations in subtle bodies. And this body was given to you so that you are happy, so that you thank God, so that you love each other, because true happiness can only be in love. By killing your body, you reject the Love of God, and you reject your body. This puts you further away from happiness than if you are in the body. While you are in the body, you can eliminate any suffering that you currently have. Any suffering can be eliminated if you work on its cause, on identifying these causes and eliminating them. Please do not commit this rash act; you may have to deal with its consequences not in one life, but in many lives. After this act, you can be incarnated not on Earth, but in a civilization that does not yet have any developed technology, or where there are wars. Often they incarnate such Souls

who committed suicide, where there are wars so that they learn to appreciate life. So learn to appreciate it now, while there is no war. If you have severe pain, seek the cause in the Spirit. Nothing is irredeemable as long as you are alive. Trust God, he himself will bring you out of incarnation when you are ready for it."

47:32 Help for the Spirit of a person who has committed suicide.

Vladimir: What should those people do if their relatives, relatives or friends have already committed this act?

Irina: All emotions are still under the control of the spiritual mind. First, send him the Light of Love, not your pity, not your sadness, but love. Ask his Guardian Angel, ask him to accompany him to the level where he should be and always be nearby. Ask Heavenly Father to direct the Light to him and direct him the Light of Love yourself, and forgive him, firstly, for his action, that he did this, forgive him for this. Forgive yourself for not being able to help him avoid this, forgive yourself. Admit that it was his right to make this decision, do not hold it against him or yourself either. Just fill it with the Light of Love. You can pray for him yourself. There is a custom when you ask someone, children or adults, to pray, and as a sign of your love for him, for example, you give alms or food to the poor, or money in order to express your love to whoever you can. Since he is not around, you express your love to other people, imagining that you are giving it to him.

Vladimir: All these actions and prayers can really help this Spirit in the Spiritual world?

Irina: They come to him in the form of energy. There are no distances in the Spiritual World. When they pray, he feels. And if you sincerely ask, then the vibrations in him begin to increase in the sense that he begins to see the Light, he feels a surge of warmth in the Soul, and he sees a way out of this situation and begins to want embodiment, for example, if he did not want it, if he got to a low level. And it even puts up such protection so that demons do not approach him. Not to torture him, they don't torture him so physically there, they can just talk to him and turn him against God. But this love, it will be unpleasant for them to be near it, they will move away.

Broadcast May 2, 2021.

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Vladimir Goldshtein – journalist and Facebook group administrator, assistant director of the Cassiopeia project;

LiShioni is a representative of the planet Shimor, a specialist in the astral world and its interactions with the material world;

MidgasKaus is a representative of the planet Esler, a biologist, psychologist and specialist in alien civilizations.

00:00

Maxim: Dear friends!

Irina: Hello.

Maxim: Hello! Hi all. We have a live broadcast today. I already warned you that we have a chat (link below the description) in which you can ask questions live. Now we don't have a live chat on the YouTube channel itself, we have a chat on Telegram, from which I will personally read your questions to Irina, and she will answer them.

Before we start the broadcast, I want to tell you that we again had another release of people. We have a day off next week. This week you can absolutely safely get to the Wellness Center. You will be able to get tested at this Wellness Center. If you come for wellness, then in the evening you will be able to communicate with Irina while in this Wellness Center. Phone number below, under the description of this video. They have already begun to scold me for the fact that I am starting to advertise a lot in our project, but, unfortunately, I cannot help but tell you about what is happening in the project and how you can get into this project. That's why, guys, I'm now entering the Telegram chat, which is specially created for live broadcast questions. This is CASSIOPEIA_LIVE. From this chat I will now start asking questions. But before that, we'll probably introduce ourselves, as always. Who's with us?

Irina: Hello, dear friends. My name is Irina Podzorova. Today we have another live broadcast, although I feel like I'm having a conference because there is no chat.

Maxim: Guys, please tell me in the chat, how can you hear us? Just write in the chat so you can hear us. I do not see. Ah, Denis, thank you very much, I saw everything. "You can hear perfectly," "Maxim, perfect." Super! "Max, we can hear everything." Let's move on to the live broadcast. Anyone who wants to ask questions should go to the Telegram chat. Soon YouTube, as I understand it, will turn off live broadcasts and include advertising in them. We might switch to another Vimeo platform if YouTube starts inserting advertising into live

broadcasts. Nowadays YouTube inserts advertisements everywhere.

Irina: Yes, now YouTube inserts advertising even into videos that were without advertising.

Maxim: We cannot control this process, the only thing we can do is try to switch to another platform. By the way, on our website the videos will be posted from another platform that does not have advertising. The site will be prepared specifically for you so that you can watch videos on the site without advertising. This is https://cassiopeia.center/ . Guys, I will no longer advertise to you my websites, health centers, I completely hand over Irina to you, you can ask her absolutely any questions.

03:34 Introduction of the live broadcast participants.

Irina: Today our curators are present with us, who were present at the training of all eight streams. This is LiShioni from the planet Shimor and MidgasKaus from the planet Esler. I came here, they, MidgasCaus and LiShioni, were already talking. They are now ready to answer your questions. I already told them that questions would be via Telegram.

04:18 Intergalactic news. Checking alien bases on Earth.

Maxim: Will we have galactic news today?

Irina: Yes, of course. LiSioni wants to share some galactic news.

(LiScioni speaking). I greet you. I am following reports from the Galaxy Security Service and Bergastre about the progress of the investigation, which was initiated at the request of your project and the representative of the planet Mantuk Mythi.

The last message that was on this topic was about the base of the planet Chrisley. This is the Selbet colony, which was checked last time, which is located in the Rostov region, it was checked.

They found, in my opinion, minor violations in that the entrances to this base were not sufficiently disguised. Because of this, local residents could enter (shows some cave) and be exposed to an automatic robot that released, one might say, gases that were harmful to health. That is, they were scared off, but they were not camouflaged enough. Now they have installed infrasound devices there, and made them deeper underground.

About the stay of earthlings. No earthlings were found there. Representatives of this base received information that representatives of the planet Tashig, who are at their bases, could give their contactees (consciously or not) any evidence of contacts in the form of artifacts. This information is currently being verified. More specifically, the Tashigan base near Almaty.

Maxim: In short, the showdown is in full swing, right?

Irina: Yes, their entrances were not well disguised.

06:58 Lords of karma.

Maxim: Irina, a question from Elena. “Do the Lords of Karma exist, and can you contact them with your questions? Can they hear us?

Irina: (LiSioni answers). The Lords of Karma in the esoteric, mystical teachings of the Earth are called disembodied Spirits, who, according to the terminology of the Interstellar Union, are called Consulting Angels and Arhat Angels. Basically, these two categories of Angels are called the Lords of Karma, because they are the ones who select incarnations for intelligent Spirits. And they are perceived as the lords of karma, that is, they distribute who will go to what place in the material world.

Maxim: Question: Do they hear us in everyday life?

Irina: That is, do they know about our needs? As far as I understand.

Maxim: The question was asked, can they hear us?

Irina: There are no physical words, they are in the Spiritual world. They just perceive thoughts, yes.

Maxim: Feelings, thoughts, emotions.

Irina: Yes.

08:17 Mary Magdalene and sister of the righteous Lazarus.

Maxim: Andrey Kh writes: “Please ask, this is important. Are Mary Magdalene and the sister of the righteous Lazarus the same woman?

Irina: No, different. Their (both) names were Maria, but this name was common at that time. These are different women, but they knew each other.

08:45 Creatures like Jesus. The Originality of Christ. Logos.

Maxim: Trius Vladimir asks: “Are there beings like Jesus in other galaxies? And how many Universes are there? Are there interactions between them?”

Irina: How many questions are there?

Maxim: Let's start with “Are there beings like Jesus in other galaxies?”

Irina: Of course, for example, you are a being like Jesus. What's similar? He is the only Firstborn Son, yes. This question has already been answered several times. The Firstborn Son, that is, that impulse of God - the Creator of the Universe, who realized himself first, before the rest of the Spirits. But this is conditional, because there is no time. When he realized himself, there were no others, this is considered as primacy. This is precisely the being, also called the Logos, who

became known as Christ on Earth.

09:39 How many Universes are there?

Irina: Regarding the Universes. How many Universes?

Maxim: Well, yes, how many Universes are there?

Irina: (MidgasKaus speaking). This is called a confusion of terminologies, because they tell me Esler's word Rashikhta, which is roughly translated as the Universe, but can be roughly translated as the Universe. But by the Universe you understand a certain collection of Galaxies. By the Universe we understand the entire Universe, which includes part - the material world and part - the Spiritual world. As for the material world. The dense material Universe is a small part of the material world, and everything else is what you know as dark energy and matter. These are certain subtle worlds. And then, these are not all that are in the Universe. The universe is one, but it can also be divided into parts. That is, if we consider some collection of Galaxies to be part of it, we can call it the Universe, then there are many of them. For us she is alone.

Maxim: Well, okay.

11:10 The Mind of the Universe.

Maxim: Then I will ask the next question. Irina asks it. "There is an opinion that the Universe is a living organism. What does either Meade or LiScioni have to say about this?"

Irina: Yes, there is such an opinion. It is adhered to by representatives of plasmoid civilizations, representatives of the Tikht civilization, and many representatives of the Interstellar Union.

The fact is that they understand the word "life" not as on Earth, that it is life in an organic body made up of some substances. They understand by the word "life" the existence of a certain consciousness, a certain

Soul. And in this regard, the Universe has life and intelligence. And her mind is the Universal mind, it is like God - the Divine mind, that is, it is like his body, again not all, but a part.

(LiScioni speaking). A good analogy is that just as the Spirit is embodied in the material body of an earthling by 30%, so the Divine Spirit is embodied by 5-6% in the material Universe. And everything else is in the Spiritual world. That is, the mind of the Universe, the consciousness of the Universe is the Divine Spirit.

Maxim: Everything is very clear and accessible.

12:44 Aliens among people.

Maxim: The question is a little politicized, but I'll ask it. Maxim asks it. "The former head of the Israeli space program, Haim Eshed, said that the Galactic Federation made a deal with the US government, and now aliens live among people. Donald Trump was one step away from revealing information about aliens, but the Galactic Federation asked not to do this because humanity was not ready yet. How will our friends comment on this news?"

Irina: (MidgasCaus answers). Yes, we heard about it. We, personally, do not know this person that Maxim is talking about. But judging by the issue that he wanted to raise before the public, we are talking about the disclosure of those bases that are on the ground, about the disclosure of the locations of those bases, in particular, on the territory of the United States of America. So that the people of Earth can understand and believe that aliens, that is, people from other planets, live among you. "They live among you," meaning on Earth, at the bases.

Yes, we can fly here and live at the bases. And then it will be considered that among you, that is, on your planet. But according to the laws of the Interstellar Union, this disclosure cannot be made. How did this man himself know about this? Perhaps he is a contactee. As we have already said, it is unethical to make a request without his consent, without the consent of this Israeli general. If any details had become known from him or other contactees, and he had revealed

them (specifically, these base locations, and this base would have been revealed to your government, and so on), there would have been an unauthorized mass contact. The handler of this Israeli general who told him this would be held responsible for this.

Maxim: I see. Alex M. asks, but this is a question for me. “Maxim, can you record videos where you invite Jacob Bruce to dialogue?”

Irina: Who?

Maxim: “ Can you tell who Arkady Orlov was in a past life?”

Maxim: Dear friends, we are ready to harmonize and interact with absolutely any contactees on this planet, with any energy practitioners, with any witches, sorcerers, psychics. Whatever you call yourself, you are contactees in any case. And according to the structure of the Universe of the Interstellar Union, we are always ready to give feedback to any person who contacts us. You can call me personally if you are a contactee, energy practitioner, healer, and write to me about how you would like to conduct a dialogue with us. We always answer all questions and are always ready for any dialogue.

Irina: Yes, we are ready for dialogue with Yakov Bruce, with Arkady Orlov, with any other person.

Maxim: Yes, we are ready for dialogue with everyone. We are absolutely open to communication, even regardless of what they say about us.

16:10 Types of gravity.

Maxim: Shamil Ashinov writes: “What is gravity and where does it come from?”

Irina: Interesting question. Very new. Thank you, Shamil.

Maxim: Shamil, you know, it seems to me that we should definitely teach physics at school.

Irina: Gravity is material energy, which is located at the third level of manifestation, in dense atomic and molecular particles. It consists of gravitational quanta - gravitons. There are two types of gravity: microgravity and macrogravity.

Macrogravity influences space, due to which planetary systems, star systems are created, and every two bodies are attracted to each other by a force directly proportional to the product of their mass. This property of atoms affects space.

Microgravity is the same gravity that aims to attract all atoms together. Simply put, this is the force of attraction, the energy of attraction, which is one of the types of subtle energies that have passed through the etheric level and manifested themselves in the material world. And in subtle worlds, this energy is created by plasmoid civilizations of various elements. Then it goes to the Spiritual world.

Maxim: Great.

17:56 Damage. Information attacks. Protection against magical programs. Prevention of infection by fear.

Maxim: Vitaly Kolesnikov asks: “How to deal with deliberately caused damage?”

Irina: What a question!

Maxim: By the way, we have a very relevant question: they are really trying to organize information attacks on the Cassiopeia project and on the project employees. I didn't even expect this. I say hello to everyone who is trying to do this. I send you all the Light of my Love. I want you to reach the level of awareness that many in our project have achieved while being in the project, in order not to engage in nonsense, but to raise your level and engage in the life and arrangement of this beautiful wonderful planet and the people on it. Instead of destroying

everything around you.

Irina: (MidgasKaus and LiShioni speak). You can hold a separate mini-conference on these issues. What is damage?

Maxim: We will definitely do it. Now we will answer this briefly. Because the question was asked.

Irina: Exactly, the question of “damage”. Damage is a negatively charged thought form consciously created by a person, which in the Astral is strengthened by the energies and thought forms of plasmoids, the curators of this person - a magician or sorcerer. He is a contactee. He contacts consciously, unconsciously or semi-consciously with certain plasmoid curators. It happens not only with earthly forms, but also with cosmic ones. There are different kinds of magicians. They create a negatively charged program from their thought forms, strengthening them with conspiracies, rituals, and concentration of their consciousness for various purposes.

Usually the goals of creating damage or a negative magical program are the goals of aggression, superiority, elimination of a person who, in the opinion of this person, is, as it were, superfluous, who is not needed, who needs to be removed. This is very similar to a crime, only it is committed not by physical methods, but by energetic ones. This thought form is also charged with the energy of plasmoids, that is, it is strengthened. We call it the magic program. This thought form determines exactly how it will influence a person.

If it is sent to a certain person who does not have negative blocks in his chakras, similar to the vibrations of the person who created this thought form, and his plasmoid curators, then it will be reflected from his field and will simply be in the Astral. It can attract a person with similar vibrations, but its effect will still be weaker. This will be like a breakdown of the aura - the vital shell. It will already lose its power against a specific person.

The main means of safety against negative, magical influences are forgiveness of your offenders, doing good deeds, developing yourself in the Light of Love and getting rid of information that brings fear and

destruction.

Maxim: Thank you very much.

Irina: The fact is that there are many negative magical programs that are charged specifically with fear. And even if a person is afraid of something else, but there are fears in his life, and in his chakras there are blocks charged with fear, then it is already possible that this negative magical program will work. She will most likely have something to attach herself to. And after it attaches to a person's chakra, to his astral field, to the etheric field, it gradually, not immediately, begins to grow into it, take down astral roots and begins to influence the person's behavior, begins to influence his health. She strengthens this block. It attracts various entities and so on. It depends on the purpose of this program.

22:44 Removing negative energy blocks. Methods for destroying magic programs.

Maxim: I see, but how can we work and fight such programs?

Irina: If it already exists?

Maxim: Yes.

Irina: As prevention, he said. How to cure?

Maxim: Yes, if there is already such a program. Well, you had a block, a program was installed on your block. What can you do to remove this program from your energy structure?

Irina: The magical program that exists is removed along with the block to which it was attached. This block is charged with negative emotions, feelings and thoughts of the person himself. If you go to your Higher Self and ask him if you have blocks, and they answer you: "Yes," what emotions does this block consist of? And you will say out loud thoughts that are opposite to this emotion. For example, if it is an insult, you will

forgive. If it is fear, then you will say that you trust yourself and God. You will speak the opposite words while in a state of communication with the Higher Self.

When this block dissolves, all the energy that was in it, including the negative magical program, also disintegrates. And not only does it disintegrate, it returns your own energy, and the energy and life force that was invested by the magician and the plasmoids into this negative magical program, when disintegrating, it turns into your own Light. That is, it flows into your field, you have more strength.

This can be felt by the person who initiated this magical program. He often leaves a mini-energy channel in the form of very thin, practically invisible threads in the Astral that lead to this magical program. He can feel the dissolution of this negative magical program and in some way can provoke the person into aggression so that he returns to these low vibrations.

If you do not meet his expectations in this regard, then he will be powerless to harm you in any way. He will simply remain in low vibrations and go through his own lessons. And you are in the high ones.

There are also methods for destroying magical programs using reiki, cosmoenergetics, and some magical practices. Their most effective work will always be with the elimination of the block itself. A magical program can be destroyed, but if the block itself remains, then, sensing that the program has been destroyed, the magician can simply repeat it. And if the block remains in place, then everything will return to normal.

Maxim: Therefore, guys, work with your blocks, with your destructive emotions so that no destructive programs can attach themselves to you. It’s not for nothing that they say that no damage, no evil eye sticks to holy, bright people, because there are no points to which it can be attached.

26:03 Actions of aliens in a critical situation for people.

Maxim: Irina, Mid will now have a very provocative question.

Irina: Which one?

Maxim: Very provocative. Question to all alien participants. John Cohn asks it. “If, while flying on your saucer, you see that a person is drowning, even a large number of people, what will you do? What are your actions? Mid, here you are flying on a saucer, and you look at people drowning. What will you do?

Irina: What do you mean, if it flies over a populated area?

Maxim: Yes. And he looks at large numbers of people drowning in the river, what will the plate do in this case?

Irina: According to the rules of the Interstellar Union? Or what should I do personally?

Maxim: Well, interesting. Let's go by the rules of the Interstellar Union and how you will act. This is already interesting, even for me.

Irina: According to the rules of the Interstellar Union, not only when a person is drowning, but there are some kind of military actions and a saucer flies by, i.e. There are deaths of some people in the range of the saucer, I have no right to make contact. But I must report this via interstellar communication to the humanoid who is on duty in the contacts commission.

The closest Esler specialist is at Esler Base, which is located on Jupiter's moon Ganymede. There we have a very large Esler base, which is located outside of Earth. There is a permanent coordinator for the entire solar system; he is a specialist in the commission on contacts from Esler. That is, tell him and get an answer from him whether this intervention is possible, and act on the answer.

If, in order to save people, I make open contact, for example, I pull them onto a ship with a beam and take them out of the water, then in

any case, they may be in a different state of energy. Perhaps they are not ready for contact, and I could harm them. Their energy bodies, their psyches and so on. If I do this, then I have to bring them to the base, to the Moon, for example, where there is also a department, but fewer, of Esler specialists, and talk to them there. If necessary, I think they will most likely have their memory erased.

Maxim: I can imagine. You are drowning, you are saved by a creature with cat eyes, wrinkled. And then you jump back off the plate and run away from him. Interesting. It's better, he says, that I drown.

29:27 Flights to the Ashtar Sheran ship.

Maxim: When will the sessions on the ship with Ashtar begin?

Guys, sessions on the ship with Ashtar will begin soon. We have already prepared a chat. We have already prepared a platform on which you will gather so that Irina will take you online to the ship with Ashtar. Do not hurry. Next week we will choose the right day, what day it will be. Next week we will definitely make a trip to the Astral to the Ashtar ship to its wonderful wellness room and more.

Irina: Let's do it on Sunday, on a day off, approximately during the day.

Maxim: Next Sunday afternoon, right?

Irina: Yes, so as not to take up appointment time.

Maxim: Yes, let's do it. We'll start on Sunday afternoon at 12 o'clock, right? Shall we agree?

Irina: At 12 o'clock with us.

Maxim: Or at 11?

Irina: Or maybe we'll go there later, after lunch? Maybe around two o'clock.

Maxim: Come on, at 14:00 on Sunday. That's it, we agreed. We have just decided that we will board the ship at 14:00 on Sunday.

30:34 Cryostasis followed by awakening.

Maxim: Nata asks the question. "Is cryostasis possible - a condition when a person is frozen for a long period, 50-100 years, with subsequent awakening after the end of the period?"

Irina: With your technologies? And with the technologies of the Interstellar Union, since it came to us?

Maxim: No, here on Earth, here, as I understand it.

Irina: They freeze. I also know that people are frozen here. There are services where people are frozen with liquid nitrogen. These refrigeration chambers are similar to cryozones, only the temperature there is even lower. They freeze human corpses and wait for the future when they will be thawed. I read it in the news.

Maxim: What happens at this moment to the human Spirit?

Irina: If the life thread is broken, nothing. He goes into the Spiritual world.

Maxim: How then can you unfreeze it without the Spirit? How will he live?

Irina: No way. He has already gone. He can actually transform himself.

Maxim: So while he is frozen, the Spirit leaves, loses his life thread

and can be reincarnated?

Irina: According to the law, they freeze those whose heart has already stopped, their activity has stopped, i.e. his life thread has already been severed.

Maxim: So wait. Everyone who is frozen, can't they be thawed anymore?

Irina: The body can be unfrozen, why not. But the Spirit will not return. He left, his life thread was severed.

Maxim: Wait. It turns out that now everyone who freezes their bodies simply preserves their bodies, but will not be able to come back to life later?

Irina: There will be people like mummies.

Maxim: This is news, even for me! Interesting.

Irina: He's already gone, how do you resurrect him?

Maxim: This is actually very interesting. This was a good question.

Irina: Why? Mead suggests that you have something on Earth where it's expensive to not completely freeze the entire body; they separate the head and freeze the head with the brain.

32:47 Why don't aliens provide evidence of contacts?

Maxim: Guys, Maxim is asking a question here, if you make a circle on the field with Cassiopeia?

Irina: Why?

Maxim: As soon as a circle with Cassiopeia appears on the field, “Cassiopeia” will close. Like prove it. People demand proof.

Irina: Today I spoke with two of my students, talked with them about “Cassiopeia” and today I understood even more fully why they don’t provide evidence. I can share my understanding.

Maxim: Yes, go ahead.

Irina: Not only because it poses a danger to contactees, who will be questioned, through whom they will try to contact aliens, and suspect them of something, although that is also why. Because people are prone to suspicion. I emphasize once again - open contact. Now you will say that they have been in contact with them for a long time, but we are talking about open mass contact.

If contactees have evidence, then government and military structures will have a suspicion that since the aliens do not make open contact with them, but have already given evidence to contactees about their existence, it means that they have some kind of their own goals here. You heard the position of Tatyana Makarova, who told me the same thing. “Yes, I am a contactee,” she said, regressologist Tatyana Makarova, “their goals are unclear, because they do not make mass contact in front of everyone.” She says this without evidence. Imagine what they will say if there is evidence.

And this is not the only reason. Today I spoke with two men who came to study with us at Cassiopeia. They told me about the first time they watched the video. And one of them said: “When I watched your video for the first time, I immediately realized that this information was familiar to me. And when I started looking at them further, I didn’t look, he says, at your information, I just remembered. Those. I was simply remembering what I already knew. Because of this memory, I knew it was real. And not only that it is real, but that I need it in order to learn it. In order to teach others to do it and spend their time on it, and so on.” He didn’t just watch, he came here.

And I realized that evidence is not given not only because of the

contactees. Also because of the people themselves, because the information that is provided through me is test. That is, these are like tests for those people whose Souls subconsciously remember their existence and work in the Interstellar Union. And not only their existence and work in the Interstellar Union, but they also subconsciously remember the life task of their Higher Self when they incarnated here - to continue the work of the Interstellar Union on Earth. Carry this information, carry the Light, connect with the Higher Self and so on. What they did there.

I want to emphasize that not all earthlings have such a task here now. Every person is born with his own task. Some are born to experience earthly life. They will simply not be interested in all this.

Maxim: Look, someone has come.

Irina: Yes.

Maxim: Someone else stood nearby.

Irina: The plasmoid has arrived.

Maxim: Yes! Everything has been fixed.

Irina: So, this information is without evidence, it is given precisely so as not to interfere with the process of recognition by the Soul of the information that is suitable by vibration. That is, if they don't give evidence, but just give information - here it is, as it is - then they will come to it and listen to it, and only those people to whom it suits the vibrations will live by it. But if they had given evidence, it could have interfered. Because disputes would immediately begin around this information about the true intentions of the aliens, why they talk about some kind of spirituality here, but do not give technology. All this together would prevent recognition by these people who are already ready for this particular mission. I think so. How do you think?

Maxim: I think exactly the same. Irina, look, look what's going on.

Irina: Hello, solar plasmoids!

Maxim: Irina, sit back a little. Then maybe the camera will adjust. The camera is automatic. ABOUT! Thank you so much.

38:06 The incarnation of St. Andrew the First-Called on Earth now.

Maxim: Is Andrew the First-Called now embodied on Earth? Guys, let me answer you. We've already covered a lot.

And not only Andrew the First-Called is now embodied on Earth. Now is a very interesting time of quantum transition, and quite a large number of apostles are now embodied on Earth. I'll tell you, even more than half of the apostles that only we could now identify.

Irina: Yes, Andrew the First-Called is incarnate. I want to tell you that if he is your curator, then you are very lucky, he is a good curator.

38:43 Natural smells in Burkhad, Tumesout, Daraal.

Maksim. So. Next. Oh, Irin, Galina Alshabakh asks a question. “What do the aliens smell like when Irina makes physical contact with them?”

Irina: You know, the people of Burkhad and representatives of the planet Burkhad, when I flew to Burkhad, it seemed to me that they smelled of ozone. But they simply have more oxygen there, 45% oxygen.

As for other aliens. For example, when you are on a ship, the air there does not smell of anything at all, that is, it is as if sterilized, one might say. It doesn't contain anything like that at all. We can say that it passed through special devices that capture these molecules.

And the planets smell differently. On Tumesout, for example, when they took me to the constellation Orion, we walked through the park, their sun was already setting. I saw a huge round nebula in the sky,

which was not visible from here. It was already twilight, but from this nebula there was such a glow as from our ten moons. Such a glow. By the way, the trees there are not tall. For them, bushes, one might say. And from the leaves, they were such dark, narrow, elongated leaves, about the same length (shows), for some reason they smelled very strongly of vanillin, like vanilla.

Daraal smells of sulfur dioxide when matches are burned. That's the smell they have.

Maxim: I see. Thank you, Irish.

40:28 Relations between the Cassiopeia Project and the Russian Federation. Goals and objectives of the Cassiopeia project.

Maxim: Alex Kler asked the question. “Maxim, if God forbid, problems arise with the activities of the Center in connection with legislation and other state initiatives, will you consider changing the location of the Center in favor of other countries?”

Maxim: Alex, look. Firstly, I really appreciate and value the place where I am, the people who are nearby. But, in fact, we are not bringing anything destructive to our state. I think that in order for the state to explain to me, as a leader, that I am being destructive in some way, it needs to be explained to me very seriously, that I don’t understand something. Because the project was created for creative reasons. And the project, on the contrary, is even interesting to the state because we educate people. We give them feedback, feedback in terms of explaining many processes that people in our state cannot explain.

We are not destructive in any way. We are not a totalitarian sect. I openly declare that we are an absolutely pure official structure, an autonomous non-profit organization, which for the purposes of its activities is engaged in the study of contacting, channeling, clairaudience, clairvoyance, claircognizance and contacts with extraterrestrial civilizations. We under no circumstances lure anyone into our structure, we do not convince anyone of anything, we do not force anyone to believe in anything. At this point in time, I will be happy

to project myself in my state and think about leaving this state; I don’t have such thoughts yet.

Irina: For me personally, this is a strange question. Because our group and our project are an esoteric project, a contactee project. Besides us, there are also channels on YouTube of other contactees, energy practitioners, hypnotists, people who lead to the Higher Self, who even communicate with the Spirit of Stalin. I myself have seen channelings and other things that communicate with plasmoids, with different civilizations. Then the state must either close all esotericism, which is impossible, because we have freedom of religion, or leave us.

Maxim: Again. We cannot decide for the state, but I know for sure that we do not have any destructive plans in our plans for carrying information and generally being in this state.

Irina: We have a lot of esoteric channels. So many. We are not alone. And there are many sites, healing centers. For example, Bagirov's school. Yes?

Maxim: Well, yes. But now we are stepping on the rake of those who make money from this and are trying to deceive people. We now give every person the opportunity to try themselves in different directions. Such as cosmoenergetics is the school of Gihor Ivan Yonten, cosmohealing is a healing direction where everyone can join and communicate with their curators and mentors, and become a healer, and many, many other projects. They are aimed at helping each other and increasing each other's level of awareness. I don't see anything destructive in what we are doing.

If suddenly our state sees that we are doing something destructive, then I will be happy to talk to any representative so that they can explain to me that we are doing something wrong.

Irina: In order to communicate with a representative, you first need the law on the basis of which he will talk to us. He's not there yet.

Maxim: If they suddenly find something, I’m ready to answer any

questions.

44:24 Hierarchy of the Higher Powers. Intergalactic Union. Kryon, Hamilia, Reiki.

Maxim: Igor Gorbachev asks a question. “Can you tell us about the hierarchy of the Higher Powers above the Interstellar Union and the Galactic Federation of Light? And who enters there? Are there any higher powers?

Irina: Hello, Igor Gorbachev, I remember you.

Maxim: Yes, he was at our retreat in Belarus.

Irina: A very good poet. Igor, if you mean material associations in space, then this is the Intergalactic Union. This includes our Interstellar Union, the Galactic Federation of Light, and the Interstellar Union of the same Andromeda galaxy, and all other galaxies. That is, this is a common union of civilizations - the Intergalactic Union.

As for subtle-material civilizations, they have their own associations. For example, the same Kryon group, the same Hamilia group, the Reiki group. That is, they have many different associations there: according to interests, goals, areas of activity. The Spiritual world has its own hierarchy.

If you are interested in the hierarchy that governs the entire material world, then it will be the spiritual one. There is a hierarchy there. That is, they are controlled by special divine servants, bright Spirits, who are called Angels in Russian, in the worldview of Christian representatives in this country. There are several types of them. There are Angels of nature, Angels-healers, Angels-prophets, Guardian Angels and so on. Above everyone are three groups of Angels who have access to the Kingdom of Heaven. They can be called Archangels who teach other Angels. This is the 24th level - Devas, 23rd level - Arhats and 22nd level - consultants. They are in the Spiritual world, disembodied Souls.

What is above the 24th level will still be 24th for us, because thereafter

they are not distinguishable for us.

Maxim: For us this is God, right?

Irina: Yes, Light. Divine light, energy. For us it is God and everything. That is, if the Spirit comes from the 24th level, Archangel Raphael or Archangel Michael, or the Mother of God, they will be like Divine energies for us.

47:17 Cassiopeia project retreat on Lake Baikal.

Maxim: Guys, you are asking about upcoming events. The nearest event is a retreat on Lake Baikal. We are going into two groups, two seasons. The first season has already recruited 140 people. The second season is currently being recruited. And everyone who applied first is sure that they will get to this retreat. Therefore, the near future is the beginning of September. All September, two streams, we will be on Lake Baikal, organizing a retreat and answering all your questions. Plus teach you, plus do cosmohealing, cosmoenergetics, energy practices, astral travel, mental travel, go on a ship to Ashtar all together.

Irina: Yes, the 8th stream students and I already went yesterday.

Maxim: Did you go yesterday?

Irina: Yes. They all sat down and all went to the ship to Ashtar using the Light Body technique. I asked: “Has everyone left?” All. Everyone saw practically the same thing. Before this, we also did other practices of astral travel, that is, I showed them how to do it. But they said that the “Light Body” method that Ashtar gave is very simple. They liked it.

Maxim: I understand.

48:41 Materialization of thoughts in the material world.

Maxim: Esmira asks. “Please ask, do thoughts really materialize, and in what way?” Mead, I understand that this question is asked very often, but try to answer briefly. I know the answer to it, but I don’t want to answer, because the question is specifically for you.

Irina: Thoughts materialize provided that, in addition to the thought, the energy of that level of the material world for which materialization is required is invested into this thought.

Maxim: Once again. Wait, I'm missing something.

Irina: It's short.

Maxim: No, let's make it longer. They won't understand.

Irina: That is, if you came up with some idea, then it can remain only an idea and not materialize if you do not take your will energy and take a little energy from the material world and combine it with this thought. Only then will it materialize.

Maxim: That's it, I understand.

Irina: If you just think about something, but do not act in the material world, it will not materialize, it will remain in the mental plane. But mentally it will be real. Such a real thought form.

50:10 Health program through the Higher Self.

Maxim: Irina, will there be a healing program with the help of the Higher Self? Let me answer you.

Irina: I know what this is about.

Maxim: We already have this program. We have a senior teacher at the school of contactees, he is also a psychologist, he is also an

energy practitioner, he is also a contactee, and he conducts these classes. You come here, you take classes from Ilya, you undergo health improvement on the latest equipment of the Center, on secret equipment, I would say so. And Irina still devotes one day to you. What do you teach them there one day? Is there anything you can teach them there in one day?

Irina: In one day, I teach them to conduct energy diagnostics of blocks and bindings, exchange energy with each other and dissolve a person's blocks with their own energy, provided that this is only the beginning of working with his Higher Self.

Sometimes I dissolve large blocks with my energy, so that it is simply easier to go to the Higher Self. And then continue working there. I show you how to lay hands, how to direct energy, how to determine what this block consists of. During these few hours, I tell them about this and suggest they try it on each other.

Maxim: I want to tell you that the healing program through the Higher Self is also on condition of donation, on condition of payment according to the heart. That is, we also do not set any prices for this program. The only thing, of course, is the Wellness Center. But at your Wellness Center, if you come to the "Wellness through the Higher Self" program, you have a 30% discount on all procedures and on any testing.

52:04 Why is there a "payment according to your heart" for spiritual knowledge, but a fixed price for everything material?

Irina: Here LiShioni tells people to explain a little why spiritual knowledge is for donation, and material knowledge is for payment.

The fact is that those devices on which healing occurs still cost a certain price. Maxim, when he bought them, did not pay money using the "payment according to his heart" system. And for this reason, in order to be harmonious, if he buys a drug at a certain price, then this service is prescribed at a fixed price.

And we receive spiritual knowledge from our interstellar friends. Now you say it's free. Yes, we don't pay any financial fees there. You need to understand that we spend on receiving this information and transmitting it to you; our most important resource is time and vital energy. Therefore, we left it on payment according to the heart, because we do not make a material payment, accordingly, we have payment according to the heart here.

Regarding Wellness Centers and retreats. I also want to immediately explain that for some reason many people do not understand obvious things. I will explain. When we go on a retreat, especially not me alone, but Maxim goes, the team goes.

Maxim: We have a team of 15 people. The team needs flights, accommodation, food, we cannot completely pay for it according to our hearts. We must at least somehow be supported by circumstances. I think a lot of people understand this.

Irina: There are those who don't understand. I'll explain why we don't have payment according to the heart at the retreat. Because we pay for tickets, as well as a hotel room and meals in a cafe at certain rates, so in order to be in harmony with these rates, we set our own rate for the retreat. But even at a retreat, a personal appointment with a specialist is always paid according to your heart.

Maxim: Only payment according to your heart.

Irina: Even healing sessions are only paid according to your heart. Only the retreat itself and participation in it.

Maxim: Exactly an away retreat.

Irina: Off-site retreat for a fee. Participation in it includes: relaxation with the masters, includes communication with each other, includes a stay in a hotel and in nature, exactly in the place where we choose. This is all together.

Maxim: By paying you support the Center, which you yourself will

come to. Therefore, spirituality must be a payment according to the heart. If you open a Wellness Center, work with your hands, through equipment, then you can set prices there, but these prices should be absolutely affordable for any person, that is, these should not be some kind of cosmic prices for space technologies. We have very interesting equipment, health-improving equipment, and testing equipment. If we take some other Centers in Moscow, then their cost, of course, is colossal.

At our Center you can come, visit, improve your health, undergo recovery through the Higher Self. In the evening, chat with Irina, even while in the hostel. So come! We will be glad to see you all!

Maxim: I ask the last question. Because we have 5 minutes left. We also have a conference at 21:30, where we will gather all the administrators and all the volunteers. We have a very interesting topic for communication, which concerns spirituality and materiality. This topic will be very relevant in half an hour.

56:05 The difference between a crystal and a mineral. The influence of crystal on energy.

Maxim: This is asked by Fastor Rerin. “What is the difference between crystals and minerals? And what is their impact on the energy sector?

Irina: In terms of meaning, minerals can be called any geological formations consisting of different substances.

Crystals usually refer to certain, individual groups of these minerals that have a crystal lattice. That is, a crystalline molecular lattice through which energy is distributed, the energy of the stone itself.

A mineral is a certain stone that has, one might say, a molecular structure, which may not have a crystal lattice, that is, such a chaotic arrangement. And a crystal is rather an arrangement of molecules in order, it shows like a rhombus, like a pyramid.

This allows the crystal to charge the life force of either a person,

already charged with his thoughts, emotions, feelings, or a plasmoid. Plasmoid civilizations also very often work with crystals and transfer their energy through them for healing, for tuning chakras, for harmonizing chakras, for opening a spiritual channel, for strengthening. They invest certain energies. It happens.

58:02 Construction of a large Cassiopeia training center in Voronezh.

Maxim: We have a wonderful number of likes. A thousand likes. Guys, like, support our channel, support the Center. A very large amount of negativity comes towards us from those people who do not understand our work. And we in no way blame them for this. There are many unconscious people who even try to interfere with our work. Which are trying to direct various incomprehensible energy attacks towards the Center.

Guys, love to everyone. Thank you very much for being you. Thank you very much for your assistance in the construction of the Center that you provide to us. I promise you that next year the first administrative building will be standing, where you can come, stay, and settle down. I think with tents for now. But the tents will have water, light and everything else. There is already a fence there. I have already installed the fence, the light has already been installed. Gas is already coming there. Now they will supply water, and we will build a separate well in addition to everything else.

Irina: The design of the building has already been done.

Maxim: Yes, the design of the buildings has already been done. Today we finalized this project.

Guys, thank you so much for your love, support and attention that you pay to us. In no case do we convince anyone of anything, we don’t try to convince anyone. Let's go with us. We love you. Bye everyone.

Irina: Bye everyone.

June 06, 2021

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

MidgasKaus - representative of the planet Esler, biologist, psychologist, specialist in alien life forms;

LiShioni is a representative of the planet Shimor, a specialist in the astral world and its interactions with the material world.

#285 Artifacts associated with paleocontacts. Unique archaeological finds in Peru.

https://blog.cassiopeia.center/artefakty-svyazannye-s-paleokontaktami-unikalnye

https://www.youtube.com/watch?v=F72p-StW25g

00:18 Introduction of the participants.

Vladimir: Dear friends, hello! I am glad to welcome everyone. My name is Vladimir Goldstein. I'm in the suburbs of Chicago. Today we have a very interesting conference. I would like to introduce our today's participants. Irina Podzorova, greetings!

Irina: Hello.

Vladimir: Anna is with us. Surname…

Anna: Novikova.

Vladimir: Today's conference is connected with my youth. In the distant years, back in the Soviet Union, I was aware of what we will talk about today. And we'll talk about evidence of the presence of alien civilizations in the ancient history of the Earth. "Paleocontact" is an exotic word.

I collected a huge number of clippings (of which there were few) from the Soviet press, books, and so on, where something was mentioned

about this: “paleocontact”, “visits of aliens” to us in ancient times.

Erich von Däniken spoke about this, and the Soviet science fiction writer Alexander Kazantsev wrote a lot about this. I had his book “Guests from Space” with photographs. We will show some of them today. A very exotic topic: the presence of ancient cosmonauts or astronauts of other civilizations in the history of our planet and humanity.

I thank Anna for the invitation to the conference. I have the opportunity to immerse myself in the deeds of my youth. We introduced ourselves. I want to ask Irina: “Who is present next to her today?”

Irina: Hello, dear friends, my name is Irina Podzorova, I am a contactee with extraterrestrial civilizations, and today there are two representatives of the planet Burkhad next to me. The first, already well-known specialist in energy interactions in the environment, Raom Tiyan, and his friend, who today is participating in the conference for the first time with our Cassiopeia group, answer questions. His name is Lairichosh Milet.

Vladimir: Can we call it Lairikhosh?

Irina: Layrikhosh. He is an expert on the history of the creation of the earth's race and interaction with it throughout the history of Burkhad. He studies the history of Burkhad and Earth at the same time, their interaction.

Vladimir: We thank Raom Tiyan and Lairikhosh for their presence today. Begin. I'll show you a screen with a presentation prepared by Anna, she did a great job. We'll see the slides and ask questions.

Anna: A little about the slides: these are several earthly mysteries that remain a mystery, we cannot guess them. We would like to ask you if you know anything about these items. We will show them. (Attached is a map). I hope this will make it easier to see in what part of the world they were collected.

Vladimir: Can you see my screen?

Anna: Yes.

Vladimir: Okay. Anna, please, can we begin?

04:34 Astronaut from Palenque. Bas-relief on the slab of Pakal's tomb.

Anna: The first, most famous, exhibit is called the astronaut from Palenque. Our name. This is a bas-relief of the tombstone of Pakal, who was a Mayan leader and priest. The slab was found on the Yucatan Peninsula in his step pyramid tomb, which I also included. The picture disappeared.

Vladimir: We will return her now, don't worry. Just a second. Here's a picture.

Anna: The question will be this. Our scientists, looking at this picture, said that they see an alien who appears in some kind of mobile aircraft. Our scientists saw it and created a 3D model. I would like to know where this was found? In Mexico?

Vladimir: This is where it was found. Red dot. Is my cursor visible?

Irina: Yes.

Vladimir: South America, in Mexico.

Anna: What do you know about this and what can you tell me? Let's get the picture back.

Irina: Now he will look at her through me. Give me a sec. He asks, "Are you interested in the device that was found in the center?"

Anna: Did this person fly into space at that time?

Irina: It was a device.

Vladimir: I will comment, Anna. What we see in the center is an installation, that's how we presented it. Supposedly he is located like this. In fact, there is none of this. A real fresco, as it looked. On the left is the processed one, on the right is it as it was found.

Irina: Our Lairikhosh is a Burkhadian, he drew attention to the central figure who is sitting in the apparatus. Most of all, it reminded him of a telescope.

Vladimir: That is, an authentic fresco, we see it on the left. How she was found, without restoration - this is on the right, on a yellow background. This is a photograph of her as she was found.

Irina: On the left is a reconstruction, on the right is how they found it. Do you want me to express my opinion about what is drawn here?

Vladimir: Absolutely right.

Anna: Yes.

Irina: He says that according to reconstruction it has to do with where a person is, he sees it as something like a throne. What you see, as if the apparatus is descending, is like a cross, an image. He is on some surface, half sitting.

Certain signs are also drawn - to the right and left of him are two faces, which symbolize faces without bodies, like faces appearing in balls, with some kind of wings - this is how they depict, perhaps, a king, a priest, a priest.

What you see as a crosshair, a symbol of a cross, there are also signs here. This image did not remind him of the device. The device

reminded him of what was in the middle, and that, like a telescope, because of the top part in the form of a cone.

Vladimir: So, according to Layri, this is not an image of a paleo-astronaut, this is an image of a priest or a local king?

Irina: If it is inside some kind of apparatus, fine. But this image reminded me of the image on the wall of the room where he is, like a painting that carries a certain meaning for him. Like a sacred place. Moreover, on the side, below and above there are signs that have meaning, like letters. These signs are not just symbols. Very often, syllabic writing was depicted in individual hieroglyphs or letters.

Vladimir: Do you know what these signs are, Lairikhosh? How to translate them?

Irina: Who was in contact with the Mayans? I see it's about the beginning of a new era, right?

Vladimir: It dates back to the 7th century AD.

Irina: You showed the point. It needs to be shown to someone who has been in contact with that people, but this does not remind me of the people of Burkhad or any other familiar civilization. Perhaps this is the language of the priests, which was common among many peoples like runes, only here they are drawn in a certain style. You need to involve specialists who have studied your sacred texts.

Vladimir: We understand **.** This was inside the pyramid temple, so the explanation is clear to us. Let's go further. We have a lot of questions. Please continue, Anna.

10:57 Images of aliens from the province of Jalisco, Mexico.

Anna: A lot of items were found in Mexico. Many of them had signs that depicted flying machines and people with wings. Many of these objects were in the form of an elongated head with elongated eyes.

The conclusion suggests itself that the local residents had contact with some alien races at that time and conveyed this in such art.

Could this happen? Who was in contact with them, and was there open contact in Mexico at that time? There is no specific date for the items, unfortunately. They were found in Jalisco, Mexico.

Vladimir: I want to draw your attention to this part. The feeling is that this plate is depicted.

Irina: Plate. And out of it comes a man with wings.

Anna: Or rises into it.

Irina: From there comes a ray of light that illuminates it.

Anna: I see. Could this be evidence of contact?

Irina: This could be a memory (Lairichosh says) of contacts. To the left of the contactee is a mask or an image of the head of an alien, a cosmic being. But the lips and nose are more reminiscent of earthly ones. The shape of the head resembles representatives of Tashiga. The eyes are almost invisible, but they can be in the form of these diamond-shaped protrusions.

Vladimir: These?

Irina: Yes, yes. The lips and long nose resemble those of Earth, and the shape of the head resembles those of the Tashigans. Perhaps the one who made this product conveyed the meaning that he saw a creature that is a hybrid of an earthling and a Tashigan.

Vladimir: So this species is more like a hybrid of a Tashigan and an earthling?

Irina: Maybe he depicted both, these and other features.

Vladimir: I see. Tell me, please, is the shape of the ship similar to the Tashigan or their colonies?

Irina: The disc-shaped shape that you call plates is characteristic of many races: a round shape with a protrusion at the top that contains various devices. This form is convenient for turning on and operating various types of engines. Round or close to round. It is convenient to place various devices in it; they take up little space, but at the same time they take up a significant amount of space. Many civilizations make ships of this shape and use it.

Vladimir: I see.

Irina: I would pay attention more to the creature than to the ship. Here is the characteristic shape of the eyes of the one who is drawn under the plate.

Vladimir: Under the plate or here? Or in general?

Irina: The creature is standing. Do you see those eyes?

Vladimir: I see. The image is the same, only small.

Irina: It looks like that creature, only here it is drawn in full growth. We see a long nose, characteristic lips, decorations or devices on the head. It doesn't look much like a helmet, considering the objects hanging under the ears, reminiscent of earthly jewelry. The image looks like a representative of another planet or a hybrid with earthlings. Wings are drawn on the back. This is not clothing, feathers are clearly visible.

Vladimir: I'm showing you, friends, because not everyone can see in this image. Here is the full outline of the figure. This is, in fact, a skull, and on it is an image of a flying saucer, a ray. A creature comes out of it. Here are the outlines of this creature with wings, which is engraved

on a stylized skull, with wings, hands folded.

Irina: (Lairikhosh speaks). I want to say that wings were traditionally designated in ancient religious cults that appeared against the backdrop of the deification of aliens. Wings are a symbol of the fact that these creatures can fly in the sky, similar to birds. Christian Angels were also depicted.

Aliens were often called Christian Angels. Then they began to be depicted on icons with wings, which symbolizes the ability to fly. Spiritual creatures were also drawn, symbolizing their ability to instantly move in space.

It is easier for a person who has not seen these aliens, but only seen an image, to imagine, knowing from his own experience that birds fly, that this creature has arrived.

Vladimir: If we take into account the authenticity of the find (it's not a fake, it's in museums), everything is obvious here: a flying saucer, a beam, a representative from it is clearly unearthly. The stylization of the skull is the same, here is an image of a flying saucer, in the area of the third eye, and the image of the skull itself.

Irina: There is a plate on the skull and the letters are different.

Vladimir: Yes, yes.

Anna: There is no doubt that this was done as confirmation of contact in those days in Mexico.

Irina: Since the date has not been established, most likely, information about when these images were painted was not requested.

Vladimir: We don't know the dating, we haven't checked it. But, unlike the first slide, which everyone also believed, there was some kind of ritual image, but here we received a full transcript with confirmation from a representative of the Interstellar Union that what is

depicted here, in fact, is a contact and a hybrid, which is directly related to this contact. Go ahead.

Irina: On the right are various masks made of gold. There is an image of an animal and a bird, and also with the same eyes.

Anna: This was found in the same province. We don't know the date or confirmation. I have picked up similar things that indicate the same thing in ancient times.

Irina: Alien mask, creature masks on the right. (Lairihosh and Raom Tiyan speak). We believe that this was not done for entertainment, but for ritual purposes. These masks were worn by priests to contact these creatures. Such a ritual.

Vladimir: Anna, where is it? Which museum?

Anna: I don't know for sure. I know the findings are confirmed.

Vladimir: Our listeners and viewers can easily find it. Let's look at the next slide. I want to ask a question, I already asked once, but it got lost in the conferences.

20:22 Geoglyphs in the Nazca Desert, Peru.

Vladimir: These geoglyphs in the Nazca desert are well-known images. Famous researchers brought information about this to the Western world in their time. More than 50 km (plateau in the Nazca desert) of different designs, applied in various ways, lined with stones. If I remember: 13,000 lines, 700 geometric shapes. All this, as you and I can observe, is visible only from a great height.

For what? If only from a great height you can see the spider or the figure of the bird and the other figures. It is believed that this was done for aliens who could view from ships, either a landing site or something else. Question: What technology was used? Serious scale, huge figures. This is all located in Lima, Peru.

Irina: (Lairikhosh speaks). These are figures whose meaning can be understood by looking at them from above. If you stand on the ground, the meaning will not be visible.

What are they made for? Ancient people gave a sign to the gods in this way. This was a form of contact: when the gods flew over the plateau in spaceships, they saw these figures. The psychology of ancient man was such that, leaving drawings for many centuries, they forever showed the gods their presence, so to speak. Just like artists paint pictures, only this was for the gods, it was emphasized that the meaning can only be seen from a bird's eye view.

Vladimir: Lairikhosh, when we say “gods,” we understand that local residents considered aliens to be gods. Was this done for them?

Irina: Yes, aliens were considered gods. They arrived on ships, and drawings were dedicated to them. Labor-intensive and time-consuming work, the one you showed. It was believed that this was a form of worship of the gods, that they invested energy. The gods will rejoice when they see images of earthly animals, insects, etc.

Vladimir: Did aliens help build it?

Irina: Perhaps they helped. I have been to Earth several times, but have not seen Interstellar Union specialists who could participate in any way.

In some places on the planet, in order to strengthen the faith of earthlings in themselves, to show it as a miracle, they could use something similar, as in the construction of the pyramids. The anti-gravity beam helped build, although it was to support their religious cults.

Vladimir: How do you estimate that this was done after the war 12,000 years ago? When did everything on Earth calm down?

Irina: He says: “Yes. After the war".

Vladimir: Approximately when?

Irina: Somewhere around 8,000-7,000-5,000 years ago. At that time, the intensive formation of new peoples was underway on the territory of the Earth. Contacts with aliens, in the form of gods, helped and taught people agriculture, hunting, cattle breeding, and safe survival in the environment. They gave the first laws about the state, about religion, and passed on their experience in a form that they could perceive.

Vladimir: What kind of extraterrestrial civilization do you think these drawings were made for? Who was then in contact with the locals here?

Irina: These were mainly representatives of Burkhad and their colonies from the constellation Cygnus, as well as Tumesout from the constellation Orion. There were also civilizations of Sirius.

Vladimir: Futissa?

Irina: Yes, the Pleiades, the colony is in Burkha.

Vladimir: I see. Could this be a cosmodrome, a landing site for alien ships?

Irina: I mean, could they land there?

Vladimir: Yes, yes.

Irina: They could land to approve with their appearance the energy invested in these images, that they accepted this sacrifice. It's like a form of sacrifice.

Ancient man, as far as I studied the history of your race, was more guided not by abstract ideas about gods, but by the practical meaning

of life. Life in nature was subject to strict natural rhythms. And if a person invested energy in these, at first glance, useless images for him, it means that it was really important for him.

Vladimir: I see.

Irina: They could approve.

Anna: Why did you choose these subjects: birds, spiders, monkeys? Why these animals and insects?

Irina: The one who laid it out, made the decisions, considered these forms of earthly life beautiful, divine, to show to the gods.

Vladimir: I assume that a lot of time was spent on this work. If there were extraterrestrial technologies, we don’t know, maybe quickly. But if it was laid out manually, only with the help of earthly efforts, then many years were spent on creation. Let's go further. Please, Anna.

27:26 Female mummy. Peru, Nazca Desert.

Anna: A very interesting object: a mummy that was found in Peru, not far from the place we saw, Nazca. The mummy was subjected to careful analysis, and a film was even made. When they took an x-ray, they saw that the structure of the body was unearthly. The mummy has three fingers and toes, an oblong skull, eyes of a different shape than those of earthlings, and five phalanges on each finger. After examining the mummy, they came to the conclusion that it could be of extraterrestrial origin. What can you say about this?

Irina: I know that a DNA analysis was carried out. They showed that the DNA is human, female, but the structure does not correspond to a person.

What does this mean? About the fact that you see in front of you a hybrid in which DNA is built into the genes, but it is built in such a way that not sections of DNA are replaced, but only individual nucleotides.

Vladimir: The analysis shows human DNA because it does not reach the nucleotide level?

Irina: Yes. At the level of individual nucleotides, pointwise, not in one gene, but in many dozens. In this case, your instruments will show that this is a person, and the structure of the internal organs will be different, because the separately built-in nucleotides will control the synthesis of protein and all organs differently.

Vladimir: The answer is clear. Now - stones. Anna, please.

29:41 “Ica Stones”, Peru. Ancient maps of the Earth. Evidence of dinosaur life. Depiction of heart surgery in ancient times.

Anna: Peru. These stones are called “Ica stones”, there are a huge number of them. They are found throughout Peru. The most interesting thing is that they depict scenes indicating that ancient people lived together with dinosaurs. There are stories about catching dinosaurs, how dinosaurs hunt humans.

The ancients knew that dinosaurs had skin with a certain pattern. Our scientists learned about this recently. They already said then that the leather had a pattern. Plus, the world map is depicted on one of the stones. And evidence that medicine was well developed. Our scientists figured out that the picture shows a heart transplant. On the rock on the left.

Tribes in Peru may have witnessed dinosaurs? The stones were created by them as confirmation of what surrounded them and what they knew? The age of the stones cannot be determined now, but there are a huge number of them.

Vladimir: I have a question, Anna. Why can’t the age of the stones be determined at least using traditional radiocarbon dating? Don't know why?

Anna: I guess you need to look at when the notch was made, in

accordance with the age of the stone.

Vladimir: Okay. I have a question for Lairikhosh. On the map, the continents look like modern ones. The question arises, was this after or before the war? When is this view of the Earth depicted? Then maybe we can determine the date from the map? Ask. Your comments.

Irina: More like a single continent. The parts are depicted closer than they are in modern times.

Vladimir: What are the lines between them? Is this a current?

Irina: Perhaps the image was painted immediately after the war, when people who remembered this event began to multiply. They decided to convey to their descendants, in artistic form, what happened. This line you drew is very similar to the fault line of the Earth. At the top of the picture there are dots that could represent ancient cities.

Vladimir: These points? Crosses?

Irina: Yes. Where the house is drawn, on the left, could be the largest base. It is shown at the top, but you need to understand that the image is on a plane.

Vladimir: I see.

Irina: Next to her are three mountains in the shape of pyramids.

Vladimir: Which ones?

Irina: In front of the house.

Vladimir: Oh, these ones.

Irina: Pyramids, I want to remind you again, this is how houses were built, including on Earth, from scrap materials when they were at the bases, the Tumesoutians. They built pyramidal houses on Earth because they were comfortable with such shapes from childhood.

Vladimir: Okay. Lairikhosh, please tell me.

Irina: Pyramids are painted in front of the house. I believe there were pyramids in the base area where some of your creators lived.

Anna: How could they get such information? Did they fly on ships and see what the Earth looked like then?

Irina: These could have been redrawn from more ancient ones. This could have been drawn by those who survived the war, who remembered the old world before the war. When the dinosaurs lived, which were before the war, and they actually lived with people. There are not only drawings, but also figurines.

Vladimir: That is, this may be an image of what the world was like before the war 12,000 years ago, but it is drawn from the memories left by our ancestors. This was done after the war, when the earthlings were returned to Earth or by those who survived on Earth. The fault lines of the continents due to the disaster are shown.

Irina: Yes, pyramids and bases are drawn here. On the left is a heart transplant operation and life with dinosaurs with characteristic figures. This was drawn before the war and was not included in the dating. You need to understand that if this is drawn before the war, the dating will be inaccurate, because the Selbet weapons changed the characteristics of the atoms included in the isotopes. The characteristics will be incorrect and will not show accurately.

Vladimir: We understand that. Tell me please, is this heart surgery depicted?

Irina: How can I bring you closer? Wait now…

Vladimir: The man lying there seems to have tears in his eyes, he seems to be crying, and they are bending over him.

Irina: These are wrinkles, which means he is an old person.

Vladimir: Wrinkles.

Anna: I think this is a heart transplant from a young man to an old man.

Vladimir: How do you like this idea, Lairikhosh?

Irina: Do you see that he has a tube going into his mouth, which he is holding in his hands?

Vladimir: Yes, yes...

Irina: Possibly an artificial lung ventilation system.

Vladimir: I see.

Irina: This could be a pre-war drawing. Under the leadership of representatives of the Interstellar Union, your medicine developed. Since you have not yet entered the Interstellar Union, these technologies were not transferred to you. They wanted you to become your own civilization.

Vladimir: They performed the operation under the guidance of specialists, or the specialists themselves, but without technology transfer, since we were not ready yet.

Irina: So that you first go through your path of trial and error. He is a valuable experience for those affairs in the Galaxy to which civilizations entering the Interstellar Union are called.

Vladimir: Lairikhosh, thank you very much. I got it. Tell me, please, when did the last dinosaur disappear on Earth? Or are they somewhere?

Irina: According to the Interstellar Union, after the war 12,000 years ago, there were no living individuals left on Earth.

Vladimir: I see.

38:09 Crystal skulls. Ritual with crystal skulls.

Vladimir: These are crystal skulls. I'll say a few words. A whole collection of crystal skulls was found. This is not done now. These are truly crystal skulls. Confirmed by scientists. Authentic. They look different. There is a lot of mysticism around them. They are believed to have all sorts of effects. They are museum exhibits. Please your comments. Anna, maybe you want to tell me something about this?

Anna: It is believed that these skulls, a small number of them have been found, are really ancient, and they are our means of recording information or alien, like, for example, our disk.

Vladimir: Like crystals.

Anna: Like crystals. They store some kind of information, what is unclear, but its amount is huge. If this is so, then I am interested in the question, with the help of what technology could this information be recorded on crystals, if this is exactly the case?

Vladimir: What is this information about, what is written there?

Anna: What's written down?

Irina: A similar image of human skulls was measured after the death of a revered priest in ancient times, after his funeral, after his remains turned into a skeleton. Then they made a cast from the material: clay,

plaster, which was available. And then they gave it to the craftsmen who carved the stones. Crystal is a hard mineral.

Transparent crystal skull images of real-life priests were poured out. Then they placed it in front of a real skull, called upon a certain spiritual entity, curators, who helped the energy of the life force of this priest, which was stored in his skull, move into the skull. It was believed that there was the highest energy center and the center of communication with the Spiritual world, what you call chakras. All this energy turned into a crystal image.

What the master did based on the skull, if you measure it, you will see that they are slightly different. A real bone skull was placed “face to face” with a crystal skull, candles and certain lamps were lit, and incense was burned. A certain ritual was carried out during which the life force from the skull, which contained the brain, flowed and was recorded in the crystalline structures of this crystal.

Crystal, like any mineral, has the ability to record information on the etheric plane, life force. Any vital force of a living being carries information about his thoughts, emotions, and Soul. Soul information is important.

Why crystal and not another mineral? The transparency of the crystal allowed the priest's students and his admirers to look at the skull, and, peering into it, enter an altered state of consciousness, come into contact with the Spiritual world. Images appeared.

Information is stored there, and anyone can come into contact who will have a homogeneous vibration with his Spirit, the vibration of his Soul embedded in him. This does not mean that his Spirit is caught. He can even transform himself. Here is part of his vital energy.

Vladimir: I see. Anna, do you have any questions on this topic?

Anna: So the purpose of this ritual is that you can then connect through its life energy with the Spiritual world?

Irina: More often - with his Spirit. But his Spirit could undergo reincarnation or not want to communicate with them. Then someone from the plasmoid civilization or some kind of Spirit could come out. They also saw how you see the skull, and I see at the energy level that rays of vital energy diverge from the center of the skull, and these rays completely repeat the crystalline structure of each cluster of molecules.

Anna: They don't dissipate over time? So the skulls we see still contain the energy of the priests in whose image they were made?

Irina: Yes. This is especially clearly visible when you look not from the side, but from the front. The strong life energy of a light person and a powerful priest in the skull in the middle. Look at it.

Vladimir: I see.

Irina: You will feel what he felt.

Anna: I see. Interesting.

Vladimir: I see. Various priests. Skulls of different people.

Irina: On the right in this picture. When I say priest, I don't mean a man, it could also be a woman.

Vladimir: Priestess. Let's move on. They were found in the city of Lubaantun.

44:49 Stone balls of Costa Rica.

Vladimir: Stone balls of Costa Rica. Anna, please comment.

Anna: They were found a long time ago, in large quantities and of different sizes. Nobody can explain the purpose. Many of them are perfectly round in shape. They were found in Costa Rica. Many of

them reach a mass of six to seven tons. They are simply there and have always been there. What are these balls? What could they be?

Irina: On the right in the top picture? Is this the environment where they were found?

Anna: They were found everywhere. Both on the coast and in areas where there is no water. They were taken out of the ground during excavations.

Vladimir: It’s a lot of work to process blocks of stone. Look how much! Look!

Irina: Or they were used to build statues or objects to be placed on top of each other, like round blocks. If placed in a certain way, no adhesive is needed. They will hold on themselves.

They are placed on top of each other according to certain laws. There are smooth ones that were made by stonemasons, and there are those that (very similar) were made by a stream of water. Some of them show traces of nature: they hit other stones for several hundred years, water flowed through them, and rolled them over.

There are also those whose surface contains obvious traces of processing. They were sharpened with tools.

Vladimir: Okay. Let's move on.

47:19 Giant Skeletons and Skulls, Delavan, Wisconsin.

Vladimir: We moved on to giant objects. Giant skeletons have been found in Wisconsin, an hour away from me, north of Chicago and Illinois, and in many places around the world. This is where I live in the great lakes region, this is where Chicago is. We are talking about giant skeletons, and skulls were also found here. Please, Anna, comment.

Anna: They have two rows of teeth and, as it turns out, six fingers on their hands. They are tall - 2.5 meters. Sixteen skeletons.

Irina: Are there any photographs of skeletons?

Vladimir: There are photographs of other skeletons, a little shorter. We can look through it.

Irina: You said about six fingers.

Vladimir: We have other examples of skeletons that were found there.

Anna: I removed the slides. The first ones are interesting. These are the only skeletons that have been found with two rows of teeth and six fingers. Height is 2.5-3.5 meters. You can't tell from the skull.

Wisconsin. What kind of civilizations and activities could there be there? Who could be there with two rows of teeth?

Irina: You found the skeleton of an extraterrestrial creature that looks unusual: height, number of fingers, skull structure, etc. Why did this alien remain on earth?

These are either victims of a war 12,000 years ago, or the fruits of hybridization, which was carried out with a separate tribe or clan, with which a separate experiment was carried out, and not with the entire race of the Earth.

There were scientists who flew in to leave hybrids on Earth. Many thousands of years ago such hybridization was prohibited in order to leave hybrids on Earth.

Now, when Tashig carry out hybridization or Disnit, for example, they settle hybrids on separate planets, at their bases, etc. In order not to provide evidence of contacts to representatives of the Earth. For the reason that as soon as you give evidence of contact to the masses,

you will soon need to make mass contact. By announcing our existence, but without solving problems with earthlings, we will lose trust.

Vladimir: I see.

Irina: And now there is such a paradigm in our society to which the Interstellar Union reacts. At that time, he was more loyal to hybridization and leaving hybrids on Earth, he was not so strict.

There could be such experiments, the result of which you see is hybrid people. There have always been scientists from different planets who sought to improve the earthly race, not because it is bad. They strive to improve their race and any other. Search for perfection.

These hybrids could reach adulthood, enter into sexual contact with the inhabitants of the Earth who have not undergone hybridization, and pass on individual genes.

Vladimir: Lairikhosh, let’s repeat the information: we had it in other conferences. We know that there really were centaurs, there were hybrids of people with animals, in particular with horses. It was so?

Irina: There were such experiments, but they turned out to be unviable. Hybrids did not pass on their viability to other generations, and they themselves often suffered from various pathologies. This hybridization was banned.

Vladimir: What civilization conducted such experiments? Tashigans or someone else?

Irina: No. Most often it was carried out by civilization, I will say in the language of Burkhad (Pikran), Shortipar. She was within Lyra's sphere of influence.

Vladimir: Mid?

Irina: He didn't come.

Vladimir: We can clarify later, maybe we know about it with a different name. The Lyran civilization, of course. Let's go further.

53:07 Colombian planes of the gods.

Vladimir: This is a well-known thing. “Columbia Planes of the Gods,” that’s what they’re called. Essentially it's an airplane.

Irina: Mid can come in 10 minutes.

Vladimir: Let’s figure out what kind of airplanes these are.

Irina: This is a repetition of the shape of the aircraft that they saw. On the left, with the tail of a bird, like a living creature, like an animal with wings. As for the image below - an airplane.

The ships of the Interstellar Union that flew to Earth did not have wings like earthly planes; they did not rely on air. They have different ways of moving. The extraterrestrial technology that comes to mind in connection with these items is probes. They may have wings for observation, like mini-robots.

Vladimir: Like our drones, only automated.

Irina: They are smaller in size than your drones and have the aerodynamics of an airplane. These were issued by some civilizations, which could send them for observation.

The ships in which the pilots sat flew in the atmosphere of your planet on planetary engines that were repelled by the gravitational field.

Vladimir: They didn’t need aerodynamics.

Irina: Yes. They did not rely on air.

Vladimir: Thank you.

55:09 Ancient image of a figure in the Sahara.

Vladimir: The legendary image of the “Great God of the Martians.” Found in the Sahara. In this place. Such an image. This is what it looks like. What do you think this is?

Irina: It could be a human figure. She's wearing these clothes, what's in the middle here?

Vladimir: Thermal helmet? Eyes in different places?

Irina: These are not eyes. That's not how they were portrayed. If it is the back with any part.

Vladimir: Doesn’t it look like Kirchiton? There is no neck.

Irina : No. It may not be a helmet. He was reminded of a person who, for some purpose, put on such clothes and hid his head. But this item on top can be a decoration. Doesn't remind me of astronauts.

Vladimir: Ritual drawing. Go ahead. It was in the Sahara.

56:37 An ancient footprint in the Gobi Desert.

Vladimir: One more thing. From the book “Guests from Space” by Alexander Kazantsev. A sole imprint in the Gobi Desert, which, according to our methods, is dated to a million years ago. A ribbed imprint, as if the soles were shod with something.

Irina: Perhaps this is the pre-war dating of different layers of the

Earth. They are significantly distorted. If you imagine a million years, then at that time people lived on Earth. People have already been created.

Vladimir: Yes, but they didn't have shoes yet. And here is a ribbed shoe print.

Irina: Wooden shoes could well have been made from animal skins. Doesn't look like a modern one. It is uncomfortable and unsafe for children and teenagers to walk barefoot on the ground, even in warm climates, because of plants and animals, insects, etc.

Vladimir: I see. Please, Anna, let's listen.

57:52 "Drop Stones", Bayan-Kara-Uly, China.

Anna: Interesting discs. This is the only photo I could find. It is located on the border of China and Tibet, in the area of the Bayan-Kara-Uly mountains. There is a legend that many thousands of years ago the ship of the gods crashed. They stayed to live with people. Descendants from their contacts appeared.

No one knows the purpose of these disks, but it is believed that some important information is recorded on them. The people who lived there are called "Dropa", and the stones are called "Dropa stones". What could it be?

Irina: The Galaxy is depicted here, with the central Sun - with the energy center of the Galaxy. The sun emerging in a spiral is a symbol of the Galaxy in almost all cultures. There is a creature standing here that reminds me of a human being, there are animals here. Some events are happening, very small to consider.

As for the ship. This could well be people's memories that one of the ships that fought in the war with the Selbet civilization was hit by a weapon and fell on what later became the foothills of Tibet. Is it possible.

The Sirius civilization, which fought here along with the Burkhad civilization. Their planet was destroyed. It was destroyed in a war with the Reptilian race, whose representative, Ashtar Sheran, is still alive.

Representatives of his people, together with the Burkhadians, were among the first to defend the Earth. Both the ships of Burkhad, Sirius, and Selbet could lose control and fall.

As for the descendants. The civilizations of Ashtar and Sirius are genetically incompatible with earthlings. But technologies that can cause point mutations in the reproductive cells of women on Earth could produce joint offspring if the representatives of this civilization themselves wanted to do this.

Such cases are unknown, but you need to talk to Ashtar, he should be aware of whether there were such precedents for the birth of children.

Anna: On the left are two plates with a recess inside. What could it be? Of earthly origin or some kind of writing on them? There is confirmation that they have small hieroglyphs on them, they have two sides.

Irina: Nothing is visible.

Vladimir: Anna, we have three minutes left. What questions did you want to ask, what to show next?

Anna: You can skip this.

Irina: He will answer one question. And he needs to go.

1:01:59 Images of aircraft in the Temple of Seti, Abydos, Egypt.

Anna: Egypt, Temple of Seti in the city of Abydos. We found a small collapsed panel. Hieroglyphs and aircraft are visible here. Was there evidence of flying machines in Egypt? How did they help?

Irina: Once again the image. Do you see the helicopter?

Vladimir: Yes, a helicopter.

Anna: Helicopters, we guess a submarine, a paraglider. This is the territory of Ancient Egypt.

Vladimir: It's here.

Irina: Yes, it seems. On the right, in the form of a disk, is an object. It looks like a flying ship. Not surprising. I say again: “Many ancient peoples witnessed spaceships flying over them and often came into contact with them.”

Vladimir: Could there be some mechanisms similar to a modern helicopter? Is there a screw here, or does it seem to us?

Irina: The aliens at their bases have nothing similar to your aircraft, planes and helicopters. There was no need for this. I can't say what the observation probe resembles. It's some form.

Perhaps those who came into contact with the Egyptians, with their ancestors, and showed the forms of aircraft, just diagrams that you could use to build your ships. Not just diagrams, but drawings of devices that could have been built at your stage of development.

Vladimir: Friends, our guests need to leave. I will quickly show you what we did not have time to ask, but we are not parting with the Interstellar Union. Phaistos disc, there is a lot of interesting things here. This won't go away.

Irina: The conversation will not last for one hour.

Vladimir: We will do the second part. There wasn't much left. We will have time to ask about this in the future. We received very interesting

information. A mechanism that was found on an ancient ship. Today we will release representatives of the Interstellar Union. They need to leave on important matters.

Irina: They came for an hour. An hour has passed.

Vladimir: We thank them for being with us today. I want to thank Lairikhosh, Raom Tiyan for very interesting answers to important questions. We realized that these were real artifacts related to aliens. Some of them are ours.

Irina: Thank you all. See you soon.

Vladimir: Anna, Ira, please, if you want to say something. Our guests, as I understand it, have left.

Irina: I was interested too. Thank you for your questions. Let's move the subsequent questions to the second part. They responded quite quickly.

Vladimir: It was very interesting.

Anna: Great. Good answers. We found out what we wanted to know. I'm glad. If they come to us for the second part, it will be great. We'll prepare some more interesting questions.

Vladimir: Thank you very much, friends. Thank you to everyone present for participating in this conference. All the best and see you again on air.

Broadcast June 08, 2021

Participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Vladimir Goldshtein – journalist and Facebook group administrator, assistant director of the Cassiopeia project;

Anna Novikova - historian;

Raom Tiyan is a representative from the planet Burhad, a specialist in energy interactions in the environment of the material world;

Layrihosh Milet is a representative of the planet Burhad, an expert on the history of the creation of the earth's race and interaction with it.

Video in text

April 22, 2023

#286 Aliens about Lobsang Rampa. Astral travel and mentors from the Spiritual world. Channeling.

https://blog.cassiopeia.center/inoplanetyane-o-lobsang-rampa-astralnye-puteshestv

https://www.youtube.com/watch?v=Fw0Wk--kuUg

00:21 Introduction of participants.

Irina: Hello, dear friends! My name is Irina Podzorova. I am a contactee with extraterrestrial civilizations. Today we have with us the

curator of our project LiShioni from the planet Shimor, a specialist in astral interactions, and Alina. Hello, Alina!

Alina: Hello! My name is Alina. I live in Germany, work in the field of sports, and also try to develop spiritually. Today I would like to talk to you about a writer like Lobsang Rampa. I would like to know if you know such a writer, have you heard of him, have you read his books?

Irina: Lilies?

Alina: LiShioni knows for sure, because in one of his lectures he said that the book is “You are Eternal”, you can take some things from him, learn a lot, do practices, and so on.

01:27 Lobsang Rampa. Contact Cyril Henry Hosking.

Irina: Lobsang Rampa was a contactee with many civilizations. He was a contactee with the Spiritual World and various civilizations. This is not even the name of himself as a writer, this is the name, most likely, of his curator, with whom he completely identified himself. This person who wrote these books originally had a different name.

Alina: The books were written by Cyril Henry Hoskin, an Englishman.

Irina: He knows the name. He knows that he took Lobsang Rampa, this is not his energy.

Alina: Oh, Rampa himself is not his. It's clear.

02:19 Teacher Mingyar Dondup. Longevity and the program of the Spirit.

Alina: He also had a teacher, Mingyar Dondup. Can you tell me something about him because he speaks very highly of him. I also wanted to ask some things about him. In one of his books, he wrote that he lived on Earth for 400 years, and knew exactly when he would

be killed, by whom and when. I'm talking about the teacher now. I'd like to clarify. It seems to me that we have 400 years on Earth - how is it possible to live? Was this really the case?

Irina: The fact is that the writer Henry, whom you just named, was a contactee of many civilizations. Among other things, someone came to him from the Spiritual World, whom he called Lobsang Rampa, and whose story he told. It was one of his curators. Lobsang Rampa himself, a Tibetan monk, by that time his physical body had died, he was already disembodied.

Alina: Disembodied.

Irina: They had an agreement with Henry that he would provide him with his body, as it was written there for transmigration, but it was such a form of contact.

As for Mingyar Dondup, he was an even more ancient teacher, one of the teachers of Lobsang Rampa, a Tibetan monk. Its lifespan must be found out in the Akashic Chronicles, in the egregor. 400 years was a countdown, most likely according to the lunar calendar, or some planet. It takes no more than 150-180 years here, in any case.

Alina: Even living with us for 150-180 years is also a long time.

Irina: Sometimes people reach this age in mountainous regions, in Japan. There are such people.

Alina: 180 years?

Irina: Yes. (LiScioni speaking). Even if there were 400 ordinary years, I would not be surprised, since it still depends on the individual program of the Spirit. If his incarnation period had expired, but he was doing a very important task on Earth, then his mentors from the Spiritual World could extend and support his body. This is possible, although rare. But sometimes this is possible. This does not mean that this will be possible with someone else who will have a different task.

05:37 Structure of the Higher Self. Spiritual structure of a person.

Alina: Just when I turned on YouTube and saw you, Irina, you said that you were also asked this question. You talked about, or LiSioni said, that the Higher Self can have only one Soul, one person, control one person. In Lobsang Rampa's books, it is indicated on the contrary that the Higher Self can, on the contrary, have many (he called them) “puppets” in order to accelerate its evolutionary development. He gives examples from the book “The Three Faces of Eve.” "The Story of Bridget Murphy", an example of Joan of Arc. And Lobsang Rampa himself and his teacher also had one Spirit. I would like to clarify with you once again why there is such a difference in the statements?

Irina: Because our terminology is based on the knowledge of the Interstellar Union (IC) about interactions in the Spiritual World. MS knowledge is based on personal contacts with representatives of the Spiritual world, our own meditative states, communication with our Higher Self. Since we have a certain level of consciousness and processing of this information, we perceive the Higher Self as different from what Lobsang Rampa spoke about.

The Higher Self or Spiritual Self is the disembodied part of the Spirit. We consider each incarnate Spirit to be an integral unit. Our perception is that we consider it a whole indivisible unit. If we take earthlings, 30% of the Spirit is incarnated, and 70% of the Spirit remains in the Spiritual world. If 70% of the Spirit also incarnates, as would be the case if one Spirit incarnates into different beings, then there would be no energy left to support the incarnate Spirit. There would be no energy left for the work in the Spiritual world that continues with the incarnate Spirit.

Information would come through the brains of different people, through a system of concepts, through a system of meanings. Each brain has its own system of meanings, built on memory proteins. Memory is not only a spiritual structure, but it is materialized in the brain through a special neural network. This is how it is with intelligent beings. Every planet has its own neural network, and it is formed individually for each person. If different Spirits embodied in different bodies send signals to one Higher Self, this will create the impossibility of completing tasks, because there will be conflicting signals from different types of nervous activity. We have investigated this issue.

Alina: I see.

09:23 Group animals of the Soul.

Irina: This is possible only in animal Souls, and then only in group Souls that have not yet formed any developed nervous system. This happens in plant Souls, in Souls of microorganisms, in animal group Souls. Animal group Souls, according to your terminology, are embodied in insects, small birds, small fish, which do not have a developed nervous system enough for an individual Spirit to enter them. Since they have practically no disembodied part of the Spirit, the signals that come from different types of bodies, from different eyes and ears will no longer matter.

I explained why the Interstellar Union thinks so. It is impossible for the Spirit to structure this information if it is in different bodies at the same time, even being next to each other, in the same country, for example. Even in the same country they may have different families, different ages, different life experiences. Certain receptor settings are formed. Dissimilar, contradictory information about the same phenomena will be transmitted to the Higher Self. This will disorganize its work, and the remaining part of the Higher Self, if one is embodied by 30%, and the second remains only 40% in the Higher Self, this will not be enough. to support their work and remain stable for earthlings.

Alina: Only for earthlings, because among the Burkhadians you said that 70% of the Spirit is embodied.

Irina: Yes, I'm talking about earthlings now, because Lobsang Rampa wrote on Earth.

Alina: Then where did he get such information if he was also a contactee?

11:31 Energy structure of the body of Burkhadians. Lobsang Rampa's opinion on the unity of Spirits.

Irina: As for the Burkhadians. Incarnation through their body type is distributed differently, they have different chakras, different energy centers. Not only is their number different, that's not the point. The fact is that in each chakra, as you know, there are so-called petals, multi-level systems. There are so many petals in one chakra, there are etheric channels in them. The structure of each chakra and its functions are different among the Burkhadians, and for this reason, 70% incarnation does not prevent this Spirit from realizing itself in the Spiritual World. The 30% remaining in the Spiritual World is enough for him to fill with energy.

For the earthly body these are different indicators. There is different biology, different biochemistry, different energy, different information.

When a person goes into the Spiritual World, and Lobsang Rampa was an excellent astral traveler, he also visited the world of disembodied Spirits, which is located further than the Astral. And when the Spirit begins to go out there and communicate, he brings into his body the memory that everyone there is one. Having communicated there with his teacher, he feels unity, that they are, as it were, from one Spirit, from one Source. This is reflected in the Russian saying "You and I are of one Spirit." This feels Divine unity. But if you look from a spiritual point of view, spiritual beings can also convey that one Spirit is incarnated in many, but they will no longer call it the Higher Self, because for them the one Divine Spirit is incarnated in many vessels, like the rays of one single Divine Sun. This is a view from the Spiritual world, and it also has its place. And we consider the world from the point of view of the material world - each ray separately.

Alina: I see, I understand, thank you. Everything is very clear to me, everything is very accessible.

14:19 Differences between the three-dimensional and nine-dimensional dimensions of the Universe.

Alina: The next question, related to the previous one, is about measurements. He said that we are people of the third dimension, you are the same, I heard this in your lectures. And in nine-dimensional space, for example, a person can understand the reason for the origin of life, the nature of the Soul, how things are born, what role they play

in the evolution of the cosmos, in the ninth dimension a person is still a puppet of his super-essence. I would like to ask, are we talking about the incarnate part of the Spirit here? The more the Spirit is embodied in the body, the faster the perception and knowledge of the Universe and the Spirit itself occurs. Right?

Irina: Word «puppet».

Alina: That's how he pronounces it in books.

Irina: He had very developed imaginative thinking, and as a child this boy loved the theater very much. When he loved the theater, he saw how the human hand controlled the puppets. Therefore, by using the word "puppet" beyond his essence, he wanted to show that a person's physical body is controlled by his Spirit.

Yes, we live in three dimensions. The number of dimensions is infinite, but each dimension takes its own understanding of the world. Measurement from the word "measure". You need to know the starting point from which it was Lobsang Rampa and his curator who began to measure. I know her. He began to measure precisely from the physical world, and then he had several layers of subtle material reality, several layers of the Spiritual world, and so on. He also said that the number of dimensions is a number with infinite zeros. That was his description.

"Nine-dimensional" means three times, he said, the size of the particles that make up the world is three times smaller than the physical one, and they vibrate three times faster. This is approximately the 25-27th level of density of plasmoid civilizations, because he imagined the world consisting of certain particles. I adapted my language more to your physics, that the world consists of particles.

MC always says that the world consists of energies that, according to certain laws, form into particles. He wanted to say that the material world, even there in the ninth dimension, that is, at the 25-27th level of density in MS terminology, subtle material, is a plasmoid world, and even there a person gets the opportunity to more fully recognize the laws of life, the evolution of consciousness.

Their subtle body is structured differently. It can easily think about abstract things because they do not have such dense material objects that take time to build: getting food for themselves, for example, building, maintaining a house. All this is not there. There is simply life in energies, energy waves. With their wave they can bend around, one might say, various objects, even planets, and learn from their properties. This is roughly what plasmoids do.

And even they, he wrote, being puppets of their own beyond their essence, they are not Spirits. He wanted to emphasize that they have bodies, although subtle, but still bodies that are controlled by their Spirit.

18:52 Characteristics of measurements.

Alina: I see. That is, the question of a two-dimensional world can probably be omitted. I understand now. I wanted to ask because he writes that people who live in this must necessarily be flat geometric figures. I thought that we were talking about plasmoid civilizations.

Irina: He cited the two-dimensional world simply as an example of what another dimension is. He gave an example of a one-dimensional world.

Alina: Yes, one-dimensional too. One-dimensional beings and two-dimensional ones.

Irina: That you can put a dot on a piece of paper. It will be one-dimensional. One dimension - one point. He used the word “dimensions” as geometric measurements. In MS, measurements are like frequency measurements, depending on the frequency of vibration of matter. The first dimension will be solid matter.

Some plasmoids, of a different density level - fifth, sixth, which are responsible for the formation of crystals, for the element of earth, for mountainous areas, for the formation of stalactites in caves and so on, that is, certain Spirits of the Earth, as we call them, and places of nature. They are in such close contact with the world of minerals that

they can sometimes figuratively call themselves that they are of the first level of density. Although their body, of course, does not consist of stones. But they associate themselves so much with these material formations that they feel like stones. Just like the Souls who create the Souls of animals and watch over them, feel like animals, as I already said, even appearing before people in the form of a bear, in the form of a lion, and this gave rise to the cult of totemism on Earth.

The third is, strictly speaking, air, this is the air element. Why is it called the third dimension, because in people, in humanoids, it is present as the first dimension - solid matter, the second dimension - liquid matter, and the third dimension - gaseous matter is also present in people in the form of gas in the lungs, in the form of gas in the blood, bubbles and so on.

21:33 Cycles of evolution and the order of development in the Universe. Quantum transitions.

Alina: Yes, I see. You can also ask about the waves of evolution. He very interestingly tells, for example, that there was a race of Lemurians who were guided mainly by instincts and passions. Subsequently, they developed emotions of a higher order. Then the Atlanteans came, started with emotions of the highest order, and ended with rational thinking. Then the arias. We are the functional mind. Ultimately, they will come to abstract reason. Then the sixth race will come, which will begin with the abstract mind, and will subsequently come to spiritual perception, to the acquisition of cosmic consciousness.

The latter will occur precisely in the Golden Dawn cycle. I missed the question about cycles, but I wanted to ask you before that too. My question. Is the approximate order of evolution occurring throughout the entire Universe in this way, or is it only related to planet Earth?

Irina: Each planet, as we call it, has an individual cyclicity of time. For example, planet Earth goes through, roughly speaking, four large cycles, each of which is divided into approximately 12-14 cycles, depending on how you measure it. For 12 smaller subcycles. The transition from one cycle to another cycle is accompanied by a Quantum Leap. The matter of the Earth does not disappear by itself, but changes the polar direction of energies in relation to each other.

This changes the energy of space, it changes the noosphere of the planet, it practically changes the climate, there are various consequences. I want to say that the instruments in this Quantum Transition are both the plasmoid civilizations of a given planet and the humanoid civilizations of a given planet. Through their body, through their understanding, through their level of evolution, they project spiritual energy into a space of such quality that builds the structure of the world around them.

Alina: Is it true that one cycle lasts approximately 864,000 years? You just talked about subcycles in a loop. Here he writes that there are 4 cycles. Each cycle is approximately 864,000 years.

Irina: According to us, each cycle for the Earth currently lasts approximately 960,000 years.

Alina: 960,000 years, of course. Why such a figure?

Irina: If we count one revolution of the Earth around the Sun per year, now, at the distance at which it is located. And the year you are counting is approximately 960,000 years. At the moment there are such cycles. The passage of each cycle can speed up or slow down depending on the level of consciousness. This is such a dynamic system. The passage of certain cycles can be delayed, or it can be accelerated.

25:31 Movement of alien ships in space.

Alina: I see, I also had a question about time. He wrote that it takes about two weeks for an alien ship to fly, while on Earth it takes more than a hundred years. How can this be explained over time, how this all happens? Even he couldn't explain it in the book.

Irina: I don't know if he knew about gravitational jumps or if he was writing, most likely, about some hyperluminal types of engines that can reach sublight and light speeds in various ways. Such ships previously existed in the Interstellar Union. But with the invention of a gravitational engine, which can instantly jump to any region of the Galaxy, there is

no desynchronization of time streams due to the fact that light does not overtake. Those who are in the ship do not overtake the light in their flight. They reach 1/10 the speed of light to fly away from the planet on planetary engines, then turn on the gravitational engines. And the movement occurs instantly, in a jump.

27:10 Length of day on Shimora.

Alina: I see. I have one more question. LiShioni, how many hours does your day last? We have 24 (hours) days. How many do you have?

Irina: Earthly ones?

Alina: I don't even know. I thought about this too.

Irina: If you count in earthly terms, then it's around 17 hours.

Alina: It turns out less.

Irina: Although we have time periods when the planet Shimor moves somewhat away from the star and somewhat slows down its rotation around its axis. We have such periods. We have an elongated orbit, it can reach up to 34 hours. But this only happens to us once in your approximately 82 years.

28:07 Average age of a humanoid on Shimora.

Alina: What is the average age of a person? What is the average age of an intelligent Spirit on your planet?

Irina: On Shimora? Most live from 900 years to approximately 2300. But there are those who live 6000 years. There are people who live 400 years.

28:41 Astral exits of Jesus Christ.

Alina: Stay in Lhasa. We know that Jesus Christ was taken to India, he was also in Tibet, you also talked about this. He was subjected to special treatment, during which the astral body of the earthly person was freed. In its place they placed one of the astral bodies of our choice. He was a man with vast experience in spiritual matters, much more than can be gained in earthly conditions. This is talking about Jesus.

Irina: He speaks in such a language, he simply went to the Astral and acquired one of the curators. Has not been replaced. He calls transmigration one of the types of contacts.

Alina: I'm talking about Jesus.

Irina: Yes, as a child he also had certain curators, and he acquired them. In different countries, he also traveled to the Astral and communicated. When he arrived on a saucer, he did not just fly in on a saucer, but under the guise of a local resident he could visit a local temple, for example, a local monastery or the house of a common person. Therefore, he could go to the Astral in the presence of this person, and in the Astral acquire for himself a new curator who was responsible for this area, or some spiritual teacher of this tradition, that is, one of his curators.

And it says there that they replaced his astral body. But in fact, the astral body, the one that is considered according to the terminology of the MS, cannot be replaced, because it is part of the Spirit itself, its emotional energy, the energy of its desires, it is now called the astral body in esoteric language.

Alina: Yes, I see, I see. Lots of different information, of course. Some write one thing, others write another, in general, it’s very difficult.

Irina: In order not to get confused in terms, you need to understand what stands behind the meaning of the words used.

Alina: I see. Thank you.

30:57 Physical flight of Lobsang Rampa to Disara.

Alina: In the book “My Visit to Venus,” I read a lot of his books, because they are all very interesting, but in each of them he wrote that he writes the truth and only the truth. Naturally, this was only his truth, but still there is some kind of non-combination with the Interstellar Union and the difference can already be determined. So, “My Visit to Venus” he described how he was physically taken to Venus, and he saw people and houses, but could not determine what material the houses were built from. He wrote that people are beautiful, and there was no ugliness, either physical or spiritual, in this world.

Irina: He was told that this is Venus in his language, because he visited one of the planets of his curators, the planet Disaru. They come from Venus.

Alina: Oh, I see. Why then was he told that it was the planet Venus?

Irina: Some residents of Disaru often call her “Venus number two.” Our second home."

Alina: That's it. Clear.

Irina: There were also Burkhadians with him, the Tumesoutian, that Giant. There was a multiracial space crew there, a team that was getting to know him. He considered them to be inhabitants of one planet or one world. He was told that it was Venus. Then - Venus number two, they simply did not explain to him the details that this was Disaru, that these were people from Venus. I was not present there, but the Shimorians were there, they communicated. They had a limited amount of time and wanted to talk to him about more important things.

33:07 Mir Patras.

Alina: Because in the book “The Tibetan Sage” he wrote that after

incarnation he would enter the world of Patra. He described it so beautifully: “This is the heaven of heavens.” It is located much higher than the levels of the astral world; it is the world of the fourth dimension. And the “supermans,” as he called them, go there, the chosen ones, such as Leonardo da Vinci, Socrates, Aristotle, and so on. I understand that the world of Patra is most likely some level in the Spiritual World.

Irina: These are angelic levels. Already the levels of approximately Arhats.

33:52 Somati. Compatibility of the astral and physical bodies.

Alina: I see. He wrote about people in stone coffins, there are men and women, in the book “Tibetan Sage”. "I'm sure they're dead, but they look alive." His teacher says that these are bodies for the gardeners of the earth, for our creators, for aliens. And such bodies exist 365 days without one day. They can enter the astral body of an alien, come and explore the Earth if they need it, and so on. How true is this? If such bodies exist, how are they stored, how many times can they be used? Can Mead or you, LiShioni, enter such a body and come to us, to Irina? There is such a thing, no?

Irina: The bodies that were lying there, that were described there, were like bodies in a state of meditation, in your opinion, that is, merging with the Divine. But these were the bodies of people who were born by people. It was not made by aliens, but by humans. Their life threads were not interrupted. These were living bodies of living people.

Alina: Somati, you can say that, right?

Irina: Yes, but their life threads were not interrupted. As for the creators entering them. The owners of these bodies were also considered creators, much like your Angels and Archangels. That is, these are spiritual beings who have already reached a certain spiritual level in this life and who returned to their body, and so they arrived in the Divine world in contemplation, self-contemplation, nirvana. When they returned to the physical body, and they returned not just to

maintain this physical shell, but in order to bring this light, this knowledge that they received, to people. What was meant was not aliens, but the owners of the bodies themselves.

Alina: I see. That is, another Spirit cannot enter such bodies; they seemed to leave and enter.

Irina: Maybe. There are Spirits, there are us. We have courses. I came to you in an astral body. In these courses, special, additional knowledge is studied, the teaching of how to combine with the bodies of earthlings. This is not a literal entry, it is a combination of the field of the astral body with the field of the physical body in order to see through it, move through it, talk through it, but not all of us can do this with the contactee; the contactee must also be a perfect fit. I tried to do this. I didn't try it with Irina specifically, I tried it with other contactees, but I know Mirakh Count spoke through her.

Alina: Yes, I heard it too, there was a conversation with Maxim.

Irina: They passed it on through her because she gave permission. But MidgasCaus and I, we didn't conduct such experiments through it, it's just that it already receives and transmits information at a fairly high level. There is no need for us to combine with her body, since combining the physical body with the astral body of another entity always leads to energy distortions. The contactee will then need to recover. He may be tired, for example, he may have a headache, then he may feel exhausted for several days, because his own energy will be used to regenerate his etheric body.

Moreover, if the entity that inhabits the contactee is of higher vibration. This is especially true if the contactee and the curator were born on different planets, they have different body chemistry, and they have different vibrations. Therefore, compatibility may be for a few minutes, but the curator himself is restored after that, because he has become compatible with the body not of his own, but of an alien. It also then restores its life thread; it can then contract prematurely and return it to the body. There are such special techniques.

39:27 Irina's energy exchange, restoration of energy

consumption.

Alina: I see. Ira, can I ask you a question personally? Energetically, do you get tired often during the day? Do you also feel overwhelmed by so many people? For example, the lecture is now taking place, you have already worked the whole day. The fatigue is very strong at the end of the day, and you feel it all the time, and how quickly does it recover, and do your supervisors help you in recovery?

Irina: I feel great now. Yes, I received people on Skype, and then they came to me in person. There is no physical fatigue. Psychologically, it's not fatigue, it's like information overload. There is a lot of different information, a lot of different energies, with which, when you lead to the Higher Self, you come into contact with the energy of everyone, you can even feel it on Skype. Can you feel my energy now?

Alina: Right now, yes.

Irina: I sent it to you.

Alina: Yes.

Irina: What is she like?

Alina: Warm, so pleasant, it goes from top to bottom. After the forest, I very often feel, too, it seems to me, plasmoid civilizations, very strongly.

Irina: Therefore, when there is an exchange with people, it is an overload of information. This is not physical fatigue, but you want to be with yourself afterwards. Be with yourself, think. For me, the best relaxation is a walk, music, my favorite songs. Reading books is also relaxation for me, because you get other information. Communication with my friends and communication is also a very good relaxation for me if I answer questions on social media. networks, if I communicate, exchange information. If I, one might say, strain my brain on some other topic, it relieves me.

Alina: I understand.

Irina: The curators help me, they fill me with energy.

Alina: How often are they present with you, constantly?

Irina: No, not all the time, they come sometimes. That time we had a lesson at school, Meade came in. Hi, how are you? They even felt it. He began to approach them and asked how we were doing. Sometimes they come in. Even now LiScioni is standing, putting his fingers on my shoulders, filling me with energy, lowering his head, making such a serious face.

42:24 Communication between an alien curator and an earthly contactee.

Alina: She's worried, that's good. Does he come quickly, if, for example, you call him, does the curator appear instantly? How is it happening? I wanted to ask you about mental communication.

Irina: I can call through the Higher Self, but if he is busy, then he may not come. At the conference, we agree on a time in advance. He already knows and calculates how much time he has, and arrives in advance. Then he answers at conferences, or if you need to talk to a person. And sometimes they themselves come just to ask.

Alina: And you feel it right away?

Irina: Yes, when I work with a person. That time a man came to see me. Mid has arrived. How interesting! Present. Sometimes he looks at how I lead to the Higher Self, I tell the person, he is also interested.

Alina: I see.

43:22 Advantages of the incarnation of an intelligent Spirit on Earth.

Alina: Of course, this question has been asked many times. In general, how do they evaluate our planet itself? They like her, they like her. Yes I remember.

Irina: (LiShioni speaks) I personally have a very good attitude towards your world. You have a beautiful planet in the habitable zone of your star. It is filled with life, both physical and subtle. You don't have a corner where there is life in any form. Your Earth, it is called in many worlds “Planet of Life” in all its forms and manifestations. Being born on your planet is not imprisonment, as many people say. Birth on your planet is a huge trust of God, and a huge opportunity to be filled with this life and bring it to other worlds of the Galaxy.

Alina: In the future, maybe it will be like that. It’s a pity, of course, that such a beautiful planet, but people have so few opportunities. Very sorry. Firstly, that we live very little, and secondly, I thought about it, the conditions are harsh.

Irina: But now he says that the number of years lived is not just determined in the Spiritual World by how long the Spirit will live on this or that planet, in this or that type of body. Your emotional and mental life is so rich that over 50, 70, 80 years you experience a very rich inner life, which is several times larger than your physical life.

45:22 Maternal Love is help in adapting to the new world.

Alina: LiShioni, I have a personal question for you. Tell me, please, would you like to go to planet Earth in your next incarnation?

Irina: Yes, I would really like to go to planet Earth, especially if my mother is a woman like you.

Alina: Thank you. I hope I'm a good mom.

Irina: (He says) I look at you through the gaze of the contactee. You radiate such maternal energy that you always show care and love to hug children. He shows me.

Alina: Hugs and kisses, yes. I work with children. I work with patients in the morning, but I work mainly with children, with girls. I am a rhythmic gymnastics coach, I work with girls.

Irina: It's not like from a teacher to a student, it's like a mother's, he says. I would gladly trust you to adapt me to the earthly world.

Alina: Thank you very much.

46:41 Spiritual level of LiShioni.

Alina: LiShioni, from what spiritual level did you come?

Irina: I came from the twentieth.

Alina: And you, Ira, from the twenty-first?

Irina: Yes. Kirchiton came from the eighteenth.

Alina: I see. According to your calculations, they told me that I am from the thirteenth. But I don't know, should I have submitted my middle name or just my first and last name?

Irina: No. Thirteen is a wonderful level of esthete. Since childhood, you have felt the beauty of all forms of lines, colors, and beauty for you was of utmost importance as a reflection of Divine love in material things.

Alina: Beautifully said, thank you very much. Yes, I feel sensations. I really like music and art. Yes thanks a lot.

47:42 Lobsang Rampa about the incarnations of the Dalai Lamas.

Alina: I have one more question. In one of the books, Lobsang Rampa wrote that the 13th Dalai Lama is the face of God on Earth, and the 14th Dalai Lama is not the reincarnation of the 13th. My question then is, where is the Spirit of the thirteenth on Earth now, because in Tibet before death they convey where I will be reborn?

Irina: This was his personal opinion, which was based on his distrust of the 14th Dalai Lama, and this was not the opinion of the curator Lobsang Rampa, but the writer himself.

Henry, when he was not confirmed as a person by the 14th Dalai Lama, but journalists sent such requests to the 14th Dalai Lama about this person. I want to say that Henry in his country (he lived in Great Britain, they are showing me the island now), when he began to write these books, it happened at a fairly mature age, he already had a wife, he created excitement among the people around him. People started - journalists, scientists, they are showing me now, they started to find out who was writing this. And requests were also sent to Tibetan monks, letters were written there. Do they know him? Several of his books, or extracts from these books in English, reached the 14th Dalai Lama, and he knows English.

He read this and said that this is not a monk, has nothing to do with monks. But he meant that physically he is not a monk. He answered about the physical man. And Henry wanted to be confirmed. And then he wrote, not in the first book and not in the second, but in subsequent books, he already wrote that he was not a reincarnation. I will explain. They do not perceive Henry as Lobsang Rampa, they believe that this is his contactee.

Alina: I understand.

Irina: He wrote there on his own behalf. It happened that he signed the name Lobsang Rampa.

Alina: I see. I see, thank you very much. I roughly understood everything. Many questions have been voiced, a lot of interesting things. I am very glad to meet you, and I am very pleased that your project exists. I watch and don't miss any programs. I would like this

project to be all over the world. I would really like it to be translated into German. I think it will work out over time. Thanks a lot! I don't want to detain you, all the best to you.

Irina: Thank you very much, Alina! Thank you very much, LiShioni! I thank you, dear friends. Until next time.

June 10, 2021

Conference participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Alina – guest;

LiShioni is a representative of the planet Shimor, a specialist in the astral world and energetic interactions with the material world.

#287 Live broadcast. Questions from Telegram chat. Fulfillment of desires, source of abundance, belief in success.

https://blog.cassiopeia.center/voprosy-iz-chata-telegram-ispolnenie-zhelanij-isto

https://www.youtube.com/watch?v=aWGLa8uC7bs

00:06 About chat in Telegram.

Irina: Hello, dear friends!

Maxim: Friends, hello everyone! We're having a slight technical hitch. Probably against the backdrop of today's journey.

Irina: Maybe you have questions there?

Maxim: I have questions.

Irina: Great!

Maxim: Dear friends, we want to tell everyone that you can ask your questions in the Telegram chat, which we opened specifically so that you can ask all your questions.

Irina: Oh, they showed up.

Maxim: We select questions from the chat that have not been asked before and that we can answer. So I'll give you the link now. Now I'll give a short description of what this link is and where it leads. All questions from the live broadcast can be asked in the Telegram chat.

Irina: The chat has appeared. Hi all!

Maxim: We'll probably start with the introduction.

01:14 Presentation of conference participants.

Irina: Let's introduce ourselves who we are.

Maxim: Yes.

Irina: Hello, dear friends. My name is Irina Podzorova, I am a contactee with extraterrestrial civilizations. Today we have with us the curators of our project: MidgasCaus from the planet Esler, a biologist, psychologist, specialist in alien life forms, and LiShioni from the planet Shimor, a specialist in astral interactions.

01:45 Galactic news.

Irina: Traditionally, we will start with galactic news. MidgasCaus, what galactic news do we have?

(He says). I prepared specially. I was looking for news that might interest you. They relate to your planet. I want to tell you that the news is that today astral travelers from Earth visited the ship of Ashtar Sheran, which belongs to the Galactic Federation of Light, in order to see his ship and receive healing and harmonization in its specially designed rooms and spaces .

Ashtar reported this to the Galaxy News Center. And they have already learned about this that it was earthlings who are not conscious contactees who, for the first time in the last, maybe 200–300 years, visited his ship in such numbers in a short time.

Maxim: Congratulations!

Irina: This news included the impressions of members of the Ashtar team.

Maxim: I wonder what impressions the team members have of this?

Irina: I became aware of this news quite recently. There were impressions of the Ashtar crew, several members of its crew and other neighboring ships. They said that some interacted with earthlings for the first time, scanning the subtle bodies of those who came.

The result of this scan did not exactly please them, to put it mildly, because people have a lot of negative blocks (this is compared to them, they have been working with this since childhood). But this is not the most important thing. They also said that, judging by the scanning of the astral bodies of earthlings, the state of the physical body can also be read. Specialists from the Ashtar team said that judging by the scanning of the astral bodies of earthlings, the ecological situation on Earth leaves much to be desired, and what matters most for the environment is the quality of drinking water and air.

And now an order has been given to the planet Tikht, which is responsible for studying the environmental situation on Earth, to check on its ships, at its bases, the cleanliness, safety, and environmental friendliness of the water areas of large rivers in the territories of different countries. The last time this was done in the area was maybe 5 months ago, but now it's spring, early summer, something might have changed.

As a biologist, I got acquainted with the results of the latest scan of the quality of the earth's waters, and there was a slight excess in the number of microorganisms and petroleum product residues compared to what it was a year ago. It seems that people from those devices that run on petroleum products somehow end up in the rivers. Maybe they wash them and everything goes into rivers. Because of this excess, the eggs of many fish do not survive, the fry die, and the entire balance is upset. And there were also a lot of alkaline surfactants in the rivers, but this is understandable, because you are draining into water sources without purifying the water that is used in cities.

This is such a constant background, but the beneficial microflora also suffers from this, which means both the plants and the entire ecosystem. I also told Ashtar the data of my research, including on the diagnosis of earthlings. He included this in the work report. He said that he was waiting for everyone at the next meeting. Now they will prepare special devices to deactivate the vibration of these harmful substances.

Maxim: The next trip to the Ashtar ship to the health room will involve the decontamination of these harmful substances?

Irina: Yes, at a subtle level they will emit special radiation, which will be embedded in the astral body. And when the astral body returns, these special energy packages will enter the physical body along with the astral one and will deactivate the energy of these substances.

Maxim: Very interesting.

Irina: This neutralizes their influence.

Maxim: I probably won't control the process next time, I'll go with you. I feel like something needs to be deactivated.

Irina: Yes, let's go.

08:20 Neanderthals. Cro-Magnons.

Maxim: Very interesting questions for Mead: who created the Neanderthals? Why did Homo sapiens supplant them?

Irina: What you call Neanderthals, Cro-Magnons and some other types of ancient people, according to our research, are different tribes that lived at different times, in different territories. They differed only slightly in appearance.

They don't have a theory that some have supplanted others. It's just that one clan could pass into another.

Maxim: They started interbreeding, and did one family survive? Or what happened?

Irina: Those who were called Neanderthals, this, one might say, people or tribe, were shorter in stature, they had a slightly different skull structure than the Cro-Magnons. Cro-Magnons were a little taller and had thinner bones. And there was something in between these two species. They were spread across the Earth. The fact is that in our science there is no such thing as one species replacing another. There

are common descendants who now live here, but they no longer exist.

Maxim: That is. different tribes, and we are their common offspring.

Irina: Yes.

Maxim: Oh, interesting. I understand.

Irina: I see they write that Cro-Magnons killed Neanderthals. This idea is not biological in humans: some killed others to occupy this territory. But there were not only wars on Earth. There were certain tribal alliances, etc. We studied all this in the Interstellar Union database that we have, i.e. migration of peoples. You are a product of this mixing.

10:35 Striptease with aliens.

Maxim: We have a very interesting question in the chat from Artur Andrikov: do aliens practice striptease?

Irina: I'll give him the image now.

Maxim: Showing your naked body to excite your partner with dancing and music.

Irina: This can only excite if there is a lack of some internal images.

Maxim: This is Mead answering now from the planet Esler.

Irina: Yes. Esler men or women will be aroused not by the naked body, but by the mental image of only a loved one, a spouse, in other words. They have such physiology. LiShioni has several - it's different. They are more like us.

Maxim: Is there a striptease at Shimora?

Irina: No, we don’t have that, because we don’t require external stimuli. Since childhood, we are taught to imagine images well and fill them with volume. So we have no need for such a profession. It is not prohibited, but we don’t have anyone who would be able (women or men) to undress for this, because there is no such tradition, culture.

Maxim: Everything is clear.

12:27 Activation of fat metabolism in the human body.

Maxim: Mid, a question for you: what herbs are effective in treating obesity? Herbal decoctions, something. Is there anything to reduce body weight, specifically fat?

Irina: We need to look for the reason.

Maxim: First we need to determine the root cause, and then prescribe?

Irina: It happens in different ways. The first thing I can say is to check the functioning of the kidneys, liver, and pancreas. Fat cannot be retained in the body unless it first retains water. It's like the fat is stuck between the water.

Maxim: That is. It is impossible to say for sure which decoctions and herbs will help with obesity, because it is necessary to determine the root cause of obesity. Right?

Irina: Yes. This is metabolism, it is very individual for each person. To determine why a person accumulates fat, you need to determine the functioning of his kidneys, liver, pancreas, thyroid gland, etc.

And herbs, medicines or certain recommendations can only be given individually. I don't even know what to offer here. Only substances, plants that can activate fat metabolism. This is, naturally, broccoli, pineapple, garlic, ginger. They activate fat metabolism and accelerate

the removal of lipids and lipidoproteins from the body.

Maxim: Yes. I understand.

14:28 Books by Sergei Lazarev.

Maxim: Some personal question, Irina, for you: what is your relation to Lazarev's books "Diagnostics of Karma"? Have you read it?

Irina: I was about 16. I went to a bookstore. There I chose a book. And there was a book, I remember, we had such a small store, one single book by Sergei Lazarev, "Diagnostics of Karma," part 4. Everything else was taken apart. I bought it. I was interested in the name, how is it "diagnosis of karma"? How can I diagnose this karma?

I started reading it. The main meaning of it was clear to me that there are certain feelings that affect us and our parents, our children, and how to work with them in order to bring it all to the surface. Maybe because I was that age, it was a little boring to read. I'm talking about my impressions. I never read it again.

Maxim: Let me tell you.

Irina: Better yet, he read.

Maxim: His books are really wonderful. I personally recommend reading his first 12 books to absolutely everyone. Why? Because they really change consciousness, change attitudes. He's just a great contact person. We, of course, cannot say without his permission who he is in contact with, but as I understand it, he is in contact with both the subtle and spiritual world. You can read it a hundred pounds.

Irina: Maxim answered you better. I haven't read it.

Maxim: I read it completely. As a psychologist, I recommend it to you. And as an esotericist, as an energy practitioner, I also recommend it.

The books have helped so many people.

16:39 Speed of light.

Maxim: What is the speed of light really equal to according to their calculations?

Irina: The fact is that, according to the calculations of the Interstellar Union, the speed of light is not constant. She is changeable. It depends on the source that emits it, on the intensity of this flow and the surrounding space. What you calculated is the maximum speed of light in a vacuum is 300,000 km/sec.

Our calculations say that on the outskirts of the Galaxy and in intergalactic space the speed may be 150–170% higher. We have had such observations, but the speed of light is maybe somewhere around 300,000 km/sec. If there is interstellar gas or dust accumulation, it may be somewhat less there. This is the answer he gave.

17:55 Aging of the human body. Rejuvenation technique.

Maxim: They ask: what recipes for rejuvenation can Mead give?

Irina: I remember that there was such a conference.

Maxim: There was such a conference, right?

Irina: It was called “Secrets of Beauty,” I think it was called.

Maxim: That is. Should I watch the “Secrets of Beauty” conference? Or what was it called, don’t you remember?

Irina: The concept of “rejuvenation”, what is it? Change in hormonal status?

Maxim: Look better, more beautiful, feel more energetic. This is rejuvenation, one might say.

Irina: A person's body is a reflection of his Soul. How he feels will be reflected in his body. At that age. It happens that a person is young, but he has lived through many different events that have changed him. This makes him feel as if he has lived a lot.

It happens the other way around. A man has lived a lot, but he has such freshness of impressions and feelings that, as if he had recently been born, he feels younger than he is. He strives for new changes, travel, events, everything is interesting to him. He wants to know everything. The rate of aging depends on genetics and the metabolic rate.

Maxim : This is not interesting, you won't believe it. I need something like this, I take a pill and I'm instantly young! Is there such a thing?

Irina: Take a photograph of yourself as a child or as a teenager, where you like yourself. Place the most successful photo on your desk where you sit and look at it for 10–15 minutes a day. Remember all the features of your face, hair, lips, etc. In the evening before going to bed, close your eyes and imagine this image in front of you. Imagine that you are merging with him. It will be a charge of youthful energy.

Maxim: Thank you, Mid, this is very valuable advice.

Irina: Because your own image, which you will remember from the past, will connect with your body, and this will activate your metabolism.

Maxim: Thank you, Mid!

21:12 Processes in the Earth's core.

Maxim: What is happening to the core of our planet? Is it warming up or cooling down? What influences this?

Irina: Now the temperature of the planet's core is increasing according to the readings of measuring instruments at our bases and the bases of other representatives of the Interstellar Union. This process is influenced by many factors: solar activity, i.e. radiation from the Sun, and processes on Earth. The greenhouse effect of the atmosphere, for example, when carbon dioxide and methane accumulate and do not allow heat to escape, including from the core, and which it received from the Sun.

Geological processes that are caused by people themselves also have an impact. Drilling wells, extracting minerals, especially pumping into wells, for example, gas, which displaces these minerals upward from layers with any liquid minerals. The gas itself remains there and begins to expand the Earth's cavities. This causes minor tectonic shifts, and the magma that was below rises. This contributes to microearthquakes and movements. This also causes the core to expand.

Maxim: Now the temperature is rising. Does it happen that the temperature decreases? How long has it been growing?

Irina: According to our observations, it has been slowly increasing over the last 150 years.

Maxim: Thank you very much, Mid.

22:45 The Higher Self of the Earth. The Higher Selves of the countries of the Earth.

Maxim: An interesting question is asked by Lada Romanova: does a Higher Self exist among planets and countries?

Irina: What an interesting question.

Maxim: Yes, interesting. Does the planet have a Higher Self, for example? Or the country?

Irina: Who wants to communicate with the Higher Self of the Earth?

Maxim: Does the Earth have a Higher Self?

Irina: Whoever says: “Soul of the Earth”, “Mother Earth”, they are addressing a plasmoid creature that is responsible for the entire Earth. It observes and controls all plasmoids of earthly elements and natural places. This is their President, in your opinion. He gives them laws, watches over them, harmonizes them.

For the last approximately 4,000 years, the Earth's plasmoid has been more of a female form. This is a plasmoid of level 33 density. Her subtle body occupies a volume larger than the Earth. And it's not round, like a cloud. She feels the Earth as part of her, sees everything that happens there, can hug her with her hands, etc. She sees it all in energies. For example, when trees grow, she feels that it is she who is directing the force, and they grow from it.

It is to her that you all turn when you say: “Mother Earth,” when you say that the Earth is alive. She knows all the plasmoids because this density level 33 plasmoid has perfect memory, she can remember everything, save information that is stored in all your computers and libraries, and even much more. She will see and remember who is doing what.

The name of this plasmoid is Demeter. She is already more than 4,000 years old. Before this, the role of the Earth's plasmoid was performed by another creature, another entity. She disembodied. And for the last 4,000 years - Demeter.

Maxim: It turns out that the Soul of the Earth is changing? Plasmoids change, the Soul of the Earth changes, but the Earth remains? Is that how it works? Or how?

Irina: Yes, they change. How can a brownie change, for example. The one who performed the duties of a brownie, the Spirit of the house, can disincarnate and go into the Spiritual world to fulfill his tasks.

Maxim: And then I have a tricky question: who was before Demeter?

And **Rina:** Man, he's showing me now. His name can be found in our historical reference books, I just found out who the plasmoid is now.

Maxim: Could this somehow influence, for example, religious egregors, where the Father is the Son, the Father is God, the Father is the Holy Spirit?

Irina: They already write about Demeter. She was known in Ancient Greece.

Maxim: Unfortunately, I have not studied Ancient Greece.

Irina: Her Higher Self. The fact is that the 33rd density level, this particular civilization is approximately 87–88% embodied in its subtle body. Everything else constitutes her Higher Self, i.e. not an incarnate part of the Spirit.

As for the Higher Selves of other countries. Each country also has its own patron. And on a subtle level there is a patron, i.e. plasmoid, and also in the Spiritual World there is a patron. They cooperate. The patron of a country in the Spiritual World is usually an Angel of the 22nd, 23rd or 24th level. Most often on the 23rd, the Arhats do this.

Maxim: Guys, look, now YouTube will become pessimistic in the Russian Federation, and may freeze in some regions. Therefore, we have now prepared another platform. Most likely, we will switch to it in the near future. This is the case if YouTube will be glitchy in many Russian cities. You write that it freezes in the Tver region, this could be the case. Now YouTube is being removed from the territory of the Russian Federation. A technician told me this today.

29:17 Probability of nuclear war on Earth.

Maxim: Mead and LiSioni, here's a question: what is the percentage of probability of a nuclear war on Earth?

Irina: My personal opinion?

Maxim: Personal.

Irina: Or whose?

Maxim: Personal, of course.

Irina: Or the politicians of the Interstellar Union? I'm just getting acquainted.

Maxim: Give me your personal opinion and the politicians of the Interstellar Union.

Irina: Over what period of time?

Maxim: The next 10 years.

Irina: For the next 10 years, politicians have calculated the possibility of a global, but not a nuclear war itself, but its beginning until the Interstellar Union intervenes.

Maxim: Yes.

Irina: Somewhere around 15-17%.

Maxim: What is your personal opinion?

Irina: I think no more than 10%. Precisely nuclear war.

Maxim: Yes.

30:05 How to strengthen financial flow? Unselfishness. Reasons for blocking financial flow.

Maxim: Lyuba Smirnova writes: “Hello, how to attract luck into life, how to make your dream come true?” Now, we teach people, we teach them, but the question is actually simple.

Irina: Now I’ll explain to them first. A dream is not reality for her, because reality for her is only in the material world. They just have slightly different ideas.

Maxim: Yes.

Irina: They have a mental reality.

Maxim: Mental reality is also reality. Your dream is a mental reality.

Irina: Why is a dream not a reality for her?

Maxim: Because people are used to touching something with their own hands and seeing it with their own eyes. They don't believe in the reality of thought.

Irina: Why do you think that when you feel an object, it is more real than your thoughts? Do you know what the object consists of? It consists of a structure in which 1% are atoms and 99% are voids between them. So, essentially, you are probing the void. And you say, "Is she real?"

Maxim: Okay, LiSioni, I suppose I understand this. But many people don't understand. They just want to attract good luck. Become happier in life. How can they do this?

Irina: Luck is your faith in yourself and in your Light of love. This is your trust in space, God, the world around you. If you dream about something and want your mental reality to become your material

reality, then do everything that depends on you to realize this reality, but at the same time trust your mentors, God, yourself. If it is useful for you, for your spiritual development, for your life, for your happiness and love, then it will definitely come into your life. It's important to believe in this. When you believe in the favorable success of a business, you increase the likelihood of its implementation by 80%.

Maxim: Mid, you know, we've never done this before. Now I want to ask you live. We earthlings are very material. Indeed, sometimes we need something so material. Do you think there is some kind of ritual for attracting money to attract a financial egregor? To open financial flows? Are there any special rituals for the full moon, or for something else? And how do you generally open and attract a financial egregor?

This is such a tricky question from me, because everyone accuses me of being engaged in commercial activities, of taking money from someone. And I want you to tell people how easy it is to attract financial flows to yourself.

Irina: So it is open to everyone at birth, that egregor to which you all join.

Maxim: Yes. How to strengthen it?

Irina: Understand what he controls and what a financial egregor is in general. What is finance, do you mean all funds?

Maxim: Yes.

Irina: In all forms? And all the property, as I understand it?

Maxim: Yes.

Irina: This is the material form of Divine energy. I told you that your Russian word “rich” has a deep meaning - “one who lives in God.” It was like this initially. By God, in God.

To strengthen your financial flow, you need to understand that this energy should be directed towards spiritual goals. To what spiritual goals should it be directed? Understand for what purposes. Not just for the purchase and distribution of religious literature, this is too small a goal, it is not the goal itself, but a means of expressing it. How to set a goal?

Maxim: Can you imagine? I have now made sure that people are given information about what a financial egregor is and how to attract it to yourself. And this message: “Max, you’re sick of your greed for money.” Can you imagine? I decided to take care of people, and still there were people who didn’t like it.

Guys, I'm not interested in money at all. Money is just a means to achieve certain goals. Any money you help our project will be used to build centers around the world. To receive people, to train them in the knowledge that you receive in the project almost free of charge. Thank the project yourself and decide how much this knowledge is worth to you.

Irina: Svetlana, please tell me, for you, the question of how to strengthen the financial egregor is the only sign of greed? This is not my question, but Mida's.

Maxim: So, guys, if you think that I’m somehow doing something wrong, I’m the project manager, I have a phone number, an email. You can write to me.

Irina: As if all the rich people on the planet think about spiritual goals. That's not what Mead said now. He simply said where this word originally came from. He asked: “How to increase financial flow?” In fact, this is a question for a lot of people. And many of those who watch us are very interested in this. I know it.

To strengthen your financial flow, you must again trust God, all your finances, all your flows, recognize that this is the property of God, and you are a temporary manager. Why did you come into this world? In order to develop and help others develop. What to develop? Spirit, Light, love, knowledge, everything positive and bringing joy,

happiness, harmony, if you bring it and do it selflessly.

What is “selfless”? This does not mean “don’t take money.” You earthlings have lost the word “selflessness” for the last 50 years. Selflessness is an internal state of understanding that you already have everything.

If this state exists, if you are completely satisfied and happy with the amount of money and property that you have, ideas and thoughts will come to your mind on how to increase your wealth. Because if a person is not satisfied with something in his life, with some level of income, with some certain circumstances, then the reason is in him.

Why doesn't he see a way to increase this wealth? There are blocks in him that prevent him from realizing this. Fears, various blocks that limit his beliefs on the mental plane. It happens that there are no astral and mental blocks, a person has some small income, then he will be completely satisfied with it. And if he wants to earn more, but he doesn’t succeed, again he must go inside himself, to the Higher Self, and ask.

It often happens that there are ways to increase his wealth, but his mentors, the Higher Self, block these paths for him because they see what will happen to him next. He will simply lower his vibrations. And sometimes it will lower the vibrations of those around you if you give him, for example, 10 times more than he has now. And then this money, these finances, which, by the way, were produced by other people in the Light of God, can go to his harm.

Maxim: Thank you very much for the lecture on financial egregor.

Very often you ask: “How to rejuvenate?”, “How to overcome some restrictions after coronavirus?” I’ll tell you frankly, we have opened a Wellness Center, which has the latest equipment for testing the body, which is not available anywhere else.

We are not a medical institution, we do not diagnose, we do testing. Due to magnetic resonance fields and frequencies, we detect any

viruses, infections, diseases and much more. Plus, our Wellness Center has the latest magnetic resonance equipment, we call it the “Rejuvenating Light Chamber,” where magnetic frequencies are formed in which you find yourself, and the whole body begins to rejuvenate. Certain hormones are released and the immune system begins to work.

Call the Wellness Center, make an appointment, come, just take a look. I’m not begging you in any way, we don’t have a problem with people who come to us. But we can answer all the questions you ask about rejuvenation, health, testing your health, and determining the cause at the physical level of your problems in our Wellness Center. We have great specialists and very interesting equipment. So come, we will be glad to see you.

41:16 Oligarchs. Life's tasks.

Irina: One more question: how did the oligarchs become like this? What are they, super spiritual? Really, why is everything like this?

I'll answer you now. How do you know the program, the life goals of these people? Why did they incarnate? Why did they choose this particular family? Why did they choose this particular environment? Why do they need money and these tasks? How do they resolve their internal issues when incarnated? Have you studied their life? Have you spoken to their Higher Self? I think no.

Maxim: Yes, there are different tasks for the embodiment of the Spirit. Many Spirits take the lesson with big money. There are also such tasks. This does not mean that you are worse or someone is better. Your tasks are just a little different.

Irina: Yes, there may be tasks for someone who was born in a poor family, for someone who was born in a rich family, in a family of rulers. All these Souls have the same divine nature, but they have different tasks for incarnation to work with themselves, to work with this world.

Any Spirit may fail to fulfill its tasks. And the one who was born into a

poor family, and the one who was born into a family of oligarchs. Both of them may fail to comply and take the path of degradation, thereby lowering their spiritual level. And, accordingly, after incarnation he will fall to this lower level. And he will see his whole life, how he lived it, what he spent it on.

42:48 Astral practices. Health improvement. Practices with the Interstellar Union.

Maxim: Irin, but on Sunday, at 14:00, will we conduct only astral practices with the Interstellar Union or will there be some other practices? Because they ask me, for example: “Give me practice to improve my memory.” Can we carry out not only the astral practices of going to Ashtar on Sunday, but somehow alternate them with some other practices?

Irina: Mead was also present with us. By the way, I thank you all, dear friends, for participating in the Ashtar project. Today was a very good trip.

Maxim: Yes, today was just an unreal journey. I got wet twice, turned gray three times. I haven't seen such an astral party for a long time.

Irina: Everyone has gathered.

Maxim: Who goes where. Some to space, some to Ashtar, some to our home here.

Irina: They came here too.

Maxim: Yes.

Irina: Some.

Maxim: I’ve definitely never seen anything like this before. Because I also saw phantoms of our interstellar friends who tried to harmonize

and supervise the astral bodies of people who came. It was actually very interesting.

Irina: Very informative. Very good flight. I read in the Telegram chat what was written quite recently: your impressions, how you were scanned, how you were treated.

Maxim: They didn't treat me, they made me healthy.

Irina: Yes. They made you healthier. That's what they wrote, I remember these messages. This is how people perceived this work with them. MidgasCaus was with us. And LiShioni flew with us to Ashtar.

"When will you, Irina and Maxim, read the Bible?" We read the Bible. You can ask us any question about the Bible. If we cannot answer, our curators will answer. We always enjoy reading it. The Bible is an esoteric book; there are many esoteric truths there.

I wanted to say what Mead says about other practices. Many people who came out felt the Light, relaxation, but did not see flight, etc.

I noticed that many people on Earth have absolutely no skill in physical relaxation. I could recommend combining the practice of relaxing the body: either do it at another time, or do it with Ashtar on Sunday, or spend about 40 minutes to an hour on some other day, with me or with LiShioni. Simply direct the Light to different areas of the body. Be filled with Light and feel how tension differs from relaxation, so that you can then quickly enter this state. Do you think it's a good idea?

Maxim: Yes. I'll think about where to insert this practice.

Irina: New practice. They recommended the name "autogenic training". Only autogenic training was more psychological. But I think that many of the viewers will be pleased to spend this not with an electronic voice on a computer, but with Irina.

Maxim: Okay. I understand. I'm actually quitting sleeping, now I'll think about where else to add a new practice.

Irina : Or do you want one week with Ashtar, and the other - relaxation?

Maxim: I'll take a look and think about it.

Irina: You will need to lie down and relax.

Maxim: Yes. Maybe we are already too carried away by too many practices, and people don't need so many practices.

Irina: Let's take a vote.

Maxim: Voting? We will hold a vote in the VK on whether there will be a new practice.

Irina: Survey.

Maxim: We have a chat. I'll throw it off now.

Irina: They write: "Great idea."

Maxim: Now I'll send this chat here. It's called "Practices with the Interstellar Union." I'll post it here live.

Irina: "Excellent," "You can't have too much practice," "You can't spoil porridge with butter."

Maxim: In fact, I already have some kind of practice every day. I have been without days off for a very long time now. Somehow all this needs to be regulated. So I found "Practices of the Interstellar Union", now I'll insert them here. Everything needs to be in the chat right away.

Here they are.

Irina: “Phone number and address of the clinic.”

Maxim: We do not have a clinic, we are not a medical institution.

Irina: We are not a clinic.

Maxim: Guys, this is a Wellness Center. These are two different things. We have no medicine, no pills. There is only interesting equipment with which we can take measurements, test and use the same equipment to improve health. We are not a medical center, not a medical facility. You should understand right away. Go to the website “https://cassiopeia.center”, find the phone number of the Wellness Center there, call the administrator. He will tell you everything, discuss everything with you.

“Send donations and there will be contact.” There will be contact without donations, don’t worry. If someone is focused on donations, these are your personal difficulties. We do not force anyone to send these donations. Do you want to help our project, our centers, and those people who will continue to use our project, our Center.

Irina: By the way, about donations. I express my personal gratitude to you for your help and material, spiritual, and moral support for our project. I would like to remind you that this project is not only ours with Maxim or the Interstellar Union, but it is also for each of you. Anyone who puts their energy into it, in any form, not only material, is already participating in the creation of this egregor. By the way, completely new on planet Earth.

Maxim: Why do I ask such stupid questions? Because there is a chat on Telegram, I’ll send it to you again, where you ask these questions. I don't ask any personal questions. In this Telegram chat you can ask questions during live broadcasts.

Guys, thank you all very much! Thank you so much for your support! This summer I begin construction of a large Center. I am sure that we

will meet with tents, maybe even in the fall, if everything works out for us. And I'm waiting for everyone at the Baikal retreat. I won't intrigue you now, but the program there will be very interesting and bombastic. I won't even say who will come to us there, who will fly to us there, and what practices we will engage in there. You will know all this when you get there. I am sure that you will really like it, so I look forward to seeing you all at the Baikal retreat.

Think what you want about me. I repeated a thousand times: my task is to come out of this incarnation, look at this planet from above and say: "Did we really do this?" This is my task. And what you came up with for yourself (someone doesn't have enough money, or something else), guys, work with your internal difficulties.

I love you all, I adore you, no matter what you write about me and not only about me every time, some kind of nonsense. Honestly, I love them all. See you again, guys!

Irina: See you again!

Broadcast June 13, 2021

Participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

MidgasKaus - representative of the planet Esler, biologist, psychologist, specialist in alien life forms;

LiShioni is a representative of the planet Shimor, a specialist in the astral world and its interactions with the material world.

Video in text

April 24, 2023

#288 Myths of Ancient Greece and Rome. History of mythology. Who were the ancient Greek gods? The Legend of Cassiopeia.

https://blog.cassiopeia.center/mify-drevnej-grecii-i-rima-istoriya-mifologii

https://www.youtube.com/watch?v=hcXhg8TLGtI

00:21 Presentation of conference participants.

Irina: Hello, dear friends! My name is Irina Podzorova, I am a contactee with extraterrestrial civilizations. Today we have with us a representative of the planet Burkhad, who is more than 7000 years old, his name is Charaxes. This is his first time at our Cassiopeia conference. And also my curator - MidgasKaus, from the planet Esler, biologist, psychologist and specialist in alien life forms.

On his planet, Haraxes plays the role of a teacher of the history of space and space bases. Because his task of incarnation is connected with his long residence on Burkhad; he talks about the history of this planet, as a witness to many events, to new generations.

Maria: Hello, dear friends! My name is Maria. I am very glad to welcome all our guests and Ira. Our conference today is dedicated to the pantheon of Greek and Roman gods.

As we already know from our interstellar friends, the Greek gods and

their analogues in Roman mythology appeared due to the interactions of the earthly peoples of that time with aliens, with plasmoid civilizations and due to the deification of earthly heroes. Sometimes these were children of mixed marriages from earthlings and aliens, as well as priests.

And today we would like to find out from our interstellar friends who was really behind all these famous gods and events from myths.

02:09 Differences between Greek and Roman gods.

Maria: My first question: were there always the same personalities of gods in Greek and Roman mythology? As we know, the Romans adopted some of the main deities from Greek mythology.

Irina: The fact is that often the very concept of “god” was a collective element of different entities that were somewhat similar to each other. But even in the case when the Greek god denoted an individual person, often in Roman culture, which came to replace the Greek one on Earth, someone else or some additional meaning was included in this name. But it also happened that the basic meaning remained. In any case, they worshiped him according to their own ritual.

Maria: Thank you!

03:10 The concept of Chaos. Cycles of the Universe. Uranus. Gaia. 12 titans.

Maria: The myth about the origin of the Greek gods begins with the most ancient god of the sky, Uranus (in Roman mythology, Caelum), who, together with the Earth goddess Gaia, gave birth to 12 titans. Tell me, please, who were meant by these 12 titans?

Irina: First, I will tell you who was meant by Uranus and Gaia, and where they came from.

The fact is that according to Greek sources, which described the whole

world from a spiritual point of view, the world emerged from the so-called Chaos. Chaos only later acquired the meaning of a disordered, inharmonious mass of something. Initially, Chaos had the meaning of unmanifested matter in the Spiritual world, i.e. unmanifest state of matter.

As we remember, the Universe goes through cycles of material existence outside of material phases, outside of time, as you call it, outside of the destruction of the Universe. But this is not destruction, but the return of all matter to the Spiritual world by increasing its vibrations gradually through subtle material planes and in the Spiritual world. Then this cycle repeats. According to the scientists of the Interstellar Union, who in turn received them from the Spiritual World, the number of such cycles is incalculable. It shows me a lot of zeros. That's what it's called – the cyclical time course of the Universe.

Chaos is a state of unmanifested matter in the Spiritual world. Simply put, that part of the spiritual energy that will then be used to create the material world, atoms and all things consisting of atoms.

When we read that "Chaos gave birth," "gave birth" is more of a myth for the people. For priests and philosophers this was the word "gave birth", was the cause. Those. this part of the Spiritual World, which was called Chaos, became manifested into Uranus, into Gaia, etc., into beings who then gave birth to all the others.

But these beings were called beings only in the understanding of people, as images. In fact, in reality, this meant certain clumps of matter, which were then transformed into certain celestial bodies by plasmoid civilizations. For example, Uranus was the name given to that part of the Chaos energy that went into the creation of almost all the stars, all the Galaxies, and the entire visible sky. Therefore, the god of the sky began to be called Uranus. One might say the Firmament of Heaven. Accordingly, Gaia is the part that gave birth to the Earth and all its civilizations, including plasmoid ones.

In the drawings of the ancient books of the priests who lived even before the modern Greeks, before those peoples who came to the place that is now called Greece (and there were books and drawings there too), there was a drawing: Uranus in the form of a man embraces

the Earth in the form of a girl.

This was a natural consequence of the fertility cult, which depended on magical rituals that increased the fertility of the earth through the energy of human life released at the time of sexual intercourse. This drawing also indicated that the Firmament embraces the Earth, which at that time was considered not a planet, but a large living creature on whose body all people live. And she - the goddess - is in the arms of the sky. People watched as the firmament, as if with its arms, embraced the Earth.

Accordingly, rain was considered an act of a man-Heaven and a woman-Earth, from which fruits then grow. I understood what raindrops were considered to be. This is what was written in ancient treatises.

Maria: An allegorical comparison, you might say, right?

Irina: Yes, Heaven fertilizes the Earth with rain. The sun was considered the heart of Heaven and at the same time the heart of the Earth, which simultaneously burns with the fires of love and desires. During the day, during daylight hours, it was visible in the sky. These were the feelings of Uranus.

And at night it was not believed that the Earth rotated. She was considered a ball, a kind of living creature, and when the Sun goes beyond the horizon, it goes into the Earth itself and passes inside it. And this is the heart of dense love, when the Earth also showed its feeling for Heaven, just like Heaven during the day.

Many have found evidence of this that water and Earth become warmer at night than during the day. This is the heat of the love of Earth-Gaia for Uranus. In fact, now we already know that the Earth and water give off the heat accumulated during the day, and at night it rises and evaporates. The ancients noticed this too.

Accordingly, night and day were personified by living beings. They had certain names, they gave birth to their children at night - stars. Such were the myths.

12 titans - 6 men and 6 women were generated by Earth and Heaven. They denoted certain forces of nature, which were either from Heaven or from Earth, and were responsible for the ocean, mountains, and the Sun. This is, in your opinion, a collection of plasmoid civilizations. The solar disk was designated by one generic name.

13:34 Kronos (Saturn).

Maria: Tell me, please, who did the Titan Kronos or Saturn stand for in Roman mythology?

Irina: Kronos stood for a number of plasmoid civilizations, later he became the god of time. Previously, he was the god of space who divided him. According to your terminology, these were those plasmoid civilizations that live in the atmosphere, in the space between spaces. Subtle civilizations.

The closest contactees known to Irina will be the Kryon analogy. They control not atmospheric phenomena, but the interaction of different celestial bodies. Since the celestial bodies rotate against each other, and rotation has always been a sign of time, he became the God of time. That was the analogy.

I do not emphasize that Kryon is Kronos. There were a lot of them there. They are on Venus, and on Jupiter, and on Saturn, and on the Sun, and on the Earth itself. Accordingly, these are the plasmoids that were responsible for the interactions of different energy fields of the planets with each other.

15:15 Rhea.

Maria: And his sister Rhea?

Irina : The fact is that the Titanide women did not have a separate function. It was a specific part of the plasmoid civilization that gave birth to something else. I understand what you are asking, that she gave birth to Zeus, etc. There will then be a question about the battle with the titans. I'll explain why later. These are the forces of nature of

the plasmoid civilization, which were responsible for different spheres of visible nature.

Maria: I see. Thus, the process of compaction of matter from the Spiritual into the plasmoid worlds has been described, and now we are obviously approaching the stage of compaction on the physical plane.

16:29 The meaning of the myth about Kronos and his children.

Maria: Further in mythology it is described that one of the sons of the titan Kronos-Saturn overthrows his father, the lord of the heavens, Uranus. With the help of his mother Gaia-Earth. And, by the way, he, in turn, was also predicted that one of his children would overthrow him too. Therefore, he swallowed all his children from his wife and from his sister Rhea, until she hid one of her children - Zeus, who indeed, in turn, overthrew him. Is there a specific allegory hidden behind this scripture?

Irina: Yes. This allegory is no longer associated with the birth of the material world. This is different. The titans are most likely associated with the birth of the material world. And their overthrow of each other and the absorption of their children is some other allegory.

I will tell you the meaning of this myth. Uranus, i.e. Nebo (in Greek it was called Ouranos) was very prolific. Just a few drops of his blood or seminal fluid could give birth to many children. All this, naturally, came from observing rain in ancient times. When I say "in ancient times" I mean before the war 12,000 years ago. At that time it was not yet called Uranus, but in any case, many pre-war tribes believed that the marriage of Heaven and Earth gives birth to fruits. This was a very widespread belief on Earth in all parts of a single continent. The thing is that after the war 12,000 years ago, when these tribes began to be born again, to fill themselves with meaning, telling myths, talking about the past, they naturally intertwined with the story of the war.

It so happens that in myth Uranus is endlessly fertile. When he gave birth to his children, he was afraid that they would overthrow him and take his place. But he could not not give birth to them. It was his nature to connect with Gaia and give birth, and at the same time be afraid. Do

you see what human emotions are described in Heaven and Earth? Now I will explain why.

According to myths, after his children were born, Uranus placed them back into his wife's womb. Expressions that send a person back to the female genital organ come from there. Those. he placed back into the womb of his wife his children, whom he himself had fathered. This caused Gaia and her children to suffer. Because one was overcrowded with children, and the second did not receive the opportunity of life. That is why Gaia supported Kronos to overthrow her husband.

So where did this myth come from? The thing is that when people began to live on Earth after the war, they perceived the sky itself as the place of residence of the Heavenly Father, not plasmoids, but specifically the Heavenly Father. And since life was hard for them after the war, they often died, they returned to the primitive level. The climate changed, there were many disasters, earthquakes continued, etc., people often lowered their vibrations, condemning this world.

Together with the low-vibration plasmoids that came into contact with them, people had some idea that God was giving birth to a free Spirit. They remembered this in their subconscious from their Higher Self. But because of envy of this free Spirit, God places it in the so-called “evil matter”. Doesn't this sound like the myth I'm telling?

Maria: Yes, it reminds me. Something has already happened in our history.

Irina: Does the myth I told remind you of Uranus and Gaia? Those. this myth is the perception of a group of priests who wrote it down and passed it on to their children. There was such a perception of the Spirit that their father gave birth to them, but he threw them down to Earth, placed them in matter, in physical bodies.

Why was it written “into the womb”? Because this idea is intertwined with the fact that the Earth is a mother. And the Earth was a symbol of matter. This became intertwined in their minds that the Earth is the mother of Gaia, a symbol of matter in general. And so they managed to be returned to the womb. It’s as if they were born, and their father

returns them.

From here came the ideas of the Orphics and some Pythagoreans, and the Gnostics, of course, much later, that the Earth is a place of punishment, and the body is a prison for the Soul. These are ideas not only among plasmoids; many people who are in a state of despondency, fear, and condemnation have such ideas. Even without the influence of plasmoid civilizations, they are attracted to such thoughts. Has the origin of this myth become a little clearer?

Maria: Of course. Everything fits in and becomes clear on the material plane.

25:12 Pelasgians. Titanomachy War. Olympus.

Maria : Tell me, please, what is the Titanomachy war connected with?

Irina : Yes, we are moving on to war.

Maria: What is it connected with?

Irina: These ancient titans, ancient gods, were deified by the ancestors of those people who were not yet Greeks, but the so-called Pelasgians. Those. group to the Greek tribes who lived for a long time on the territory of Greece. And only about 3000-3500 Earth years ago, the Greeks, who came from the north and worshiped Zeus and all the other Greek gods, came to the territory of the Pelasgians. They perceived the Pelasgians as foreigners who worshiped the forces of the elements of nature.

Therefore, the Titanomachy, which is designated as the war of the gods, actually meant the war not of the gods, but of two tribes of people. In ancient times, it was believed that when two tribes wage war, the tribe whose god is stronger wins. They understood everything magically and corresponded to what was better than that god.

And this often happened among various ancient peoples, when one

tribe defeated another in a war, captured their city, broke into the temple where the gods of the hostile people were in the form of idols, and began to mock. They began to show these gods, considering them to really exist, that they had lost and were minor gods. Sometimes they were even told that they would receive no more sacrifices because they could not win. This was their idea that they were fighting not only with the people, but also with their gods.

Moreover, the ancients had a very widespread idea that when a warrior fights with a certain weapon, God inhabits him and through his hands also fights. Therefore, the victory of one people over another was described in the form of a victory of some gods over others.

Maria: I see. Thank you! Very good explanation. Thus, according to Greek mythology, Olympus and a council of 12 gods appeared: 6 men and 6 women.

Irina: The Greeks already had it. The fact that the titans gave birth to Zeus only meant that the elemental forces of nature, plasmoid civilizations gave birth to humanoid ones: the earthlings themselves, and other humanoids, etc.

But why did they fight each other? Because these two peoples, who revered humanoids from alien bases and the elemental forces of nature, the so-called titans, collided.

But the representatives of Tumesout who came into contact with those peoples who worshiped these titans were also called titans. You need to have imaginative thinking in order to understand the history of the Earth, its people, spiritual history, spiritual quests in order to understand who we are talking about.

Maria: Yes, this is important. With your help, we are now figuring this out.

29:53 Zeus.

Maria: Thus, after the Titanomachy, these gods came to power, as we

now learn, obviously of humanoid origin, and settled on Olympus. One of the most important gods was Zeus or Jupiter, the supreme god. We are very interested to know who is behind this image.

Irina: The Titanomachy occurred later than even the prototype of this god lived on Earth. Nations came who revered him.

Maria: So we are talking about the fact that in the understanding of those peoples who composed these myths, they came to power. Naturally, they existed.

Irina: The prototype of Zeus or Jupiter was a representative of the planet Burkhad, who later founded a colony on the planet Futissa in the Pleiades. His name was Cephastis. He really existed. He had one of his bases on Earth under a mountain just in the area of modern Olympus. There was not just one mountain, but a mountainous region.

Olympus is a high mountain that towers above others. He lived on Earth approximately 5-6 thousand years ago. He flew to Earth, taught people about peace, how to govern states correctly, came into contact with them, etc. And people perceived that he flew in the area where Olympus is. That's why the Olympian gods were there. Much later, when the Greeks went south to the territory of modern Greece, they brought with them legends about Zeus, that living within them, he defeated these titans.

Maria: Thank you! Very interesting.

32:43 Wives of Zeus. Daughter of Zeus - Athena.

Maria: Further, according to mythology, it is said that Zeus had three wives: Metis, Themis and Hera.

Metis, the goddess of wisdom, who was his relative, helped Zeus free his older brothers and sisters from the womb of his father Kronos. And she predicted to Zeus that she would give birth to a son who would surpass him. When she became pregnant, Zeus lulled her with gentle speeches and swallowed her. After this, after some time, a girl was

born from his head - the daughter Athena, who combined the wisdom of her father and mother. What lies behind this legend?

Irina : Firstly, Cephastis had one wife. She flew to him on Earth 6 times on different ships, in different clothes. She could fly to him in a few hundred years, when another generation changed. Therefore, she could well have been called by a different name. They saw that he was with her, flying in to make contact.

About the birth of Athena. “Swallowed”, that’s of course...

Maria: We understand that there are a lot of figurative descriptions.

Irina: If it is written that someone swallowed or ate someone, it was said that he began to dominate. Those. his energy completely absorbed someone else's. This means that if this woman was swallowed by Zeus, it means that she completely devoted her life to him.

I told you a fairy tale about a kolobok, how a fox swallowed it. It is very interesting that it was a domestic plasmoid that was swallowed by a fox. That doesn't mean she actually swallowed it. This means that the fox was a symbol of the forest (even the words are similar). This means that he joined the forest plasmoids, abandoned his grandparents (his contactees), and joined, i.e. they consumed him, his life.

Also Zeus. His affairs consumed the life of his wife Hera. In the Picran language her name was Agoranias.

Maria: In tune with Hero, one might say.

Irina: It starts with “a”. Agoranias.

It’s not that he gave birth to a daughter out of his head, it’s a symbol that he genetically passed on his mind to this child (and he actually had several children, including a daughter). You would say in Russian

that he passed on to her genetically his magnificent mind, his brain's tendency to think. And he not only gave birth, but also raised him. When raising her, he invested in her the ability for wisdom, etc.

Maria : This means that she, too, along with her father and mother, was on Earth at the Pikran base.

Irina : She was born on Pikran. But sometimes she also flew with her mother to him on Earth. And he flew there to them.

Maria: Very interesting. Everything is becoming clearer.

37:42 Poseidon (Neptune).

Maria: Now we are interested in learning about other gods. For example, Poseidon (Neptune), god of the seas and earthquakes. Who is behind him?

Irina : Behind Poseidon, naturally, lies the head of all plasmoids of water, water spaces. This is some kind of plasmoid creature. The brother of Zeus is called a spiritual brother.

Maria: I see.

38:21 Hephaestus (Vulcan).

Maria: Who was Hephaestus (Vulcan) - the god of fire and blacksmithing?

Irina : It was just a deified person. As is known, blacksmiths were often initiated into the ancient rituals of communicating with fire plasmoids. They came into contact with them and, thanks to this, they told them how to make more convenient and durable products. Blacksmiths were a fairly wealthy class.

They have always enjoyed well-deserved fame, then they said “magicians”, now we say “contactors” with plasmoid civilizations. And one of them, who communicated personally with Zeus and with the plasmoids of fire, and often visited Olympus, i.e. at the base, he was a contactee. And it was this man who was later deified.

39:29 Apollo.

Maria : Who did Apollo, the Sun God and patron of the arts, represent?

Irina: Apollo was also a person, a contactee. The fact is that at that time the son of the god Zeus was not necessarily a physical son. He was simply his patron, including all people. Apollo was also a man, like a priest, like a poet.

Maria : That is. earthling, earthly origin. Not an alien.

Irina: He is not an alien.

40:21 Hermes (Mercury).

Maria: And Hermes or Mercury, the god of trade and dexterity?

Irina : Hermes was an alien, but not from Burkhad. This was a representative of one of the civilizations of Lyra. At that time they flew to Earth, and they had their bases here. Modern researchers of myths believe that this is rather a collective image of some intermediaries between gods and people.

Maria : Can we say priests who were intermediaries between plasmoid civilizations?

Irina: Yes. The fact that Hermes flew on certain shoes with wings (this is similar to the image of an Angel who has wings) only indicates that he had the ability to fly. And some details of the myths indicate that it

was a real alien, at least initially.

Maria: Interesting.

41:38 Ares (Mars).

Maria: Who was Ares or Mars, the god of war?

Irina: Ares was the defender of the Earth in battle. There are many reasons to believe that this was one of the names of Ashtar.

Maria: Very interesting. I can even imagine very much. It's very possible that Ashtar has done as much to protect our planet, our civilization.

Irina: Interesting, right?

42:23 Gera (Juno).

Maria: Who was Hera or Juno, the third wife of Zeus and the queen of the gods, as she was considered? Was it the pickrank that came?

Irina : Yes, she was his only wife, bore him children and, accordingly, flew to Earth.

Maria : Over the many millennia that he flew and worked on Earth, ideas changed from generation to generation.

43:01 Demeter (Ceres).

Maria : Tell me, please, who is behind Demeter or Ceres, the goddess of fields and fertility?

Irina: Many temples, priests, and many rituals were dedicated to

Demeter. After all, this is a group of plasmoid civilizations on Earth. Approximately like Gaia, another name for it, but which was more associated with spring fertility and blossoming. People called on her so that spring would come faster, so that it would be warmer.

43:57 Aphrodite (Venus).

Maria: And who did the famous Aphrodite or Venus, the goddess of love and beauty represent?

Irina : Aphrodite, just like Athena, is also one of the daughters of Zeus.

Maria: How interesting. That is, they all flew to Earth and somehow worked and communicated with the population?

Irina: Yes, they later flew to Earth, when Cephastis was no longer there, he flew away. They flew in and talked to people. Moreover, Aphrodite lived on Disaru for a long time. This, we believe, was the reason why they called it by the Roman name “Venus” - the planet that was the ancestral home of Disaru.

Maria: Yes. This is where it all comes together. True.

45:06 Gestia (Vesta).

Maria: Tell me, please, who was Hestia or Vesta in Roman mythology, this young goddess of the family hearth and sacrificial fire, the eldest daughter of Kronos?

Irina: We believe that it was one of the priestesses, perhaps of some god. Maybe even Kronos himself. He also had temples and priests.

45:34 Artemis (Diana).

Maria: Who was Artemis (Diana), goddess of the hunt?

Irina: He is now showing me a tribe that lived in the southwest of Greece. There were many girls-hunters and warriors in this tribe. The Greeks entered into marriages with them. Women hunters revered this goddess as their ancestor.

Gradually they assimilated, and she became their goddess. And its origin, its name, is like their ancestor. She is depicted with a bow. But in general, if you look at this ancestor, she definitely had contact with plasmoids, because she could control animals.

Maria: Thank you very much!

46:49 Themis (Justice).

Maria : Please tell me, Themis or Justitia, the goddess of justice, is considered to be the first to teach divination, sacrifices and divine rites. Who is behind this personality?

Irina : Themis, since you read that this is one of the wives of Zeus, it means, in any case, this is one of the names of Hera, the same as his wife, that is, when she arrived, but they did not recognize her.

47:20 Hades (Pluto). The image and essence of death.

Maria: Tell me, please, Hades or Pluto, the god of the kingdom of the dead, who is behind him?

Irina: Hades was the image of death. Interesting metamorphoses occurred with the image of death. As you can see, the god of death at that time was a man. And at present, the personification of the image of death is a woman with a scythe. This is all no coincidence. Once upon a time she was your Baba Yaga. But at the time when Greek mythology was formed, the god of death was a man.

Maria: But you know, there was also Persephone (Proserpina), who was considered the goddess of fertility, and at the same time the

kingdom of the dead and was considered the wife of Hades. Those. There was also a female prototype.

Irina: Yes. Only she is not the goddess of death. She is his wife. The goddess of death is the one who sends death. By the way, among the ancient Indians, the god of death is the man Yama.

Why such difference? Because when there was matriarchy on Earth, men were minor members of society. Therefore, death was endowed with masculine traits. They didn't dare call them women's. Moreover, at that time it was believed that what could be the female hypostasis of death if she gives birth, and a man, on the contrary, kills. This is natural.

And with the advent of patriarchy, which came later, everything changed. And, despite ancient history, they began to recognize the female image as the goddess of death, because it was believed that both birth and death are a product of the feminine principle. In China it was expressed through the concept of Yin.

What is the "image of death"? Who is really behind him? But in reality, no matter what people call this essence of death, it will stand with a scythe or in the form of a skeleton, in fact, spiritual essences of death really exist. There are many of them. The essences of death are considered to be Guide Angels who come to take the Soul and escort it to the Spiritual World.

Maria: These are angel guides of the 21st level.

Irina: They draw with a scythe, this is not what they use to cut grass. The instrument with which the thread of life was cut was shown.

Maria: Very figurative. And now we understand, knowing the spiritual structure of man, now it all fits together.

Irina: So, Angel Guides are death.

Maria: Including one of them.

Irina: Previously, the fact that death was depicted with a skeleton, there was nothing scary or derogatory about it. The skeleton was used to represent death, not Angels. Because it was believed that this was a reminder to people that the body will turn into the dust of a skeleton, and a person will not take anything with him into the Spiritual world and will simply leave the material world, the same way he came, without anything. He'll just leave his skeleton behind. It was considered a symbol and that's all. There was nothing wrong with him.

Maria: You see how over time, with the development of each civilization, the concept changes, as we see in the example of swear words or obscenities.

52:16 Asclepius (Aesculapius).

Maria: Tell me, please, Asclepius or Aesculapius, the god of healing is a collective image or maybe an alien?

Irina: I see, a fine-material medical service. The priests of healing were also very revered, and the collective image of many of them was Asclepius. They were involved in treatment, delivery, accompanying the child, watching over him so that he did not get sick. Even in ancient times, in Greece, Egypt, and India, operations were already performed under hypnosis, sometimes they were performed under anesthesia - they were given special herbs. It was only later, with the passing of ancient culture, that these ancient recipes were forgotten, and before the invention of ether, operations began to be performed simply by tying a person.

Maria: We already realized that we lost a lot after the war 12,000 years ago.

Irina: Even after the war, when there was ancient culture, this knowledge still remained. Among other things, Cephastis taught which herbs and how to use them. He taught, among other things, doctors and priests.

Maria: Tell me, please, have they still not restored the level of knowledge and technology that was before 12,000 years ago, before the war?

Irina : No. Not restored. The technical level, of course, has been surpassed. The level of general awareness was not restored.

Maria: Spirituality and awareness.

Irina: Yes.

54:20 The name of Hyperborea in the proto-language.

Maria : Please tell me, the God of the north wind Boreas (Aquilon in Roman) gave the name of the country “Hyperborea”, in the north of another continent of Pangea. Do you have information about what this country was called by its inhabitants? In those times when these regions still existed: Hyperborea, Atlantis, Lemuria. Are these original titles? Is that what they called themselves? Or were these names invented later in ancient times?

Irina : They called in the syllabic proto-language used by the Hyperboreans. These are certain Indo-Europeans who used a syllabic proto-language. Their country, if translated into modern syllables, sounded like Ragariya, Ragara, Ragari. This in the syllabic proto-language meant “The path to the divine Sun is an image,” i.e. image of the path to God. What was meant was not an image, but a spiritual image. They believed that they were (these people, this nation) models, examples for all nations of the path to God.

Maria : How interesting, that is. these names arose much later.

56:04 Geba (Juventa).

Maria: Tell me, please, was Hebe or Juventa, the goddess of youth, was that also a beautiful alien?

Irina: Hebe?

Maria: Juventa in Roman.

Irina : Perhaps it was an alien, but most likely it was already connected with the Pleiadian civilizations. They are usually perceived by people with a very childlike energy. At the same time, an adult with feelings and attitude like a child.

They are born in the Pleiades cluster, where there are many bright Suns and stars in the sky, and there is practically no night. Their home is very bright. Their cities are painted in different colors. Even in colors that people don't perceive. For example, they have 17 shades of purple alone.

Maria : Great. At least some memory of contacts with aliens remained, at least in the form of images of gods.

57:18 Dionysus (Bacchus, Liber)

Maria: And, for example, a god like Dionysus or Bacchus (Liber in Roman). God of viticulture and winemaking. Surely some earthly character?

Irina: Yes. Dionysius is a truly earthly character. One might say, not one of the kings, but the ancestor of a certain tribe, the head of a clan. They were engaged in viticulture.

Winemaking is a very ancient activity. Wine used to be used as a treatment. Water could be safely drunk from the river without boiling it over a fire (this was not always possible), diluting it with wine. We got rid of the cholera epidemic, etc. It was medicine. Therefore, naturally, such people were revered.

Maria: Thank you!

58:18 Nika (Victoria).

Maria: Who was Nika or Victoria - the goddess of victory?

Irina : This is also an earthly woman, but her cult arose because of another battle that was for a girl. They often had battles, when, for example, one clan does not give up a girl, they start fighting over her. Entire cities could die because of this. Such concepts existed in ancient times. If they got this girl, and they won for her, then she was a symbol of victory.

Maria: A very clear image.

59:19 Selena.

Maria: Is Selena the goddess of the moon? After the war 12,000 years ago, the Moon appeared in the sky, and it also began to be deified.

Irina: Since the Moon appeared suddenly and became more visible at night, it quickly became a symbol of the night. And at night people sleep.

What is "sleeping"? Their bodies sleep, and their Souls go out into the Astral, into the astral space, which is associated with magic and energy influences. Therefore, everyone who came to contacts in a dream at night controlled Selena. She was a symbol of the Moon.

The moon was a living creature that flew from the sky and began to be near the Earth. It was not believed that it was in orbit. Simply that they are nearby. It was believed that she controls all magical rituals. Therefore, I would not say that there is any specific plasmoid; most likely, this is again a collective image of all plasmoids that made contact at night, especially with children. The moon was considered the patroness of wives and children.

Maria: Thank you.

1:00:56 Phosphorus (Lucifer).

Maria : I also found a very interesting character from the divine Pantheon. His name was Phosphorus or Lucifer in Roman. This was the deity of the morning star Venus. It turns out that Lucifer was familiar even before Christianity.

Irina: Of course. Many entities are now called Lucifer. Moreover, there are quite a lot of plasmoids called Lucifer. Many of them bring Light. They even seem like people from the outside. And therefore they are called Lucifer in a certain language.

Maria: I see, that is. These are also plasmoids.

Irina: I believe that the planet Disaru is also present here. It was some kind of her representative.

1:02:12 Hercules (Hercules)

Maria: We have 2 more very interesting mythological heroes. This is Hercules or Heracles in Greek, who performed 12 famous labors. And it's interesting to know whether he was a real person, or is he some kind of collective figure?

Irina: In any nation of the Earth there is a concept of heroes who save the world, defeat animals, certain peoples, etc. In this case, I cannot say that Hercules is some kind of definitely existing or non-existent person. This is truly a collective image.

In various myths there are traces of the collection of this image, because it is considered the child of different parents. Not only 12, but also more or less number of feats are attributed to him. Moreover, the names of these feats are also different in different sources.

In fact, this is a collective image of certain people who possessed great strength and superpowers. Often they were contactees. These

were the children of aliens and earthlings and their descendants. They had greater strength, endurance, and certain abilities - telepathy, control of animals.

Hercules defeated the hydra. Hydras are like your crocodile that could attack people. This does not mean that he could have killed him directly with a spear or some kind of laser. This just indicated that he could enter into telepathic contact, gain his trust and take his life.

1:04:20 Odysseus.

Maria: Was Odysseus also such a collective image?

Irina : Who?

Maria: Odysseus.

Irina: Odysseus was a very specific person, if you are talking about the one who fought with Troy. He really lived. At least the person by that name is known. He actually took part in the War of Troy.

1:04:51 Why were the planets named after gods?

Maria: Friends, please tell me how the names of the planets of the solar system are related to the names of the Greek gods?

Irina: The Greeks first called the planets by adjectives: shining, sparkling, red ruby, etc. And when they became aware of the Babylonian records, the Sumerians, the inhabitants of the city of Babylon called the planets by the names of their gods. Even before the Greeks. Accordingly, the Greeks, as soon as they learned from contacts with this people that they called their gods that way, also called their gods by the names.

Why exactly were they called gods? Because the planets, since they were in the sky, were considered a manifestation of deities. Therefore,

they could not name the planets after some kings or in other words. It was believed that the sky is the habitat of the gods. Therefore, they could not name names of disrespected personalities.

Maria : I see. Those. in the same way, many constellations of the Milky Way Galaxy have the names of the mythical gods and heroes of Ancient Greece.

Irina: Yes. These are modern names. The fact is that different peoples have different names for the constellations, their different meanings, but they are united by the fact that among different peoples more than half of the constellations were called precisely divine or mythological characters. Sometimes called animals or certain people. But even these animals, which were the names of the constellations, found their origin in the cults of totemism. Sacred things, one might say. They called the planets by sacred names for themselves.

1:07:16 The legend of Cassiopeia. Andromeda. Medusa Gorgon.

Maria : We also have a very interesting legend in Greek mythology about Cassiopeia. This is what our project is called. This legend tells that Cassiopeia was the wife of the Ethiopian king Cepheus and the mother of the beautiful girl Andromeda. She once boasted to the Nereids, sea deities and nymphs, that they were the most beautiful. Please tell us what really lies behind the legend about Cassiopeia.

Irina : I understand what we are talking about. We are talking about a legend about how Queen Cassiopeia and her husband Cepheus gave birth to a daughter, Andromeda. This daughter became the subject of contention between people and the so-called sea nymphs, who sent a huge monster - a whale - to the country where they lived (so-called Ethiopia).

So that the entire people would not perish, Cassiopeia and Cepheus decided to give their daughter Andromeda to the monster. Only then did he agree to pacify his anger. Accordingly, when they tied Andromeda to a rock, Perseus flew by on his horse Pegasus. He showed the head of the Gorgon to the whale, this sea monster, from which it turned into a stone island. Perseus became the husband of

Andromeda. Is this the myth you had in mind?

Maria: Yes.

Irina: There really is such a myth, but the fact is that Cepheus and Cassiopeia were not just kings. Cepheus was the ruler of one of the priestly castes. Cassiopeia was also a priestess of Demeter and had many children. The eldest of them was named Andromeda. From childhood she was dedicated to Demeter. They had certain restrictions. In our opinion, she kept her virginity and had the right to marry only the same priest.

They lived on the seashore, there was a strait. On the other side of the strait lived another tribe of people. The strait is wide, the shore is not visible. The people who lived on the other side of the strait were like the South Slavs. Not Pechenegs, but like Bulgarians.

Before our era, they had wooden ships that already used steam. Even 3500 years ago there was already a people who created a steamboat. And he had an advantage over other nations who walked on the sea. The people who created the steamship lived by raiding merchant ships.

To avoid being caught, what they managed to take was taken to be sold in another country. They traded with the country where Cepheus was one of the priests. There they spotted Andromeda. Their prince really liked this girl, and they approached Cepheus and Cassiopeia so that they would give her for money. They offered a lot of money because they robbed them. Cassiopeia and Cepheus replied that this was impossible, since she was dedicated to Demeter. It would be blasphemy, an insult to the goddess, and they would be punished for it. They suggested: “Our second daughter is growing up.” Andromeda was then about 14 years old. At that age they were already giving in marriage. And Safonia, her sister, was 10 years old. Cassiopeia said: “You wait another 4 years. When my second daughter grows up, I will give her to you as a wife, because now at 10 years old she is still small.” He says: “Well, okay, give me this 10-year-old one.” She says: “No, our customs do not allow this. We have to wait. She is not yet capable of bearing children.”

The Greeks who lived in this city on the seashore had a large army. Therefore, this prince was afraid to attack them. But he still noticed Andromeda and decided to kidnap her.

The young man Perseus also lived in this area, but he was not familiar with Andromeda. He was a farmer and contactee with aliens, and had the ability to exert psychic influence.

Once, when Andromeda was walking along the seashore, swimming, sunbathing, a steamer sailed past. The Greeks were surprised, they did not know what it was. There was smoke coming out of it. And when these people attacked the ship, they made a noise and screamed. Therefore, in the myth it is depicted in the form of a whale. It even says that there is smoke coming out of his ears. Since it was already approaching evening, and the sea was quickly getting dark, torches were lit on this ship so that they could see the shore and not hit the reefs.

Those who were on the shore saw that they had sailed on a huge ship that was glowing and smoke was coming out of it. And then they described it as smoke coming out of the whale’s ears, and its eyes glowing with fire. These were torches.

They landed nearby on the shore and attacked Andromeda. Not the prince himself, but his entourage. They wanted to tie her up. You can't land close to the shore. And when they tied her hands, she had to drag her and swim, otherwise she would drown. She resisted and tried to bite them. They were forbidden to cause her any harm because she was to become the prince's wife. 4-5 people attacked her, tried to tie her up and take her to the ship in a rowing boat.

This was seen by Perseus, who was also swimming. He really had a horse, without wings, of course, but very fast. He was grazing nearby. When Perseus saw it, he jumped on his horse, galloped along the shore there and was just in time when they had already put her in the boat. The myth says that he showed them the head of the Gorgon Medusa. Now I will move on to describe what it is.

Medusa Gorgon is an image. Either contactees who had hypnotic

abilities, or people who had the so-called reptilian brain gene active. It is located under the cerebellum.

Snakes are a symbol of reptilians. Why specifically in the head area? This meant that people perceived the priests with snake energy around their heads. It doesn't mean that their hair swarmed like snakes. This suggests that they perceived as if they had a lot of reptilian energy in their head aura. Usually such people were quite wise. Naturally, these were special Spirits with great experience born. And these were contactees from different civilizations: both plasmoid and humanoid, who had the ability and wisdom that they took from all civilizations. Perseus was one of those who possessed such wisdom.

The myth says that when the head of the Gorgon Medusa was shown, this whale turned into stone. In fact, "turned to stone at the sight," meaning that Perseus put them in a hypnotic trance. He influenced them with his energy, and before them appeared the image not of Perseus, but of a certain high god whom they feared. He simply imagined himself and implanted this image into their minds. There are such techniques. Psychotechnicians. When they saw this, they fell on their knees before him. Moreover, they saw this on the ship too. Such was the power of this mental image that he created for them that they saw it even on the ship.

The warriors fell to their knees in front of him and untied Andromeda themselves. He didn't kill anyone. Perseus picked her up, put her on his horse and took her to her parents. In gratitude, as an exception, this commoner was ordained a priest. At that time he was over 20, after 3 years he took her as his wife. This was the deadline for training to become a priest.

Maria: Thank you, friends! A very beautiful story. I would say that it is even more interesting and beautiful than the legend itself. Now we know what lies behind the myth of Cassiopeia.

Thank you. I thank our beloved friend MidgasKaus and Charaxes for this interesting conversation. We learned a lot, learned a lot.

Irina: Thank you! Very interesting questions.

Maria: Thank you, friends!

Irina: And I thank you! See you again!

June 14, 2021

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

Maria Sokalskaya – moderator of the VKontakte group, manager of the online learning project and other projects “Cassiopeia”;

MidgasKaus - representative of the planet Esler, biologist, psychologist, specialist in alien life forms;

Haraxes is a representative of the planet Burkhad, a history teacher.

#289 Universe. Channeling of the contactee – Irina Podzorova.

https://blog.cassiopeia.center/mirozdanie-chenneling-kontaktera-irina-podzorova

https://www.youtube.com/watch?v=aGMjtEfIXVk

07:20 Man. What is the difference between a father and a creator? Heavenly Father. Material world.

Irina: Hello, dear friends, fellow contactees and, in general, colleagues, neighbors on our planet. My name is Irina Podzorova, I am a contactee with extraterrestrial civilizations.

On the topic: what am I focusing on, what is a person, and what is the Universe? Always, when receiving this or that information, I was guided only by how much this information coincides with my inner conviction that I have.

Since childhood, I have had the conviction that everything is Divine Light in one form or another of manifestation. And when I heard information from some people or read it in books, I always compared it with this Light, which I still unconsciously felt within myself, not understanding what it was. This was even before contacts with aliens, which I began to have at the age of 13.

Then I thought that this happens to everyone, I thought that everyone feels that there is Truth for them. Then, already in adolescence, I was surprised to learn that a person may not understand what is true for him, that is, he may doubt that “is this true for me, and should I accept it or not?” he can even ask others: “Should I believe this?” That is, he is so unsure of himself that he needs confirmation of some kind of external authority for his faith or disbelief. But I didn’t have this, at least I don’t remember such a thing that I doubted my faith in God, in myself, in man, in humanity.

What do I believe? I believe that there is a God, the Creator of us all, of all worlds, and he is not just our creator, he is our Heavenly Father, the one who gave birth to us. How is the father different from the creator? The fact that at birth he put a piece of himself into us, made

us like himself, so that we could create, love and be happy, like himself. This, in fact, is the task, we now call it so - the task, and in the Spiritual world it is called the plan for the incarnation of us, as children of God, in this material world.

The material world was created so that we can, depending on our level, either develop, that is, develop Divine qualities in ourselves (love, courage, kindness, generosity, and so on, there are a lot of them), or manifest in this material world already accumulated qualities in oneself in other Worlds. In Worlds with more subtle bodies than ours, the physical.

10:57 Truth. Contactees from the Spiritual World. Unified knowledge in the Interstellar Union.

Irina : What then does the Universe consist of? Next I will talk about what I have learned from my contacts. Yes, I trust this information, because internally, intuitively at the heart level, I am completely confident in its truth for me at this moment in time. That is, our ideas, naturally, can change, but at this point in time I am sure that this information is not only true, but also that it brings Light, love, goodness, acceptance, increases the vibrations of each person, and this is True. That is, the hallmark of Truth for me is an increase in the level of awareness and the level of love in the Soul. For me, this is the main feature of the truth or untruth of information in the Light.

Not true, false information is that information, part of the true information, which describes one facet of reality, forgetting about all the others. And that information that describes the entire reality, and accepts other opinions as equal, but at the same time explains why they differ from it, this is the Truth for me.

From the point of view of information from those civilizations with which I am in contact, this is the Interstellar Union, they explained to me that the representatives of the Interstellar Union, in their information about the Universe, rely on information from the Spiritual World.

They have special, let’s speak in earthly language, contactees, of course, not contactees like us, but beings, humanoids, who are in

conscious contact almost constantly with the Spiritual world. This is their profession, one might say. They synthesize information about the material world, what we call scientific knowledge, with information about the Spiritual world, what we call esotericism or the information that formed the basis of religion. For us, religion is separated from science and esotericism, but for them it is not separated and constitutes a single knowledge. Moreover, they even wonder why we have this divided, it shouldn't be like that.

13:29 Universe. Material and Spiritual worlds. The level of density of the physical world. Spirits of nature.

Irina: According to the information that I receive, and with which I completely agree, our Universe consists of the material and Spiritual worlds. Of course, this division is conditional only in our perception, but in general, from the point of view of the Spiritual world, of course, the Universe is one. It consists of the spiritual energy that makes up this world, divided into levels of density. For example, in the material world, as they explained to me, there are 59 levels of density. We and the humanoids with whom I communicate live in the physical world.

The physical world is the third level of density. And there are 59 of them in total, that is, there are 56 more subtle-material worlds above us; on earth, these are subtle bodies, energy bodies, we also call them plasmoids. On Earth they are called Nature Spirits. They play a very important role in the Universe, since you see that there are much more plasmoid worlds than humanoid ones, even because there are 56 density levels - these are all plasmoids, and we live only on one single level, the third density level. That is, the Universe visible to the physical eye, including all Galaxies, stars, and so on, makes up less than four percent of the material Universe, and 95-96% are precisely these plasmoid worlds. But even this is not all.

15:23 Levels of the Spiritual World. Condition for incarnation into a rational being. Differences in the Spiritual World.

Irina: After level 59, the Spiritual World begins. I want to emphasize that we said that the Spiritual world is the same for all worlds and all levels of density, that is, the Spirit can incarnate at any level of density. And if he incarnated on the third level of density, that is, on ours, he

can incarnate on any planet in any Galaxy and so on. There are no restrictions here, except for one thing - a rational spirit can only incarnate into a creature whose nervous system is ready for its incarnation, that is, this is a rational being, a person, not an animal.

The spiritual world, in turn, is also divided into various levels, but there is no longer matter there. And since there is no matter there, they explained to me, it means there is no possibility of change there, that is, of changing one's vibrations, increasing or decreasing the level. There are 24 levels of the Spiritual World, they are all described. This information is there, let's not dwell on it, I just want to say that beyond both the Spiritual and material worlds, this is again in our understanding, as they explained to me, indeed, Elena said correctly, it is no longer possible to describe reality in some words, but I will try to give you an idea of their view of reality.

16:56 Divine peace. Spiritual Superpersonality. Possibilities of the incarnate Spirit.

Irina: Beyond all worlds and levels and planes of existence there is the Divine World, where the very essence of God is located. This is not just a personality, but a kind of Superpersonality in our understanding, only a small part of whose energy goes to the creation of all material worlds and their maintenance. And we, as Spirits, once separated from this Spiritual Superpersonality. It is completely immaterial.

What does it consist of? The simplest understanding for a person: it consists of the Light of unconditional love. And we, like rays from the central Sun, in our view, separated, but in the view of God we are still inseparable. Here there is such a double view of reality.

So, in our minds, we have separated, that is, we have acquired self-awareness, thanks to which we can feel ourselves as separate individuals from God, from each other and from the world. And so when we separated, we began to go through our experience of incarnation in different worlds in order to develop in ourselves certain qualities of love.

The fact is that God gave birth to us capable of developing all the

qualities that we ourselves want. He himself did not invest these qualities in us for the simple reason that this would violate our free will, but he provided us with the opportunity to develop these qualities ourselves in our incarnations. To do this, he created the material world from his energies.

18:50 Human Spirit or Soul. Communication with the Higher Self.

Irina: What is the Universe? I told you what then is the human Spirit or Soul? The soul is an immortal intelligent entity that is incarnated in different worlds: either as a plasmoid, or a humanoid, or as a person on Earth. But according to the concept that was provided to me, the Spirit, the Soul, is not fully embodied in the body of an earthling: 30% of us are embodied in the body, and 70% remains in the Spiritual world at the level from which the person came. The part that is not embodied is called the Higher Self or Spiritual Self in our concept.

And one of my main tasks on Earth is not just contacts and retelling to other people the information that I have learned about other worlds; this is not my entire mission, but only a small part. My complete mission is to teach every person who wants to communicate with their disembodied part, with their Higher Self, in order to learn from him the answers to their questions.

The Higher Self, since it is not embodied, has no memory blockage, and it remembers everything about your goals of incarnation, whether you are fulfilling your task, the reasons, the true spiritual reasons for the diseases of your body and so on. You can learn a lot there. Naturally, it knows whether you are a contactee, with whom exactly, and what the contact is for.

For our interstellar friends, communication with the Higher Self has been a practice since school age. They have such a subject at school, so it is even somewhat surprising for them that most earthlings do not know how to do this. We can say that exactly 80% do not know how to consciously come into contact with the Higher Self in their more or less constant spiritual practice. So, if 70%, as I was told, learn to do this consciously, then humanity will get rid of its problems. Social, political, economic, spiritual and even medical, that is, there will already be a chain reaction of increasing awareness and, as we say, accelerating

the quantum transition, as they now say in 4d, that is, into a new reality, where we will also live in physical bodies , but in a completely new way.

This is my task, to bring the Earth closer to this new reality. And in this new reality, when we are ready, we will be accepted into the Interstellar Union, we will not have wars, we will not have injustice. That is, my task is to make the world a better place by making myself better. Thanks everyone for your attention!

1:10:30 God. Unconditional love. Soul. Freedom of choice. Devil.

Maria: Irochka, Maxim, what would you like to wish to our viewers, our subscribers, contactees who might want to join our project?

Irina: My dear divine Souls, brothers and sisters, children of the Heavenly Father, I am very glad that we held this conference, and everyone contributed to the development of humanity, to the development of the spirituality of humanity. We spent these two hours of our life of this incarnation on Earth with great benefit not only for ourselves, but also for others, and when you spend the time of your incarnation with benefit for others, it is called unconditional love and undoubtedly increases our vibrations.

I listened carefully to each of you and found in your words a single, unified knowledge of the Divine Spirit that is in everyone. I also want to say that the main question of our entire earthly life for every person is not only what is the meaning of life, but also in whom is the meaning of life. That is, what is the personality of God who awaits us beyond this life.

Since childhood, all people have been interested in the question of what awaits us there. Not what, but who. And every Soul is interested in the knowledge of God, every Soul is not only interested, but this knowledge is also very important. But God is, as I already said, a Superpersonality that cannot be known by the mind. Only the creation of God can be known with the mind. How can you know God? You can only feel it; you can, relatively speaking, know it with your heart. What then is the essence of God? Every Soul is interested, most of all in life,

is interested in the answer to this question, and the answer to the question: “how do we imagine God?” will depend on the answer to how we determine the meaning of our life.

Naturally, I will tell you my idea, but I am sure that each of you, dear friends, and each of our viewers will feel in these words what I feel now. God is Unconditional Love. Not the kind of love that we are used to showing on Earth in the laws of “you give me, I give you”, no. God is unconditional love.

How is unconditional love different from conditional love? For conditional love, if a creature violates the laws of the lover, it becomes bad, it becomes defective, it becomes unnecessary for the further evolution of life. A creature that has acquired qualities that are too different from a loving being becomes alien, unnecessary. And similar concepts of the Universe claim that such a being, the immortal Spirit, even supposedly can die and loses its immortality.

Where do these concepts come from? Precisely from the understanding of love as a certain energy that is known only on Earth, that is, it is the processing by the mind of information about unconditional love coming through the heart. And our mind, for the most part, is not able to perceive without a heart what unconditional love is, it is only able to perceive if you develop, which means that grace, happiness, joy comes to you, embodiment in the high worlds, or even refusal to incarnate in this world, as in the world of suffering. But if you accumulate destructive qualities, if you made a mistake somewhere, moved away from the path of Light, that’s it, you are no longer needed, you are already leaving love, and you are being destroyed. This is the understanding of our earthly mind, but with God it is different, because he is Unconditional love.

And I want to appeal to each of you, you can, of course, accept or not, it’s your choice, but listen to your heart. God is Unconditional love. He loves us as we are. But if we ourselves degrade, if we descend in our vibrations, or as Igor said, we go over to the side of the devil, that is, the destructive essence, we do not lose either the love of God, or immortality, or the opportunity to return to him. No one loses, and I want to say even more, even the devil himself has not lost this opportunity, he is the beloved son of God, yes, loved, but not loving. Because he does not love himself, he has not lost the love of God,

and, as you see, he is not yet destroyed, he is alive.

Many will ask, why does God not take the life of the devil and allow him to carry out these actions? And for a very simple reason, because if God takes away life, I now mean the life not of the body, but of the Spirit, as an existence, and destroys any of his children, by this act he admits his complete failure as a Creator and Father. Of course, he will not do this, because when God created this world and gave birth to each of us, he already saw our future and saw the whole series of our free choices, what we would come to, degradation or development.

And if God had seen that the end of this Soul was destruction, he would never have created it, knowing that he would have to kill it, and before that it would suffer a lot. This is not love. That is, He knows the future completely, and if you see a person on Earth who is doing evil, and you are angry at him because of a violation of justice, love, because of fear for your life, and so on, this is a natural emotion of a person, which is caused by the activation of his instinct of self-preservation. But this does not mean that this person is not loved by God.

Even in a state of complete self-destruction, God treats him with sympathy, compassion, and a desire to help. He sends him Angels, his mentors, so that they give him bright thoughts. And he doesn't force them to accept, but invites them to come to him through life's circumstances, even through any song that he hears as if by chance on the radio or on TV, through any poem that he reads in the newspaper, through the word of a loved one, wife, mother , a child can be converted by God.

God is everywhere, his energies are everywhere. And that is why in Christianity the following phrase is known: "Everything happens according to the will of God." The will of God is the driving energy of this world, without it nothing can exist.

Therefore, I consider it very important, specifically for myself, in order to remain in high vibrations, to recognize God as Unconditional love. Recognizing God with Unconditional love and gratitude to him for this love makes us like him, and therefore makes us partakers of His eternal life. Not the eternal life of the devil, who suffers from his low

vibrations. And His Divine eternal life, which brings boundless spiritual happiness, which is impossible without sharing it with others. With you, dear friends, and, of course, each of you knows what kind of happiness this is. Everyone serves people and carries this Light.

And I also want to say that our freedom of choice in this body lies mainly in our faith. Whatever we believe in, we will create such a reality around us. Everyone is free to create their own reality, this is basically our freedom of choice. Maybe Maxim wants to say something. Thank you all again, dear friends!

Note: Maxim - 1:21:10-1:22:18

Irina: Yes, for me this truth is in Unconditional love.

Maxim: And for me too. Truth is love. Love is Light, and Light is everywhere. And the Spiritual world that we are talking about permeates absolutely any material and subtle reality that we study together, along with the Spiritual world.

Irina: And Unconditional love does not destroy or call any of its children defective - this is my truth.

Broadcast 04/01/2021

#292 Irina Podzorova. Aliens answers to questions from the chat. Alien practice of sun salutations.

https://blog.cassiopeia.center/otvety-inoplanetyan-na-voprosy-iz-chata-praktika

https://www.youtube.com/watch?v=xnnZkFKcwSk

00:04 Introduction of the participants. Intergalactic news.

Irina: Hello, dear friends.

Maxim: Hello everyone.

Irina: Greetings. How can you hear us?

Maxim: Now let's see in the Telegram chat. Dear friends, you can ask all questions in the Telegram chat.

Irina: Great. Hello. Congratulations on the very big holiday of Trinity. The live broadcast will be dedicated to your questions. Our curators

are present next to me: LiShioni from the planet Shimor and MidgasKaus from the planet Esler, well known to you. They are ready to answer your questions and congratulate you on the holiday of Pentecost, which is of great importance for the Christian religion. We'll probably start.

Maxim: Yes, as always, from intergalactic news. You need to ask LiSioni.

Irina: There is galactic news that is relevant to the entire Galaxy. As I already said, now the entire Galaxy is actively monitoring the rapprochement of the Galactic Federation of Light (GFS) and the Interstellar Union (IC). This week, the day before yesterday, the next stage of integration of these unions into one single community took place. A group with Disaru under the leadership of Saint-Germain flew to the planet - the capital of the Pleiades and the GFS, Futissa. They built a base there. He will be there now.

And the second news is related to checking all the reptilian bases on your planet and in the solar system.

There is a civilization of reptilians, which in their own language is called “Karkhen”. It is located between the constellations Virgo and Leo, on their border. This is one of the very ancient colonies of Selbet. It has a base in Mexico, southeast of the city of Oaxaca. At this base, a joint inspection was carried out by representatives of the planets Tashig, Esler and Burkhad.

It was revealed that one of the base specialists was associated with criminals in this country who distributed drugs. Experiments were carried out through them. Reptilian Karhena is a biologist. Through the group, which included his contactee, he distributed substances, under the guise of earthly ones, that slowed down the consciousness of people for experiments. The substances caused increased aggressiveness.

Maxim: Wow.

Irina: He has already been sent to the planet of criminals, according to your chronology, for 35 years.

Maxim: I see. We also give a lot for drugs, so there is nothing to distribute.

Irina: It was some kind of substance disguised as a drug. He was punished not only for harming earthlings, but for passing on the object. It is forbidden.

Maxim: Thank you for the news. We have a question right away.

04:49 Memory of the Soul about earthly relatives.

Maxim: Question from Natalya. Dear Irina and our alien friends, please tell me how long does the Soul of a deceased person remember those who remained to live on Earth?

Irina: She remembers her life on Earth and all her relatives until her next incarnation in the body. Then her memory is blocked. But, in the form of the Higher Self, she remembers them forever, the memory is preserved forever about all incarnations and relatives in these incarnations.

05:25 Requirements of the Interstellar Union for physical contacts.

Maxim: Asks Beaufray's question: "If they turn to you to take me away from Earth, what will the aliens answer?"

Irina: Who will contact me? He?

Maxim: Yes. He will turn to aliens to be taken away from Earth.

Irina: Permission for physical contact can only be given to the MS. It

is impossible to take it away from Earth forever, because... According to MS rules, physical contact cannot last more than 2 hours. (Mead speaking) LiSioni and Mead studied the MC rules. They confirmed that they agreed to comply with them before we were allowed onto your planet.

Maxim: Good evening, do you plan to talk with the phantom of Krishna?

Irina: In principle, we are planning to talk with the phantom of Krishna. They've already sent me questions. Now we are waiting for a time that is convenient for everyone: us and the other party to the contact.

06:38 Ancestral curse. How to get rid of a family curse?

Maxim: What is a generational curse? How to get rid of it? And why does the Soul incarnate in a cursed race?

Irina: What a good question. A curse is a wish for some negative consequences to a person, charged with his own energy. If this negativity was wished not for a person, but for the whole family, the entire clan that you are talking about, and at the same time, the clan has within itself, at the time of the curse, members of the clan who emit negative vibrations, then a mark appears in the clan egregor. It begins to influence, lowering the vibrations of the astral bodies of all members of the genus.

Why do Spirits incarnate in this family? Very often, those Spirits who want to help raise the vibrations of the egregor and get out of this state are embodied in this genus. That is, this curse can be annulled by wishing Light and Love to this person and his entire family, if he is known, of course. If not known, then to all the other people around you.

Maxim: Why does the Soul incarnate in this way?

Irina: To raise the vibrations of the egregor.

Maxim: And to pass your lessons. Do I get it right?

Irina: This will be a lesson in her Love. A manifestation of Love for people who are in this family, and a lesson in helping them.

08:28 How to become a contactee of the planet Burkhad?

Maxim: Question from Ivin Vendor: “Can I submit a request to the MS for someone from the planet Burkhad to become my curator? If yes, then please help me with this.” The question is: “Can a person make a request for someone from the planet Burkhad to become his curator?2

Irina: To submit a request to the planet Burkhad, you don’t need my help at all. You can do this through your Higher Self by making an appointment with any specialist, a “Cassiopeia” master.

Questions to the Higher Self: First, are you a contactee? Many people are unconscious contactees. Who do you have contact with? Depending on the answer, ask if your contact with representatives of the planet Burkhad is possible? Are you the right vibration for them? Secondly, does this contact correspond to your life purpose?

If all questions are answered positively, consciously send a request to Burhad through your Higher Self. “I ask my Higher Self to send a request to Burhad to find a possible curator. If the second party, that is, Burkhad, will be interested in contacting me for any purpose.” Say for what purpose you want this contact.

The Higher Self will definitely do this, because the Spiritual world is one for everyone. It will itself send a request to Burkhad. They will come to you in the Astral to examine you. If you match the vibrations, they will assign you a curator.

Let me remind you once again that astral and mental contacts do not require MC permission.

10:32 Biorobots on Earth. Attacks by low vibrational entities.

Protection from low vibrational entities.

Maxim: What is the percentage of biorobots on the planet out of the total number of people?

Irina: On what planet?

Maxim: On our Earth.

Irina: At the bases you mean?

Maxim: No. We have already raised this issue. I want the viewers who joined our channel to hear about biorobots. Many people believe that there are people who walk next to us, that they are biorobots. A person asks what is the percentage of biorobots on the planet out of the total number of people?

Irina: There are no biorobots on the surface of the Earth, outside of alien bases. There are cases when aliens from bases, disguised as humans, send a biorobot for some need: to take some kind of analysis, buy something, etc. They have manufactured products that they can use for this. But the biorobot returns immediately to the base when it does this.

Maxim: Guys, I remember in the last broadcast you asked the question: “What should we do, some strange low-vibration astral entities are attacking our Earth? Some contactees are talking about this.”

I will tell you that other contactees scare you only in order to then take money from you, in order to expel these entities from you. If you are in the Light of Love, on high vibrations, no low vibration entity can move in with you or take over your consciousness.

Therefore, before asking questions of this nature, think about those contactees who scare you. The task of many contactees on the YouTube channel is to create a negative impression about alien

civilizations, intimidate you, and then take you for an appointment and get rid of non-existent problems by making money from you.

Irina: I can say that often the curators of such contactees are against these actions, they tell them about it. But the contactees answer that it is their choice. In your world, on your planet, your rulers provide energy, pay salaries, but here I will decide for myself what to do. This is how they respond to curators. It happens.

Maxim: Many contactees use the services of low vibrational entities to intimidate you. They invite them, they take energy from you, and you pay money for it. Therefore, listen carefully to those contactees who tell you something. What a person has inside is what he manifests as a projection. Look carefully and listen to your Heart.

Irina: Curators can change. There may be some curators, then others will come, depending on the change in the vibrations of the contactee.

Maxim: Are MidgasKaus or LiShioni familiar with any of the representatives of the humanoid race Akhil from the planet Maya from the star system Kepler 62, located in the constellation Lyra?

Irina: There are quite a lot of Lyrian civilizations (MidgasKaus says). I am familiar with them only from civilization reference books. I have never been to the constellation Lyra, and neither has LiSioni. We specialize in Earth and similar civilizations. It's better to ask the Lyrans about this, for example, representatives of the planet Tuluari, with whom Irina communicates. Perhaps the name of the planet is in the Lyran language.

14:45 Deprivation in spiritual work.

Maxim: This is the question. If you blindfold yourself and live blindfolded for several days, will contact with the Higher Self be built?

Irina: What an interesting question.

Maxim: A person is blindfolded for two days. Will contact with the Higher Self be built? What effect will be achieved?

Irina: (MidgasKaus speaking). I understand what the question is about. We are talking about methods of deprivation, that is, disconnecting oneself from the sensations of the outside world.

Ancient and modern monks in some mystical directions of Buddhism do this more radically: they protect themselves from external sounds and sunlight in caves where no sound penetrates. But they do this for longer than 2-3 days. For some of them, this helps them separate from the physical body and realize that not only the physical world is reality.

They comprehend the reality of the Spiritual world and begin to go out into it, communicate with their Higher Self, their curators. The method that you proposed is quite interesting, but I think that without additional spiritual work this will not work. Moreover, I believe that it is not necessary to blindfold yourself for 2-3 days. You can establish contact with the Higher Self more quickly and completely. Through the techniques that MS representatives gave.

16:35 Federation of Free Worlds of the Milky Way Galaxy.

Maxim: Here's a question. Are the Federation of Free Worlds of the Milky Way Galaxy and MC the name of the same community?

Irina: If there is the word “federation”, then we are talking about the State Fiscal Service. It may be called “Milky Way” in some civilizations of the Galaxy because it belongs to it.

Maxim: So the Federation of Free Worlds could be the State Fiscal Service?

Irina: Yes, if the word “federation” exists.

Maxim: I would like to remind you that the process of harmonization and unification of the State Fiscal Service and the MS in our Galaxy is

currently underway.

17:26 Benefits of donation for the donor.

Maxim: Is it good to be a donor? Mid, a question for you.

Irina: Good for whom?

Maxim: For the person who is this donor.

Irina: If he himself is physically healthy, then being a donor is useful for his body and for his Spirit, because it allows his cells to be renewed after donating a moderate amount of blood. Usually up to 200 ml (each individual, of course). The bone marrow receives a signal to renew your blood cells and produces many young forms of red blood cells, white blood cells, platelets, which renew your immunity. Provided that you are healthy and do not experience problems with low blood glucose, problems with low blood pressure, etc.

This is beneficial for your Spirit because by donating your blood, you can charge it with vibrations of Light, Love and healing for the person to whom it will be given to save his life. This will speed up your spiritual development.

18:48 Is the Earth round? Cloning on Earth.

Maxim: How many broadcasters, so many “flat-earthers” ask the same question.

Irina: Really again?

Maxim: Yes, again, the same question. Guys, the Earth for humanoid civilizations of 3rd density is round. For some plasmoids, the Earth “appears” to be flat. For some, it “appears” in different forms.

Irina: Yes, the Earth is round for us.

Maxim: Are Earth scientists now cloning people on Earth? If they clone, does the Spirit incarnate in such a body?

Irina: According to our data, your scientists have not yet succeeded in human cloning. There is animal cloning. On other planets this method of reproduction exists, including on the planets MS and GFS.

There is no obstacle for the Spirit to enter this body, because it chooses its incarnation in advance, that is, it unites, and the Spirit enters it anyway.

Maxim: So, in any case, the Spirit enters the clone?

Irina: Yes. If it is not an animal, but a rational being.

Maxim: This is exactly the question about biorobots. If a person is born, then he is not born here as a biorobot, he is born here with the incarnate Spirit.

20:19 Is Ashtar a reptilian?

Maxim: Irina, is it true that Ashtar is a reptilian?

Irina: No, he doesn't have reptilian genes at all. I talked to him. He says that his civilization developed independently. Without introducing reptilian genes there.

Maxim: Why do some sleepers say that Ashtar is a reptilian who appears to be from a high-vibration civilization. Ashtar's images give different images.

Irina: Because under the guise of Ashtar, various plasmoid entities can act, which they perceive as reptilian energy, because for them it is

alien energy, not human.

Maxim : Dear sleepers, if you have reptilians in your head, gray ones, which must be present in any structure, then you can tell everyone that Ashtar is a reptilian, that Saint Germain is a reptilian, that Krishna is a reptilian. It all depends on your internal state, the state of your “inner reptilian”.

Irina: (MidgasKaus speaking). Many people perceive any extraterrestrial life form as reptilian.

Maxim: I have met such people.

Irina: Any alien is perceived this way. An alien life form in their subconscious is associated with reptilians and grays. Then they will perceive it that way.

Maxim: It’s very interesting to work with people who have these gray reptilians in them. People are willing to pay a lot of money to have these gray reptilians driven out of them.

Irina: These people contribute to the fact that other sleepers will perceive any aliens and plasmoids as reptilians, grays and insectoids.

Maxim: If they discover Ashtar in you as a high-vibration entity, then there is no need to expel him for money. But the reptilian must be driven out for money.

Why are there no representatives of the planet Tumesout on air?

Irina: Sometimes they do. We invite them to specially conduct a live broadcast. For example, when there was a live broadcast about the planet Tumesout, representatives of this planet came. And now we just have answers to questions. Our curators and curators of our Project answer.

22:44 Life support for biorobots on the planets of the Interstellar Union. An agreement between a person and his supervisor.

Maxim: This is the question. How is the existence of biorobots maintained on MC planets? Where does life force come from, since they do not have a Soul? Do they need food, water, etc.?

Irina: They don't need water and food, their body is artificial. It is created from artificial biopolymers. They have special batteries that accumulate the energy of electromagnetic waves from space and transform it into the energy of movement and perception, into the energy of their pseudobiological brain.

Maxim: A mentor is given to the Soul for one incarnation or for several? And how does a soul choose a mentor?

Irina: Do they mean the curator?

Maxim: Curator. We call him a curator. We call an already embodied Soul a mentor.

Irina: It varies. It happens that a curator goes with a person for one incarnation, and sometimes there are many incarnations, and is also present in the Spiritual World. It depends on the individual agreement of these two entities, on their common task in the incarnation of this person. That is, there may be one or more incarnations.

24:14 O llamas of Itigél.

Maxim: This question is just in time for the retreat on Lake Baikal in September. For those who don't know: we will have a wonderful retreat on Lake Baikal, from September 5 to 30, two streams. We will visit Lama Itigelov.

Question about Lama Itigelov. Is he in a state of samadhi? Is he here or has he already left for the Spiritual World?

Irina: He is in the Spiritual World. His connection - the thread of vitality - with the body is severed. But the body is in a state of increased energy vibrations because he has been accumulating them in the body all his life. He spent the energy of his infinite Love on his spiritual development, and distributed some of it throughout the body with the help of special energy practices.

Therefore, his body emits a special energy that stops all processes of decomposition into elements that are controlled by microorganisms under the guidance of plasmoid civilizations. They are not included in this process because it has a different energy.

25:42 How to see MidgasCaus and LiSioni?

Maxim: MidgasKaus and LiShioni, please appear live for a minute!

Irina: We are really present.

Maxim: They ask to show it. On TV!

Irina: Close your eyes, focus on your spiritual heart and ask your Higher Self to open your spiritual eyes. You will see what is really happening, and not what is happening only in a small part of reality, which you call the material world.

Maxim: Dear friends, today, when we were doing practice with Ashtar, we forgot to mention our fourth wonderful project “Meditation”.

Irina: And also the State Fiscal Service Practices.

Maxim: Practices of meditation, cosmohealing, women's practices, Project Gikhora. Four projects that will allow you to tune into your Higher Self, your Spirit.

Irina: We have so many projects that we don’t remember them all.

Maxim: We can't remember all the projects. All projects prepare and expand the level of awareness and perception for astral travel, for energy-informational activities, for healing practices and more.

Maxim: This is the question. How can you learn to sense energies? I attend Cassiopeia meditations, connect with the Higher Self. I don't feel anything. What should I do? What is this connected with? I went through a lot of practices, but I don't feel any energy at all. Thank you.

What to advise a person who does not feel any energies after going through a large number of practices? Maybe we should just invite her to our School?

Irina: Yes, come to our School. I myself will lead you to the Higher Self. We will ask him what is the reason why these sensations do not open. Maybe this is your individual lesson in faith in the Spiritual world without sensations. This could happen.

28:08 Demeter.

Maxim: Is it possible to broadcast live with Demeter? Who is Demeter?

Irina: This is a plasmoid that is responsible for the Earth.

Maxim: Is it possible to broadcast live with Demeter?

Irina: She is from the forty-fourth density level. I can try to invite her to contact. She is present everywhere, including here. Her consciousness can be in any part of the Earth. Can answer questions. I can ask her to answer questions. They must be composed for Demeter. What did you want to know from her? She is always present here.

Maxim: We will ask the administrators to collect questions for Demeter to conduct a live broadcast.

Irina: She is always next to you, in the entire atmosphere, in energy, underground, in near space. She can direct her consciousness, see everyone and answer questions.

29:16 The number of Spirits in the Universe.

Maxim: What is the total number of incarnated and non-incarnated Spirits in the Universe? Which Spirit was the second to realize itself autonomously after Christ?

Irina: Only the firstborn son is known, and all the others appeared at the same time. First - one, then the cascade began.

Maxim: How many Spirits, incarnate and non-incarnate, are there in the Universe?

Irina: The number is approximate. If you take a quarter of the stars in all the Galaxies you know and multiply by half of the Galaxies themselves. If we take into account only in your Galaxy, there are a little more than a hundred billion stars, and in the Galaxy next to you there are 2.5 times more. These are only two Galaxies. And billions are known.

Maxim: I see. That is, you can't pronounce the number higher.

Irina: I don't know the date.

30:38 Kody Kalachakra.

Maxim: Question about Kalachakra. I was interested in this question myself. We once posted an article on the Kalachakra codes in the VK group. I still use a couple of these codes. And I understand that they work.

When will the next contact with Kalachakra be to ask for more codes?

Irina: (MidgasKaus speaks) I'm ready to take Irina to the Antiverse, ask him to come or get these codes there. Specific request for what? In the Astral you can visit any worlds.

Maxim: What do you mean by “what”? Codes are needed. Everyone asks for codes: “Give me codes so that you can do nothing, and life seems like raspberries.” So that there are codes that solve all their questions.

Irina: (LiSioni speaking) I would ask Kalachakra for the code for developing energy vision. First. The second code is for developing the energetic sensitivity of your astral body, so that you feel the energies of the etheric and astral body. And third: I would ask for a code to strengthen the spiritual channel and greater awareness in contact with the Higher Self. This will be the code you need most.

Maxim: Got it, we’ll organize a meeting with Kalachakra, but we’ll think about how. Our schedules are very busy, we don’t even have time to film conferences. We spend the whole day texting. We will try to do it with Kalachakra. I'm interested myself.

32:23 Autoimmune diseases.

Maxim: Oksana from Florida asks: “Please tell me how you can help a person cure an autoimmune disease, rheumatoid arthritis. Thank you".

Irina: I had patients who were diagnosed by doctors. They came to the Higher Self and to MidgasCaus for diagnostics. There was a different picture: the disease was one, but different conditions and causes were described.

At the Higher Self, it turned out that they had blocks in the first chakra, and there were often necrotic attachments to their deceased relatives. These were spiritual reasons.

The diagnosis revealed various infections, plus allergic reactions. They were asked to follow MidgasCaus' recommendations of medications

and herbs, as well as work on a spiritual level.

If all this was combined, the person was cured. There were reviews from people who were cured.

But if I took the drugs, but did not eliminate the cause that caused the disease on a spiritual level, everything returned. Either in the same form or in another. This happened.

33:55 The ninth planet of the solar system.

Maxim: Now there will be a serious question. I could hardly read it. Recently, astronomers Brown and Batygin, through mathematical calculations, found the ninth planet, which is not in the ecliptic and, most likely, very far from the Sun, having a large eccentricity. It is a fairly massive planet that deflects the orbits of other planets on the outskirts of the solar system. It also probably has weak alpha and omega, so it is not visible in telescopes. Can you say for sure whether this planet exists? If so, what are its physical characteristics?

Irina: Yes, this planet exists. Kirchiton took me there. Then it was not the ninth planet, but the tenth, because Pluto had not yet been excluded from the number of planets. Now he has already been excluded. When we visited Pluto, it was in 1999, he took me to the tenth planet. So he said that this is the tenth planet.

It is very far from the Sun, much further than Pluto. Its surface is the color of coal. When we landed on this planet, Kirchiton named a number of its characteristics, which I did not write down.

Maxim: Is it really so dark that you can’t even see it?

Irina: She's like coal. It's hard to walk on it. I was 13 years old then, I followed him when he walked. Two beams from the ship illuminated our path. We walked a little. There was only a starry sky around, the brightest star was the white-yellow Sun.

I also noticed that the stars did not blink. He said that there was a very weak atmosphere, almost imperceptible. I could barely lift my legs from the surface: it felt like a bag had been placed on me. We were in protective suits. I say I can't go that fast. And he told me: “Just think, one and four g.” That is 1.4 g. He walked calmly. Such is the gravity on the planet.

LiSioni and MidgasKaus do not remember her characteristics. You need to look in the directory. They studied the solar system several decades ago when they arrived on Earth. We found out from Kirchiton and provided this information. He is an astrophysicist, a specialist in planets. He gave information: diameter, mass of the planet.

The only thing I remember is that it is not located in the ecliptic plane. It is now moving away from the Sun, having passed more than half the way to the point of its orbit farthest from the Sun.

Maxim: It’s not in the ecliptic? Is it in a different orbit?

Irina: It is useless to look for it in the ecliptic, in the twelve constellations of the zodiac circle. She is beyond them.

Maxim: Interesting.

37:49 The sound of Esler's language. Appearance of the inhabitants of the planet Salathara.

Maxim: Question from Diana: “Hello, Irina. Can I ask you to say something in the native language of MidgasCaus, Esler? Without transformation into Russian. I'd really like to hear it. Let’s say this: “How I love you all.”

Irina: (Mead speaks) They distort my sounds. You can't say it exactly.

Maxim: At least approximately. As you can. “How I love you all.” I understand that it won’t work, our voice apparatus is different, but approximately.

Irina: It would be better if he entered me and said it himself. I can not.

Maxim: I don’t want to show this show when they enter you. I've seen this already.

Irina: MidgasCaus doesn't want to. Only Mirakh Count wanted.

Maxim: Archangels can.

Irina: Sometimes plasmoids also enter.

Maxim: How to say: “I love you all”?

Irina: "Taralyaim turuori".

Maxim: Irina tells you all: “Taralyaim turuori.” Clearly not. The speech apparatus is different.

Maxim: Gala writes: “When I connected with the Higher Self, they told me that my legs were intertwined on a subtle plane. Maybe that's why I don't feel energy? Could you take a look? Huge gratitude."

Let's do this: you sign up with the administrator. Link below the video.

Irina: Interesting, the legs are intertwined.

Maxim: Again, another vision of the contactee.

Irina: Maybe the binding goes through the legs.

Maxim: Maybe a binding. You just have to watch. Make an appointment with the administrator. Irina now receives residents of Russia personally. You can get there if you can come. On-line, of

course, the registration is very large, more than 2.5 thousand people. This is about a year in advance. You can come in person.

“What civilizations live in the Trapis-1 system in the constellation Aquarius at a distance of 39.5 light years from the Sun?”

Irina: In the constellation Aquarius, at the distance you indicated, there is the planet Salathara.

Maxim: What language is the name of the planet in?

Irina: (MidgasKaus speaks) I don't know the Daraal name. In one of the galactic languages.

There live creatures with heads shaped like onions, expanding in the center and narrowing at both ends. Pale blue skin color, similar to that of Shimorians, but lighter. Two eyes are dark sockets on either side of the head. Thin lips, small.

This civilization is part of the MS. They have few contactees on Earth. I have been in contact with them.

Maxim: There is a planet in the constellation Aquarius at approximately this distance.

Irina: Yes, approximately forty-two light years.

42:24 How to contact a deceased relative. Is Archangel Michael incarnate?

Maxim: Katyusha Muchkina asks: “Can I contact my deceased father?”

Irina: Yes. It is possible through the Higher Self. There is such a technique. You go to the Higher Self, ask to invite him, but there must

be a reason for this. Why do you want to invite him to talk? So say that through your Higher Self you are turning to the Spiritual world, ask him to come for a serious conversation, and what do you want to find out.

Why can you call them? Ask something important for your development or ask for forgiveness or forgive him, and send him the Light of Love.

Maxim: To do this, you need to come to a session at the Higher Self, or have a session with specialists who can do this.

“Good evening, Irina. In one of the programs it was said that Archangel Michael was incarnated on Earth. May I know in which country it was incarnated?”

Irina: No, he is not embodied. I don't remember such a show.

Maxim: I don’t remember such a program either. Archangel Michael is now in the Spiritual world. He is one of the seven guardians of the Christian religious egregor.

Maxim: If a person leaves suddenly, how can he tell his wife the credit card pin codes?

Irina: For what?

Maxim: To withdraw money from credit cards.

Irina: She’ll take it off anyway when she receives the inheritance.

Maxim: What if she lives in a civil marriage? May I know?

Irina: He died. She herself agreed to live with him in such a marriage. This means that she should have understood that his funds go to his family and heirs. Since it is not included in his expression of will, it

means that this was his will. We must come to terms with it. Nothing complicated. I think everyone knows this.

Maxim: She can't see the credit card PIN codes.

45:20 Causes of atherosclerosis. Herbs for the treatment of atherosclerosis. Health testing in St. Petersburg.

Maxim: Mid, a question for you. They ask, what herbs would you prescribe for cholesterol? Is there some kind of decoction?

Irina: He already named the composition. Long-term use of a composition of three herbs: immortelle, chamomile and St. John's wort gives a very good effect against hypertension caused by atherosclerotic changes in blood vessels.

Maxim: In what quantity? Proportions?

Irina: In approximately equal proportions. For example, take one tablespoon, pour about 300 ml of boiling water, and drink throughout the day. When you brew tea, leave it in a warm place for two hours.

There is a composition of red clover flowers and burdock roots.

There is a composition of garlic tincture in 40% ethyl alcohol. 40-proof vodka, pure, without impurities. You make the composition. You insist for 21 days, drink drop by drop.

There are different compositions for different vibrations. If you have high cholesterol, there is not only a physical reason, but also a spiritual one.

Many people think that high cholesterol occurs because of food when you eat too fatty, animal foods. No more than 20% of your cholesterol comes from food. 80% is produced by you, your liver. Most of the cholesterol that comes from food has the property of clearing blood

vessels of other types of cholesterol that can attach to them.

If the vascular endothelium is already damaged from the inside by various microorganisms, as well as by constant contractions and expansions, for example, from nicotine consumption or from frequent stress, then microcracks form in the vascular endothelium. The body “repairs” these microcracks from the inside by attaching plaques to them. Later, calcifications and fatty masses grow on them, as well as thrombotic masses from the blood, which interfere with its flow. This increases blood pressure, disrupts hormonal composition, nervous system functions, etc.

The spiritual cause of atherosclerosis is most often the feeling that the flow of your life is polluted by some external influences. You do not accept the world around you in the Divine Light. You perceive something as dirty, something you want to get rid of, and you fight against it. It doesn’t matter whether you are struggling in the outside world or within yourself. Fighting within yourself, but not saying it out loud, will even lead to illness faster, because energy will accumulate.

Maxim: I see. We have great news. A branch was opened in St. Petersburg. This branch has all the necessary equipment for testing the physical body “Oberon” - for testing the energy body “Crownoscope” - for testing auric structures.

Every Saturday this branch will accept people not only for spiritual services with “payment according to the heart” (donation), but also for diagnostics. If you want to sign up, you can do so by phone: 8 921 943 2887.

Irina: They ask: “Is there such a Center in Moscow?”

Maxim: Yes. There is a Center in Moscow. It is currently being formed. We have completely handed over the equipment. There will also be “Oberon”, “Crownoscope”, “Aurabook” and much more for health improvement. The center will be called “Gihor – Cassiopeia”. This is a research center where they can work with all your energy and physical structures. We will talk about this later, in the following broadcasts. As soon as the Center is formed and opened, we will

definitely inform you.

51:52 Causes of depression. How to get out of depression?

Maxim: How can a person cure depression on his own? What should you do to help yourself in a state when it seems that everything is lost? The question is not easy, not for one hour of conversation.

Irina: We need to find out the reason. Your doctors call endogenous depression, that is, occurring within you without exogenous causes - those that could be caused by the reactions of your psyche to surrounding circumstances. Something that has no external causes. But this does not mean that there are no internal spiritual reasons.

Your doctors are limited to examining hormonal metabolism in your brain. By identifying disturbances in the metabolism of dopamine, serotonin and other hormones and enzymes in your brain tissue, they conclude that the brain itself produced such hormones, which means there is no spiritual reason.

But your hormones and enzymes, their secretion, are controlled by your Spirit. This means that a person has internal spiritual reasons on the astral, mental, karmic levels, or karmic nodes, that is, negative vibrations acquired in past lives and transferred to this one to learn lessons in other conditions of existence. These are mental attitudes that were placed in the mental body in childhood and accepted as truth, which led to a decrease in vibrations.

Endogenous depression, when they feel that everything is lost, has ceased to exist, this is a state of low vibrations. People get into it for certain reasons. There is a way to get out of this state into a high vibration state, when you want to love everyone and thank everyone.

To do this, you need to connect with your Higher Self. A specialist will guide you and teach you how to hear your thoughts and convey them. The Higher Self is interested in you getting out of this state. It will definitely give you the answer, provided that you open yourself and learn to trust yourself. When communicating with your Higher Self, it

will be necessary to ask about the spiritual causes of your depression. Dissolve all the blocks that will be found, break off ties to the world of the dead, if any, and fill yourself with the Light of Love.

When you get into this state, your brain will begin to release other hormones that will lead you to a state of happiness. This may not happen right away. But in the process of communicating with the Higher Self, this state will definitely come.

55:25 Consequences of taking psilocybin mushrooms.

Maxim: Please tell us about the mushrooms that cause hallucinations, psilocybin. What vibrations do they give? Do they expand consciousness and vision?

Irina: (Both speak) There was this question.

Maxim: Let's answer again for mushroom pickers who like to indulge in mushrooms.

Irina: For mushroom pickers. For those who are going to go pick mushrooms in the forest.

Maxim: Yes. Mushroom pickers are those who pick mushrooms and then eat them.

Irina: The substances themselves that are included in these mushrooms do not change a person’s vibration, neither higher nor lower. They influence other things. Psilocybin.

Those substances that it contains, as in fly agarics and some others, affect not vibrations, but the perception of the Spiritual world and subtle-material civilizations. They cause the perception of those energies and spiritual entities that a person does not perceive in a normal state of consciousness.

Substances in mushrooms act on the brain in such a way that substances are released that open up this vision. And not only him. Hearing, sensations in the body that are caused by subtle contacts with entities. A person's vibrations remain at the level they were at before taking the substance.

What does this mean? That by taking this substance, a person will meet those entities that are at his vibration level. If these substances raised vibrations, then any person who took them would meet light plasmoids, Angels. But this does not happen, because his vibrations remain the same. He will meet those beings, interact and exchange energies whose vibrations he corresponded to at the time of taking mushrooms.

If he was afraid of something, doubted something, was offended by someone, irritated, for example, he had a fight with his wife in the morning and took a substance in the evening, he will have the corresponding vibrations, he will see creatures that will attack him.

Maxim: A krakozyabra lover will come to the Astral.

Irina: He can see, for example, a detachment of fascists who are seizing his house. He will be presented with such a picture by negative plasmoids who will want to feed on his energy of fear. And since he still has a little fear, they will want more energy. He will perceive this as reality in the material world, not in the Astral. He will think that they want to kill him, he will develop a paranoid state.

Mushrooms will not change his vibration so that he does not see such things. They will not dissolve his blocks of grievances and fears, they will attract entities.

Maxim: Great.

59:21 Practice "Communication with the Sun."

Maxim: Tomorrow is the day of the summer solstice. What practice would MidgasCaus or LiSioni recommend to our viewers for this day?

What's the best thing to do? How to harmonize yourself? How to find this energy? Where can I get it? Maybe bury something somewhere, dig something up, or write some code? What can MidgasCaus or LiSioni recommend to our viewers?

Irina: Any day, if you haven't done this, you can start tomorrow, on the day of the summer solstice, when the energy of the Sun on Earth is at its maximum for this year.

Maxim: They write that this is not exactly what Irina says. Do you think this is what Irina is saying now? Or not Irina?

Irina: I say. But I pass on the knowledge of our curators. I say what they tell me mentally, they say in images, thought forms and thoughts. But I say it myself, they do not enter into me. I'm translating. I'm relaying it.

Maxim: Aren't these reptilians telling you?

Irina: Mid, are you a reptilian? And you, LiSioni? They say, "We are descended from other forms of biological life."

Maxim: Great. At least there are no reptilians here!

What practice? What should we do tomorrow to become happy? Take it and make everyone happy one day.

Irina: The practice is "Communication with the Sun". You can start tomorrow. This day, more than any other day of the year, is favorable for starting practice. The energy of sunlight and the presence of solar plasmoids in the space of the Earth on this day are maximum. Solar plasmoids, their collective name is Ra, of many civilizations of different density levels.

No later than two hours after sunrise, you must wake up, according to your calendar, the time of your time zone, and take a position so that the Sun is visible. Either go outside, or near the window if it faces east.

Position: standing. If you are near a window, open it, at least a window, so that fresh air and with it the energy of sunlight can come in. Not through glass, but directly to you.

Stand in front of the Sun, close your eyes. Place your hands so that they are at right angles. Palms to the sky. This is a sign of greeting to the Sun, all its plasmoid civilizations, and a sign of request for the exchange of energies.

Then close your eyes and say it mentally or out loud, depending on the situation and your desire. I'll tell you as an example. Everyone will speak in their own words, you don't need to repeat it exactly, but the meaning should be like this. "I salute you, Sun." Treat yourself as if you were a living creature, because it will hear you over the beam, all its civilizations.

Maxim: Should you use your own words or use specific words?

Irina: In your own words. The meaning should be this: "I, you can name your name, thank you, Sun, great star, luminary of the entire solar system, for the fact that you give light, life to the Earth and all planets. For giving us the opportunity to incarnate on Earth and learn our lessons. I send you the Light of my Love in response to your light that you give for my life." Just stand and focus on the sensations in the center of your palms, on the mini chakras.

You will feel an influx of energy. Be sure to take a breath with the intention of accepting this energy into yourself. This inhalation with the intention of accepting the energy of the Sun will be your consent to the exchange.

Breathe this energy into yourself. Watch how it spreads throughout the body, watch how it goes down. Let it go to the soles of your feet, go into the ground or into the surface on which you are standing.

Do this three or four times. Each time this exchange will be felt more. With each wave of energy, say: "I thank and accept, I love and bless." You can speak in a whisper, or mentally. You can do it out loud. It

does not matter. “I thank and accept, I love and bless. I promise to use this energy to develop unconditional Love. Dear sun, I give you the Light of my Soul in return.” Mentally imagine how a stream flows from your heart towards the Sun.

If you do everything correctly, you will feel like a part of this Light, one of the rays. Stay in this state for as long as you feel comfortable. Even if you forget about the time, it's okay, it's normal.

About the polar day. What should those for whom the Sun does not rise, but is always in the sky, do? I am now talking about those who live outside the Arctic Circle.

Maxim: They can do this, it seems to me, at any time, turning to the Sun, precisely tomorrow, on the day of the Solstice.

Irina: If it is constantly in the sky, you can do it at any time. But it's better when you wake up. So you woke up, filled with energy on an astral journey, your body was renewed during this time with its physical energy, cleansed of toxins. If you are in a place where the Sun is constantly shining, then come up as people do in the morning and do it at the time you wake up.

It is advisable to do this without eating anything or taking water treatments. That is, first of all, then mind your own business.

At the end of this exchange, when you feel it is complete, thank your Higher Self. Say: “Higher Self, I thank you for helping me in this contact with the Sun. Sun, I thank you for this contact, for the exchange of energies. I love you". Open your eyes and go about your business. You will see that Light emanates from your actions, from your hands, on an invisible spiritual level. And everything turns out faster, more correctly and more harmoniously than before.

Maxim: Great. On this high note we end the broadcast. Thank you all for your questions. See you again!

Irina: See you again.

#295 Energy cleansing of space. Practice of harmonization and raising vibrations. Alien answers.

---

https://blog.cassiopeia.center/ehnergeticheskoe-ochishchenie-prostranstva
https://www.youtube.com/watch?v=kJza6Bla0E8

00:21 Information security.

Irina : You, Victor, (Zaliatar speaks) raised a very interesting topic of energetic cleansing of space. When they talk about ecology on your planet, they most often mean the physical body of the planet: its atmosphere, biosphere, hydrosphere. They pay less attention to the ecology of the Spirit, that is, information security.

It is more important than social or military security, because both of the latter types of security directly depend on information security.

01:16 The concept of information warfare.

Irina: Your civilization already knows some types of information wars. This, for example, is an impact on a person's consciousness and subconscious with the aim of causing negative emotions in him, lowering his own spiritual vibrations and causing degradation of both the individual and society.

A similar information war was carried out by nationalist leaders in their countries before military operations, when they convinced people of the superiority of their nation over others, when

they gave instructions to the minds of people who believed. They subsequently created the ground for military conflicts, which were always accompanied by aggression, anger and physical destruction, causing suffering and grief on both sides.

And this began only with the release of information into society. Like an injection. As for a large body, the injection of even a very small amount of a strong drug is important. It can completely disable the body. Likewise, a healthy society can be poisoned by informational ideas that the majority of its members will accept and lower their vibrations.

03:10 Information security techniques. Cleaning the space. Correspondence between the vibrations of a place and a person.

Irina: Information security, or, as you said, “putting up a shield,” is, of course, possible at the energy level. Representation of protections, pillars of light that cleanse the planet, your own inner sun that you can send to all living beings in your area every morning.

This can be done, it cleanses your own space, it raises your own vibrations. If ten out of a hundred people in your city do this, then (according to statistics) the crime situation will stabilize in two to three months. Space, I mean astral space, becomes highly vibrational. All people exist not only in physical, but also in astral space. Therefore, the high vibrational environment around them in a certain area acts in such a way that some people will enjoy being there, while others will try to leave. They will change their vibrations.

Perhaps you noticed when you came to a city, village or natural area for the first time that it was inexplicably pleasant for you to be in one, but something seemed oppressive in the other. And you could not explain such a paradox to yourself with your mind. It was you who felt the coincidence or discrepancy between the energy of the place and your own vibrations. Everyone feels it, but at different levels. Some explain this by their desires: I like it here or I don’t like it. Others understand that this is a premonition of something that they cannot explain. Therefore, when the vibrations of a place increase, those people who do not correspond to them will find it unpleasant to be there. They will feel uncomfortable if they decide to commit a crime. They will feel danger, they will feel that space itself is watching them. They will not be able to explain this to themselves on a rational level. Not all, of course, but the number of such people will be large.

06:19 Practice on protecting space.

Irina: The best shield for any space: Mediterranean, Russian state, Nagorno-Karabakh, etc. – every conscious person over 12 years of age imagines himself in the state of an earthly person (if the child is conscious, it is possible earlier).

When you get up in the morning and open your eyes, go to the window and look at the sky where the sun is. Realize how wonderful it is to wake up to a new day. Realize that there are many people who didn't see it. You stayed here to continue learning your lessons and tasks in this world. Realize that you are responsible for the space where you live. This does not mean that you monitor its contamination. The answer is that the way you create it is the way you will live. You are responsible to yourself, to your children and descendants.

So, as soon as you think about it in the morning, imagine that a ball of sunlight, the same color as the Sun, is in your chest. Say: “I am the Light of Divine Love! I send the rays of my Love to the entire space where I am. I cleanse this space of all low vibrational thoughts, states, energies and destructive influences. I send the Light of my Divine Love to all low-vibration Spirits who are in this space, and I wish them to know God and realize themselves as His children.”

You can speak in a whisper, you can talk to yourself, but with full awareness, with a full desire for this space to truly be cleared, with a full understanding that this is a mission, with faith in what you are doing. When you believe, you put energy into it. If ten conscious people out of a hundred do this in your city or district, then the situation will very quickly harmonize. This has already been tested on many planets.

09:17 Creation of a cleansing shield in Astral by people and plasmoids.

Irina: Such a shield in the Astral, indeed, in the Astral will look like a dome. It will consist of bright thoughts and feelings of your own people. Those plasmoids that live in your area and are high vibrational will feel your energies located in space. They will be happy to support them with their energies, from which the shield will be further strengthened by subtle energies.

Low vibration plasmoids and low vibration non-embodied Spirits, the so-called demons, will feel uncomfortable in this space filled with your Love as high vibration energy, will move to another place and will not be able to influence those people who live next to you.

Victor: Okay.

June 26, 2021

Participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Zaliatar is a representative of the planet Raom-Li (Pleiades), a futurologist, a specialist in healing practices, the study of the Spiritual world and the study of time lines, Vanga’s curator.

Victor is an interviewer.

#297 Extraterrestrial source of inspiration. Explanations from aliens. Art from aliens. The secret of poetry.

https://blog.cassiopeia.center/vnezemnoj-istochnik-vdohnoveniya-poyasneniya-ot-pr
https://www.youtube.com/watch?v=newYbUii42Q

00:21 Introduction of participants.

Irina: My name is Irina Podzorova. I am a contactee with extraterrestrial civilizations. Today next to me are two representatives of the planet Esler of the constellation Boötes, located at a distance of 36 light years from the Sun. This is a representative already known to you, my curator, MidgasKaus - biologist, psychologist, specialist in alien life forms. PiosNior is a specialist in history and art criticism. Alexander from Israel will ask our friends questions. Hello, Alexander!

Alexander: Hello, Irina. I greet you and your friends, our curators - brothers in mind. My name is Alexander Eisenberg. I have lived in Jerusalem since 1992.

Irina: It's very nice to meet you. PiosNior and MidgasKaus will answer questions about the art of the planet Esler and the Interstellar Union, talk about what they know and express their opinions about our art. They will speak the truth that is available to them at that moment.

01:48 Falun Dafa system. Teacher Falun. Falun emblem.

Alexander: The teachings of Falun Dafa. The Great Law of Falun. How did he manifest himself in the Universe? Did he help living beings in the Universe improve and learn the Truth?

Irina: (MidgasKaus speaking). I have studied your religious and philosophical systems. The Falun system was created on the basis of existing, more ancient teachings. It is a synthesis of scientific, esoteric knowledge and religion, Taoism, Qigong, as well as personal information received by the Falun teacher. Mead shows me an image, but not of the man who was there, but a little older. The essence of this teaching is to search for the true meaning of all religions and philosophies. I believe that this is a high vibrational Light spiritual system. She united many people, telling them that the most important Truth is not in books, temples and monasteries, but in each person's own heart.

What is the background of a Falun teacher? Judging by its vibrations, it was very close to the planet Esler, perhaps to the planet Shimor. Maybe he incarnated there. I don't have any information about his contact information; I can only request it with the person's permission.

He has the energy of our planet Esler, or the planet Shimor, which is very close to us. One feels that this is not an earthly Soul in the sense that it spent many incarnations on other planets.

The photo shows where images are depicted that reflect the physical manifestations of the subtle bodies of plasmoids. Characteristic balls and circles are the most energy-efficient form for constructing the structure of the bodies of fine-material civilizations. Judging by the energy of the photographs, these are images of various solar, mountainous, stellar plasmoids, volcanoes, and the earth's atmosphere. This is not one, but many civilizations.

The emblem is ancient. The emblem that I saw in the last picture is an ancient symbol of the earthly priests, which denoted the Sun, the energy of the Sun. Why was she portrayed this way? It was believed that the Sun is the progenitor of all elements. Four directions of the elements. Both the image of the cross and the image of the ancient Egyptian ankh originated from this solar sign.

Rotation in the Universe is a reflection of the Divine Law of perfection and infinity, since the ball and circle, when they rotate, are infinity. The circle is a symbol of infinity because its lines never break. The sphere is infinity because its surface is a separate dimension. It is infinite in itself, it has no interruption like other figures that go away at corners. Rotation is a reflection of the Divine Perfection of the one who created this world and its laws.

The Falun sign, like the cross, is a reflection of one point from which the four elements originate. This point is the Sun, from which all elements originate.

Alexander: Okay. We understand. You can ask about this topic for a very long time, because the teaching itself is very deep, like the Universe itself. We move on to the next scheduled question.

07:36 Poetic inspiration. Voluntary and involuntary inspiration.

Alexander: Second question. What is poetic inspiration, according to our intellectual brothers? Where does it come from, for what reasons does it appear in space, is it related to the resonance of Souls?

Irina: Poetic inspiration is a special state of human consciousness in which he is able to perceive information in images and translate it into words without changes. It's not just about writing poetry. It can manifest itself in different ways.

The word "poetos" means creator. The Greek word "poetis" means to create. Creative inspiration is work. Inspiration can happen randomly. This is the work of imagination, when images are combined with each other into words, when this is the work of imagination as part of the incarnate Spirit. There is involuntary inspiration - it is an open channel where the flow of information comes in the form of ready-made proposals from curators in the form of contact.

If this is contact, then the person understands that this does not belong to him, that this is the creativity of another. Poetic inspiration is a sign of the resonance of the Souls of the one who received this information through a spiritual channel, and the one who transmitted it. Soul resonance is a coincidence in vibrations. This can be conveyed in the form of poems, songs, prayers, mantras.

Alexander: Okay. Thank you!

09:46 The first song in the Universe. The first poems on the planet by Esler.

Alexander: Question three. How and when was the first poem or first song in the Universe created? Who inspired the first poet to create it? The New Testament begins: “In the beginning was the Word, and the Word was with God, and the Word was God.” How do our intellectual brothers understand these words from the point of view of their advanced science?

Irina: Two questions. Let's separate them.

Who wrote the first song in all of Creation? Only God the Father knows this.

I can only speak for my planet Esler, as an art critic and historian (PiosNior says). I have studied this issue. We also write poetry in our language. The first poem we found was written approximately 28 thousand years before our independent flight into space. The most ancient poetic lines on our planet were written at this time.

If they are translated, the meaning is that order in the Universe is a reflection of order in my Soul (meaning the Law). Each star rising above me is a manifestation of the quality of the Spirit, which appeared in the sky of my consciousness so that I could look at myself, as in a mirror.

The point is that he looked at the sky as if through a window, but this window showed himself. These few lines about the sky, stars, awareness were found. These are philosophical reflections on the subjective and objective world and their differences from each other. This is how our scholars view this verse.

12:45 The concept of “Logos”. Interpretation of the translation of a verse from the Bible.

Irina: Interpretation of a verse from the Bible. Please read it again.

Alexander: “In the beginning was the Word, and the Word was with God, and the Word was God.” How do our intellectual brothers understand these words from the point of view of their advanced science?

Irina: From the point of view of the science of the Interstellar Union, we consider words in the language in which they were written. In what language did John the Evangelist write these words?

Alexander: The New Testament was written in ancient Hebrew, although Hebrew has changed little since then.

Irina: In what language did John the Theologian write the lines of the “Gospel of John”? He wrote them in the ancient Greek version. At first, the “protos” stands there. “In the beginning was the Word.” Where translated as “word” is the word “logos”. The translation options for the word “logos” into Russian known to you are “word, science, teaching.” From the point of view of the science of the Interstellar Union, the word “logos” denoted a thought, a mental form, a thought form that had a formalized appearance. Something like an independent Spirit, one might say a phantom, endowed with will.

According to the science of the Interstellar Union, John the Theologian designated the birth of the Primordial Spirit - Jesus Christ, in a state of contact that was understandable to him. “In the beginning was the Word.”

First of what? What is the Beginning? The beginning is the first consciousness that separated from God and was born from him. This does not mean the beginning of the material world. It was beyond time and space. “In the beginning was the Word,” in the beginning was the Logos. This is a mental construct, the thought of God, his phantom, fully endowed with Divine properties in full, having all the fullness of Divine perfection. He already was. “In the beginning was the Word.”

“It was” is the translation into Russian. In fact, a verb is used that is translated by the word “became.” “It became”, but for us “it was”. But at the same time, “it” is in the Spiritual world, and in the Spiritual world there is no time. Therefore, the view from the material world reflects that “it” was, is and will be.

Alexander: This gave me an idea: isn’t the Logos itself some kind of mechanism for controlling the Universe? What does our curator think about this?

Irina: Now he will finish. In the beginning there was Logos, some thought of God. "Became".

What does "became" mean? I began to realize myself as a separate, separate person and at the same time in unity with the Father. He could act independently, but his will was one with the will of the Father. The first born Spirit.

In the beginning there was Logos. God had the Logos. The use of prepositions from Greek to Russian in translation is a different story. Very sad, because when you use a different preposition, the meaning of the entire phrase changes. There is a preposition that can be translated as “in the middle, in the middle, in, between.” This preposition means that the Logos was surrounded by God, he was inside him and was a part of him. The idea is emphasized: despite the fact that he became separated, by nature he remained in God.

The logical sequence of thought of the curator John the Theologian, who passed on this contact information further, allowed him to conclude his thought: “And the Logos was God.” This is a logical consequence of the two previous statements. He who is born of God and abides in His Energy cannot but be God by nature.

This refers to the Firstborn Son of God. Each subsequent Son of God, each intelligent Immortal Spirit that is born from him, and was born outside of time and space, appears equally according to the same principle as the Logos. We are all Logoi, temporarily and partially enclosed in material bodies. Our main Logoi are in the Spiritual world even now.

Alexander: Excellent, very good answer. I received an answer to my question related to Logos. I think that it is for this reason that our brothers in intelligence do not lag behind us. They are always with us, supporting us. They see something extraordinary in us.

19:26 Speech of God and Angels. Thought forms of poetry and prose.

Alexander: On this topic. Is poetry, in the opinion of our intellectual brothers, an attempt to embody Divine speech on our planet Earth?

Irina: Divine speech, meaning God the Creator of the Universe?

Alexander: This means God the Creator of the Universe. His speech, everyone who is in fellowship with him, is in general harmony.

Irina: Angels and God. Fine. The speech of God, immaterial entities, disembodied Spirits consists of a stream of thought forms. Thought forms can be expressed in different ways, both in verse and in prose.

Poetry can express the nuances of feelings, in short and precise terms, that prose would take a whole page to do. It takes more time to describe the feelings inherent in the story than when reading any poem. In addition, you won’t get the same definition and image.

I would not say that in the Spiritual world they speak in rhymes, they speak in thought forms. When translated into the language of the material world, the result is often poetry, since in addition to meaning, they also carry with them the vibrations of those entities whose thought forms this information is an expression of. The speech of God and his servants the Angels consists of thought forms. This can be accurately expressed in the language of poetry.

21:35 Singing and dancing worlds in the Universe.

Alexander: Are there such worlds where they speak in poetry and move beautifully, like in ballet? Do such worlds exist in the Universe?

Irina: So that they speak in poetry everywhere?

Alexander: Yes. For some reason our art reflects this, it gets it from somewhere. Ballet takes these movements from the higher worlds, classical music takes these vibrations. Poetry also gets this from somewhere. Are there any worlds from where all this comes to our Earth?

Irina: There are high-vibration plasmoid worlds where beings in subtle bodies move as if in a dance. The flow of their thought forms is rhythmic, but this cannot be called human speech; they do not have such organs. But it is so rhythmic, following each other in the right proportions, that it can remotely be called a song.

For the human ear, it will either not be audible at all, or it will be some kind of whistle. For them, this is structured, understandable information. They move as if in a dance. The plasmoids of the Sun and Sirius especially like to do this. They have entire dancing worlds. There are such plasmoid civilizations on Venus. They are in constant motion, seemingly chaotic. There is an order when each plasmoid, with its movement in a circle or along another trajectory in the form of infinity - a figure eight, reflects its gratitude to the Universe, Love for God and all His Creations.

Alexander: Okay, great answer!

23:36 Syllabic proto-language. Runic alphabet. Religious beliefs before the war 12,000 years ago.

Alexander: I asked about Great Tartaria, a culture that is talked about a lot on the Internet. It existed before the emergence of religions on our planet. Was it somewhere between science and religion, or perhaps something similar to what our curators are living in now?

Irina: It existed before the emergence of what religions?

Alexander: Before the emergence of all religions, including, of course, monotheistic ones, when they believed in many gods.

Irina : Before the war? Zoroastrianism, for example, is a monotheistic religion. It arose even before Judaism, approximately six thousand years ago, even a little earlier. Zoroastrianism arose about seven thousand years ago. So this was before then.

Tartaria. Who named what territory and in what language? Discrepancies exist across different sites.

Alexander: Some call the territory of the entire globe. Allegedly, everyone on the globe spoke a proto-language, which is very close to the ancient Slavic language.

Irina: I understand. Indeed, after the war, 12 thousand years ago, when people were resettled on Earth, at first everyone spoke the same proto-language. They spoke it before the war for many hundreds of thousands of years. This proto-language was syllabic. It was known in different regions from twenty-one-twenty-two to fifty-eight letters, even up to sixty, but they were like runes. They differed in different regions of the Earth.

There was a runic alphabet for common purposes, and there was a priestly runic alphabet - hidden, secret. Priests of different gods could use different runic alphabet or give different meanings to the same runes. They wrote secret messages, understandable only to them and their students, and left codes about the meaning of certain runes.

Why runes and syllables? This language made it easier to communicate with representatives of plasmoid civilizations. Service, worship and communication with them (magical cults) were the essence of ancient religious beliefs, if we understand the word “religion” as belief in invisible beings, communication with them is not material, not physical. These were ancient religious formations that did not resemble modern religions. There were no temples, but later, before the formation of formalized religions, there were separate temples. In Ancient India and Ancient Greece, very richly furnished temples with hundreds of priests, oracles, servants, and brahmans were known, who had a completely religious cult together with their disciples.

The very first religious beliefs on Earth were associated with contact with plasmoid civilizations. They were simpler. It was a fire on which offerings were made to the Gods or Spirits of Fire with the reading of mantras, spells, prayers and making contact with the help of a special drink prepared from herbs. Getting into contact with God, asking him for help, protection of the tribe, fertility, successful childbirth. There were such religious cults there.

The meaning of the syllables was different. They were transmitted by plasmoid civilizations that preserved Rus' for thousands of years. They still remain, some of them live long and still remember the change in the religious paradigm. They came into contact with Irina and conveyed the meaning of the syllables that were the most common in recent times. You can say any simple word that can be broken down into syllables. I'll decipher it. Say any word.

Alexander: Okay. Question five. Everyone knows that Alexander Sergeevich Pushkin was, is and will be the Sun of Russian poetry and the creator of the modern Russian language. What is the opinion of our intellectual brothers on this matter? Where did Pushkin get his inspiration from? Where was the true source of information and vast knowledge encoded in his immortal works? What are the true details of his tragic death? So, in order, right?

Irina: Yes.

30:26 The spirituality of Pushkin’s works.

Alexander: Pushkin is the Sun of Russian poetry and the creator of the modern Russian language. What do our curators think?

Irina: The creator of the modern Russian language, the Sun is a subjective opinion. Before him, Derzhavin and Lomonosov also wrote poetry. He wrote a lot. “Sun” is simply a figurative expression that reflects his Soul. He was the Sun because he shone with his knowledge, his talent. His poems, poems and prose works are not only filled with beautiful style, but also with kindness, love, and he laid down moral standards in them. They are a good teaching example for the younger generation. Therefore he is the Sun.

31:32 Pushkin is a contactee of the Spiritual world.

Alexander: Where did he get his inspiration from? They say that the nanny told him. She had many higher educations. Where did Pushkin get his inspiration from? Where was the true source of his vast knowledge? They said that he encoded ancient knowledge, for which the Masons killed him. There is such an opinion. What is the true source of knowledge, where did he get it from?

Irina: He himself was a member of the Freemasons.

Alexander: He himself was a member, but they put it that way.

Irina: There were many who were members.

Alexander: He was a member, that’s why they checked him, they thought he belonged. That’s why they allowed me to publish my works. Then they discovered that something was wrong. I don’t know how correct all these versions and opinions are. I read all this on the Internet. Our question is, where did he get his information, his inspiration?

Irina: MidgasKaus and PiosNior believe that Pushkin had very good contact with his Higher Self, with the Spiritual World, with his own Guardian Angel. Mead believes that in terms of energy he was a believer, believed in God, in the immortal Soul. In the depths of his Soul he was a believer, a kind, bright person with pure and high vibrations.

Who did he contact? The Spiritual World was in contact with him energetically. He drew a stream of inspiration for his works from contacts. In his life, he read a lot, studied ancient legends, myths, was interested in religions, Russian Gods, fairy tales, and the history of Rus'. From his friends or in libraries he took and read works that were hidden from the public and were not widely published. Many of his fairy tales, written for children, were based on reflections on ancient images of the Slavs and other peoples.

These reflections sent a request through his Higher Self to the subtle world, which reflected this or that myth or fairy tale. Representatives of this subtle world came to him and spoke lines. Tales about King Guidon, about the fisherman and the fish - these are all ancient fables, myths, images that reflected the reality of the Spiritual world. What does this mean - you can take them and simply disassemble them.

Alexander: Okay.

35:16 Causes of Pushkin's death.

Alexander: What are the true details of his tragic death? Did he die in a duel or was it something else?

Irina: In a duel? He later died and was wounded.

Alexander: He was wounded and then died.

Irina: He was wounded, he could have been cured, this is a well-known fact. Medicine just couldn't. Was his death accidental?

Alexander: Was everything as it is described in our Russian culture? He was wounded in a duel, then he was taken home. Either they were late with treatment, or for some other reason he died at home. Was it all like this or was it different?

Irina: Such questions need to be asked to himself, his Spirit or the one who was present. But they believe that this is nothing unusual; at that time this was done often. Moreover, in St. Petersburg, among people of his class, who, by the way, were partial to wine and controversy. Such incidents happened regularly. Pushkin was not the only one who challenged him to a duel.

Why did he so easily agree to such adventures, given that murder is the withdrawal of the Spirit from incarnation? At that time, in the 19th century, the nobility, to which he belonged by right, education, and worldview, was captivated by the heroic images of medieval knights. Unfortunately, at that time on your planet the life of an incarnate intelligent Spirit was not valued more than the spoken word. Even now, almost two centuries later, the picture has not changed radically. Now there is no such thing, but there are other forms of disrespect for life.

Alexander: I see.

38:00 The influence of words on people's health.

Alexander: Question six. According to the great scientist, Pyotr Petrovich Garyaev, the founder of linguistic-wave genetics, human speech has a strong impact on a person's genotype. What is the opinion of our intellectual brothers about how words and poetry influence a person's genotype? Is it possible to create poetic works that heal people and prolong their lives?

Irina: Great question! (Smile). We heard about Pyotr Garyaev. (MidgasCaus speaks like a biologist). A person's genotype is influenced not by the words themselves, but by the feelings that are embedded in them. Feelings cause certain emotional states - this is a manifestation of

energy. The energy of feelings, emotions, desires is the energy of the Spiritual world, it manifests itself through the body.

The Word is the manifestation of spiritual energies through the physical body. Here everything depends not on the words themselves, but on the emotions with which they are spoken: love, hatred, faith, trust, contempt, indifference. These energies will influence with their vibrations the genotype of the one who said them, and the one who was nearby to the extent that he himself has these vibrations.

How does it affect? High vibrational states of the Soul will raise the vibrations of the one who speaks them. A good example of prayers and mantras. His body will undergo the current quantum transition. The quanta of his body will move to another level of vibration and become inaccessible to low vibrational states, which can cause diseases, infections, and decreased immunity.

Low vibrational feelings and emotions (hate, anger, resentment, fear, words spoken with fear) provoke the formation of energy clots in the body, or rather in the aura, in the etheric-astral fields, which are called negative blocks. They block the life force energies that flow through the channels of the etheric body. This affects the cells of the physical body, causing them to age, deformation, atrophy, slow metabolism and, finally, the death of these cells.

Alexander: I see. Thank you very much! Very interesting answer.

June 28, 2021.

Conference participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms;

PiosNior - art critic, psychologist, specialist in the transmission of sound vibrations for the purification and harmonization of space;

Alexander Eisenberg, Israel.

#298 Enlightenment, awareness, unconditional love. Signs of spiritual awakening. The path of the heart.

https://blog.cassiopeia.center/prosvetlenie-osoznannost-bezuslovnaya-lyubov-prizn
https://www.youtube.com/watch?v=d1rV2XdM0us

00:21 Introduction of participants. Interpretation and types of enlightenment.

Irina: My name is Irina Podzorova. I am a contactee with extraterrestrial civilizations. With me today are two representatives of the planet Esler from the constellation Bootes. The planet is located 36 light-years away from the Sun. One of them: my curator MidgasKaus is a biologist, psychologist, specialist in alien life forms. The second is PiosNior - a specialist in history and art criticism. Alexander from Israel will ask our friends questions. Hello!

00:59 Absolute faith. Types of enlightenment. Lie.

Alexander: How do our curators feel about the works of Nikolai Levashov and the fact that he did not believe in the Gods? But he believed.

Irina: Unfortunately, they are not familiar with his works, they don't even know his last name. You need to say the idea, and they will already say their attitude. His books are not sold in their bookstores.

Alexander: Its main idea is that a person receives enlightenment through knowledge. That is, it expands the cognitive abilities of its brain, thereby being able to control celestial bodies. If a comet approaches the Earth, he is able to turn it in the other direction with the power of thought so that it does not touch the Earth. He is not a follower of any religion or egregor. He knows how to do it and is able to influence with the power of thought.

Irina: He is able to influence not by the power of thought, but by the power of faith.

Alexander: Maybe by the power of faith. How do they see this?

Irina: The power of faith influences the material world. But for this, faith must be absolute.

What is "absolutely"? So, without a doubt.

Regarding enlightenment with knowledge. There are several interpretations of the word “enlightenment”. There is mental enlightenment when the unknown becomes obvious and we feel a surge of Light within us. In Esler's language this is called "alemanshinoconoma" - a touch of Divine wisdom.

Another type of enlightenment. There is “Touching Divine Truth.” Whoever has experienced it begins to see the Light in all kinds of truths and half-truths that exist in the Universe. In every lie they will find the truth and the thought or emotion that they distort. Precisely to identify distortions.

A mental construct, idea, theory about the knowledge of the Universe and the Spiritual world is usually true. But they are distorted into lies, passing through the astral plane, through low-vibration feelings, desires, fears, instincts, emotions. They become lies.

A lie is always a denial out of fear. Some part of the truth, ignoring everything else, becomes a lie.

Enlightenment with Divine Truth, then Enlightenment with Divine Wisdom is Enlightenment with Divine Life. This is a state when a person is able to truly revive. Not to revive the body, but to heal, bring it into wholeness, not to treat illnesses like a doctor, but to make the Spirit, Soul and body whole. Eliminate the causes of illness on a spiritual level. Do not eliminate them yourself, but open a person’s eyes to them. Since these diseases arose in a person as a violation of his integral personality structure - body, Soul, Spirit, all this enters the personality - then only the person himself can eliminate them. One who is enlightened by Divine Life can help him in this by reviving in him this touch of life through his spiritual heart.

There is also enlightenment (where this word comes from) - this is a touch to the Divine Light of Love. This type of enlightenment has become very common among earthly people. This is a type of enlightenment when in the heart for some moments, minutes, hours or even days, nothing remains but absolute unconditional Love. It dissolves all fears, mistrust, psychological defenses, aggression, etc. They are transformed into pure Light of Love. Each of you can experience such enlightenment as soon as you touch and enter the Light of your Higher Self and allow yourself to be filled.

06:57 Structure of the intelligent Spirit. The path of the Mind and the path of the Heart.

Alexander: Question eight is about love. Is it correct to say that the mind is a good servant but a bad master? Is there love at first sight, the love of two hearts that recognize each other in an instant? How is love distinguished from affection in the Universe?

Irina: Come on, take turns.

Alexander: The mind is a good servant, but a bad master, the heart knows better. What do they think?

Irina: The Truth is reflected here, but it is not fully expressed in those constructions of reality that a person could understand. To fully express it, you need to tell you about the structure of the intelligent Spirit, which reflects its true structure in the Universe, wherever it is incarnated: on Esler, on Earth, or not incarnated at all.

The spirit consists of the essence, the core or spiritual heart, the energies that envelop it, and the mind, which is an ever-changing superstructure in incarnations. In energies and in the heart, incarnations occur more slowly.

All abilities of the mind: thinking, imagination, memory - are aimed at fulfilling desires, feelings, and instincts of the heart. If by “I” or “ahamkara” we mean the ego, or specifically consciousness, then this is not the heart or the mind. This is a type of energy. A type of Spirit energy that is aimed at perceiving the world around us and oneself.

That part of consciousness that is aimed at perceiving oneself is Self-Awareness. It is located approximately in the middle between the mind and the heart. This is energy, and you are a stream of energy that endlessly flows through space and time, permeating them and, at the same time, not being in them.

You can use prompts from the mind, using all methods of information processing: synthesis, analysis, induction, deduction, etc. And the promptings of the heart, the call of the heart: intuition, conscience, instinctive drives, one’s desires (this is also the call of the heart).

What is better, what is preferable? The spirit here has complete freedom of choice. For God there is no preference: the path of the Mind or the path of the Heart. Both of them are equally saving, provided that the mind and spiritual heart are filled with the Light of Love. But at the same time, the mind and heart can equally be plunged into the abyss of degradation if they are filled with darkness, as with the absence of Light.

There is an expression in the Bible: “Above all else, keep your Heart, your greatest treasure.” This refers to the spiritual heart. Jesus Christ emphasized in the Sermon on the Mount that “the pure in heart will see God.” The one who clears his heart of negative blocks, destructive, selfish desires. This is the desire to receive pleasure, despite the states of desire and feelings of the person nearby due to the lack of love for him.

A desire that is not manifested in the Light of Love is a selfish desire. Only a pure heart can “see” God. God can be seen, seen, understood and accepted the evidence of his existence precisely with the heart. In this verse, in this place of his sermon, Christ did not say that it is through the eyes that one can see God. Physical eyes cannot see God for the reason that His Energy goes so far beyond the limits of perception of physical eyes as the size of the Galaxy exceeds the size of a grain of sea sand.

Alexander: Great answer. Is there love at first sight? Many people ask about this. How to distinguish love from affection? These trivial questions have interested people throughout the centuries.

12:53 Falling in love. Love.

Irina: Is there love at first sight? We distinguish Love, as an eternal state of the Soul, from falling in love, its first manifestation: sympathy, attraction. But falling in love must grow into love, just as a spark must flare up into a flame.

Falling in love is the first Divine Grace. It is presented to Souls in love so that they can grow the state of Love in their hearts during their life together. Only when both parties show patience towards each other and spiritual work on themselves, can an eternal feeling of Love arise. It will not disappear if the appearance of a loved one or his financial condition changes. This state of eternity should not be deserved. To get it, you need to work hard. Only in this way can it be appreciated in the happiness and Light of our one Creator.

Alexander: Okay.

14:09 Affection. True love.

Irina: How to distinguish love from affection? Attachment, if I correctly understood the etymology of this word, comes from the word “binding”. This is the state of a person’s Soul when he cannot do without another, when he is attached, when the state of the Soul of one person depends on the state of the person nearby or on his presence. This is not true Love or infatuation, because... the state of the Soul is distorted, its vibrations are reduced. This is the same Love, but the vibrations are lowered, it has changed its properties due to the selfishness of a person, because he looks only at his own feelings, and not at the feelings of the one he loves.

A truly loving, in love person is happy because his beloved is happy, regardless of whether he finds this happiness with him or not with him. Alexander Pushkin, Omar Khayyam, and many others wrote about this. They knew the great feeling of Love. Many poets, writers of the Earth and many other planets sang about Love, wrote poetry and prose. The essence of love is expressed in just a few words: “Love makes you like God.”

Alexander: Excellent answer, very inspiring, resonant, thank you very much for your answer!

16:17 Prime numbers. Eslerian science - astronumerology.

Alexander: Question nine. Is it true that the number "9" is the largest number in the Universe? After all, if you add 9 plus 9 means 18, and 1 plus 8 again 9 means returning to the original position. They say adding 9 plus 9 means returning to the original position. Question: Is the number 9 the largest number in the Universe?

Irina: It is the largest number of prime numbers.

What are prime numbers expressed in your decimal system: zero, one, two, and so on? Each number differs from the other in the vibration of energies. It carries an energy code that contains the energy of a symbol of certain mental, spiritual and energetic states of the physical and Spiritual worlds.

In astrology this is expressed through the planets. Each planet has its own number.

In fortune telling systems and mantika, this is expressed through runes and Tarot cards, which also have their own numbers. In scriptures, such as the Kabbalah, this is expressed through the alphabet. Each letter also has its own number. Names and words with the same numerical code are objects that have the same energy vibration, and therefore carry the same properties.

This is studied by Esler's science - astronumerology, which can be translated into your language. We gave Irina knowledge on how to calculate the level of the Spiritual world using special formulas, the percentage of energy in the chakras at the time of incarnation, the Tree of Life, the manifestation through the symbols of the planets of various character qualities, the ancestral egregor, etc.

Alexander: Thank you very much.

18:50 Manifestation of the Spirit in the physical body. The influence of the union of the embodied Spirit with the Higher Self.

Alexander: Last question, tenth. Your curators said that the Spirit can incarnate into an insectoid by 25 percent, and into a Burkhadian by 75 percent. In my opinion, the human body, having achieved enlightenment with knowledge, is capable of containing much more. Can the Spirit potentially incarnate into the body of a person from our planet 100% or more, i.e. develop and expand even beyond the limits of the material body?

Irina: (MidgasCaus answers). According to studies of the Spiritual World, incarnation into any body not only of third, but also of higher density, that is, in plasmoid worlds, must be accompanied by a certain percentage of the Spirit leaving in the Spiritual World. This is necessary for the potential connection and construction of the Spiritual channel with the Source of Light, with God through the levels of the Spiritual world. Some part should still remain.

The percentage of manifestation of the Spirit in a person’s physical body can change, but not due to incarnation, but due to the release of the embodied part of the Spirit through the spiritual channel to its Spiritual Self, the Higher Self and connection with it. At the same time, embodiment in the body is not lost at all; contact with the body and the ability to control it remain. The process goes in the opposite direction: merging with your true self and building your spiritual essence, feeling like a whole person. This is accompanied by the removal of the blocking of memories of past incarnations, if, in the opinion of the Higher Self and the guiding angels, this is required by the person in the current incarnation and will not disrupt his plans.

A person becomes able to correctly convey Divine Wisdom to the lowest vibrational and

mentally undeveloped Souls, in those images and expressions that will be close to their consciousness. The Enlightened Spirit, who is in constant connection with the Higher Self, immediately sees the movements of the Soul, the reasons and motives of a person's actions and is able to respond to everyone at the level of his vibrations.

Alexander: I see. Thank you very much, my questions are over. All that remains is to say a big hello to all our curators, all our Brothers in Reason. My He-shi, as they say in Falun Dafa. He-shi is palms folded together. I convey my respect to the entire Universe, to you, Irina, to all your friends and wish you success, love and complete harmony in the Universe! In my opinion and the opinion of many researchers, the Universe from a very distant distance resembles a person.

Irina: I thought it was a human heart. To the left and behind you, two plasmoids flew by in the form of balls.

Alexander: Yes, these are not my parrots, these are plasmoids.

Irina: I saw the plasmoids still flying by.

Alexander: Okay. Here they are, two. I sincerely believe you, and thank you very much for your answers, they were really very deep and very high spiritually, I thank you with all my heart!

Irina: Thank you for your questions!

June 30, 2021

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

MidgasKaus - representative of the planet Esler, biologist, psychologist, specialist in alien life forms;

PiosNior - representative of the planet Esler, art critic, psychologist, specialist in the transmission of sound vibrations for purification and harmonization of space;

Alexander, Israel.

#302 Oncology. Causes of tumors, psychosomatics, gene mutation, treatment. Do aliens get cancer?

https://blog.cassiopeia.center/onkologiya-prichiny-opuholej-psihosomatika-mutaciy
https://www.youtube.com/watch?v=gkFb90w25iw

00:21 Introduction of participants.

Vladimir: Hello, dear friends. My name is Vladimir Goldstein. Today I am not alone in the suburbs of Chicago. We have an important conference that many people are looking forward to. Some people know about it, others don't, but I'm sure it will be important to many.

Next to me is my friend, his name is Vadim Kozlovich. He is an oncologist. A professional oncologist who was the head of the oncology intensive care unit in Belarus. He will tell you more about this now.

We will talk about a very complex disease, which, unfortunately, still affects a huge number of people on Earth. Much about it, including to scientists, is not clear. Today we will try to clear this up with a professional who works in the US in the medical industry. He'll tell you about himself a little later.

Now I would like to introduce Irina Podzorova. Our dear contactee. Ira, who will answer questions about oncology today?

Irina: Hello, dear friends. Hello, Vladimir, Vadim. My name is Irina Podzorova, I am a contactee with extraterrestrial civilizations.

Today my curator, biologist, psychologist and specialist in alien life forms, MidgasKaus from the planet Esler, will answer questions about oncology. "According to alien life forms" means, according to earthly life forms, because for them we are aliens.

Vladimir: Thank you. Greetings, Mead. It's clear that he is aware and carries out diagnostics.

Now I turn to Vadim. Tell us in more detail so that our viewers have an idea of your medical experience, the positions you held, so that it becomes clear who is asking questions today.

Vadim: Good afternoon. In Belarus I was a doctor. He worked in an oncology clinic for 15 years. My story in the States now: I work as a second surgeon, assisting in operations.

Vladimir: Clearly, not an amateur, but a professional in the field of oncology, in which, as I understand, I have seen a lot, know a lot and have something to talk about. Okay, let's begin. Please, can I ask?

Vadim: Good afternoon. I'm addressing an alien named Mead, I take it?

Vladimir: Not quite human.

Vadim: Okay, I'll still call him a man. Mid, hello. My first question.

03:11 Cellular structure of dense material forms.

Vadim: Tell me, is the cellular structure universal for all living beings known to you, or are there some other forms of organization of living matter?

Irina: If by cellular structure we mean a nuclear or non-nuclear structure that contains the main energy stations and organs of cell reproduction and metabolism, then yes. All living organisms of dense material form are contained in one form or another in the form of a cell. We call a cell the smallest part of any tissue or organ, which naturally differs in a multicellular organism. This is typical only for dense material forms: for humanoids, which I am, like you. But this is not typical for plasmoid life forms, in which the body consists of thin-material structures that do not in any way resemble cells, because they do not consist of substances: atoms and molecules.

Vadim: Thank you, this is a great answer. Let's move on.

04:39 Genetic information of dense material life forms in the Universe.

Vadim: We are now talking about dense structures, about those who have a body. Is the form of recording genetic information also universal for all creatures? Does everyone have DNA? Are there any other options?

Irina: I would not say that the form of recording information about an organism is universal for everyone, since its carriers can be completely different molecules and groups of molecules, which are sometimes concentrated not even inside the cell, but in its cytoplasm, membrane or endoplasmic reticulum.

Vadim: Great. Can you give any interesting examples? For example, what substances are

used to record information?

Irina: In addition to the earthly form of life, I was also interested in others, for example, organosilicon life forms on the planets Gesam, Gihor and their colonies. When studying cosmic life forms, I came across substances like your ribose polysaccharide with a substituted group of atoms. A group of atoms in a molecule that is not a glucose molecule is replaced; there is a replacement in the carbon atom with silicon, germanium and other substances.

Vadim : Natural silicon organization.

Irina: Yes. In the carbon form of life, it happens that some amino acids and some lipid-protein complexes act as carriers of genetic information. Of course, they are somewhat different from the fatty acids you are used to, but, in essence, their properties are the same. Their complex compounds.

There are even ones that are completely unusual for you, for example, containing a benzene ring and other forms of molecules.

Vadim: Thank you. Tell me, in your opinion, which recording method is more convenient and practical?

Irina: Even on Earth there is some diversity of genotypes, although it is based on a single law. But still, the speed of data transfer from the cell nucleus to its protein-synthesizing station is different. The exact recording varies. Or rather, not an exact recording, but the accuracy of its transmission to other structures that are already producing certain organelles and their complexes.

The most perfect? Of course, if I move away from Esler's method, which is somewhat reminiscent of yours, but is duplicated not by two strands of DNA, but by the 14th. They are like a spiral in three-dimensional form.

Vadim: Our spiral is also three-dimensional.

Irina: They have 14 branches that transmit, I would say, genetic information with greater accuracy so that the enzymes, proteins and other complexes that make up the cell contain more uniformity. This somewhat neutralizes the risk of dangerous mutations and increases the ability to adapt to any form in any type of environment. Of course, within certain limits, but more than among earthly people. But this is in my opinion. Maybe because I myself am an Eslerite and somewhat biased.

Vadim: I don't quite understand about the 14 branches. A person has 4 nucleotides, how many do you have?

Irina: 16, if by nucleotide we mean the monomer that makes up the DNA itself.

Vadim: Yes, this is the monomer that DNA consists of. 16. It seems to me that increasing the number does not lead to increasing reliability. The simpler the system, the more reliable it is.

Irina: I repeat, perhaps I am somewhat biased in this.

Vadim: Okay. Another question.

10:26 Esler humanoid organelles.

Vadim: Tell me, do you have organelles the same as humans? Or are we radically different?

Irina: We have organelles that are responsible for energy synthesis, for cellular synthesis, that is, for the synthesis of substances, for the synthesis of energies, cell protection, and also for the protection of extracellular space. They are usually attached to the outer wall of the membrane.

Vadim: Are they the same as ours?

Irina: We don't have (accompanied by images) such a thing. I just show her pictures from our cytological literature.

Some of our cells have not one nucleus, but many, that is, a polynuclear system. All this depends on the fact that there is more information in our DNA and greater precision of information for the production of certain substances. We also have a duplicated diploid set of chromosomes; we have 137 of them, if by chromosomes we mean certain bodies that contain DNA.

Our diploid set of chromosomes is duplicated in the cytoplasm itself, and in several places. We have several types of bodies that perform the functions of ribosomes. When that part of the cell that functions as messenger RNA for you approaches the part that functions as a ribosome for you (I have to speak in a very simplified way in the language of the contactee), everything is duplicated. The information is checked before synthesizing the protein: how correctly the messenger RNA, not yours, but ours, read the information about a particular protein. Are there any errors there? If necessary, errors are corrected with special enzymes.

Vadim: These mechanisms also exist in our cells.

Irina: We have several of them. One duplicates the other. This mechanism, which allows information recorded in chemical elements to be transferred to the synthesis of cellular structures. We study how it is controlled by our life, our Spirit, life force and so on. We studied

this whole process not only as biochemistry, but also as bioenergy.

Vadim: I see. Fine. Thanks for the answer.

14:29 Esler humanoid leukocytes.

Vadim: As far as I understand, you do not have organelles identical to ours. They still differ.

Irina: (Mead shows the structure of a human cell and their cells, a muscle cell). For example, let's take a leukocyte.

Here is your white blood cell.

Vadim: So you have leukocytes, as far as I understand?

Irina: In our blood there are 16 forms of cells that have, among other things, transport, protective, cleansing functions, and so on.

One of them has a protective function. I call it a leukocyte by analogy with yours, because your main function is protective. There is a transport function, naturally, stopping bleeding, as part of a blood clot. I know all this. But here it looks different (shows). They have a cell that changes shape, it can become not only round and oval, but also elongated, triangular, with a top, with corners, and inside it there is something multi-colored. It didn't remind me of our cells at all.

What are these, mitochondria? They also change shape, are orange and glow.

These are our energy stations. Each leukocyte in our country can produce its own food: take some simple substances from the blood and from this produce food for itself in the endoplasmic reticulum (shows some greenish squares into which simple molecules enter from above, and others come out from below).

17:13 Genetic modeling in the Interstellar Union.

Vladimir: Is this the result of your natural evolution or is such a complex structure effective with the participation of some artificial genetic technologies?

Irina: Do you want to know if we changed our DNA after joining the Interstellar Union (IC)?

Vladimir: Or before, I don't know. Yes.

Irina: No, there were no significant changes. When we joined the MS, work was done to eliminate genetic pathologies that led to mental instability. This work has increased our adaptation, including to the unfavorable phenomena of our environment: radiation, ionization from another star, because we began to travel in space. We were quite sensitive to the radiation of stars, which was higher in spectrum than ours. Therefore, we went to strengthen the protective properties, and, naturally, we also worked on strengthening the immune system genetically.

There are such biologists in the MS, they are called "genetic designers". They can create some DNA from different parts of the DNA of one or even different organisms, which will then be placed in something like a cell. Then they study its properties and can then introduce it into a living cell, where it will grow and develop. From all this a living organism can emerge. Such experiments are carried out at the micro level. These scientists have instruments that allow them to observe and control these processes.

Vladimir: Do I understand correctly that there are many such specialists in the civilizations of Selbet, Tashig and their colonies?

Irina: There are also in the Selbet and Tashig civilizations. They are also available on Esler. If you want to talk about genetic design, it is better to invite one of them. I know a couple of specialists who, among other things, are working on creating intelligent beings through genetic modeling on other planets. They can explain it to you and answer your questions on this topic.

Vladimir: Thank you. But today we still have a conference with an oncologist, so let's get closer to this topic.

Vadim: Since we were talking about genetic modeling, I wanted to ask. Can you calculate the properties of a living organism purely empirically, say, using a computer? Do you need to create some models and study them in reality?

Irina: You can calculate the properties. But when a living organism begins to live in its environment, its genotype inevitably changes. The environment begins to influence it, and how the body will react, what changes this will cause in the future, can only be seen in practice.

Also, some issues of connecting genes of dissimilar organisms can only be calculated with one or another percentage of accuracy. Because genes, being nearby, influence each other. To a large extent, if we are talking about animal Souls, they are influenced by the animal Soul that enters this body, because in every cell of a living organism there is a part of the animal Soul.

This part of the animal Soul, one might say, is divided into two parts: the one that is connected to the common animal Soul, and the one that is concentrated in this cell. We call this "cellular instinct". You have this phenomenon of irritability, reproduction, protection, as well as autopsy, which occurs when a cell dies, during the transition from life.

Vadim: Thank you, I understand. This is really impossible to take into account, as far as I understand.

22:23 Protection of humanoid cells by Esler. Evolution of cells.

Vadim: Okay, let's move closer to our topic. As far as I understand, your DNA is protected more seriously than human DNA. Oncology is not inherent in your organism.

Irina: Oncology has not been characteristic of our organisms since the evolution into intelligent beings, since our DNA was really well protected from copying errors. Including, not only after 40-50 divisions, but also after 150-200 divisions, our cell could easily transfer information to the genetic material of its descendants.

During division, our cells have the same protective mechanisms as during protein synthesis, but they are also enhanced. If a new cell contains something that is not characteristic of those who gave birth to it and all others, then the protective mechanisms that are in the cell are automatically activated from this discrepancy: chemical, biochemical. The process begins (shows a transparent bubble) in this cell, it begins to increase, like a vacuole in a plant cell, filling everything with a special liquid that contains an analogue of your hyaluronidase and, as it were, digests it.

Vadim: We have this mechanism too. It's called "apoptosis". Then a question. If your cells are protected from mutation, how did evolution occur?

Irina: Our cells are protected from mutation, and natural evolution did not occur through mutation, but through complication (if we look at the evolution into a rational being) of the neural connections themselves. Not due to mutations, but due to the complication of the neural connections of those animals that were our ancestors. The cells remained the same, but they could transmit more energy impulses, at a greater speed due to the connection with the animal Soul. This process led to the appearance of an intelligent being on Esler about (according to our data) 8 million years ago.

Vadim: Do you want to say that you did not change biologically, but that your structure changed only due to some energetic influences?

Irina: If you mean the outlines of the body, then of course they are different from animal forms, but this is not due to mutations that occurred in the cells, but due to the direction of the cells to new functions. For example, let's take upright walking. Our animal ancestors were already walking upright by the time they became intelligent.

Vadim: Did mutations occur in animals?

Irina: We can say that only those mutations occurred that led to the incarnation of the intelligent Spirit. In your opinion, “useful mutations”. And those that could lead to the death of the body, as you said, oncological, dangerous ones, did not occur. We call some DNA damage

a mutation. And what you call a “beneficial mutation” we call adaptation.

Vadim: Yes, we call it that too, it’s just that when a mutation occurs, it doesn’t know whether it’s beneficial or harmful. It just happens.

Irina: This is the case with you when there is no control through the vital etheric force of the animal Soul of the various organelles of the cell. There is already control there; it comes, one might say, at the level of instincts. Of course, the animal Soul does not have reason in the human understanding, but it has instinctive reason. These changes take place at the level of this mind. They can be skipped, if for the benefit of the whole organism, and what I have just described to you may happen if these changes sharply disrupt the functioning of the entire cellular structure, the tissue where the changed cell originally originated.

Vadim: Okay.

28:25 The influence of the biological body on DNA.

Vadim: How did it happen that the Souls of your animals can control mutations, but the Souls of earthly creatures cannot do this?

Irina: They do this not on purpose, but instinctively. Due to the fact that our body contains such capabilities, it is the body of our animals, their instinctive mind. Any animal Soul connects with the body through its instinctive mind at the moment of connection, is called the “etheric body”. The ability of the body of our living organisms to have such protection at the levels of microbiological, cellular structures allows the animal Soul, which embodies in our world, not consciously, but instinctively to influence.

Vadim: Sorry, I'll interrupt. My question. So it sounds as if the Souls that inhabit your animals are different from the Souls that inhabit earthly animals?

Irina: It’s not the Souls that are different, but the bodies.

Vadim: The bodies, of course, are different. I ask why earthly beings do not have this ability?

Vladimir: So why? Why is there one situation on Earth where there are no structures associated with protection, and there is oncology, but on Esler this protection exists, and there is no oncology? Why, what is the difference between us?

Vadim: Do we have any different Souls?

Irina: Our souls are the same. It’s just that some bodies have the tools for this influence, and some don’t or don’t have enough.

Vladimir: Why did such instruments appear on Esler, but not on Earth?

Irina: Good question. Indeed, our scientists investigated and found a mutation that existed a very long time ago. Even at the level of organisms that existed in the form, in your opinion, of insects. But not those insects that exist on Earth, but larger body sizes and with other functions.

That mutation led to the appearance of such bodies and such cellular structures, it occurred during that period of time. From that moment on, these mutations went in a positive direction, which allows our animals and intelligent beings not to suffer from diseases that are caused by mutagenic factors, for example, oncology is one of these diseases. Precisely because such DNA protection was formed a long time ago.

For what reason was it formed? Because there were conditions for such formation, based on the number of chromosomes, for example. Based on their transformation among themselves, the environment. Many influencing factors.

Vladimir: Could this useful mutation of biological beings on Esler somehow be implemented for biological beings on Earth so that they would have the same properties?

Irina: Do you mean, is it possible to change a person's DNA so that he only has beneficial mutations?

Vladimir: Yes, so that he has mutations in the same way as happens in biological creatures on Esler. Use the same natural mutation, but applied to terrestrial organisms, biological, including humans.

Irina: This question was asked at the time of your creation 3 million years ago. There was talk about protection from various pathogenic factors, since, naturally, in your ancestor, who was an earthly primate (humans have 45% of his genes), the inability of more or less reliable protection was revealed.

There is, of course, protection against mutations, but it is not so reliable. The question was explored: either completely remove this trait from the genetic material and create intelligent earthlings, or, if possible, reduce it as much as possible for transmission to descendants.

In order to do this, you had to change your DNA too much, which generally prevented you from adapting to your environment. Relatively speaking, your DNA is protected, but there is no multiple check of the DNA record on other media: informational and daughter DNA, which occurs after the chain is unwound. To introduce these mechanisms, all these checks, many enzymes were needed. In order to introduce these enzymes, one could, of course, take the Esler gene, it would be necessary to change the person very much. This would prevent life in your environment on your planet. It was decided not to do this.

I read about this in the studies I studied on planet Earth, on your genotype, how you were created, and what questions arose. I read that such a question was raised, but it was not possible to create a creature so that it would be completely protected from mutations, like, for example, an Eslerite, and at the same time could be adapted to life on Earth.

35:15 Oncology on Disaru.

Vladimir: I'll ask the last question. Please tell me what is happening to our ancestors who were taken to Disara? After all, they have our DNA? Did they manage to make some artificial changes that gave them the opportunity not to get cancer? Or do they have cancer, but it is treated more effectively?

Irina: This issue was resolved after Disaru joined the MS. A law was adopted by the Disaru government itself that every father and mother, the future parents of a child, undergo a genetic analysis, a genetic profile is identified, and undergoes so-called genetic recovery. DNA structures are studied in detail, and a more or less accurate forecast is given to determine how likely it is that any mutations will form in a child, including in the future, and the relationship of genes.

A set of measures was carried out by their medicine, which was aimed at maximum prevention, that is, prevention, of cancer. The DNA was not changed. Their defense remained at almost the same level. But you see that there are many people on Earth who have been spared this problem.

In cases of oncology on Earth, it's all about disease prevention. Prevention means much more than treatment itself. Of course, MS has the means to suppress such tumor-like formations, of which there are many types in different organs: energy rays, immune stimulation, psychological work with one's organs.

I want to say that the oncological process of mutations, which harms the body, is always the destructive work of the Soul. Maybe an animal Soul, or maybe a rational Spirit. Education at the Disaru school, the formation of their worldview, and the ideology of society are aimed at preventing the destructive work of consciousness or instincts (we are now talking about people who destroy their own body, the temple of the Soul).

38:37 Oncology and consciousness .

Irina: I want to tell you in which society the spread of cancer on a mass scale is possible. Only in a society that does not know its spiritual nature. Anything can become a factor in the development of a tumor: any substance, any radiation that would be completely safe for other people.

Vadim: I completely agree with you that consciousness determines the state of the body, this is true.

Irina: Yes. You know that people come to you who have cancer, a large cancerous formation. These people lived, for example, for several decades together with other people, ate the same food, breathed the same air, and even sometimes were exposed to the same bad habits.

Vadim: You are absolutely right. In my practice, there was a case when a woman, cured of breast cancer, lived quietly for 12 years without any problems, and then before her eyes a car hit her son. She developed metastases within a month throughout her body.

Irina: I talked about mutation and protection against mutation. If you look from a spiritual point of view, it is not by chance that exactly such DNA structures and DNA-controlling organelles arose on Esler. This depended on those plasmoids that formed the animal Souls, on their spiritual level, and, finally, it depended on Esler's task in the evolution of the Universe. We are looking at a larger spiritual reason.

You may ask why this is so on Esler and not on Earth?

Vadim: Yes. That's why I ask, because if such a mutation is, in principle, possible, when consciousness controls the usefulness or harmfulness of the mutation, then why did it not arise on Earth? Because life is such a thing that it always finds a loophole. She uses millions of variations, mutations to make this happen.

Irina: Yes.

Vadim: Why didn't this happen to terrestrial organisms? This is weird.

Vladimir: There were spiritual reasons for this, why such a story?

Irina: As a person who has studied biology, you know that variability cannot be avoided in general. The main thing is to direct it in a direction useful for development.

Vadim: This is the question.

Irina: Every person from birth to old age contains those cells that you call cancer.

Vadim: Yes, it is controlled by the immune system. It's clear.

Irina: This is controlled by the immune system. The functioning of the immune system also depends on many factors. It happens that immune cells, instead of suppressing the tumor, phagocytose cancer cells, do not destroy them, but spread them further throughout the body. This is similar to how neutrophils, for example, absorb gonococcus, instead of digesting them, they carry them to the heart and beyond.

Vadim: This is called incomplete immunity.

Irina: Yes. But this is not a random process. This is a certain state of consciousness.

Vadim: In the case of gonococcus, consciousness does not play a role. It's just a gonococcal property.

Irina: Gonococcus has this property, I gave an example. In the case of cancer cells, consciousness already plays a role, although in the case of gonococci, the state of consciousness can regulate. Each person infected with the disease will have a different rate of spread and different organ damage. For some, it will be asymptomatic.

Vadim: It depends on the lifestyle, on the speed of spread. If a person loves beer, then it will spread faster.

Irina: It depends on the immune system, on the enzymes that the body produces. There are no two identical body reactions to the same infection.

Vadim: Naturally, we are all different.

Irina: We are different not only in body and phenotype, which we acquired during our lives, but also in the genotype we acquired from our parents. We are different in the content of our consciousness. I would say, the contents of my Spirit.

I want to tell you that there is science in Esler and in MS, it is called differently everywhere. If translated into your language, we can say, “Spiritual foundations for the safe activity of the Spirit in the physical body.” Not just, like you, the safety of activities in the world, but the basics of safe control of your body. We study this science in school, how the Spirit influences the body.

How to properly fill it with energy, how to develop it correctly so that it can correctly perform its functions, use the energies of the surrounding world in the form of oxygen, nutrients, vitamins, and inorganic substances. Use this energy as much as possible in an accessible and beneficial form. Cleanse yourself of toxins as much as possible without harming yourself. There is a whole teaching there.

45:45 Infant oncology.

Vadim: I have a question. We understand that this is the destructive influence of the Soul, let’s say, energy substances. Why then do these tumors occur, for example, in infants? Where does the destructive influence of the Soul come from?

Irina: Vadim, for the Eslerites, a baby is not just a body, it is an already fully formed Spirit that has entered this body. From the moment of the union of sperm and egg, when the first cell of a new organism is formed, the Spirit introduces life force into this cell. He stands nearby at the moment of conception.

At the moment of conception, the Spirit of the future person stands next to his guides, the Angels, who led him from the Spiritual world to his parents. The formation of the physical body occurs under the influence of the Spirit, which does not initially enter the body; its vital force is located in this cell.

When a cell divides, physical structures are formed based on the etheric copy. Each physical body has an etheric body, an energetic copy of each organ. And this, in turn, is created on the basis of his mental, astral attitudes, and so on. All this directly affects a person.

Vladimir: He has his own karma from past incarnations. And all this influences together.

Irina: Yes. It is possible that if a child develops a disease, there could be many reasons. In his past lives, in relationships, for example, with his parents, because the etheric bodies of mom and dad, their consciousness also influences. It turns out to be such an influence.

When a child is born, until the age of 14, he is energetically connected with his parents. They have a common aura. The condition and mood of the parents affects his health too. It may not even influence them, but influence the child. That is, they will see their vices, shortcomings in their child, destructiveness. At Esler, this information is included in the school curriculum.

(Mead speaking) Perhaps, at your level of medicine, the fight against cancer is more or less successful so far only in the form of active prevention.

Active prevention must include several factors. The first, most important, spiritual. In your opinion, psychological. The second factor is a reduction in the intensity of exposure, if possible, to each carcinogenic factor that has already been identified. There are carcinogenic factors that are more carcinogenic than others. And thirdly, creating a positive image of those psychological and biological factors that contribute to the destruction of already mutated cells, cleansing the body of them, while at the stage of an unmanifested tumor disease. They are still just being formed.

50:14 Food and cancer prevention.

Irina: For example, certain products (I can name which ones) cleanse the body. Of course, subject to everything else.

Vladimir: Which ones?

Irina: I can list.

Vladimir: We are waiting.

Irina: Some products, your plants, herbal products, contain a set of substances that disrupt, for example, the walls and membranes of tumor cells, making them more detectable by the immune system. What, for example, is characteristic of almost all plants of the cruciferous family? These are your vegetables.

Vladimir: Which ones specifically?

Vadim: Can you be specific?

Vladimir: Can you name plants, fruits, vegetables?

Irina: If we talk about vegetables, then these are all types of cabbage, but broccoli cabbage has a particularly high content of these substances. Green ones. Also in weeds such as (I don't know the name of this plant) rapeseed, jarutka, and so on. Weeds also contain substances that make tumor cells visible to normal immunity.

Also, sulfur compounds, organic sulfur compounds, which are found in garlic, as well as in ginger, help increase antitumor immunity and disrupt the formation of metastases, that is, the transfer of genetic information of an altered cell to its offspring.

You also have a very important phytoenzyme. A substance called "lycopene" can protect cells from various carcinogenic factors. Lycopene, accumulating in tumor cells at certain stages of their formation, also makes them noticeable to the immune system. Lycopene is found most in tomatoes, but they must be heat-treated. It is then better absorbed.

These substances, as well as red pigments, a whole series of pigments, are contained in red beets, which cleanse the body of toxins that have a carcinogenic effect. Most of these pigments are found in dark red beets (shows that they are not striped, but evenly colored and elongated). You can also name products such as turmeric, parsley, citrus fruits, they contain large amounts of copper.

If we talk about microelements that have an anti-cancer effect, selenium, vitamin C, copper, iodine increase immunity. The most useful animal product is the fish that lives in the sea and contains special molecules similar to the molecules in your vegetable oils, but of a different shape. These molecules protect against harmful factors, primarily your cardiovascular system and enhance immunity. This is about food.

Vladimir: Is this some special type of fish?

Irina: He shows me mackerel.

I want to focus on the fact that any nutrition, anti-cancer drugs and immunostimulants can only be an auxiliary factor in prevention, and even more so in the treatment of an already existing disease.

55:45 Spiritual causes of cancer.

Irina: The most important factor is cleansing yourself at the energetic level from negative blocks, changing the mental attitudes that these blocks provoke.

In what state of consciousness does cancer most often appear? These are anxiety, depression, hidden grievances, especially self-resentment. Anger at oneself, self-condemnation, non-acceptance of oneself on a subconscious level let the body, all its cells know that it should be erased from life. This triggers the biochemical process of any organ, any tissue that this Spirit must leave incarnation, because it is not satisfied with the life around it, the people around it, or itself.

A lot of people with cancer have ideas of self-condemnation, self-blame, or constant struggle with their own imaginary imperfections. Or they are in a state of conflict with someone close to them, this is especially typical for men and women with cancer of the reproductive system. In this case, cancer of the uterus, ovaries, vagina, and so on for women is a denial of her feminine essence within her, which appeared as a result of hidden resentment towards men. Most often, these grievances begin with unforgiveness of one's own father for something. It happens that the father has not been forgiven, even if he is not there. Sometimes a girl does not forgive her father precisely because he is absent from her life. This happened to me.

Here you need to start with the work of forgiveness, filling with Light and necessarily transforming the energy of this block into Light, creation, Love and other high-vibration states. Such work should not be carried out just once, but should be carried out constantly, at least 2-3 times a week. Constant cleansing of your energy.

Fears, including the fear of death, also provoke tumors in various organs of the body. Fear is a negative emotion, from which the Spirit begins to "release" energies into the body for harmful mutations, since this world is too scary for it. He concludes that it is better for him to leave the incarnation than to live in such a terrible world.

You see, dear Vadim and Vladimir, that everything that I have listed for you is one form or another of non-acceptance.

Vadim: As far as earthly science allows us to judge, the whole question is immunity. Cancer cells arise constantly, every second. It all depends on the state of the immune system.

Any negative emotion suppresses our immune system. We already know this. The whole question is not to clutter your head with these negative emotions. The issue is not only about

cancer cells. When we are in a state of negative emotion, we get sick more easily. Any colds. And when we have enough adrenaline and joy, even the coronavirus “will not approach us.” The question is not that there are cancer cells, but that we suppress our immunity.

Irina: It happens (Mead says) that outwardly a person behaves very decently, does good deeds. But at the same time he scolds himself for not being perfect enough. Or he has chronic irritation with other people who do not correspond to his high ideal, which he himself can, by the way, correspond to. His Spirit concludes that this world is too bad for him, this body is too imperfect, it is necessary to bring about changes in him that will reflect his thoughts about himself or about the world.

Mutation is always a distortion of the divine image. Harmful mutations that lead to degradation of the body are always a distortion of the divine image. The distortion begins at the mental level. Therefore, there are various immunostimulants; I also recommended them when I diagnosed cancer patients. I felt radiation from cancer cells.

1:02:19 Parasites and cancer.

Irina: At the same time, I usually felt a number of infectious agents next to the cancer cells. Yes, it is true that some forms of cancer that your doctors identify as cancer are not caused by mutagenic factors. You know there are many types of cancer.

Vadim: For example. Give a specific example.

Irina: There are tumors that are caused by accumulations of protozoa in association with fungal flora, and there are also virus-like bacteria such as chlamydia. Such a conglomerate is usually in a capsule, if it is in any organs, or in the blood, when you call it “blood cancer”. You call it lymphoma. When you see that there are a lot of white blood cells in the blood, it may be the spread of protozoa in a special form, it is called cyto-like. And the state of the bone marrow when it produces immature forms of leukocytes may be a consequence of the bone marrow fighting for immunity. A fight that throws into the blood forms that are not yet ready for battle.

Vadim: This means that microorganisms act as a mutagenic factor. We know that mutagenic factors can be different: chemical, biochemical.

Irina: (Mead speaks) There are such forms of protozoa if they created a colony (some protozoa create colonies). If a piece of the colony is taken for histological analysis, it will show a picture that resembles a cancerous tumor. Because they will not look like, for example, the same Trichomonas or someone else. They will be without flagella, since these protozoa, like many other forms of parasites, are prone to so-called mimicry, the creation of body shapes that will protect them from the protective properties of the immune system. In this case, they live in the body.

For example, the same Giardia, Trichomonas (this is also known to your scientists) are capable of not only feeding on your red blood cells and proteins, they are able to “stick” some of these proteins onto their outer membrane, so that when they are palpated by tissue

monocytes and phagocytes, they resemble your cells , without highlighting anything. Such protection. This phenomenon has been described. Such cases do occur. We call this phenomenon parasitic forms of cancer, but in mutagenic forms of cancer there is also a role of infectious factors.

Vadim: I would like to hear specifically what kind of cancer is caused by parasites.

Irina: (Mead speaks) This is mainly cancer of the genital organs (in women, the uterus, for example).

Vadim: Can you be specific? Are there many types of genital cancer?

Irina: (Mead speaks) You, your scientists, can, when describing the forms of tumors, give different names to the same or different ones - one name. We look differently. I need to look at the diagnostic results. You can diagnose sarcoma or fibroids, a benign tumor; for me these are different conditions.

Vadim: Fibromyoma is a benign tumor.

Irina: She can, as you say, be reborn, but not always. There are several types of them.

Vadim: When it is reborn, it is no longer fibroids. This is a different tumor.

Irina: If I give you carcinoma or sarcoma, or some other tumor that comes from the muscles or from the endocrine glands, for you it will be one condition, for me it is always different. There may be different factors: parasitic, mutagenic, toxicological and others.

1:08:07 Vibration diagnostics. Astral diagnostics.

Irina: When I looked at people diagnosed with cancer (Mead says), even knowing, I also looked at the person's energy level. He did not have vibrations of a cluster of cancer cells in an organ, but there were vibrations of certain microorganisms, their clusters, in a certain capsule, as I already said. These vibrations were foreign to the human body, but they were not vibrations of altered cells. There were such cases.

Irina, as a contactee, was shown that she had been diagnosed with cancer. How can you say this if there is no cluster here? Everyone has cancer cells, but I cannot give this diagnosis to everyone. I see a congestion in the organ, I feel vibrations, and I list it.

It happened that doctors found any inflammatory diseases in a person, decreased immunity or ordinary microbes, but did not find a cancer process. Of course, I cannot say how well they were examined. Didn't check. But I felt that there was a cluster of cancer cells. Doctors found

an inflammatory process, some microbes, and vasoconstriction. I always said what I felt and recommended immunostimulants in the case of cancer, because there was almost always a decrease in immunity, no matter what the form.

Upon further observation of such patients, I found that they needed a very long time of immune stimulation and work on themselves in a complex. Only then will it lead to a positive outcome. After immune stimulation, breaks must be taken between periods of immune stimulation so that there is adaptation to life without immunostimulants, otherwise the thymus may reduce the production of hormones for the immune system, and the person may get sick with something else.

I looked at (Mead says) a man, the clinic doctors diagnosed him with liver cancer, and found vibrations of opisthorchiasis, cholangitis, cholecystitis in the liver, adding E. coli and accompanying anaerobic flora, but I did not feel any cancer cells. He was prescribed opisthorchiasis therapy, cleansing of the bile ducts from dead parasites with special drugs, and anti-inflammatory and antimicrobial therapy with those drugs and antibiotics that suited the vibrations of his body. Immunity was reduced, but not that much.

Since I am in the astral body, I cannot directly test the infectious agent to determine its sensitivity. I do everything according to vibrations, as far as they suit. Any drug, even simple aspirin, any herb, has vibrations, frequencies at which the energy of its molecules is emitted. These frequencies are different everywhere. I, being in the Astral Plane, can feel them. In the physical world, this requires special devices. By the way, they already exist on Earth.

Vladimir: We are talking about bioresonance. Clearly, bioresonance.

Irina: Yes, about frequency diagnostics of the body. Do you have such devices? In the Astral it is possible to do this, because you are not looking at the physical body, but at the ethereal one, which is a copy of the physical body.

But there is one peculiarity of the astral diagnostics that I conduct. The radiation of only the etheric organs, which are copies of the physical ones, is felt. There is a peculiarity that if, for example, a physical organ was removed, then its etheric copy is preserved. It persists if a long time has passed after the operation. The ethereal replica may look even better than the original organ that was removed. For example, a person does not have legs or arms, but they are present in the etheric body. The same goes for internal organs. This must be taken into account in astral diagnostics, this is the first thing.

And second. Foreign organisms can be identified: microorganisms, parasites, viruses, intracellular structures, we call them that if they are in a certain place. Of course, each person has his own microflora, this is natural. If such organisms exceed acceptable levels and begin to cause harm to the cells of the body, this affects the etheric body and is detected. Of course, to varying degrees.

If a person has any inorganic formation, like a kidney stone or gall bladder, this is not visible in the diagnosis. The stone does not emit frequencies of living form. This means that it is not present in the body under study. This needs to be taken into account. Inflammation of the surrounding tissues, if present, may be felt. This changes the vibrations somewhat. These are

the features of astral diagnostics.

I wanted to teach Irina this.

(No, I don't have time to learn how to diagnose).

Vladimir: I thank a highly qualified specialist in this field, in my opinion, Vadim. I thank MidgasKaus for the important, valuable information. Irina, thank you very much. I want to say goodbye to you, all the best, thank you, see you again on the air.

Vadim: Goodbye, thank you, it was a pleasure.

Irina: See you again!

July 6, 2021

Conference participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Vladimir Goldshtein – journalist and Facebook group administrator, assistant director of the Cassiopeia project;

Vadim Kozlovich – oncologist;

MidgasKaus is a representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms.

#303 What is truth? Why the sky is blue? Spiritual path, philosophy and reality. Aliens'

opinion.

https://blog.cassiopeia.center/chto-takoe-istina-pochemu-nebo-goluboe-duhovnyj-pu
https://www.youtube.com/watch?v=_no7jnOYT24

00:21 Truth as a philosophical concept. Manifestation of truth.

Question: What is truth in the philosophical understanding of representatives of the Interstellar Union?

Irina: I would like to ask a counter question: “What do you understand by the term “philosophy”?”

Question: Philosophy is what is in the head. And anything can be in your head.

Irina: More specific, please.

Question: There may be, for example, an illusion in the head that is inconsistent with the heart.

Irina: And what is in agreement with the heart, can it be the truth?

Question: Rather, it is a tool for moving towards the truth.

Irina: Truth is Divine Light. There are other names for this divine spiritual substance. This spiritual substance manifests itself in material substance.

How does it manifest itself? Through the emergence of all material objects around you: people, objects and objects of celestial bodies. Everything that exists around you, that you can see with your eyes, hear with your ears, touch with your hand, all this is Divine Light in dense material form.

Every person you speak to is Divine Light. You are also Divine Light, and your sense of the truth of what is happening depends on the degree of awareness of the energy of Love in you. The more the energy of Love is developed in you, the higher your vibrations, the more true you feel the world around you, the more dense this substance of truth becomes for you. I mean, more real, real and influencing your life, and the happier you begin to feel from being in every moment of this truth, feeling yourself as the eternal immortal shining Spirit of the Divine Mind.

Question: I see.

02:56 Why is the sky blue on Earth?

Irina: The sky of any planet is strictly individual.

Question: When you travel to other planets, the sky there is different: purple, orange, yellow. Why is the sky blue on Earth?

Irina: Blue sky is the perception of earthly eyes. For eyes of a different type, capable of transmitting waves of a different vibration frequency, it will be a different color.

Why is it blue for earthlings on their planet? The sky is a symbol of the Spiritual world on any planet. Why are the eyes of earthlings designed in such a way that they perceive the color of their sky in the blue spectrum? The blue or dark blue color of the earth's sky is a spectrum that reflects the vibrations of the fifth and sixth chakras. These chakras are responsible for the manifestation of creativity and spiritual vision in a person. Therefore, the color of the sky on Earth shows people, when they raise their eyes upward, which way to follow in order to become a heavenly inhabitant.

Question: I see, thank you.

June 11, 2021.

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

MidgasKaus - representative of the planet Esler, biologist, psychologist, specialist in alien life forms;

Zaliatar is a representative of the planet Raom-Li (Pleiades), a futurologist, a specialist in healing practices, the study of the Spiritual world and the study of time lines, Vanga's curator.

#304 Jupiter, Aliens, and Aliens. The matrix, quantum

holography, the effect of paintings on human DNA.

https://blog.cassiopeia.center/yupiter-inoplanetyane-i-prishelcy-matrica-kvantova
https://www.youtube.com/watch?v=6g3Ha2qUWtw

00:23 Presentation of conference participants.

Irina : Hello, dear friends! My name is Irina Podzorova. I am a contactee with extraterrestrial civilizations. Today we have with us three of my curators, who for the first time in the history of Cassiopeia have gathered in this composition. And this is no coincidence. Next to me is Zaliatar from the planet Raom-Li, Galactic Federation of Light, Pleiades cluster, specialist in energy healing and restoration of etheric bodies - spiritual healer. Thank you, Zaliatar! MidgasKaus from the planet Esler, biologist, psychologist, specialist in alien civilizations. And Erwin is a representative of a plasmoid civilization of the 37th density level from the Betelgeuse star system, constellation Orion, who decided to come to this conference for the first time in the history of our project, since we will have very unusual questions from Victor.

Hello, Victor!

01:38 Viktor Batalov. Healing paintings.

Victor: Hello, Irina! Hello, dear viewers! My name is Viktor Batalov. I am the author of the books: “The Matrix of Life” and “4D Navigator”. I believe that I have my own specific mission. At one time I started as a healer. Then he moved on and started working simply as a consultant and coach. Having certain knowledge, I believe that I am also being led, like other people living here on Earth, from simple to, so to speak, knowledge-intensive. So I won't talk much about myself. It’s just that through me, such a phenomenon as quantum predetermination of actions was discovered. I have been developing this model, this topic for 33 years.

I am the discoverer and creator of the world's first photonic sound derived directly from paintings. That is, it is believed that our paintings emit something. And we were able to record this for the first time using the device. I am the first person - the discoverer of a new phenomenon that exists in the art world, where paintings radiate. And we were able to record this. Moreover, with the help of these radiations we heal people. A lot of labor and energy can be saved by working with these paintings. As my presenters or curators told me, these paintings through certain artists (not through all) are aimed at healing humanity at the DNA level.

You probably already understand and know that there is a topic “DNA - molecular”. And there is the topic “DNA – wave”. Therefore, at the same time, I am an official partner of the Garyaev center. We are collaborating, I am collaborating on the topic of paintings. And it was with the help of his device that we were able to obtain the first signal from the paintings. I substantiated this concept, and Pyotr Petrovich at one time simply recorded this signal using his patented device. And together we moved further in this direction.

At the same time, I simply help people with the topic of health, as a helping “pro.” I am called a “wave practitioner” in the topic of relationships, I raise defaulted companies that are already at the stage of bankruptcy. And I even had three territories, helped them develop at the level of administration or television company. This is brief, a little about myself, if this information is useful. Of course, this is how I am always in a certain contact. And perhaps I am also some kind of contactee. But I don’t consider myself a contactee yet.

Irina: Very interesting! Clearly, it was a very interesting story. In general, you have the most interesting and important work on connecting the material and Spiritual worlds in one concept.

Victor: Yes.

Irina: My curators welcome you. And the curators welcome every viewer. We're ready to start. You can ask questions, and one of them will give answers.

Victor: Great. Then I don’t even know who to ask the question first. But I think that the curators present will sort it out.

05:44 Energy protection of Jupiter. Civilizations of Jupiter.

Victor: In 1994, I felt a certain, so to speak, non-standard state. It turned out that this was due to the fall of Comet Shoemaker on Jupiter. And it was reported that my energy went into the work of creating some kind of protection for this planet.

Later I met another person who practiced Reiki, practically my colleague. And she, too, later told me the same information that her energy at one time was used for certain protective processes so that various asteroids, comets, etc. would not fall on the planet Jupiter.

And in accordance with this, the question arose: what was it then? And why did these comets take another 22 years to fall? And for 22 years our forces were used - ordinary people or, perhaps, a little aware of something. But the fact that this healing energy was spent on the work of creating protective mechanisms, perhaps there was some kind of energy shield. But you know, when the message came out that Shoemaker’s comet had inexplicably deviated its fall trajectory, it was almost a positive shock for me.

Later there was a meeting with civilization on the Sun. I don't even know their names. I went through a certain cleaning, saw all the decorations, how everything was happening. It was like a temple, like Orthodox churches here on Earth, only without icons. And after that they told me that my forces were taken to Jupiter. Then I asked: “Why was it necessary to protect Jupiter?” And there was one such information. I would just like to see your information. Guiding question: what information do you have about what will happen next to Jupiter?

Irina: (Zaliatar answers) I explored your solar system. Jupiter is an interesting planet. And not only by its mass, composition and density, but also by some other characteristics. First of all,

energy. It resembles a star that has not entered the active phase of development. That is, the composition of Jupiter, its atmosphere and sub-atmospheric layers corresponds to a star of a certain type. Only the pressure and temperature do not match. But this is physically visible Jupiter.

At the subtle material level, there are plasmoid civilizations, there are 28 of them. We can say that they are there from approximately the 17th to the 36th density levels. Some are at the same density level, some are at another. Yes, we will not mention the satellites of Jupiter now. We are now talking specifically about Jupiter.

Many modern inhabitants of the Earth incarnated in these subtle-material civilizations on Jupiter. They developed, gained experience of existing in high-density worlds for the construction of material, so to speak, planets, new stars, energy healing, management of different societies. That is, there is a society of plasmoid civilizations in which various spiritual entities experience life. And many Spirits who previously embodied there and came to Earth retained energetic solidarity or connection with these civilizations.

When an energy strike occurs on Jupiter, that is, a change in the energy of Jupiter due to a sudden, for example, temperature pressure, the ingress of a foreign substance, then the Higher Self of such a person (the disembodied part of the Spirit of the former Jupiterian) transfers vital energy to the plasmoid world so that they could be harmonized.

This unconscious decision of yours was subconscious. Although you may not even know anything about this tragedy. But your Higher Self - your disembodied part, the Spiritual Self - felt in the Spiritual world that your former brothers and sisters were being destroyed, that is, their world. Because during a physical collision with a cosmic body and the atmosphere of Jupiter, heating occurs in this part, energy is released. Accordingly, the energy polarities of the plasmoid worlds, which are separated from each other, change, and destruction, to put it simply, of their cities can occur. But not dense cities. They are subtle and made of energy. Therefore, you unknowingly supported them. This actually happens. This is a clear sign that you have had the experience of incarnation on this planet.

Victor: Do those civilizations that needed such support on Jupiter have a name?

Irina: The name of these civilizations can be translated into Russian sounds only conditionally, since they have a much higher level of density. Therefore, their sounds for the human ear are in the inaudible range of vibrations.

Victor: Great.

Irina: That is, if you translate it into an audible range of vibrations, it will be like a set of some notes, for example.

Victor: I'm a musician. And we can translate it.

Irina: But now I hear some kind of squeaking: pee-pee.

Victor: I see.

Irina: He tells me: “In different keys.” For example, when Erwin came from the 37th density level, he called himself from the memory of the contactee, that is, he took this name - Erwin. His name is untranslatable into earthly language. This is just a sequence of sounds of different tones that are not perceived by the human ear. Distantly, like a set of Morse code sounds.

Victor: Great! There are a lot of coincidences in the prehistory of life. I am a signalman and at one time I studied Morse code. And now we are engaged in translating super inaudible sounds into audible sound.

Irina: How interesting! You communicate with plasmoids. Well, okay. You would understand him.

Victor: Inaudible holographs from paintings from a person, from his DNA, are becoming audible to us - for the first time in the world!

Irina: Yes, but there are no sounds of human language there.

Victor: No, not the sounds of human language.

Irina: It’s just higher and lower, like waves.

Victor: But after listening to what happens to a person after, we understand what sounds entered him.

15:11 The influence of sounds of the Spiritual worlds on people.

Irina: Erwin says it’s very interesting. I heard about the development on Earth of such devices that transfer vibrations of the subtle worlds and even the Spiritual worlds through the subtle worlds to a physical medium. And this becomes accessible to the auditory receptors of humanoids on Earth.

Victor: Yes.

Irina: He heard about it. A very promising direction that will allow, firstly, your materialists to believe in the reality of the subtle and spiritual worlds. And secondly, it will allow you to harmonize your entire body and energy by tuning into these sounds, which are much older than the part of the dense material Universe visible to you.

Victor: Great! This is what we do – education, promotion.

Irina: Okay.

16:18 Information about Erwin.

Victor: And here's an additional, leading question for Erwin: what accident or pattern allowed him to arrive here for the first time today?

Irina: Irina called me as soon as she read the questions about matrices and vibrations. And she understood that this is the origin of your information - plasmoid, subtle worlds. That's why she called me as a specialist. Because, although I am at the 37th density level, I am already many thousands of earth years old. But, nevertheless, I study the world of 3rd density. Translated into your earthly language, which is very poor in its meaning in reality, I am in my plasmoid world a very large scientist studying the world of 3rd density.

Victor: Great! Then let's move on to the second question. Since I had to recover on the Sun after energy strikes that hit Jupiter, and this was reflected on me, and as if they hit me and my colleagues there, too, that is, we are not alone.

17:42 Solar civilizations.

Victor: What kind of civilization exists on the Sun? How does it affect us? And what does this mean – the topic of "contracts or agreements"? There was talk of some kind of "union". That is, here on Earth we have an agreement, but they do not have such a phrase. They call it "union". Maybe you know something in more detail about these documents that are concluded before incarnation on Earth with certain people?

Irina: (Erwin speaks) I understand you. So, about the Sun, I remember, we all - MidgasKaus, me and LiShioni from the planet Shimor showed Irina the civilizations on your star, which you call the Sun. There are 17 subtle civilizations of different density levels there. Moreover, they are located both in the chromosphere of the Sun and closer to the solar core.

The task of this civilization is to control thermonuclear reactions and process some of the energies of the subtle worlds into the material energies of sunlight. That is, they, one might say, manage an energy station.

A star is an energy station. Any life, whether organic or inorganic, has a characteristic - nutrition. So, plasmoid thin-material civilizations take no more than 4–5% of all sunlight for their food. And everything else they produce is given to the planets.

Victor: Great! Great!

19:48 “Union” of solar plasmoids with humanoids.

Irina: They often visit Earth - in the astral world, in their astral shells and bodies. They have many contacts here with whom they communicate. That is, contactees - in your terminology, Victor, will be approximately like conductors.

Victor: Yes.

Irina: Do you know that there are people who are guides?

Victor: That’s what artists are called – conductors, operators.

Irina: In the terminology of the Interstellar Union of the Milky Way Galaxy, these people are called “contacters” - from the word “contact”.

Victor: Yes.

Irina: One of the translation options for the word “contact” is just “union”. That is, this is an alliance, cooperation with someone. This is the cooperation of two intelligent beings from different planets or from different levels of density, or embodied and disembodied Spirits, spiritual entities. We call intelligent spiritual entities spirits.

There are these plasmoid civilizations on the Sun. At least all of them that I know, and they are all known to me, to a greater or lesser extent, the vast majority of the creatures living there are friendly and positively disposed towards humanity.

Victor: Yes.

Irina: They are light, high-vibration civilizations that can heal and invite a person in the astral body to the Sun. The physical body, naturally, cannot approach even 10 million kilometers to the Sun; it will immediately die. And it is, of course, possible to be there in the astral body. And this restores a person's vitality. This fills him with Light. And this fills his Soul with happiness from the touch of the Divine love of these creatures.

Victor: Great!

22:00 Sunspots.

Victor: What happened to the sunspots? Recently there was information that the sunspots

had disappeared. When I was just starting to study the topic of the Sun, I was then 20 years old, even before university, there was such information, apparently from these civilizations, that sunspots are tied to human psychotraumas, like a kind of black holes living directly in a person.

Irina: (Erwin speaks) What you call sunspots is the emergence or death of a large colony of plasmoids. That is, some change in the plasmoid world, which entails changes in the solar plasma by lowering the temperature. Moreover, both emergence and death are accompanied by certain electromagnetic changes in the plasma structure of the Sun. And you see this as a visible spot. This spot is not just a visual phenomenon. It has certain electromagnetic characteristics that affect all the planets of the solar system, including the Earth.

And the fact that there have been no sunspots on the Sun recently suggests that at the moment solar civilizations are harmonized with each other. There are no disasters happening there.

Victor: I see.

23:53 Will Jupiter become the second Sun in the solar system? What are called "alliances", "agreements", "contracts" in the Spiritual world?

Victor: Here's a direct question: Will Jupiter become the second Sun in our Solar System?

Irina: This requires many millions of years and an additional mass of matter. Now it does not have enough matter to reach a certain level of density to initiate a thermonuclear reaction. At some point, in the very center of Jupiter - in what you call its core, some reactions occur, one might say, trace thermonuclear reactions, very few of them. Therefore, it takes many millions of years and additional material from space - what you call cosmic dust. It also contains hydrogen, but not gas, it is frozen. It must be attracted by Jupiter.

And after many millions of years, with the assistance of the plasmoid civilizations of this planet, Jupiter can become the second Sun. Jupiter has satellites. And on these satellites there are bases of alien civilizations. At the moment, an agreement has been reached between plasmoid and humanoid civilizations on some harmonization of the state of Jupiter, so that there are no cataclysms with it, or with the bases, or with the Earth, or with Mars, etc.

Victor: I see. Then let's move on to the third question.

Irina: What is a "union"? He didn't answer. Now MidgasCaus answers. He is our specialist - a biologist and psychologist. MidgasCaus says: "I greet you! Your conversation is very interesting."

26:07 "Contract", "union", "agreement" in the Spiritual world.

Irina: What are called “contracts” or “alliances”, “agreements” in the Spiritual world?

There may be many words, but the essence is the same. This is a certain agreement between two or more intelligent entities before the incarnation of one or more of them in the material world. These can be agreements between people. Between father and mother, for example, about the birth of children. Or between children and mother that she will embody them, for example, on this planet.

These could be agreements with beings from different worlds, who will later be embodied in different worlds, about contacts to achieve certain goals. For example, as was the case with Irina, when her spiritual essence, before incarnation, came to an agreement with the spiritual essences of almost all of her curators. Although many of them were incarnated when she had not yet incarnated. But she agreed with them through their Spiritual Self that the purpose of her life would be precisely contact with us and the transfer of the knowledge of the Galaxy to the whole Earth in a form accessible to earthlings.

27:33 Human consciousness. Locking memory before incarnation.

Victor: Then the question arises, probably, this will be interesting to everyone: why is the memory of this “union” blocked? And how does a reminder about this document occur?

Irina: What is “human consciousness”? This is the embodied part of the Spirit. Memory blocking does not occur in the entire Spirit, but only in the embodied part. For earthlings it is 30%. And 70% of the Spirit remains in the Spiritual world and is not deprived of this memory. It remains connected to the embodied part of the Spirit through the spiritual channel, which begins to rise above the 7th chakra.

But while the embodied part of the Spirit is in that period of its development of body and consciousness - adaptation to this world, when making this contact is not yet necessary (and can prevent a person from adapting), the embodied part of the Spirit is not reminded of this. In order not to evoke any negative emotions in him that could prevent him from adapting.

In the case of Irina, again, this happened very simply. When she reached the age of readiness for contact on the physical and psychological level - she had this at the age of 13 - her first curator Kirchiton from the planet Daraal appeared in front of her in a physical body. When she saw his body, instead of the usual reaction for earthlings to an unfamiliar creature, fear or aggression, which depends on the instinct of self-preservation, her Higher Self gave her a signal that she already knew this creature. Therefore, she became interested and came into voluntary contact with him.

Victor: Okay.

29:45 Artists-guides. Picture therapy.

Victor: Then answer the question, let’s get to our favorite topic. Operators-artists or

conductors-artists see what is impossible for an ordinary person to see. They put it in the picture. In practice, they work as clairvoyants, under certain sounds, etc. What is the purpose of the paintings of such artists? Perhaps you will give more information than what I have today for my work with these paintings.

Irina: You know, you call those artists who take the images of their creations from the source of the Spiritual world, or from their curators, as guides. The goal of all these operators, contactees or conductors, as we call them, is always individual, but there is something in common, of course. What all these contactees have in common is to bring Divine Light, knowledge of love and beauty through objects of art to those people who do not have such talent. That is, to show harmony, for example, colors, shapes. And not just show it like in a film, but immortalize it on your canvases so that it remains for other generations - this is a common goal.

In general, the purpose of paintings can be both aesthetic and historical. Just watching what they draw. So is healing, if these are some kind of plasmoid or Spiritual worlds that carry raising vibrations of the person who looks at them, and, moreover, healing both the Soul and the body. And first of all – the Soul. And already the healing of Souls affects the vibrations of the body.

I don't know whether such a trend in medicine has been developed on Earth, but on the planets of the Interstellar Union there has long been a trend that you would translate into Russian as "picture therapy."

Victor: Picture therapy.

Irina: That is, it is viewing certain paintings to heal certain physical and mental problems.

32:30 Photon sound of paintings. The energy of the paintings.

Victor: How else can photon sound emanating from paintings be used?

Irina: First, we need to explain to our viewers what it is? And why is it called photonic? And why the sound?

Victor: One of the scientists, even before the legendary researcher Pyotr Petrovich Garyaev, suggested that photons with spins or spintrons, when they rotate around their axis, moving away from each other, approaching, emit sound. He is absolutely inaudible. But when this sound is emitted along with photons and penetrates the observer of the picture, it causes a certain resonant state in the person himself. Previously, this was almost impossible to detect with instruments.

But Pyotr Petrovich created such a model, where it was possible to record such an ultra-fine, low-current sound. Then we were able to turn this sound into a sound file. That is, we were able to amplify it from low-current to audible for ordinary people.

How can we further manage this new discovery of a natural or social phenomenon? Absolutely everything sounds from this point of view - any image, any frame from genetic memory. Everything absolutely sounds!

Irina: (Zaliatar speaks). Now I will explain what sound is. This is a certain vibration of air with a certain frequency. But the vibration frequency of light waves is much higher than that of sound waves.

Victor: Yes.

Irina: Therefore, you simply lower the frequency of light waves, maintaining the same gradation between them, certain periods of these oscillations. That's why you get sound. That is, you get sound energy from light. There is such a device.

For what? In order to translate color, the color scheme into certain sounds. But I want to say that not only physics or biophysics works there. Every artist, when he painted a picture, put into it the energy of his Soul and the energy of his curators, who prompted him.

Victor: Yes.

Irina: And this energy charges this picture. She comes from it. He doesn't just draw it automatically, like a robot. He puts his feelings into it. Therefore, one picture can be attractive or unattractive for different people, depending on the resonance of their Soul, their consciousness. And the Souls of the one who painted and their curators. This energy remains in the painting forever as long as it exists. And it is transferred to any medium, to any copy of the painting, of course, on a smaller scale, but it is still transferred.

Victor: Yes.

Irina: Therefore, the sounds that are extracted from this picture by lowering the vibrations of light waves still contain its energy. But since a person simply listens to its energy, and does not see what kind of picture it is, then through sound his brain perceives these sound waves. And in him, automatically at the level of his etheric body, a state is evoked that is similar to the energetic state in which the artist was when he painted it.

37:22 Quantum holography. Essential matrices. Torsion fields. Egregors of art.

Victor: Quantum holography, how does a hidden image exist in a painting?

Irina: Yes, I understand what you mean by quantum holography. We usually call this etheric matrices. That is, between the worlds - dense and subtle, and between the worlds - subtle and Spiritual, there are so-called ethereal layers. You usually call this torsion fields, for example,

etc. They separate the world of one density from the world of another density, the material from the spiritual.

In this etheric matrix there are copies of internal organs, for example, a person in his etheric body, etc. Human thoughts are also endowed with etheric energies. They form so-called thought forms. And they are in the astral space, in the Spiritual space, since thoughts go there. They are simply charged with vital energy, this ethereal radiation of his body. These thought forms, which depict what a person has thought about, you call holography.

Victor: Yes.

Irina: Naturally, if a person painted a picture, it usually took more than one hour of work. It doesn't even happen for one day. At first he imagines what he will draw, and his thoughts go to the Astral. But I can't say that they are directly leaving or gathering there, around the painting. They go into another space. But in any case, these thought forms are associated with this picture. Simply put, this is such a mini egregor. And the more people look at this picture and send their energy, the more durable and strong this mini-egregor of the picture becomes.

For example, similar things happen with books and films that many people read and watch. In the noosphere of the Earth there are, for example, egregors of art. Indeed, there are forms of mini egregors dedicated to various books, films, paintings, works of art, etc. You call the image in these egregors holography. These are, as it were, his thoughts and the thoughts of those who watched.

Victor: Okay, I see. Can we create devices that see these holographs?

Irina: Devices?

Victor: Yes, these are these ethereal formations that could be visualized, so that ordinary people could see with their own eyes through this device these holographs in the paintings - the hidden essence of the paintings?

Irina: Such a device can be created. It will be very similar to, for example, your AV camera.

Victor: Great!

Irina: But in any case, simply pointing the lens of this device into space will not work, because it is not located in space. For example, it needs to be directed at the person who is thinking about it. This can be perceived through his thought forms. Because they are simply not located in space.

Man is the link between the noosphere of the Earth and the material space surrounding him. And physically such a device will be located precisely in the surrounding space - material. It

will exist from material elements. Therefore, the person in this case will be the conductor of this information.

Victor: I see.

Irina: To create this device, you need to pay attention to cameras and cameras that can take photographs in the long- and mid-wave ultraviolet spectrum. But only the frame rate should be small, less than 12. And aimed at the person when he is thinking about something. It is advisable to do this against a dark background. And in general, in a darkened room, so that from his etheric field, from the field of his brain, he can see these pictures that may be around him. They seem to appear around him from the Astral.

Victor: Yes, great!

July 10, 2021

Participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

MidgasKaus - representative of the planet Esler, biologist, psychologist, specialist in alien life forms;

Zaliatar is a representative of the planet Raom-Li (Pleiades), a futurologist, a specialist in healing practices, the study of the Spiritual world and the study of time lines, Vanga's curator;

Erwin is a representative of a plasmoid civilization of the 37th density level, from the Betelgeuse system (Orion constellation), teacher of the Order of Magicians;

Victor Batalov is a guest of the conference, author of the book "The Matrix of Life", the Method of Conscious Actions and the "Navigator 4D" system, coach-consultant on changing reality, researcher of developments for extracting photon sound from paintings for the purpose of healing at the DNA level.

#306 Dimensions. Densities.

Parallel realities

https://blog.cassiopeia.center/mernosti-plotnosti-parallelnye-realnosti
https://www.youtube.com/watch?v=vvWZw1Gms9c

00:00

Maxim: Dear friends, hello everyone!

Irina : Hello!

Maxim : Today is a very interesting broadcast.

Irina : Thank you very much for your congratulations!

Maxim : Our broadcast is dedicated to dimensions, densities, parallel realities. Information is received about the transition from one density to another - fourth or fifth. Nobody can answer anything.

I address the entire audience and Vlad. Not to Vlad Pulsar, but to Vlad Friedman.

Irina : Freedom.

Maxim : Dear Vlad! People have asked you about vaccinations. We told them that there was nothing special about them. There is nothing that scares many esotericists. We have been trying to get in touch with you for a long time to figure out who we belong to. To "light" or "dark"? Instead, you classified us as “dark” and told people to think with their own heads that there are chips in vaccines, and we are being chipped.

I would like to ask you to provide evidence if you are from the forces of light. You started scaring people. We, as the Cassiopeia project, carry the level of awareness of the perception of each person. We are trying to explain many points from the point of view of science, esotericism, and psychology. As I understand it, you don’t have such a task, but your task is to give ultra-negative information about secret governments, conspiracies and much more.

Our administrators tried to contact you, but you refused. I started to have doubts: which of the “light” or “dark” people do you belong to? We are ready to enter into a direct dialogue with you and talk about “lightness” and “darkness”, the actions that are taking place on your and our channels. This is not necessary for a scandal, but to improve the quality of transmitted information, from you, as a representative of the “light” forces (as you said), and from us, as representatives of the “dark” forces (to which you included us).

I liked your video where you practically made contact with aliens. We have been in contact with them for a long time and can give feedback from the person with whom you had contact. We are waiting for you on the air. We don't want to argue, we want to live in harmony. If you work in the interests of "light" forces, then we can cooperate together, not intimidating people, but giving them informed information. See you! You have received my offer, I hope you will respond. The administrators will write to you and invite you for a meeting. With our audience we can raise our and your ratings. I give the floor to Irina. See you!

Who is standing, please tell me.

Irina: Kryon. Plasmoids arrived today.

05:55 Removing videos about vaccinations from the YouTube channel.

Irina: Maxim! And they write questions, and Vladimir Goldstein and I discussed them. It is necessary to say about the reasons for deleting the video.

Maxim: After this video was deleted.

Irina: We didn't delete it.

Maxim: Deleted the YouTube channel. We decided not to touch on this topic anymore. We don't need any extra problems to continue broadcasting on this channel.

Irina: The fact is that it was not deleted by accident. In the comments under this video, so much negativity was sent not only to me or to Maxim (we are simple earthly people, just like you). But there they threw mud at our Interstellar friends, Archangels, Angels and the entire Council of Light Forces. Even a platform like YouTube, which is accustomed to everything, could not stand this negativity in the comments. Therefore, it has been removed, but is available on our social networks.

Maxim: You all, especially the "anti-vaxxers," talk about high vibrations, about protecting people and the planet. Who are you protecting? Of people? But at the same time, you throw mud at those people who are vaccinated and want to live kindly on this planet. What kind of highly developed society can we talk about when a lot of verbal garbage is poured out towards people who have a different point of view? We gave you not the point of view of earthlings, but the point of view of representatives of the Interstellar Union - scientists, biologists, psychologists, those who really understand dimensions, densities, vibrations, vaccinations.

Irina: I explained this case to MidgasKaus, representatives of Burkhad. MidgasCaus asked to convey to everyone on the live broadcast that he is ready, through me, as the other side, to speak in a scientific discussion on the topic of vaccination with any biologist, immunologist, even a candidate of medical sciences.

Maxim: Not just with a person who says he knows, but with a person who understands it. It is advisable that this person be an “anti-vaxxer”.

Irina: He is ready, and I am ready to go out to an open discussion together if this person decides to come out and reveal his face. We are ready to be at the conference and talk in great detail about this topic live. This will not be a live broadcast with everyone asking questions. Last time, unfortunately, we again did not have enough time to analyze everything in detail. Mid greets you all and says it’s great that you don’t mind. We are waiting for such a person. If you suddenly come across such a person, you can call Maxim on his phone.

Maxim: Find me on social networks. I will arrange a conference for you with more than one representative of the Interstellar Union who understand biology, chemistry, physics, vaccines, immunology.

Irina: Mead says he is ready for an open dialogue. So that that person also reveals his face, says who he is, what sciences he represents. He can ask MidgasCaus any questions, he can express his position against vaccinations in detail, point by point. MidgasCaus, in turn, will answer his questions and ask him his own. All this will be at the conference for you, dear friends.

Maxim: We are not interested in whether a person believes in aliens or not. He can communicate as if personally with Irina. It will transmit information about the properties and functions of vaccinations.

Irina: If no “anti-vaxxer” who has a biological or medical education dares to come to our channel, does not want to be seen here, maybe some of you, dear friends, who are strongly opposed to vaccinations, will read this information and can simply ask him questions.

Maxim: We do not campaign for vaccinations. To do or not to do is everyone’s choice. We are only giving the Interstellar Union's point of view that vaccination is normal. And then choose for yourself.

Irina: MidgasKaus said about Bergastre that he understands his position, which was on the last broadcast. His position as a representative of the intelligence services, as a person belonging to the military structure of the planet Burkhad. (He says). I am a scientist, I am a representative of science, and not the intelligence services of the planet Esler. I believe that any fear is based on ignorance of something. To dispel this fear, it is necessary not to punish people for it, for denial, for protest, for the aggression that they show. Their self-preservation instinct is activated, which is caused by this ignorance. I believe that it is not punishment that should act, not the state, not political and state elites, but only clarification and dispelling the darkness of ignorance in this area. I am ready, as far as necessary, as far as Irina agrees, to talk about vaccination with any vaccine, each stage of the action of your immunity in the conditions of infection with any infection. As far as I know, I studied this using the entire knowledge base of the Interstellar Union.

Maxim: Today’s broadcast is dedicated to densities, dimensions and other forms of perception of reality. I will give you hints and ask questions, because I am often asked these questions. You can ask questions of this nature in this chat.

13:49 Presentation of conference participants.

Maxim : Irina, let's start with galactic news.

Irina : Now I will introduce those who are present here. Here is our Esya (cat) as a representative of planet Earth. A soul created by plasmoid civilizations of the 12th density level.

Maxim : The first time I sat on your lap. It's your birthday, a holiday!

Irina : She also congratulates me on the holiday. Our curators, representatives of the planet Esler, are with us. MidgasKaus is a biologist, psychologist, specialist in alien life forms. Representative of the planet Shimor, specialist in astral interactions - LiShioni. The representative of the plasmoid civilization of the Earth's magnetosphere of the 15th density level is Astrich. Another representative of the plasmoid civilization of the 37th density level, who has already attended some of our conferences. His name is Erwin. His civilization is located in the constellation Orion, at the core of the star Betelgeuse.

15:36 Dissemination of information among plasmoid civilizations. Natural disasters.

Irina: Who is the news from?

Maxim : From Astrich. Are we representatives of a subtle-material civilization?

Irina : Astrich from the Earth's magnetosphere.

Maxim : He's not from Kryon?

Irina : Yes, I am a representative of a group of civilizations called “Kryon”.

Maxim : Let's listen to the news from the representative of the Kryon civilization. What's the most interesting news from the last week?

Irina : Greetings! Greetings, Maxim! Greetings, dear viewers! I have already communicated with the person several times. I have my contacts here, so it’s relatively easy for me to do this. Many concepts that exist in our thinking apparatus do not exist for third-density earthlings, since their language is too three-dimensional.

Maxim : What density are you at?

Irina : In the fifteenth.

Maxim : Density level 15?

Irina : Yes. We also have new information, which you call “news”. This is something that no one knew before. News is information that is new to some creature. Such information spreads instantly within the Earth’s magnetosphere through special channels of subtle communication (he shows me how it looks like a network). It largely follows the contours of the Earth's magnetic field.

News from last week. A week is ¼ of a lunar month. We don't have emotions like yours. But it caused something similar to surprise, at the same time indignation and compassion, that is, a mixture of emotions. The fact is that climate change is now intensifying on Earth, causing weather anomalies. In some place there is an increase in temperature, in some place on the Earth there is a rapid arrival of cyclones with large amounts of precipitation and flooding of areas of the earth's crust. This is happening here, in Russia. I know the areas where you live. My world is located exactly in the projection, approximately 150 km above this city.

My news is that the plasmoid civilizations that are responsible for the weather are plasmoids of the elements of air, water and, in part, plasmoids that are responsible for certain areas of the earth’s surface and water expanses. They told us that a lot of low-vibration energy of people had accumulated in their worlds. Their vital forces are charged with heavy emotions. We call this “dark color”. Not by the Light of Divine Love, but by the light of denial, fear, hatred.

All this accumulates more in the southern regions of your country due to the fact that people of a special type live there. A special political and economic situation is created there, although this is not the exact term. For this reason, they began to cleanse their world by transferring energies from the more subtle worlds into theirs in order to cleanse their world of these low destructive energies. This causes the activation of all natural elements on the earthly plane of third density. This breaks out in the form of the cataclysms I have indicated.

The next news is that you can stop all this yourself if at least 70 percent of the adult population of these areas in the morning, after sunrise, do meditation on forgiveness, love, acceptance, harmony with yourself and with the whole world around you, because . you have no harmony. The disharmony caused in your Souls breaks out onto the dense material plane in this way.

Maxim : It turns out that the world that surrounds us reflects to us the destructiveness that we send into it?

Irina : Not only you. Not only you, as a specific being, as a specific Spirit. You live in a certain area, and it reflects the thoughts of the majority who live here. If many people think in the same direction, then they charge the space, including the astral, subtle-material space, which is everywhere around them.

22:14 Kryon about viruses and vaccination.

Maxim: Volodya, if we raise this topic again, our video will be blocked.

Irina: What does Kryon think?

Maxim: He writes: “What does Kryon think about why we were blocked?”

Irina: I see what Kryon is thinking.

Maxim: What does Kryon think about this?

Irina: He said the news. Kryon, they ask you: “As a representative of the Earth’s magnetosphere, a plasmoid of the 15th density level, what do you think about vaccination?”

Maxim: They will block us again for a week.

Irina: We don’t have such a concept, we don’t have bodies that can be subject to destruction by living organisms, which you call viruses. I can only say that the group Souls of viruses are created by the same plasmoids that live in the 15th density level. Level 10 density creates a lot. There are 5th level of density. The souls of organisms such as viruses are created by representatives of plasmoid civilizations. But not all are known to your scientists. You haven't discovered many viruses.

Maxim: Those that exist on our planet, but have not been discovered by our scientists?

Irina: Yes. There are many viruses and larger forms of life, such as bacteria, that you have not yet discovered. They are all around you, but only 1.5-2% of all viruses can be dangerous to humans under certain conditions. It does not depend on the plasmoid that made his Soul. It depends on the properties of the organisms where this Soul has settled. Virus bodies can multiply either in bacteria or in plants, fungi, animals, and people without causing them harm.

But it happens that their reproduction gets out of control, their energy begins to be damaged. Each virus has a certain life cycle, after which it must self-destruct without causing harm to the cell. A virus is an intracellular organism, and if it causes great harm, the entire organism will die along with the virus. Due to some disturbances in the energy of the person himself, a disturbance in the energy of those viruses that live in him begins. Almost every person, starting from childhood, has disorders that make this virus particularly dangerous.

The first reason why viruses behave this way is your global distrust of the world around you, nature, which has been instilled in you since school. You are being set up to remake the world, to move forward, so that you use it so that you can be happy and harmonious in this world. This is natural for your level of development. But such a desire to put yourself above nature in this sense, to raise your level of significance, raises the level of your kundalini to the third

chakra and causes the activation of these viruses. They start to behave just like you. This is very simple.

Since there are 96% of such people on Earth, diseases caused by viruses and bacteria can affect a large number of the population. Naturally, people begin to protect themselves from them with various medications. Medicines kill viruses and bacteria themselves, removing decay products from your body. As MidgasKaus has now explained, you create preventive measures against infection by these viruses so that your immune system, which is initially aimed at maintaining order in your body, can destroy this danger while it is still small. In the form in which you now live, by your desire, which the Souls of viruses are rearranging in this way, I believe that this is a good manifestation of the instinct of self-preservation.

Maxim : Guys, you write that other channels tell you that you can't do them. We cannot tell you any other news. We provide scientific data as best we can. Everything related to the transfer of information by other contactees should remain on their conscience. We belong neither to the "dark" nor to the "super-mega-light" forces. We pass on information to the representatives who supervise us, who created us.

We can talk about the Spiritual and subtle world. We can ask any of the worlds how they feel about vaccination. But we won't do this on air. To make you think, I am providing information. Since the advent of vaccines, you have been intimidated by the fact that they contain chips. All contactors, all channels said that through vaccination you will be microchipped. Show me at least one chip in any vaccine. You have been deceived and will continue to be deceived. Think about who is carrying what information. I think this is really some kind of conspiracy to pass on information that others are carrying.

We wanted to invite Khamilia, but didn't, so that Irina Chikunova wouldn't think that we were trying to attract attention at her expense. They invited Kryon because there are no well-promoted, established Kryon contactees in Russia. We invited Kryon to talk about density and dimensionality.

30:36 Quantum transition. Space and density. Quantum.

Maxim : Irina, they say that now is the moment of quantum transition. Are we moving from 3D density to 4D density, to 5th dimension or to 5th density? Where, why and do we need to move somewhere?

Irina : "We", what do you mean? Very important note. (Kryon speaks).

Maxim: We are human and physical beings.

Irina : The word "we" can talk about personalities, both Spirits and bodies.

Maxim: In addition to the physical body, I have six more energy bodies. I say the word "we" as 6 energy bodies.

Irina: If you are talking about your physical body, then pose the question again. Are you asking if your physical body is transitioning to any other density?

Maxim: Dear friends! Yuri Lear does not want to respond to our message. Together with representatives of the Interstellar Union, we would arrange a debate with him about the program, the secret government, the Ahnenerbe. I have a lot of questions for him; they say he doesn't explain many points. I would like to check with him.

Irina: If you tell him and persuade him to come to the conference with us, we are ready.

Maxim: We will talk to him. We are not afraid to communicate. They are afraid to communicate with us. They come up with different reasons: that we are from the "dark", or from someone else. On the Internet they get rid of us for money. This is nonsense. They take money from people in order to save a person, to untie him from our egregor.

Irina: She writes again: "Irina, why does Archangel Gabriel say: "Don't do vaccines, they are harmful!" He didn't say that.

Maxim: He didn't say that. You definitely didn't hear this on our channel. The information that is transmitted on the channels comes through the relay of the contactee himself, through his fears, blocks, through his perception of the world. Everything that goes on the channel comes from the contactee himself through his Retranslate.

Irina: We stopped at Kryon's question. Maxim, are you asking a question about whether your physical body is transitioning to a different density?

Maxim: Yes. Because everyone in their physical bodies went somewhere, to some kind of 4D.

Irina: Such a phenomenon exists. It is called in a very simple word - the completion of the cycle of the Universe.

Maxim: They say: "Stop shouting." My voice is powerful. I can't talk quietly, I can't whisper to Irina. I talk normally, I don't shout.

I want to know where we are going, what 4D? They write to me: "Maxim, we are moving to fourth density, but you remain in the old vibrations." I ask them: "What is 4D?" Nobody can answer. That's why I asked to organize a broadcast today to understand where you are all moving, what density are you going to?

Irina: The fact is that each star system as a whole, including the entire Universe, goes through a development cycle. Now the solar system has a dense material development cycle.

There are planets, asteroids, satellites and the star itself, manifested in a dense material physical, as you call it, a three-dimensional world of third density. The development cycle consists not only of the phase of existence in the physical world - the dense phase of existence. It goes into other densities, other dimensions with all matter.

Our common Solar system, in which we live, will move to fourth density in terms of vibrations that exist now, but not earlier than in 15 million Earth years. The physical body gradually increases its vibrations together with the planet, with the star. Then there will be neither the Sun nor the physical Earth here. At the energy level there will be certain fluctuations in energy that can only be seen from other planets in the form of "dark matter". These will be fourth-density plasmoid worlds.

It will take several more million years for all this to move into the fifth, sixth, seventh density and higher, up to the 59th level of the Interstellar Union. Then all matter will turn into Light, will turn into Light. There will be a metamorphosis of the transformation of matter without loss of its energy content into Spiritual Light. Everything will go into the Spiritual world, there will be a cycle of existence when there will be only the Spiritual world. There will be no time there, but according to the time of your dense world, this fact of spiritual existence can last either one second or several million years. For the Spiritual world it is the same. This is a phase of existence. After this phase of existence, the 59th density level will arise again, the 58th, the 57th, and there we will again incarnate.

If you meant a physical transition to another density, then this is a transition to a subcycle of existence. Those people who will live in the immediate phases of transition into 4th density will be born there, and their bodies will gradually raise their vibrations until they completely transition into radiation form.

Maxim : They write that the Earth on the subtle plane is already in the fifth dimension. What do they mean? What is the Earth in the fifth dimension?

Irina : What do you call Earth? The Earth is not only the physical world.

Maxim : Is the Earth in different dimensions?

Irina : There is a physical Earth, there is an Earth of subtle material form, there is an astral sphere. This is all the Earth, as if nested within each other, but located at different frequencies. (Shows a crystal cube with balls around it. And all these balls are surrounded by a pyramid. And they spin. This is what it looks like in his perception).

Maxim : The quantum transition of the Earth from 3D to 5D in physical bodies is the ascension of the Earth? Where should we go? 5D – what is it?

Irina : What can the letter D mean? This is already your term.

Maxim : So you write, explain what 3D and 5D are in physical bodies. I have more than three

dimensions. I measure them differently. This doesn't mean that I'm not in 3D. I am in a 3D model, I am a physical body in this world. In other worlds I am not a physical body. The number of dimensions in these worlds is increasing. It turns out that I am in 3D, 5D, and 10D?

Irina : With your physical body you are in the dense world, in 3D, as you say. If 3D is a dense world for you, then they did not explain what 3D is for them. With your etheric body you are simultaneously at all levels of plasmoid density. The etheric body contains the ability to be, to be, to be connected to different frequencies. If you are an earthly person, then these are all frequencies that are characteristic of the Earth.

If you go beyond the Earth in your etheric, astral body, which will be enclosed in an etheric shell, then the etheric body will change its vibrations as a result. When you reach the level of the Solar System, your etheric, astral and mental body will have access to plasmoid civilizations of other density levels, which are responsible for the Solar Systems; if you go beyond the Solar System into the Galaxy, the Milky Way, things will be different.

Maxim : Is it correct that when we move from the third dimension to the fourth, we remain in our physical bodies, but our opportunities for entering the Astral and visiting other worlds increase?

Irina : He answers that the cycle of the Universe, the transition from density to density, the quantum transition are different things for him.

Maxim : 3D and 5D – is this the level of density?

Irina : The quantum transition is an increase in vibrations in the physical world, which does not lose density.

Maxim : Can we say that when moving from one space to another, we do not lose our physical density? But at the same time, we increase our level of awareness of perception and sensitivity to other spaces?

Irina : What you call the “quantum transition” is a small subcycle of the large cycle that I just talked about. It consists of gradually increasing the vibration of your density level. It increases simultaneously with an increase in the level of vibrations at all other levels of density of earthly plasmoid civilizations. So we are moving evenly. First, the vibrations of the 20th density level, which are responsible for the Earth, increase. Then on the 19th, 18th and so on.

Maxim : I will not complete this broadcast until I understand for myself exactly where we are going, to what density, to what dimension. Everyone unanimously says that we are moving from 3D to 4D and to 5D. What does this mean? Mid, can you explain it to me? People can't explain. We move into a space where the vibrations of all our bodies, both physical and energetic, become higher. Being in the same bodies, we move into a space where we can sense, sense, and influence this space more. Is it so?

Irina : Esotericists of different channels understand different things by the same term, so now you have confusion. You need to understand the opinion of the Interstellar Union that there is a certain cycle of development of the Universe.

Maxim : Let's say that I am in third density. They tell me that we are now in a quantum transition, that we are starting to raise our vibrations and moving into 4th density. What does it mean?

Irina : If this is what Kryon is talking about, then you will move to 4th density after many millions of years. Physical matter will disappear.

Maxim : I understand. According to the theory of the Interstellar Union, there are density levels from the first to the 59th. The 4th level of density does not imply the presence of matter. This is according to Kryon and the Interstellar Union.

Irina : Physical matter.

Maxim : Physical matter. Contactee information: fourth density, fourth dimension, 4D space. What is meant in principle?

Irina : They may mean a quantum transition by this. This is an increase in the vibrations of the physical world without its dissolution and transition to the 4th level. Vibrations increase, but physical matter remains the same dense. This allows Spirits who incarnate in such bodies, as you said, to think more clearly, come faster to the Light of their Soul, have a greater speed of thought, and are less likely to accumulate negativity. They will feel their Light more, but their physical bodies will remain physical. This is usually understood as a quantum transition.

Quantum is a property of physical matter. This is not a fourth density property. Between the third and fourth density levels there are quantum fields that separate them. Not quantum, but more torsion bars that spin. This is a form of ether that separates density levels. From the 4th level of density comes energy for the formation of the 3rd level of density, those atoms. First, quantum fields are formed from torsion fields. You call them separate quanta, but they are not yet separated from each other. As they condense, they create particles that you call subatoms.

Maxim : Is it right that we are simply moving to a new level of awareness. Our energy fields will begin to work better. We will enter a space where we need to react differently to the information field in which we will find ourselves.

Irina : Yes. (Mead speaking). We will react differently to the information field in which we find ourselves. The vibrations of your physical bodies will be higher, and this will allow you to more fully receive information through your senses about the world around you and feel like Spirit.

Maxim : Information from the Interstellar Union gives us the opportunity to realize and understand how the Universe works in order to competently consolidate, be and configure in it.

Irina : Yes, that's why I say always look at the term. If the word “quantum” is used, this does not mean a transition to the 4th density, because there are no quanta there anymore. There are other types of energy there, perhaps you would call them etheric. In your science there is still no term so that I can name, for example, the difference between the 4th and 5th levels of density, except for those frequencies that exist and have already been transmitted to you, which are measured by our scientists. But there are no names for these energies. Both will be energy unknown to you.

49:32 Hydrogen atom. Quantum field vibrations.

Maxim : Mid, please tell me, are changes currently taking place in the hydrogen atom? Is this connected with the transition to another density, dimension?

Irina : This is due to an increase in the vibrations of the quantum field itself (Raom Tiyan spoke about this). This is not due to the transition to another density. The hydrogen atom itself doesn't disappear, it just vibrates faster. Its energies that make up this atom begin to vibrate faster, but it itself does not disappear, does not dissolve. The same gas - hydrogen, for example, consists of hydrogen atoms. If we take hydrogen in the gaseous state, then it has the same mass, the same density. This means that it does not disappear.

Maxim : I see, thank you. Guys! In order for you, as you write, to “get in touch”, you need to study the information provided by the Interstellar Union and come for training. We have opened a school for contactees. There is a special school not for contactees, which is called “Self-healing through the Higher Self.” You can not only “get in touch”, but also get your body healthier.

51:04 Results of checking reptilian bases on Earth.

Irina : An interesting question from Rafael about Mitya.

Maxim : Mitya said that the reptilian group, which is in contact with the elites of the Earth, transferred to them the technology for introducing nanochips through vaccines. Do such technologies exist? There are no such technologies! How many times have we already talked about this? Rafael, even you know about this. Do you want us to repeat this broadcast? We don't have such technologies now.

Irina : On the last broadcast, Bergastre, the head of the Security Service from the planet Burkhad in our sector of the Galaxy, where Earth is located, said that the study of reptilian bases on Earth has been completed. All employees who are there, all devices, all video camera recordings, all contactors who were there before have been checked. No evidence of the transfer of any technologies, including nanochips, to terrestrial representatives of any state has been identified.

Maxim : By the way, our contactee is arriving tomorrow.

Irina : He hasn't called yet?

Maxim : He wrote. I said that tomorrow at 11 o'clock contactor Vasily is coming to us, who conveyed information from the reptilian civilization. He wanted his senior comrades with clearance to convey information not through him, but to speak directly through Irina. We won't do that for now. Let's give him the opportunity to pass on information to more reptilian contactees allowed through him.

Irina : Then he continues: "Do aliens have such technologies?"

Maxim : Rafael, you know what it is.

Irina : Of course, they have had nanochips for a long time.

Maxim : We haven't gotten to that point yet, so there's no need to be afraid. Installing a QR code is not the "seal of the devil", as many say. A QR code is needed to cross borders so that it can be determined who has been vaccinated and who has not. There was information that if you were vaccinated, your Soul would separate from your body, and you would lose your extraordinary, extrasensory abilities.

Irina : A vaccine, whatever it is, is just a physical substance. A mixture of physical substances that have their own vibrations, entering your body, change its vibration. It cannot be said that the Soul separates from it, which prevents it from moving to another density, or in any way influences this process, which comes from the Spiritual world. This is not to say that vaccination interferes with this transition. Nor can it be said that vaccination helps in this transition. This is a completely neutral physical action associated with medicine, with a person's concern for his health, as he understands it.

I read a lot of comments during this time. I perfectly understand your concern that you are being forced to do something, to pass some laws. I partly share your indignation, since this should be voluntary. My dear people, my dear Divine Souls, those who want to be vaccinated, to vaccinate their children, if pregnant women want to be vaccinated, they also have every right to do so.

Maxim : There is no need to throw mud at them, there is no need for so much anger, hatred, condemnation. We do not judge those who do not want to do this. Why do you condemn us? Where are your high vibrations with which you save the whole world? There is anger and hatred coming from you.

Irina : You write about them that they are afraid to die, they sell their Soul to the devil, this is not a manifestation of your love. Even if they are afraid to die, this is their full right as people, because every person has an instinct of self-preservation.

Maxim : No conversations on this topic, because we might be blocked. We are waiting for a person who is ready to contact us. We are ready to speak openly and frankly. We may not

post this on YouTube, but we will post it on all other social networks. Therefore, we are waiting for a literate person who will be for those who do not want to do this.

Irina : Tenth message on this topic.

Maxim : Graphene oxide in vaccines. Graphene is poisonous and affects the lungs. Let's not talk about it.

We are waiting for Vlad Freedom. We will talk about who we belong to, and how he determined from a distance, without knowing us, that we belong to the “dark ones.” A normal person will contact the administrators and say: “I want a conference! I have 20 great questions for representatives of the “dark” civilizations of the Interstellar Union, who tell us the whole truth.”

Irina : Mead agrees to host this conference if you fully reveal your face and your personality. You will say who you are, why you hold this opinion, where you work, what your education is. Then he is ready to answer any of your questions, but, of course, he will ask you his own.

Maxim : Irisha, I think we need to thank you. They write so many congratulations to you!

Irina : Thank you very much, I thank you all, dear friends. Today coincides with my birthday. Dear friends from the Interstellar Union, from that part of the embodied earthly Souls who have long been members of this Union, congratulate me. Today I felt that it was as if we had entered into the Interstellar Union: I received so much warmth, love and light, and happiness from all of you! Even if you are far away, I feel that you are near me. I thank you and send you the Light of my Love! I thank and accept, love and bless! The light that you sent to me, I promise to send to every person, no matter what he is, so that he can see it within himself. I promise to always try to do this, both on Earth and beyond the Earth, as far as my strength is sufficient in this incarnation.

Maxim : I can take on the entire burden of your negativity, I will learn to transform it and accept you for who you are.

58:50 Merger of the Interstellar Union and the Galactic Federation of Light.

Maxim : How is the merger of the Interstellar Union and the Galactic Federation of Light going?

Irina : It's going great. Especially on the basis of the fleet of the Interstellar Union with the fleet of Ashtar Sheran and the Galactic Federation of Light, including during the moments of practice that Irina conducts every Sunday at 14:00 Moscow time on the ship of Ashtar Sheran for all of you. This is a joint effort to help earthlings in this difficult time of exacerbation of all social conflicts and natural disasters on Earth.

We can help you without directly interfering in your development only with the Light of our Love, through knowledge, through spiritual healing, through answers to all your questions. So that you understand who you are on this Earth, why you came here, and what awaits you ahead both in the case of destructive development and in the case of development in the Light of God.

Maxim : Are you relaxed? You won't be able to relax. No matter how much I try to do broadcasts, I can't relax. I will probably relax when I move into the fourth dimension and remain without this physical body. I forgot to say the most important thing. If you want to congratulate Irina, then today all your donations marked "happy incarnation day", "happy birthday" will go towards a gift for Irina. Next Sunday we will show you the gifts that we will give to Irina with your help.

Irina : Thank you everyone!

Maxim : Show me the pendant, Irisha.

Irina : The administrators gave it to me today.

Maxim : We can't bring him closer or show him. This is the sign of the Interstellar Union - a seven-pointed star applied to the flower of life. We got along with our administrators and moderators and bought a gift.

1:02:22 Density levels of plasmoid civilizations.

Maxim: Irina, remember, we wanted to read something about Spirits. What will happen in the book? Kikimoras, goblins?

Irina: Yesterday, a specialist in plasmoid civilizations, a representative of Lyra from the planet Esedret, came. From his reference book, he gave me information about which levels of civilization represent whom. He handed it over and left. We will describe it in the book. I can only say that, for example, from the 4th to the 12th density are civilizations that are responsible for the elements of the Earth. From 12th to 20th density are civilizations that are responsible for places of nature. From the 20th to the 28th density are civilizations that are responsible for the magnetosphere of the Earth (where Kryon comes from) and interplanetary space. From the 28th to the 36th - civilizations of the outer chromosphere of different stars, chromospheres are the shells of stars. From the 37th to the 45th - civilizations of the inner cores of stars. From 46th to 59th – civilizations of galactic nuclei and intergalactic space. Very approximately.

Maxim: You will read more accurate information in the book "Notes of a Contactee," which we are preparing for release. In it, Irina will talk about herself, about the Interstellar Union, about densities, dimensions, give graphs, describe which megahertz are responsible for which density. The book will be out soon. We will definitely tell you about it live.

1:05:32 Irina's travel planning.

Maxim : Irina, they ask when and where will you fly next time?

Irina : Kirchiton is ready to take me. Our administrators will choose one place. Where do you want me to fly?

Maxim : We do this collectively. Administrators choose where Irina will fly. We do not disclose the place and time of contact. Below this video there is all the information about our site.

Irina : Mars, Nibiru, Mantuk, Centaurus.

Maxim : To Mitya, to his planet far away.

Irina : Pleiades, Sirius system, Sun, Selbet.

Maxim : Where can I fly? None of the contactees had ever been to earth bases. We will most likely send Irina to a base near Lake Baikal. This is the place where we go on retreat. Irina, if she is allowed, will visit the base and tell what is happening there. It's a bit far to Antarctica, but just right to Lake Baikal. On Earth, let's start with Baikal. There will be a retreat there from September 5 to September 30 - two sessions. You can sign up for the video. There are one or two spots left. Someone refused because of vaccinations. We do not require any vaccinations. Everything will depend on the situation.

There was a desire to fly to the Pascats. We'll keep thinking. Write on social networks and chats where you would like Irina to fly. The more opinions the better

Irina : Yesterday Kirchiton came to me in mental contact. He says hello to you and says: "I'm ready to take you wherever the representatives of your Cassiopeia project choose." Such an agreement was with the Contact Council of the Interstellar Union. Now it's not Kirchiton, it's not me who chooses where to fly, but the administrators through you. They want to know what interests you.

Maxim : Where to fly, and what you need to know.

Irina : What information to bring. They test the level of awareness of all of us, which requires physical contact. What can you find out there?

Maxim : Tibet is closer. We can go to the Tibet base too. Be sure to write what this contact is for. Not just to fly, but what is it for?

Irina : He said that as soon as you decide, he is ready to take me.

Maxim : Irina has already flown to Burkhad, to a meeting of the Interstellar Union. There is a whole article on VKontakte about this meeting. I also flew to Futissa.

Irina : I don't want to go to the Sun.

Maxim : I also flew to Shimor. Everything is on VKontakte, please come in. You will find a large number of articles about where Irina was. This information is available. A book will be made based on this information.

Irina : This book will contain a description of plasmoids of one type or another, as they are called in our earthly mythology, in our folk beliefs. All these names will be listed there.

Maxim : To the island to Jesus. We thought about this today. Irina was on Venus. We'll keep thinking. There is no need to go to the Dyatlov Pass, because there is a huge amount of information from regressologists and contactees. There are variations of events in the Timeline that contactees and channelers can go to. In the black hole we were in the mental and astral plane. To the reptilians who have a dictatorship. By the way, it's an option. We'll talk to him tomorrow.

It's time to finish. A very busy day. We are waiting for you every Sunday at 14:00 for astral flights to the Ashtar ship. Another interesting news. On the Meditation channel, Irina, together with a representative of the Interstellar Union, will conduct relaxing meditation practices one day a week to prepare for astral exits.

The book cannot be purchased yet, it is in the draft. We are currently concluding an agreement with the publisher. We'll tell you as soon as it comes out.

Thanks to all! I see that many people have already sent their gifts. I'll be sure to let you know what they collected and what they bought for Irina. It will be a secret for her for now. I guarantee that all funds will be spent only on a gift for Irina.

Irina : Thank you all for your spiritual, moral and material support for me and the entire project! By supporting this project, me, Maxim, you support yourself, because this project is not me, not the Interstellar Union, not Maxim. It's all of you, it's all of us together!

Maxim : Yes. See you again! Vlad Freedom, Yuri Lear - we are waiting for you! We'd love to talk about conspiracies, dark governments, vaccines and much more.

July 11, 2021.

Conference participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia Project and the Center for Spiritual and Physical Development;

MidgasKaus - representative of the planet Esler, biologist, psychologist, specialist in alien life forms;

LiShioni is a representative of the planet Shimor, a specialist in the astral world and its interaction with the material world;

Astrich is a representative of the plasmoid civilization of the Earth's magnetosphere, 15th density level, representative of the Kryon group of civilizations;

Erwin is a representative of a plasmoid civilization of the 37th density level, from the Betelgeuse system (Orion constellation), teacher of the Order of Magicians;

Video in text
May 1, 2023

#307 How does the real world work? Alien science and advanced technology. Laws of physics in the Universe.

https://blog.cassiopeia.center/kak-ustroen-realnyj-mir-nauka-i-peredovye-tekhnolo
https://www.youtube.com/watch?v=HO_oWUQDb2U

00:21 Presentation of conference participants. Fundamental physics.

Irina : Hello, dear friends! My name is Irina Podzorova. I am a contactee with extraterrestrial civilizations. Today with me are my curators in astral bodies - MidgasKaus from the planet Esler, a biologist, psychologist, specialist in alien life forms, and Raom Tiyan from the planet Burhad, a specialist in energy interactions in the environment. Today Dmitry will ask them questions. Hello Dmitry!

Dmitry: Hello, colleagues! I am Dmitry, I have been studying fundamental physics for quite a long time. And besides what is known in our usual academic science, there are many directions of a different nature, which in many issues are more advanced than the science that, for example, is written in textbooks. Actually, in order to align the terminology of the conversation, I will now briefly, literally for three minutes, tell you what we do.

Due to the fact that there is no complete consensus in science, there are some difficulties. But, in my opinion, there is the most adequate methodology for adequate reality. And it consists of this: there are two parts of physics in the study of nature. This is metaphysics, which puts forward basic principles that are currently unprovable by theoretical methods, but they are true and do not contradict experience. And the second is physics itself, which deals with experimental data, their analysis, putting forward hypotheses and, accordingly, testing them. And, accordingly, he considers the entire world beyond metaphysics to be material and three-dimensional. That is, exactly the way we see and imagine it.

In our physics, space is infinitely divisible, and there are infinitesimal volumes of space. It is continuous, linear. It's the same with matter. Matter can also be broken down to any level of density and any size. Well, time is, accordingly, the duration of processes. That is, we take a certain reference process, call it a “second,” and then we compare all other processes with this process. That is, time, it turns out, is also a ruler. Just as we measure space with a ruler, we measure the duration of processes in the same way through some reference process.

All these fields: electric, magnetic and other fields are the movement of some matter, which is lower in density than matter, atoms, for example, tables. That is, what we directly interact with.

So the fields are somewhere 11–15 orders of magnitude lower in density than this. Accordingly, light, gravity and other phenomena are also some types of movement of some matter, but low-density. And, accordingly, structures with a density lower than 10 to minus 12 kg per cubic meter in our usual units have not been studied.

We represent all phenomena through mechanical models. That is, we must imagine how something moves there in order to understand how the phenomenon works. The entire methodology of science is exactly like this. That is, we represent the material world as material. And accordingly we imagine how matter moves there. And from this we draw a conclusion about what fields are, etc. I think everything is clear here, right?

Irina: Yes, they understand everything. It's just that what you call low-density matter, they say, on the contrary, high-density. That is, they are increasing the third density there.

Dmitry: Yes, as I understand it, you distribute it by frequency.

Irina: Yes, by frequency.

Dmitry: I agree. Understood. That is, in general, there are no contradictions here.

Irina: (Raom Tiyan speaks). In general, the model of your science is clear. You stated it correctly. We, meaning in the Interstellar Union, the capital of which is the planet Burkhad, have a slightly different approach to the study of reality - through the study of the Spiritual world, subtle worlds. And we are already studying how the dense material world and its structures are formed. Because one comes out of the other. And therefore, many laws of physics that you consider fundamental are for us special cases of this phenomenon, but there may be others.

Dmitry: Got it. This fits very well with what we are going to have in our conversation now.

05:24 About the border between the material and Spiritual world. Veil of the Astral. How to measure spiritual vibrations?

Dmitry: The first question I want to ask, and it is key, in my opinion: your lectures and materials say that there is a certain border between the material and Spiritual worlds.

Irina: Yes.

Dmitry: The question is: how was this border discovered? Maybe some kind of experiment or process in which the border between the material and Spiritual world is discovered?

Irina: Astral.

Dmitry: Yes, astral.

Irina: The closest region of the Spiritual world to the material one is the Astral. I now want to say a few words about what it is. The point is that, unlike the linear model you presented, the real world is three-dimensional. That is, this is not a linear space, but a volumetric one. Yes, the volume of space is infinitely divisible, at least depending on the naturally perceiving abilities of the receptors of any measuring instruments. Therefore, the astral world is not just further than the material one, but it is, as it were, embedded in it.

The volume of material space contains the volume of astral space. That is, it's like in the form of two nesting dolls. For example, now you are simultaneously in the physical world, in all plasmoid worlds (at their density), in the astral and Spiritual, that is, in the world of disembodied Spirits, and in the Divine, where the Divine Light is. All this is superimposed on one another, only the difference is in the frequency of vibrations.

Dmitry: That is, they exist together. And the question is purely about the level of density or what? Or in vibrations, by the way?

Irina: For intelligent beings, the question is purely about the level of perception.

Dmitry: Got it. That is, it turns out that we are talking about the fact that the world is one. And the whole question is precisely that there is some conditional boundary that separates the astral and material worlds according to the level of density.

Irina: In terms of density, it's the material world. And in the astral world there is no density. There are simply spiritual states there. We cannot call them "density". We usually call them "vibrations". That is, these are some qualitatively different states of the Spirit that have their own characteristics. And, accordingly speaking, they lead you to one level or another.

Dmitry: Got it. Is there any way to detect this? That is, come up with some kind of device, experiment or process? And discover that there are vibrations of the Spiritual world, and that they are somehow independent of the material world?

Irina: The devices themselves consist of material substances and their combinations. All that can be measured by them are material states, material vibrations, material mass, etc. There is a device that can measure spiritual vibrations. But this device itself is not material. Every intelligent spiritual being has this device. And it's called, I'll tell you the usual term for esotericists, is "Spiritual Heart".

Dmitry: Once again, "Spiritual", what?

Irina: The Spiritual Heart or Spiritual Essence is the device that is tuned to certain vibrations. It is a spiritual device, as you know. You may know from your life experience that you can only measure length with a ruler, but you cannot measure temperature with a ruler, for example.

Dmitry: Right. Because temperature is a process.

Irina: Yes. How does the process differ from a drawn line? At least in that temperature is also a certain material measurable quality, one might say, of matter. But in any case, a ruler can measure what is visible with the eyes, and temperature can measure what the body's receptors are tuned to.

Dmitry: I roughly understand what you are talking about. It turns out that a person and any living intelligent beings are both a process and a material entity. Accordingly, we are simultaneously in the Spiritual and material worlds, right?

Irina: A person has both matter and Spirit.

Dmitry: Yes.

Irina: It is a combination of both. Therefore, a person studies the physical (material) world with his body. And with his Spirit he studies, and not only studies, but cultivates in himself, the indefinite qualities that he came to develop in this material world.

Regarding your question about the discovery of the Astral Veil, naturally, it was discovered through astral travel in experiments on the influence of these travels on material objects.

Dmitry: Okay. I roughly understand what you are talking about. I think we can move on.

Irina: For example, now I am in the Astral, in an astral body in the space of this room. It's just that for me this room is not the same as Irina sees it, but a sequence of some energy layers that consist of the thoughts, feelings and words of those people who visited her today. And if I try to influence any material object, highlighting its energetic properties, for example, move it, take it, influence it with my energy in order to heat it, then I will not succeed, because the Astral Veil will not let through.

Dmitry: Okay, I roughly understand what you are talking about. Then let's try to go further on the issues.

12:10 Structure of the magnetic field.

Dmitry: The next question is quite specific: what is the structure of the magnetic field according to your science?

Irina: Firstly, the magnetic field is a dynamic system. Okay, I'll describe to you what it looks like isolated. What kind of image is this? He shows me that the magnetic field resembles a

large rotating spiral. Moreover, it rotates not in one direction, but in two - towards each other.

Dmitry: So it's just like a tornado, a whirlwind? Or what is it?

Irina: One side rotates this way, and the other - in the opposite direction.

Dmitry: It turns out that there is one pole on the left, and another pole on the right. Something like this or what?

Irina: They don't call it "poles". They call it "rotation". Because what rotates in a magnetic field we call "quanta". Magnetic field quanta, we measure them.

Dmitry: Are we comrades from the planets?

Irina: Yes, God.

Dmitry: Okay.

Irina: We measure these magnetic field quanta. Firstly, we do not call quanta "particles". We call a quantum "the smallest portion of energy." This smallest portion of magnetic field energy is a quantum, a quantum field. Any energy field can also be called quantum.

Dmitry: Okay, I understand.

Irina: And they rotate. That is, they are in constant interaction. Because the funnels are so wide, the magnetic field from the source of the magnetic field diverges over a distance.

Dmitry: Got it, okay. Then let's move on.

14:04 The structure of the electric field. Electric field quanta, vortex bundles.

Dmitry: In addition to the magnetic field, we also have an electric field. Then what is its structure if we say that the magnetic is some kind of vortex with funnels?

Irina: Yes, the electric field is also a dynamic field, even though for your visibility it is sometimes static. But within itself it is still dynamic.

Dmitry: Got it.

Irina: And its shape (electric field quanta) is also rotation, but not in the shape of a funnel. It reminds me of a spring. That is, it is like a straight line, but at the same time it rotates. Inside this spring are like two small spirals, only they resemble springs. They rotate.

Dmitry: Look, if we take an elastic band, stretch it and release it, it will intertwine.

Irina: Well, yes - these are quanta of the electric field. They are found both in substances and in space.

Dmitry: Can this be called vortex ropes, for example?

Irina: A tourniquet is something like a cord, as far as I understand?

Dmitry: Yes, a vortex cord. That is, we have a long vortex, it intertwines and forms this structure.

Irina: Yes, the term, of course, can be different. I will now immediately explain: they do not have an understanding of “plus” and “minus”. They interpret atoms there a little differently.

Dmitry: In principle, in ether dynamics and in the science that we do, there are also “plus” and “minus” - this is a convention.

16:03 Contactor Atsyukovsky Vladimir Akimovich.

Dmitry: By the way, I would like to ask a question: etherodynamics began with Atsyukovsky. Maria told me that Atsyukovsky still had some connection with you. And he also had something to do with contacts. This is true?

Irina: Zhukovsky, which one? Writer? A lot of them.

Dmitry: His last name is Atsyukovsky.

Irina: Who?

Dmitry: Atsyukovsky Vladimir Akimovich.

Irina: And I understood who she was talking about. Yes, Maria asked me about him. I think she showed the photo to Raom Tiyan. And he said that it was the contactee with Burkhad. I

just don’t remember now. It has long been. If this is who I'm thinking about now.

Dmitry: I see. Okay, we're done with electromagnetism. Then our next question is about the gravitational field.

16:53 Gravitational field.

Dmitry: How does the gravitational field work?

Irina: The gravitational field, unlike the electric and magnetic ones, can be both static and dynamic. It can be polymorphic. That is, it changes its shape depending on the object in which it is located.

What is the gravitational field characterized by? It can suddenly and quite quickly change its speed and direction of movement of influences with its force. That is, gravitons, while they are in matter, have a somewhat static position. They revolve around each other there. But as soon as they leave the substance, they begin to gain a very high speed, which can be 60 times higher than the speed of light.

Dmitry: Within the framework of the etherodynamic concept, there is a calculation that the speed of gravity (established processes for planets with such gravity) is about 15 orders of magnitude higher than the speed of light.

Irina: Depends on the atomic mass of the element. You see that all elements have different masses. Usually you call it “molar”. First of all, this is the number of gravitons, and the amount of other energies depends on them.

Dmitry: I roughly understand what you are talking about. Fine.

18:42 Quantum effects: entanglement, teleportation. Quantum computers.

Dmitry: Next we have a question about quantum mechanics: do quantum effects exist in your science? That is, “quantum effects” are usually in the terminology of earthly science. For example, is there quantum teleportation, quantum entanglement, quantum computers?

Irina: For us, a quantum is a portion of energy. A portion of energy cannot teleport anywhere, if by “teleportation” we mean disappearing and appearing in another place. Quanta themselves cannot do this. This can be done by substances under the influence of a gravitational field. That is, what happens in gravitational engines, for example. But this is not the same as teleportation - we call it “instantaneous movement”.

Dmitry: I understand. That is, the energy itself, the quantum itself, cannot move instantly. I

mean instantly, using quantum effects. That is, this is done by other methods and methods?

Irina: Yes. The quantum itself cannot precisely disappear and appear, if this is understood by “teleportation”. Just like any atom. Because it is a material particle. Not a particle, but material energy. Now I will automatically call it “particles”, since after all, we are so used to it. “Quantum entanglement” is your term for the uncertainty of the state of quanta. But this is all due to the lack of some finer measuring scales.

Dmitry: I am more than satisfied with this answer. Thank you.

Irina: Yes, and quantum computers. But I think this is such a more advanced version of your ordinary computers, based on two positions: 0 and 1. The fact is that we do not have such positions at all.

Our computers are based on 64 positions and various combinations between them. Optionally, 64 can be in one program. But there may be, for example, 31 positions included. There could be 15, etc. But they are intertwined with others, and various software products of our computers are encoded. And these 64 codes are based on the wave measured in various substances and their combinations.

Dmitry: Okay, I understand.

21:35 The mechanism of polarization of dielectrics.

Dmitry: What is the mechanism of polarization of dielectric atoms? That is, a dielectric, if an electric field is applied to it, becomes polarized and itself becomes the source of this electric field. What is the mechanism for converting the polarization of a dielectric?

Irina: We need to at least explain it for our viewers. A dielectric is a substance that does not conduct current, as far as I understand.

Dmitry: Yes, exactly. Or very weakly conductive.

Irina: That is, instead of conducting current, he himself becomes its source.

Dmitry: It turns out that it becomes a source of an electric field. That is, it polarizes and begins to interact with other charged bodies, the same as it.

Irina: But then it disappears?

Dmitry: Yes, it is gradually dissolving. But dielectrics can persist for some time.

Irina: Yes, I understand what you are talking about. The fact is that different substances have different internal (molecular) structures of the substance that make up the object. There are substances of the so-called “linear cubic structure”. The internal atomic structure is cubic and linear. And when the electric field begins to arrive there, it is retained, as it were, inside this object due to the fact that it is held in such a way as you call “microgravity”.

That is, it is like microgravity is maintained with the help of its field - a cubic structure. Then electricity accumulates inside the cube, and it does not go further due to the fact that it is restrained by the own electric fields of these atoms. That is, it depends on the cubic structure. It just doesn't let through. It is designed in such a way that it stands in the path of the current, like a wall. But if you give it this charge, which will exceed its ability to hold it in itself, then it will be emitted into the environment until everything comes out.

Dmitry: Got it, okay. It's approximately clear how you formulated it. That is, we have a field, just these vortex ropes that we discussed in one of the previous questions, they are built into the structure and hold the atoms in a certain configuration.

Irina: For a material to be a good conductor, it is necessary that its atoms line up in a structure, like arrows or spears. In your opinion, it will be “arrow-shaped”.

Dmitry: I roughly understood, okay. In modern etherdynamics we have approximately a similar idea.

Irina: And when the atoms line up and an electric current arrives, then depending on whether it is constant, alternating, pulsed or something else, it begins to flow through this material at different speeds. Naturally, it can also be absorbed by the atoms of the material. But this already depends on the temperature and many parameters.

Dmitry: Got it.

25:22 Magnetization process.

Dmitry: Then the question is about magnetization. If we pass current through a conductor, a magnetic field appears around this conductor. If there are pieces of iron or something else in a ferromagnet nearby, then they are also magnetized. What is the process of magnetization, magnetization of a substance?

Irina: I’ll explain now. Electricity and magnetism are first level energies in atoms. Therefore, one can influence the other. There are 5 types of them. First level atoms are light, heat, radio waves, electricity and magnetism. And if a magnetic field enters any material that has, as I already said, a arrow-shaped or mixed structure (there are different ones), then a magnetic field, one might say, also emerges from its atoms and begins to influence those around it. But it comes out there temporarily.

Dmitry: Yes, answering the last question, you largely answered this one. It's clear. Then we have the eighth question.

Irina: In short, it depends on the structure of the substance.

Dmitry: Well, and from the configuration of atoms in relation to each other.

Irina: Yes.

26:52 The nature of electric current.

Dmitry: How does electric current work? That is, we have a wire and current flows through it. What is the process? What's going on in this wire?

Irina: An electric field is a flow of electric field energy that is created either in this wire itself, or it is directed somewhere outside. What is it made of? The fact is that the atoms of this conductor (this material) also have electric quanta, they are located in the atoms. But when various energies influence it, they come out from there, we say the word, “come out.” Or in another way - this is the more common term “knocked out”.

Not all chemical elements of atoms can easily knock out this electrical (magnetic) energy. They relate differently to energetic influences on themselves. That is why in some conductors the current flows faster, in others - slower, in others it begins to get stuck, in others, on the contrary, it even seems to intensify. And all this depends on the type of element and its allotropy, that is, on the structures of this object. After all, an object of different shapes can be made from one material. And they will conduct current differently.

Dmitry: Okay, I understand.

28:41 Pushing out the magnetic field. Superconductivity.

Dmitry: There is such a thing as superconductivity. This is when, in one sense, resistance disappears, but in another sense, magnetization remains even after the current is removed from some substance. What happens in a substance when the state of superconductivity occurs?

Irina: The fact is that I already told you about heat - this is also one of the types of energy of the first level in the atom. If the atoms in this material, and usually this is also with a pointed structure, that is, it also happens with a ring-shaped structure, with a cubic structure, with mixed structures, etc., lose heat, then they become able to displace magnetic energy from themselves. Because it starts to come out following the heat. That is, she goes out with him.

Dmitry: This is now about pushing out the magnetic field. Got it, okay.

Irina: Yes. And then, when exposed to electricity, the atoms of this substance (there is such a function of a substance to regain lost heat) begin to push this electric field through themselves even faster. That is, they become, as you say, superconducting. This is all to use this rapid movement of the electric field to make the atoms vibrate faster and raise the temperature. We must remember that all nature strives to come into balance. That is, that's how it's designed.

Dmitry: I roughly understood.

Irina: That is, when the current runs faster through this conductor, it reaches certain distances faster. This happens because the atoms have become so compressed from the cold that they already seem to allow this to happen in order to vibrate faster themselves. That is, they no longer have the ability to absorb this electricity.

Dmitry: Okay, we're done with electricity.

31:34 Chemical reaction. Combustion process.

Dmitry: There are chemical reactions - this is when some atoms or molecules combine with other molecules. What is the process of chemical reactions using the example of the formation of some complex molecule, a complex substance from simple substances?

Irina: A chemical reaction is an exchange of energy between atoms that are at the first energy level. But this exchange affects the third level of energy, which is, as you say, in the nucleus of the atom. And due to this micrograviton (atomic nucleus), they begin to influence the outer layer of the atom. I think you call it an "electronic cloud." Due to this, different atoms are attracted or separated. That is, a chemical reaction occurs when some atoms are connected by certain bonds that depend on microgravity. But microgravity affects the first level.

Electricity, magnetism, heat, light, etc. - there are reactions that involve the release, absorption of heat, etc. That is, gravitons, microgravity, forms of gravitons influence their atom and begin to interact with each other, losing or gaining some portions of energy. And due to this, they stick with each other or are separated. This can be illustrated using the example of a chemical reaction. For example, you can see when something is on fire - it changes quickly. Combustion is a process of combining some substance with oxygen, releasing some energies of heat, light, etc.

The fact is that combustion can begin not only in the presence of oxygen of this substance, but when you increase the temperature. But then the combustion continues without an influx of temperature, that is, on the contrary, it releases it. Why does this happen (according to our theory)? The oxygen atom is characterized by the fact that it combines very easily with other atoms. Moreover, it connects with other atoms in such a way that it snatches them from connections with something else. If there is some complex structure, then there will be oxygen. And this complex structure begins to collapse, combining with oxygen and forming various oxides. But for this to start, the object must first be heated to a certain temperature. That is, to

give heat energy to the atoms of this combustible substance in the presence of oxygen.

In fact, you give energy to the oxygen atoms too. Because he is nearby when you bring this warmth. And the energy of heat, these quanta of heat, knock out some of the quanta of electricity from the atoms of this combustible substance and allow oxygen to join them. And then this reaction begins, the third level of these atoms also begins to operate there - microgravity. And from there the quanta of light and heat themselves begin to emerge. And you see fire and light.

Dmitry: Okay.

36:09 Education and science on planet Burkhad.

Dmitry: Since we have detailed questions here, I will slightly change the order of the questions. And now I'll ask, first of all, about the organization of education on the planet Burkhad. How is your education organized? How is work organized with the education of people, with science?

Irina: With education or science? Because education teaches.

Dmitry: Let's talk about science, first of all.

Irina: Let me tell you right away that we give our students in schools the most, one might say, superficial knowledge about the history of our science by trying to give them knowledge about advanced technologies and theories of our science.

Unlike your schoolchildren, as far as I studied this, they are children, and not those in institutes. They prepare children to study the latest achievements. And they go through the history of science in some abbreviated form. We have a specific subject - "history of science". There, for example, it tells how certain discoveries of the laws of nature were made. For example, we have science - "the interaction of material elements." In your opinion, it's like physics and chemistry at the same time. But there we do not study the world through formulas. We have all the formulas already included in our automatic systems. We study the laws of interactions - how energy flows from the Spiritual world into the subtle worlds. And how it forms four ethereal forces, which you call "elemental forces" or "forces of the four elements." It is from the relationship of these elements that your material atoms consist. You see that, despite the diversity of elements, the structural parts of these elements are the same.

Dmitry: I roughly understood. That is, first of all, you teach children what is needed to understand the world, and not how it happened.

Irina: "History of Science" is such a subject. And separately we have science itself, which talks about the scientific achievements of the last, maybe a year or two. Moreover, our training is already adapted to ensure that those who complete their studies at school can go to study, in your opinion, at a higher educational institution.

Moreover, we take tests at the middle school level, that is, what specialization the child will have in the future. It depends on both his desire and his task - we determine this. And then he goes to study in the middle and senior, as you say, “cycles.” He goes to study precisely according to the facilitated, that is, preparatory programs of the higher institution where he will later study.

Dmitry: It’s approximately clear.

Irina: And our scientists are united in associations. That is, an association of workers studying biology, for example, of the planet Burhad. Or associations studying space civilizations, for example, you, yours or other civilizations. For example, I am a member of three associations (organizations) at the same time - this is the “interaction of material elements”, in your opinion, this is more like physics. Then we have the association “study of space civilizations.” And just recently (for the last 3 years) I have been a member of the association - “transferring the knowledge of the Interstellar Union to young civilizations that are not included in the Interstellar Union.”

That is, we have a special scientific department (association), which includes humanoids who have completed a special course on contacts with young races. There they work with us, tell us how to go to the Astral, how to transmit images to a contactee, etc. We also have associations of scientists, consisting of scientists from different planets, including associations of scientists, which include scientists from planets that are not included in the Interstellar Union.

That is, these are non-political organizations that study certain things. We have associations, for example, “robotics”. They study robots. There are associations “study of plasmoid worlds”, where contacts with plasmoids are studied. There are associations, for example, the study of geology.

Dmitry: I see, that is, you simply divide all science into areas. And you deal with it somehow separately.

Irina: This is such a union of scientists. And everyone who joined this association receives a certain salary from the government of the Interstellar Union and has certain responsibilities. But we do not have such strictly defined working hours. Typically a task is defined, some cash advance is given in our currency to complete it, and a deadline is set for completion, such as researching something. Accordingly, after these deadlines, some kind of report is made to those who are on the commission for interaction with science in the Interstellar Union. There are those who solve economic and scientific issues in their interaction.

Dmitry: I see.

42:55 About the transfer of knowledge to earthlings from the Interstellar Union. Dictionary of physics.

Dmitry: Is it possible on Earth to organize institutes that use the knowledge of your scientists, that is, to assign some kind of scientific curator to participate in teaching or scientific activities? I don't necessarily mean a curator directly present on Earth, for example, how you now communicate with our friends.

Irina: I am ready to give Irina, as a contactee, at least a dictionary of the physics of the Interstellar Union. That is, just take your term and explain what it means for us. Do you think such a dictionary is needed?

Dmitry: That is, what we are doing now.

Irina: Yes, but I suggested putting it in some written form. In fact, I wrote an article about what an "atom" is, etc. Have you read it?

Dmitry: I haven't seen this article.

Irina: But it was published on VKontakte for some time, it exists. There it was explained from their position what "substance" is, as they understand it. What is "matter"? What is "Spirit"? What is "ether"? Yes, you told me - "atom". Then separately - "proton", "neutron" and "electron".

Dmitry: I didn't see it. We'll have to take a look.

Irina: But if you want, I'll send it to you via Skype.

Dmitry: Yes, let's do it. Fine.

44:23 How does the hydrogen atom work? What are material energies made of? Proton, neutron, electron and their constituent elements.

Dmitry: Then this is a very specific question: if we are talking about the structure of matter, how is the hydrogen atom, the simplest substance, structured?

Irina: Like the hydrogen atom, like the atom of any element, the structure is the same. The only difference is the amount of certain energies.

Dmitry: We believe that a hydrogen atom is one proton. How does this one proton work?

Irina: Yes, I remember. Okay, I'll send him the article later. Proton is the name in your earthly physics for some structural element of the atomic nucleus. I'll explain right away. The fact is that they do not have a planetary model of the atom.

Dmitry: But in ether dynamics there is also no planetary model of the atom. Therefore, let them try to explain it as they think, as it is.

Irina: Yes. That is, proton is the name of energies, the second and third level of material energies of the atom. Let me now remind you that the atom consists of three energy levels. You divide the second and third levels into protons and neutrons. You observe them somewhat separately, but there is an explanation for this too. The proton and neutron are the building blocks that in your science describe the second and third energy levels in an atom.

What do these very material energies consist of? We don't divide them into certain quanta or certain structures – ours is different. All elements consist of elemental energies, ether, ethereal forces. We call them "elemental energies". Because these atoms are manufactured, as if collected from etheric energies, by creatures that you call "plasmoids". That is, intelligent beings who also incarnate precisely for this purpose - to collect and maintain some atomic structures from etheric forces.

How do they collect them? We have 4 elements that can be translated into earthly language - water, fire, air, earth. Why can they be translated this way? Because those Spirits who incarnate in these elements are responsible for these elements, for example, on Earth, Burkhad and in general on all planets. They are called "Elemental Spirits". And it is they who are engaged in directing these ethereal forces of their element to create a proton, electron, neutron. Naturally, you will now ask: what is the difference between a proton and an electron? And especially from a neutron? For you it is different through "plus" and "minus", but for us it is different. A proton contains 60% of the energy of water and 40% of the energy of the earth element. These are not substances like water, earth (as you see), these are verses (ethereal forces).

Dmitry: We will probably need to have a separate conversation on the topic of how these elements work. That is, we will not be able to figure it out in detail now.

Irina: This is how your electron is composed, unlike a proton. You may ask: how is it different then? That is, we also asked this question when we were studying. Everyone found out for a reason. We asked plasmoids how they create these elements? The electron does not consist of water and earth in these ratios. A consists of 60% energy of the element of fire and 40% of the energy of the element of air, which supports it there. And precisely because fire and water are opposite elements. You call this "plus" and "minus". That is, they are opposite in quality.

Dmitry: Air and earth are also opposites?

Irina: Yes, they are also opposite. But they do not play such a role there as those who have 60%. Everything is written in the article. Irina will send it to you now. I gave it to her. She wrote down the correlations of the elements.

Dmitry: Okay, then I'd better read this in the article.

Irina: Yes. Then what is a neutron? It does not have such properties; it is impossible to distinguish “plus” or “minus” in it. That is, it can be assigned here and there. And maybe on its own. The whole point is that we have studied what you call a “neutron”. This is a certain state of elemental energies in the nucleus of an atom, which consists of 25% of each element.

Dmitry: I roughly understood how this can be interpreted. Fine.

50:33 Electrodynamics. About the use of direct current.

Dmitry: Or maybe our friends have questions regarding this kind of scientific community on Earth?

Irina: I studied your science of electrodynamics a little. And I looked at the formulas. That is, I have the opportunity to contact a contactee who could tell me all this in our terminology. I noticed that most of your appliances run not just on electricity, but on what is called “alternating current”. The fact is that in our science it was not widespread in this form. We had electrical appliances, but they mostly emitted direct current. And for us this is very strange, this alternating current, these impulses, especially more than 35–40 times per second, which they release with the same force. But it only seems that with the same strength. The power there is always different.

But the fact is that the devices themselves, inside which these alternating currents flow, also consist of certain materials. And if it is not direct current, but alternating current, then it is tolerated much worse by these materials. That is, in your opinion, it begins to deteriorate and fail. Even a copper wire carrying a certain amount of direct current can eventually break in one place.

Dmitry: It can burn out.

Irina: Yes. And even if it is not interrupted, then over time its ability to conduct this current so quickly decreases.

Dmitry: Perhaps. So, what is the question then?

Irina: The question is, why don’t you use direct current? It will be more reliable and easier to carry with your devices.

Dmitry: Because of losses, first of all. Because when we use DC wires, heat is generated and transmission losses occur. That is, we generate electricity, and it simply goes into heat, into the atmosphere. To avoid these losses, alternating current is used. With the help of certain insulations and other things, it is possible to greatly minimize losses.

Irina: Interesting, then how do you produce electric current? Since alternating current, due to

its impulse, heats the surrounding air, in my opinion, even more strongly.

Dmitry: This is where the insulation method is used, because the electric field can be shielded. In general, there are tricky moments precisely because transient processes occur. It just heats up less. And, first of all, less energy is spent on heating. And, in fact, this is what insulation is mainly used for.

Plus AC is easier to modify. That is, we can drive alternating current into the transformer. And this will allow us to convert any voltage into another voltage, or current into another current. And with direct current you will have to put forward complex structures. At least our technical means make it possible to operate with alternating current more conveniently and faster than with direct current.

Irina: We always extract energy. For the last 5 million years, we have been extracting energy depending on what kind of energy is needed and in what quantity. But we collect the energy that remains superfluous and transform it into another.

Dmitry: I roughly understood. Are you running out of time now or what?

Irina: You can still talk about something with him.

Dmitry: Okay.

55:00 About the free energy of vacuum.

Dmitry: Now you are saying that you are taking away energy. Once in your materials you talked about the collection of free energy in vacuums. How can it be taken away in vacuums? What is the principle? That is, not the device that reproduces this, but how the energy is pumped out of it?

Irina: It is necessary to create a vacuum close to absolute, so that there are no fields or any substances there. This is achieved by certain shielding of the so-called “ring fields”. That is, not only substance. It is possible to create a ring of absolute vacuum. This is usually done somewhere in space where there is little interstellar gas, usually in intergalactic space most often for intergalactic ships. Then a ring of absolute vacuum is created. But it has an outer ring, and inside this vacuum has the shape of a ball, that is, it is, as it were, shielded from space.

Dmitry: I see. There is some area where there is neither matter nor fields. And everything is more or less calm there.

Irina: But again, this is happening in a place where there are no important plasmoid structures, etc. That is, at a different level of density in that place in space, so as not to destroy

their world. Usually they already give certain places.

Dmitry: Okay, then how are energies obtained from such a structure?

Irina: The free energy of the vacuum is the energy that passes between subtle worlds. She shields them from each other. To get it from there, you need to send a beam of energy into this absolute vacuum. What do you call it? Low temperature laser? No. He is now showing me a beam of energy. I'd better tell you what it consists of. It consists of a beam of photons, radio waves in the UHF range. And it will be directed with force towards one point.

How to measure it? In Joules? You need to look at the manual. In principle, I do not specialize in the free energy of vacuum. I studied it. Simply direct the energy of light and the energy of radio waves in a certain range to this point. There the intensity is 2-3 seconds. And a point breaks through in space, where this absolute vacuum is, from where energy begins to pulse, it's like an explosion.

But this explosion is in the invisible range. It first starts with the radiation range. And there it is caught by special radiation absorbers. And then the free vacuum energy itself begins to come out, which enters the engines into a special vacuum free energy trap. Now they show, like an antenna, some kind of pot. What kind of pot is this? It's a long thing, and for some reason it looks like glass. There is some kind of reflector inside, like a mirror.

Dmitry: Apparently, some kind of focusing is going on to bring it all together.

Irina: Yes. And then it goes into the engine. And this free energy of the vacuum can already be converted into any type of energy for movement.

Dmitry: Of course, almost nothing is clear to me, but in general terms it is clear.

59:44 What is harder than diamond and fullerite? Cooperation of the Interstellar Union with terrestrial scientists.

Dmitry: There are some of the hardest substances, at least those that have been established on Earth - this is diamond. And not so long ago, fullerite was found - these are also structures made of carbon, which simply compress strongly, and they turn out to be almost twice as hard as even diamond. Question: are there any more solid substances or materials?

Irina: Usually these are some modifications of not only pure carbon, but its compounds, nano. He is now showing me, at the atomic level - its compounds with silicon, boron, molybdenum. These are very solid substances.

Dmitry: Thank you!

Irina: (Mead speaking). Thank you for the interesting questions. About how our scientific world works - through interaction with your world. We have contactees among your scientists who receive information. But for various reasons they don't want to advertise it.

Dmitry: That's reasonable. This could end badly for us.

Irina: Sometimes they don't even want to advertise it to their family, let alone work. There are such contactors. I know people like that. And it is unethical to talk about contact with others without their permission.

As for open interaction at the level both with Irina and with you, here we need the desire of a certain part of scientists to make such contact, for our part we are ready. Of course, it is prohibited to transfer technologies, because you must raise your consciousness until they themselves come to you from the noosphere, for example, etc. Then it will be harmonious.

And it's not always harmonious if we remember different weapons. But in any case, it is more harmonious than if civilization is not ready. But we can explain various processes and talk about various properties of materials - this is not prohibited.

Dmitry: I see. Is it possible to build such an interaction? It's just that, for example, Irina is probably less technically savvy than the average scientist. Surely there are some scientists who are also ready to tell it to a fairly wide audience. And they could act as such a transmission link for enlightenment.

Irina: If he is technically prepared and at the same time ready to talk about his contacts, there is still a condition to be met. Even if you don't take into account physical contact. If the contact is not physical, then permission from the Interstellar Union is not required. This decision about contact is made personally by the scientist. But in order to make non-physical contact, for this he must be attuned to our vibration, feel and transmit our thoughts and mental images. And, accordingly, to do this, at least, without major distortions.

Dmitry: Yes, of course.

Irina: There must be a certain training in communicating with his Spirit, etc. And what is even more important, its task of implementation should include not just science, but contact, contact-making. If this is not part of his life task, then the Higher Self (his disembodied part) will simply block everything for him. He just won't hear anything. That is, in any case, you first need to come to an agreement with your Higher Self.

Dmitry: I see, that is, all this is possible. And to some extent this is already happening. It's just that we mostly don't see it directly.

Irina: If there are scientists who can make open contact (not physical) and announce this in the scientific community, then we are ready to go to a meeting with their consent (their Higher Selves). Of course, we are ready to set up this contact at this level.

Dmitry: I understand.

Irina: This is not prohibited by the rules.

Dmitry: But the process itself needs to be built. That is, it will not be born on its own.

Irina: Yes. I also studied before I was admitted to you earthlings. I also went through certain practices - astral travel, mental communication, that is, the transfer of mental images, studied your science, technology, ideas about the world, philosophy, religion, scientific ethics, etc. That is, before I passed on something of my own, I had to study yours.

Because if I came here, I wouldn't even know what an "electron" is. We don't imagine it rotating around the core. And so I studied and understand that some energies, which we call different "quanta", are called "electron" by you. This is all I studied. I took a special qualifying exam in earth science. I also took a safety exam with contactees - how to make contact correctly, how not to cause harm, how to interact with a contactee so that he avoids the attention of the special services.

Thanks for the conference!

Dmitry: Thank you too!

Irina: Thank you, dear listeners! I hope you found it interesting. See you again, friends!

July 14, 2021

Conference participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

MidgasKaus - representative of the planet Esler, biologist, psychologist and specialist in alien civilizations;

Raom Tiyan – representative of the planet Burhad, specialist in energy interactions in the environment;

Dmitry - conference guest, interviewer.

#308 What does the future hold for us? Quantum predetermination. Opinion of aliens and the Spiritual world. Channeling.

https://blog.cassiopeia.center/chto-nas-zhdet-v-budushchem-kvantovaya-predopredel
https://www.youtube.com/watch?v=OJHFyXrbGtQ

00:21 Multivariate future. Time Tape.

Interviewer : Quantum purpose of actions or quantum predetermination, or in another way you can (say) quantum purpose of actions, right?

Irina: In the Spiritual world, which is the first principle, the fundamental basis for all types of quanta, all the events that will happen in the material world are already known. But they are known in many variants, we call this the multivariate future. In the astral world, on the border with the world of disembodied Spirits, there is the so-called Time Ribbon or River of Time.

It contains, in an unmanifested energetic form, all the events of the material world, all information, to be more precise, about events in the material world that will happen or can happen depending on the probability in this world. Moreover, when you are in this Time Tape, the event that is only probable and the event that will actually happen are equally probable for the Spirit who is in the Time Tape. There's no difference. Everything is a single field of consciousness, a single field of consciousness of the Creator.

02:02 Quantum predetermination. Working with the Time Tape. Matrix of the Spirit. Gene keys.

Irina: It is from there that those quanta come that make up the atoms of the already real or, as you call it, the material real world. And the reality of the world is determined precisely by these information waves - this is what we call quantum predetermination. You call it quantum predetermination, we call it working with the Time Tape. A very broad topic.

Working with the Time Tape must, firstly, be done very carefully. This is a double-edged sword. These are certain practices that can increase the likelihood of a particular event

compared to others, or reduce the likelihood that events are undesirable for the Spirit compared to others. I want to emphasize not to completely level or completely implement, but to reduce or increase. Such practices really exist, they are known on my planet, and I personally know them too.

How do they work? When a person is in a state of astral or mental travel, that is, connecting with this Time Ribbon, and looks through his events, first past events that were determined by him even before incarnation, what you called the gene key, but it is not in the gene key itself , but in that matrix, as you would call it, that essence or matrix of the Spirit that came from the Spiritual world. The genes were formed in a specific, individual pattern only for him later. In the beginning there was a spiritual essence. It was the spiritual essence that formed the body with a certain set of gene keys, gene memory and information and energy formations in every cell of its body. You remember that even children born from the same parents, with the same set of genes, still have a unique gene key. Even a brother and sister from the same mother and father are still unique genetically. Because not only physical genetics determines gene keys, informational gene keys, but also the energy of an embodied spiritual being.

13:30 Implementation tasks. Freedom of choice. Fate. Spiritual analysis. Futurology.

Accordingly, what you called predestination, we call the tasks of the Spirit. Since the Spirit has freedom of choice, it can either fulfill its tasks or not. That is why he can either develop in the material world, increase his Spiritual level, or degrade. He's free.

What is freedom? This is an opportunity to follow either the path of development or the path of degradation. Both, although God is love, as you know, the right to both - development and degradation - is given to us by God. We usually call this freedom. We are free to choose any desire, any thought, or not to choose, and follow it. So, a person’s fate is the totality of his choices in certain situations.

And what is influence, as you said, quantum predetermination or the Time Tape? This is a view from the present moment, the point in space and time where a person is located. Viewing either all probable events in a specific key of interest to him, that is, a specific event, or the most probable. And also, with the help of Spiritual analysis, determining those of one’s actions, thoughts and desires, the chain of one’s choices that will lead to the result desired for oneself, that is, either to some event or to its absence. It is quite possible.

I myself am engaged in what you call futurology on Earth, that is, a certain prediction of future events in all its diversity. The more distant the future, the more general words it is described for the point.

This can be used for health when you imagine yourself in the future: how you will look, what you will have, what spiritual, material, social and physical qualities you will achieve. And then merge with this image, that is, enter into it, connect as if with your future physical body, enter into it as into a present physical one. In this case, when you combine the energy of this represented image in the Time Tape, i.e. if it is combined with the image in the Time Line, and then, when on the material level you go through this and approach this time, this age, you will be given tips on how to make it come true. This is very simplistic.

08:50 Protection from wave, energy and physical aggression.

Interviewer : Is there any protection for scientists who work on wave topics in genes or practitioners? And is there any, say, quantum infrastructure to support them?

Irina: You need to understand protection from what? To understand what level of threats to protect them from.

Interviewer : At all levels, from aggression at the wave level to aggression at the organic level.

Irina: I see. Protection from aggression for any person, no matter what sciences he is engaged in, firstly, depends on the degree of this protection, on the degree of his trust in the Divine world in general and the feeling that you are already protected at all levels. This is about energetic influences. As for physical influences. I will tell you what protection from physical influences is.

Interviewer : This is practically a consequence of the wave influence?

Irina: As for the physical, as I understand it, you are talking about physical elimination?

Interviewer : Yes.

Irina: The fact is that something like this, such as physical elimination and protection from it, can also only be from an Almighty being, from God, that is. And here is the question of the value to the world of the information it carries. But you need to understand that if his body is physically removed, it means that his Spirit will leave the incarnation. And, if he does not fulfill his task of transferring this knowledge, he has the right to incarnate himself in this world again, or to become the curator of someone who perceives him, for example, scientists on this topic working with this topic.

Indeed, in your world there are destructive entities, destructive forces that can remove high-vibration light entities from embodiment. Here it is important for every person who deals with this topic to be fully aware of the importance of what he is conveying, and to be fully aware that, firstly, he can at any moment appear before his Heavenly Father, be taken out of incarnation and, accordingly, , be prepared for this, like any person. There is no need to be afraid of this, you just need to do your job, and then how long, what life span is determined in the Spiritual world.

July 15, 2021

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Zaliatar is a representative of the planet Raom-Li (Pleiades), a futurologist, a specialist in healing practices, the study of the Spiritual world and the study of time lines, Vanga's curator;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

The interviewer.

#311 CASSIOPEIA takes off her PINK GLASSES: SHOCKING INFORMATION about some grays and reptilians of the "ORDER OF SIX".

---

https://blog.cassiopeia.center/kassiopeya-snimaet-rozovye-ochki-shokiruyushchaya
https://www.youtube.com/watch?v=9kPsfx-Tm1s

00:18 Start of the conference.

Maxim: Dear friends, we continue our series of videos with contactee Vasily, a contactee with the reptilian civilization. The last time, in the first part, we talked with Khor Shu Mag. I forgot what planet he's from.

Vasily: Horik.

Maxim: From the planet Horika.

Vasily: Horik. Because once again he said "Khorik". And they spelled his name wrong, probably my fault. His name in three syllables is Khor Shu Mag. Full name.

Maxim: Great. We asked him questions. To many questions, he said that he did not have clearance to answer these questions. Therefore, today from the planet Khorik, through contactor Vasily, we will communicate with a reptilian who has higher clearances in order to answer our questions.

Irina: Yesterday I was already offered to fly to Khorik, remember, right?

Maxim: Yes.

Vasily: If you listened carefully, I said that they are not waiting for anyone, a closed society. They don't let anyone in there.

Irina: We assumed so. It’s just that our subscribers suggest sending me there.

Vasily: And again, permission from the Interstellar Union (IC) to fly there.

Maxim: Vasily, please tell me, who will be with us today and broadcast information through you?

Vasily: Let's ask.

Irina: Let's go.

Vasily: There will be no Khor Shu Mage. He did his job, expressed disagreement with the information (meaning that they give you). And I received consent to communicate from Irina. Is it valid?

Irina: Okay. In force.

Vasily: Do you need permission?

Irina: From whom?

Vasily: Two questions in one. From MS or is it your will?

Irina: I decide myself with whom I contact.

Maxim: We do not need to ask permission from the MS here in order to contact civilizations

that are not part of the MS.

Vasily: Then another question. Can I ask you a question?

Irina: Now. Our representatives are simply present here.

02:34 Introduction of participants.

Maxim: Who is present?

Irina: LiShioni and MidgasCaus are present here now. Together. They say no such permission is required. Astral contact does not require MC permission at all. Physical contact is required.

Vasily: Then another question.

Irina: Yes.

Vasily: He wrote that there are questions for them too. And one more question for Irina.

Irina: Okay.

Vasily: Will the conversation be without the contactee and curators, or with curators? Future conversation, future communication? I said that if I give you the channel, you will communicate. Will curators be present? Influence somehow? They said that they needed rules of the game. There are some rules that they will follow.

Irina: (MidgasKaus speaking). We will simply observe the communication. No one will interfere in the conversation. We have nothing to hide. If you have nothing to hide from the MC, then you should be open. Naturally, we will report the results of this conversation to the Contacts Committee. This is our responsibility.

Vasily: The information will be dosed. Now I will add further.

Irina: From whom? From them? From curators?

Vasily: Two questions in one, wait, I'll be right there. Your project is informational and educational. There will be no politics. This is both a

question and an answer.

Irina: Yes, our project is informational and educational and increases the vibrations and awareness of earthlings in the political situation in which they find themselves. Without attempts to change the political system or any influence on the structures of political or religious egregors without changing oneself.

04:59 Community "Nebo". Union of Six.

Vasily: Question for the curators. Are you familiar with the Nebo society? Are they familiar with the Nebo society? Or the Nebo community? Because he will tell us about them too.

Irina: It's better to translate the name of this community into Pikran language. At least in Pikran or one of the generally accepted galactic languages of the MS. Because this word can refer to any society, but by name (LiScioni says) it is something like a military-political order of reptilians.

Vasily: Yes. Orion constellation. Both reptilians and grays.

Maxim: Is this a military-political order of reptilians and grays? Is this some kind of coalition?

Vasily: Yes, the Union of Six.

Irina: These are not gray in our understanding, but something like hybrids. Hybrids between reptilians and one of the Tashiga colonies. Not by Tashig himself, but by their colonies.

Maxim: What does the Order of Six mean? Does it include six civilizations?

Vasily: Ras.

Maxim: Ras. Are races hybrid or original?

Basil. The first ones.

Maxim: Hybrid.

Vasily: No, the first ones who developed themselves. They are then called hybrids.

Maxim: So they developed themselves?

Basil: Yes.

Maxim: I see. When was this Order of the Six formed?

Vasily: He wants to write that he is from another empire. And he wanted to ask questions specifically about them, because the information is that the Union of Six entered into an agreement with the US Government. That's why he wanted: familiar - unfamiliar. And talk about it. Because he himself is from another. Let's come to this now. So we'll ask the curators.

Irina: (MidgasKaus speaking). I know, for example, the Order of 16 civilizations. There is also a capital in Orion, but this is apparently not the same, because there are not six. It is in Orion that name the star that is central.

Vasily: He just wrote the word "Grel". It means one of these races.

Maxim: Gray?

Vasily: Grel.

Irina: What is known to you on your planet and on the planets

subordinate to you, this does not mean that it should be known in the same language to the entire Galaxy. So we suggest that you now simply name the star central to this Order.

Maxim: The conversation begins very interestingly.

Vasily: Star Rigel. One of them according to human classification. She is not central.

Irina: What do you mean not central?

Vasily: Orion's Belt.

Irina: Ah, Orion's belt, that's clearer. Rigel is just a little different. There are no humanoid races there.

Vasily: Betelgeuse.

Irina: Even more so. There are no humanoid races there. But at least those that originated from planets. It is around the star that there are, of course, various bases.

Maxim: Wait, Rigel, Betelgeuse, we said, there are subtle destructive civilizations there, a large number are in these races.

Irina : But they say that they are dense.

Maxim: Are we talking about dense material civilizations?

Basil: Yes.

Irina: Orion's belt is there...

Vasily: Reptilians. And gray ones.

Maxim: Very interesting.

Irina: Are you talking about the star Mintaka?

Vasily: And she is also a member of this alliance. I've already written it six times. Grelle is one of them. The one who is writing now is not Grel, they are probably involved somehow.

09:33 Conference participant from the reptilian civilization.

Irina: Okay. Then let's introduce ourselves. What planet are you from? What race do you represent?

Vasily: Tuban.

Irina: Tuban. So you are in the body of a reptilian?

Basil: Yes.

Irina: How should I contact you? What is your name?

Vasily: Constellation Draco.

Irina: What's your name? How should I contact you?

Vasily: I won’t write to the end, mentally. I want to be called Interlocutor, because they have already said that we distort their names (he even emphasizes) that we cannot pronounce them, and they even wrote Khor Shu Maga incorrectly.

Maxim: Will you be greatly offended if we say your name a little incorrectly in our language?

Vasily: Yes, he writes.

Irina: Okay, Interlocutor.

Vasily: Named Tuban. He is a reptilian, constellation Draco.

Irina: Yes, Tuban is like that.

Maxim: Please describe yourself. How do you look like? What is your weight, height, age? And the distinctive features of your body?

Vasily: He writes that he has no tail and membranes on his hands. He is land-based. Of those varieties of reptiles that evolved on land. Height is just over two meters. What else?

Maxim: Have you ever been to Earth?

Vasily: I don’t. And I want to be responsible only for myself. Our representatives are part of the Union of Six. He already wrote that the Union of Six concluded an agreement with the Americans. Still writing. This was not the first agreement with reptilians.

11:34 Agreements between reptilians and people.

Maxim: What was the agreement about?

Vasily: In the 30s with Germany. He will answer the second question so as not to interrupt with questions. The question was asked - wait for the answer. Technologies in exchange for resources. Didn't finish it completely.

Maxim: Imagine, they give information that other contactees give.

Irina: Which one?

Maxim: Treaties with reptilians, with greys, technologies in exchange for resources. Now we hear about it.

Irina: Who provided the technology?

Vasily: People are also a resource.

Maxim: People are also a resource, right?

Irina: Slavery system on Ceres?

Maxim: Now, Irish. We definitely need to understand this situation. A lot of information is exactly what Vasily is talking about now on the Internet from contactees.

Vasily: Please do not interrupt if you want to talk.

Maxim: Okay, we won't interrupt you.

Irina: We just want to ask questions. And what was the subject of the agreement, if you already started talking about it, dear Interlocutor? What was the subject of the agreement with the US government of your civilization specifically?

Vasily: We provide technology, your rulers provide the resources of the Earth and people.

Irina: What other resources, besides people, were included in the subject of this agreement?

Vasily: Quotas for kidnappings.

Irina: What other resources, besides people, were included in the

subject of this agreement?

Vasily: He writes that it is trade. In addition to the quota for abductions - food, minerals, and who needs it - your emotions. Pheromones, if I used the right word. You said that not only plasmoids feed on emotions, but also some of them.

13:45 Human emotions are food for reptilians.

Irina: How did their emotions pass from people to you?

Vasily: Frightened. Mostly.

Irina: How did he pass on to representatives of your race?

Vasily: Technological issues. It takes a long time to give and open a channel. I also have questions.

Irina: He has questions. Okay, you can ask your questions.

Maxim: Wait. You have now given us information that you entered into agreements with the United States, where under these agreements you had the right to kidnap people, take resources and take people's emotions along with pheromones. On what basis do you not answer the question, in what way did you take these emotions?

Irina: Can I be very brief?

Maxim: At least we understand how you took on these emotions. What did you do for this?

Vasily: Hormones.

Maxim: How did you take them?

Vasily: Unnoticed. He apparently doesn't want to answer these questions.

Irina: Okay, he doesn’t want to.

15:08 Reptilian technologies transferred to earthlings.

Irina: Under this agreement, what technologies were you specifically required to transfer to the US Government?

Vasily: Space. Doesn't decrypt anything else. Need to decrypt?

Maxim: Yes.

Irina: At least approximately, so that we understand what specific technologies we are talking about, which they did not have at that time. We find out the year of the contract, it will be clear what they had there.

Vasily: I’ll finish reading. Space engines, structure of aircraft, information about the structure.

Irina: What type of space engines?

Vasily: We call it VAR now.

Maxim: Please explain what VAR is.

Irina: Principle. Principle of movement. The main thing is to describe the principle of movement.

Vasily: Looking. Antigravity. Maybe not an accurate definition.

Irina: Have you fulfilled your part of the contract?

Vasily: He wants to write that the technologies of earthlings are not yet capable, but they have transferred technologies. The United States (I have already talked to them about this topic) has all the information on this, they will gradually declassify it. They have already begun to declassify their contacts with aliens and these technologies that they have.

Irina: Now let's ask a couple more questions.

Vasily: There is a beginning. Trump started this process.

Irina: I see.

Vasily: Deduce all this from secrecy.

17:34 Treaty between reptilians and the United States.

Irina: What year was the contract concluded?

Vasily: 1954 according to the earthly calendar, if we are talking about the "Nebo" treaty. "Nebo" they call a group of 6 races.

Irina: Where does Mintaka enter, as far as I understand?

Vasily: They call it Orion.

Irina: Was there physical contact with representatives of the American government?

Vasily: Yes, MG-12.

Irina: Representatives from your civilization who came into physical

contact took permission on Picran? Generally for contact with earthlings?

Vasily: Open a channel, invite us to talk about this topic. He said that he was only responsible for himself: “I don’t know the subtleties.”

Maxim: Who should be invited?

Vasily: Announce the topic in advance, and they will get in touch. This is politics.

Maxim: I see. Where do you get this information from?

Vasily: Not your topic. You are not discussing politics here.

Maxim: Where do you get this information?

Vasily: This Union, it turns out, is antagonists to the Interstellar Union (IC). They fight with them, as if they are in conflict. Because he doesn’t even call it an empire, but some kind of union of reptilians, grays, and there’s probably someone else there.

Irina: He didn’t ask if they were part of the MS? He asked whether the representatives took permission for physical contact with earthlings? Not to the astral, but to the physical. They should have taken it from Picran. Either for research or for something else.

Vasily: He writes that they are not part of the Union, they do not need permission. I'm a sekari.

Irina: Vasily, the fact is that we have different information.

Maxim: Just a second, wait.

Vasily: I am sekari, I write my self-name. I am a sekari who is part of this Union, what we take is no secret.

Irina: You see, we have information that any physical contacts with earthlings of any Union, even from another Galaxy. Mitya arrived, he still took permission from Pikran. Because it was the Pikrans, and not Tuban, not Mintaka, who created people. Most of their genes are in us. There are 5% of reptilians there. There are now 30% of Pikrants, and 20% of Tumesouts. Therefore, they are considered the creators of our planet, and anyone (maybe not from the MS) must still take permission there for physical contact. Specify the purpose, of course.

20:56 Violations of the rules of the Interstellar Union.

Maxim: Mid, LiSioni, please tell me, can some civilizations not take permission?

Irina: Then they must somehow fly through the gravity beacon. 15 gravity beacons that surround the solar system. If they have gravitational engines, they must exit the jump, and at the border of the solar system they will be stopped by a patrol, which is on Chiron - a satellite of Pluto, on Triton - a satellite of Neptune (there is a Tumesout base there). They will ask where you are going and why? There is an automatic verification system.

Either the contact was not physical, or our respected Interlocutor is not saying something in his relationship with Pikran. Other types of ships, other types of engines, even those that use what you call antimatter, that is, free vacuum energy, they are still calculated by gravitational beacons. Since they calculate any gravitational disturbance at the border of the Solar system.

Vasily: “Physical” and “permission needed” - is this related to the topic of the previous conversation? First conversation?

Irina: Yes.

Vasily: No permissions are needed. They do not enter and do not

recognize this Union, does that mean they are at war with them or what?

Irina: How did they fly to Earth then, if there are gravitational beacons on the outskirts of the Solar system related to the Union?

Maxim: Do you have technologies that can bypass gravity beacons?

Vasily: Of course. That's not what we started talking about again. The topic is the opening of a channel for Irina. She will then ask about everything herself.

Maxim: Will she ask who?

Vasily: With Interlocutors who will come to communicate on topics.

Maxim: Now can we invite an Interlocutor who will answer these questions for us?

Vasily: That’s what I’m getting at. Let's start.

Maxim: Let's start. The topic of the conclusion of the Treaty of the Union of Six.

Vasily: I'll tell you now.

Irina: Does he want me to write?

Vasily: Yes, so that she writes.

Irina: She doesn’t want to write through him, what can I do.

Vasily: I immediately said: they want to talk directly with Irina. The topic of conversation will be about who to invite.

Irina: Last question. Why are you not satisfied with Vasily's transfer?

Vasily: Once again. We wanted without contactors and curators. These are extra gears in the mechanism.

Irina: I don't know what to ask. He simply doesn't answer the question. He is not a cog, but your contactee. Why, dear Interlocutor, are you not satisfied with his transfer?

Vasily: Question. Irina, shall we open a channel? I think I said a lot.

Irina: I don't know how I'll convey it. The civilization is new.

Vasily: I'll ask how.

Irina: So, it's already coming out. Through me.

Maxim: What is this for? Why is it impossible to convey this through Vasily?

Irina: How do I know? He does not answer.

Vasily: He said why he didn't answer. Because there's an extra gear.

Irina: He said it was an extra gear.

Vasily: He said that they want to communicate directly.

Maxim: How can you convey information with such disrespect for the contactee?

Vasily: I think it's closing. I'll pass it on now. If it works, right away. If it doesn't work out, then we'll continue somehow.

Irina: In general, the conversation is about nothing.

Maxim: I just heard some horror stories that I heard from other contactees on the Internet.

Irina: Nothing specific.

Maxim: Nothing specific was said. No question was specifically answered. Again the same information: about the Germans, about 1954.

Vasily: I conveyed it.

Irina: Thank you very much. Ask, you probably ask.

Vasily: The information will be useful. Look, if it happens, write.

Maxim: Well, come on.

Irina: Thank you and I accept.

Maxim: Who will we communicate with now?

Irina: Who will we communicate with now? Calls the name. Write it?

Maxim: Write. You can communicate without sending a letter, directly.

Irina: Yes. He just speaks in his mind, doesn’t write anything.

Vasily: So, mentally.

Maxim: Let's try it mentally then.

Vasily: Then I'll close this one.

Irina: Close it.

Vasily: What will he say?

Irina: Let's make it correct. Now he will tell me the name, and then we will ask through this contactee what he conveyed. So that the audience doesn't say that I get it from someone else.

Maxim: Yes, go ahead.

Irina: He just told me his name. He introduces himself to me as Roy Rich Mar. Is that his name?

Maxim: Is this asking you?

Vasily: I already closed who was talking to me. This turns out to be different, yours.

Irina: Now she answers me with the thought of who wanted to write through me.

Vasily: This is another one, the one with me, he closed it. Now there will be another one.

Maxim: Roy Rich Mar?

Irina: Roy Rich Mar, still growls at the end.

Maxim: I see.

27:06 Presentation by Roy Rich Mara. Purpose of contact with

Irina Podzorova. Disagreements between the Union of Six and the Interstellar Union. Reptilian methods for controlling people.

Maxim: Roy Rich Mar, what planet are you from?

Irina: Shantricussa.

Maxim: Shantricussa?

Irina: Yes.

Maxim: Describe what you look like.

Irina: He shows me like a lizard, only without a tail. She's so skinny. It has bright green scales. And the ridge is here.

Maxim: There is still a comb, right?

Irina: Yes. He stands on thin, long legs. 4 fingers on each hand and toe. His face is elongated, like a lizard. Light yellow eyes, round pupils, they either narrow or expand.

Maxim: I understand. Please tell us about yourself. How tall are you?

Irina: 2 meters 35 cm.

Maxim: What is the purpose of your contact with Irina?

Irina: Pass on information about our movement.

Maxim: What kind of movement do you have?

Irina: Capture the Earth and join its satellites to the Union.

Maxim: Your task is to capture the Earth and join your satellites to the Union?

Irina: Capture is not the correct word. Like protection.

Maxim: Colony?

Irina: Protectorate.

Maxim: Do you know that our protectorate is representatives of the MS?

Irina: We don't agree with them. We do not agree with his protectorate because it does not allow you to develop.

Maxim: What does "does not allow us to develop" mean?

Irina: Doesn't include you in the Foundation for Assistance to Young Civilizations.

Maxim: What is this Fund for Assistance to Young Civilizations that you include?

Irina: This is exactly what Vasily wrote about. This is a transfer of technology, but not only of a cosmic nature, but also of medical, political and control of masses of people with the help of chemicals.

Maxim: So you want to join us and start controlling us using chemicals?

Irina: This is management for the good. Certain substances are simply sprayed that affect people's brains, and they stop committing illegal actions.

30:10 Reptilians about chemtrails on Earth. False spiritual community. God as understood by reptilians.

Maxim: According to your information, do chemtrails exist on Earth?

Irina: What is a chemtrail?

Maxim: This is the spraying of chemical elements into the Earth's ionosphere.

Irina: Of course it exists. You have various instruments flying around.

Maxim: No. Are they specially spraying any substances to control us, or to control nature and the weather?

Irina: Such experiments are possible, but they will be hidden from the public, because it is condemned by your false-spiritual community.

Maxim: What does “false-spiritual community” mean?

Irina: This means that you understand spirituality as free will. But real spirituality is expediency.

Maxim: Do you know about the existence of the Soul, the Spirit?

Irina: I know what you mean by this word, but we understand it differently.

Maxim: Please tell us how you understand the word “Spirit”?

Irina: Part of the energy of the Universe.

Maxim: Do you have this part of the energy of the Universe in you?

Irina: Of course.

Maxim: Where did this part of the energy of the Universe come from?

Irina: She always was.

Maxim: Can we call this God?

Irina: Is God a person?

Maxim: God is Reason.

Irina: You can very remotely call it God, because the energy of the Universe is devoid of control functions. All management is entrusted to its parts, to us. You understand God as a manager. As President, the most important of all rulers, as far as I have studied earthly religions.

Maxim: We understand God as the entire surrounding space. And religions - yes. Many people perceive religion as a manager. True.

Irina: God is a religious word.

Maxim: Yes.

Irina: That's why I took the term from your religions. This is like a mechanism, as I understand God, not like you. You and Irina understand him as Light. And I understand it as a mechanism of the laws of nature.

32:41 Possibility of genetic modification of people by reptilians. Connections between reptilians and leaders of various countries.

Maxim: Please tell us, a large number of contactees on Earth are transmitting information that we are conducting some kind of genetic

experiments, that reptilian genes are being introduced, is this true?

Irina: Our friends from other planets, oppositionists to the MS, in secret contacts provided your intelligence services with the necessary components to create your own devices, which can be called nanochips. But these are not the nanochips themselves, only the components. Because the nanochips themselves, if handed over, will not work under your conditions. They need other electromagnetic networks, waves.

Maxim: Do you know anything about nanochips that they want to implant in people? And about the 5G network that is spreading across the Earth?

Irina: He doesn't know what 5G is. Now I will explain to him. This is a type of telephone communication on high frequency waves. Now LiSioni will tell you what frequencies these are. Just below infrared rays. Yes, ultra high frequencies. Question again then. Does he know about what is being implemented?

Maxim: Are nanochips already being implemented here on Earth, according to your information?

Irina: They are just being created. According to our information, our partners on Earth, who are deeply embedded in your intelligence services, report that work on them is just underway, but many technologies are still missing. We need very highly purified magnesium in combination with sodium hydride.

Maxim: I see. What do you think about vaccinating humanity? Do people need vaccines?

Irina: I am not a biologist, not a doctor. I specialize as an engineer in the development of technology to influence anthropomorphic creatures for the purpose of governing governments. It's like a chemical technologist.

Maxim: I understand correctly. Your community, the Union of Six, has

entered into treaties with the United States, and you have already transferred to them the technologies that are currently in development?

Irina: It was in 1954. Then our representatives, but not from my planet, transferred it to other countries.

Maxim: To the governments of other countries?

Irina: And the special services that were led by governments. But only a few people in the government itself know about this.

36:10 Biorobots on Earth. Free will in the Union of Six. The goals of the Union of Six on Earth. Great white dragons. Planet Orzinak.

Maxim: There is information that you have the ability to change your appearance, that is, acquire a human appearance, is this true?

Irina: These are our biorobots. They can be completely controlled by us, and we can look through their eyes from a distance and move them.

Maxim: Are there a large number of your biorobots on our planet?

Irina: This information is closed to me, it is secret.

Maxim: In any case, there are biorobots without a Soul, do I understand correctly?

Irina: Biorobots cannot have a Soul. These are just mechanical creatures, but more advanced than your phones, for example.

Maxim: What, we can’t distinguish a biorobot from a human by its appearance?

Irina: Not without special devices. An ordinary person cannot. An energetically sensitive person may perceive that he does not have an aura. It can be created artificially, this will be visible. But you still have few such people.

Maxim: Do I understand correctly, you are here without Pikran's permission?

Irina: We are here with Pikran's permission, but under the guise of researchers. Not us specifically, I am not on Earth at all. Our explorers when they arrive. Our closest base to Earth is on one of Neptune's moons. We are exploring the planet Neptune.

Maxim: Do you visit our bases, MS representatives?

Irina: Only when necessary. If necessary. For example, exchange ship components, fuel or something like that.

Maxim: Why are you giving me information that could cause you harm?

Irina: At the request of part of my people, the Union, I am giving you information that through you can be conveyed to earthlings in order to encourage them to join our alliance.

Maxim: Your alliance completely controls those who join it. Don't you have freedom of choice and will there?

Irina: Free will is an illusion. It only leads to destruction.

Maxim: Is free will an illusion that leads to destruction?

Irina: Yes, to wars, to violence, because there are creatures that are only called people, but they are incarnate (in your opinion) demons. And if they are given free will, freedom of choice, they will destroy your society.

Maxim: I see. How do you feel about MS, in general? It turns out you are acting here without his consent?

Irina: MC left everything to chance to see whether you yourself would swim out of this pool in which you found yourself or not. And he is not going to interfere directly. Moreover, if we take power, we will have a clash with them.

Maxim: Do you want to take power?

Irina: Yes. The answer is positive, that is, to annex power. And not only annex, but install your own person or rule yourself.

Maxim: Do you want to rule in your bodies?

Irina: We can do it in our bodies. We can also use a contactee, a biorobot.

Maxim: How interesting everything is. Please tell us who the great white dragons are?

Irina: This is the planet Orzinak. She is not part of the MS. She entered there, but was expelled.

Maxim: Why was she expelled?

Irina: According to the official conclusion of the MS commission, she was expelled for conducting unauthorized experiments with biochemical elements on the surface of Orzinak with the population of her own people. But there was still a violation in contacts with earthlings and other races. This is so according to the official conclusion that was shown to us. For experiments not permitted.

Maxim: You think that there is no need to ask us where we want to go. You think that we just need to start managing.

Irina: This is why we contacted your contactee, to see your desire. We will consider the aspirations of the people in the egregors of the Earth. The aspiration of the majority of you.

Maxim: Do I understand correctly that you will build a society where everything will be subordinate to everything. Everyone will go where you say.

Irina: Yes, wherever we say. This is how our population lives.

Maxim: Have you studied the human individual? That she requires free will, that she is a very freedom-loving individual?

Irina: There are technologies of influence through your hormonal system and perception systems that make free will imaginary.

Maxim: Do you want to subjugate us through chemical, biological chips and drugs?

Irina: Your intelligent Spirit will be born in this body, but all the decisions it will make are determined by its perception of the world. And perception can be controlled from a distance, because the body is a biological computer.

43:12 Opinion of MS representatives about the Union of Six on Earth. Reptilian plans to genetically modify humans. The intended choice of the Protectorate people for Earth.

Maxim: I have a question for LiSioni and MidgasCaus. What do you think about this in principle? How are you going to protect earthlings from the interference of reptilian civilizations?

Irina: (Mead speaking). The MS itself knows about these plans of civilizations that are not part of the MS (it has its own special services). This is prohibited by MS. No evidence of the transfer of components to anyone known to Bergastr was provided. What he just said, he does

not name the names to whom they were transferred.

Maxim: Could there be a situation that the MS may not know that there really are direct contacts, transfer of technology, information and everything else?

Irina: Even if the MS does not know the components, in the end they will create a nanovaccine, if, of course, they are transferred.

(Roy Rich Mar speaks). It also depends on how your governments will allocate resources for their creation. Perhaps your government will not give its resources to this. Not the technology itself. Please tell MidgasKaus that we did not transfer the technologies themselves, but only individual components. And we do not consider this a violation of contacts, because we did not transfer technology.

(MidgasKaus speaking). All the same, if you transmitted, this is a violation, because it is proof of physical contact. They are talking to each other.

Maxim: What should we do now?

Irina: What do you mean?

Maxim: We convey the information that there can be no contact without permission. It turns out that there can be contacts without permission.

Irina: There can be no contacts without permission. But they can fly to Earth for other purposes. Like criminals who kidnap people, they make contact without permission. They are already kidnapping there.

Maxim: As far as I understand, this situation, even a military situation, could now break out. Because the MS tells us one policy, a theory, that we must be independent, that we must develop ourselves.

Irina: They know about it.

Maxim: And the reptilians say that we need to be controlled, we need to be subjugated.

Irina: MS does not agree. He said that if they try to invade, there will be war. They understand that there will be a war with the MS, because there are MS bases here. They know this very well.

(Roy Rich Mar speaks). Why did I answer that in the year 54 there was no permission from Pikran to contact earthlings? Because there were simply researchers who sent a message to the MS, its scientific community from our planet, that they want to explore on Earth. This did not include contact with people. This included the study of volcanoes and the study of the underwater world. These are our biologists. No one can refuse us to study this planet, because this planet is as much a part of the entire Galaxy as the MC.

Maxim: Roy Rich Mar, how are you going to give people information as opposed to MS? Although you are already giving it through many contactees. But for some reason you don't fully tell us through your contactees that you are going to completely control us. But they do give it. I'm confused about something.

Irina: They do.

Maxim: They do, yes.

Vasily: At the first meeting, I think, Khor Shu Mag said that they want to govern.

Irina: I am a chemical technologist specializing in management.

Maxim: Wait, is it true that you want to change us biologically? Do you want to introduce up to 30% of reptilian genes to us?

Irina: There are genetic scientists who put forward such proposals to our governments. Khor Shu Mag was one of the scientists. He is a philosopher, but he was in the company of scientists who put forward such an idea. We will look at the situation. I am on the council (as there is a commission for MS contacts) of the Order of Six Civilizations to change the situation on Earth. If our project is successful, I will be one of those who will decide how to manage and how to change.

Maxim: How can your project be successful if the Earth is under the jurisdiction of the MC? Explain to me.

Irina: Very simple. If they create components of nanochips with the help of which it will be possible to control your perception, then information will be introduced through these nanochips through our agents on Selbet, who have bases on the Moon. By the way, they are going to build bases on Earth. They can do this, they are members of the MS. They have no right to refuse them even with this information that is now available, because they will provide all the necessary information: what this database is for, and so on.

This base will be built in the next 20-25 years, that's the deadline. Maybe faster. A Selbetian will work at this base, who will know about our plan, who will be in contact with us, at least in the astral. When your government scientists create these nanochips, we will say that they will still control you, but only more efficiently. When they, using earthly technologies, place these nanochips in people, then our reptilians from the Selbet base, who will not be suspected, because they will be in astral contact. There will not even be physical contacts; we will choose someone who has never been to our planets. We have these. And it is impossible to track them, because astral contact, according to the MS himself, is a personal matter for everyone. Thanks to which Irina was allowed to communicate with us.

As soon as these nanochips are introduced into earthlings, equipment will be secretly installed at the Selbet base that will control their robots and at the same time emit waves so that the earthlings themselves, under the influence of the waves that the nanochips will emit, supposedly using their free will, will choose not MS, and us.

Maxim: MidgasKaus, LiShioni, why doesn't MS intervene in that

situation?

Irina: What do you mean, ban them from building a base? They haven't applied yet, at least I don't know what he's talking about.

Maxim: It turns out they transferred technology. Is it forbidden to transfer technology?

Irina: Not technology, but components. They emphasize that the technology was not transferred. Those. not the chips themselves, but the instructions, shows graphs.

Maxim: So, can we pass on instructions?

Irina: Instructions cannot be transmitted, but if he did this in secret contact, under the guise of a researcher, for example, a geologist, he simply met him in the place where he assigned astral contact to him.

Maxim: Do I understand correctly? In the near future, earthlings will have a choice: either join the MS, or join the reptilian Union of Six under the influence of nanochips?

Irina: (LiSioni speaks). We also have our contactees on Earth, at the MS. (He is answering him now). If chips are introduced, then these chips will be introduced to these contactees. They are earthlings. Your authorities do not know who exactly our contactee is. They will simply automatically enter if they are invented.

The introduction of chips that are created using the technologies of the MS or their Union (these technologies are all known), their emissions, and even more so, their influence will be immediately known to the MS. Firstly, they will not accept the choice of earthlings made under the influence of such chips, and secondly, they will indeed remove these chips from the same contactee. They will determine by what technology it was made. The government of the planet that will be identified as the inventor of these chips (and they are all known, these technologies) will have questions. She is not a member of the MC, of course, it may not be proven. They might say it's some kind of criminal.

In any case, an operation will be implemented, for example when people are sleeping, to deactivate these chips. We also have fields.

54:31 The legality of information about the actions of the Union of Six on Earth.

Maxim: Do I understand correctly? The information that some contactees carry that we will be chipped, that we will be controlled by spraying various chemical elements, does it have a place?

Irina: (Mead speaking). If they were all right with this, think for yourself, why would they tell this to the MS contactee, and even in our presence? They would then make this operation top secret. And it's not just Irina, but no one would know about her, but you're talking about how she's popping up everywhere.

Maxim: Yes. Contactors carry a lot of information about chips, about vaccination, about controlling us through electromagnetic waves, and much more. It turns out that this information exists, but it has not yet been implemented?

Irina: (Roy Rich Mar speaks). It hasn't been implemented yet. It is still under development. But I repeat once again that I am giving it in order to track the public's reaction to these proposals. I took a risk for my civilization. The fact is that the MS is aware of the position of our civilization and its views. And the fact that the components of nanochips and instructions on how to assemble them were transferred (shows graphs), in any case, I will not name those who did it. I don't know them myself. Only the government of my planet knows this, and who exactly from the government knows is unknown to me. The ICJ and the Security Council will have to fly in and extract information from them.

Maxim: Dear friends, I myself am a little perplexed. I thought that these were all the machinations of low-vibration, subtle-material civilizations. And now I am receiving information that all this is real, and what we just talked about is possible in the future. It turns out that schemes have already been handed over in order to organize everything.

We are currently finishing our second meeting. I will be waiting for your questions. I will take all questions very carefully. I will not convince myself that these are the machinations of low-vibration, subtle-material civilizations. I became convinced that this really exists, this is true, the reptilians really want to control us, as many contactees say. But now I heard a serious important thing: the choice, in any case, will be ours. I understand correctly?

Irina: (Mead speaking). Yes, sure. Because if the MS knows that nanochips have been introduced to you (and this will be known through contactees, we have enough physical contactees), then there will be intervention from the MS through fields that shield both the fields of the Selbetites and anyone else.

Maxim : There is an opportunity to help us, do I understand correctly?

Irina: Yes. But so far, I repeat, no chips have been detected on you. You have no technology at all. I don't know what they handed over to you, at what stage of development it was. Maybe they just misled you, but for now your earthly scientists are far away.

Maxim: Vasily, did you want to say something?

Vasily: Information came on television and YouTube that the Chinese are already introducing liquid chips into the human body.

Irina: What does television have to do with it, it is not confirmed.

Maxim: Look, there is this information. Indeed, there is an opportunity for China to experiment with different technologies. But there are no real technologies yet. Our MS representatives talk about this.

Irina: (LiSioni speaks). If chips were introduced, be it in China, be it in Russia, be it in the USA, be it liquid or whatever, the first function of the chip would be to track the location. This is the most primitive one, which was several million years old in MS civilizations when we just started. This most primitive chip can track a person. Now bring up all

the information, for example, on China. How many children and people they have there simply disappear in the mountains, in the forests, in the rivers. The secret services and people are looking for them. If chips had been inserted, they would have been found.

Maxim: Most likely, this information indicates that there are already experimental developments in China. But we won't talk about this for now.

Irina: MidgasCaus says: "We also have chips."

Maxim: Yes. Dear friends! I ask you to leave your questions and comments below this video. We will definitely create a group that will collect these questions, these comments for the next meeting with representatives of the reptilian civilization. Please even write who to invite to the next meeting. Maybe try to invite a civilization of dragons, those 5-6 meters tall ones with wings. But it will all depend on you.

Dear friends, goodbye to everyone. Vasily, thank you very much. You gave us a lot of information to think about.

Vasily: I think I have passed the baton. Is my function finished?

Maxim: No, Vasily. Your function is not finished. I think that our viewers will want to personally communicate with representatives of reptilian civilizations. Can you help them with this?

Vasily: If you need help, then yes.

Maxim: Can we give you your coordinates and data so that you can pass on information to interested people?

Vasily: Yes, let's do it.

Maxim: Everything is great. We end here. Dear friends, goodbye to everyone. Until next time.

Vasily: Goodbye.

Broadcast July 22, 2021.

Conference participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia Project and the Center for Spiritual and Physical Development;

Vasily is a contactee with the reptilian civilization;

MidgasKaus - representative of the planet Esler, biologist, psychologist, specialist in alien life forms;

LiShioni is a representative of the planet Shimor, a specialist in the astral world and its interaction with the material world.

Video in text
May 4, 2023

#313 Live broadcast. Answers based on materials from “Cassiopeia takes off her rose-colored glasses.” New project “Mental Healing”.

https://blog.cassiopeia.center/otvety-po-materialam-kassiopeya-snimaet-rozovye-oc

https://www.youtube.com/watch?v=2ipsbMMnZXA

00:03 Introduction of participants.

Irina: Hello, dear friends!

Maxim : Guys, hello everyone! No matter how hard you try, I am still there and will still help Irina.

Irina: How can we be heard and seen?

Maxim : They have women, yes. It's just that we communicate with men mostly, that's how it turns out. How can you hear us, guys? Our most basic question is how can we be heard? Excellent audibility and visibility.

We will have a very interesting broadcast today. We had a whole week of videos with reptilians. Today's broadcast will be devoted to all your questions, which will be directed to these two broadcasts that were. "Cassiopeia takes off her rose-colored glasses" and "Planet takeover by reptilians." My friends are already telling me that I have completely gone crazy, that I already think that we are being captured. By the way, I don't think we're being captured. I believe that we have freedom of choice. Today Irina will talk a lot. You listen to me a little at the beginning and that's all. Today we will introduce you, it's still a big secret who we will introduce you to. Where do we start? We, as always, will start with the news.

Irina: We, as always, will start with the news. I will introduce our friends who are present here. So, today we have with us our curators from the planet Shimor and from the planet Esler - MidgasKaus and LiShioni. Today they will answer your questions and talk about galactic news.

Before we begin, dear friends, I would like to make this request, or appeal, to all of you. I read the comments on the last live broadcast, and I ask you to be a little more polite in dealing with Maxim, because he didn't mean anything bad, he didn't interrupt anyone, he just asked questions. They wrote something strange about him. I will specifically

devote time to this now, because I believe that it is no longer possible to remain silent here. Maxim is the leader of this project, and I participate in it together with him; it is not me alone who is broadcasting the live broadcast, but we together with him. Therefore, if you come to me personally, it is better to do this at personal receptions, and live he has the same right to speak and ask questions just like me.

Regarding the fact that he interrupts me, I interrupted him a hundred times. None of us are offended by this.

Maxim : (laughs) If someone thinks that you can be a project manager without being a contactee, then you are very mistaken.

Irina: Yes, he is a contactee, by the way.

Maxim : And LiShioni, with whom you communicate, through whom Irina conveys information to you, is my curator, personal curator.

Hi all! I'm in such a sporty state today because I have a huge amount of work to do, I'm constantly running around, I always have some kind of meetings, business, projects. Now the design of the first and second buildings of the Center is just finishing, which we will build together, raise together, and participate in the project together. And I would like to say. Guys, there are a lot of us contactees. If you think that it is possible to conduct such a project without being a contactee, then it is almost impossible. We don't make excuses.

How many kilograms does he press from the chest? Up to 135 is possible. This is for those who understand about those who asked the question. I call physical development without spiritual development self-deception. Let them throw stones at me, but I believe that development should be both on a spiritual level and on a physical level. Therefore, our autonomous non-profit organization is called "Center for Spiritual and Physical Development". Therefore, I am for spiritual and physical development.

I thought that we are news first, and then the most secret. Guys, I hug

everyone. I will try not to interfere with Irina's live broadcasts. Sometimes I understand that there is a lot of me, but sometimes I am not able to hold back the information that comes and goes, so I will work on myself.

05:26 Maxim Rusan – contactee.

Irina: The first galactic news is from contactee LiShioni.

Maxim : We didn't want to talk about it, we wanted to leave me just as the project manager so as not to mislead you, not to misinform you, as many will think.

Therefore, the first galactic news is that I am a contactee. The contact is quite good, long-lasting, and the audibility of this contact is also very good, so everything is fine, don't worry.

Irina: He doesn't stop me from leading.

Maxim: I'm here, as always. I sit, follow the broadcast, look for questions, if anything, I suggest what questions. If questions have already been asked more than once, I don't ask them. I only ask questions that are really very interesting and relate to the broadcast. Today's broadcast will be dedicated to reptilians, the takeover of the planet, our rose-colored glasses, why our curators did not immediately tell you about reptilians.

Didn't finish. You see, you interrupt too (laughs). I love you all too. I understand why this is needed, so everything is cool. Everything goes as it should, and then Irina continues the broadcast.

Irina: This surprises me. Maxim interrupted the curators, Maxim interrupted those, Maxim interrupted me. Have you ever interrupted your friends? Your parents, brothers, sisters, loved ones, friends? These are all saints, I'm surprised.

Maxim: Regarding Light, the reptilians really need it. They very often

lack it, so if we say something about reptilians, it is better to send Light.

Irina: (Now Mead smiles and says) Yes, indeed, when a person talks and interrupts himself, he does not notice it, but if he...

Maxim: Guys, imagine. There is a huge amount of information here. Of course, sometimes it “boils” and “steam boils”, and in general, it’s not so easy to do all this. Everything is very ambiguous, every time there is new information, new filters, new knowledge, new emotions. It can be very difficult, I agree with you on this.

Irina: That’s just what they asked. Maxim, did you show LiSioni the film “Avatar”?

Maxim: The film “Avatar” was probably written by a contactee who was in contact with the Andromeda civilization.

Irina: I agree: Maxim is the best leader, person and friend. He is where he should be.

Maxim: A house manager is a man's best friend. Everything is correct (laughs).

08:34 Cooperation between the Ashtar Sheran fleet and the Interstellar Union.

Maxim: Yes. What's our galactic news?

Irina: (MidgasKaus and LiShioni speak) We welcome you. We want to report the news that Ashtar Sheran two days ago, along with his fleet of the Galactic Federation of Light (GFS), was on the planet Burkhad. There he signed an agreement that his fleet would cooperate not only with the Galactic Federation of Light, but also with the Interstellar Union (IU) equally, in order to control the contacts of those civilizations that had already reached the level of interstellar flights with civilizations that had not yet went beyond the boundaries of their star system. It will

be not only the Earth, but also many other planets. The entire Galaxy is discussing this news. For the last 12,000 years, Ashtar Sheran has been in the State Fiscal Service. Now he will do the same in MS.

Maxim: What interesting, good news.

Guys, as you know, we work very hard. We have a contact group. We have a health group “Health through the Higher Self”. We have a very interesting person, he is the teacher of this group, his name is Ilya, his last name is Alexandrov. While he was leading this project, he had a new project in our project.

Ilya, I want to invite you, have a seat.

Ilya: Good afternoon everyone! Good afternoon dear friends!

Maxim: This is our Ilya. He is a senior teacher at the school of contactees and the school of healing through the Higher Self, combining esotericism and psychology. For those who come here not to become contactees, but to improve their health, he taught health improvement courses. I understand that you have a new project, Ilya?

10:44 Project "MentalHealing".

Ilya: Yes, a new project. There are a lot of requests for a course on healing through the Higher Self. Everyone wants to learn how to communicate with the Spirit, everyone wants to learn how to work with it and understand how you can change your life in harmony with your Higher Self. Thanks to a large number of requests, we have created an online project, which, I hope, everyone has been waiting for a long time. We start this Monday. There we will connect with the Higher Self, deal with our purpose, our health, and addictions.

Maxim: Do I understand correctly, we have finally come to the point that the Cassiopeia project has the opportunity to teach the Higher Self now online?

Ilya: Online, yes!

Maxim: What is the name of the project?

Ilya: “Mental Healing” - mental health, mental wellness, no matter how you translate it. I put “mental health” into it.

Maxim: Guys, if you want to know more about this project, the link is right below, under this video. I left 3 links especially for you: to the chat, to the website and to the YouTube channel.

Ilya: We will have a live broadcast every Monday, and twice a week we will have a practical lesson on Zoom, where we are together: me, Larisa Astashevskaya - our second teacher, and once every two weeks, once for our course, Irina will be with us. He will be with you, with us, to help you harmonize with your Higher Self.

We will all communicate together on Zoom, there will be psychological practices, esoteric practices. We will approach it from different angles and with different concepts so that you realize yourself as the Light that our project brings. Irina carries first.

Maxim: Ilya, it’s probably expensive to study online?

Ilya: Like everything in Cassiopeia, it’s prohibitively expensive (laughs). We set such a cosmic price tag, and it is called - payment according to the heart. Our entire project is payment according to our hearts, and we are not changing the concept.

Maxim: I think it’s hard to even call this payment. Probably a gift after my heart. This is the person’s own assessment of the knowledge that you will transfer to him.

Ilya: Gratitude. Thanks for the development of the project. In order for us to understand where we are going, whether we are going correctly, whether this knowledge is needed, whether we are doing this in an interesting way for you, i.e. Feedback.

Maxim: What will you do with the money? Where is this exorbitant money that people will give according to their hearts? Where will you put them?

Ilya: All the same. For the construction, for the development of the project, the center, and I have a global idea, which I cherish in my heart, to open the Cassiopeia health resort on the seashore, where everyone could come, get healthy, harmonize, but for now this is a message into space.

Maxim: I hope that if people help, we will definitely open it on the shores of Crimea, and we will help us open it on other shores if we have good, interesting people, sponsors who will really help us with this. We don't follow anyone, no one supervises us, we are an independent project. It exists due to the fact that you, conscious people, contactees, help the development of this project. So once again thank you all so much! If you weren't there, there wouldn't be a Mental Healing project. This is a very cool online project in which you will be taught to communicate with your Higher Self, help you work with blocks, teach you how to communicate and work with your energy. A project that will unite esotericism and psychology on this Earth. This is a unique project that was born at the expense of the Center and the curators who suggested this project.

Ilya, thank you so much for being with us. Thank you very much for supporting the project on condition of donation. I hope that people will appreciate it and understand what it is for and why it is being done. Thank you very much, we'll let you go.

Ilya: We are waiting for you tomorrow on our live broadcast. The links are all here, under the live broadcast. Bye everyone!

Maxim: That's it, guys. They saw Ilya off. The project is very, very, very cool. I know how Ilya teaches classes, I know that you and Irina will be in this project. Anyone who was unable to get to Irina in person will be able to attend online training in the "Mental Healing" project and communicate with Irina there, ask her your questions, and learn to communicate with the Higher Self.

Irisha, well, let's go?

Irina: I also want to say that Ilya is very good at leading to the Higher Self. He has a lot of experience in personal techniques and techniques via Skype. He himself is a very good contactee, he has many supervisors, he is a universal contactee. Conducts a course on self-healing in contact with the Higher Self. Combines the ideas of esotericism and modern psychology.

Maxim: Guys, about the opening of centers. We don't open them ourselves. They will be opened by you, those who will come, undergo training on the contactee course and want to continue opening these centers. We will help in any way we can. Centers will open not only for spiritual purposes, but also for health purposes. Therefore, to open centers we need to come here, study here, see how the equipment we work on works, and everything else is a matter of technology.

“And if there is no money, they won’t accept you” (reads the chat).

Where won't you be accepted if you don't have money? Guys! The entire project is built on your awareness, on our joint mutual assistance and mutual assistance. We have never reproached anyone for not having money. In order to get to the training, to the contact group, you just need to pass the test and have the information. You need money to get there and at least for food here.

Irina: Different people come to us.

Maxim: Absolutely different. If you don't have money, please take courses. If you have money (some people tell me), they get rid of us, they are already treating us or doing something else (they are getting rid of our essences), and when you run out of money, you, in any case, will come to us. We'll tell you exactly why you ran out of them. We conduct not just courses for contactees, esotericists, there are also financial literacy courses, there are psychological courses where you will straighten your head and understand where all your problems come from in this life. There are courses for contactees. Without contact with the Higher Self, without contact with the Spiritual world, there can be no development.

Irina, run away from me. Irina, run away from Maxim, they write (reads the chat, laughs).

Irina: Run from Maxim to whom? To him?

Maxim: Guys, I have the 16th level of incarnation at the time of entering this planet, into this body. I'm from level 16. Fortunately or unfortunately, my next level is transitional, angelic. I won't worry about whether I'll get there or not, because I really like him. I also like it when they say we're going 4D. Guys! I'm so cool in 3D that I'm ready to offer my back to you so that you can climb on top of me and crawl into this 4D if you want.

Irina: Maybe people just don't realize the tasks of live broadcasting? That I am silent for 20 minutes, or whatever. The purpose of a live broadcast is not only to give live answers to your questions, but also to convey information about the development of the project, which is what the manager does. This is not an advertisement, this is information about the project.

Maxim: (laughs) They consider it advertising. Many people can't get to us, can't come to us, don't understand what we do. Therefore, during live broadcasts there is an opportunity to tell something about yourself, to give you a little information.

Let's take the first question right now. Here. "LiShioni, do you have a tail?"

Irina: We will answer now. LiSioni, is there? He doesn't have any tail, and never has. Only in some reptilian races. The rest of the anthropomorphs, to which I belong, despite their special skin color, do not have a tail, and my ancestors did not have one for many millions of years.

(Reads chat) "What level am I from?" I don't know what level you are from.

“What is the level of embodiment of Irina?” I incarnated from the 21st level, this is at the time of incarnation.

20:56 Egregor of the Soviet Union.

Irina: “The Soviet egregor is alive?”

All the energy of the Soviet egregor passed into the energy of the egregor of the Russian Federation and other neighboring countries of the Commonwealth of Independent States (CIS). The energy of the egregor was divided, and everyone got some percentage, so to speak, of this energy.

21:22 Regular meetings with Christ.

Irina: “ Will there be meetings with Christ?”

Yes, they certainly will. We have already agreed that we will meet approximately once a month to continue to answer those questions that only he can answer. But he strongly asked everyone not to repeat the questions, so that they could ask the questions that concern people, so that contact time would not be wasted on the same questions.

21:52 Star Soul. Ashtar's military rank.

Irina: “Who is the Star Soul?”

A Star Soul is a Soul that remembers many details from its past incarnations, such as as a star plasmoid. Some call the stellar Soul of a person who remembers himself in a dream, or in reality he receives images that he was embodied in a cosmic humanoid civilization that could fly on starships, on spaceships, like Burkhad, Esler, and other civilizations. Some call those who remember their lives on other planets the star soul. Remembers or feels that he was there. In fact, we are all stellar Souls, because our Earth is also located near the Sun star. If, for example, you look at the Earth from Burkhad, or as I

recently did, from the planet Mars, the Earth is also in space, at the top, among the stars. All who are incarnated on Earth are also stellar Souls. Everything, without exception. All cosmic Souls.

Irina: “ Is Ashtar a name or a military rank?”

He told me that Ashtar Sheran is his name. And his military rank now is fleet commander of the Galactic Federation of Light.

Maxim: Today is Marina’s birthday.

Irina: Thank you, Maxim. Today Marina, a contactee who is on YouTube under the spiritual name Moreya, her name is Marina, today is her birthday. I and all the masters of the Cassiopeia project, all our curators, we congratulate you, Marina. We know each other, we communicated, and now sometimes we communicate by correspondence. We congratulate you on your birthday and wish you maximum realization of all your bright qualities of the Soul in this incarnation, we send you the Light of our Love.

Maxim: Marina, I don’t know you personally, but I also wish you a happy birthday. I wish you all the very best, the implementation of all your plans for contacting, and not only, and just in life.

24:46 Life on the Sun.

Irina: “ Is there life on the Sun?”

On the Sun, as on other stars, there is life, but not biological. According to the terminology of, for example, Carlos Castaneda, they are called “inorganics”. Life is inorganic. The living beings who are there are in subtle bodies, in subtle bodies that are not afraid of the high temperature and pressure of the Sun. We call such creatures plasmoid civilizations. There are so many species, so many worlds. The number of these worlds is constantly being discovered by representatives of the Interstellar Union. All of them are still unknown to them, there are a lot of them.

“Are there bases in the Udmurt Republic?”

Here you need to show the map. Those who are now in astral bodies will remember where the Udmurt Republic is located, the map of the Earth that they saw. It will be difficult to do and say exactly.

Maxim: Guys, if you want to ask your questions now, you can do it through the Telegram chat. I'm giving the link to the chat now in the chat. You can ask your questions in this chat.

Irina: “Let’s talk about real things.” Which ones exactly?

26:27 The spiritual meaning of **dictatorial regimes.**

Maxim: Irina, the question is this. Is there a pattern that in spiritless societies dictatorial regimes are practiced, like the reptilian Union of Six?

Irina: In which dictatorial societies?

Maxim: The pattern is that the less spirituality in a society, the more dictatorial regimes, is this possible?

Irina: I don’t remember what the Ray of Christ Consciousness spoke through me. I listened several times last night to what he said through me in the latest video on our channel. It was said that Spirits who incarnate in societies where there is a dictatorial and totalitarian regime incarnate there for a reason. They must go through the experience of lack of freedom in order to evaluate it later. What follows from this? It follows from this that those Spirits who incarnate in these societies were already previously unspiritual. They did not follow the path of the Spirit, but along the path of indulging the body, matter, anything, but not spiritual development. And there they incarnated with special vibrations, with special goals and objectives in order to go through this experience. Angels and higher Spirits sometimes incarnate there, but in order to bring Light even in this society in the way that it allows at that moment in time.

27:55 The structure of the center of the Earth at the subtle and dense levels.

Maxim: Irina, a question from a Telegram chat. What is at the center of the Earth?

Irina: At a dense level there is the core of the Earth, which consists of many elements. Not only from iron and radioactive elements (uranium, thorium), but also from many, almost all elements of the periodic table in different proportions, depending on the layer of the Earth's core and the place it (shows) is located in layers. In the very core there is a substance in a very liquid state. This pressure liquid already has different properties: between dense and liquid. This is the substance that was the most ancient during the formation of the Earth.

At a subtle level, special plasmoid civilizations live in the Earth's core, which are responsible for the structure of the lithosphere of the entire Earth. They are responsible for ensuring that all continents are located in a certain way, so that all oceans, or rather the plates on which these oceans are located, do not move towards the continents. They are responsible for order in the lithosphere. These are also plasmoid civilizations.

Maxim: Irina, is it possible to find out the level of incarnation by date of birth and where?

Irina: We have a project called "Find out the level of embodiment." He is hosted by Olesya on Instagram. The link to this Instagram is in all our social networks. networks, including YouTube.

Maxim: Open any video, you will see this link there.

Irina: This was conveyed to me by the representative of the planet Esler - MidgasCaus. He conveyed this for those who want to know the level of embodiment in our project. To do this, you need to indicate your date of birth, indicate your name and country of birth. The name that is on your documents, and the date of birth that is also on your official documents.

Maxim: Guys, I haven't seen LiSioni's film "Avatar". I just didn't have time to show him, honestly. I'm sorry, but I don't have time to watch movies. I get up at 6 in the morning, go to bed at one, two, and work on a specific project. I really don't have time, I don't even have days off. I will definitely show him this film, don't worry, but a little later. I'll find myself a day off, make it special for myself, and once again I'll enjoy watching the movie "Avatar"; he sees this movie in my mental images. I can transmit mental images, through these mental images he can see the pictures that I transmit to him. You don't even have to watch this film, you can convey it mentally.

31:38 Unconscious contacting.

Maxim: Good afternoon! How do you understand that you are an unconscious contactee?

Irina: Everything is very different. It happens that a person begins to dream that some mentors, teachers come to him and begin to teach him. He doesn't remember, he forgets, but he has the feeling that it was in a dream, but he doesn't remember everything that happened.

It happens that a person feels someone's presence, but cannot separate his own thoughts from the thoughts of his curators.

It happens that a person begins to meditate, and during meditation the image of some mentor (or someone else) comes to him, who gives him information that he has been communicating with him for a long time.

It happens that a person does not communicate on a conscious level, but he immediately understands what he needs to do, for example. He gets answers about his life. Moreover, they appear on their own. And this is a possible contact with both the Higher Self and the curators.

It happens that a person understands that he, for example, is a healer, that he can heal with his hands. And this is beginning to be confirmed to him by those people who see a person's energy absolutely independently of each other. They tell him the same thing - psychics, healers. And he doesn't understand why they see this in him, although

he doesn’t feel it. They see a real curator who wants to give energy to people through him. It happens differently for everyone.

33:31 LiSioni about depression among aliens.

Maxim: Irina, do aliens have depression, and how do they deal with it?

Irina: Depression is despondency, oppression of the Spirit.

Maxim: Let's ask LiShioni. They are closer to us in emotional state, to earthlings. Do you experience depression on your planet, and how do you deal with it?

Irina: Conditions similar to depression, of course, can exist. But they happen in response to some event. Reactive depression, it teaches awareness. We teach children at school that these emotional events that are difficult for a person or an alien to experience, they must understand according to the special laws of psychology that we teach at school. In your opinion, this is contact with the Higher Self and the dissolution of the block that created this depression. Everything is done to ensure that this depression does not attract any low-vibration plasmoid entity, which can begin to provoke a person into low mood, loss of strength and other conditions from this negative contact. Therefore, in our society there are no long-term depressive states without the desire of a person, a humanoid, to get out of it, as you may have.

35:20 Terraforming Mars and Venus.

Maxim: I see. Irina, will Mars and Venus be terraformed so that anthropomorphs can live there again?

Irina: The issue of terraforming Mars and Venus will be decided after the Earth joins the Interstellar Union, because the word of earthlings who will already join the Interstellar Union is needed. Will they want to move there again? To Venus and Mars. Some politicians of the Interstellar Union have plans to once again give earthlings the opportunity to live there after the Earth joins the Interstellar Union. Due

to the improvement in living standards, medicine, and assistance to socially vulnerable segments of the population, which will be carried out according to new laws adopted after joining the Interstellar Union, there is a possibility that the Earth's population will grow very quickly. Because of this, there is a proposal, along with the government of earthlings, which will enter the Interstellar Union (will sign this agreement), to get together in the Council of the Interstellar Union and decide together whether it is worth terraforming these two planets in order to move part of the population there. The Interstellar Union will provide all the necessary technologies for terraforming and for moving part of the earthlings after you join it.

37:05 Selbet people about the plans of the Union of Six.

Maxim: I see the question more than once. How did positive reptilians react to the last two interviews about the Order of Six?

Irina: About Selbet, probably?

Maxim: They are probably talking about those reptilians who are part of the Interstellar Union.

Irina: After these two videos, I have not yet talked to one reptilian Selbet or other positive reptilians about this video, so I don't know how they reacted.

(MidgasKaus speaking) It became known in the Interstellar Union that the Order of the Six went out through a contactee to the audience of Earth in order to convey their ideas and their plan. Including on the planet Selbet, it became known that this reptilian, from the star Alpha Draco, said that a base would be built from Selbet on Earth, where a reptilian would supposedly work, who would support their ideas and help the Order of the Six in their promotion, management of earthlings, turn on special devices. The Interstellar Union received some information from the planet Selbet, from its political and scientific circles, which say that they do not believe that there will be such a reptilian. They themselves are in favor of supporting the Earth, they very much regret the decision that was made 12,000 years ago by their government, which also introduced a very strong totalitarian

regime for them at that time, on Selbet.

They constantly emphasize in conversations with other civilizations of the Interstellar Union that on Selbet, during the war with the Earth and with the Interstellar Union, there were a lot of reptilians who did not agree with this government decision. They organized their own resistance movement against this government and also had civil clashes.

39:47 Annunaki. Alien humor.

Maxim: Irina, they ask you a question because it concerns reptilians. Who are the Annunaki? There is a channel (we won't advertise it) that says that the Anunnaki are reptilians.

Irina: Annunaki. In one of the ancient languages of the Earth, in the language that was in the country whose capital was Babylon (Babylonia was called), this word meant any aliens: reptilians, anthropomorphs, and anyone else. This is like the meaning of the word "Elohim" in Hebrew. Any aliens who came from the sky. They could then be called reptilians. Who is now called this by various groups of esotericists, practitioners, and various religious groups must be looked at in context. But the ancient, original meaning of the word was just that. Now, of course, they may be called reptilians, this is a more modern meaning.

Maxim: I'll ask a question so that he doesn't "spam" us. Do aliens have laughter and jokes?

Irina: They have their own humor, unique. They don't pay the same attention to it as we do. They have some funny stories that they tell among themselves, but they don't have such a culture that certain comedians tell stories, humorous songs, something else, books of jokes. They just have it as stories between them. They don't specifically develop this in themselves.

42:02 Archival materials of the Interstellar Union about the history of the Earth.

Maxim: Good question, I liked it. Irina, when we enter the Interstellar Union, will we be able to have access to all the videos and documentaries about our true history, starting with the creation of our civilization 3 million years ago?

Irina: This video library, a collection of materials in video format, audio format, text format, is located in a special archive of the Interstellar Union - the Archive of Historical Materials on Space Civilizations. This archive is located directly on Burkhad, in one of the cities of Burkhad, and after joining the Interstellar Union, any earthling will be able to buy a ticket for a starship to Pikran and fly to Pikran. Non-contactees also buy tickets for starships in the Interstellar Union. Not contactees or curators.

The government provides this opportunity to curators, like us, for example. Those citizens of our planets who do not work with alien civilizations, or do not work in space, but simply want to travel, they, like you, buy tickets in the various transport communities of the Galaxy. There are a lot of them, more than one and a half thousand are now offering their services, transport communities created by various planets. They are private, there are public, and they are related to some government of the planet. There is very tough competition in terms of prices and services. Different starships, different prices. Any earthling will then be able to buy a ticket to Pikran.

As soon as the Earth enters the Interstellar Union (now LiSioni and MidgasKaus are talking), we already know what will begin in the Galaxy after that. We have already seen this on other planets, which is beginning. Certain creatures, certain humanoids, will fly here and open space stations, spaceports, in your opinion. A schedule will be created. There are now 7 billion people here, and then there will be even more, naturally.

Maxim: Very similar to some kind of science fiction book, right? (laughs) They even ask, how much will a ticket to Picran cost? And in what currency will all this be paid for? How to pay, kidney, liver, what (laughs)? How to get to Pikran? The reptilians will arrive and open their branches. For the liver - to Pikran, for the kidney - to Venus.

Irina: Once a potential passenger is taken to the Higher Self of

MidgasCaus, he will have a ticket to Picrun (laughs). Just kidding, no. This, he says, is your sense of humor. There he already says: “Soul.”

Maxim: We won’t fly that far, only to Pikran then if we pay with our Soul (laughs).

Irina: Who will buy it? (laughs) “Maxim, don’t joke about the kidney.”

Maxim: It's a joke, guys. I was just joking. I just imagined that many people would think, how to pay? Gold. Yes, anything.

Irina: (Speaking) We now understand your humor (laughs).

After joining the Interstellar Union, your entire monetary system will be brought into line with the Interstellar Union. You will still have your own, but certain exchange cards will be introduced. There are currently 17 main galactic currencies that exist now. They circulate almost throughout the Galaxy. You will most likely join the Pikran colony, you have been a Pikran colony for a long time, and you have the most Pikran genes. Most likely, you will join the Burkhad currency system. And it is for this that exchange will be possible when you enter the Interstellar Union. And with Pikran currency you can fly throughout the Galaxy and make those acquisitions, those purchases that you will need in the Galaxy.

I can’t tell you about the course, you need to ask economists. After joining the Interstellar Union, economists from Pikran (Burkhad), from Esler, from Tumesout will fly here and negotiate with your economists. They will look at the graph of your prices, the graph of how these prices correspond to the quality of the goods, there are many nuances there. All these negotiations take no more than two or three earthly months. When you have this currency, you can buy a ticket for a starship and fly to Pikran on a gravitational starship, which flies for several minutes. And when you fly to Pikran, you can buy yourself a translator box - a robotic translator that you will carry with you, and which can be configured in your language and in the language of Burkhad, so that you do not need to learn the Burkhad language.

At the Burhad spaceport, you will board any flying airship (this is their bus), which will take you to the city where there is an archive. You will be given full access, you will come to the archive workers, they will tell you how it works. You will be given full access to watch these materials. And since you will have a box that you buy - a translator, everything will be automatically translated by voice into your language.

49:34 Weather disasters and negative energies of people.

Maxim: There were a huge number of very interesting questions in the Telegram chat, now I'll start asking them.

Now there are very serious climate changes on Earth. Many people were afraid of the end of the world, and Archangel Michael said that our energies would reach this planet within 8-12 years. Isn't this a reflection of our negative energies, these floods, fires and much more that is now happening on the planet?

Irina: (MidgasKaus speaks) This is also one of the galactic news (although he would not say that it is new). I just recently spoke with representatives of the planet Tikht about floods. Representatives of the planet Tikht said that the Mediterranean Sea, which includes the Black Sea, the Sea of Azov, and many seas in Europe, the Mediterranean Sea itself is now very heavily polluted with various industrial wastes and plastic. Plankton die, schools of small fish also die. All this threatens the self-destruction of the entire biocenosis of this reservoir and the adjacent territories for which it is responsible.

Those plasmoid civilizations that are responsible for the Mediterranean Sea, for those Souls that they create for its animals, they conduct energy through the Mediterranean Sea in order to quickly cleanse it of all harmful substances. These energies excite waves and rains. This is cleansing, but at the dense material level the water begins to come out. Hurricanes begin, there may even be earthquakes. And the Tikhtians are going to build a base on the southern coast of Turkey, there is one Pleiadian base nearby, by the way, the planet Raom-Li, and there the Tikhtians will build a base not far from them to help plasmoid civilizations deactivate it all. They will launch special energy waves into the Mediterranean Sea, as well as special bacteria, which will help reduce everything to a minimum so that there are no

cataclysms. Plasmoids themselves can take a long time to clean. If pollution continues, this could lead to disaster.

Maxim: I understand correctly, not only our Sea of Azov is polluted, our oceans in general are polluted. This turns out to be the work of not only the plasmoids of the Azov Sea, it turns out that this is the work of the plasmoids of the entire Earth? Is this a “return” to us earthlings?

Irina: It is the floods that mean cleansing. If there are hurricanes, winds, this is already the work of air plasmoids. This is also a cleansing of the Earth’s noosphere. This means that certain negative vibrations that are located in the Astral have already accumulated over this area. They negatively affect the sylphs, the Spirits of the air, and reduce their vibrations. The Sylphs begin to cleanse their world of these negative energies. On the physical level, it is a tornado, a hurricane that can knock down a tree. Yes, this is negativity from people. Whether they bring dirt into nature, or whether they bring their dirt to the Astral, in any case it returns to them in the form of cataclysms.

53:26 Astral travel to the ship of Ashtar Sheran.

Maxim: Irina, today you had practice of astral travel to the ship of Ashtar Sheran. They ask, what was new on this trip today?

Irina: Today I spoke with the MidgasCaus teacher. His boss is Odus from the planet Esler. And his teacher's name is Hirguru. He is MidgasCause's teacher in biology, in diagnosing people. We met with him on Ashtar Sheran's ship. We talked a little about the peculiarities of diagnosing different people. I also saw Ashtar Sheran himself there. He said that after two videos about reptilians that appeared on our channel, and after the conversation that was here with Maxim and Maria Sokalskaya (he was present here, he heard everything), he had his own opinion. He said that many people were outwardly outraged by the fact that reptilians would allegedly rule earthlings and introduce chips, which the Interstellar Union supposedly does not protect, but inside themselves these people were glad that there was someone to hold responsible for their bad deeds. For example, they think badly of someone for polluting nature. They can now absolve themselves of responsibility for doing so. Allegedly, reptilians control them this way.

This is another reason for such people to do this.

Maxim: Guys, in order to go on an astral journey to the ship to Ashtar Sheran (every Sunday at 14:00), you can subscribe to the “Interstellar Union practice” chat on Telegram. This “practice” chat will contain all the links for astral travel to the ships of Ashtar Sheran. Not only on his personal ship, but also on astral travel you can get to any ship of our interstellar fleet.

Maxim: Irina, next question. People are asking to talk about the practice of Ho'oponopono.

Irina: He has not heard of such a practice. I read this question, I need to tell you a little about its essence, what it is. They have not studied Hawaiian methods, they do not have contacts there, they need to be told the essence of this method.

Maxim: Okay, we'll skip the question then. We can then ask it to those who understand these practices.

56:53 Alien technologies and earthlings.

Maxim: Have aliens transferred technologies for converting any substances from the ether, technologies for building spaceships to Earth?

Irina: The technologies, as the reptilians themselves said, were not transferred, because there is no point in transferring them. We don't have the technology that can recreate their technology. Our industrial-technical complex is still very underdeveloped so that we can create this, at the nano, for example, level.

Handing over devices to us without the ability to fix them if something breaks is also somehow strange. So, as the reptilian who was in contact with me (from Alpha Dragon) stated, only the components of some technologies were transferred, that is, at unfinished stages, which ones, he did not specify. Schemes, plans and schedules were given on how to recreate them. And then it’s up to our scientists, as he

himself said, and our government.

58:01 Collection of herbs for heart health from MidgasKaus.

Maxim: MidgasKaus, I have a request for you, they ask here. Please remind me of the herbal recipe for renewing the heart muscle, for restoring the heart muscle. Is there such a list of herbs? What herbs would you recommend to support the heart muscle?

Irina: What set of herbs would I recommend to maintain heart health?

Maxim: Yes.

Irina: It supports heart rhythm and blood pressure very well, for example, collecting half of hawthorn berries and its flowers, with the addition of one third of this amount, for example, burdock roots. It contains a lot of inulin, which restores the balance of electrolyte substances in the muscles, including the myocardial muscles. And the flowers and fruits of hawthorn contain antiarrhythmic substances and substances that normalize blood pressure in blood vessels. If specifically about dosages, you need to look at the vibrations.

Maxim: Guys, many people say that they miss our broadcasts. I'll tell you that in order to receive a notification on the broadcast, click “subscribe” and the bell. It is located on the right side, somewhere at the bottom of the canal. Click “Subscribe”.

We have literally one minute left, and I, according to the good old tradition, will say that I will extend the broadcast by 15 minutes if we get 2 thousand likes. Thanks to these likes, other people will learn about us, I will be happy to ask Irina, I know that she is tired, I know that she will now go deal with other contacts, but I promise to extend the broadcast for 15 minutes if we get 2 thousand likes within 3-5 minutes. If we don’t get 2 thousand likes, that’s okay, next time we’ll meet on a new live broadcast. I think we will be pleased to meet you in any case.

Irina, while we are looking to see if we get likes within 5 minutes, I will

ask one more question from the Telegram chat. Here is a link to the Telegram chat from which I ask questions.

01:01:02 Political structure of the Galactic Federation of Light.

Maxim: What is the hierarchy of the Galactic Federation of Light, who is the most important there?

Irina: The Galactic Federation of Light does not have the most important thing. There is, as in the Interstellar Union, a Council of Rulers. It consists of 128 representatives of different planets, as well as 3000, as far as I remember (says MidgasKaus), representatives of plasmoid entities from different levels. These representatives constitute the Council of Hierarchs of the Galactic Federation of Light. By the way, it also includes Ashtar Sheran, one of the 128. Zaliatar used to be part of it, but that was a hundred and fifty years ago, now he went into hermitage and took up more healing.

Maxim: Our Zaliatar, who was Vanga's curator, was he a member of this Council?

Irina: Yes, and now he can be part of it, but he voluntarily abandoned his political career and went into the caves, became a hermit. I began to engage more in astral exits, healing and spiritual enlightenment.

01:02:24 Can a person have a demon as their curator?

Maxim: Irina, can a person have a curator from the 6th vibrational level, that is, from the hierarchy of demons?

Irina: Of course it can, if it suits his vibrations. This will be contact with the Spiritual world, if it is not embodied. By the word "Spiritual World" our friends understand not only light spiritual beings, but the entire Spiritual World as a whole. The whole world of disembodied Spirits. Any disembodied Spirit from the 1st to the 24th level belongs specifically to the Spiritual world. Contact with any Spirit, from any level, be it from the 1st level or from the 24th, this is considered contact with the Spiritual world.

Maxim: Irina, please tell me, what is the chakra system of the reptilians from the planet Selbet? Mid, can you give me some advice?

Irina: You need to ask them, I haven't studied reptilians. I was just studying you. I have been to Selbet three times in my life. I am a specialist in earthlings, a specialist in the space civilization called Earth.

01:03:58 Pension on the planet Esler.

Maxim: Please tell me, Mead, do you have a pension on your planet, on Esler?

Irina: Is this a payment to those who used to work but are now not working?

Yes, we have it, and not just a pension. We have a minimum social benefit for those who worked for several years in a certain field and then, for some justified reason, decided to leave their job. For example, justified reasons are the birth of children, the decision to engage in one's spiritual development. For these people there is a certain minimum social benefit, which is approximately one-fourth or slightly more than the average wage at Esler.

01:04:54 Galaxy "Magellanic Cloud".

Maxim: Time 21:05, 1613 likes. I ask the last question then. He will be the very last one in the Telegram chat.

"Irina, tell us about the representatives of palmarantes from the constellation Magellanic Cloud."

Irina: The Magellanic Cloud is not a constellation, it is a Galaxy. There are two of them. There is the Small Magellanic Cloud, and there is the Large Magellanic Cloud. These are two galaxies, these are not constellations. There are a lot of civilizations there. Our Interstellar

Union is in contact with the Interstellar Union of those galaxies, but again, this needs to be specially studied.

Maxim: I see. Guys, thank you all so much. You can find out a lot about our new project “Online Higher Self Training”, links to the project below under this video. We'll finish the video and you can watch it.

About getting vaccinated. I called my friends at the clinic, as soon as the vaccine becomes available, we will be vaccinated. We are not calling anyone, we are not agitating anyone, we decided to vaccinate ourselves with the Center. We trust our interstellar friends. In any case, we are with you. Vaccinated or unvaccinated, you will still enjoy the project.

(Reads the chat) “Maxim is a beetle.” I'm not a bug. There is no vaccine in Voronezh, there are huge queues.

Irina: (Reads the chat) “You were forced.”

Half of Voronezh was also forced? Everyone ran, it was even impossible to get through to these vaccinations.

Maxim: Guys, no one forced us, this is our personal choice. I want you to see this experiment, which you think is an experiment, right on us. We will not lose our properties, we will not lose our abilities, our functions and much more, which other contactees write about. We are in the light of God, and in this light of God, exactly what this God needs will be manifested. If you are talking about vaccines now, then they were also created by the God we are talking about, and all this is needed for some reason.

Did we broadcast about vaccinations with doctors?

Irina: Yes, we had a meeting yesterday. By the way, I wanted to tell you that Vladimir Goldstein reported that he was contacted by an independent association of doctors that opposes vaccinations. As you remember, MidgasCaus was ready to meet with any virologist, with any candidate of science and conduct a scientific discussion through

me, about vaccination in general or against COVID, as the person chooses.

Maxim: Guys, this is a big problem. They think that we have “cuckooed” in full, that we are fake, that we are “hype”, that no aliens exist, therefore the normal scientific community does not make contact with us. And I understand them to some extent.

Irina: They refused. They contacted Vladimir Goldstein and wanted to hold a meeting with me online. Vladimir Goldstein explained to them that they would not have to talk to me. It’s not for me to ask questions, it’s not me who will ask them questions in response, that I am a contactee, I am a contactee of MidgasCaus from the planet Esler. He is a biologist, a psychologist, and he will answer any questions through me and ask them his own. This was supposed to be a scientific discussion, which means that they ask each other questions and do not convince each other, but simply ask questions, giving the audience the right to choose a position. As soon as they found out about all this, they wrote to Vladimir Goldstein saying that they were not ready for this format of conversation, they wished us happiness and development, but the meeting was impossible.

Maxim: Scientists don’t want to communicate with us, the “cuckooed” ones. I understand why. When I came to the topic of esotericism, I was a lawyer, an economist, and then also a psychologist. To be honest, I would call what is happening in esotericism “schizoteria.” People do not use scientific knowledge and achievements, and people immediately try to convey the image of what they accept. Without checking, without doing anything. Guys, when you and I in esotericism reach the level of competent support for our awareness, when we are not “schizoteric,” when we rely on facts, then they will communicate with us. In the meantime, unfortunately, they are afraid to communicate with us and are afraid to get involved. Therefore, we increase the level of awareness. Meet me at Baikal.

Irina: If suddenly supporters of the so-called “anti-vaccination” movement are watching me now (it really exists, I would not say that it is strong, but there are certain forces in it, there is intelligence, just like the “vaccinators” of the opposite camp), You can contact an independent association of doctors yourself. You can ask them if you want them and MidgasCaus to have this conversation. He doesn't

refuse, he's always ready. I am also always ready to participate in this. Maybe they'll listen to you.

Maxim: We can invite a very good specialist from Burkhad, a virologist, who will answer these questions together with Meade.

Guys, bye everyone, thank you very much, see you again.

Irina: Bye everyone!

July 25, 2021

Conference participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

Ilya Alexandrov – psychologist, universal contactee, theta therapist, senior teacher at the school of contactees of the Cassiopeia project;

LiShioni - representative of the planet Shimor, sociologist, specialist in the astral world and its interactions with the material world;

MidgasKaus is a representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms.

#314 Alien economy. Financial security of citizens of the Interstellar Union. Channeling.

https://blog.cassiopeia.center/ehkonomika-inoplanetyan-finansovaya-zashchishchenn
https://www.youtube.com/watch?v=VgMQxVTcyiI

00:21 “Economic Code” of the Interstellar Union. Pension provision in the Interstellar Union. Housing in the Interstellar Union.

Question : Is the Earth's economy a dead end, with its crises, debts, bankruptcies, etc.?

Irina : In dense material and humanoid worlds, there are certain types of economies. For example, on the planet MidgasKausa, Esler, there is no paper money in circulation, there is only electronic money. There are planets where there is only metal money. But, regardless of the presence of material or electronic payment systems on a particular planet, there is a single law of economic security of the Interstellar Union. You would call it an “economic code.” And nothing can contradict this law.

What are its similarities and differences from earthly ones? The similarity is that both have wages for workers and pensions for citizens. The difference is that retirees of the Interstellar Union are engaged in self-development, which is necessary to accumulate experience and exit from incarnation, for the spiritual processing of their lived lives. Therefore, they devote the rest of their lives to themselves, to their moral improvement.

A child born in the Interstellar Union also has certain financial support. There are different forms of ownership in the Interstellar Union: both private and public. There are planets where there are only social forms

of property, there are practically no private ones. There are private forms of business, but they are limited by the Interstellar Union economic law.

There are 117 planets in the Interstellar Union, so I cannot speak for all these planets now; I will speak for my planet Esler. On the planet Esler, as on any world of the Interstellar Union, each adult resident is provided with a separate living space without the right of sale, without the right of exchange and the right of inheritance to their children. If the owner of this home wants to move to another city or to another planet, he cannot sell his home, but can only exchange it according to certain rules. He has the opportunity to exchange almost any housing, or transfer it to the government of the planet. For example, flying to another planet and getting a job there, getting another place to live.

04:45 Taxes in the Interstellar Union.

Irina: Taxes for working citizens of the Interstellar Union cannot exceed 3-3.5%. In some worlds of the Interstellar Union, in some professions with high salaries, this figure can reach up to 7%, but not higher. He's floating. Young professionals have lower taxes because they are just starting to work. Approximately 40-50% of the tax base collected on the planet is sent to the capital of the Interstellar Union, the planet Burkhad, to finance the structures of the Interstellar Union, including the Galactic Security Service, pay for the work of Interstellar Union scientists, etc.

06:16 Unified economic system of the Interstellar Union. Credits in the Interstellar Union.

Irina : You asked about loans. In our country, there are practically no similar enterprises that could provide funds at a certain interest rate. In the economic code of the Interstellar Union there is a law according to which if a commercial enterprise is engaged in issuing money, then it should not make this the main purpose of its activity. In the event that there is no depreciation of money in this area, then the interest rate cannot exceed 1.5-2% over the period of an earthly year. Naturally, in your world this is impossible, since in your world, due to the decline in production and the birth of new people, the growth of their needs, money is depreciating very quickly. Therefore, such rates on credit

loans are naturally impossible. For example, the state cannot provide free housing. This leads to the need to take out a mortgage loan. A similar issue was resolved on each planet at the state level. At the time of joining the Interstellar Union, all economic laws were brought to the economic standard of the Interstellar Union. We have economists, one of whom, by the way, I am. At school we study both economics and politics. We have specialists in various sectors of the economy, as well as in the effective implementation of new technologies on planets that have just joined the Interstellar Union.

When the Earth, having fulfilled all the requirements of the Interstellar Union, becomes its member, our Galaxy's economic experts will come into contact with your governments and develop a unified economic system for the entire Earth in accordance with the norms of the Interstellar Union.

09:31 Electronic document of the Interstellar Union. Young specialists of the Interstellar Union. Social security in the Interstellar Union.

Interviewer : How does the Intergalactic Union provide material support for persons not engaged in material production?

Irina : Are you now talking about providing for a humanoid who does not engage in activities in society?

Interviewer : I mean those who are engaged in intellectual or spiritual activities.

Irina : In the Interstellar Union, schooling is divided into cycles and classes. In the middle of a cycle, children are divided based on tests based on their personal characteristics and preferences into certain professional groups, where further education then takes place. Entering a higher education institution from a secondary school, a young humanoid receives an assigned place. After graduation, he is already expected at a specific enterprise or institution in his specialty. They have a mandatory distribution. There is no such thing as “go out and go wherever you want, look for it yourself.”

This is how we show concern for young specialists. For example, scientists who have studied specific contacts with aliens are now communicating with me. We are aliens for them. At any enterprise, in any organization, when a young specialist enters a job, he has a diploma or certificate.

Mid is now showing me that they do not have the same documents as we do. They have microchips, nanochips, which are implanted into their bloodstream at birth. These chips already contain information about the state of their body. Also in these chips, records about their documents and financial security are entered into a special information field. You just have to put your hand in - the whole calculation is obvious.

When a young person comes to an enterprise or organization with this electronic document, he is assigned an experienced specialist who teaches him initial skills for 2-3 months

Interviewer : Teacher.

Irina : This is the custom among production teams. The labor codes contain such a norm that they will not simply abandon anyone, they will not leave them to their fate, but will pass on their experience.

Interviewer: What is the degree of social protection of citizens?

Irina : They have a certain social standard that society will issue to those members who, relatively speaking, become hermits. He will, with his thoughts, prayers, and meditations, raise the level of vibrations of the entire planet.

This social standard, plus the voluntary contributions of his students in kind or cash, will constitute his financial security. In any case, he will not be left in the desert or in a cave, but will be provided with a certain standard from a set of certain benefits. It doesn't only include products. This even includes travel to other worlds, tickets, etc.

Broadcast June 10, 2021.

Participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Interviewer;

MidgasKaus is a representative of the planet Esler, a biologist, psychologist and specialist in alien civilizations.

#315 What is the meaning of life? How to live in harmony with yourself and the world? Motivation to achieve goals. Channeling

https://blog.cassiopeia.center/v-chem-smysl-zhizni-kak-zhit-v-garmonii-s-soboj-i
https://www.youtube.com/watch?v=DJqJ7CkQftg

00:22 The meaning of life. Lack of meaning in life.

Interviewer: Massive loss of meaning in life - this is quite common in the regions now. What is this, an epidemic? Is this an epidemic of a cosmogenic nature or is it just a change of ideology, and people were unable to adapt in time?

Irina: Massive loss of meaning in life.

Question: An entire region, an entire village. Some people reach the point of suicide, others simply drink themselves to death, others leave for another region, and so on. And this is especially true for the male part of the population.

Irina: To talk about the loss of the meaning of life, you need to understand how a person can even know what the meaning of life is.

The meaning of life is a specific goal that is valuable to a specific person.

What is lack of meaning in life? This is when there are no longer any goals left that are valuable to a certain person.

But what goals can be truly valuable for all people? If we are already talking about more universal concepts, each person, by his nature, including his spiritual nature, and the bodily or, as we call it, the animal nature of the body, and the spiritual nature of his Spirit, usually strives for three states: love, happiness and harmony.

02:10 Love. Happiness. Harmony. Loss of meaning in life: causes and consequences.

Love is accepting him as he is. Happiness is a state of satisfaction with the place one occupies. And harmony is peace with yourself and with others. All these concepts are naturally connected with each other into a single integrity: some call it love, some peace, some happiness, some bliss, some harmony, but, in principle, it is divided into three such components.

If a person within himself does not see the possibility of achieving these goals, or he himself does not believe in achieving these goals, that they exist at all, or they, in his opinion, are very difficult to achieve, he may lose the meaning of life.

This is typical for the male part of the population at the moment, because it is boys, by their upbringing and accepted social norms in

society, who are more inclined to set goals and achieve them. Of course, not always, but in the majority of the population. Therefore, they are the ones who can become disillusioned with life faster than women.

But this should not scare or bother you. The fact is that this apparent lack of meaning in life is not just experienced by you, dear viewers. This is a definite lesson for your Soul in this life so that it can distract itself from the material world, look into itself and find the true purpose in life, which is to develop love, a source of Light and joy for all people around us and bring harmony to this world. Not searching for harmony. It is not impossible for a harmonious person to find harmony, but to search for the source of this harmony in oneself and bring this harmony into the world. At all levels: material creation, spiritual well-being, social environment and so on.

July 27, 2021

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

#317 How to get physical

contact? Conditions for contactee

https://blog.cassiopeia.center/kak-popast-na-fizicheskij-kontakt-usloviya-dlya-ko
https://www.youtube.com/watch?v=vuMgIuwgq0k

00:25 Introduction of participants. News for 01.08.21

Maxim: Dear friends, hello everyone! We probably just turned on the microphone. I have a question: how can you hear us? Or did we turn off the microphone?

Irina: In the chat it was written: “Everything is heard well.”

Maxim: You can hear it well, right? Microphone is on. Everything is fine. Irina, what is the topic of today's live broadcast? So people can ask questions.

Guys, today you will not ask questions in the Telegram chat. The questions will be read by Irina personally from the chat we have. There is a large screen in front of her, and, accordingly, she can clearly see your questions. Therefore, today the topic of our live broadcast is...

Irina: Physical contact.

Maxim: Yes.

Irina: And the conditions for how to get there.

Maxim: Yes, and how to get physical contact. But before we start this live broadcast, I have three great news for you. I'll sit down closer.

Hi all! I, as always, am somewhere nearby behind the scenes. The

first, most interesting news is that the retreat on Lake Baikal will be from September 5 to 30. The most important thing: the sanatorium added 10 places for us for the first stream from September 5 to 17, if I'm not mistaken. And for the second stream from September 17 to 30. Therefore, the link to sign up for the Baikal retreat is below this video.

I want to thank the sanatorium that hosts us for this great gift, because people asked a lot, many people could not get to this retreat.

And the most interesting thing: now I will tell you a secret. In the near future, Irina will have physical contact again. At last contact she was on Mars. We have already filmed three parts, which will most likely be released next week. They're called "I've Been to Mars." Irina missed the last contact. Yes?

Irina: Yes.

Maxim: She has two contacts this month. And she will fly to the Baikal-Tikhtian base. That is, everyone who will be with us on the retreat on Lake Baikal will receive feedback from this flight and this cool base. Therefore, we are waiting for everyone at the retreat. Plus, we will get to Lama Itigelov. We will have a conference dedicated to him with Lama Itigelov, no matter how paradoxical it may sound now. Therefore, we are waiting for everyone at the Baikal retreat - this is the first news.

Second news. Due to the fact that our project is gaining great popularity, a huge number of bloggers, esotericists, most likely those who make money from you and, to some extent, save you from this money, have taken up arms against it.

Guys, I have a big request to everyone, please do not fall for the scams of people who are trying to cleanse you from us, disconnect you, rid you of some incomprehensible entities that we connect. And if there is such an opportunity, then be sure to call and invite me personally to such sessions. You will see a cool show program, it's called "Maxim gets rid of the scammers who are trying to save you from money." Therefore, take me with you to these contacts, to rid you of incomprehensible entities. I'm ready to shoot this video with a

hidden camera. And then put it up and watch this video with you. Guys, don't fall for scams.

Our project was created for Love, for pure energies. All the specialists who work on the project will never set prices for you. All gratitude and gifts that you give come from your pure heart. Accordingly, many regressologists, contactees, and esotericists are very much up in arms against our project, because we are already in our 12th stream of releases.

We have already graduated more than 120 specialists who can take you to the Higher Self. And more. Why? Because very well-trained contactees and specialists came to us, who now conduct practices according to the “donation” system - according to the system of gratitude according to the heart. Therefore, hello to everyone who gets rid of us.

I also want to say that there was such a Marina Malini. This is free advertising for you, Marina. But for some reason she has four videos about our channel. She stayed with us for three days. And for some reason she tells our volunteers that we are chernushniks. Marinka, greetings to you from the Chernushniks. You tell everyone that half the Internet is ridding us of entities. I would like to ask you personally, how did you get rid of those entities that you attached to us during these three days? I’m waiting for your answer under this video, how, after living with us for three days, did you get rid of those entities that are clearing half of the Internet from us?

Third news. And I won't torture you anymore. On August 6, 7 and 8, Ivan Yonten comes to the St. Petersburg branch of Cassiopeia with his wonderful program. This is a specialist, a master of cosmoenergetics, who is completely closed in the Bagirov and Petrovsky schools, matrices, and DEIRs. He will conduct receptions on a “donation” basis.

All links with phone numbers about the Baikal retreat, how to sign up for the 6th, 7th and 8th are under this video. After the broadcast, be sure to watch and sign up. We are waiting for you.

Guys, everyone who knows us, who has actually been with us, who

really communicates with us and gains knowledge, I say a huge hello to everyone. Together - we are force! One by one, we will continue to poke around for a long time and prove to everyone else that we are not evil, and that our project is ready for existence.

Volodya writes in the chat: “On Mars.”

Yes, Irina was on Mars. But now I won’t even tell you. This is a sensation! I'll give you one hint. This is a sensation, because Irina personally touched the American rover with her own hands. And then wait - this is a whole week and three parts personally from Irina Podzorova “I was not on Mars.” Goldstein asked her, so wait. Next week there will be a wonderful video with Irina Podzorova. That's it guys, bye to everyone.

Irina: Hello, dear friends! Something is not visible.

Maxim: These are plasmoids. Plasmoids are to blame for everything. Now we will quickly reconfigure. Everything is fine!

Irina: Dear friends, hello again! Now our curators are present next to us - LiShioni from the planet Shimor and MidgasKaus from the planet Esler. They were with me almost the entire week, when there was a 12th batch of students. I taught with them and answered questions that students asked me.

09:11 Increase in the number of physical contacts of the Interstellar Union.

Irina: We want to start today's live broadcast with galactic news. (MidgasKaus) This refers to changes in the conditions of physical contact. In connection with the latest events known to you related to the fact that representatives of the so-called “Order of Six” contacted our contactee Irina Podzorova. That is, those civilizations that are not members of the Interstellar Union and are sharply critical of our policies and our path of spiritual development. In accordance with the information that was known to us, but which they decided to bring to you through Irina Podzorova regarding their plans, the Interstellar

Union Council for Contacts with Young Races has decided to increase the number of their physical contactees by 25%. I remind you that there are now just over 20,000 physical contactees on the entire planet Earth. This is both the Interstellar Union and the Galactic Federation of Light.

Of the 7 billion people on Earth, 20,000 have real physical contacts. The chip was installed in a slightly larger proportion of the population not for physical contacts, but for monitoring earthly civilization. In the area, maybe 75,000 chips were installed by the Interstellar Union, and about the same number by the Galactic Federation of Light. They had physical contact once in their lives, usually in childhood, then they switched to astral and mental contacts.

As for physical contactees, that is, those who have been in contact more often, more than once in their life (for a chip), then there are a little more than 20,000 of them who have physical contact with one frequency or another. And now we have decided to increase this figure by 25%.

But due to the fact that every person on Earth has a different degree of physical, psychological, moral, spiritual preparation for contacts, do not forget that we are talking about contact with other worlds, which in turn are an unknown area of cognition for you, so Moreover, in conditions of secrecy for other earthlings and for government and military structures, these contacts are conducted according to special rules. This was galactic news.

12:46 Contacting. How to become a physical contactee? Protection against low vibration contact.

Irina: (MidgasKaus) Now I will announce the conditions for what you should do if you want to get into physical contact. But not just to make physical contact, but to become a physical contactor of an alien civilization.

Maxim: Yes, before Irina gives you a contact now, I will say honestly and frankly that contacting is a huge amount of work, which requires a huge amount of energy, almost all the time. In practice, this is your

task in life. Therefore, before choosing the path of a contactee, think carefully, ask your Higher Self - do you need this? Thank you!

Irina: Yes, Maxim said it correctly. This is a very serious decision that may change not only your life, but also the lives of those who live near you. Because when physical contact occurs with a person, it usually affects his worldview, attitude towards others, and even his lifestyle, which cannot but affect the entire family as a whole.

I remind you that we are now talking about physical contacts, not astral ones. Unlike astral and mental contacts, hiding physical contacts from your relatives and friends is much more difficult, even purely psychologically.

Now MidgasCaus reminds us that we are talking about those contacts that preserve memory. Sometimes they erase the memory and release the contactee, sometimes at his request, when he understands that he cannot remain silent in the environment where he is, and does not want certain consequences to occur in the form of a change in attitude towards him. Such requests are often received by curators - employees of the Interstellar Union.

(MidgasKaus) As for contactees. Conscious physical contactees are those who have retained the memory of physical contacts, like Irina Podzorova, and those who can remember and talk about it after the contact.

If you retain your memory, you need to understand that it will be difficult to resist talking about this event in the environment where you are, even if now you think that this is not so. But when you visit a spaceship that in a few minutes will take you to the other end of the Galaxy and bring you back, especially if you have not flown before and are not used to it, then it will be quite difficult to resist delight. Especially during the first year, the contactee experiences, so to speak, euphoria. Then, of course, the person more or less gets used to the contacts.

So, if you do decide despite this, being a physical contactee is a big decision. You need to go through several stages before this event.

The first and most important is the stage of coordinating your decision with your Higher Self. You are an embodied part of the Spirit, 30% of the Divine essence, which is embodied in the body. Making a decision about physical contact without the Higher Self will not work, because the Higher Self is you yourself in the Spiritual world. Therefore, it is necessary to consciously talk to this part in the Spiritual world. The first thing is to ask a question.

(Irina) Now he is giving instructions on what you need to do in order to become a physical contactee, if, of course, this is possible and your vibrations are suitable.

(MidgasKaus) The conditions for physical contact are changing in that the initiative can come not only from aliens, when they fly to earthlings according to their vibrations, according to their agreement in the Spiritual World on contact, as was the case before. Now the earthling himself can become the initiator of this contact, that is, declare himself, declare his desire. How to do it?

The first is to connect with your Higher Self, with your Spiritual Self, with your inner Light. Naturally, first, even before requesting physical contact, you need to find out the goals of your incarnation. You should already know this by the time you announce your desire to become a contactee.

You need to know the purpose of your incarnation and whether you are fulfilling your purpose. If the answer comes that you are not doing it, then ask what is stopping you from doing it? We call this “figuring out the goals of your purpose.”

Second, if you decide to apply to become a physical contactee, then contact your Higher Self. Ask it a question: are you already a contactee?

There are a lot of contactees on Earth on the astral and mental level who are not aware of their contact. That is, they don’t call it contact because they don’t understand what’s happening. They were not taught at school or by their parents to communicate mentally. There

are also those people who have already been in physical contact, but for various reasons, including at their request, the physical memory of this was erased from their brain. But the Higher Self knows about this. In short, the second step is to ask your Higher Self: “Am I already a contactee?”

Further - depending on the answers. If you are a contactee, then check with your Higher Self: “Who is the contact with - humanoids, plasmoids, the Spiritual world? How long has this contact been going on? And for what purpose was it installed? Having received this information, you ask your Higher Self the following question: “Can I become a physical contactee for alien civilizations?” Just any civilizations of alien origin. If the answer comes from the Higher Self: “Yes,” be sure to clarify: “Does this correspond to the purpose of my incarnation?” That is, so that you are not just suitable as a contactee, but so that this does not interfere with the realization of your other goals, if suddenly the goal of physical contact is not included in your life goals.

The fact is that Spirits are born on Earth who have a different path. Spirits are also born, whose life task includes physical contact with other worlds (civilizations). As soon as you receive a positive response from your Higher Self to the question: “Is physical contact appropriate for your task?” - you ask the following question: “Higher Self, which civilization or race known to me am I most suitable in vibration for physical contact?” If this race is known to you, then an answer will come, or an image will come, or a word known to you will come. If this word is not in your memory, they can simply show you the image of any alien. But it won’t be familiar to you - that’s it.

After the response from the Higher Self is received, you make a request to your Higher Self and say: “My Higher Self, I ask you to invite in the astral body a representative of the civilization to which I am suitable for physical contact so that I can communicate with him.” talk and agree on this contact.” That is, you, through the Higher Self, first invite a representative of this planet in the astral body.

I remind you that your Higher Self is in the Spiritual world, just like the Higher Self of those Spirits who are embodied on other planets. That is why in the Spiritual world all Spirits, all Higher Selves, all disembodied parts of spiritual entities have communication with each other. They

have the ability to instantly transmit your request, your wish to each other not through the usual, even the fastest material (cosmic) connection, but through the Spiritual world. This happens almost at the same moment as you asked, because in the Spiritual world time does not exist, as you know.

Chat question: How to connect with your Higher Self?

Irina: Okay, now.

(MidgasKaus) So, you invited a representative in the astral body through the Higher Self. As soon as he comes to you, you, being in an altered state of consciousness, that is, in a state of communication with the Higher Self, will immediately feel either a presence or an image - it depends on your sensitivity.

When turning to the Higher Self, you need to keep your eyes closed so as not to be distracted by the objects of the material world. And as soon as you call representatives through the Higher Self, they will hear you. According to the agreement with the Interstellar Union, the Galactic Federation of Light, any free representative will send his phantom, or he will come up in the astral body in order to talk with you about your physical contact. Now they will do this because this is an agreement with the Interstellar Union Commission.

As soon as you feel or see the image of the astral body of a representative of another planet, then greet him out loud in your own words, thank him for coming. And say that you want to become a physical contactor of his planet. Also ask his name. At the same time, the name you hear may be familiar to you, or maybe you will just hear a set of sounds. Both are normal, because in mental images information is transmitted only through your memory, through your brain. In any case, the sounds that he will transmit to you, and it happens that they do not know the Russian language at all, and you, naturally, do not know it, communication occurs, as we say, telepathically, through thoughts. Since you do not yet have a physical chip installed, you accept his answers through your spiritual channel.

The spiritual channel passes through all structures of your aura,

including the mental, astral, and etheric bodies. And thanks to this, you will hear his name, the name of the planet the way you perceive it. But, nevertheless, be sure to remember, or better yet, write down the name and planet of the person who came to you. Because then you can forget it, and in the future it will complicate contact.

Dear friends, I remind you once again that before you even start a conversation with aliens about physical contact, I ask you to carefully read the conditions for physical contactees, which are posted in our groups and social networks.

Maxim: On our website, in the VKontakte group, there are conditions for physical contactees. Before you take rash actions and steps, be sure to read them.

Irina: (MidgasCaus) Yes, you need to read the conditions for physical contacts. And decide for yourself, and also ask your Higher Self, how much you meet all these conditions. It is very important! Because before making physical contact with you, representatives of alien civilizations will scan you.

So, as soon as a representative of this planet, which is most suitable for you in terms of vibrations, came to you in your astral body, you thanked him and sent him the Light of your Love.

The light of your Love is the highest vibrational energy that low vibrational aliens cannot accept. They leave her. And high-vibration aliens, that is, kind, bright personalities, accept it and send it back to you. This is about checking who came to you, an alien or some kind of plasmoid with negative intentions under its guise. That is, to check means to send the Light of Love.

Maxim: Or a low-vibration spiritual entity.

Irina: (MidgasKaus) Yes, or a low-vibration spiritual entity that is not embodied at all and simply decided, upon hearing your desire, for example, to make a joke on you. It happens. Yes, they find it funny when people believe they are aliens. He can accept his image, and to

distinguish, send the Light of Love. And see what happens to this image, and what you feel: a response to the message or not.

So, you have sent the Light of Love, made sure that this is a highly spiritual entity, call by name and tell her: “I am familiar with the conditions for physical contactees, which were transmitted through the contactee of the Interstellar Union, Irina Podzorova. I believe that I fully meet these conditions. I am ready for physical contact with your civilization. I decided to do this because I contacted my Higher Self, and it told me that your civilization suits me best in terms of vibrations.” You can say it in your own words, but the meaning should be exactly like this. That is, you explain why you invited this representative and that you want physical contact.

Then you say you agree. You must give informed consent. State your name and say: “I (state your name) give free and informed consent to physical contact with representatives of the civilization that has become known to you.” If you know the name of the planet, say planet. If the name of a constellation or star is known, for example, Sirius, Vega, Lyra, Pleiades, Cassiopeia, then it is simply the civilization of Lyra, Pleiades, etc. You can just name a group of civilizations. For the Spiritual world this name is enough. You must give informed consent. This is when the representative comes, that is, do it in front of him so that he can hear.

“I (state my name) give free and informed consent to physical contact with representatives of civilization (name which).” You name the deadline. For example, for 1 year, for 5 years or until the end of incarnation - as you already feel. This also must be done, because if you do not do this, then the default deadline is until the end of the incarnation. This is especially true not even for extraterrestrials, but for spiritual entities - your Angels, mentors, who will confirm your consent for spiritual mentors in the Spiritual world of these aliens. They also have their own mentors (consultants) who embodied them in bodies.

You give this consent not so much for the aliens, but for the Angels, your mentors, who will see that your free will is not violated, and you do it completely freely and consciously. And, naturally, you give this consent to your Heavenly Father - our God in order to show that those who will come into contact with you fully respect your free will.

And as soon as you say: “I give conscious consent to contact, for such and such a period, with such and such a civilization,” be sure to name: “for the purposes of (name the goal),” here you already name it as you feel. For example, you can call it: for the purpose of spiritual development, spiritual evolution, or helping the people of planet Earth in this and that. You must name the purpose for which you generally want this physical contact.

Goals related to the fact that you are interested in looking at planets or interested in receiving treatment on alien devices will not be suitable. The goal must be global, connected with our civilization. People with personal goals that do not belong to the so-called “incarnation goals” are most often not accepted as physical contactees. Because for your personal flights (if you are not ready, for example, to tell people about it), astral travel is most often considered sufficient. And the fact that you don’t know how to go to the Astral, so learn.

Physical contact is more serious than astral travel. You must understand that for this, the material resources of the Interstellar Union, the Galactic Federation of Light, are used. They must spend a certain amount of energy not only to arrive on Earth and to take you to another planet and bring you back. But also in order to shield the spacecraft so that it is not noticed in Earth’s orbit, in its atmosphere, near you, etc. They will have to choose a place, a time, and how exactly to shield the ship from radar. Lots of nuances.

You must understand that this must be a fairly serious reason, and not just “I want to see another planet.” You must also understand that this reason of yours will be voiced at the Contact Commission of the Interstellar Union, which will decide whether to accept your request or not.

So, you have given your consent.

Maxim: Okay, Arseny, now I’ll bring Irina some water. Since you see that Irina needs a drink, then I went for water.

Irina: Thank you! (Answer to a question from the chat) No, you can’t fly to them forever.

Maxim: Again, wanting forever?

Irina: Yes.

Maxim: No, guys, we will be incarnated here with these coronaviruses, governments, tasks that we have chosen for ourselves.

Irina, while you're drinking, I'm looking at the questions. And here I have a very interesting question. It was asked, but not voiced.

Irina: What question?

Maxim: Arseny, I already gave you water. Everything is fine.

Irina: Thank you!

Maxim: You see what a caring subscriber you have, Arseny.

Irina: Arseny, thank you! And what's the question?

37:16 Contact with the Higher Self and enlightenment. The purpose of the incarnation of the Spirit on Earth.

Maxim: A person cannot communicate with his Higher Self, but really wants to become a contactee, is this possible?

Irina: Why can’t she communicate?

Maxim: Maybe he just doesn’t know how to do it. A person does not know how to communicate with his Higher Self, but really wants to make contact. Maybe we should invite him to our school to learn how to communicate with the Higher Self?

Irina: MidgasCaus told me about it before. Now LiScioni is answering.

(LiScioni) The whole point is, our dear viewer, dear participant in the Cassiopeia project, that if you cannot make contact with your Higher Self, then physical contact with you will be meaningless. Because the main goal of both the Cassiopeia project on Earth and your Spirit of incarnation is to teach you, as an embodied part, to be one. Not just to communicate, but to be one with your Higher Self, with your Spirit. This is called in your religions the revelation of the image of God in yourself, or in Eastern religions - enlightenment.

And if you cannot now communicate with your Higher Self, then contacts with aliens will not help you with this. Rather, they may even distract you from working on yourself, because you will be fascinated by the topic of space flights, etc. You may be distracted from your path of spiritual development and it will be more difficult to learn to communicate with your Higher Self.

First, you need to do a simpler thing, that is, learn to communicate with your Higher Self. This is a necessary measure that was not introduced by us. The fact is that representatives of the Spiritual World from the Higher Angelic Hierarchy, with whom I communicate, and MidgasCaus, and representatives of the Interstellar Union Commission, strongly do not recommend that we contact people who do not pay attention to developing the ability to communicate with their Spirit.

Maxim: Vladimir just gave a link to Proza.ru, where there is an article “How to communicate with your Higher Self.” Look in the chat to see who missed it. Volodya Goldstein, thank you, dear, for providing a link to this wonderful article.

40:34 The influence of the state of a person’s physical body on contact. The concept of "young race". Preparing for the first physical contact.

Irina: (LiShioni) Now about health. I'll explain now. This means that first you carefully read the conditions of contact again, asked yourself and your Higher Self: do you meet these conditions? Only then ask about physical contact and, having received approval from the Higher

Self, as I already said, invite a representative in the astral body.

As soon as the representative arrived and you gave him conscious consent to contact, you explained for how long and for what purpose you need it. After this, you consent to scanning. You call him by name and say: “I give you consent to scan my aura. Please check if I am energetically suitable for you to contact.” Your Higher Self has said that they are suitable for you to contact. Now let him check the state of your aura and give his opinion. But usually here the opinions of the Higher Self and your future possible curator coincide.

Perhaps he will say that you need to somehow work on your aura and chakras, get rid of some blocks - this is quite normal. Because coming into physical contact with an aura damaged in any way can be dangerous to your health. Moreover, representatives of aliens, since they have completely different auras, have a larger number of chakras and layers of the aura. And from this, contact with an aura that has severe damage or blocks can cause an exacerbation, for example, of your physical diseases, which all representatives of alien civilizations are well aware of. And even if you agree to this, but something happens or happens to your health, those curators who agreed to this will be responsible.

Maxim: Guys, I also have a big request. In order not to miss the “I Was on Mars” broadcast, which will be next week, you need to click on the “bell” and “subscribe”. Subscribe to our channel in order to receive notifications about the filmed new three parts “I was on Mars”.

Plus, a huge request to everyone. If you like the information we convey, please give it a like. And we will immediately see how many people watch us and perceive our information. Due to this, we will be seen by other people who, perhaps, also want to become contactees, want to develop in their spirituality and become specialists in their field.

They ask me questions: “Maxim, please tell me about rheumatoid arthritis,” “I can’t get on the ship to Ashtar,” “I can’t get on astral travel.” We have opened a Wellness Center specifically for these purposes. For the problem of rheumatoid arthritis, we have wonderful equipment called a “bioenergy resonance bag.” I call this the “restorative chamber of Light.”

10-12 procedures, and you will run away from here (from our center) without any help. The link to the Wellness Center in Voronezh is below. We deal not only with rheumatoid arthritis, but also with various problems on the physical and spiritual level of people. Our Wellness Center is made especially for you. For those who are not contactees, energy practitioners, but who want to improve their health, well-being and energy state. Thank you!

Irina: (LiShioni) Further, if you have received consent from the alien representative who came to you regarding your physical contact, remember that he alone does not resolve such issues. I remind you once again that any physical contact with a representative of the Earth can only be with the approval, permission of the Interstellar Union Commission for Contacts with Young Races.

A race is considered young until armed conflicts between states cease on its planets and colonies. And until her spaceships, that is, not automatic probes, but spaceships with living humanoids on board, leave the boundaries of the star system.

Maxim: Interesting.

Irina: (LiShioni) And not only when they fly to another planet, but already leave the star system. Then this already comes out of the concept of “young race”.

Maxim: No, guys, in our Wellness Center, specifically on the equipment - this is not online, but offline wellness. You come to visit us. There is a place to accommodate you and test you on absolutely the latest equipment that will look at all your physical and energy problems. Now there is such equipment. Of course, it has been around for a long time, but not many people talk about it, many even hide it, it’s not profitable. I won't continue further. It’s simply not profitable to talk about the existence of such equipment, and there is no need to get tested.

Irina: (LiShioni) So, you received consent from the Higher Self, from that curator - the representative of the planet who came. Now you

mentally or out loud ask him to inform the Interstellar Union Commission on Contacts about your desire to become a contactee and about your consent, which you gave to the Interstellar Union Commission on Contacts. Be sure to ask him: “When is the next meeting of this contact commission?” Now they will be more often than once every three months, as was previously the case. How much is being resolved now, but in any case it will happen more often.

You will receive an idea with the date of this meeting. That is, the representative who comes will know about it. Be sure to write it down and say: “I give conscious consent to representatives of the contact commission of the Galactic Federation of Light and the Interstellar Union to scan me in the Astral Plane for my vibrational match for physical contacts.” There is a high probability that after your name and your intention are known to the contact commission, representatives of this commission will come to scan you in your astral bodies.

After this, calmly wait for the date that the representative in the astral body told you. When she comes, be sure to contact him again on this day, at most the next day, contact your Higher Self. Again invite for contact (as you did last time) this representative by name. Ask your Higher Self to invite him and ask him about the results of your application - the "will" as they call it. He will definitely tell you what decision has been made. If a positive decision is made, then ask to assign you a place and time for the first physical contact.

How quickly and when this contact will be assigned to you depends on the area where you live, for example. Because through the Astral the physical world is practically invisible. And in order to establish a place for physical contact, it is necessary to physically inspect this place from any hidden alien probes or ships from the orbit where you live, this will already be clear. When you ask for a contact location and time, please tell the representative who comes to you where you live. You name the locality, region. If he asks you again: “Where is it?” This may well be because in the Astral the geographical coordinates are not visible. There are no maps there either. Astral (astral world) is a world parallel to the physical. A representative who came to you in the astral body, for example, may say: “Tell me more precisely.” Therefore, be prepared to tell him the geographic coordinates of your locality, which you can always find on the Internet. This may be important.

Next, ask him the question: “When will you have your first physical contact, time and place?” Usually they need several days for preparation, that is, for them to inspect this area from orbit, for example, or with an alien probe and select a place. He will tell you how many days you need to prepare. And when these days pass, you will find out everything yourself - he will come to you in the astral body and name the place. Usually they show the place (path) with images. I just know how they assign physical contact. They show where your home is and the contact location, usually at the top, like a map. And from there they mentally show with a dotted line how to get through. This is their custom.

Maxim: This is generally accepted, but for each person the contact can be special. These can be mental images. Perhaps these are images given in dreams, in the Astral Plane and much more. Each person will have their own contact.

Irina: (LiShioni) If this image is familiar to you, and you understand what place we are talking about, thank him and ask what day is assigned and what time of day. Usually scheduled for the evening, of course. But your time may be different. I don't know where you live or what your conditions will be.

If they show an image that is unfamiliar to you, for example, in some clearing in the forest, and you don’t know it and don’t understand what they’re talking about, say so, in no case do you need to say that you understand if this is wrong. Because they can come for you, but you won’t be there. And then they may refuse to contact you at all, since you didn’t show up.

Therefore, be sure to check where it is and how to get there from your home. Once this is clear to you, thank them. And during the time that remains for you before physical contact, it is advisable to visit there. Go there first yourself, without contact, to see where it is in order to quickly find this place. Do not take anyone with you under any circumstances. And in general, don’t tell anyone that you have an appointment until it happens.

Maxim: They correctly write in the chat: “The Order of Six” will also be recruiting its contactees. Therefore, it is your personal choice with

whom to contact.

Irina: If they are given permission for physical contact specifically for research purposes, of course, they will take contactees, like any representatives of the Universe and all galaxies. We have curators from other galaxies, and these are from our Galaxy. Naturally, they will also take permission from Pikran (Burkhad).

54:48 Physical contacts in winter.

Maxim: They ask: “Isn’t physical contact now prohibited in winter?”

Irina: (LiSioni) You know, it depends on the type of ship. The ship that Kirchiton had could leave footprints in the snow and be visible as evidence of physical contact. On such ships it was really impossible to have contact in winter.

But there are other forms of ships, they are shielded by completely different fields that will leave nothing behind. Even if they land on the snow, after they fly away, they will direct the energy field to this place, and everything there will remain in its original form. There are these types of ships, they are usually large, with powerful generators. But not like the one Kirchiton had for a contactee, that is, not a passenger ship, for example, for tourists, but for one or two people.

Maxim: Olenka, they don’t provide evidence of contacts. This has already been tested for thousands of years - you cannot give evidence, otherwise we will then stop talking to you.

56:23 Health center “Cassiopeia”.

Maxim: You ask: “Where is our Center?” The health center is located in Voronezh, but there are branches in Omsk, Novosibirsk, St. Petersburg, and Moscow. Visit our website. The link to it is below, under this video. There you will find all the centers that operate and see what procedures you can undergo.

You are asking about equipment that can help bring you to the Astral. Yes, we have this equipment. I already called it - this is a magnetic resonance chamber of Light. You fit into it, the magnetic field specially envelops you, and you easily go into the Astral, leaving your physical body, which begins to regenerate and recover.

Plus, we are now using one of the bioenergy massagers in order to bring a person to the Higher Self. You can find out what this looks like only by personally visiting the bioenergy massager and people who have already been trained in this particular technique.

Guys, call the Wellness Center, find out, sign up. The phone number for recording is under this video. Administrator Tatyana is there, she will tell you when the Center is open. And if you want to find out about other centers, go to our website, see what centers are in your city, and call them. Thank you.

57:57 Food and human vibrations.

Maxim: Irina, people ask: “Can food lower a person’s vibrations for his spiritual development?”

Irina: No. And no increase either.

Maxim: No food?

Irina: None.

Maxim: There is a belief that meat lowers a person’s vibrations and prevents normal spiritual development, is this true?

Irina: (LiShioni) I want to clarify that no food lowers or increases vibration, provided that a person treats it neutrally, that is, simply eats it like food. If he begins to attach some kind of spiritual meaning to it, then the food acquires those spiritual vibrations and the spiritual meaning that is given to the person who eats it.

Man is a rational, thinking, feeling being. He is able to charge with his vital energy any food he holds in his hands, eats, and even any water or drink he drinks.

Maxim: Volodya, thank you for the link to the site in the chat.

Irina: (LiShioni) If a person counts, thinks, believes - we call this “creating an image”, holding food in his hands or any drink, and if he creates a mental image that his vibrations will decrease or increase because he is eat it, that's what will happen. Because he will charge this food, this material substance with his spiritual vibrations. And he will receive them.

Maxim: Yes. Thank you, Irish.

59:37 The principle of treatment at the Cassiopeia Center.

Maxim: Is it possible to cure multiple sclerosis using our equipment? Guys, firstly, in order to understand what is happening to you, you need to determine the spiritual cause of the disease. And find out from your Higher Self whether you can even recover from this disease.

We will help you harmonize and restore, find out the spiritual cause of your illness. We will do everything that is required of us so that you can continue to recover. There are no incurable diseases. There are irrecoverable people. It all depends on your faith, desire and work on yourself.

1:00:16 Age for physical contact.

Irina: A very good question: “What is the age for physical contact?”

(LiScioni) Representatives of the Interstellar Union and the Galactic Federation of Light discussed this matter a lot. We came to the general opinion that after 18 years a person can independently make physical contact, having fulfilled the conditions that I have just mentioned.

If this person is under 18 years of age, but nevertheless wants to be a physical contactee, naturally, this is possible. But according to the general decision of the Galactic Federation of Light and the Interstellar Union, this should happen not only with the consent of the parents, but so that he informs them of this decision. And so that they are not opponents of these contacts. We can take the child into contact anyway, but this will only complicate his life. In many cases this is what happens. It happens that he matches his vibrations, we fly to him, show him the Galaxy, and he starts telling his parents about it. If they resist, then we can complicate his relationship with his parents in his own family, and even his entire future life. We can greatly disrupt the foundations of this family. So we decided not to do that. He will have to wait until he is 18 years old.

Maxim: Great.

1:01:49 Health contraindications for physical contact. Age of the contactee.

Maxim: Guys, you ask the question: “Where are the bases on Lake Baikal?” Now I'll tell you a little secret. In those 3 parts of the video “I was on Mars,” Irina gives a description of these bases on the map, which are located on Lake Baikal. There are two bases there, one Tikhtian. Irin, what is the other one?

Irina: General Pleiadian.

Maxim: Common Pleiadian base. Well, Irin, we have very little time left.

Irina: (LiShioni) More about health, with which diseases they definitely won’t allow physical contact. First of all, these are diseases of the allergic spectrum. Those people who have allergies, even in the mildest form, to any earthly product, substance or anything else, have health contraindications to any contact. Because there is no way to predict how the body will behave when it encounters inhaled, for example, particles of substances alien to its planet. Its immunological reactivity of the substance is greatly altered, which is why allergic reactions occur. In this case, contact may be dangerous.

What other diseases are contraindications? These are diseases associated with a person’s serious condition: a recent myocardial infarction, that is, less than a year ago, a stroke that had consequences for health. Because the first year after a stroke, the vessels in the brain are very fragile, and the slightest change in any gravitational field can cause it to happen again. And not even on the ship, but later. Is it dangerous.

A heart attack is the same thing associated with the heart. Conditions that require constant medication, such as diabetes, epilepsy. That is, when a person must constantly monitor his condition with medications. Of course he can take them with him on the ship. But due to the fact that he will be in other fields (in fields of other energy), his aura will gradually change, the effect of drugs may change unpredictably, etc. This can also be dangerous.

Also a contraindication is kidney failure, when a person requires hemodialysis to cleanse the blood. The impact of a ship's power plants can also be harmful, very dangerous.

Liver failure. Also contraindicated: visual and hearing impairment, because this is associated not only with the state of the body’s receptors, but also with the state of the brain, which cannot recognize signals. And there is a possibility that when the physical bodies of aliens are exposed to brain radiation, this will all intensify and transform into another form.

The person must be relatively healthy. At least not to be in a condition in which he is constantly being monitored by doctors.

It is also forbidden to take people if they have reduced immunity, because there are microorganisms on other planets. Of course, they cannot adapt to live in your bodies, but this is only if your immunity is normal. That is, what we get during contacts, we bring to other planets, etc. If you inhale any of our microbes or viruses, then your immunity in the lungs and respiratory tract will cope with it, because our microbes are not adapted to your body.

But in the case of reduced immunity, this mechanism breaks down, and an unexpected allergic reaction may occur, exacerbation of your own chronic infectious diseases, for example. They do not use devices for physical healing of earthlings with reduced immunity. That's not why they're in contact. And the physical healing of an earthling is proof.

I want to say right now that no evidence will be given if anyone hopes to fly for this. This is illegal. They have a law - not to give physical evidence of contact. The curator who allows this will be removed - that’s the rule.

What is reduced immunity? What are the criteria? Typically, reduced immunity is considered if you get colds, acute respiratory infections, acute flu, etc. very often, more than 4 times a year. If you have an exacerbation: furunculosis, arthritis, myocarditis. That is, a constant exacerbation of any chronic infections that the immune system cannot effectively fight, and you do not treat them. With these conditions, physical contact will also be prohibited.

Your condition of the brain, kidneys, liver, hormonal system, weight fluctuations - this is not so important. This does not affect the contact in any way. Just what I listed.

Maxim: Thank you very much! Guys, once again I want to thank everyone who is with us on the live broadcasts, who asks these questions. Once again I want to ask you, please, do not fall for scams when they tell you that we are imprisoning some entities, making some kind of attachments, bindings.

Please take me for at least one such drying session so that I too can be spared from this. I'm telling you seriously - it will be just a show. Because if you really visited us, if you really studied with us, or attended appointments with specialists. If someone tells you that they will rid you of those entities that we have hooked, it means that you just stupidly have money left. Therefore, do not be fooled - you are being scammed. Please hear me!

Our project does not plant anything anywhere, does not make any additions or attachments. We tell people what Light and Love are. We

tell the truth that is reality for us. We explain to people that everything begins with the Light, and not with the reptilians, and much more. So thank you so much again!

Irina: Thank you everyone! So now I have given the information.

Maxim: They said from the age of 18. And up to what age?

Irina: It doesn't matter at all. If he complies with the conditions regarding his health and is suitable in all other cases, then he will be accepted at any age. It must be suitable not only in all physical parameters, but also in psychological and spiritual ones. All of them are listed in the conditions for contact.

Maxim: Again the question: "What is she smoking?" If we smoke, it definitely doesn't grow here. It grows in Burkhad.

Irina: What is she smoking?

Maxim: Yes, he says: "What is she smoking?" Guys, all negative, schizoid people, you can find a project that will suit you. Irina does not smoke or drink. I don't smoke, I drink very rarely. And lately I've already forgotten when I drank. Therefore, we wish everyone good health!

Irina: "Give me a Pleiadian."

Maxim: Pleiadians? By the way, about vaccines. Guys, it's just that for the first time they refused to film how we were going to get vaccinated. Therefore, we moved the vaccination to where we will be allowed to film.

Irina: Are we going tomorrow?

Maxim: Yes.

Irina: We will go to get vaccinated tomorrow.

Maxim: Yes, tomorrow we are going to get vaccinated.

Irina: Look what they write to us.

Maxim: “In Burkhad, selection is at its best.” Yes, probably, selection in Burkhad is at its best. Everything is fine. But, unfortunately, there are no supplies to Earth.

1:11:20 Contacting I. Podzorova. Duration of physical contact.

Irina: Indeed, a good question: why have I been in contact since I was 13 years old? Especially if my mother was against it.

The whole point, dear friends, is that I should start making contact at the age of 13, and even if my mother was against it, it was my individual agreement back in the Spiritual world.

Maxim: You write about some 50% and kickbacks on my behalf. Guys, you are being misinformed! If you want to find out how to work with the Cassiopeia project after studying with us, you can call me personally and find out everything. I'll tell you everything. I have nothing to hide.

Irina: “Burkhad grass.”

Maxim: **“** Irin, are there toilets on the ship?”

Irina: Perhaps, of course, they will do it for you. I want to tell you that the time of physical contact should not exceed 2 hours.

And one more thing: this is, of course, your business, your decision, but before you talk, or after you have already agreed on the first physical contact, if you live with someone, with your family, for

example, I ask You still need to inform them about this. I feel.

This can truly change your family's life. You do not know what time you will be assigned for contact. I know it from myself. I already went for physical contact and returned very late, some questions began to arise. At the same time, my relatives knew that I was making physical contact with aliens. And if your loved ones don’t know, and you return in an elated state from having just been to the Pleiades, I don’t know what they will think. I think it's better for you to talk frankly with your relatives. It doesn't matter whether they believe it or not, just tell them about your decision that you are watching Cassiopeia and have decided to become a physical contactee.

Maxim: Yes, and I ask you, please do not impose us on anyone. Because many people really think that we are schizoid and have problems with our heads, etc. Whoever needs it will definitely come to this. Anyone who needs it will definitely come to it.

Regarding injections, poison and everything else, we have our own opinion. To make it clear to everyone how much we trust our interstellar friends. We are going to get this vaccination so that you all can see what will happen to us. Please imagine that this will be an experiment for everyone. I completely trust our interstellar friends, so I have no fear about going to do it.

Irina: If you are afraid to walk in the forest at night, then how will you walk on another planet, I can’t understand?

Maxim: Yes, how will they communicate with aliens then? They will see, and they will have to change diapers.

Irina: What if he is afraid to walk in the forest?

Maxim: For example, I’m not afraid of anything: neither devils, nor plasmoids. I just understand how the world works. Therefore, I am in an understanding of the structure of the universe, who I am, and that nothing bad can be done to me without myself.

1:14:46 Bad habits, mental illness and physical contact. Maxim Rusan – contactee.

Irina: (LiSioni) By the way, a very important condition for contact. In addition to all the diseases that we have listed, this is due to bad habits. People ask me about this too. Contact is strongly discouraged; one might even say that it is forbidden to come in an altered state of consciousness under any substances, including alcohol. It is advisable to be sober.

Regarding mental illness. The question is asked here too. You see, the Interstellar Union has its own understanding of medicine. Therefore, the diagnoses that our earthly doctors make: psychological, mental illnesses, formally this is not a reason for refusing contact, even physical. A person must meet all the criteria that I listed earlier, and which exist, including in the conditions of physical contactors. And, of course, if it corresponds to his life task.

Maxim: Yes. And I want to repeat again: we will have a simply unrealistic conference at Lake Baikal. To be honest, I'm looking forward to this retreat myself.

Irina: "For courage."

Maxim: What? Ah, for courage.

I myself am looking forward to a retreat on Lake Baikal. We will have very interesting meetings and conferences there. Many thanks to the sanatorium, which allocated us 10 more places in each stream. Guys, there are not many places left, so write and make a reservation. These places will sell out quickly.

Question from the chat: "Maxim, have you been to the Astral?"

Maxim: Yes, I was both in the Astral and in the mental. I've been to a lot of places. Guys, I am a contactee. Unfortunately, or fortunately, not a physical contactee. Next to me there is a fairly well-built physical contactor, which has chips so that she does not forget and her memory

is not erased, and also correctly transmits information from these contacts. So I don't need it.

Irina: No, if you are denied physical contact, then no one will cancel your mental-astral contact. These are completely different things.

Maxim: Guys, we are not forcing anyone to get vaccinated. It's your personal choice. For the sake of the experiment, we want to show you how we trust our interstellar friends, the same MidgasCaus. In any case, tomorrow we are going to get vaccinated and will tell you how we feel. We will film it on video so that it is clear that they were really made. And we will show it to you.

Be sure to look out for the three parts of “I Was on Mars.” The information there is simply bombastic. When I heard all this, my hair stood on end, what Irina was doing there, where she was flying and what she was looking at. All this information was also verified with the help of sources. She could not have known about these sources. So watch the three parts of “I Was on Mars.”

Guys, I hugged everyone. I'm waiting for everyone at Baikal. By the way, in the near future Irina is flying to one of the Tikhtian bases on Lake Baikal. At the retreat she will talk about it, and you will be able to personally communicate with representatives of this base on Baikal. Accordingly, Lama Itigelov is the most wonderful thing that exists.

Irina: At least one kind person wrote: “God bless you for vaccination!” Thank you and accept!

Maxim: Thank you and accept. Tomorrow we will go, and then we will report everything. Guys, thank you all, see you again! Bye everyone! Thank you very much!

01 August 2021.

Conference participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms;

LiShioni is a representative of the planet Shimor, a sociologist, a specialist in the astral world and its interactions with the material world.

#318 Physical flight to Mars! Traveling across the surface of the planet. Secret rovers of the Earth. Part 1

https://blog.cassiopeia.center/fizicheskij-polet-na-mars-chast-1
https://www.youtube.com/watch?v=s22CeSKbhiM

00:20 Introduction of participants.

Vladimir: Dear friends, I greet you. Now we have an exciting moment, it is so spontaneous. This conversation with Irina Podzorova was not planned for any special time. Because quite recently Irina came into her house after she and Maxim (we know what we are talking about) arrived from the forest, where she was brought back after physical contact, after flying on a ship with Kirchiton to the planet Mars.

For those who don't know, my name is Vladimir Goldshtein, in front of us is contactor Irina Podzorova (I decided to introduce it to you after all). I don't know any details at all. I only know that the administrators of the Cassiopeia project, at the request of the Interstellar Union, prepared questions that Irina was supposed to ask during her visit to Mars.

And we had a specific purpose for visiting Mars. I'll tell you the goal now. We wanted Irina to be shown the ruins of colonies that existed 12 thousand years ago, even before the attack of the planet Selbet on Mars. So that she could look at it all, ask questions about what Mars was like at that time, clarify a number of details related to this war, with the destruction of the Earth's colonies.

In addition, we asked Irina and Kirchiton through her to be taken to the place where one of the earth's artificial rovers is located. And so that she could provide us with some details. We also asked them to go to

the site of the famous Martian Sphinx, and we realized whether it was true or not.

What came of it all, I don’t know anything yet; I didn’t ask Irina in detail. We are now making a completely spontaneous recording, and I will find out everything together with you. Irina just came home and changed clothes. And now we are talking with Irina on the Voronezh night and on my Chicago evening.

Now you understand what is happening now. And I give the floor to Irina Podzorova.

Ira, hello, with a soft landing on your native Earth after your flight to Mars!

Irina : Thank you very much. Hello, dear friends! Yes, indeed today I had another physical contact with Kirchiton. I can still see these Martian sands and mountains, the riverbeds along which we walked. Today he took me around some craters.

Vladimir: So, you had a flight to Mars on the Kirchiton ship, protected from visual and other observations from Earth. And then please tell me more.

02:59 Protection of alien ships.

Irina: Yes. On a protected ship, it is not visible from Earth. It forms a field that reflects protective circular light waves, i.e. in its place the person will see an empty space. Recently, a law was passed: contactees should only be transported on such ships.

I'll read what's written here first. I wrote everything down in a notebook.

Vladimir: Yes, of course, please. And at the same time, tell us how the flight went, if possible, along with your notes.

Irina: I met with Kirchiton. He said, "We're going to Mars." There was no weightlessness there. He has artificial gravity installed on the ship.

03:48 Why doesn't the phone work on Kirchiton's ship?

Irina: While we were flying, I read him the questions that the administrators sent me. I wrote them down in a notebook in advance to take with me. Here they are. My phone won't turn on there.

I already told him that I won't take pictures, turn on the phone so I can read the questions. You can check later that I didn't take any photographs. He says: "It's not about the photographs, I believe you. It's just that there are incompatible electromagnetic fields here that won't turn on the battery." I say: "I wrote it down in a notebook."

04:30 Flight to Mars.

Vladimir: How long did you fly to Mars? Was it a planetary drive?

Irina: Yes, it was a planetary engine. Less than 10 minutes, about 6–7.

Vladimir: Was there weightlessness or not?

Irina: No. He has artificial gravity installed.

Vladimir: And so you flew.

Irina: First, when we were flying, I sat down on a chair, took a notebook out of my purse and read. I tell Kirchiton: "I have questions." And while we were flying, I read it to him. He suggested that I first write the answers, and then go to Mars.

Vladimir: Did you see through the windows, was Mars visible?

Irina: I didn't look out. He said: "We are already on Mars, but I suggest you write first, because writing takes longer. Judging by the questions, I will answer you quickly, but you need to write it down."

Vladimir: Okay, then read the questions and his answers that you wrote down. Let's do it this way.

05:50 Mars before the war, its flora and fauna.

Irina: There was such a question, the first one. What was the flora and fauna of Mars like? Characteristics of the planet before the war.

He told me this: "Before the war, Mars had 3 large oceans and 7 continents. Many rivers and lakes. 200 thousand years ago flora and fauna of many species were brought there. Coniferous trees predominated, and buckwheat, corn and wheat grew abundantly. There were no weeds because wild grass seeds were not imported. There was fish in the reservoirs, there was salt water in the rivers, mainly mackerel was found there in abundance. People brought horses, cows, donkeys and even cats with them. Among the wild fauna, deer, steppe wolves and jerboas were abundant.

Before the war, the planet Mars was located at a distance of 170 million km from the Sun."

But, it's like an orbit.

Vladimir: I see, I see **.**

Irina: The closest point to the Sun.

Vladimir: There was perigee. The closest point in the orbit was at this distance.

Irina: The Earth is at a distance of 130 million km from the Sun. And the Moon is a little more than 150 million km, almost on the site of the

modern Earth.

Vladimir: We will repeat for listeners who do not quite remember, the Moon was a separate planet that revolved in orbit around the Sun, like Earth and Mars. At that time it was a completely separate planet, not a satellite of the Earth at that time.

Irina: At that time, the climate on Mars was sharply continental. It was winter, especially cold at the poles. But the winter period did not exceed 4 earthly months out of the 15 that existed then. An earthly month is 30 days.

Vladimir: 15 months, where was the year? On Earth or on Mars?

Irina: On Mars.

Vladimir: On Mars, a year lasted 15 months. It's clear.

Irina: Strong winds blew, and droughts were not uncommon at the equator.

08:52 The population of Mars 12 thousand years ago. Construction of cities on Mars.

Irina: Next was the 2nd question. How many people and aliens lived on Mars before the war? Number and brief description of colonies, and how were they built?

Answer: “By the time of the war, the population of Mars, consisting of earthly settlers, reached a little more than 1 million 200 thousand people.”

Vladimir: 1 million 200 thousand earthlings lived on Mars then.

Irina: I remember that 20 thousand people were resettled 200

thousand years ago.

Vladimir: 20 thousand people were resettled 200 thousand years ago, and 12 thousand years ago the population increased and became 1 million 200 thousand, right?

Irina: Yes. There were 45 alien bases. And before the war, more than 5 thousand aliens and biorobots lived on them. The colonists settled in small towns, scattered mainly in the equatorial and temperate zones. There were more than 4 thousand such settlements, and many smaller settlements along the river banks. There were big rivers there.

Large cities were built with the help of aliens from local sandstone. This is a soft stone. And then people themselves built houses from overgrown trees and stones, skillfully turning them with tools donated by aliens.

They could carve a figurine out of stones, and when we walked around later, he showed it to me. There are such small details.

Vladimir : I see.

11:03 The city of Penfir is the capital of Mars.

Irina: Around mark 1 on the map.

Vladimir: I'll comment now. We asked Irina to print out a physical map of the surface of Mars, our map, which is depicted on Earth. And mark directly on the map those places on Mars where they were. This is the map, let's take a look. This is where they were.

Irina: Can you see it? I'll send you a photo later.

Vladimir: Can we raise it a little higher? Here's the mark. What's this?

Irina: In the area of mark 1 there was the capital of Mars, in the aboriginal language the city of Penfir.

Vladimir: Please show me the map again. So, here, where we have number 1, who understands.

Irina: It says “Schiaparelli”.

Vladimir: Schiaparelli are channels. Show me again, please. Probably, those who understand the surface of Mars will understand where our mark is approximately. We will show this map separately later.

Irina: Before the war there were 250 thousand inhabitants.

Vladimir: So, 250 thousand inhabitants lived in this capital, which was located on Mars.

Irina: First I told him, then I took out the cards and immediately showed him everything. He told me: “Mark here,” and began to talk about the capital, I took out a pen and marked it. He showed it to me, and then I wrote it. He was one of the first to be destroyed in this war.

Then he told me: “Also mark mark 2,” - this is a different sheet.

Vladimir: Another sheet of the map. We gave 2 sheets of paper to Irina so that the map would be large. So, where is mark 2? Here. Can I get the map closer to the camera? Closer to the south pole of Mars, as I understand it.

Irina: It’s written here, not far between some Ptolemy and Copernicus.

Vladimir: Expert astronomers probably understand what we are talking about. And what happened around this mark 2?

13:29 Battle between the Selbet landing force and the inhabitants of Mars .

Irina: In the area of mark 2 there was a battle between the Selbet troops and the residents of a small village. There you can find the remains of people and Selbet people, barely covered with sand.

Vladimir: That is. in this place, if we land an earthly vehicle there (we can show this point larger), earthly vehicles and rovers will be able to quite easily find the remains of this battle. Remains of aliens, incl. Selbetians, and some ruins, as well as something that would confirm that there was a battle between Selbetians and colonists. Right?

Irina: Yes.

Vladimir: I have a question: is it possible to provide exact coordinates in accordance with our coordinate grid of Mars?

Irina: Here it is drawn, I will send you a photo later.

Vladimir: We would like to have absolutely accurate coordinates. So that we can give our research scientists, for example Elon Musk, the exact coordinates of where earthly vehicles (today this is already real) that will get there, or other research groups on Earth sending artificial vehicles to Mars. right there you will find traces of this battle, lightly covered with a layer of Martian soil. Those. physically confirm what Irina is now telling us about.

Irina: Yes. He told me that he marked the points on the map that she gave him. I asked him the third question. By the way, I'll read it now.

15:10 Ruins and remains of a ship on Mars.

Irina: Mark on the map where the ruins are located, which can be easily detected by earthly devices. He already answered the 3rd question.

Vladimir: This was exactly the answer to the 3rd question. It's clear **.**

Irina: And he also gave one answer to the 3rd question. “Here, near the south pole, in the area of mark 3, it says “Schmidt” and some other small circle. In the area of \u200b\u200bmarker 3 there was a lake on the shore of which a Burkhadian ship defending Mars fell on the shore. 25 crew members were killed. It is a disk-shaped object with a diameter of about 50 m."

Vladimir: A disk-shaped object with a diameter of about 50 m.

Irina: I asked: “Why wasn’t it removed later? After all, the ship can be repaired, taken away, etc.” They said that they, the Burkhadians, could have pulled him out of there, but they specifically decided to leave him as a monument to the war. For the edification of descendants what happens from war.

Vladimir: Like a monument.

Irina: And then, it doesn’t stand on the surface. They didn't bother to pull him out of there.

Vladimir: How far is it from the surface? How easy is it to get?

Irina: He said that now it protrudes a little from the ground, there is still ice there. The ship shines, its lining is silvery metal. And this skin glistens in the sun, which can be seen when the snow cap of the south pole moves south.

Vladimir: I see, he opens it slightly. Those. you can notice it, and you don’t have to sit next to it, but from some kind of aircraft.

Irina: You can look at this area through a strong telescope, when it is daytime and there is no snow, you can see how the sun is reflected from it.

Vladimir: Great! I think our astronomers and scientists will be very interested to know this. And if after all this data that we tell them (perhaps we also find out the coordinates), they do not want to explore, it means that such scientists behave somehow strangely if they fundamentally do not want to pay attention to it, although they consider themselves researchers planet Mars. But we'll talk about this later.

Irina: Then he described another ruins. He told me to mark it on the map first, and then we flew there. And I walked on them there. Around mark 4 (*shows on the map*), in this little thing.

18:18 Flert Mountains and Hecate's dome on Mars.

Vladimir: What is written on this map? Any names?

Irina: Flert Mountains, Hecate's Dome. The Dome of Hecate is further away, the Flert Mountains are closer.

Vladimir: How are the mountains? Phlegra?

Irina: Flerta. We sat down there not far away. We walked along, there was a small opening there. They resemble high pyramids, 12 meters long. He told me that up to 15 meters.

Vladimir: Dear astronomers, Mars researchers! Irina, together with Kirchiton, on the ship of the Interstellar Union was in the place that on the earth's map of Mars is called the Flerta Mountains. This will probably tell you something. They were physically there. They became Martian and traveled on the surface of Mars. As I understand it, in spacesuits. Right?

Irina: Yes, of course. We wore spacesuits.

Then I said that it looked more like mountains. They look like they've crumbled, you can just see the triangular tops. They can still be mistaken for mountains.

19:38 Steam engines of Martians.

Irina: In the area of mark 4, more than 12 thousand years ago there was a large temple complex: many temples, all sorts of pyramids, etc., where people came on horses and steam engines. There was no gasoline or oil, because there were no hydrocarbon reserves there.

Vladimir: What did steam engines run on if there were no hydrocarbons?

Irina : There seemed to be firewood there.

Vladimir: Oh, it was wood after all. Those. steam locomotives, but without rails, which simply ran on the surface.

Irina: There were wheels, but not wooden, but something like plastic, which was given by aliens.

Vladimir: It's clear, this action took place 12 thousand years ago. Please tell me not to come back, did you see Kirchiton's ship from the outside? What does he look like?

20:42 Kirchiton ship.

Irina: This is no longer the same plate as it was before. She's a little bigger. Previously, it was 6 meters in diameter, but now it is 2 times larger, and is no longer gray, but shiny, like stainless steel pans.

Vladimir: Is this a disk?

Irina: Yes, disc-shaped, with a small dome.

Vladimir: How did it stand on the surface? On some supports?

Irina: Yes, she has 4 supports, dark in color, and at the ends of these supports there is an extension, like paws.

Vladimir: How did you get down? Along the ladder?

Irina: The ladder, it is not vertical from the hatch, but from the side of the plate, moves away at an angle so that it is convenient to go down.

Vladimir: Did you walk straight up the steps with your feet?

Irina: There, yes. And when he brought me from there, he simply sent me down the beam. He didn't sit on the ground.

Vladimir: Okay, now it's clear with Kirchiton's ship.

21:51 Temple complex on Mars.

Vladimir: Now we continue to describe the area. What was there? What was he showing in this place?

Irina: First I wrote down what was there.

In the area of mark 4 there was a large temple complex, where all the Martians came on horses and steam engines several times a year. There was a strong fight there. Everything around was burned out, but there are fragments of statues and ruins of pyramids. He showed me the statues. We approached and saw a square pedestal. I say: "Is everything like that here?" And he: "Even the stones melted here. They've lost their shape."

Vladimir: Ira, please tell me, if an earthly aircraft such as a Mars rover lands there (you were next to these statues), it will be able to clearly record with the help of its cameras that this is an artificial structure? You saw this, right?

Irina: Do you know what this reminds me of? There is a pedestal, and a woman stands on it, holding out her hand. And it was as if she had completely melted. Her face is not visible. This is definitely not a mountain.

Vladimir: What size, how tall is this statue?

Irina: At the very least, a two-story house.

Vladimir: Two-story house. If a Mars rover lands nearby and approaches it, or cameras are taken, especially video, then it will definitely be clear that this is something artificial. Right?

Irina: Yes.

23:24 Lighting while traveling.

Irina: When we were there, it was dark. He lit the lanterns. There was no Sun there. On the other side, when we were near the rover, there was the Sun.

Vladimir : There was no Sun there. Who directed the lanterns? Plate?

Irina: Yes. He took the remote control, such a square box. And when we were at a distance, the dish turned on the lights and shone behind us. These lanterns with white light were attached to the sides; they shone on us like spotlights.

Vladimir: He controlled these spotlights, they changed their position and illuminated you.

Irina: I changed it, then he went somewhere ahead of me. It's dark around, there are no lights. Desert everywhere. I see him walking ahead, I followed him.

It's easy to walk there. I probably weigh 40 kilograms, like a girl. She ran after him, then overtook him. He tells me: “Wait, look what’s here.” He had a flashlight in his hands and it began to shine.

Some kind of pile of stones. “Here, look what’s here. Come and have a look.” We were in spacesuits. We got there, I started fiddling around, and he was shining. And he says: “Pick it up.” And I picked up an oblong stone, it has a statuette, also of women.

We moved a little further. We walked, I don’t know how far we walked, and he said: “In a short time you can cover a greater distance because you walk faster.” We turned somewhere. When I turned around, the plate was no longer visible. Just a beam from her. I say: “Why is the beam so long? The plate is no longer visible, but here is such a beam?” And he says: “It extends behind us so that we can see.”

Vladimir: Once again I want to ask a question for researchers. If any artificial vehicle gets to Mars, or, moreover, astronauts fly in, if they get there (you felt all this with your hands), then in this place, right on the surface, they will definitely find traces of activity, intelligent life on Mars. The colonists left traces on Mars after the war right there.

26:15 Remains of the Tumesoutians on the surface of Mars.

Irina: He also showed me the skeletons. They are all broken already. There are white parts left from the bone.

Vladimir: Are they lying right on the surface?

Irina: Yes, they stick out there among the stones and are a little covered with sand, I saw them.

Vladimir: Were these skeletons of earthlings?

Irina: They are bigger. He said: “These are the Tumesoutians.”

Vladimir: The Tumesout people are probably higher. Did you feel any of this with your hands in the spacesuit?

Irina: Of course. I picked up this bone and looked. Then she put it on 2 stones so that it was noticeable. I think ours will find it. Then I say: “Kirkhiton, maybe I should take her home after all?” He looks at me and says: “No, I don’t think it’s worth it.”

Vladimir: Did you put it there in a visible place so that our devices would notice? I understand. We will also try to find the coordinates of this place more accurately. For now we know the name of the mountains where it was.

Irina: Yes, I say: “She’s not very heavy, I wonder how much she weighs?”

He says: “If on Earth, then probably 12 kilograms.”

I say: “Do such bones exist?” Kirchiton said that she was also petrified.

27:33 Traces on the surface of Mars.

Vladimir: Please tell me, you walked there, your traces were left on the surface, did you see the prints?

Irina: I know that this suit, when you walk, does not have prints like our shoes. The grooves just remain when you step on them, that's all.

Vladimir: Just holes. Yes, there are no such obvious traces of the sole. I understand.

28:05 Melted Martian pyramids.

Vladimir: Okay, what else did you see in this place?

Irina: We got there, he showed me that the headlights began to shine upward. He said they were pyramids. I walked up and touched the walls. “Something,” I say, “doesn’t look like there are bricks here.” They built them from bricks, from some blocks. They are somehow not visible. Our people might mistake these for mountains. He said they were melted and had triangular tops. They cast triangular shadows.

And surprisingly, when we were talking to him, we were in a protective suit, we heard each other, as if we were standing next to each other in a ship.

Vladimir: Did anyone survive in this place where you were, and did you ask? Did you manage to save anyone?

Irina: He told me more, I’ll read it now.

29:21 Rovers working on Mars from Earth.

Irina: He said that in addition to those rovers that are known, several countries have secretly launched them.

Vladimir: Please, more details from this place. Which countries, when?

Irina: There are now not 2, not 3, as earthlings say. He said that there are about 6 rovers working on Mars from different countries **.**

Vladimir: Which countries?

Irina: I didn’t specify the details. He simply told me that these were different countries that launched rovers on Mars. There is like a union of countries that launched something there

Vladimir: And these rovers are working there now, right? Are they in working order?

Irina: They work, but they are secret, they are not reported.

Vladimir: I will repeat. Dear friends, you just heard, and I am with you, according to Kirchiton, there are now 6 rovers working on Mars, some of which are secret, and launched in secret from the public. They are in working order, performing some kind of secret mission while on the planet Mars. Which countries and which unions – we don't know about this.

Irina: They are working, and he said that they are collecting some kind of scientific information. And he also said that the traces that he showed me were photographed by a rover from some country and sent to Earth, but he doesn't know where this information went.

Vladimir: But he didn't explain why these were secret missions? Why wasn't this talked about if these were just Mars research rovers?

Irina: He said that they were conducting some experiments there. Maybe they wanted to do some military experiments on Mars or something else. That's why they didn't report. But these devices are far from each other so that they would not notice each other.

Vladimir: These rovers, according to him, have obviously already discovered some traces, artifacts, and photographed some ruins. But no one knows about this, no one was told about it. Yes or no?

Irina: Yes. And he also said that, according to his data, these rovers on some waves maintain contact with the Earth. And those alien bases that are located on Mars sent there a probe that moves under the ground. He's like a mole. And this "mole" does not fly in the air so that it cannot be filmed. Of course, then you can erase everything from the camera, you can simply disable them, but they didn't do this, they are aliens. Therefore, they sent them underground closer to these rovers, and intercepted what photographs they were sending. And we managed to find out that they are secret, because the earthlings are looking for some place to make a base there.

Vladimir: But that's the secret! They are looking for a place to create a

base for earthlings on Mars now.

Irina: Yes. He said that he had not seen them himself, but had heard about them from reports. Pleiadian bases reported them. They have reports containing such news. Kirchiton didn't keep track of this, he's not particularly interested. He just hears about it, he hasn't flown to them, hasn't seen or studied these rovers. This is not his area of interest; what he heard is what he said.

Vladimir: How many of these secret rovers are there? We know that there are those that everyone knows about. How many are secret?

Irina: He said that the total number of employees is now 6.

Vladimir: So this total number also includes those who are officially on Mars?

Irina: Yes, and which ones are official. He said that there are secret ones that not everyone knows about. I say: "What's secret here?" Kirkhiton said that they were looking for something there, some place. And, moreover. hidden not so much from the public (his personal opinion), but from the army of another state.

Vladimir: I see. From other countries that they consider enemies. You and I can guess whose Mars rovers these are, but we won't do that now. But I want to say something else: we will need to understand, not in this conversation.

Irina: They filmed everything that was on Mars, but did not announce it to people. And again, Kirchiton assumes that these astronauts who are there are under the supervision of the military, and the military is not interested in admitting that there are aliens there.

Vladimir: Now. Just a second. You said that the astronauts are under the supervision of the military. Did you mean rovers, robotic probes?

Irina: Yes. These rovers were sent by space programs that work there

under the control of astronauts. Astronauts are not on Mars rovers, but on Earth. I mean the ones who create these things.

Vladimir: The group of researchers and engineers that automatically launched the Mars rover there is located on Earth, at the mission control center of different countries, and they control these Mars rovers. We're talking about this now. We are not talking about living earthlings who flew to Mars. Right?

Irina: I asked specifically: are there living earthlings in these rovers? Maybe there is somewhere, but we don't know? He said that these rovers did not record living people or organisms at all.

Vladimir: I realized that these are automatic devices that are secretly launched and conduct research. But my question is different, we will ask it later. Is there any connection here between our last conference about some secret programs associated with reptilians or someone else? And one more thing is that these Mars rovers were launched as part of the programs that we are always told about, that they agreed with the terrestrial governments, and perhaps this is somehow connected with the launch of these Mars rovers, we don't know.

This is a version for now. I'm just saying it out loud. Maybe I'm completely wrong here. We will find out this further.

Irina: He said that they were created using earthly technologies and do not surpass earthly technologies. Aliens would have been built on other technologies. And these were earthly technologies.

Vladimir: Here's a question. He did not explain whether the technologies used to create these secret Mars rovers are more advanced than those used to create the official Mars rovers that we know about?

Irina: He said that he himself had not seen a single Mars rover, he just heard in the reports of some Pleiadians **.**

Vladimir: So, we will talk about this with the Galactic Federation of

Light, with the Pleiadians, with Futissa, since they know more, then we will ask them to comment.

Now let's get back to your visit to Mars. So, what else did he show you in this place or further, then perhaps what did you write down? What happened next on this journey?

August 3, 2021

#319 Physical flight to Mars. Traveling across the surface of the planet. Secret rovers of the Earth. (Part 2)

https://blog.cassiopeia.center/fizicheskij-polet-na-mars-chast-2
https://www.youtube.com/watch?v=l3MNSZoEE4k

00:20 Evacuation from Mars 12,000 years ago.

Vladimir : So, what else did he show you in this place? Or let's move on, what did you write down, what happened next on this journey?

Irina : Next was the question: details of the evacuation from Mars, where were all the survivors taken, how many were there, and what was their fate? She said: "About two thousand people were rescued from Mars. Many had severe burns, concussion and numerous injuries. They were transported first to a base on the Moon. And after the Earth's condition stabilized, they offered to choose: either fly to Disara or to Earth. The majority chose the first option – to Disara and joined the Venusians who had previously been rescued from Venus."

Vladimir: We don't know exactly how many were chosen to go to Earth.

Irina: He needs to look this up in the reference book, he didn't take it with him.

Vladimir: I see. That is, now on Disara, it turns out, there are also descendants of those who were rescued from Venus, there are many more there, I understand. More earthlings were saved from the Venusian colonies. Of these two thousand, some part of those who were rescued from Mars. They flew away too. This means their

descendants now live on the planet Disaru.

01:44 Interstellar Union bases on Mars.

Irina: So, the next question: how many, what and where on the map are the Interstellar Union bases on Mars now?

There are currently 35 Interstellar Union bases on Mars.

Vladimir: 35 bases of the Interstellar Union are now located on Mars.

Irina: Their exact location can be revealed to Kirchiton only with the permission of the leadership of these bases.

Vladimir: I see.

Irina: He said that these are not ruins.

Vladimir: Operating bases, of course.

Irina: There are no bases on his planet there.

Vladimir: That is, there are no bases on the planet Daraal on Mars.

Irina: He said that there are bases of Selbet, Tashig, Burkhad, Disaru, Tikht and many other worlds. He listed several of them.

Vladimir: So they are still located under the surface of Mars, at some depth?

Irina: Yes.

Vladimir: I see. Fine.

02:55 Sphinx on Mars.

Irina: Next, comments on the Sphinx. Is it artificial? I asked him, he told me that this was not the Sphinx, but one of the hangars for spaceships at the Tumesout base, dilapidated and covered with sand.

Vladimir: Attention! This means where this so-called Sphinx is located (there is an image of it), we already know absolutely for sure. There is no need to ask for any coordinates here.

Irina: It's like it's under a mountain.

Vladimir: That's understandable. There is a famous photograph of Mars, which is perceived as a "face looking into the sky," which was figuratively called the Sphinx, by association with the Egyptian. In fact, it looks like a face looking up at the sky.

But Mars researchers know absolutely exactly where it is, its coordinates. That is, we just need to go there, if we want to truly explore, to Martianize our Martian artificial devices and make sure that this is an artificial structure.

Do not pretend that we are exploring Mars and deliberately do not notice that there is an artificial structure there, and are playing a game with ourselves, dear researchers of the planet Mars. And there you need to land artificial vehicles, rovers or something else and make sure or not make sure. And give an answer. We have information that this is an artificial structure. Repeat again, please, what is that there?

Irina: I directly wrote down what he said: "This is not the Sphinx, but a dilapidated and sand-covered one of the hangars for spaceships of the Tumesouta base, which was there before the war. Many Tumesoutians died near this structure, their remains were scattered throughout the surrounding area by explosions."

Vladimir: Probably, if an artificial earthly vehicle, a station, rovers are planted there, then these remains can be seen, filmed, and understood

that this is an artificial hangar itself, to be understood closely. Or this has all been known for a long time, they just don't tell us about it, sorry. And these secret Mars rovers, or some other way - all the information is there.

Irina: Kirchiton said that he does not know about the Sphinx, but photographs of some objects were sent to Earth, but he does not know whether they were published somewhere or not.

Vladimir: That is, they found out with the help of their equipment that images of artificial objects on Mars were sent to Earth. Earthly researchers have them, but they are classified and hidden from the general public.

Irina: He said that maybe they were published somewhere.

Vladimir: We know that they have not been published in the public domain, at least the scientific world does not have it, it has not recognized it. They are known only to a narrow circle of earthly specialists. Simply put, they are classified for today. This is what Kirchiton claims, and Irina is telling us about this now. And then you draw your own conclusions.

06:04 View of planet Earth from Mars.

Irina: Next. I already told you that we landed near the pyramids, then we sat down again, I told you all about it. It was night. Then we walked along these pyramids, turned away from the beam, and Kirchiton began to show the starry sky. It was clear. And he said that a large bluish star, somewhat similar to Sirius, only it has no rays, and the stars there do not blink, this is how the Earth is visible.

Vladimir: Did you see the Earth from there?

Irina: And then I realized that I was standing here, and the Earth was in space.

Vladimir: You are just like Mead, who saw Esler.

Irina: I also remembered this conversation. Yes, interestingly, the Earth is in space. So, dear friends, you are all in space.

Vladimir, the Earth is like a precious stone. I asked: “Why does it shine so much?” He said that the Sun shines there, and it reflects it that way. I think: “That’s where all my friends are now: Maxim, Vladimir. They're kind of at the top." You were in heaven for me.

Vladimir: I see.

07:50 Sun on Mars. Traces of intelligent life on Mars. Natural phenomena on Mars.

Irina: Then we sat back, did not take off our suits, he raised his plate and sat low. I stood near the window and looked, there was no weightlessness. Our ship flew like an airplane, maybe even a little lower. Somewhere in the distance all the mountains and desert were visible. We flew slowly.

At first it was dark below, but then I looked as if it was getting light. I say: “Why did morning come so quickly? We've been flying here for a long time." He said it was not morning there. We just flew to where the Sun is.

Vladimir: To where the Sun is? It's clear. That is, you arrived where it was day.

Irina: At first gradually, as if it was dawning. And then I look like it’s day, the sun is shining. Then we went out, there was a round hole, and we walked along the edge. He said there was a lake here and then it evaporated. There was a village on the shore of this lake; it was all covered with sand. There's even a hillock about ten meters away. It skidded, the explosion caused all the soil to fall out, and the lake evaporated. There were traces of their life, some children's toys.

Vladimir: Didn't you mark this place on the map?

Irina: No, he just dropped me off there. He said it was far from the surface. But we walked around the edge of a small crater. And then there, among the stones, there was a trace, a depression, as if someone had passed, or rather some kind of worm had crawled.

He said that no one crawled here, there used to be a river here. And he walked along the river.

We are walking with him, it was already day there, the sun was shining. But it was smaller and whitish, and the sky was yellowish.

I asked why the sky is yellow? He said there was dust there.

And then I see something moving from the side. I turn around, and this tall pillar is spinning. I say: "What are these plasmoids?" He turned, looked and said that these were not plasmoids. It's far from here, probably two kilometers. I look, and it's just the wind picking up the sand and spinning. We don't feel it in suits.

I say: "So, is this pillar tall?" He said that it was 150 meters, no more. I asked: "Is this "thing" coming here now?" - he said that even if he comes, we are in suits, nothing will happen to us. He's just walking by. And if we get into it, then simply nothing will be visible. He will leave quickly. And nothing will come from him. Now, if we were without a suit, then yes. I say: "Won't it lift you into the air?" He said: "No, his strength is not enough to lift you. Sand lifts, compare how much weight it has."

Then we moved on. I was still keeping an eye on this pillar; it had gone somewhere. I say: "Oh, what plasmoids are on Mars! Hello to you all!

12:31 Minerals and minerals on Mars.

Irina: Kirchiton says: "Lean over here, look among the stones: there are round red ones on the stones, as if drops are sticking out. It is a

mineral, hematite, from iron and water. Water flowed here, then it evaporated. There are a lot of such balls here."

I asked him if there were minerals here? He said there was even silver and gold. Only there is no oil, there are simply minerals, including radioactive ones. So, when the earthlings arrive, research is being carried out to establish a permanent base there. They already know about our plans.

They expected that by 2025 people would still fly to Mars, but this has not yet come true.

Vladimir: I see.

13:42 Why can't earthlings visit Mars yet?

Irina: I say: "Has man ever been on Mars? Maybe they are hiding something from us? (Kirchiton) It wasn't. You don't yet have such reliable things that can fly back up.

Vladimir: Yes. One way only. But he means that there was no man after the war 12 thousand years ago. There were people then.

Irina: I say: "From ours, from the government?" (Kirkhiton) You can already deliver a person, there's nothing complicated about it. You can give him all the resources, water, food, air, and so on. But you don't yet have such things that could fly back to Earth with a hundred percent probability, find a way home and not miss. That is, you may not calculate it, you don't have these automatic systems. Our magnetic dust engines adjust themselves. Wherever you are, you just press a button, and it looks for the coordinates itself.

Vladimir: Yes, we will have a one-way ticket for now. It's clear. And you already have to live there. We understand this now, although everything is moving forward.

14:51 Navigation on Mars. Nature of Mars.

Irina: (Kirkhiton) Look, do you like it here? Would you agree to live here? Especially when we walked along this river. There are just stones here, you walk and walk, you can't see it near the plate. I say: "Won't we get lost here?" (Kirkhiton) Do you think you're the only one with a navigator on your phone?

Vladimir: They need to do terraforming there. Mars formation, transforming it.

Irina: I say: "Kirkhiton, we'll turn off now and walk around here until our oxygen runs out." (Kirchiton) Listen, is it only you who has a navigator on your phone that you use? I joke: "Eventually the phone battery may run out."

(Kirchiton) Maybe. But in the suit, this battery, as you call it, can last, in your opinion, 120 days.

Vladimir: I see. By that time, the rescue services of the Interstellar Union will have found it. Okay, what's next? Have we already answered all the written questions? What happened next?

Irina: Then we walked around and talked. He asked me if I liked the landscape? I looked and saw that the wind was moving sand and small pebbles, and I said that somehow it wasn't very good: there was no greenery, no trees. (Kirchiton) Yes, I think that when people are told that they will fly there, very few will agree.

Vladimir: Did you then get to the base?

Irina: Then we got into a plate and flew somewhere. I looked out the window, it was light. Some plains, stones, I say: "There's something there, I think some animal ran through there."

Kirkhiton said that it was just a shadow from the stones, not an animal. There is very little oxygen there and it is cold, but he did not name the temperature.

17:20 Earth rover on the planet Mars.

Irina: Then, we flew to the place where the Mars rover is.

Vladimir: Yes. We asked Irina to visit the place and fly to the Earth's rover. Let's listen.

Irina: Kirchiton first told me to get a map, we'll mark this place, and then we'll go look.

I was in a suit, I had a pen.

Vladimir: Did you make these marks inside Kirchiton's ship?

Irina: Yes, I didn't take the map with me when we went out.

Vladimir: Okay, let's see. It can be larger, closer to the camera. So, here is the Mars rover. This is our point - 1, we looked, and the Mars rover was there. What is written there?

Irina: He said it was quite far.

Vladimir: What is written next to the place where the rover is?

Irina: Meridian Land.

Vladimir: Meridian Land?

Irina: Yes.

Vladimir: So the place is called "Land of Meridian". There you discovered the Mars rover. What kind of rover is this, now describe it in detail.

Irina: He said that if the earthlings take him, the cameras in him will no longer work, they won't see us there.

Vladimir: That is, the Mars rover is already inanimate, it is no longer working, non-functioning?

Irina: Yes, even if the earthlings find him and take him away, they won't see us there.

Vladimir: And if you show photographs of all the Mars rovers that are there, they are available, will you find out which Mars rover it is?

Irina: I'll describe it now. We approached, he said that the rover had been working there for a long time, that it was American.

Vladimir: So, an American rover!

Irina: And when we approached, I was surprised, I thought it was big, like a tank. And he, like a wheelbarrow, is as long as me. You can put me down and that's it. I say: "Oh, what kind of cart is this, that it's so small?" He says that this is quite enough. I say: "I thought it was some kind of machine, a tank." "Yes," he says. - Now they'll send a whole KAMAZ here and hang a bunch of batteries on it to waste energy. They have nothing else to do."

Vladimir: That is, it is small in size, on a platform. What are there - wheels?

Irina: You know, he is shorter than me, maybe up to my chest, but tubes stick out of him. Three tubes, one with a camera, like they had on Polaroids.

Vladimir: The camera sticks out on them.

Irina: Only she is alone, and underneath she is still small. I came up, looked at her, I touched her.

Vladimir: Oh, did you directly touch the Mars rover?

Irina: I say: “Where are the wheels, I don’t understand?” He said they were downstairs. And you know, I touched them, they were hard, and it looked like there were notches on them. And they are not round, but oval.

Vladimir: And the tracks were visible on the surface, how did he get there?

Irina: There were no traces there. He said they were carried away. It's windy here, in a day or two you won't find anything here.

Vladimir: And the lander from which he landed? Wasn't there visible somewhere around?

Irina: No. (Kirkhiton) He sat down in another place, and that’s where he came. Far. I ask: “Why far?” (Kirkhiton) I probably drove 40 kilometers, maybe more.

Vladimir: He didn’t say the name? Was there nothing written on it?

Irina: The name, she says, needs to be looked at, it should be written here. We started looking for the inscription, there were some letters there, but they seemed to have been erased, in general, it’s not clear. I think the letter "O" came first.

Vladimir: I can now guess what kind of rover it is. There are very few known American rovers, and indeed Mars rovers in general.

Irina: I asked what year it was? Kirkhiton said that it worked for a long time and broke down about three years ago.

Vladimir: Clearly, from this data we will be able to understand exactly what kind of rover this is.

Irina: I asked what happened to him? He said there was something wrong with the batteries. I asked what he actually worked on? Where is his gas tank? (Kirkhiton) Where does the gasoline come from? I gave you this gasoline.

Vladimir: Solar batteries.

Irina: And there were pipes sticking out on it, further on, where there was a large white pipe, white from this camera, then a smaller pipe and a third one - there was also a square on it. And there was something else attached to the side, flat as a stone, just a metal box. I asked what kind of box this was? I touched her. He said that this is a thing in which there are rays, like X-rays. Lets sand in. It has a screen and a scale, they call it “measure spectrum.”

Vladimir: This is a spectrometer, yes.

Irina: I asked what it is for? Kirchiton said to use these rays to determine which elements.

The rover stood somehow unevenly, tilted, and one wheel was raised. I said that we need to pull him out of the sand, he was stuck. And she pulled. She asked: “How much does it weigh?” Kirchiton said that it was probably 70 kilograms, maybe less. “What about on Earth?” He said 130–150 kilograms.

Then I spun the wheel. When you swipe it, it doesn’t spin as quickly as, for example, something else, but you can rotate it.

Vladimir: Was the wheel sort of suspended? Could it be scrolled?

Irina: He stood there, somehow bending over.

Vladimir: It stood askew, and some of the wheels were just hanging, right?

Irina: I asked what happened to him? He said that there was just a wind, and he tilted it a little.

24:07 The reason for the rover's breakdown.

Irina: I say: “What happened to it, why doesn’t it work?” Kirchiton said that he worked for them for a long time. He took a tube and touched it; the door opened inward. I say: “How did you open it without a key?” Kirkhiton said that this is a special inertial key that creates something like inertia in the mechanisms, and they unscrew.

I looked in and there was a dark box. He knocked and said that from the sound it was clear that the batteries were frozen. Sand got there, and the batteries could not work from the Sun. And the battery inside, from which the wheels drove and the cameras were filmed, froze and discharged, or everything went out of it. It won't work anymore.

Then, he shined a flashlight inside, leaned over and said that the memory card was inserted. And then he pointed a flashlight at it, looked at something there and said that it was not filled out yet, there were some photographs there, and they were intact. He could download it onto his ship and watch it, but it would take time. He sat away from him.

Then I came up and said: “Are the cameras sure they can’t see us?” He said that there was not one camera, but several.

26:27 Solar and nuclear batteries of Mars rovers.

Irina: I say: “How did he work? From the battery? Kirkhiton said that these were protruding black tubes, and on top there were plates that looked like they were made of coal. All this is on the roof.

Vladimir: This is a solar battery, of course.

Irina: Yes, he says that these batteries worked. I asked: “Mars is further than the Sun, how did it work? How long does it heat here? He

said that these batteries are not made of silicon, which we have, but this is a special substance, it contains arsenic. He named it, but I don't remember it. And it converts energy well.

I say: “Do the other rovers on Mars also work?”

Kirkhiton said there are different ones here. There are those that run on plutonium, and there are those that run on solar batteries.

Vladimir: So, just a second. What does “work on plutonium” mean? Do they have a nuclear engine?

Irina: The engine is like a nuclear one that runs from decay. I asked: “Uranium, or what?” He said that it is not uranium, there is little of it on Earth, but plutonium is more common there, it is cheaper, it is commonly used, and it is more effective. He did not say whether they were classified or not classified. I say: “Which ones?”

(Kirkhiton) There are those that run on solar batteries, these are new ones, and there are those that run on nuclear. I asked what nuclear fuel? Uranus? He said plutonium.

I ask: “How do you know?”

Kirkhiton said that when he was working, their probes were investigating, which flew here, unnoticed by the cameras. At night, when they flew past, they released a scanning beam and found out that this substance was there.

Vladimir: Very interesting. Another sensation.

Irina: I say: “So what, is this nuclear contamination of Mars?” (Kirkhiton) They are intact, there are no leaks from them.

Vladimir: Very interesting.

Irina: For now, at least.

Vladimir: What next? So you touched and felt this rover, turned the wheels where they were spinning. Did you see what happened next?

Irina: Then I started asking him what it was called. He said it was written down on his computer somewhere - not on some alien base on the moon. He just knows that he is there. Kirchiton assumed that the questions would be about the Mars rover, and decided to take me there.

(the video is cut off and begins with Irina's words: Meridian Land).

Vladimir: Meridian Land, yes.

29:01 The rocket that delivered the rover. Equipment on the Mars rover.

Irina: I say: "Where is this thing he came down from, the rocket? Did you fly back? Kirchiton said that she didn't fly away, she just went far away, she couldn't be seen from here.

Vladimir: I see

Irina: There was some kind of mark there, as if a furrow had been plowed, but I didn't see the tracks of the wheels. It was as if a tractor had passed a plow across flat ground, but not deep.

Vladimir: I see. There is a trace there. Okay, so what next? Please tell me if there was anything else there, where you went next.

Irina: We walked around this rover, I took it, wiped its camera, and said: "Hello everyone there, if they're filming me." Kirkhiton said that no one is filming anything.

I say: “Some kind of useless cart.” He asked if I wanted to take her with me? I said it was hard to drag her. We talked and walked around this thing, I asked him what kind of box it was, he first looked at it and said that it was for measuring soil elements. I started asking how.

Kirkhiton said that he lowers X-ray type rays into the ground there and measures it.

I asked how x-rays can measure? He said that they enter this soil and transmit information to the screen.

Vladimir: Clearly, this is his equipment. Okay, you've already told me everything. Where did you go next?

Irina: There was also something like a hand there, under this camera.

Vladimir: The manipulator was there to collect soil.

Irina: There were also wheels, they were not attached, but seemed to be on legs that could bend.

Vladimir: They were hinged, not attached to the body, and there were additional hinges to provide a degree of freedom and additional flexibility. It's clear. And a manipulator.

Irina: I say: “What kind of spider is this? Why is he made like a robot?” Kirkhiton said it was not a robot. This is so that they become higher, lower and turn in different directions.

I say: “Why is this necessary?” (Kirkhiton) Well, why? And if he gets stuck in the rocks, how do you get him out?

Vladimir: It increases the degree of freedom.

Irina: I asked: “What is this thing?” It bends, and at the end there was

something sharp, like a drill, but not so twisted. I say: “What is this?” He said that this was for taking a sample.

31:58 Water on Kirchiton's ship.

Irina: Then we sat down again. Kirchiton said that in general they should take me home, but now we will spend a few more minutes and fly to one of Selbet’s bases.

I say: “Shall we have some tea? I’m already thirsty.” He said that he didn’t have anything to drink, he could only offer gabtents.

Vladimir: These are the worms that the inhabitants of Daraal feed on, let me remind our viewers.

Irina: I asked Kirchiton what he was drinking. He said that there is a supply of water, but it is technical, he can fill up with this, but he does not need it that often. He doesn’t have good water on the ship, and I don’t like the technical water, it might smell like something, like a sulfur compound.

Then I say: “Okay, let’s fly to the base.” And we sat down, and he said that the suits could be taken off. We stood in the middle of the cabin, and they removed themselves from us. I say: “Wow, we’ve been walking in them for so long, and the oxygen hasn’t run out yet.” He said that, in principle, the reserve in the suits for my body weight and for my oxygen consumption is about five hours. And he has three hours.

Vladimir: So you already flew on the ship into the middle there, straight into the Selbet base, inside, into the hangar?

#320 PHYSICAL flight to Mars! Traveling across the surface of the planet. Secret rovers of the Earth. Part 3

https://blog.cassiopeia.center/fizicheskij-polet-na-mars-chast-3
https://www.youtube.com/watch?v=6H5AbKH3Us8

00:21 The base of the planet Selbet is on Mars.

Vladimir: Have you already flown on the ship into the middle, straight into the Selbet base, inside the hangar?

Irina: Yes, into the hangar, there was already air there, then they left. There was, like on the Moon, a base that was like a cave, like a dome.

I say: “Oh, like on the moon!”

He says: “Look, the color is completely different here.”

I approached. The wall was this color... There is coal, and there is this waste gray rock, the same color of some kind of gray.

I say: “Where did the red one go?”

“Red, it’s there, more on the surface.”

I say: “Where is this Selbet base?”

“Well,” he says, “now it’s about fifty meters from the surface.”

Vladimir: It was all located at a depth of 50 meters.

Irina: We walked along the corridor, then entered a huge room. There were some screens along the walls, and near these screens there were long tables, at which reptilians sat. They looked at us. They were more than two meters, like lizards, gray-green scales.

One stood up and came over. I realized that this was a woman, for some reason I realized this, maybe by her clothes. She had some kind of shiny coat, like foil.

They began to talk among themselves, she said something to Kirchiton, and he understood her. They don't speak Daraal, but some kind of galactic language that Kirchiton understands. They have some kind of common language.

02:30 Room with biorobots at the Selbet base.

They talked. Then we walked along some corridor. He says: "Look, now they will show you the room where the biorobots are. There are no people here."

Then we went into some room, and there were people there. They stood in such poses as if they were lifeless, as if they were dolls. They looked like people.

I say: "Why are they so similar to our earthly people?"

"They were brought from Dissaru to this base to work here, because the Selbet people prefer to buy them there than to make their own. Dissaru makes these robots well. Their base is also nearby."

Vladimir: That is. we can assume that those earthly contactees who were taken to the base there and to the Selbet base, having seen these biorobots, then told everyone that abducted or voluntary people from Earth were working there, mistaking the biorobots for earthly

people who were supposedly brought there clandestinely .

Irina: Yes. He says: “You can come and have a look. These are not people in suspended animation. You can touch them." I approached, I was already without a suit.

Vladimir: In fact, these are biorobots from Dissaru, similar in appearance to humans.

Irina: They were in overalls the same color as their bodies. I went up to them and touched them, they were hard. And they were colder than my skin, but not completely cold. And they were hard, but not like plastic, but like hard rubber, as if a little elastic.

I say: “Why do they feel like that?”

“That's because they don't work. As soon as they start working, they will have the temperature set, they will have everything, just like people can set it. The biorobot was created to resemble a human being. They work for Dissaru in their houses and cook for them. They look like them. They even communicate with them, sometimes they look after their children.

Vladimir: I see.

05:16 Genetic experiments based on Selbet.

Vladimir: But these reptilians who were there, this female reptilian, did they somehow directly communicate with you through translation or not?

Irina: Yes. I didn't ask for a name, I asked what profession. “She,” he says, “is something like a biologist. Now she will show you her research.”

Indeed, groups of cells taken by Tashigans from people are being

studied biologically. They take skin samples and then grow them, i.e. experimenting.

They took me to a drawer, pulled it out, and there was a frame on which was stretched, I wouldn't call it leather, but some kind of fabric, not quite like leather, some kind of yellow color.

"This," he says, "is a group of cells. And we actually do experiments. That is, from contactees (this is Tashigan) they bring us groups of cells in containers, here to Mars. We are experimenting. Those. We look at what a cell is made of, we divide this cell into some segments, then we look at which section of DNA is responsible for which segment. And we are experimenting to connect these cells, these DNAs, more accurately, with some others. For example, with the same Tashigan people or with us. Those. we are experimenting to produce hybrids.

Vladimir: Genetic experiment. But you didn't ask, but did tissue collection from Tashigan contactees take place voluntarily?

Irina: Yes. He says they warned them. This was not a collection of germ cells, but simply skin.

Vladimir: That is. The earthlings voluntarily gave their consent and gave up their samples for research, right?

Irina: I say: "And how was it?"

Kirchiton says: "There is such a tube. You touch her. And there won't even be a scratch on the skin, but just a small dot. And there will already be cells there."

Vladimir: I see.

07:35 Communication with reptilians . The purpose of genetic experiments.

Vladimir: Please tell me, this reptilian woman, female, was she taller than you?

Irina: Yes.

Vladimir: How much?

Irina: A head, even higher. I was somewhere up to her, maybe up to her chest.

Vladimir: Did you feel that the representatives of the Selbet base were communicating with you in a friendly manner?

Irina: The others just looked at me, they didn't get up from their seats.

Kirchiton told them something, but that one, she walked, I don't know, I didn't see her smile. She looked at me normally. She answered questions not in Russian. I asked the question: "Why do you need these experiments anyway?"

She says: "This base is biological." Kirchiton translated that she says that this base is biological, and conditions are created here, including for earthlings. And if a war or some kind of mass disaster suddenly breaks out, earthlings will be relocated there. And here conditions are created for them so that there are resources there, and so on.

I say: "What are these experiments with cells for?"

He says: "You have great genetic potential, and any space researcher has the right to combine your cells with others and get some other hybrid. Not on your planet to settle, but on another."

Vladimir: I see.

Irina: I say: "Why such experiments, as if without asking anyone?"

They say: “What’s wrong with that? When you were made, the Burkhadians, we, the Tumesoutians, gave our genes for you, why don’t you give them for other civilizations?

Vladimir: That is. This is one of those bases where emergency conditions have already been created for earthlings. In order to relocate large groups of earthlings there in case of evacuation, if we bring the planet to war or something else. There is one of those bases where there is already space and conditions for this, just in case.

Irina: I say: “Are these hybrids already available?” She says: “It’s still in the experimental stage. Those. Some groups of cells are obtained, but we cannot trigger the intelligent Spirit to incarnate, because these groups of cells are not yet stable.” Those. the combination of genes is checked.

Vladimir: I see. Fine.

10:35 Relaxation methods for Selbet residents at the base.

Vladimir: What else was interesting at this base, what happened next, if any?

Irina: I paid attention to the walls, they were kind of yellow. We were walking, suddenly I saw this round porthole window in the wall of the corridor, I looked into it, and there were some fish swimming there.

Vladimir: Aquarium.

Irina: I say: “What is this?”

They say: “This is so that we look and remember home, i.e. This is what we have, like your paintings.” I stood and looked.

I say: “What is this, a TV?”

They say: “No, these are living things that swim. There we have further views of nature. We have a garden that completely replicates the Selbet forest. You can sit there. Those. It happens that researchers stay here for several months, and so that they do not get bored, such conditions are created for them to relax.”

“And what does looking into an aquarium give you?”

"They feel at home."

I saw this pink fish. It is like a round ball, and behind it is a tail, made up of many feathers. And on the sides of the eyes, they sparkle red. Then she turned around, her mouth was closed. Then she opened it, and she had several rows of teeth.

Vladimir: Interesting predatory fish probably exist on Selbet, and that means scientists like them.

Irina: “What kind of piranha is this?” She didn’t understand, but Kirchiton translated. She said it was just one of their fish. She eats some kind of protein powder.

“Yes, it’s a predator. They create a powder from proteins using some kind of machine, and they feed them.”

“Do they go fishing for these fish?”

“No, they just look at them. Why go fishing with them, they don’t need it.”

Vladimir: All conditions have been created for the recreation of specialists, reptilians, in this case from the planet Selbet.

By the way, I will say again that there are bases there that are engaged on Mars, nearby, in removing the orbits of asteroids from the

Earth that threaten the Earth. Those. The Selbet people in this case completely help us and, being in the Interstellar Union, work for our planet. For you and me, including on this base.

Irina: These are specialists who have been at the base for several months by earthly standards.

Vladimir: I see.

13:43 Farewell to Selbet residents.

Vladimir: Was there anything else interesting there, or did you fly away after that?

Irina: Yes, then we didn't stay there for long, literally about ten minutes, and then Kirchiton said, it's time now. And when we left they all turned and said something at the same time. This sound: "Araharham." I asked what this meant.

"They wished you a good journey to Earth and passed on the Light to all earthlings."

There were them, including the one who went with us, I counted them, who were sitting in this hall, there were 14 of them.

Vladimir: Were there reptilian men there?

Irina: Yes, they looked and didn't get up. And when we left, they stood up, turned around and all said in unison: "Arkharkham."

Vladimir: I see. Thank you. Was there anything else interesting going on there on Mars, or are we already done?

Irina: Then we left. I say: "Yes, there is Light for them too. I say hello to them all."

Then, when we had already left, no one accompanied us. We walked to the plate and sat down in it. I stopped looking out the window and sat down. I started taking out a map, we were going to Lake Baikal.

I say: “Kirchiton, when is my next contact?” He told me that he would tell me soon.

15:20 Location of alien bases on Lake Baikal.

Irina: We want to visit the base on Lake Baikal, as you know. And our guys gave me a map of Lake Baikal. There are two alien bases there.

Vladimir: And where are they, let’s see?

Irina: The guys indicated to me where we will be, the point, in what place, in what sanatorium. I showed Lake Baikal. He said, “I know that.” He said that there was no exact location, but he circled the area.

Vladimir: Let's see. Can I go to the camera?

Irina: I circled and signed which is which. We'll be right here. Here is Ulan-Ude. There is a Pleiadian base here, somewhere here.

Vladimir: Pleiadian base, which means it’s somewhere near the northern tip of Lake Baikal.

Irina: And here, not far from that place, is the base of the planet Tikht of the Interstellar Union.

Vladimir: You can still get right next to the camera, now you can see it. You can see it better here. The Tichta base is approximately visible, and here is the Pleiades base, approximately in this place. That's it, thanks, it's clearer now, thank you.

Irina: I say: “And where will you choose? In general, we planned to fly to the Tikhtian base, to the Interstellar Union, on our next flight.”

He says, “Okay, I’ll warn them. I just don't know how interesting this will be to you. As far as I know, 15 people work there, and there are about three times as many biorobots servicing them. There are 15 humanoids, but there are mainly ecologists who study the ecology of Baikal and the surrounding area.”

Vladimir: Everything is clear. We saw where we were, we saw where the base of Tikhta and the Pleiades was, we oriented ourselves according to the outlines of Lake Baikal. We have everything ahead, welcome to our retreat. Fine. So, after that you already flew away, right?

Irina: Yes, but they said that the base is not on the shore, but under the bottom.

Vladimir: I understand, under the bottom. So, we understand about Baikal.

18:09 Opposition and crime in the Interstellar Union.

Irina: Kirchiton took me back. I asked: “When should I come?” He replied: “I’ll let you know.”

Then we talked about reptilians, I said: “What is it with us, why didn’t the Interstellar Union say anything about all these oppositionists?” He says: “Listen, they have already told you a hundred times, when you asked questions, that there are opposition movements. Even in the Interstellar Union. Even on Dissaru, you were told, there are such radical groups, even Saint-Germain said, who want to take power and rule on Earth. Such radical groups. And this is the Interstellar Union! What about civilizations that are not included in it? Do you think it was a shame they weren’t included? They would love to go. Although they say that they don’t want to join the Interstellar Union, they would go because there are more of us.”

Vladimir: Our questions to the Interstellar Union were not about the fact that there are groups that are in opposition to the Earth. And the fact is that they are doing some things on Earth, which the security services of the Interstellar Union and similar employees from the Galactic Federation of Light either do not know about, or know, but cannot do anything about, and they are rampaging around on Earth, as we thought . That was the question, not that such groups exist.

Irina: I say: “They do what they want here.” And he says that if they had done what they wanted, your people would have been captured long ago. So they can't.

Vladimir: Well, not exactly what they want, but they violate the laws of the Interstellar Union, and the Interstellar Union turns a blind eye to this.

Irina: I said it. And he says: “And there are criminals in the Interstellar Union, I told you.” Reminded me.

Vladimir: We’ll find out this separately, we’ll just probably not mix it up here now.

Irina: He reminded me again: “What do you want, even if there are criminals not only on Selbet. Do you remember Bergastre telling you that a conspiracy was uncovered, in which even the Burkhadians took part? Where were they testing drugs on children?”

Vladimir: Yes, we remember. We asked Artis, he promised us, at the council of the Interstellar Union to voice Ashtar’s proposal for the presence of a biorobot in every ship of researchers of civilizations not included in the Interstellar Union. We remember this, we are waiting.

Okay, what else was on Mars? Let's return to Mars. You flew away after that, right?

20:34 Conditions and real circumstances of physical contact.

Irina: Yes. We talked about Vasily. Then we arrived, and he said: “That’s it.” I stood near the hatch and a beam fell on me from the ceiling. Kirchiton stood nearby. The beam lifts me above the floor and lowers me inside, that is, I don’t go down the stairs as before.

Vladimir: You left the plate, and they were already waiting for you?

Irina: I left the plate, walked away, looked around. It’s as if even if it’s hanging, I won’t see it. And then I went, I already knew that I needed to move away, about two minutes. I turned on the phone, then went to the car, told Maxim, we went home.

Vladimir: I see, please tell me, approximately how much time passed from the moment you sat down on the plate to the moment you left it, approximately, or exactly?

Irina: Well, about an hour, maybe a little more.

Vladimir: Everything that you told now, we talked about it here now for one hour and 38 minutes, did it all fit into approximately the same time, or even less, these real events?

Irina: Yes, well, while we were still there.

Vladimir: That is, all this fit even in a little less time. It's clear. That is, it was all quite fast, you moved there, and so on. Fine.

Irina: While I was recording there, then we went out, walked around and then came back.

Vladimir: I understand. Okay, if that’s all, if there is anything to add, please, we can add more now.

Irina: He also said hello to everyone and said that he was very glad to meet you. And he said about other physical contactees (the possibility of them flying somewhere with him, or with another), he said: “I would

gladly take any of you if there is the approval of your Higher Self, your curators and the Interstellar Union commission, I don't mind".

Vladimir: I see. Well, friends, we have now heard the most detailed information, a detailed report on Irina's physical flight with Kirchiton to the planet Mars, with answers from the representative of the Interstellar Union to all the questions asked by the administrators.

For me, a lot of things were absolutely sensational, I won't repeat them. We will try to clarify this information, edit this video with English subtitles, and possibly translate it. Make an English dub. I hope it will be seen by many of those specialists and researchers who are going to launch new research vehicles to the planet Mars. Perhaps they will decide where exactly they need to fly to find these artifacts, if, once again, they are objective researchers. If they already know everything, and it's just hidden from the public, then, of course, no one will look for anything.

Irina: Yes, if you haven't found it yet!

Vladimir: We don't know that. Thank you very much, friends, see you again on air. I'll stop the recording here.

Irina: Hello!

Vladimir: Irina, thank you! Thank you very much for this feat, for this night that we are talking about the flight to Mars and for this Voronezh night, for this spiritual feat, thank you!

#322 The water cycle in nature through the eyes of aliens. The mystery of the origin of water on Earth. Channeling

https://blog.cassiopeia.center/krugovorot-vody-v-prirode-glazami-inoplanetyan-taj
https://www.youtube.com/watch?v=m7BJtDjJBjU

00:21 Element of water.

Question: What is the water cycle in nature? Where did water come from on Earth? Is water a metaphor for the circulation of nature's genetic memory?

Irina: Water is a liquid, and liquid is one of the states of matter, one of the levels of density.

In the subtle worlds, the word “water” is the name of one of the elements. The element of water is not the water that you see as physical water. This is a certain state of space energy, which is a component of what you call electrons, protons and neutrons.

01:26 Composition of electrons, protons, neutrons. Electric and gravitational charges. Microgravity.

Irina: Electrons, protons and neutrons consist in a certain ratio of the energies of the four elements. You say that the atom itself is electrically neutral, although some atoms can remain in this state for a

short time, turning almost immediately into a positive or negative ion. But we don't call it positive or negative, since we have a slightly different ratio of elements. The electron includes elements that are fundamentally opposite in their qualities to the elements in the proton. The electron has more of the element of fire, and the proton has more of the element of water. Accordingly, they repel each other, which is why you called them "plus and minus."

But, unlike you, we do not call them electrons and protons, we simply call them the energies of the material world that create a vacuum. You call a neutron an electrically charged particle, but it contains not only an electrical charge, there is also a gravitational charge in the nucleus of an atom. Otherwise, how would they stay close to each other? We call this microgravity.

For your devices, the neutron is neutral because it contains the energy of all four elements in equal proportions. This play of the four elements: air, earth, water and fire, represents the ten material energies that enter into your atoms.

03:48 Ten material energies. Three energy levels.

Irina: These ten material energies make up the three energy levels of the atom.

You call them an electron cloud or a proton-neutron complex. We call them simply: three energy levels.

At the first energy level there are five energies: heat, light, electricity, magnetism and radio waves of certain frequencies.

At the second energy level in the atom there is radiation energy and thermonuclear energy. I want to note that it is present in any atoms, regardless of substances. We do not divide isotopes, like you, into electrons and protons. For us it is a single substance.

The third level of energy is the deepest in terms of the depth of immersion in the atom. These are micro- and macrogravity.

05:29 Microgravity. Macrogravity. Plasmoids of water. The difference between the elements of water and others. The water cycle in nature.

Irina: Microgravity is energy that attracts atoms, and with the help of various chemical bonds forms molecules and all dense substances. Macrogravity is the energy that allows bodies that are far apart in space to be attracted to each other and rotate in certain orbits. This, too, is not in space itself, but in atoms that are interconnected at the macro and micro levels.

Water is one of the elements. Like all four elements, it serves as a building material. As an element, it is the energetic state of space. On your planet there are certain water plasmoids that are responsible for water bodies and their cleanliness. But physical water is only a manifestation of a certain energy of space, which we call the element of water.

How is it different from other elements? That which has a certain fluidity, variability, certain frequency characteristics.

Thus, the water cycle in nature shows the interchange of energies between various substances and entities.

#323 History of the languages of the Earth. Messages from extraterrestrial civilizations: how to communicate with aliens? Linguist

https://blog.cassiopeia.center/istoriya-yazykov-zemli-poslaniya-vnezemnyh-civiliz
https://www.youtube.com/watch?v=qQA5Ms4UIBU

00:22 Introduction of participants.

Irina: Hello, dear friends! My name is Irina Podzorova. I am a contactee with extraterrestrial civilizations. Today next to me is my curator, a specialist in biology, psychology and alien life MidgasCaus from the planet Esler, and Alla. Hello, Allah!

Alla : Good afternoon! I am a representative of science, a psychologist and a doctor of cultural studies. I want to ask different questions. Since I am a cultural linguist, I would ask some questions about linguistics. But there will be other questions.

01:00 Communication between representatives of different civilizations.

Alla: First question: there are many languages in the Interstellar Union. How do representatives of different civilizations communicate with each other?

Irina : Representatives of different civilizations communicate with each other through automatic translators, which are included in the equipment of spaceships, as well as special space suits.

Some enthusiasts teach galactic languages on their planets. But most often, communication takes place through translators who can translate the words of the interlocutor by voice. Moreover, there are settings so that the voice of this translator matches the voice of the one who is speaking.

Alla: Wow!

01:51 MidgasCaus communication with Irina.

Alla: And Mid, when he communicates with you, does he also communicate through an interpreter? Or does he know Russian?

Irina: (MidgasKaus) I studied Russian, but right now I'm speaking in my head. No knowledge of languages is required there. There are thought forms.

Alla: It turns out that if someone goes to the Astral, as the Pleiadians say that they gather in the Astral, there is no need for any languages there at all. There is communication through thought forms.

Irina: Yes.

02:22 Communication in the Astral.

Irina: (MidgasKaus) Irina communicates through the Astral even with plasmoids that earthlings see for the first time. All the same, she understands them and translates them, naturally, through her level of understanding, through her vocabulary, and so on.

She is good at conveying images, since in addition to chips, she also has extensive experience interacting with different types of

civilizations, including in the Astral.

02:47 The influence of the contactee's level of development on the information transmitted.

Alla: Do they teach you how to translate? Or is this a natural ability that humans have?

Irina: (MidgasKaus) I will tell you as a specialist in contacts with alien civilizations. The ability to translate does not only depend on the chip or experience. It also depends on the content of the consciousness of the contactee himself, his volume of knowledge, his general cultural, scientific and ideological level. Since the curator's knowledge transfer is always relayed through the individual lexicon of the contactee.

Alla: Therefore, there may be different translations of the same thought among different contactees?

Irina: (MidgasCaus) Yes. What is also important here is the contactee's ability to relax mentally and join the mental flow of the curator. This requires openness, trust, purity of heart.

There should be no rigid installations in the mind that cut off programs and ideas of the curator that are inappropriate to the installations.

Alla: It turns out that you should be empty yourself, without any concepts of your own? Then will you hear?

Irina: (MidgasKaus) There can be concepts, but they should not be rigid. There is such a concept in your psychology. As a psychologist, you undoubtedly know about it. It's called "flexibility of thinking."

A contactor who has perfect transfer of knowledge from the curator must have this. The more flexible the contactee's mind, the more accurately he will convey the knowledge of the curator. The less flexibility of the contactee's mind, the more rigid his mental structures, the more he will invest his attitude and coloring into this contact.

05:07 Work of a curator with the consciousness of a contactee.

Alla: Another question. When Ira made translations, there was something like this, for example: “I’ll now look in the contactee’s mind for a suitable image.” It turns out that the one who enters consciousness also sees and searches for something there?

Irina: (MidgasCaus) Yes. He searches in the mental field for a suitable image or word that is in the contactee’s memory and that can more accurately convey his thought. I have heard several times from entities who have been in contact with Irina, especially from the Spiritual World and those incarnate, that the language of earthlings is very poor. Not specifically Irina, but even from those who were in contact with other contactees, that the language of earthlings is very poor for conveying these concepts.

Alla: When Irina speaks, sometimes it’s clear that she doesn’t know this word. For example, I remember "inhibitors". I remember Ira: “What is this?” This is where the word comes from?

Irina: (MidgasKaus) I already said that the contents of the contactee’s memory are taken. She may not remember the meaning of all these words. This man read and studied a variety of literature. It is quite possible that this word was deposited in memory. And, naturally, we use what we have.

If she herself doesn’t know about this and hasn’t specifically studied, say, medicine or biology, she can ask again.

Alla: It is clear that we have much more in our memory.

06:58 Memory.

Alla: Then, by the way, a question about memory. When I listen to conferences, I am amazed at your memory. Mead, for example, spoke about the Bible. Quoted the Torah. And when they asked him whether he studied this specifically, he said: “No, at school.” This is incredible

to me. Every time I prepare for a lecture and re-read it, because I forget.

The question arises: do you have a special memory? Or do we have the same one, we just don't know how to use it?

Irina: (Mead speaking). When they ask me a question that I haven't studied or don't remember, I say that I don't remember it. But everything that relates to the Torah and the Bible in general is included in the data of the Interstellar Union on Earth.

I studied this data especially carefully because I was preparing for contacts with earthlings. This is, firstly. And secondly, it was my personal interest. Because I was interested in the history of the Earth even before I decided to become a contact specialist with you.

Alla: I see. Such interest. But we still have a problem: we forget a lot. The words are indeed in memory, but they are somewhere deep. And you can't get them out. And the same goes for related information. You read it, you know. Students suffer during the exam because they seem to have read everything, but forgot.

08:31 Development and use of memory on Esler.

Alla: Do you have any experience? How is your memory? Do you remember us better? Or do you remember the same way?

Irina: (MidgasKaus) Memory is improved, starting from school age, by the education system itself. The fact is that we do not load into our memory information that may, for example, relate to special knowledge of mathematics, algebra, chemistry, and so on. Everything that machines can count.

We pay more attention to the study of natural sciences and the Spiritual world. plasmoid worlds, social sciences, space and so on. We direct our memory to remembering not terms and formulas, but images. And this develops memory.

Alla: Do you have any memory development techniques?

Irina: (MidgasCaus) Yes. We have special teaching methods when the teacher supports a high-vibration emotional background in students: a feeling of joy, inspiration, enthusiasm, and a desire to learn new things. And this positive emotional background improves memory due to the fact that positively charged emotional images are stored in memory in more vivid forms.

Alla: Basically, you remember what's interesting. And you forget what is not interesting. You could say this is how it works.

Irina: (MidgasCaus) Yes. Interest is positively emotionally charged information.

10:30 Proto-language before the war 12,000 years ago. Tower of Babel. The division of humanity into races. Origin of languages.

Alla : It is also known from Irina's messages that the language used to be syllabic. In the sense that the syllables that make up a word were meaningful. Is this the proto-language that existed before the war? Is it artificially created or natural? Where does the language itself come from?

Irina: (MidgasKaus) The fact is that before the war 12 thousand years ago, in most territories of a single continent, the tribes that lived there used languages descended from simplified Tumesout, which was given by your creators to the first people.

People dispersed in different directions. He is now showing me that the continent was large, and on the territory of modern Australia. Antarctica was also on the edge there. She was not an island separated by an ocean, she was connected to the main land.

Alla: Was it the proto-Tumesout language?

Irina: (MidgasCaus) Yes. It was a simplified Tumesout language. But

people dispersed to different places on this continent. And they built large cities and conglomerates of cities, mainly on the coast of this single ocean.

Alla: And everyone spoke the same language?

Irina: (MidgasKaus) Since they lived far from each other, separately, their languages began to differ from each other. Many new words appeared that were not in that simplified Tumesout. Simplified Tumesout words also changed. Language is a dynamic structure, it changes.

Alla: Of course.

Irina: (MidgasKaus) And the proto-language was formed not from Tumesout, but from syllables.

First the runes were formed. They were not only Scandinavian and Slavic. There were runes almost all over the Earth.

Alla : Runes are a form of writing. This is not a form of communication.

Irina : (MidgasKaus) Each rune denoted a certain concept. And then this concept began to be denoted by a syllable.

Alla : It turns out that before the war there was a simplified Tumesout language. Everyone went to different places. The language began to change. Then the war. Some people were evacuated. And those who returned continued to speak in simplified Tumesout?

Irina : (MidgasKaus) A little less than a thousand years after the war, the first people tried to build the first ship to get to the Moon. But he was not perfect. This is included in your mythology under the name of the Tower of Babel.

Alla : I see.

Irina : (MidgasKaus) From that moment on, the division of languages began. Because the creators: the Burkhadians and the Tumesoutians, came down to these people and said that it was too early for them to visit space. They must first arrange the entire Earth. "Take care of the Earth first."

People said, “How will we take care of the Earth if it is too big and there are too few of us?” They were told: “If you settle on different continents that have already separated, then this process will go faster for you.”

People agreed to settle. And then mini-genetic mutations were carried out in order to distribute these people to different geographical and ecological zones. And from this they adopted different skin colors, different structures of the skull, faces, hair color.

The first goal is for them to adapt to living in different climatic zones, and the second is for them to learn to contact each other, overcoming xenophobia within themselves.

Each of these groups, from which modern peoples later developed, was given the language of a different planet. For example, the ancestors of the Chinese, and then the Japanese (they had a common ancestor), were given the simplified language of Sho-Hariki. That's why they have more hissing words - “chan”, “shin”.

Alla : I see! What about the Slavic language?

Irina : (MidgasKaus) Slavic language is simplified Shimor. Shimorsky - Slavic tribes.

Everything that relates to the Celts, to the European peoples, was simplified Burkhadian. Simplified Tumesout remained with the Semitic tribes.

16:11 Syllabic proto-language. The meaning of the syllabic proto-language for priests.

Alla : The Tumesout and Burkhad languages have a syllabic meaning, i.e. Does every syllable have a meaning?

Irina : (MidgasKaus) No. They just had words. And only then they began to break them down into syllables themselves.

Alla : They don't have that? Was it done this way, as if it was specially modeled? Was it some kind of simulation?

Irina : (MidgasKaus) The syllabic language began to appear only later. About 7–7.5 thousand years ago, maybe 10 thousand years ago, the first structures of the syllabic proto-language appeared.

Alla : Why was this done? Was this artificially made? What is the significance of this?

Irina : (MidgasKaus) Researchers who were working on Earth at that time collected information that allows us to conclude that this was done so that the priestly classes could communicate with each other without introducing other people to their teachings.

And they also communicated with plasmoid civilizations in syllables. It's much easier for plasmoids to communicate this way.

Alla : I see. In fact, this was such a shamanic load, even sacred, if we take that word.

Irina : (MidgasKaus) For them, anyone who performs rituals, even if he dances with a tambourine, is in any case a priest. Because they take information about religious studies from the consciousness of the contactee, including mine.

18:09 Pictograms and runes. The meaning of the syllable "Ra".

Alla : I see. This is a special practice for communicating with

plasmoids.

Irina : (MidgasKaus) Yes, that’s why they began to take a certain syllable, began to depict, and not just speak in a simplified language. At first there was no writing. There is a pre-literate period in your history. It's called "prehistoric". Then so-called pictograms began to appear, indicating people or objects.

Alla : Yes, I saw it. We have many of these in Russia, more than one place.

Irina : (MidgasKaus) Pictograms are not yet a proto-language. They simply denoted some word in the ordinary language of this tribe. And then runes began to appear. The knowledge that the plasmoids conveyed to them was conveyed to them by signs. The sign was recorded in their minds as a few lines. And these few lines made up the rune.

Alla : Why did plasmoids transmit these traits? Runes are really dashes, sticks. Why not images, but symbols?

Irina : (MidgasKaus) They also conveyed images. It’s just that the very minds of these contactees translated the images into dashes in order to remember them better.

Alla : Essentially, the letter was born this way in order to somehow communicate with plasmoids.

Irina : (MidgasKaus) Yes. Then these letters, these runes began to denote ordinary words that were in the language. And within the priestly classes, syllabic languages were born.

How were they born? For example, plasmoids of the Sun came to them under the name Ra. And they heard it as "ra." And then they thought about what lines to designate this combination of sounds “r” and “a”. If you see how the letter “r” is designated in different runic alphabets and modern alphabets, you will see some kind of figurine that looks like a hatchet. It can have one or two handles.

What exactly did this sign mean? This sign denoted an ancient tool used to cut down forests. Why was this sound portrayed to them? Because the sound “r” began to mean “separation,” “separation,” “separate,” “cut into pieces.” It began to be designated by a hatchet.

If you look at “a,” it had a very varied shape in different alphabets. There was a very different difference between the capital letter “a” and the small letter “a”.

If we look at the original Phoenician alphabet, we see something like a bull's head.

Alla : It turns out that the syllabary was not only in Russian, but in all languages? Can we find it in both English and French? Or is it still available in some languages and not in others?

Irina : (MidgasKaus) English, French, Danish, Greek, Hebrew - they all came later from a single root.

Alla : Yes. Indo-European roots.

Irina : (MidgasKaus) The letter “a” was originally designated as the head of a bull. The bull was not just an animal. The bull in ancient cultures had the meaning of some force of energy.

Alla : It’s clear, he’s powerful.

Irina : (MidgasKaus) Yes. And “a” meant “space”, “the power of space”, the energy that was put into it. I'm speaking in general. This means that the combination of two sounds “p” and “a” denoted the energy of space, which divides, which separates light from darkness in this case. And this is the Sun. When it rises, it separates.

Alla : Nowadays languages are changing. Does the base remain? Or is she starting to leave? New words appear. Does this foundation remain? Does it have any independent meaning? We don’t know these

meanings.

Irina : (MidgasKaus) To give some name to a phenomenon or object in modern life, people use the same letters, the same sounds.

Alla : Yes.

Irina : (MidgasKaus) But what meaning they put into them, you need to give an example. Because there are different laws of word formation in different languages. The possibilities of word formation, as far as I have studied, are especially rich in the Russian language.

24:37 The meaning and meaning of new words.

Alla : Yes, we really have a lot of different ways to create a word.

Irina : (MidgasKaus) It happens that the creator of a new word intuitively feels the meaning of the syllables, perhaps this is one of the ancient incarnate priests or plasmoids. And makes some kind of similar meaning out of them.

To see what this word would have meant in an ancient language, you need to break the word down into syllables and letters and see what it meant. Sometimes it describes it accurately, sometimes it doesn’t quite describe it.

Alla : That is, it is partially lost, but something remains on an intuitive level, but it cannot be used. On the other hand, if it coincides, does it increase the vibration of the word? What happens if the meaning of a word coincides with the image to which this word is attached?

Irina : (MidgasKaus) The thing is that in different regions of the Earth of the already divided continent several types of proto-languages were formed. Each tribe had one syllable meaning that was not the same as the other tribe's syllable meaning.

26:18 Increase in vibrations from the connection of certain syllables.

Alla : I see. Everyone went in different directions. Can we say that connecting certain syllables increases vibrations? Are there any studies? Let's say "Ra" is the Sun. Or does it depend on how you pronounce it, with what thought? In itself this does not matter.

Irina : (MidgasKaus) Spiritual vibrations are the energy of the human Soul. There are astral and mental vibrations. They depend on the feelings and thoughts that are embedded in these words.

Alla : Can a person invest in something? Doesn't that in itself matter?

Irina : (MidgasKaus) I know about your scientists' research into the influence of different words on the vibrations of water.

Alla : They pray, for example. But this is a prayer.

Irina : (MidgasKaus) If they just say positive words: "thank you," "thank you," "I love you," not necessarily a prayer. And positive words that evoke positive associations in the speaker.

These positive associations cause a rise in positive emotions in his Soul. And these emotions already charge the space, including the water near which a person speaks, with positive energies.

What if this person says negative words? (Irina, addressing MidgasCaus) I understand you, no need for examples.

Alla : I understand that. The emotion with which we pronounce charges the water. If the robot says these words without emotion, then nothing will happen. It will just be empty. And when I read "thank you," gratitude arises in my Soul.

Irina : (MidgasKaus) If the robot pronounces it in the presence of a

person who hears and understands this word, then his vibrations from these words will also increase. And it can charge the water.

Alla : What if there is no person? Water itself will not charge. Because there will be no burden of the emotional living of the word.

Irina : (MidgasKaus) Yes.

29:01 The semantic load of syntax.

Alla : Our philologists have assumptions that not only letters, syllables, words carry a semantic load, but also syntax. Do you have any research on this topic?

Irina : (MidgasKaus) Syntax is the laws of speech structure, as far as I understand.

Alla : Yes. Laws of speech construction. For example, in our language we very rarely use the word “have”, but in English we often use the words “I have”. Not “I have a dog,” but “I have a dog, a house.” Even if I have a deed for this house, it still “is”, i.e. exists. And in English “I have”. We have an assumption that this strengthens the materialist position. Invading. All for me.

Irina : He is smiling now. (MidgasKaus) This rather affects the associations of the person who uses this speech. And on the association of the child who learns this speech. This speech, embedded in his subconscious and in his vocabulary, then influences his worldview.

For example, lines from a famous song, just listen to how disharmonious it will be for your ear. “Everyone wants to love: both a soldier and a sailor. Everyone wants to have both a bride and a friend.”

Alla : Yes.

Irina : Tell me, does it hurt your ears?

Alla : “To have both a bride and a friend.” Yes.

Irina : (MidgasKaus) You imagined that having a bride and a friend means, as it were, deceiving them or something.

Alla : How to appropriate them. The bride and the friend are separate individuals. They are not my personal ones. And I seem to be appropriating them.

Irina : (MidgasCaus) To have. That is, the word “have” means not only what I have. This word means “at the expense of someone” among many Russian people.

Alla : Yes. This is also there. Our word “have” has many meanings. We also have a sexual meaning. “If I had a horse, this would be a number; if a horse had me, I would probably die.” We also have such meanings.

Irina : (MidgasKaus) That is, the word “have” is to use something. And this word has such a connotation precisely because sexual intercourse is often used to satisfy one’s needs, but at the same time they do not think about the partner.

32:30 The meanings of the words “rich” and “money”.

Alla: Yes. It turns out that in the language “to have” is very common, as in English, which sets certain attitudes for consciousness? That is, we treat the world more materialistically. Can this be concluded? It's a shame to be rich, relatively speaking. This has existed in our culture for a long time.

Irina: (MidgasKaus) This has some significance, not fundamental, but still has. For example, you associate the word “rich” with the word “God.” It is not by chance that this was done this way. In ancient times, people who spoke the Slavic language, where did they bring these

words into Russian? Only those who were rich in spiritual knowledge were called rich.

Alla: And then, apparently, it turned into money. And people began to have a bad attitude towards this, because there is no God in money. Relatively speaking. And God is in the Spirit.

Irina: (MidgasCaus) Yes. What does it have to do with the fact that money has a similar sound to the word “day”?

Alla: And what does this mean then?

Irina: (MidgasKaus) Perhaps you have heard such a sign that money can be transferred to another or taken away only during the day?

Alla: Yes, I heard that you can’t give it away at night. And we even have a sign that if you give money to someone, you put it on the nightstand. Or somewhere where you don’t give it from hand to hand.

Irina: (MidgasKaus), Because previously, for a long period of human history, money was made from gold. And gold has always signified the vibration of the Sun, which shines during the day. The words “money” and “day” have a similar sound.

Alla: I see. And hence the signs that now no longer have anything to do with money, because we are not transferring gold, but papers.

Irina: (MidgasKaus) For a long time it was believed that at night the Sun goes underground and exists there. And a dark monster, usually the ocean, temporarily consumes him. And so that money would not be swallowed up like the Sun, it was forbidden to show it at night.

35:24 Syntax of alien civilizations.

Alla: That's the point! Interesting.

One more question: our languages are moving towards simplification. The syntax becomes simpler. We are missing some syntactic subtleties. It's not fast, but it happens anyway. Are their languages stable? This does not mean vocabulary. It is always changing. Namely, does their syntax change or not?

Irina: (MidgasKaus) Yes, of course, it is dynamic. New words and new connections between words quickly appear in it. And this happens even much faster than on Earth. Since we are in contact with a large number of other civilizations. And their names, their words, their vocabulary can also partially transfer into ours. Interchange occurs.

Moreover, in many languages of the Galaxy we also have different kinds of words. Why did you call them exactly “male”, “female” after the names of the genders?

Alla: We have a neuter gender.

Irina : (MidgasKaus) You didn’t call them “a” and “b”, for example. "First" and "second". You could call one type of word “solar” and this one “lunar”. Why exactly a man and a woman? Because it reflected the understanding that in every object, as nouns are designated by this, there are, first of all, two energies. Or their different presence. Or some one is more, the other is less. You have reflected this understanding, which, by the way, also comes from plasmoids.

And these energies were divided into plus and minus. And one was called male, and the second - female. This is all preserved in the Chinese understanding of yin-yang.

37:50 Neuter gender in language.

Alla: Where did the neuter gender come from?

Irina: (MidgasKaus) This is an object that contains an equal amount of energy, neutral, so to speak. You have a division into plus and minus. We call this “polarity of thinking.” This was preserved even in the doctrine of the planetary structure of the atom.

There are plus, minus and neutron - protons, electrons and neutrons. That is, male, female, average.

Alla: And neutral.

Irina: (MidgasCaus) Yes. You see, you have trinity of thinking everywhere.

Allah: Father, Son and Holy Spirit.

Irina: (MidgasKaus) I want to say that this fact has a deep philosophical spiritual meaning. Because your word “God” is masculine.

Alla: Yes.

Irina: (MidgasKaus) And your word “Spirit” is masculine. And, for example, your word “matter” is feminine. And the word “body” is neuter. What is meant here is that the Spirit enters into matter, just as a man marries a woman. And from this a body is born, which contains the energies of both matter and Spirit.

39:28 Language in Esler.

Alla: Interesting! I would never have thought about this! About speech. We now have a computer, and speech becomes simple, to correspond, to write faster. And this is reflected in communication. They say that earlier the speech was more detailed. It was a complex design. It's as if we are becoming simpler. Does their speech change? How do they talk to each other? Expanded? We have participial and participial phrases. If you compare it with Russian, with book text, our book text is more complex.

Irina: (MidgasKaus), For example, Esler is spoken in figurative language. There can be many synonyms for the same word.

Alla: Do you speak beautifully? There is such a culture of speech: speak beautifully? Diverse, synonymous?

Irina: (MidgasCaus) Yes. For example, we have such an understanding of how to call a person “incarnate Spirit.” Or call the child “The Light of my Soul.”

Alla: Such metaphorical language. Somehow it goes away for us. There used to be something that we also called “my swan”. And now briefly. No "swans".

Irina: (MidgasKaus) When people were compared to any animals, these are echoes of totemism. Man was credited with resembling a totem for various purposes.

41:29 Musical directions on Esler. Teaching children to sing.

Alla: Yes. Totemism. It's clear. Now I have questions about music. Do you have a tradition of singing?

Irina: (MidgasCaus) Yes. We love songs very much. Because songs are a combination of poetic creativity with the creativity of composing beautiful sounds combined into a melody. There is a melody of text, and there is a melody of music. And they must create a unique work that will give birth to the same images in the Soul of those listening that were born in the Soul of the poet and composer.

Alla: Is there a tradition of getting together and singing? Or do you have concerts, where everyone comes and sings? Or is it friends getting together and singing? Or both?

Irina: (MidgasCaus) We have concerts where everyone gathers and sings in turn. Or a specific performance plan for singers. And they also do, as you call it, tours of the Galaxy.

Alla: Do they teach children to sing in schools?

Irina: (MidgasKaus), Of course. We pay attention to this. Because when a person sings, unlike when he recites a poem, he puts more of his energies there from the chakra of the spiritual heart and the chakra of creativity.

Alla: Is your voice developing? Is it natural or not? How are you doing with this? For example, are there techniques for developing the voice so that a person becomes a singer? He says: “I want to be a singer.” They listen to him and say: “No. You have no voice, goodbye." Is it the same with you?

Irina: (MidgasKaus) It’s not like that with us. We don’t pay attention to the sound of the voice, but, firstly, to the meaning of this work. And the feelings that the singer expresses.

Alla: We have many different directions. For example: rock, pop, folk, bard song. We can divide all the songs into sacred music, which is sung in churches, and secular music. Do you have any divisions? And what are they connected to? With lyrics, with music? With the place where these songs are spoken?

Irina: (MidgasKaus) The ones we have depend on the type of musical instruments or their combinations, and on the tempo of the singing itself. And from the songs performed, we have no division into spiritual and non-spiritual.

They can be about completely different things. About the different experiences of the characters, about literary works, about historical periods, about some real life incidents.

Alla: Do you all know these songs well? We don't have songs that unite us. And they were before. What about you? Are there any common songs, or also based on interests?

Irina: (MidgasKaus) You know, I followed the work of various singers while I was not yet engaged in my work. On our planet, this is what women and children who are at home do most of all. And since I am almost constantly in contact with my contactees, then, of course, I pay

less attention to the songs.

But, first of all, they are important to us for the younger generation. There are a lot of songs that instill in the Souls of children love, compassion, empathy, the desire to help, the desire for the stars, etc.

I remember I came to Irina and translated one of the songs into Russian as best I could. Only there was no rhyme there. But I translated the meaning to her. For some reason she called this text too philosophical. But for us this is a normal song.

46:18 Art critics on Esler. Contents of the school curriculum on Esler.

Alla: For you, this is a kindergarten song, every child sings it. Do you have people who specialize in music as an academic field? Are there such musicologists? What are they doing? What are the subjects of their analysis?

Irina: (MidgasCaus) We have art historians.

Alla: So they are watching how it all happened?

Irina: (MidgasKaus) We have art historians who study the influence of various works of art on humans, on the noosphere of the planet, on civilization as a whole.

Alla: Great. And, accordingly, they can tell how to do spiritual cleansing of space and the planet with the help of music? Is it possible, purely theoretically, to contact such people?

Irina: (MidgasCaus) Of course you can, yes.

Alla: It seems to me that this is very important. And Mead said that through singing you can raise people's vibrations.

Irina: (MidgasKaus) You can. Our art historians study different styles of versification, rhythms of melodies that could better convey bright ideas to the minds of listeners. Moreover, even from different races.

Alla: Here. I want to learn this. I have a question about this. If possible, I ask about this too. Can I get this knowledge too?

Irina: (MidgasKaus) Yes, of course, you can get this knowledge. For us it is based on figurative thinking. We believe that any work of art (in this case a song) also contains images. And in order to understand which images will lead to the Light, you need to have knowledge about the science of imagery. I asked Irina if they teach the science of imagery in your schools?

Alla: We don't have that. This is also the knowledge that can be obtained from you, and also used to raise vibrations.

Irina: I told him that we teach this partly. Because in literature lessons we still write essays, describing different images.

Alla: We are literary heroes, we describe their characters. For us, this is not really about images, but about heroes. But in part, of course, something can be said. But not to the same extent as theirs, as I understand it.

Irina: (MidgasKaus) If you are listening to the song, I know that you have a music lesson.

Alla: Yes, of course. There is one at school.

Irina: (MidgasKaus) For example, the children listened to some song. It's a song, not just music. A song in a language they understand. So they listened to the performance of some singer. Then the teacher asks them what image this song carries?

Alla: No. At school in music class we just sing. That is, we come, they give us lyrics, and we just sing. All. We don't discuss this.

Irina: (MidgasCaus) I was surprised when Irina said that you are not studying this. How then can you understand artistic, and especially religious works? They are full of images.

Alla: Of course. It's complicated. We, psychologists, had classes in the Hermitage, where they explained to us the images embedded in certain paintings. But we were not taught this.

Irina: (MidgasKaus) Our children have a subject called “the science of imagery.” Do you think you need it?

Alla: I think we need a lot of things.

Irina: (MidgasKaus) The education sector is structured this way. In schools we give an understanding of life in our society, including family life and spiritual life.

Alla: We started doing some kind of family science. But the way they teach is not entirely harmonious. Children are more likely to be shy. We need to provide teachers who have good contact with children. There are too many things that don't get done.

Irina: (MidgasKaus) In our schools, for example, we have the subject “psychology of the Spirit.” Therefore, the structures of the Spirit are described, how emotions arise, how to work with them, what feelings they reflect.

Alla: It’s clear that we don’t have anything like that. We have materialism. And even if we have religious studies, now it is being introduced as quite alien. Because after so many years of atheism, everything is very complicated; children rather perceive it as history.

Irina: (MidgasKaus) We consider the psychology of the Spirit to be a fundamental subject, because without this subject a person will not be able to find himself in our society.

Alla: Yes. But in order to teach this, society must first be prepared. Our society is not ready for this yet. If you tell anyone about contacting, they all start saying “what is this?”, “What are you talking about?” Society is not ready because materialism is too ingrained.

Irina: (MidgasKaus) We have the psychology of the Spirit. Then there is a separate psychology of family relationships. This includes the psychology of mother and child and the psychology of man and woman. For example, in our school a child is taught how to interact with parents, how not to enter into conflicts with them, how to overcome age-related crises. Do you have this item?

Alla: We don’t have such an item. We now have psychologists at school, if a good psychologist (I have a good friend who conducts trainings for teenagers), she teaches them to work with themselves, with their parents, teaches them to harmonize, not to conflict. But she is a good psychologist. When I was at school, we didn’t have psychologists. This is a step forward.

Irina: (MidgasKaus) And for us this is a compulsory subject.

They also have a study of the Spiritual World, plasmoid civilizations, and they go into the Astral.

Alla: It would be good for us too. It's just easier for them. They have more of the Spirit embodied. I think it's easier for them to go out. With us it’s all more complicated. Thanks a lot! It was very interesting to me!

Irina: (MidgasKaus) Alla, in order for you to study this subject (how the song affects people) you need to study imagery of thinking. For example, take some Russian folk tale: “Kolobok”, “Swan Geese”, or some other one. Decipher these images that your ancestors put in.

Alla: I have such transcripts. This needs to be checked to see if I deciphered it correctly. When a person studies, the teacher says in dialogue whether he is going this way or not. For example, I studied.

Irina: (MidgasKaus) Through Irina, I conveyed to one of the project

administrators knowledge about how, firstly, human thinking works. What is imagination, where does it get these images, why are they needed, how reality is built with these images. This is called knowledge of imagery. If you want to do this, you need to ask Irina to also be a mediator.

Alla: We'll see later, yes. Of course I want to master it. I did this. I did this in a prison colony. I conducted classes with guys who were imprisoned for offenses, and we analyzed films with them. We looked at what images were embedded. I selected films for them that would help them understand.

Irina: (MidgasKaus) Alla, maybe you incarnated on Esler?

Alla: I don’t know, maybe she was incarnated. This is what you need to ask. The Higher Self is silent. Doesn't say where the incarnation took place. And so, who knows, maybe. Thank you! I won't delay. Best wishes! See you!

Irina: Thank you, dear friends! See you again!

August 14, 2021

Conference participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Alla - psychologist, doctor of cultural studies;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms.

#325 Reiki. What is Reiki? Sacred knowledge about healing from extraterrestrial civilizations. Reiki symbols

https://blog.cassiopeia.center/chto-takoe-rejki-sakralnye-znaniya-ob-iscelenii
https://www.youtube.com/watch?v=MBGpM1o3xzU

00:21 Introduction of participants.

Irina: Hello, dear friends. My name is Irina Podzorova. I am a contactee with extraterrestrial civilizations. Today we have a conference to answer questions from representatives of plasmoid civilizations and subtle-material spheres. Today I have two representatives of plasmoid civilizations with me. They call names. Shantiir, 21st level of density of the constellation Cygnus, star Deneb. Hello Shantiir. And Rahaimi, density level 38, Orion, globular cluster M-62.

Alexey: I am glad to welcome you today. My name is Alexey Lopatin. I am a master and teacher of Fire Dragon Reiki. This is a mix of a traditional school and a non-traditional school. Due to the fact that today there is some confusion in meanings and concepts, I would like to understand in more detail what Reiki is, what it is, with the help of Irina, our guests and friends?

Irina: Hello, I also have two representatives of humanoid civilizations with me. MidgasKaus from the planet Esler and LiShioni from the planet Shimor. Specialist biologist and specialist in astral interactions. They will also respond as needed.

02:20 The concept of “Reiki” among plasmoid civilizations.

Irina: In response to the question: “What is Reiki?” There are two representatives of plasmoid civilizations present here, whom I have

already introduced. They are directly related to this system. They are one of its creators and patrons.

(Rahaimi wants to answer, level 38, Orion). Hello, dear viewers, dear people of planet Earth, entities embodied in third-density matter on this planet. We give a different definition to what you call Reiki energy. Another definition of the concept of Reiki.

Reiki is the universal energy for the eleven plasmoid worlds. It is our source of existence, the basic energy station for feeding the creatures of our world, we process it with our thought forms. Already in a processed form and in a new frequency range we convey it to the people of the Earth (including the Earth, but only those of the Earth) in order to heal their nature. Thus, Reiki is divine energy, from a divine source.

Alexey: Thank you very much for your answer. Very capacious.

03:57 Creators of the Reiki system on Earth.

Alexey: Who and when first brought the knowledge of Reiki to planet Earth?

Irina: It was long before the war 12 thousand years ago. The civilizations of those cities that you designated as separate civilizations “Lemuria” and “Atlantis” already knew about us, about our civilizations. They could come into contact with us and bring the energies of the divine source to Earth. Thus, the creators of Reiki and its collaborators walk constantly next to you at all times of your life on Earth. Earthly collaborators of Reiki have been known at almost all times, in all countries. But if your question is about who made this theory the most popular, then it is (now shown) a man of oriental appearance, whose frequency response is about 30 thousand terahertz. He had a connection with a creature from the world of Vega, from the world of Deneb. He passed the energy on. He, together with his plasmoid curators, created a system for transferring this knowledge and these energies through a system of initiations.

5:54 Use of the Reiki system by Jesus Christ.

Alexey: Did Jesus Christ, in his earthly incarnation, really heal people and perform miracles, also using this energy? Or is that not true?

Irina: He used, among other things, the energy of our civilizations, the energy of Reiki, but not only. He used the energy of the divine, Spiritual world, the energy of the Earth's plasmoids and the energy of humanoid civilizations, their strength and knowledge. The fact is that in our understanding, energy is any manifestation of thought. For example, in the form of intelligence, knowledge or even a stone lying on the road, this is also energy. The answer from our ideological positions will be “yes.” He used the energy of both our worlds and others. All ways of obtaining energy and transforming it for healing, restoring the integrity of the material nature with the spiritual were open to this spiritual personality, highest in awareness.

Alexey: Thanks for the answer.

7:15 Reiki safety. Energy effects of Reiki.

Alexey: Is Reiki energy safe at all?

Irina: What is the danger?

Alexey: People may think: “Is it dangerous for me to practice Reiki or not?” They think about their mental health, energetic, physiological, etc. From your point of view, in this context, is Reiki energy dangerous? Or is it completely safe and can be used by anyone?

Irina: Does the word “danger” imply the possibility of change?

Alexey: More likely negative changes, in this sense.

Irina: That is, can Reiki energy lead to negative changes?

Alexey: Consequences, yes.

Irina: Consequences are changes.

Alexey: I mean in a negative way.

Irina: That is, to lower vibrations?

Alexey: Lowering vibrations, causing diseases. What people understand is that they are not versed in this system. People from the outside who know nothing about this energy.

Irina: If people don't know anything about this energy, what is their purpose for coming into contact with this system? Without understanding the question, I cannot correctly answer the degree of its influence.

Alexey: For example, there are books about Reiki and information on the Internet. A person may come across information and read that this system can help in healing, wellness, and spiritual development. Here the thought may arise: will the practice be safe? Or could it still pose some kind of danger?

Irina: The question of danger or safety depends on the subjective attitude to the so-called "comfort zone". If for a person his painful state of mind, soul and body is a comfort zone, then leaving it is dangerous for him.

Reiki energy is aimed at harmonizing the embodied part of a person's Soul with his Higher Self, with the disembodied part. It is aimed at harmonizing the exchange between all energy bodies of the human aura. And this, as a consequence, should lead to a change in the frequency characteristics of the internal organs of the physical body, to their adjustment to the reference frequency given at birth. This leads to healing, that is, to the restoration of the integrity of a person's consciousness with God, if a person does not resist this, does not consider these changes and vibrations dangerous, as you said.

If he is wary and suspicious, then the Reiki energy ceases to affect him, since the entities that use it respect freedom of choice. Therefore, this holistic healing does not occur. And the healing of the physical body is a consequence of a change in a person's spiritual characteristics, which occurs through his awareness. Reiki helps this, since in a Reiki session not only energy is supplied to the etheric field and the frequencies of the physical body change, but also thought forms are supplied to its mental field about the desirability of changes that contribute to the beginning of development on the spiritual path, if we are talking about beginners in spiritual practices .

Alexey: Thanks for the answer. He combined several of my follow-up questions.

12:06 Reiki system and religious egregors.

Alexey: At the end of the nineteenth century, samurai Mikao Usui lived in Japan. He was Japanese. Lived in Japan. We know from oral tradition that he was interested in Buddhism. Studied Buddhist sutras. There he discovered some healing methods, they interested him. Subsequently, Mikao Usui went to Mount Kurama, where he meditated for 21 days. After this period, a luminous ball descended on him, as the oral tradition says, and knowledge about this system entered into him. An inner insight occurred, he suddenly understood how to use it.

Here's the question. Please answer, how is this Reiki energy connected with Buddhist sutras, Buddhist practices, and the Buddhist worldview in general? Are they related at all?

Irina: We don't know, we don't take into account your earthly names. The person you spoke about was a Spirit incarnated in third density, one of the contactees. What you said about the ball descending on him was a contact with a high-vibration plasmoid entity that carried knowledge about Reiki and was one of the creators of this system.

He established contact with her. He began to pass on the knowledge that he received from this shining ball to others. And not only knowledge, but also the ability to connect others. He called this possibility of connection initiation.

As for his connection with the Buddhist egregor. The fact is that Reiki, as the universal energy of the divine source of all flows of life energy in eleven plasmoid civilizations, is completely compatible with any religious egregor on Earth, the ideas of which bring Light, goodness, Love and increased vibrations. There are people - contactees who practice Reiki. They can belong to different religious egregors, use the symbols of this egregor, and combine this in their consciousness with Reiki energy. And it will work.

Each Reiki master is individually provided with curators from plasmoid civilizations; there can be an average of 3 to 15 of them. At initiation, everyone is given a personal guide, a representative of plasmoid civilizations. First one, and then more representatives of plasmoid civilizations are added. With each student, with each new level of initiation. And they, being in contact with the energy-informational essence of the Reiki master, read his vibrational characteristics from his religious egregor, in which he is located, and which he supports with his thoughts. Depending on the religious beliefs of the contactee, his plasmoid Reiki handlers will give him energy through his symbols. They will not destroy a person's faith in bright symbols, even if it differs from their ideas. This is considered unethical.

Alexey: Thanks for the answer.

16:37 Remote initiations in Reiki.

Alexey: We touched on the topic of initiation and described the meaning in detail. In the tradition of Mikao Usui, all initiations were carried out through contact. Today there is a fashion for conducting remote initiations. This is due, first of all, to the fact that from the second stage of Reiki, any initiated practitioner can conduct remote sessions. Is there a significant difference between contact, face-to-face initiation and remote initiation?

Irina: It all depends on the ability of the initiating teacher to correctly concentrate energy and send a request about who he is initiating to his Reiki channel. This can also be done at a distance by placing your phantom near the initiated student. A phantom can be created with the universal command of separating a part of your mental body and

endowing it with vital force. The phantom will be present next to the student in the astral space, and with him will be a plasmoid, which will be assigned to this student after initiation. The only condition for successful initiation (both with physical presence and with energy) is voluntary and conscious consent: the one who initiates - to take the candidate as a student and the one who is initiated - to use this system for good purposes.

Alexey: Thank you for your answer.

18:56 Reiki Schools.

Alexey: The next question is related to the various schools of Reiki.

The word "Reiki" is Japanese, it came from Japan, from Mikao Usui. “Rei” is translated as “Spirit”, “Universe”, and “ki” - “energy flows”. Thus, the word itself means “universal universal energy.” But in the Usui tradition this word is understood in a certain way. There is a certain meaning attached. Today there are different schools that use the Japanese word, but have a completely different meaning. In connection with this question. Why do such new different schools, different directions appear, how are they related to each other, what are their differences?

Irina: The Reiki school, as a specific direction for using this energy, can be created by an individual master depending on his terminology, his worldview, his personal experience in using this energy, as well as his experience of incarnation in various civilizations, and so on. The master may use different terminology. But terminology does not affect the essence of energy. If you call a colorless liquid “hydr” or “water”, its essence will not change.

So is Reiki energy. If you call it different terms, give it different meanings, then only the terminological apparatus will change. When turning to universal energy, the curator still comes and does his work.

Why are there many schools? Because the main feature of your civilization is separation: this is one of the planets on which it is

possible for completely different beliefs and opinions about the same subject to exist in the same space and in the same time. To come here for incarnation, you must have a certain vibrational level and the task of adapting to work in such conditions.

Alexey: Thank you for your answer. Next question.

22:26 Age of initiation into Reiki. Barriers to initiation.

Alexey: To whom and at what age can the Reiki channel be opened, and are there any contraindications?

Irina: Do you mean initiation?

Alexey: Yes.

Irina: If specifically for the purpose of treatment, it is advisable to do this only after separation from contact with the parents. The contact itself can be made with children under 14 years of age. But initiation for the purpose of healing and initiating others can be fully carried out only when a person acquires his own energy structure, which happens in your world at the age of 14. Not earlier.

Contraindications are: lack of awareness (when a person does not understand what Reiki energy is needed for), lack of voluntary consent (if a person does not agree with the five principles of Reiki regarding the correct use of one's life force in different situations). The commandments are repeated, in this case Buddhist. But the five Buddhist commandments express ten Jewish and Christian ones, although the emphasis is placed slightly differently.

Another contraindication for initiation is such a state of the initiate's aura when he has beliefs and mental attitudes that are incompatible with the path of spiritual development. For example, if he is a materialist, he in no way recognizes the priority of the spiritual path. It will transmit energy distortedly. Or if he has a strong resentment, some unprocessed situation. Energy will also be transmitted distortedly through it. And the flow of energy that will pass through the Reiki

master during initiation can move this block from its place, and if a person is not ready to get rid of it, then this can lead to various mental phenomena that may be regarded by him as undesirable. Or if there are doubts and distrust in this system, doubt that it brings Light. This also introduces distortions.

We treat every person with kindness, love and respect, but the frequency characteristics of our subtle bodies are different from yours. Therefore, our advice to those who connect to us not just for treatment, but for initiation. How is initiation different from treatment? Constant contact. And we have rather a wish for people, which can be assessed by you as an increased requirement, but this condition is not only for your safety, but for our comfortable, prosperous and optimal interaction to achieve the goals of Reiki. Any strong passion and negative emotions can interfere with this initiation. Because these energies were initially created by plasmoid civilizations only for sufficiently conscious people who understood the priority and primacy of Spirit over matter, spiritual development over material well-being, and so on.

Alexey: Thanks for the answer. It really reveals the meaning of our preparations, because we take initiations very carefully and seriously. And, of course, this does not apply to every person. A person who is preparing for initiation goes through a certain stage of preparation and work. The principles of Mikao Usui, the five principles (be grateful, just today don't be angry, just today don't worry, treat the entire universe with respect) are truly spiritual and moral beliefs, positions that develop a person in a spiritual and moral orientation, and further development only deepens .

28:30 Reiki symbols, their number, meaning.

Alexey: Tell me, please answer this question. In ancient times (again, legend, oral tradition tells us this) there were 300 Reiki symbols. The symbol is an energy vibrational key. But over time, knowledge about these symbols was lost. Traditional Reiki today uses 5 symbols. In non-traditional - from 22 to 50. Will the knowledge of all Reiki symbols be returned to us over time?

Irina: Each Reiki symbol represents a specific entity. This essence can change when it leaves incarnation in our subtle-material world or

when it moves to another job. But the symbol itself remains unchanged. This, in your opinion, is a designation of a certain, I would not say profession, but rather a certain vibrational frequency at which entities come. Most often, of course, the same thing comes. But it cannot be said that the entity named Alexander is invoked by this symbol. Alexander, who is in a different place, can transfer his powers to another. He will be his full representative. But it will still be considered that Alexander has come.

So, the number of symbols is actually not 50, not 20, not 5 or 300. In fact, there are approximately 20 million entities that work in the Reiki system from eleven civilizations on Earth today. And each can designate itself with a certain symbol if it deems it necessary, because many come simply along the flow.

It is impossible to represent everyone with one symbol or five symbols. Therefore, those entities still come to each session (they can change in each session) who deal with a certain problem or a certain disease. Or they can provide certain energy for building the correct channel between the causal and mental fields of a person to structure his aura.

Can new symbols be given? They can be given to contactees, that is, conscious people who can request them for their contact. During the session, you can do Reiki on yourself, not only on the person who came. You can open the Reiki channel, which consists of many frequencies, to yourself by calling on this energy. “Summon energy” means to call upon its carrier. You can feel their approach and their arrival by entering a state of communication through your spiritual channel, which every person has, and ask them for names and symbols. For example, now we can show Irina our symbols.

They show me symbols, but they are not like symbols. This is what their bodies look like. Now one of them showed me an elongated bluish-blue crystal, inside of which there is a yellow stripe from which silvery light comes. Only this is not a tube, but a multifaceted crystal, pointed at the top with a cone, but multifaceted.

And the second one is in the form of a dark red ball, inside of which there is some kind of transparent structure, like a network, which also represents some kind of complex figure that I can’t even name. There

is some kind of interweaving, and there is a white light inside this red ball. They have certain images that they can send, like symbols, like their name. Moreover, they remember it themselves. They say this is the name of an entity, conveyed not by earthly sounds, but simply by mental images. Before the war 12 thousand years ago, the ancient priests who came into contact with our representatives simply designated all this with runes or their combinations.

Alexey: Thank you very much for your answer. Very interesting. A couple more questions, and we'll probably wrap it up.

34:35 Classical medicine and Reiki. The principle of healing in the Reiki system.

Alexey: Abroad, in many cities and countries (according to information from the Internet, for example, in Israel, Japan, France, England, USA) there are Reiki clinics. There, people with medical training use the Reiki method as a complement to drug treatment. In this regard: is the Reiki method sufficiently harmonious and effective in treating many diseases? Can it be used in our medicine, in Russia?

Irina: Any drug is a combination of chemicals, which we consider as a special energy, which, entering the energy-informational field in the dense material phase of existence, changes its frequency characteristics. Simply put, the drug changes the vibrations of the body. If this drug acts on the cause of a physical disease, then this action is in one direction, synergistic, synergistic with our action. Only this comes from the physical body, and we come from the etheric.

But if this drug introduces dissonance into other systems of the body, then this also affects the frequencies of the organs. And this already introduces dissonance with our energies. And here you can both help and hinder. Depending on the use of drugs.

As for Russian medicine. I have very little idea about the division of earthly creatures into countries. I only feel and know that there are political egregors. But I was never incarnated in your earthly world. I was incarnated in other humanoid worlds. Judging by the political egregors, there was nothing similar to your earthly societies.

Therefore, I have little idea of how Russia differs from the society you call Western. I believe that the use of Reiki is possible in any country and under any political regime, since it is a universal energy that heals diseases.

When I say “healing disease,” please do not understand this in the utilitarian sense of therapeutic treatment by chemical and physical methods. By healing a disease we mean increasing the vibrations of the Spirit, bringing it closer to the Divine Light, eliminating distortions that are perceived as blocks in the aura and illness of the Soul and Spirit. Diseases in our understanding are something that violates the integrity of the body, Soul and Spirit, a certain deficiency that needs to be filled with Light.

Alexey: Thank you for your answer.

39:00 People's perception of Reiki sessions.

Alexey: During sessions, remote or contact, 95-96% of patients feel a clear impact and improvement in their emotional, physical and other states. They perceive energy as heat, cold, tingling, as various movements inside and outside the body, but there are cases, although they are rare, when a person does not feel anything at all. How can you explain such cases when a person does not perceive or feel anything during a Reiki session?

Irina: Sensitivity to the energetic influences of creatures above the ninth density level varies. It depends on the type of perception of a particular Spirit. If he is tuned, for example, to the visual channel of information, he can see images, different colors, images of energies. If he is tuned to the etheric-corporeal channel of perception, then he can feel the movement of energies in the body. If he is tuned to the etheric-temperature type of perception, then he can feel the temperature change. If he is simply tuned into his spiritual channel, he can even perceive mental images of those beings who come to him. He can communicate with them. If he has an astral type of perception, then during a session he can go on an astral journey, separate from the physical body, if he has a tendency to do so. If he has an auditory perception channel, he can perceive it as noise in his head or in different parts of his body. And so on. It depends on the type of

perception.

If he does not feel anything at all, perhaps his type of perception is not directed to the etheric body, not to the visual channel, and so on, but is directed to the spiritual channel, that is, he is mentally tuned to communicate, but his sensitivity is more tuned to the spiritual channel. He’s just not in the mood, doesn’t know how to communicate, how to ask questions, and so on. Therefore, he simply perceives the thoughts that come to him as his fantasies. This is quite possible. Or he is simply distracted by something, by his thoughts, for example, and does not listen to his own feelings. But work with him proceeds in any case, as soon as he made a request to a Reiki master or to a person dedicated to them, and he himself gave voluntary consent to participate in his healing of our forces. His consent is expressed by agreeing to undergo this session. We do not refuse help to anyone.

Alexey: Thank you for your answers. Very informative. I hope these answers will help many people understand what Reiki is, thanks to you. I thank Irina for this evening, for her time and attention to this topic. Indeed, the topic is interesting, popular, and it requires answers. All the best. Hope. That the time will come and we will see you at your school. And I encourage Reiki masters to take advanced training courses from Irina Podzorova and Maxim Rusan, because the answers are deep. You can feel the energy, you can feel the guides and curators who are present today. It's really noticeable from a distance. Such communication is useful.

Maxim: Alexey, thank you very much. We have no other task than to bring the Light of awareness, Love and perception of our Creator.

Irina: And thank you for the interesting questions and (relayed by the Reiki curators) for the fact that you worthily carry the Light that you received from your teacher and pass it on.

Maxim: See you again.

Alexey: Goodbye.

August 17, 2021

Conference participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Alexey Lopatin – master from the city of Nalchik, teacher of the Fire Dragon Reiki school;

Shantiir – plasmoid of the 21st density level, constellation Cygnus, star Deneb;

Rahaimi – plasmoid of the 38th density level, constellation Orion, globular cluster M-62;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms;

LiShioni is a representative of the planet Shimor, a sociologist, a specialist in the astral world and its interactions with the material world.

#329 Physical contact. Irina Podzorova visited the alien base under Lake Baikal! Real contact with aliens. Part 1.

https://blog.cassiopeia.center/fizicheskij-kontakt-irina-podzorova-posetila-bazu
https://www.youtube.com/watch?v=gowrJo-B_ck

00:22 Introduction of participants.

Vladimir: Dear friends, I greet all our subscribers. My name is Vladimir Goldstein, if anyone is not familiar with me. But I am sure that all of you are already familiar, definitely know and recognize our charming, beloved and dear Irina Podzorova. Today we have a special moment, because it's about one o'clock in the morning in Voronezh, today is already August 15th. And Irina, literally, just returned from physical contact, which consisted in the fact that she was at one of the alien Baikal bases. At one of the bases located under Lake Baikal. And we will find out all the other details together with you right now, Hello, Irina!

Irina: Hello, dear friends, hello, Vladimir. I convey greetings to you from Kirchiton and from the employees of the Tikhtian base on the territory of Lake Baikal.

Vladimir: How did your meeting with Kirchiton happen today? What was there? Were there any features or differences from past contacts?

Irina: Today I waited for Kirchiton for about 10 minutes. He appeared: a star appeared and lit up above me. At first I thought there was some kind of flash, but then I realized that I was being lifted up. I was just holding the phone in my hands, I wanted to check the time. At that moment it went out, I put it away, I had my purse with me. That's all. I

was already on board the ship.

He now has a new modification of the plate, much larger, with an artificial gravity device. Everything went as usual, I sat down on a chair. Kirchiton said that we agreed to fly to the Tikhtian base. We had a conversation about visiting the Pleiadian base, which is also on Baikal, but he said that this would be another time, because most likely we would not have time. Even earlier, in mental contact, I told him what questions I had, or rather, we all had. I told him who sent these questions. He said: “Okay, then we will visit the base of the planet Tikht, especially since it belongs to the Interstellar Union.”

03:04 Differences between the base of the planet Tikht and the base of the Pleiades.

Vladimir: Come on, we’ll clarify here. The Pleiades base is obviously Futissa's base. That is, it belongs to the Galactic Federation of Light, because Futissa is precisely the capital of the Galactic Federation of Light. And they are not formally part of the Interstellar Union, right?

Irina: Yes. They are the base of Futissa, but there are other civilizations there, they equally own it.

Vladimir: I see. And so, you flew with him on a modified saucer. We flew to Baikal. Tell us more about this.

Irina: I sat down and began to look out the window. I want to say that in this new dish the windows are no longer as high as they were in the last one, where I could not reach. And in this one, sitting on a chair, I could look out the window, not to look out completely, but at eye level.

Weightlessness, of course, could not exist there, because we did not leave the Earth. I say: “Where are we flying now?” I started asking. He says: “We are flying above the Earth at an altitude of 55 km, no more. We have a special plasma field that protects us from detection by various aircraft and radars. The radar detector is on."

Vladimir: Come on, I’ll explain what their radar detector is. If I'm

wrong, correct me. As far as I know, the dish receives the radar signal and thus returns it to the signal transmitter as if there was nothing there, as if the radar had not encountered anything, right?

Irina: Yes, she can modify radio signals so that they show absence.

04:57 Types of engines of alien aircraft.

Vladimir: About how long did it take you to fly from Voronezh to Baikal?

Irina: It seemed to me about two or three minutes, no more than five minutes, in any case. I managed to tell him about the questions and look out the window. And when I looked out the large round window, the ground was not visible. Only the stars were visible. I saw the dots and realized that they were stars. They flew back quickly, quickly, as if you were on a train. I had to stand up to see the ground. I couldn't see her. Then I realized that the stars had disappeared. Not black, but gray space and white small bubbles appeared. I asked: “What is this?”

He replied that we had entered the waters of Lake Baikal because the entrance to the base was underwater. Before entering the water, in a few tens of seconds, 20-25, he must fly as close to the water as possible and turn off the plasma field, which protects against overloads and birds, so that they feel it and are safe. And, as he said, from small particles. It happens that a meteorite or space debris falls, this quite often happens when it burns up in the upper layers of the atmosphere. And we were flying where he could hit us. And the most important thing is that this field slows down inertia, that is, during sudden braking, a person will not feel anything. I asked, “Which engine is on?” - “Atmospheric.”

Previously, he told me on what principle the atmospheric engine is based. It is based on the principle of repulsion and attraction of the Earth's gravitational field. To the Earth's magnetic field - a planetary engine. The Earth’s gravitational field is an intra-atmospheric engine, and plus it can fly higher or lower, and can hover in one place. He does this by controlling a field that screens gravity, either attracts or repels, or looks for inhomogeneities in the gravitational field. As he

said, they always exist and depend on the terrain, the quantity and quality of the earth's rocks.

Vladimir: Come on, we will clarify for those who do not quite know all the materials that it is possible for these devices to move on an atmospheric engine and on a planetary engine, if between planets. And finally, there is also a gravitational engine, with the help of which alien ships move over very long distances, between different points in the Galaxy. The fastest is a gravitational engine, and the slowest, slowest is an atmospheric engine, with the help of which you got from Voronezh to the Baikal region.

Irina: Yes, I was also surprised that Kirchiton came up to me and did not stand near the table with cutlery. He said he turned on automatic control. I just set the trajectory, and it controls itself.

Vladimir: This is just clear - autopilot. Tell me, did you have any sensations when the plate entered the water?

Irina: No. I just realized that the color outside the window had changed. I didn't feel that we went down or that anything hit. This didn't happen, I didn't feel it.

Vladimir: So, it means that Lake Baikal was already smooth. Water outside the window.

Irina: He said that we had already gone under water. I asked him: "What are these bubbles?"

09:53 The influence of the plasma field on fauna.

Irina: He replied that he must turn off the plasma field 20-25 seconds before entering the water, so as not to heat the water and harm the fish.

Vladimir: So as not to destroy the fauna of Lake Baikal due to technical issues related to the aircraft?

Irina: It has a very high temperature, and water can boil over many tens of meters. There won't be any fish there anymore.

Vladimir: Of course, fried or boiled. Those. turned off the plasma field, you entered the water.

Irina: I also asked him: “If the plasma field was turned on, how could I see the stars?” And he says that the ship, when its plasma field is turned on, reads the surrounding space and somehow transmits, although there is a plasma field outside.

Vladimir: It turns out that you didn’t see them directly, but the ship showed you what the stars look like now. Like on TV, conditionally.

Irina: Yes, but I want to say that I saw them as if outside the window, and not as if in the window. I tell him: “I’m supposed to see the plasma field?” He replied that they could be switched, and that then I would see a bright, white light. Or you can close it altogether. Then it will just be a wall. Or you can turn on a real image of where you are flying. It's different there.

When we were flying, I asked him: “How are these images transmitted? It’s not a TV, it’s a window?” He replied that the window has built-in elements that read the image from the computer and transmit it.

Vladimir: I see.

12:00 Exterior of Kyrchyton.

Vladimir: Please tell me, how did you find Kirchiton, what does he look like, how is he doing?

Irina: (Smiling, shows a toy in the form of Kirchiton). Approximately, like this!

Vladimir: That is, everything is fine: the mood is cheerful, ready for new achievements.

Irina: Yes, he looks: three meters tall, he has no neck, dark gray skin color. Three eyes: two yellow, one red. Since he has no neck, he turns with his whole body. Nose - two holes. Mouth with thin lips. The ears are also like two holes without auricles. No hair. Five fingers on each hand.

Vladimir: Anyone who wants to know all the details about Kirchiton can look at our past materials about Irina's first meetings with Kirchiton.

Now let's move on.

13:06 Immersion in water.

Irina: As soon as we entered the water, I asked about the bubbles. He said: "Since we enter the water quickly, the air follows us and immediately goes up in the form of bubbles, and you see it."

Less than a minute passed. I only had time to ask this, he answered me, and then again everything became dark outside the window. And after a few seconds Kirchiton told me: "Let's go out!" I didn't even feel the takeoff or stop, it didn't happen.

13:43 Interior of the Tikht base.

Irina: When we came out, I saw, in my own words, it didn't look like a cave, like, for example, on the lunar base. It looked like some kind of metal garage. This space is maybe three times larger than our room. In addition to the plate, there was some kind of device that looked like a spider. As they later explained to me, it was a robot. He had mechanical legs and was about just above my knee height. It was standing somewhere in the corner. There was one plate. The floor was also metal, made of some kind of gray sheets, but it was clearly metal. The ceiling was made of metal, not shiny, dull. Both the walls and the floor.

Vladimir: Come on, we'll now remind you that this was precisely the base of the planet Tikht. And let's remind our viewers where the planet Tikht is located.

15:07 Location of the planet Tikht.

Irina: Planet Tikht is located in the constellation Sculptor at a distance of about 700 light years, as far as I remember.

Vladimir: One of the planets included in the Interstellar Union.

Irina: Yes, one of the planets included in the Interstellar Union, which I visited earlier in 2018, I have an article about it on VKontakte.

Vladimir: Yes, you can read all the details about Irina's visit to the planet Ticht; many will probably want to. And now Irina and I are listening. She found herself under the surface of Lake Baikal at the base of the planet Ticht. What happened next?

15:48 Location of the Tikht base on Lake Baikal. Description of the Tikhtian base.

Irina: She's not at the very bottom. She's inside.

Vladimir: That is, it is located, as it were, inside an underwater slope. Not at the bottom of Lake Baikal, but on a slope that goes to the bottom, right?

Irina: He told me that there is an entrance on the slope, there is one of the entrances somewhere on the shore, and there is one of the entrances at the bottom.

Vladimir: So, at that very record depth of Lake Baikal, there is also one of the entrances?

Irina: He didn’t tell me where exactly, at what place in Lake Baikal this entrance is, or what the depth is, I didn’t ask him that. He said that simply, he is. We left the plate along the stairs; it was already standing on four supports. The plate itself was also the same metallic color, but it was lighter than the walls. I looked again: the light came from nowhere, as if without lamps, without anything, without lanterns. It smelled, it seemed to me, of some kind of dampness, like raw metal, I call it. It was as if rain was falling on the roof, that's the smell.

Vladimir: Tell me, Kirchiton did not explain, how do they cope with the enormous water pressure at the bottom of Lake Baikal, if there is an entrance there? How do they technically solve this problem so that it does not crush the plates under pressure?

Irina: The water pressure is no more than the earth pressure, and they have some of their bases in the coastal area.

Vladimir: Yes. They have some technical methods and means by which they solve this problem. We don’t know them yet, we’ll need to ask again. Continue.

Irina: Kirchiton came out first, I followed him. I felt a wet smell and said: “Where are we? Are we at the bottom of Lake Baikal? And he says: “No. We're at the bottom. They'll tell you everything. I haven't studied this database in detail; where is it located, at what depth.”

18:03 Automatic alien translator. Lighting based on Ticht.

Irina: (Kirkhiton speaks). I think the specialist who works here will tell you now. Only he doesn’t know either Russian or Daraal, so I have a translator.

The translator is a box like a player, the size of half a battery, dark in color, flat, 2-3 cm wide. And he said that this translator is already configured in advance not for the Daraal language, but for Russian, because he and I understand it. He said that the Russian language is embedded, and that they have special programs that will directly translate from Tikhtian into Russian and vice versa. Tikhtian is also

programmed, and they are programmed to translate for each other. And it will be in the form of sounds that will come out of this box. I immediately asked him how it catches it. He said that with the help of special programs, like in virtual reality, that is, like our computer programs.

Vladimir: Voice recognition system of the Interstellar Union.

Irina: They are not only a voice, they also recognize words and the meaning embedded in them.

Vladimir: Yes, I see. What happened next?

Irina: We went out without suits, as usual. And while we were talking to him, I heard what sounded like something clinking against metal against metal. We stood near the plate, I was opposite Kirkhiton, we were talking, there was a bright white light everywhere, but I noticed that it was not as bright as, for example, Kirkhiton on the ship. It's dimmer there. And I noticed that on all sides there was not even a distinct shadow. And the light was not so bright, as if dimmed.

20:55 Appearance of the Tikhtians. Entry device to the Tichta base.

Irina: I was paying attention to all this, talking with Kirchiton, and to my left I heard a sound, like metal clanking on metal. It rang, and seemed to be grinding, but quiet. I turned my head, Kirchiton turned. And I saw that instead of one of the walls (it was probably about five meters away from us), there was already a doorway in the shape of an arch, and two Tikhtians were standing. Now I'll tell you what they looked like.

When I saw them, I said: "Kirkhiton, I forgot to ask you, how did we get here? There doesn't seem to be a hole here, not even an opening. Did we get here through some kind of well?" He says: "No. There is a passage, but it is not in the ceiling, but in one of the walls. There is such a tunnel there, it was simply closed so that the water pressure would not squeeze anything out here, no dirt, no water. It closes

immediately."

Some kind of system pumps out water (from the system in this tunnel) and then closes it. He said that there was such a pipe there. It's all automatic.

22:25 Appearance of the Tikhtians.

Irina: After that he says: “Let’s go.” These two Tikhtians were standing, we approached them, they look like this. These are the Tikhtians, to whom I flew to their planet for the first time, they looked like this: they had white skin, like the Burkhadians, but the difference was that they had such a triangular head. A wide forehead and chin, like a triangle, and big blue eyes, like glasses. They are huge, somewhat square. They were about chest-deep to me, those Tikhtians.

And these also had white skin, but they were even a little taller than me, but not like Kirchiton. They had a different head shape, more oval, also blue eyes, but they were narrower, not so square, but rectangular. The nose protruded slightly above the face, like a tubercle, and a small mouth.

We entered, I said: “Hello!” But they just nodded and didn't say anything. Kirchiton said that now they are taking us to someone with whom we can talk.

I told him: “Why did you take me to other Tikhtians? Somehow they are not very similar.” He says: “There are more than 20 races on this planet Tikht, I don’t remember exactly. There are more than 20 different nationalities, they differ from each other in eye structure and height. Now you just see others, a different race, not the one I took you to.”

24:24 Material for the construction of the base of the planet Tikht.

Irina: We went through this arch, and there was, like, a tunnel, for some reason it was dark red. At first I thought it was a brick, but it was

some kind of metal. I touched him. It was warm and felt metallic. Kirchiton was walking, I stopped to touch it. He stopped next to me. I say: “What kind of rust is this, is it rusted from water or something?” He said: “No, it’s just such an alloy.”

25:03 The sound of the language of the Tikhtians. Alien furniture.

Irina: Then we went after these Tikhtians. We walked down the corridor, maybe 15 steps, so be it. And then, I didn’t even notice how, without turning anywhere, another arch appeared in front of us, and we were already entering a room where in the middle there was a square table, several Tikhtians were sitting. There were five or six of them. And, by the way, three of them definitely had square eyes, with big blue eyes. That first race from Tikht that I talked about. They looked at us, didn’t stand up, and said something to each other. And when they speak, their sounds are abrupt, similar to some kind of chirping, that is, the letters P and T, as if connected.

Vladimir: Was there a language on Earth, the ancestors of which were the Tikhtians?

Irina: They didn’t tell me about Tikhtian. Somehow there are few vowels there, it seemed to me. And their tone of voice was similar to earthly, like a whisper, but it was, like, with such tension. You had to listen when they spoke.

Then we went to the table. The director of the base was sitting there, and he pointed to a place, I wouldn’t call it a chair, but one with a back, like a chair. The size suited my height. You sit down calmly, it was also light gray in color. It reminded me of the chairs that Kirchiton used to have on the ship. It was also like plastic, it also did not separate from the floor, only there was no wall, it just sat at a table. Opposite, sat a Tikhtian who was tall, taller than me, that second race, as I call them. With narrow blue eyes. By the way, no matter how hard I looked, they don’t have pupils, just like the color blue.

I sat down, Kirchiton stood next to me, he stood to my right. I put this box on the table. And when he said it was okay to talk, I started first. I say: “Hello, my name is Irina. I'm from planet Earth. I have a few

questions for you. I welcome you to your base. I say hello to you. I am a contactee for Kirchiton. We have a project called Cassiopeia. While I was talking, he sat and was silent. And then, as soon as I said the last word, a set of sounds, like a crackling sound, began to be heard from this box. To be honest, it didn't remind me much of the ones they used to talk to each other. Firstly, it was louder, and somehow in a different tone. But, nevertheless, he sat there and listened. It made several sounds similar to a crack, the same, but only quieter. And then a voice was heard from the box, somewhat reminiscent of Kirchiton, but only in Russian, a male voice, only not so low. And he clearly separated words from each other, as if not a person speaks, but like a machine.

Vladimir: Robotic voice of a translator.

Irina: Yes. This reminded me, I remember when I was talking to Mitya, it was the same, only a different tone, it seemed to me.

Vladimir: The automatic translator synthesizes words and voice.

Irina: And this voice said: "I welcome you, you can ask your questions." I am talking now". I had my purse with me, I took a notepad with me in which I could write down questions and answers so as not to forget anything. I take a notepad with me because the phone there does not work on extraterrestrial objects, on a plate, and everywhere Kirchiton took me, the phone did not work.

And I also want to tell you that for the first time in 21 years of contact, Kirchiton physically took me to the Earth base. Before that, he had never taken me there, to any base at all, physically.

Vladimir: Just to Mars and to the distant planets of the Galaxy.

Irina: Yes. To the center of the Galaxy, to Burkhad, but not to the base.

Vladimir: Show me your notebook, please. Can I look at it?

Irina: Yes, the same notebook.

Vladimir: Here, friends, this notebook was on Mars, in a ship inside Mars, and it was at the Tikhtian base near Baikal, lying somewhere on a table. You can admire the earthly notebook, which has already traveled and been next to aliens in their ships.

Did this Tikhtian introduce himself? Did he say his name?

31:21 Director of the Tikhtian base Lags Rhumir.

Irina: Yes, of course. He said his name. His name is Lags Rhumir. At least he made some similar sounds. They didn't sound like that, they were shorter, and the "l" was different, I can't reproduce it. But the translator translated it that way. He translated the name not as some name, but as his name. He was probably so determined. And I started asking questions.

Vladimir: What is his position, who is he at this base?

Irina: He said that he is a biologist-oceanologist, that is, he studies biology in the oceans, and he is the director of the base.

Vladimir: By profession he is an oceanologist, and by position he is the director of the base.

Irina: By scientific specialty he is a biologist-oceanologist. I also thought, as I understand it, this word was just translated like that, and he was just studying water bodies there.

32:30 Bases of the planet Tikht, their location on Earth.

Irina: Then I asked him: "This is the base of your civilization, and how many other bases of your civilization are there on Earth? And where exactly? He told me that there are 15 Tikhtian bases in total on Earth. There is one on the Moon - a big one, that is, there are small ones

here. He told me that there is on Baikal, there is also in the Arkhangelsk region, in Northern Tibet, somewhere off the coast of Japan, near Antarctica (I wrote it down), South America, the Southeast Pacific Ocean, southern Germany and the Northeastern USA.

Vladimir: I see. Thank you.

Irina: He listed several for me, I wrote them down. Then I asked: “What are the functions of this database?” I wrote everything that the translator said. When it turned off (I shortened the words to write it down), everyone was silent until I wrote it down.

Vladimir: You simply took notes, as if at a lecture. Can you show me now what you wrote? Show to the camera.

Irina: (Shows the notebook to the camera). I wrote like this, I was in a hurry.

Vladimir: Look, Irina wrote this down with her own hand on the table, sitting on this Tikhtian base under the bottom of Lake Baikal.

Irina: I wrote with this pen.

Vladimir: With this, now, historical pen. By chance, did Kirchiton or the director of the base hold this pen in their hands?

Irina: No. I wrote to her.

Vladimir: Well, maybe they signed it and left an autograph? Well there is no way. Fine.

34:44 Functions of the base of the planet Tikht on Lake Baikal.

Irina: (Smiles). Now I will tell you in order. I asked him: “What are the functions of this base?” He said (reading): “Monitor the environmental

situation on Baikal and in the Baikal region. Look for contactees and establish contact with them (meaning both physical and astral). Study plasmoids, that is, open portals and walk through these portals, study them."

They also have the task of contacting not only people in third density, but also earthly plasmoids. They contact and talk to them. They may have such an alliance, that is, they consider them also inhabitants of our planet.

Further, (reads): "Ensure environmental safety, cleanse nature and restore it without direct intervention." Without any chemical influences. That is, the maximum is some kind of microorganisms, something else that can live in the natural environment. What cannot be considered as the effect of presence and interference in this system. These are their rules.

36:17 Energetic preparation of the site for the Tikhtians' base on Lake Baikal.

Irina: Next, I asked him: "For what reason did you choose this particular place? This particular lake and this particular place on the lake?"

Vladimir: Yes, we had a list of questions.

Irina: He gave me this answer: "Here is the most energetically favorable place, because this space was charged for us by friendly earthly forms of plasmoids. They filled this place with energies so that we could feel comfortable being in this part of space, so that the noosphere of the Earth would not so influence our auras and auric structures. And they charged the plasmoids for us for 280 Earth years, they prepared the space in this way, and we built the base itself in 1993."

Vladimir: Quite recently, in 1993.

Irina: Exactly this base.

Vladimir: How long did the construction last?

Irina: It took five Earth months to build.

Vladimir: In 1993, this base was built in five months. How deep did he say it was?

Irina: Yes, this will be written later.

Vladimir: Okay.

37:43 Personnel of the Tikhtian base. Living conditions at the alien base.

Irina: I asked: “How many people are there, your people - employees? And what planets are they from? He replied: “The permanent staff is 40 employees, all of them are from Ticht, but there are also guests from different worlds often. And not only from the Interstellar Union, but also from the Galactic Federation of Light. We have a special compartment for these guests, where they can stay for several days, creating their own conditions.” They can create the level of humidity and oxygen for themselves in some closed compartment.

Vladimir: It’s clear, all the equipment is intended for them there. It creates the necessary conditions, and somehow they regulate it all, make choices. Clear.

38:37 The area of the base of the planet Tikht on Lake Baikal. Structure of premises.

Irina: I said: “What is the area of the base, and what, and how many rooms?”

He just listed it to me. Now I will read: “Area - 2480 square meters, plus hangar - 470 square meters.” Kirchiton later told me that the one

where we were was a small fenced-off compartment, and the hangar was the main one for their saucers.

Vladimir: He didn't specify how many ships are at this base?

Irina: I said it a little later. I wrote in order. "Premises for workers – 40 (each has their own), for guests – 7, technological premises – 3, office premises – 5, warehouses – 2, rooms for healing and leisure – 6, greenhouse – 1, control and gathering center for everyone, as council - 1."

Vladimir: Friends, we asked these questions, Irina had a list of questions, I'm just explaining. One of the questions was to list how many rooms there are. Now we know the number of premises on this Tikhtian base. They didn't hide anything from us, they told us the whole structure in detail.

40:22 Security system based on the planet Tikht on Lake Baikal.

Irina: Next I asked: "What protection against penetration? What is it based on? He said this: "Protection - entry and exit only using digital codes that are stored with me (the head of the base, Lags Rhumir). An automatic system for reading codes from electromagnetic fields that create rays. These rays themselves find a sensor underwater at a certain place on the bottom (the sensor that will read), the coordinates of which change once every 12 hours."

Vladimir: The sensor coordinates change once every 12 hours, right?

Irina: Yes, they illuminate different places on the bottom, so to speak, with some kind of field, and the sensor reads it there.

Vladimir: I see.

Irina: He, personally, and his biorobot alone know them, and inform the ships.

Vladimir: That is, such a security system is quite serious.

Irina: They have such a dual system.

Vladimir: Yes, practically, two-factor identification.

Irina: Nobody knows anything. By the way, Kirchiton was informed. In a few hours he told where this sensor was located, gave the code so that he could visit.

Vladimir: So he told this code to Kirchiton?

Irina: Yes. I say: “Kirchiton, you didn’t enter anything?” He says: “I immediately introduced it into the ship, I have a device that creates this beam that reads.” They are all standard, these readers. The main thing is to know the coordinates and enter the code. And everything will happen automatically.

Vladimir: What's next?

Irina: The code is very complex, it consists of 16 numbers and 5 symbols, mixed in a chaotic order. That is, you won’t guess.

Vladimir: Very interesting.

August 25, 2021

Conference participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Vladimir Goldstein is a journalist and Facebook group administrator, assistant to the director of the Cassiopeia project.

#330 Irina Podzorova visited the alien base under Lake Baikal! Real contact with aliens. Part 2.

https://blog.cassiopeia.center/irina-podzorova-posetila-pod-ozerom-bajkal-ch-2
https://www.youtube.com/watch?v=K3YPvF1dALw

00:21 Energy source at the Tikhta base on Lake Baikal.

Vladimir: Very interesting!

Irina: Then I asked: “What is the source of energy for you?” He gave me this answer, now I’ll read it. The energy source is a hydrogen engine with a capacity of about five thousand of your megawatts.

Vladimir: Five thousand megawatts. Hydrogen engine - what did he mean? Is this a hydrogen reactor? Is this a nuclear reactor? Or did he not specify?

Irina: It extracts energy. He told me, and I wrote it down when the box started talking. The energy source is a hydrogen engine with a power of about five thousand of your megawatts. It extracts energy from the bond of hydrogen and oxygen atoms. And the connections of water molecules with each other, partially.

By directing special fields, a chain reaction begins. Atoms repel each other instead of attracting each other. But their microgravity does not have time to return to the third level of these atoms. It accumulates in special batteries made of an iridium alloy with gold and lead, which is created using a molecular lattice.

And this energy can be converted into any type of electromagnetic

fields and other material energies in special devices.

Vladimir: In general, it is clear where energy sources come from. They even told us the power. Fine. We have further questions.

02:06 Physical contactees at the Tikhtian base.

Irina: The next question I asked were there any earthly contactees here besides me? (He answered) There were no physical earthly contactees here. You're here first. We have been in the astral body several times.

Vladimir: I see.

02:28 Weapons at the Tikhtian base.

Irina: Next I asked, are there weapons at the base? And which one? Show me if there is one.

Vladimir: Yes, we had such a question. I think this was interesting to many of our subscribers. And we asked this question.

Irina: (He said). We do not have weapons, as such, because we have a scientific base. But there are items that can replace it if necessary. For example, stone cutters. I then asked Kirchiton. These are the ones used to cut stones and were used in Antarctica. There are stone cutters and electromagnetic fields that paralyze the central nervous system in mammals, including humans. And they can also be created as a protective plasma field, if necessary. The creation time for such fields is less than two milliseconds.

Vladimir: That is, if these are tools they have that can be used, then you can imagine what kind of real weapons there are on military bases. So, I think we are well protected by military bases. They are also on Earth from the Interstellar Union (IC). From any bad accidents and from uninvited guests. We're fine with this. We are protected.

03:54 Feeding the Tikhtians at the base.

Irina: When I asked what you eat, he gave me an interesting answer. I'll read it now. The food is partly imported, partly local. They bring automatic ships, like robots, with no people on them.

Vladimir: I see. Automatic ships.

Irina: They bring automatic robotic ships from a base on the Moon or from other bases. This food is the standard diet for omnivorous humanoids. What suits us is puree (as translated) from algae and shellfish, enriched with a special protein powder.

Drinks – juices from local berries. For example, watermelons, cloudberries and blueberries.

Vladimir: And now it's time to ask a question: did they offer you to try the puree?

Irina: I wrote first. I wanted to ask a question at this table.

Vladimir: I wanted to try the puree, but I had to work for the Cassiopeia project and for civilization. I had to continue writing, although the mashed potatoes were already somewhere nearby.

Irina: For example, watermelons, cloudberries and blueberries. And also a paste of them with distilled water.

Vladimir: I see. Very interesting.

Irina: Also in the greenhouse we have plantations of puffball mushrooms from your planet, which our biorobots prepare for us on special heating platforms without open fire. We also like crushed young pine, cedar, and spruce cones mixed with seaweed as a flavoring. They contain copper and phytoncides, which are beneficial for our brain and cleaning filters.

Then Kirchiton explained to me that this is an analogue of the liver and kidneys at the same time.

Vladimir: Very interesting.

06:19 Working hours, life of Tikhtians at the base.

Irina: Then I asked how the humanoids live at the base. What do they do, how do they work, what is their routine?

(He told me so). Humanoids live according to a flexible schedule. All technical and household work is performed by biorobots. You can bring robots from any other planets, and your own personal biorobots. That is, everyone can have their own. The duration of one watch is 48 Earth months.

Vladimir: I see. Does that mean 4 years? Yes, 4 years.

Irina: Then a vacation of 15 months.

Vladimir: More than a year off.

Irina: Then I asked, how do you bathe and go to the toilet?

Vladimir: A household question. How is your life organized, how do you live?

Irina: Yes. (He said). We bathe and go to the toilet in special sanitary compartments. Each room has its own. They are separated.

Vladimir: Bathrooms.

Irina: All biological and technical waste is processed in the technical

department in special devices into safe or even useful substances.

For example, chains of essential amino acids, the powder of which can be added to food or fed to fish, depending on need. Water and oxygen are obtained from outside, but are purified through special filters.

Vladimir: In general, nothing is lost. Completely autonomous base. Except for the products that are delivered to them.

Irina: Yes. They also extract water and oxygen.

Vladimir: They mine it, yes.

08:39 Location of the Tikhtian base. An ancient base under Olympus.

Vladimir: At what depth is it?

Irina: The depth is 322 meters.

Vladimir: What is this under? Under the surface of Lake Baikal?

Irina: Partially under the bottom, partially under land.

Vladimir: 332 meters, at this depth. It's clear.

Irina: 322 meters. I asked, is there any similarity between this base and ancient bases, for example, the one that was under Olympus?

(He said so). Modern bases have more advanced protection systems against detection and penetration. There are no other significant differences.

Vladimir: Let us explain. We had a question related to the fact that we

know that under Mount Olympus there was a base of Pleiadians from the planet Futissa. And the character we know as Zeus was the director of that base. It was a representative of the planet Futissa from the Pleiades. His name is Tefestis. We wanted to make an analogy. Here is the answer. Thank you.

09:48 A Tikhtian's story about himself.

Irina: Then I asked. Introduce yourself again and tell us about yourself. (He said). I am the head of the base. My name is Laagos Rhomir. I am 448 earth years old. I am a biologist-oceanologist. This is my fifth watch here. This is my first time leading. I have three earthly months left before my vacation.

Vladimir: He is on his fifth watch. And each for 48 months - 4 years. This means that he spent 20 years on our planet.

Irina: Yes.

Vladimir: Twenty years. He already has a close connection with his place of work.

Irina: He was first an employee, and now a manager.

Vladimir: He has grown! I made a career and became the director of the base! I should have also asked about the salary level. I'm kidding.

Irina: He also said that he had three earthly months left before his vacation. 45 months last time.

Vladimir: And demobilization. Friends! We're kidding here. This is all very serious. I'm kidding because it's very late at Irina's. I want her to be able to answer you. She is already having difficulty speaking. She had great adventures today. It's late at night, but I want you and I to get all the information as quickly as possible.

Irina: Yes, I'm with the students, with the plasmoids all day.

Vladimir: You see what's the matter. It would be possible not today, but fresh impressions. Therefore, Irina agreed, sacrificing her night, to tell everything so that not a single detail would be missed. Because the records are records, but there are still details that are also important. Let's move on.

11:35 Are the earthly authorities aware of the Tikhta base near Lake Baikal?

Irina: Then I asked. Do the earthly authorities know about your base? (He said so). The earthly authorities know nothing about this base. At least, there were no attempts to penetrate or other emergency situations during my watches, as well as others known to me.

Vladimir: And now we all have a question! They didn't know, but now they know! Approximate location, 322 meters and so on. Now they will know. But that means no one is afraid of this. Since we were told everything in such detail, then no one is afraid.

12:13 Equipment at the Tikhtian base. Flights to the home planet.

Irina: Then he also told me this. It was like a continuation, but I wrote it down just in case. There was no such question, but for some reason he said so. On the basis of 65 biorobots, 2 planetary spacecraft and 25 atmospheric mini-probes. Water depth mini-probes – 190.

Vladimir: It's clear with earth probes. The two planetships are ships that can travel between the planets of the solar system, obviously?

Irina: I asked him later. How's the planetary plane? How about flying home completely?

(He says). To do this, you need to fly to the Moon, and there already on a passenger ship, which often fly there.

It turns out that passenger ships are flying to the Moon.

Vladimir: Regular flights from the Moon are already going further.

Irina: All sorts of things fly there.

Vladimir: Everything is grown-up: they sell tickets, they have travel agencies. This means flying to the Moon on a planetary plane, and there will already be a serious ship with gravitational engines. Serious ships are already traveling to other parts of the Galaxy. There are completely different principles of movement.

Probably, now someone is watching us and thinking that I'm joking here, we're having fun here. But for us, friends, this has become ordinary things. We believed all this so much that we can already joke. Personally, nothing surprises me anymore. I just know that everything Irina talks about is true.

Therefore, there is no need to admire much anymore. It will be fake. We just understand that all this is reality.

Fine. What's next?

13:54 Plans for the work of the Tikhtians on Lake Baikal. Ecological work of the Tikhtians on Earth.

Irina: I ask, what will you do next on this base? What are you planning to do next?

Vladimir: What plans do they have for developing the base? What are your work plans?

Irina: He specified for how long. I'm talking about the next year, for example. (He said so). Continue to clean Baikal and the rivers not only flowing into it, but also those closest to it, from cyanobacteria. Introduce microbiota that helps quickly decompose plastic and

petroleum products.

Vladimir: That is, they are busy with environmental cleanup of such an important place as Lake Baikal and the entire surrounding area. As we know, the planet Tikht is precisely those who are engaged in terraforming.

Irina: Environmentalists.

Vladimir: Environmentalists. Terraforming. In general, they can create a climate on the planet.

Irina: Introduce microbiota, which helps quickly decompose plastic and petroleum products. Study the biosphere of Lake Baikal and the areas around it. Become intermediaries between plasmoids and people, respecting the interests of both.

Vladimir: I would like to add on my own behalf that if our interstellar friends and, in particular, the planet Tikht had not helped us, we would have already, excuse me, polluted the planet so much with our attitude to ecology that we would no longer be able to live here. They just constantly help us, cleanse us, eliminate our problems, all our mistakes. One of the civilizations is the planet Tikht. And the base on Lake Baikal does this.

Irina: Yes. Plans: to become intermediaries between plasmoids and people, respecting the interests of both. And teach contactees this, that is, interaction with the Spirits of nature and taking into account their interests.

Vladimir: A wonderful noble goal! On my own behalf and on behalf of the entire project, and on behalf of all humanity, I now want to thank the civilization of the planet Ticht. And, specifically, the staff of this base near Lake Baikal for constantly working and helping us preserve our planet as a whole. And this important area around Lake Baikal is environmentally friendly.

16:18 Interactions between the Tikhtian and Pleiadian bases on

Lake Baikal.

Irina: There was another question. How do you interact with other bases, in particular with the Pleiadian base?

We didn't fly there due to lack of time, I wrote it down. (Kirchiton said). We still need to go through now and see the base; we won't have time to get to the Pleiadian one.

I asked him how you interact with the Pleiadian base, which is also located on Baikal, but in a different place?

(He gave this answer). We work closely with the Pleiadian base on Lake Baikal. We visit each other often. We share experience and material resources in the common interest of helping the Earth's ecosystem and its biosphere.

Vladimir: Great. Didn't he say what the targets are at the Pleiadian base?

Irina: (He said). The overall goal is to help the Earth's ecosystem and its biosphere.

He sees some help there. It was said to the biosphere, that is, they are like ecologists. And she has a wider range of interests.

Then the questions ended. I closed the notebook and left it on the table.

Vladimir: What puree?

Irina: Kirchiton took this box. She continued to work.

17:44 Internal arrangement of the Tikhtian base.

Irina: (Laax stood up and spoke). Come on, I'll show you the base.

And this box was already talking in Kirchiton's hands. He carried her. The Tikhtian walked ahead, I followed him, and Kirchiton walked next to me, a little behind. He carried this box in his hand.

Vladimir: My viewers and I are tormented by the question: didn't they really offer to try something from the reserves? Or was it later?

Irina: Their doors are either round, like in a cave, or arched. They are quite tall. It feels like you are entering a cave. Semicircular corridors. But the rooms could be quadrangular. Where we sat, it was more of a rectangular, elongated room. Gray walls. Yellow ceiling, yellowish tint. And a yellow stripe between the ceiling and the wall.

(Then the Tikhtian speaks). Come on, I'll show you where I live.

We went. We turned somewhere several times. Several times we met a robot that looked like a spider, only taller. The robot definitely had more than 10 limbs. They curved in all directions. (He says). This is a manipulator, it can get out. May bring food on special carts.

I called him a spider, he was thin himself. I looked at it - there were no wheels. He moves on a platform. I asked Kirchiton, what are the wheels under his platform? (He says). No, he just rides on the platform itself. It controls from a magnetic field.

I ask, why doesn't it have wheels? He replied that it was more convenient for the robot to go around everything.

Vladimir: Clear, without wheels. He is in a state of, as we would say, levitation. But in fact it uses the energy of a magnetic field.

Irina: And he's up to my chest. It's like a thin cylinder. He has no eyes, nothing. I don't know what this robot looks like. He just has some sticks sticking out and the lights are blinking. They bend like they consist of many joints.

Vladimir: I see. You look, then we will compare. There is a brighter character than this robot.

Irina: Brown cylinder. It reminded me of a reed stick.

Vladimir: Ah! Like a reed. I understand.

Irina: Then we turned around several times. Then he went back into the open round door. And we found ourselves in a room that was slightly larger than mine. It was empty. (He says). I live here.

I say, I mean, do you live here? Kirchiton came to pick us up with this box. (He says). Everything is here.

It's standard there. I was already at Kirkhiton's house. And it is typical for all MS that the furniture is hidden in the walls. And it automatically pops out when they need it. And so it moves again. Everything is automatic for them. If desired, they can customize this by voice. By touching the wall. Their beds, chairs, tables pull out when they need to. And so they hide everything.

It was exactly the same with Tikht's representatives at the base. He said something, and something like a wide bench, somewhat similar to a wooden one, came out of the wall. But it was clearly made of metal. It felt metallic. Dark metal, but it was clear that it looked like wood.

She moved out of the wall and appeared. We sat down. (He says). There might even be a bed here where I sleep.

I say, do you have televisions where you watch movies? And anyway, what are you watching? Do you have DVDs? Or flash cards?

(He says). No. We have a connection. And we can watch video reviews through the galactic network. Connect with your planet. We don't have to wait light years or years to talk to our family. We are included in her life and can talk, as if in the next room.

Vladimir: I see.

Irina: I say, where on the wall is this TV? (He says). We have automatic control. Wherever I direct him, he can appear anywhere on the wall. It may appear in space. And made the light dark.

Vladimir: That is, it turns out like a hologram.

Irina: (He speaks). She will stand here.

Vladimir: This is a hologram. The technology is literally on the verge of fantasy, I would say. Beyond the bounds, in fact.

Irina: It is created by some fields. I didn't ask to show him. He was just telling me.

23:47 Food of the Tikhtians.

Irina: Then I say, what kind of food do you have? (He answers). Do you want to try something?

Vladimir: This is the key point! I knew! So! AND! (laugh)

Irina: I was still thinking, they finally want to treat me. I hope not by Gomptembria.

Vladimir: Who doesn't know, friends, gomptembria are worms from the planet Daraal that Kirchiton feeds on. Irina also tried them, but that was a long time ago. Apparently, she didn't really dream about them now, but wanted puree. Well, well, so what happened?

Irina: I was wondering what they would give me. I thought we were going somewhere. But he was dressed in white overalls, which hardly differed from the color of his skin. It had a metallic sheen. It had

something like a collar, and there was a button on it, something was pinned on it. A dark dot of this size (shows). He leaned over and said something there.

Vladimir: Walkie-talkie?

Irina: What he said, the box didn't translate. He turned there. Perhaps it was said too quietly.

We continued talking and after a few minutes I saw the door open. The door is like a circle that slides up and a passage opens. I saw the same robot with multiple legs, which was carrying a small cart in front of itself, it was on wheels. But she had not 4, but 6 or 8 wheels. Elongated, flat, with small sides, metal. Small and low.

Vladimir: And he set the table for you there?

Irina: For some reason there was a triangular-shaped bowl there. It reminded me of a flower: one petal is open, the second, third, white. There was a dark mass in the bowl that looked like jam. And he said that you can drink it. You don't need to eat it, you need to drink it.

(He says). It's made from your own berries. Made from blueberries with our planet-sourced protein powder. It won't be harmful to you. They have practically the same amino acids.

27:09 A Tikhtian's perception of a new object.

Irina: And I say, I have something for you. Since we had a honey holiday today (we had it yesterday), I grabbed a small package of honey for them.

Vladimir: Yes. You have already exchanged products.

Irina: Yes! And he took it. I gave it to him and I say, in honor of the holiday, Honey saved! This is a holiday in honor of Jesus Christ. It is

connected with the fact that the first honey is obtained in Russia. This product is produced by bees. There are such insects.

(He says). I heard. Yes, I know about him and this product. But I've never tried it. According to our research, it is safe for us. It's just a collection of chemical elements. But I haven't tried it.

I told him and congratulated him. He accepted. There was a small box. He took it with one hand, his skin is white. And when he bent his fingers, wrinkles appeared.

Vladimir: You didn’t touch their skin? Didn't you take my hand by chance?

Irina: No. I gave it, he simply took it. But he's warm. Maybe even warmer than us. He took the box, covered it with his other hand, and his eyes closed, and they became like slits. There was no longer any blue color, and the cracks were white inside. Scanned.

I asked, what is he doing? (Answered). It scans what energy it contains.

Because they distinguish not only gifts as things, but what subtle structure they contain. What vitality is invested.

Vladimir: Very interesting.

Irina: He sat and then opened his eyes. He had blue eyes again.

August 26, 2021.

https://www.youtube.com/watch?v=sBpsfDLQL7A

00:21 Treating the Tikhtians with honey. Gift energy.

Irina: Oh, I have something for you! Since we had Honey Spas yesterday, I grabbed a small package of honey. I wanted to tell you.

Vladimir: You have already exchanged products, right?

Irina: Yes. And he took it. I say: “In honor of the holiday of the Honey Savior.” This is a holiday that is in honor of Jesus Christ, one of the events. It is connected with the fact that the first honey is taken out. In Russia, this is a product that is produced by bees, there are such insects. (He speaks) I have heard about it, I know about this product, but I have never tried it. According to our research, it is safe for us, it is like a set of chemical elements. It is safe for us, but I have not tried it.

I handed it to him, congratulated him, and he accepted it. There's a little box there. He took it with one hand. His skin was so white, and when he bent, wrinkles appeared.

Vladimir: You didn’t touch their skin or take their hand by chance?

Irina: No. I gave it, he simply took it. He is warm, maybe even warmer than us. He took it, covered it with his other hand, and his eyes closed and became like slits. There was no longer any blue color, white inside. Scanned.

I say: “What is he doing?” Scans what kind of subtle energy it contains. Because they distinguish gifts not only as things, but what subtle structure they contain, what vitality is invested.

Vladimir: Very interesting.

Irina: Then he opened his eyes, his blue eyes appeared again. (He said) Thank you from the bottom of my heart! It uplifts my energies as does my energy heart. I'll keep it as a souvenir and won't eat it.

Vladimir: Basically, the vibrations matched the honey?

Irina: Yes. Before that, I wanted to give it to him, I thought. MidgasKaus taught me, Raom Tiyan, that if you want to give something, some object, then hold it in your hand and wish it, put energy into it. It will be felt by a sensitive person. I wished him when I hadn’t seen him yet (I took him from home), I wished that the creature to whom I would give, Kirchiton, I simply congratulated, because we see him often, and I will see him once and decided to give it to him. Since I am a guest there, and in honor of the Honey Savior. When I was still at home, before making contact, I introduced him. I imagined him as that Tikhtian with big eyes.

Vladimir: Now at the Tikhta base there is a jar of honey, which Irina brought there and donated.

Irina: She's so small.

Vladimir: Small, but real natural honey from the heart.

Irina: Yes, natural linden honey.

Vladimir: Great! Now she will be a souvenir at the base of the planet Tikht and will raise vibrations.

Irina: Yes, maybe he'll take it with him.

Vladimir: Yes, it may well be when his watch ends. This will probably even happen. He will take this souvenir with him to planet Ticht from planet Earth.

Irina: When I held this in my hand, I imagined it in front of me as a Tikhtian. And I wished him all the brightest, maximum realization in this incarnation, Light to his children, his family, his planet, all the people.

05:14 Extraterrestrial food.

Vladimir: We thank you, Ira, for bringing this Light to the representatives of the planet Tikht. Tell me, what did these dishes taste like?

Irina: I took this "rose," as I called this triangular thing. When it leaned over (when you drink from one of the sides), it became like a viscous liquid, like honey, but more moving. I tried. It looked like blueberries. It was not sweet, there was no sugar, and it was not sour. She reminded me of how you mixed blueberries with a boiled egg. There was no visible egg there, but it just tasted that way.

Vladimir: Tasty or not?

Irina: Such an unusual taste.

Vladimir: I should have said, I can't eat everything here, can I take it out? Take it with you.

Irina: I should have asked you to bring it with me. I did. He looked at me so carefully, did not ask, but waited for me to say. Kirchiton looked at me. I have already learned from him to distinguish by his eyes, by his facial expression (before I could not distinguish, but now I have learned) when he smiles. I say: "Kirchiton, do you want it?" (He says) No, thank you.

Vladimir: And he pulled out the gobtembria from his pockets, his little worms.

Irina: No. And I did. No, there was nothing nasty there, just such an unusual taste. And it also seemed to me that there was some kind of powder there, as if you had rubbed eggshells finely and finely, and when you touched your tongue it dissolved. I ate it.

Vladimir: It just melted in your mouth.

Irina: And when I ate it, I got a chill, like mint, only after I ate it. He sat, waited, was silent. I say: “Thank you! Delicious. It's delicious, but a little unusual for me. I need to get used to this taste." (And he says) This is an interesting experience, an experiment for me, how earthlings will react, because not only are your products here, but ours are also here. We add protein powder there, which is brought to us from our planet, and it allows us to receive all the necessary vital substances for the construction of our bodies.

I asked what proteins it consists of. (He says) The names won’t tell you anything, especially since there are no analogues in the earthly language. I’ll just say that of the amino acids you know, arginine is the most abundant.

I don’t remember what else, alanine or something like that, but there are others. (Then he told me) Come on, I’ll show you the greenhouse.

09:08 Greenhouse of the Tikhtian base. Earth's raincoat and Burkhadian algae in the diet of aliens.

Irina: We went to look at the greenhouse and walked along the corridor. They walked far along some long corridor, and the color of the walls, like rust, turned into a more brilliant color. Like an arch. There are stainless steel spoons, this shiny color, on the ceiling, walls, and floor. And then we turned somewhere again and entered a very large, long room. It was filled with a long table, and on this table there was something covered like glass. And they told me that on every table they grow some species. When we arrived, there was a white floor, it

had a fine grid. What kind of bars are there? And there were bluish sparkles in the air. (He says) Such fields, such energies are maintained here that maintain certain humidity, temperature, disinfect the room, and so on.

Vladimir: That is, the best conditions are created for intensive growth, obviously, of these plants.

Irina: We approached one of the tables. There I saw like an aquarium. There was water there, a little full, and there were, I wouldn't call them shells, but they were purple spirals, and pinkish-colored worms were sticking out of them, like our shells, but large with a wide neck, and sticking out of them like worms. (He says) Organisms from our planet are grown here, in specially created conditions, they are fed with a specially created powder. Here the water is from Lake Baikal, but it is specially purified and saturated with necessary elements. Then they are used for food.

Vladimir: That is, they grow these organisms, brought from their planet, which they then use as food.

Irina: Yes, in addition to the fact that they bring ready-made food, they also grow it there additionally. (Then he says) Come on, I'll show you. And he led me to a table where, under the same transparent glass, there was a white mass that looked like a sponge. (He said) This is a raincoat. The sheer weight of the raincoat.

I say: "Something doesn't look like our mushroom, ours is round." (And he says) We took his DNA and isolated it in such a way that it would not grow round, but fill the space in this table, and so that its cells would divide laterally. This is not even the mushroom itself, but its genetic information. It is already growing in a different form. It does not take a round shape. These plates are more convenient for us to recycle.

Vladimir: Very interesting! We have another sensational information, and it is presented in all the smallest details and details!

Irina: Then he took me to the aquarium. There was water there, only deeper, and at the bottom lay dark green peas, they grew like chains above each other, and there were others standing on them. There it was, like a flow of water, and they wavered ever so slightly. I say: “What is this? What kind of leeches are these?”

Vladimir: They also grow them?

Irina: (He says) No, it's algae. This is not an animal. These are algae, but they were brought from the planet Burkhad, and we can eat them too. They are from the planet Burhad and grow in their ocean, in the coastal zone. They are distributed throughout the Galaxy because they contain a record dose of those microelements, for example, boron and other amino acids, which are found in few places.

They are also distributed throughout the Galaxy and grown on an industrial scale. He told me all this, but I no longer wrote it down. We walked along the corridor, then stopped in the middle of the corridor. He said: (Kirchiton was holding this box) “I wish you a happy flight!”

I say: “You know, we plan to physically fly to you in less than a month. Come to Baikal and arrange a retreat here.” I started telling them everything. (He says) Great, very good! I will be glad to feel here the energy of you and your students, followers, those who listen to the information of the Interstellar Union.

Do you go to Astral, will you come to our conference? (He says). Yes, I know how to go to the Astral, I don’t do it too often, but if necessary I can do it.

15:30 Origin of Lake Baikal. The effect of fear on human life. The Light of Love, its influence on space.

Irina: What would you like to convey to those who will be at the retreat, what wishes, maybe what nature is here, what plasmoids, maybe you want to convey from yourself?

(He says) I want to convey that this lake is a very energetically

saturated place. It appeared much later than your scientists say. It appeared as a result of the impact of weapons 12,000 years ago, before it did not exist in this form, there was a reservoir there, but it was smaller. On the shores of this reservoir there were settlements of ancient people. There were those who contacted aliens and worshiped gods. It was an energetically strong place.

And since there was a war with the reptilians, weapons were used that were aimed at these settlements, and this created a hole, a rift. Villages and houses fell into this fault. The ground beneath them gave way, and they fell through and were buried. And under the bottom of this reservoir, which existed, there was an underground lake, and there are also large volumes of water underground. And from this weapon the water came out and filled everything, and the shore was a little flooded.

I say: “What is the state of Baikal now?” (He says) One large plant has been shut down here, and we are still cleaning it.

Vladimir: Our earthly authorities turned off the plant, right?

Irina: Yes, they turned it off, but this was not accidental. (He said) In the government of the coastal regions, we also have people who are our contactees, they are there, and we contact them on the astral level.

Vladimir: Astral contactees, interestingly, are in the government of this region, and they obviously influenced the shutdown of the plant.

Irina: (He speaks) They are not physical contactees. They matched our vibrations, these were the people. But they approached us when they were not yet in the government. We suggested to them, when they were still children, teenagers, when we came into contact, that they should acquire this profession in order to be useful. We believed that they should not talk about their contact, so that nothing would prevent them from acquiring this profession. We believed that such contactees could take better care of the planet.

Vladimir: Great! Very interesting information.

Irina: What will you wish at the end of our visit? Thank you for the hospitality, for the food, for the stories.

He has such a friendly energy, he, like a father, told everything. I asked what he would wish for those who will be at the retreat, I will tell them. And in general to all earthlings, at least those earthlings who will watch this video. I will talk on video. It will be seen by those people who are interested in Cassiopeia, our project, which was created on the basis of information from the Interstellar Union. What would you like to convey to them, including those who come to the retreat, to this event?

(He speaks) I would like to convey to those who come to this event that this is an energetic place, but it is not to be feared. Fear closes you off from possible changes, both positive and negative, but positive and negative can only be from the point of view of the current edition of the personality. (This was the translation of “ego”).

It is changeable, so its needs, its beliefs can also change. What was negative today can become positive tomorrow, and vice versa. This promotes progress. Therefore, I would like to urge you - do not be afraid, and when you step onto the land near Lake Baikal and the coastal regions, these cities that are located there, remember that this land was sacred to many civilizations that lived long before the war, long before you, and send the Light of love. The light of love is a wish for development, happiness, help. And then this space will meet you with a flow three hundred times more powerful. And it will fill your Souls and bodies, and help you achieve the goals that you set for yourself when coming to this retreat. And if you close yourself, if you are afraid, if you are not open to the experience for which you came, then you will simply go into even greater negativity.

Vladimir: Thank you, thank you.

21:50 Necessary conditions for creation.

Irina: I say: “What will you tell those who are just watching the video?”

(He says) I want to convey to them the Light of Love from my heart. I want to convey my wish to think every day that there are creatures around you in nature that you do not see or feel, but which influence the entire Earth. That they create for you that nature, those objects, their energies, incarnating in these worlds so that you can live in the dense world so that you can breathe air, drink water, eat food. In order for you to be born into a body, they create elements for this.

I say: “Many here believe that God simply created.” (He says) God also created, because, firstly, he gave birth to the Spirits themselves.

Vladimir: We are talking about plasmoids, thin-material civilizations.

Irina: Yes. And secondly, he gave his energies of all qualities, all types, as material for creativity.

I say, we just think that God himself created everything, and no helpers are needed. (He says) These are not helpers. These are like his parts, like his hands. But they have their own will. But when they resonate with the will of God, they can do it most purely. (He conveyed something like this) Remember, in order to be a pure Creator, your will must coincide with His Will, and His will is only pure Love and Light.

Vladimir: I see. This is great information, very important. There is a statement: “God has no hands but ours.” “Ours” means, including the energy of plasmoids. Because they are also the same representatives of divinity, his children, like us, are simply embodied in subtle-material bodies, and we are in dense-material, physical ones.

Irina: How to achieve this? (He says). Just remember about their interests, that they also have their own tasks, that they have those areas of existence for which they are responsible. And don't bother each other. We also tell the plasmoids not to arrange any negative scenarios for you, not to scare you, and so on. And you, too, do not disturb them, do not scatter garbage, always thank nature for its gifts. The more you direct Light, Love to each tree, Sun, animal and so on,

the more the plasmoids will raise their vibrations and they will become stronger.

Vladimir: And they will be able to help us even more at the same time, becoming positively stronger. Great information! I thank you, Ira. And I thank our representative of the planet Tikht for this important knowledge!

Irina: Then Kirchiton turned around. The head of the base remained there, and we were already walking alone, no one accompanied us. The door opened on its own and we went out to where the plate stood. Kirchiton and I discussed how interesting this information was. The door of the plate closed, I began to look out the window, I saw something dark, I no longer saw any bubbles, just luminous points appeared that turned in the opposite direction. Then they disappeared, then they appeared again. We were turning around, as I understood, or we were flying somewhere, then they became visible again.

Kirchiton told me that we would fly into this forest, I turned away from the window, and we talked some more. (He asked) How are you doing? You already have so many students! I sometimes watch you through the chip, very interesting. You are doing very important work! I am very glad that you met MidgasCaus, that you met Maxim and Vladimir Goldstein and Maria. I saw everyone. And that by helping you, they help the whole Earth and themselves. That's what he said.

Vladimir: I want to thank Kirchiton if now he suddenly also watches and listens through the chip. On my own behalf, on behalf of all our subscribers, all viewers, on behalf of the entire team of the Cassiopeia project, I want to thank Kirchiton for the opportunity he gave Irina to travel physically and convey to us this invaluable, most important information for us and for the entire planet, which I hope it will help us a lot in all respects.

Irina: Thank you.

Vladimir: Friends, I want to let Irina go already. So you understand, I have one time here in Chicago, and she has it now, what time is it? What time is it now?

Irina: Sixteen minutes past two.

Vladimir: Here. She's there at sixteen minutes past three, 02:15 at night. Ira, I thank you with all my Soul, from all of us, I thank you with all my might. I still wish you to rest at least a little today with all your impressions. We will edit and post this recording. Friends, I also thank you all for your attention! We have already told you everything, covered everything. And we will wait for new physical contacts. And, of course, our upcoming retreat on Lake Baikal, where at least two alien bases are located. All the best, friends! See you again on air! Goodbye, happy!

Irina: All the best! Goodbye!

#333 Autism in a child. Why are autistic people born? Special children, cerebral palsy, Asperger's syndrome, epilepsy, ASD.

https://blog.cassiopeia.center/autizm-u-rebenka-pochemu-rozhdayutsya-autisty-osob
https://www.youtube.com/watch?v=U4i0QbxkELw

00:21 Introduction of participants.

Irina: Dear friends, my name is Irina Podzorova. I am a contactee with extraterrestrial civilizations. Today, next to me is my curator, a specialist in biology, psychology and alien life forms, MidgasCaus from the planet Esler. His colleague, biologist from planet Earth Natalya, asks him questions. Hello.

Natalya: Hello. I work with children with autism problems. I would like to hear Mead's opinion on this issue.

Irina : Okay, ask questions.

01:04 Why do Souls choose to experience incarnation with autism?

Natalya: First question. Why do Souls come into the body of a child with autism, what spiritual level are they from, and why do they choose such an experience?

Irina : (Mead speaks) I can only answer in general, as each case is individual. I can answer that a large number of such Souls come into incarnation, knowing in advance about the characteristics of their body. But the characteristics of the body tend to change over time, and living conditions in it may improve or worsen. But at the moment of birth, the Spirit knows about all the features of its body. He may agree to undergo this experience for various reasons. For example, developing the quality of humility in yourself. Yes, it's like humility, it's living in society as such a special person. Because a child grows into an adult who has a certain experience. And sometimes, in order to raise its vibrations, the Spirit needs to go through difficulties. This is not typical for everyone, but for some Spirits it is necessary, otherwise he cannot appreciate the Light and begins to behave selfishly.

There are such Souls who, if they have happiness in life, prosperity,

then they begin to behave selfishly and destroy everything around them. They do not spread this feeling of happiness to others, but begin to be proud of them. And having accumulated low vibrations in themselves, such Spirits can acquire the need for humility of this kind. This is the first reason.

Such Spirits are embodied in bodies with various genetic abnormalities, with cerebral palsy, with birth injuries, with Down syndrome, various oligophrenic, schizophrenic conditions (according to your medicine) or with pathologies in the development of vision, hearing, speech organs, that is, communication with the world of various kinds.

If the Spirit came into this body precisely for this reason, then its level of development will most often be average, somewhere around 9-12. It can happen lower, but the level at the time of incarnation is rarely higher.

It happens that the Spirit of a child comes to an agreement with the Spirits of the parents when they are still in the Spiritual world in order for their parents to have a Spirit in a sick body, in order to teach the parents to take care of themselves and show love for him. It happens that an Angel is born in such a body to teach parents, grandparents. When he is born, he chooses the generic egregor as a whole. It happens that he is born to teach love. It happens that he is born to reconcile his parents, for example, if they are about to get a divorce. Various things like that. And there is a combination of these reasons.

05:21 Symptoms of autism. The influence of parents' energy on children.

Natalya: They talked about the Spirit, the Soul, about the structure “mind, heart, energy.” I can conclude that in children with RDA and ASD, the transfer of energy from the Soul to the body and from the body to the Soul is disrupted. Why is this happening?

Irina: With what disease?

Natalia: Early childhood autism and autism spectrum disorder. This is autism, we just have different gradations.

Irina: (Mead speaking) You have so many different conditions included in this nosological unit.

So. And in Russian?

Natalya: I understand.

Irina: (Mead speaks) And in Russian, in the description of the disease. I am somewhat at a loss as to the answer to the question of what is violated in this or that spectrum. We will probably talk better about the symptom complex.

Natalya: Let me clarify the symptoms I'm talking about so that you understand me.

Irina: Yes.

Natalya: In children with autism, the communication sphere is impaired, socialization is impaired, the social sphere is impaired. They cannot communicate, they do not make contact. They have no speech, we start speech artificially. They don't take the information themselves. Few people begin to speak on their own when they lose the skill.

Their signals are disrupted. Let's say they process information from the body, signals from the body incorrectly. Many of them have hypersensitivity or hyposensitivity. They have a gravitational uncertainty, an unsteady gait. If the functionality is high enough, then the intelligence is not impaired, and very often it happens that these children are gifted in one area. These could be artists, they could be linguists, they could be gifted musicians, and so on. This is average functionality, I would say. These are the symptoms.

Irina: The fact is that the structure of the Spirit itself is not broken. The connection with the Spirit, between the Spirit and the body through the

etheric body is broken. But this development of pathology is determined not only by the state of the children's body, but also by the state of the parents' energy. With their energy they can either speed up this process, or, conversely, stop it and help their child adapt.

Until the age of 14, a child is connected with the energy of his parents; they have a common aura. And they can, by raising their vibrations, clearing themselves of blocks, help restore the child's body in terms of the connection between his Spirit and the body. When the Spirit receives information through the body's receptors (it normally should receive information through the body's receptors, and in the case of autism it receives information through the body's receptors), but it does not have the need to somehow respond to this information, they still have some emotional disharmony . Some disharmony towards hypo-emotional manifestations.

Natalya: It's different for everyone.

Irina: If they hide their emotions, this does not mean that they do not have them. They just don't have the need to communicate. I looked and diagnosed such children; they had no need to communicate specifically with the material world. But at the same time, they had quite active contact with the Spiritual World, with the plasmoid civilizations that were nearby.

While conducting research on such cases, I noticed that very often the Spirits of such children were in their last life, in the last incarnation before that, embodied in a plasmoid civilization. Due to the fact that they were embodied in plasmoid civilizations and lived there for a long period of incarnation, for them the words of speech of any earthly language sound like information noise. He is like chaos to them. It is difficult for them to grab individual words and compose a logical structure from them, even in the form of a sentence of several words.

Many of them communicate mentally. They believe that if they mentally communicate with their parents, they will hear them. For them, a thought is enough, because they are so used to it in their world of plasmoids. The thoughts of the plasmoids were excited by electromagnetic pulses, signals from their subtle body, and this is how they communicated. But for people it will be an inaudible background

of electromagnetic waves.

11:04 Spiritual and material causes of autism.

Natalya: And from these noises, it turns out, they quickly get tired, tired.

Irina: The fact is that if a Spirit who was on Earth and who partially remembers his incarnation on Earth, not that he partially remembers, but it will simply be difficult for him to adapt to the plasmoid world, will need some time, incarnates in the plasmoid world. Everything there will be strange for him, some glowing lights, balls, and their speech, it will be incomprehensible to him. But there they surround him with energetic care, they fill him with the Light of Love. They have special techniques for energy regulation of such situations. This is the first.

And the second. These autistic children on Earth incarnated from plasmoid civilizations; this does not always happen, but I have often seen such cases. And those of his friends who were familiar with him in a previous incarnation, they can come to him in the form of plasmoids in this life. Then he communicates with his usual circle of plasmoids. He is able to mentally communicate with them, see them on a subtle plane, play with them, and he does not have the need to communicate with his parents.

This is the first. The second reason is that he had a difficult experience of incarnation in any world, where he passed away with very great fear.

Natalya: It was a traumatic experience, right?

Irina: Yes. It happens that this fear remains in his subconscious memory, and when he is born in a new body, this prevents him from speaking, since the subconscious fear believes that if he speaks, he will be killed, destroyed. But he doesn’t remember this consciously, he just has a sense of danger. Then autism will be accompanied not just by the loss of things, but precisely by avoidance of some kind of contact, even physical contact.

Natalya: Yes, there are some.

Irina: That is, they feel danger, there are such people. There are those who choose this particular body to undergo some lessons, there are different cases. There are purely spiritual reasons, and there are mixtures with material ones.

Natalya: I understand, thank you.

13:54 The levels are spiritual and dense. Spiritual world.

Natalya: Is it possible to say that if a child came from the spiritual level of a previous incarnation at the time of death from the plasmoid level or, say, from the middle level, they will have different functionality here in their body? Could the child's functionality here, now, depend on this?

Irina: If he came from the plasmoid, if from where?

Natalya: Or from the 12th level, for example, from the spiritual?

Irina: No. They first go from any material world to the Spiritual world, and from there again to incarnation. Plasmoids too, they have both a spiritual level and a past life.

Natalya: Yeah, I understood everything. It's clear. Then you can't say that. I understood. OK, thank you.

Irina: We have from plasmoid levels to density levels, and spiritual ones are already beyond matter. This is called the "level of the world of disembodied Spirits." It's just that the word "level" is the same, but they have both. Here we are now living - we (Eslerites) and you, we live on the 3rd level of density. We are the ones embodied. And they incarnated from different levels of the Spiritual world.

Natalya: Thank you. Am I asking the next question?

15:15 Types of autism. Plasmoid energy bindings through fear, aggression, destructive programs of parents.

Natalya: Here's another question. Is it possible that in the field of a child with autism there is some kind of destructive program that blocks a sufficient supply of energy to this Soul? Some people who see have extrasensory vision, they see some such destructive entities, and mostly on the throat chakra. I can't check because I don't own such things. But there are such cases.

Irina: You see, I'm now talking about congenital autism, but there is also an acquired form. It can be acquired in early childhood due to the influence of the parents' energy. This manifests itself in such a way that a child grows and develops normally, and then suddenly loses communication, social and social skills. And his development seems to go backwards.

This is affected by the stress in this life and especially the energy of his parents. If, for example, a mother has a block in the 5th chakra, then this will be reflected in the child's chakras, this may prevent him from speaking, even if everything is fine with him. And the doctors will diagnose him with autism, because they don't know any other way. As I already said, you have many different conditions brought to one diagnosis.

Natalya: I agree. Yes, we have a bit of a hodgepodge here due to the fact that this disorder has not yet been well researched. Then it turns out that there are children who develop normally, are born healthy in all neurological parameters, pediatric ones, everything is fine. And, for example, at 1.2-1.5 years we register a rollback and loss of a skill, for example, speech. Plasmoid contact, communication skills are lost. Have you talked about this? Does the gender of the parents also affect this?

Irina: Yes, it is influenced by those programs that you called destructive programs, and most often this is a block. And those entities that are nearby, if they are destructive plasmoids, there are parasitic plasmoids, they already come to the energy of this negative block that attracts them, in order to receive energy from there by creating

bindings.

Natalya: I understand, thank you.

Irina: They can be created both for the child and for the parents, and for everyone in general.

Natalya: I see.

Irina: But most often they prefer to join the child, he has more energy, he is growing, a growing organism. They receive more energy from the child's body due to the fact that the process of cell division occurs quickly. All this requires energy. You know that energy metabolism occurs much faster in children.

Natalya: Of course.

Irina: That's why it's preferable for plasmoids if the parents' energy attracts them, if this is possible, for example, there is no strong Guardian Angel nearby who can protect, for some reason. Or both dad and mom are equally susceptible to destructiveness. If someone is alone, then the second one can still, by raising their vibrations, protect the child from this.

Or, for example, mentors, Angel Consultants of this Spirit of a child prevent the introduction of binding into him, sending the Guardian Angel the appropriate instructions, simply telling these plasmoids that, despite the fact that the parents attracted him, and they are responsible for him, but the program his Soul does not provide for any contacts of this kind at all. It happens.

But it happens that it is precisely this contact that is required for the child. But in this case, if destructive plasmoids manage to bind to the child's aura, this will immediately become noticeable. Not only will he not speak like an autistic person, he may have violent outbursts. Moreover, sudden. What does it mean? This means that he can look at an empty space where the wall is and suddenly throw something there.

He does this for a reason, he sees certain images there. A plasmoid appears in front of him, which causes unpleasant feelings in him, scares him or makes him angry. And he tries to defend himself in this way. And with this defense, with aggression, precisely this energy, coveted by plasmoid parasites, is released from it. They lick it from the child's aura and feed.

20:45 Energy exchange of plasmoids and autism.

Natalya: Well, of course, they will be completely nearby in the same field, because they don't want to leave, right?

Irina: They may not always be nearby, but come from time to time through portals, but according to the connection, energy exchange will still take place almost around the clock.

Natalya: That is, energy will flow in that direction. I understood.

Irina: It will be an energy exchange, which means they will charge each other. The child will charge the plasmoids. But according to the law of energy exchange, since they have made the connection, they must send their energy in the opposite direction, otherwise it will simply break and will not exist. But, sending energy along the binding, plasmoids are very different, they are terrestrial, they are cosmic, they are of different density levels.

There is energy from plasmoids from the center of the Galaxy. They have very strong energy, very high vibrational, not in the sense of spiritual vibrations, but in the sense of material ones. Sometimes it is incompatible with the child's body. He may feel unpleasant feelings. He may feel discomfort in his body, he may feel a burning sensation, he may feel trembling, he may have seizures of epilepsy, for example. Turning off various consciousnesses, energy exchange has already begun, and they send energy to it. They charge his body, but he is not ready to receive such energy. Sometimes an adult is not always ready.

And in this case we are talking about a non-harmonized connection with the plasmoid world. There are special techniques for restoring this

harmonization. Without restoring harmonization along this link, it will be impossible to interrupt it. That is, first we restore the harmonious exchange so that he more or less, at least 70 percent, assimilates this energy that suits him, no matter what it is.

The point is that they will simply share the same emotions that they have. If they feed on emotions of aggression, then in return they will give the same to him, simply because they have no other. This aggression or fears will intensify, but his physical manifestations will stop.

After we harmonize the exchange with plasmoids, it is advisable for parents to get in touch with them. If a child does not speak, he will not be able to do this with speech. He simply communicates with them mentally, but conscious contact is needed.

Mom or dad needs to reach their Higher Self. Talk to the child's Higher Self, after harmonizing the binding using special techniques. Special essential oils are used there. I can give this technique if you want.

Natalya: With pleasure.

24:02 Harmonization of the child's energy field through parents.

Natalya: Okay. Tell me, if mom and dad, for example, do not understand these spiritual things, can I, as a specialist, do such things, do I have the right to do this, can I help them?

Irina: You have the right to do this, but it will not have any effect, since it is necessary, first of all, to harmonize the parents, to cleanse them of destructiveness. They are connected by energy with the child. You will restore it, and after a couple of hours, being in a common field with its parents, it will recharge from them again, the distance does not matter. There is no distance for energy. He can live in an orphanage, and his parents are far away, and there, for example, he drinks alcohol and so on. And plasmoids will come to them, and this will be reflected in the child.

Natalya: That's it, I understand. Now I understand how I pulled out my own child. Now I understand, I don't even have to ask this question. At 6 months my baby started to experience backsliding and loss of eye contact. Yes, he's a normal boy now, he'll be 20 years old soon. He graduated from technical school and is studying.

Irina: (Mead speaking) Congratulations! Congratulations - this means I fill you with health, I recognize that you are spiritually healthy. Therefore, we were able to harmonize the Soul dear to you, which came through you into the material world.

Natalya: Thank you very much MidgasCaus, thank you Irina. When I did this, it was unclear to me. Then, in connection with this, I became a specialist, I was interested. And I didn't understand why I helped my biological son, but I can't help these kids in the same way, I can't take it away. But I suspected that I just noticed it too early. At 6 months the pediatrician noticed, I noticed.

Mostly children around 2 years old are brought to me for correction, so this is that age. To be honest, I thought about this. But I suspected that there was a spiritual component, that I had done something that I could not give to my non-biological children. That is the question. Now I understand, thank you very much.

Irina: I think that you can tell your parents in an adequate and correct form about what is happening. That there is a Spiritual world, there are subtle civilizations, and that it is possible that they influence the child's condition, but, at the same time, the state of their energy most influences the child's condition. You can say "Souls", instead of the word "plasmoids" you can use "Nature Spirits", this will be quite correct. And most people in Russia understand these words.

When they hear the word plasmoids, they may become wary and ask: "What is this?" But we can say that the child is special, his perception is changed in such a way that he can see the world of spiritual entities, Spirits of nature, who are next to us. Almost all inhabitants of the Earth know about the words "Spirits of Nature". And even if an atheist, a materialist comes to you and says that none of this exists, you can calmly answer him that new research is already being carried out on this topic, and that only 300 years ago many things that exist were

unknown to science Today.

Natalya: I think that whoever needs it will hear. I think it can be conveyed. OK thank you very much.

28:02 Causes of epilepsy.

Natalya: MidgasKaus, as I understand it, epilepsy is unbalanced energy, right? Any shape.

Irina: Epilepsy occurs from unbalanced contact with plasmoids. Most often, it also happens that these are electromagnetic signals arising in the brain, disrupting consciousness and causing convulsive attacks of various kinds. This is the excitation of the aura. Excitation of the energy of the aura of the etheric body first arises. Doctors usually call this an aura. This is the beginning of contact.

If a patient with some types of epilepsy, sometimes an adult is also a contactee with plasmoids, if at the same time he loses consciousness, and his physical body is in a state of sleep, but as soon as it begins to move, the fact is that these impulses spread throughout body.

These are impulses of his energy with which he is incompatible or little compatible. The spirit of this sick person is not in the human body, he already goes to the Astral level, he communicates with them there. But since the body is in a state of oppression, that is, it begins to emit pathological signals (various hormones), then when the astral body returns to the physical, everything they talked about is forgotten.

Since this contact occurs without the will of the person himself, he does not understand what is happening. He does not understand why he attracted these entities, and even more so he does not conduct a conscious dialogue with them. He cannot cause this contact himself; it comes to him at any moment. We call this unconscious contact, it is at the level of his sensations. When the plasmoid wanted to eat, he came and ate. Night, day, it doesn’t interest him. Or not to eat, but just to communicate, took him to the Astral in this way.

There are such entities - plasmoids. For humanoids, such methods are prohibited. It is these methods of withdrawal to the Astral, with the loss of consciousness of the physical body of a person who does not know how to do it himself, these methods are prohibited, for example, for representatives of the Interstellar Union. I, as a specialist, specifically signed an agreement, where I promised to abandon in my work the inhumane method of contact, including withdrawal through the Astral.

It happens that with some humanoids there is such contact: the body shakes, twitches. This is usually due to energy incompatibility, but unlike plasmoids, they usually remember contact. What they talked about, they can enter it themselves. When a person asks to repeat this contact, he repeats. Both contact and movement, everything will be the same.

31:54 Reactions of a child with autism spectrum disorder.

Natalya: By what signs can one determine that a child is developing ASD in order to begin early decompensation of skills in order to prevent loss? Are there any early, characteristic moments that experts can see?

Irina: If we talk about the earliest signs in many forms of autism, then a child from 5-6 months of age attracts attention by the fact that when the parent leaves the room and when he returns, he practically does not pay attention to it. He may not recognize mom or dad. Usually children begin to ask to be held, and in such children this need is reduced from an early age. He may even, when he is picked up, show dissatisfaction in order to be released.

Natalya: It was at such an early age that I realized that I was not showing animation. All clear. He doesn’t recognize him, he doesn’t ask to be held. Thank you.

Irina: When looking into your eyes, he can turn away. When you try to take him by the hand or give him a toy, he may, on the contrary, take his own away. There is a certain phenomenon of negativism that arises quite early.

Natalya: Yes, I see, thank you.

33:40 Nutritional recommendations for autistic children.

Natalya: And another question, MidgasCaus. How does intestinal microflora affect the functioning of the nervous system? In our world, we use different diets to improve the physical condition of such children. For example, a gluten-free, casein-free diet, which produces certain results. Maybe there are some other diets that can be used to improve adaptive issues. For the best reaction of the nervous system?

Irina: (Mead speaking) Autism is more of an energy problem. I have not seen any particular influence of the protein product on the speed of this process or its features. The only thing is that allergic reactions could be accelerated not only by brain damage, but by stress. They could cause stress in the child. Poor liver function, for example, can cause depression. And depression reduces the vibrations of the child's Spirit and attracts destructive plasmoids.

Natalya: That's it, I understand.

Irina: The fact is that some substances really affect the speed of the autistic process: walling off and loss of speech skills. Or it affects the rate of acquisition of speech skills in a direction that decreases, that is, it negatively affects such children. There is only one substance that has a 100% effect on all children (even relatively healthy ones, but to a lesser extent). And for those who have abnormalities in brain chemistry and serotonin metabolism, monosodium glutamate should be removed 100% from the diet. And to a lesser extent aspartame products.

Natalya: Aspartame?

Irina: Yes, aspartame. Sugar substitute.

Natalya: I see, otherwise I can't make out the last syllable. And we have monosodium glutamate in many products, of course.

Irina: Some people are affected by sodium nitrate. It affects by reducing oxygen exchange.

Natalya: I see.

Irina: And monosodium glutamate affects the synthesis and processing of some brain neurotransmitters, which are responsible for contact with the outside world.

Natalya: I see.

Irina: I would recommend removing such sick children from the diet, even more so. I would also recommend checking for parasitosis and treating them as much as possible. They can also cause allergic reactions. These are also foreign energies that cause additional outflows of etheric energy.

Natalya: Everything is clear, thank you.

37:34 Recommendations for using lavender to harmonize the children's nervous system.

Irina: And now about the harmonization of bindings. I will now give a general understanding. This will be useful for any children, even without any plasmoid bindings or contacts. Just to improve their energy. I want to say that a plant such as lavender and its oil improves contact with any plasmoids. It encourages low-vibration plasmoids to leave and high-vibration plasmoids to come for protection.

Natalya: Great.

Irina: Hello?

Natalya: I hear. I process information too.

Irina: 100% lavender essential oil when used for bathing and massage. It is very useful for such children to have a massage; it enhances the energy exchange between mom or dad and the child. It is especially useful for parents to do this: by lubricating your hands with lavender oil and stroking his body, you will be able to correctly distribute the energy that he receives from the plasmoids throughout his ethereal body.

This will help improve his contact with the outside world too. At the same time, you can mentally address his curators who are nearby, only without any negativity, but simply: “I am sending you the Light of my Love. I know you are nearby." Do not be negative towards them, because low-vibration plasmoids, on the contrary, feed on this. And the Light of Love drives them away. That is, they leave him for this time.

The lavender plant itself is very beneficial. It is useful to give it in the form of tea to such children. For example, before going to bed, it is very useful to give tea with lavender so that he can properly, harmoniously contact with plasmoids all night, since you understand that the plasmoid contactor, when the physical body falls asleep in the Astral, will go to them. To make this contact harmonious for him, you can give him lavender tea.

It is very useful to wear a copper bracelet on the right hand for boys and on the left hand for girls. Copper also improves contact with plasmoids, especially the space type. This is useful for autistic people, epileptics, and those diagnosed with schizophrenia. That is, it harmonizes any contacts, makes them more conscious, and improves the control of the child’s personality over these contacts. Only the percentage of copper in the alloy, if it is an alloy, should be at least 90, and preferably 95%. So that he bathes and sleeps in it too, but only as he grows it must be replaced with a new one.

Natalya: Is it advisable not to take it off at all, so that it is always on it?

Irina: Yes. And during sleep, it is also desirable that he be on it, because in sleep he also exchanges. But as it grows, it needs to be replaced with a new one so that nothing squeezes it.

Natalya: I see.

41:45 Recommendations for parents of autistic children.

Irina: Exception. What recommendations can I give to parents of such children? Complete exclusion of monosodium glutamate, it is also desirable to exclude the sweetener aspartame, and it is desirable to exclude, if possible, or at least reduce the proportion of sodium nitrate, as well as reduce the proportion of sugar and carbohydrates in general, compared to protein foods. They need a varied, easily digestible diet.

Second. This includes using lavender for bathing, lavender oil for massage, and lavender tea as a drink. It is also very good to use natural royal jelly in a dosage adequate to their body weight specifically for autistic children who have lost their speech skills. This is usually a few milligrams per kilogram of body. This is all individual, depending on the manufacturer, but approximately, if you buy it, look for a certain age, there is such a thing. It stimulates both physical and energetic exchange throughout the etheric body. It is very good if parents use it.

If the child has some tics or epilepsy, or you see convulsive conditions that are no longer in harmonized contact with plasmoids, then in addition to lavender it is very good to give a mixture of herbs. Brew a mixture of oregano and a small amount of St. John's wort. Such things will also remove depression, which attracts this kind of plasmoids, and give proper metabolism in the brain.

Natalya: Oh, great! Thank you. I think that I will definitely convey your recommendations to my parents, but at the same time, parents should also raise their vibrations.

Irina: Yes. For parents, as I already said, it is very advisable, having such a child, to go to the Higher Self: talk with your Soul, with your Higher Self. You can talk with the Higher Self of the child (with the permission of your Higher Self), connect with the Higher Self of the child and ask , what are his goals and objectives for implementation. Ask who he has contact with, how he can be helped to adapt to the

material world?

44:50 Recommendations for specialists working with autism.

Natalya: I understand you, thank you. MidgasCaus, please, are there any recommendations for a specialist who works with such children? Because at the end of the working day there are things that are as simple as squeezing a lemon. I don't have enough strength. Yes, indeed, it happens that you barely get home because you give all your energy, or what?

Irina: To give you strength, you can also take energy metabolism stimulants and the same bee products, for example, that I mentioned. Every morning, connect (preferably before work) with your Higher Self. Read our Eslerian mood for raising vibrations and the Burkhadian mood before physical exercise. 10-15 minutes to include the physical body in the physical world after sleep.

This should be before breakfast. It will take you literally 10 minutes. After this, be sure to have breakfast in the morning, and with foods that will mostly contain proteins and complex carbohydrates. Be sure to drink plenty of fluids throughout the day. If you lack strength, it may be because your water metabolism is impaired. Water is a conductor of energies. You may not feel thirsty, but the body and all its cells will feel a lack of fluid. The first sign of fluid deficiency is dry skin. It's clear?

Natalya: Yes, I hear. I nod.

Irina: The picture just stopped for me.

Natalya: And I'm afraid to interrupt because I'm afraid of missing something.

Irina: (laughs). Yeah interesting. The first sign of fluid deficiency is dry skin. By the way, it is also useful for such children to be given more liquid, since they are undergoing an energy process, energy metabolism, but not in the form of sweet lemonades. It can be in the form of pure water, it can be in the form of mineral water, it can be in

the form of water with a small amount of ginger and honey. These are the drinks.

Natalya: I understand, thank you, because I also drink water all the time. I drink water all the time at work, I don't seem to be thirsty, but we drink water all the time.

Irina: And after you come home from work, you can write down your impressions in a special diary, that is, your emotions. Keep a diary of emotions in which you will write down the emotions of this day, what caused you. Perhaps write down some memorable events, and this will help you spend less energy on emotions that you are currently spending on suppressing them. When working with such children, a variety of emotions arise, as you yourself know.

Natalya: I agree.

Irina: And some emotions in relation to such children are not welcomed by society, so a person like you unwittingly suppresses them. Now you understand what I'm talking about. Suppressing these emotions also wastes your life energy. Not only is it wasted, it can also form blocks.

That is, it is very useful for you after a working day, if you have the time and opportunity, to write it down in a special application on your phone. I saw that Irina has a phone, she has an application store there, which even has an application like the Diary of Emotions. It's called similar.

He means that there is like a "Mood Diary". You don't even have to carry a notepad or notebook with you; you can write on the keyboard on your phone if you have time.

Natalya: Convenient, yes.

Irina: This recording will allow you to analyze an emotion and not waste time and energy on suppressing it, because if you carry out this practice for 21 days, then you will react much calmer and your strength

will increase. And, of course, in the morning and evening it is very useful to say a prayer to God, if you believe in him, or meditation, if you hold other beliefs.

Also in the evening, after work, it is very useful to connect with the Higher Self. Through your spiritual channel, tune in to the top of your head, imagine that a ray channel is coming out from there, and through it connect with the Higher Self. Ask the question: “Have I completed the task for this day? Was there something I didn't do? What should I repeat, what lesson did I take? Why did this conflict happen?” Disassemble all this for 20-30 minutes and at the end ask to be filled with the light of Love and thank you. You will feel a very large influx of strength from the Spiritual world.

Natalya: Thank you very much. I have already gone to the Higher Self with a guide. I understand what you are talking about, now try it yourself.

Irina: He speaks himself.

Natalya: I understand, I understand, yes. Thanks a lot. I think I will follow these recommendations.

Irina: I was glad to meet you and talk.

Natalya: Mutually, thank you very much for the meeting. Thank you very much to MidgasKaus for such valuable recommendations and answers to questions.

Irina: Bye everyone.

August 31, 2021

Conference participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Natalia – biologist;

MidgasKaus is a representative of the planet Esler, a specialist in biology, psychology, and alien life forms.

#334 Paleocontact: ancient artifacts, Phaistos disc, megaliths of Baalbek, Antikythera mechanism, Sumerians

https://blog.cassiopeia.center/paleokontakt-drevnie-artefakty-festskij-disk-megal
https://www.youtube.com/watch?v=UaYuyRWjKys

0:19 Introduction of participants.

Vladimir: Dear friends, hello! My name is Vladimir Goldstein. I am located in the suburbs of Chicago. Today we have a continuation of an interesting topic related to paleocontact. We will talk about possibly non-existent contacts of extraterrestrial civilizations with earthlings in ancient times. We have already asked these questions. But many remain unanswered. Today Anna Novikova from London is with us again. Hello Anya!

Anna: Hello everyone!

Vladimir: Hello! And, of course, our dear contactee Irina Podzorova is with us again. Hello Irina! Introduce our guest who will be with us at the conference on paleocontacts.

Irina: Hello, dear friends! My name is Irina Podzorova. I am a contactee with extraterrestrial civilizations. Today we have with us Raom Tiyans of the planet Burhad, who is a specialist in energy interactions. Due to the nature of his activities in contacts with earthlings, he studied the history of contacts between the Interstellar Union and the Galactic Federation of Light with the Earth throughout the history of our planet.

He is a representative of the planet Burhad. This is a civilization in the constellation Cygnus. They are one of our creators. Burkhad is the capital of the Interstellar Union, its self-name is Pikran.

Hello Raom Tiyan! He also says hi to you.

Vladimir: Hello, Raom Tiyan! Thank you for being with us and ready to answer our questions about paleocontact. Let's start.

01:55 Images of aliens in the paintings of Ancient Egypt.

Anna: Thank you! The topic that interests me most is Ancient Egypt. Raom Tiyan, greetings! Thank you for coming to answer questions.

Here we see what we can see from the point of view of earthly people, like a light bulb. Of course, in Ancient Egypt, I don't think there was such technology. It seems to me that, most likely, these technologies were used to paint the internal walls of tombs and pyramids. Because our scientists could not find any traces of burning on the ceiling if they, say, used torches. This is the most common opinion that this was the case. Can you comment on this somehow? Did they actually have the technology that allowed them to deliver light in electrical form?

Vladimir: We remind you where it was.

Anna: Ancient Egypt.

Irina: Display the picture again.

Vladimir: Yes. Please.

Irina: Raom Tiyan, look through me. What can be drawn here?

(Raom Tiyan) It resembles light bulbs only in shape. Because you can see that there is a wire inside that should glow. But it is clear that the color that is applied to the surface of these objects contains lines that look like wires. The surface is light gray. In Ancient Egypt, this paint was used to indicate a metallic sheen or a mirror-like surface. Not glass, but an object that can reflect. Most often, mirrors in the ancient civilizations of the Earth were, of course, made from polished sheets of copper.

From this I conclude that what is depicted here is something like a vessel with an empty hose inside, which contained some liquid, for example, for cultivating fields. Something like fertilizers or substances that could protect plants. But they were not chemical, since they did not have chemical factories. All their substances were made based on natural ingredients. It is known that in Ancient Egypt there were cosmetics and medicinal ointments, including for animals. This means that there were similar remedies for plants.

Vladimir: I see. Tell me, please, what could this figure mean, which supports this light bulb? What is this?

Irina: It’s like she’s standing on his head. Yes?

Vladimir: Yes. And there are some discs on it.

Irina: There is an outfit that supports it. What kind of outfit could this be?

(Raom Tiyan) This doesn't look like a uniform. It looks like the sign of that being who gave knowledge about this device or about this substance that, as I said, was in this vessel. Because these four vertical lines that are on the figure of this creature, this person, they just showed, perhaps, the state of energy. Unlike a man, he had a

different Soul. There must be something else inside these lines: either written or drawn. Hard to see. Perhaps names were written there.

Vladimir: So this is an alien? Could there have been a representative from Tumesout? Or who?

Irina: (Raom Tiyan) That's why I looked at the face. There were eyes visible. Judging by the fact that the face itself is larger. Here two eyes are visible, between the first and second lines. Yes, I see them. The pupils are clearly visible there. Since the face itself is drawn larger than that of the person drawn next to it, so perhaps it was a representative of Tumesout. And within this framework, perhaps something was written.

Vladimir: I see. Thank you! Anya, did you receive an answer?

Anna: Yes. I received a complete answer. Not exactly what we thought, but it's also very interesting. Thank you

07:35 Phaistos disc. Subject letter. Transition to runic writing.

Vladimir: Let's move on. This is exactly the question we have been asked to ask many times. Anya, please.

Anna : Phaistos disc. He was found on the island of Crete. None of our modern solvers who tried to solve this riddle know what is written or drawn here. What theories could there be? What could it be? What are we looking at?

Vladimir: Let us show you. This is the island of Crete. And we'll return there.

Irina: (Raom Tiyan) Firstly, spiral writing with ancient symbols is found almost immediately after the war. And in pre-war times, up to 12 thousand years ago, such, one might say, books or individual letters in the form of a spiral usually began to be read from the center. As I already said, the proto-language consisted of syllables, and each

syllable meant a certain symbol - it was a runic letter.

And here we see not a runic letter, but one might say its predecessor. Objects are drawn directly. There was such a substantive letter. Here we see a separate transition to runes. Here already in the form of letters such as, for example, the Russian “v” - I see. Or Latin “b”, “s” and so on. These are already some runes.

And the fact that individual objects are drawn here, such as flowers, animal skins, people, trees, animals and household items. Here I clearly see a musical instrument. I don't know if you can see where I'm showing.

Vladimir: Yes, a musical instrument. Come on, I’ll find one for myself too.

Irina: Here, in the second picture.

Vladimir: Where is the musical instrument?

Irina: And here. Drawn in the shape of a harp. Even the individual strings are visible here. In the second picture.

Vladimir: Oh, on the second? Now. Give me a sec. Let us show our viewers.

Irina: Right here.

Vladimir: In which row?

Irina: Below and to the left.

Vladimir: Below and to the left.

Irina: Go even lower. Below, below. More. Here. Now on the left. Do you see?

Vladimir: This is it?

Irina: Yes.

Vladimir: Okay.

Irina: (Raom Tiyan) And these are individual household items that look like various shields, for example. And on the second disk, round ones with spots, look like ancient tambourines. There are clearly fish drawn here.

Anna: What could the author be trying to convey? What message?

Irina: (Raom Tiyan) So, let's see. What do we have here in the center of the first? It looks like a flower. A whole story unfolds here. A man walking means a symbol of the path, the skin of an animal. You need to understand exactly how ancient man thought in the reality of that time.

This cannot be conveyed in separate letters, like “o” or “v”. It's more of a symbol system.

Vladimir: Like hieroglyphs?

Irina: (Raom Tiyan) This is an even more ancient form than hieroglyphs, but it is similar to them. In Egypt they use similar ones. The city of Carthage, which existed in ancient civilization, also had similar letters.

Then people moved on to hieroglyphs and individual runes, when it became difficult to express all the words of a developing language in separate drawings. Such drawings were made at a time when there were relatively few words in the language, and it was just developing.

And as the concepts of the world, of other peoples, of other phenomena expanded, it became more difficult to denote them with separate signs. For example, if a flower is drawn, this does not mean at all that it was really about a flower. Perhaps this meant something like blossoming.

It must be remembered that the ancient people who lived among nature had very clearly developed imaginative thinking. And therefore, a scientific approach to the study of these discs by people who do not possess this type of consciousness is very difficult. In any case, it will approximately reflect what ancient man put into these signs.

Vladimir: It's clear in general. Fine. Thank you! Go ahead.

13:05 Baalbek plate. Capabilities of ships of the Interstellar Union and the Galactic Federation of Light.

Vladimir: This is a very famous building - the Baalbek terrace or veranda. Alexander Kazantsev talked about this in his book "Guests from Space." It is located in Lebanon. Anya, let me tell you further.

Anna: There is a version that this platform was built many thousands of years ago. And it was originally used as a landing pad for alien ships. And then human civilization built some of its buildings on it. What can you see here? Is this really true?

Vladimir: The point is that this slab (its proportion compared to people and animals is shown here) is not clear how it could have been delivered here. No modern mechanisms could do this either, especially in those days. And the question, in fact, is: who and how was able to simply move it here? Next, is it already clear what versions arise?

Irina : (Raom Tiyan) Do you see what's the matter? Ingenuity. I studied your ancient civilizations even before the invention of the wheel, even a specific mechanism that made people's work easier. The ingenuity of ancient people amazed all our researchers. Especially in the matter of construction.

Similar blocks, not this particular one shown here. And the blocks that weighed 5–7 tons, which could not be moved by either animals or people. If there was no river nearby, along which, using special levers, it was possible to move it on a special wooden platform.

But if there was no river nearby, which was often the case in arid countries such as Israel, Lebanon and the Arab countries, round devices were used to replace the wheels, they were made from trees. This block was placed on them, tied to the animals and by pushing and holding in one position by several people, it moved, albeit slowly. It sometimes took many weeks from the place where this piece was mined and the stone was processed to the construction site. And yet it was done. We saw how similar blocks are moved, and how they are pulled up, secured, and inserted into one another with the help of ropes.

We saw the art of stonecutters who, using primitive bronze tools, could hew this block very smoothly for weeks and months. Changing several dozen damaged instruments, they achieved almost smooth glass.

This was the concept at that time that the construction of temples for gods, for example, or palaces for kings had to be carried out in the most perfect form. It is clear that the attitude towards employees also played a role here. Then there was a slave system, when there were many tens or hundreds of slaves who were acquired in other countries for money or were captured in other territories through war. They were used in this type of work which was very hard and not done by the people of this country.

That is why countries such as Lebanon, Egypt, Mesopotamia, the Chaldean countries, and so on, waged constant wars among themselves not so much for territory as for the capture of slaves. This was necessary for the construction of buildings like this, of which there are actually many dozens in the Near and Middle East. Not all of them have survived. Many were destroyed as a result of war, fires, robberies and so on. This has been preserved.

As for landing sites for alien ships. The ships of the Interstellar Union and the Galactic Federation of Light, perhaps 6–7 million years ago, even before the discovery of your Earth, were equipped with landing

modules and instruments that do not require a flat platform for landing. They can generally hover above the surface thanks to an atmospheric engine, and can also land not only on an uneven surface, but also on water or in a small clearing in the forest. Or move underwater.

The ships of the Interstellar Union have speed and maneuverability and are small in size. And large ships that are inconvenient to land in such places, usually on planets like Earth where there are no such sites, do not move from orbit at all.

Vladimir: We understand everything. Raom Tiyan, please tell me about the Baalbek terrace, your version personally. Why was this necessary, and could either aliens have been involved in this, or could some kind of alien technology have been used? Or was it done using absolutely earthly technologies? And in general, aliens have nothing to do with this? Your personal version.

20:09 Alien technologies.

Irina: (Raom Tiyan) You know, alien technologies could well have been used. Before the birth of Christ, before the beginning of the New Era, there were alien devices for reducing or eliminating gravity - anti-gravitators. It was not prohibited to transfer these devices to people. There were no technologies yet that could try to replicate these devices and use them to harm people. For example, on the contrary, not to reduce gravity, but to increase it in some area, which can be used as a weapon.

At that time, such so-called gifts from the gods were often found in various places on the globe. Moreover, the curator who could give such a device to the contactee could not even imagine in which part of the globe it would end up in a couple of months, having been gifted, sold or inherited. There really were such cases.

These devices could operate for many decades without recharging. Because they were recharged from geomagnetic energy, from the energy of the Sun, from cosmic energy, radiation from stars and retained their energetic strength for many years. But they could break down or fail due to inept actions of people. And then it became a

useless, useless object, which could become, for example, an object of worship. And then it could end up in a private collection after the temple was robbed.

Vladimir: And in this particular case? Still, I want to come back again.

Irina: He doesn't know. He wasn't there.

Vladimir: But we can’t tell based on some kind of energy pattern?

Irina: What energy trace can there be from a photograph if he was not in this place?

Vladimir: In general, maybe this version and that version. We cannot yet determine exactly. Fine. All. Thank you!

Irina: Aliens did not need to build if earthlings could apply alien technology only using such donated things.

Vladimir: Okay, I understand.

22:38 Antikythera mechanism.

Vladimir: I want to ask this question: the Antikythera mechanism on a ship was found in Greece. Please, Anya, about this.

Anna: Yes, for many years scientists have been puzzling over what it is? The mechanism was found in the Mediterranean Sea near the island of Antikytheria, which is why it was named that way. Our scientists think that this was, in their minds, part of a navigational device, which perhaps worked for navigation by the stars. The whole mystery is that it was dated, in my opinion, to 2005 BC.

Vladimir: The year 205 is written here. 205 BC

Anna: 205.

Vladimir: That is, approximately 200 years before the birth of Jesus.

Anna: Yes, 200 years before the birth of Jesus. And, of course, such technology most likely could not have existed at that time, or could not have been invented by the people who then existed. That is, there was a possibility that it was transmitted by some alien civilizations.

Returning to the previous conversation, maybe this is one of those devices that were handed over and then forgotten how to use it. They broke, lost, and they disappeared into oblivion. But at this time they found it, and our scientists do not know what it is. Are there any versions of what this could be?

Vladimir: Please comment.

Irina : (Raom Tiyan) I don't see what is drawn in these circles. There was even something written there. Most likely, the celestial sphere with planets is depicted here. Here is something like an ancient astrological tool for calculating the angles and houses of a horoscope.

Anna: That is, on the left is a reconstruction. How our scientists roughly imagine it. And on the right, the green part is the one that was raised.

Irina: (Raom Tiyan) I see that. The fact is that in these drawn circles there should have been planetary icons or numbers. You need to count how many squares there are and how many degrees the circle is divided into. And then we will understand what we are talking about here. From the look of the reconstruction, I see that this is some kind of astrological instrument.

Anna: On the left is a reconstruction, as our scientists imagine. And on the right, the green part is what was lifted, what it looked like.

Irina: I see how they lifted it. The circles, they were drawn there?

Anna: Yes.

Irina: They should have had icons, planets or numbers, etc. We also need to count how many squares there are, how many degrees the circle is divided into. This can be calculated. And then we will understand what we are talking about here. From the appearance and reconstruction, I see that this is some kind of astrological instrument.

Why do I say astrological and not astronomical? Because at the time you named, astrology was inseparable from astronomy, and they formed a single whole. In terms of alien technology, if the aliens were to hand over an object like a calculator or an orienteering object, like your compass, but which shows many more parameters, there would be no handles on the side, gears, and so on.

We are specifically talking about geometry here. Geometry was well known 700 years before the birth of Christ in both India and Greece. And all the laws of geometry and mathematics in general were discovered by the ancient Egyptian priests, even, in my opinion, even earlier. I want to say that any Spirit that incarnates at any time always carries with it the Light of God, that is, the knowledge that it has about the Universe. And he expresses them in the language of the culture, the civilization where he was born.

I don’t know, of course, what materials this is all made of, but in terms of form there is no application of the laws of nature, which were not known in the 2nd century BC, the Christian era. Circles, various aspect ratios, formulas, and so on have been known for a very long time. In the forge they could make fine instruments.

Vladimir: We understand the answer. Thank you!

Irina: (Raom Tiyan) They could even make thin needles. There were such forms.

Vladimir : The answer is clear. That is, this is most likely a purely terrestrial development.

Irina: He does not see alien technology here due to the application of generally known laws.

27:29 Sumerian reliefs.

Anna: Yes. In general, in the Sumerian civilization they always said that the gods came to us from above and gave us knowledge. So, they saw their gods. These are their gods. My question would be: what do we see with our modern eyes? Their gods walk around with watches on their hands and some kind of handbags. It's very interesting what kind of mechanism is on their wrists, and what could be in these handbags?

Vladimir: There's like a clock here. And we'll show you, here it was.

Irina: Raom Tiyan asks: "I wonder why the modern person sees in this item on his hand a watch, and not a bracelet, for example, with a large stone?"

Anna: Quite possible. But we want to see the clock.

Vladimir: Why are they on the right hand and not the left? When it's more convenient, on the left. We are used to wearing it on the left.

Anna: And here on two hands. On the left and right.

Vladimir: Oh, on two hands?

Anna: I don't know, maybe the time of planet Earth and their own planet.

Irina: It's good that at least you don't see the handcuffs.

Vladimir : Yes, that's for sure.

Irina: What's in the purse? There's something written on it. Exactly. Come on now?

Anna: Here is Sumerian cuneiform.

Irina: (Raom Tiyan) On the left is a figure of a bird, a creature with the head of a bird in a helmet and with wings. He definitely has a sheath with a knife on his side. And they are not on his belt, but higher under his arm. Ancient people did this too, because on the side it would be visible to everyone, but otherwise it would be hidden.

Ancient civilizations had people like guards, guards for kings, priests, who had hidden weapons so that people would not see. I'll even tell you that in such civilizations there were already spies who scouted out the military and political secrets of other countries. Yes, that's all it was. At its own level, but it was.

You see, what's the matter, there were people who could make very beautiful jewelry, earrings, rings, very beautiful figurines of gods and so on. Create a handbag with a wooden handle from animal skin or from animal bone, from the same rib, covered with glaze, etc. For them it was not difficult from the point of view of technical labor. In ancient times there were wonderful jewelers who smelted amazing jewelry from gold.

There is a statue of Vishnu or Krishna in India that has several hundred very small precious stones. They were, of course, not as carefully cut as with modern technology. They were very small and made up the outfits of the gods. And this was done by the people themselves. So making such products was not difficult.

Moreover, people discovered a long time ago that it is more convenient to carry various important items in a closed bag than in your own hands. Firstly, you can put more in there, and it's more convenient to carry. The figure of God himself attracts more attention.

Apparently, this depicts a representative of a plasmoid civilization, but most likely the priest who came into contact with them. That's why he

has the head of a bird, and a bird of prey at that. He was also a temple guard. The knife he has proves this.

What's in the bag? Perhaps his offerings to the gods. Clothing is typical for residents of hot countries: an open top and a long cape that covers the legs from the hot air.

Vladimir : Thank you!

Irina: (Raom Tiyan) And wings are a symbol of the ability to fly. Indeed, such ritual clothing could have been made.

32:54 After the ship Tumesouttsev on Mount Sinai.

Vladimir: In general, the answer is clear. We still have a few questions, but we may continue. We will have the third part of “Paleocontact”. This is a long, long, almost eternal topic. Finally, I want to ask a question that we didn’t have. I hope this can be answered short and to the point.

The question is this: is there any trace of the ship or ships of the Tumesouts where they led Moses and the entire Jewish people? Eric von Däniken argued that there is a trace in the desert, an imprint of this ship. And even our cosmonaut Grechko tried to explore it, even sent an expedition there. Is there anything material there? Or do you think, Raom Tiyan, that we won’t find anything there?

Irina: (Raom Tiyan) For 4 thousand years? I wonder how the sand didn’t cover this footprint?

Vladimir: And there are rocks, mountains. There didn't seem to be any sand there. This is on a hill, on Mount Sinai.

Irina: (Raom Tiyan) If this is a mountainous area, then how is it not overgrown with vegetation? They could land in the desert and could go out. Not only in the mountains.

Vladimir: That is, in your opinion, there are no physical traces there. And what Erik von Däniken saw was a certain imprint, a trace from a ship, seemingly from orbit, from above...

Irina: (Raom Tiyan) Maybe from some modern one?

Vladimir: Maybe from a modern one. That is, in 4 thousand years nothing can be there. Thank you very much! Thank you, Raom Tiyan, for an interesting conversation and very detailed, detailed, convincing answers.

Anna: Thank you! Goodbye!

Irina: See you again!

Vladimir: See you again on air! And see you again on air on the topic of paleocontacts in particular.

September 02, 2021

Conference participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Vladimir Goldshtein - journalist and Facebook group administrator, assistant director of the Cassiopeia project;

Anna Novikova - guest from London;

Raom Tiyan is a representative of the planet Burhad, a specialist in energy interactions in the environment of the material world.

#336 Ufologist L.E. Chulkov. Keys to the great mysteries of existence. Engine powered by physical vacuum energy

https://blog.cassiopeia.center/ufolog-l-e-chulkov-klyuchi-k-velikim-tajnam-bytiya

https://www.youtube.com/watch?v=QwIZzDdP6nE

00:18 Autobiography of Chulkova L.E. Glushko. Korolev.

Maxim: Lev Evgenievich, please introduce yourself, who are you? What did you do and what do you do in life?

Lev Evgenievich: I was born in Moscow in 1938, that is, I belong to the category of children of war, who, it seems, were promised to make up for their physical and moral losses, but the Duma, in my opinion, rejected this point. I graduated from the Moscow Aviation Institute, Academician Mishin's department. This is one of those academicians who, after the death of Sergei Pavlovich Korolev, headed the rocket design bureau (design bureau). Academician Mishin's department is rocket and space technology.

I started working at the leading institute for rocket and space technology, this is Kalinin, now Korolev. NII 88 or TsNIIMASH (Central Institute for Rocket and Space Technology). There was a leading institute. I worked directly on liquid-propellant rocket engines. This was my specialty.

My supervisor for my Ph.D. thesis was Sevruk Dominikovich, God rest upon him, one of Korolev's deputies. They were in prison together with Korolev. At first they transported wheelbarrows with gold-bearing sand. Two brilliant designers transported wheelbarrows with gold-bearing sand. Korolev had marks on his hands from these wheelbarrows for a long time. Dominic told me this himself. He was my leader.

The first opponent when I defended myself was Vitaly Leonidovich Shabransky. This is one of Academician Glushko's deputies for fire tests in Khimki. There is an institute for liquid rocket engines, which was created by Academician Glushko. May he also rest in Heaven. His "deputy" for fire tests was my main opponent in the dissertation.

The dissertation passed without a single "black ball". However, my black opponent held me for about a year and a half, probably. All this, of course, was on my nerves. For six years I worked very hard on my dissertation. I went on business trips to test rocket engines, to Krasnoyarsk, Voronezh, and other cities. This has not been a secret for a long time. Here I was, defending myself.

03:23 Siegel F.Yu. Ufologists.

Maxim: I know that you are one of the most experienced ufologists.

Lev Evgenievich: How to say " the most experienced"? The Patriarch of Ufology in the Soviet Union, I consider deservedly, is Felix Yurievich Ziegel, a teacher at the Moscow Aviation Institute (MAI). I studied where he taught applied mathematics at one time.

When I finished my Ph.D. dissertation, my supervisor at the time, Sevruk, suggested that I give lectures at the Moscow Aviation Institute, immediately after my defense. I took advantage of the moment. I already knew that Siegel was involved in this matter. I listened to his lectures at the House of Aviation and Cosmonautics and realized that this was the main idea and the main meaning of my life. Just this.

He took courage and caught Siegel during a break: "Comrade scientist, here I am." Young, still arrogant, self-confident. He gave me

his address: “Come to my house, we’ll talk.” From that moment on, I was 34 - 35 years old, I don’t remember now, we collaborated with him.

How did you collaborate? Sometimes we went to the landing sites. Sometimes he gave literature that came from everywhere from abroad. Famous ufologists sent literature. He had a special translator. All this came to us, we read. There is a book published after Siegel’s death, by his daughter. I can show you later. It's a long story. Then Siegel, unfortunately, died of a stroke when he was 66 years old.

Soon after that, I stopped working in mailboxes and began teaching mathematics. Because, in addition to the Aviation Institute, being already a candidate of sciences, I took a full course in mathematics at MIEM (Moscow Institute of Electronics and Mathematics). He was quite good at mathematics. I knew that studying rocketry only at the level of the course that was taught to us (although we were taught a serious course in mathematics) was still not enough. Therefore, I went through a very thorough...

06:04 Chulkov's testimony about UFOs. Chulkov's contacts with aliens. Electronic wallets, money.

Maxim: Lev Evgenievich, have you seen the flying saucer yourself? Have you ever communicated with aliens?

Lev Evgenievich: I'll tell you this. I have seen flying saucers several times. Mostly they hung out. Sometimes I saw it in airplane mode. But this was all too far away. Once, however, there was a vivid vision, right in Moscow.

As for direct contact, it seems to me that I had direct contact twice in a somnambulistic state.

Maxim: What does this mean?

Lev Evgenievich: Now I’ll tell you. One day, already seriously studying flying saucers, I was lying down. Often, especially after the

“black” kept me for a long time, insomnia began. Insomnia by nature.

Maxim: “Black” - who is this?

Lev Evgenievich: “Black opponent”, who had to give additional explanations, agree that, yes, I deserve a candidate of technical sciences. This is an academician whom I had no right to know, so as not to rush, etc. So he kept it for a year and a half, although he gave a positive review. When you wait a year and a half after working for six years, it all takes a toll on your nerves, you know?

Maxim: Yes. What is a somnambulistic state?

Lev Evgenievich: What is it? So he started talking. One day I was lying down, insomnia. It’s two o’clock in the morning, I can’t sleep, what should I do? Let me ask them a question.

I address him politely and tactfully: “Okay, you are giving me knowledge that can be used for aggressive purposes, for war, etc. I understand you. Why not give some kind of knowledge that cannot be used for military purposes, but which would allow us to eliminate many human vices: money-grubbing, theft, etc. Is this possible? And to me, it’s like: “Yes, you can.”

“Then how can this be done, I wonder?” "Very simple. You can do it completely without money. Money can be completely liquidated. Make electronic media." "How is it?" And they show me a mnemonic diagram. Such and such a store. Let’s say I become the director of a store, I’ll hang around there, steal, but it doesn’t work out, because there’s no money as such. There is only an electronic wallet in which my honest labor income is recorded, which no one can use, etc. All this was demonstrated to me. I saw this mnemonic diagram and how it works. Well, I can't do anything. Whatever gold I have there, I’ll loot some gold somewhere, but I can’t hand it over. They will say to me: “Where from? Why? Did your grandmother leave you something? Come here".

Then it was as if I had been shot, I immediately fell asleep and fell

through. I wake up at seven o'clock (I don't know), quickly run to my work desk in my office and write everything down. It remains in memory. And I, a rocket scientist by training, a mathematician, began to study finance and economics.

09:48 Reaction of USSR government agencies to the introduction of electronic money.

Lev Evgenievich: In the end, I completely described this system. I wrote a letter to Kosygin. It didn't hit him. It ended up in the Central State Bank. There was, in my opinion, some Pchelin - the chairman of the Central Bank (I don't remember now). It was '78.

Maxim: You wrote about the need to get rid of money?

Lev Evgenievich: I wrote not "you need to get rid of money," but "here's how you can get rid of money." Lose almost all unearned income. I knew that at that time there were 250 billion rubles in the hands of people who had unearned income. Of the state budget, approximately half remained in unearned income.

Conference participant: From paper money, you mean?

Lev Evgenievich: From pieces of paper, of course. Electronic media, please. They bear the name, patronymic, and title of the person who owns them. Why did he get them? There's no escape.

Pchelin answered some nonsense. I'm writing again.

Maxim: How can they answer anything when they are in this structure? They themselves had unearned income.

Lev Evgenievich: You see, I was a young man, 1978. I was confident that I had received the correct information.

They started writing some stupid things to me. I write to them again.

I'm showing you guys are writing nonsense. Then I was called to the Central State Bank of the USSR. I wrote them a section: “Structure, dynamics, finances.” As a mathematician, I showed them the structure and dynamics of finance. How, what, where is it distributed, where do unemployed people go, etc.

I am summoned to the Central State Bank. They are tired of this crazy psycho. I apologize, not to the Central State Bank, but to the economics department of the CPSU Central Committee.

Two or three young guys are sitting: “Lev Evgenievich, we really liked your work (this already happened under Gorbachev), especially the section “Structure and Dynamics of Finance.” Would you like to work for Abalkin at the State Institute of Economics of the USSR Academy of Sciences?” “In principle, it would be possible, but I’m a rocket scientist, I’m a mathematician, what’s Abalkin to do there?” “If you want, we will call Abalkin now, and you will be received there.” “Come on, call.”

I went there. Kashin came out. It seems that the doctor of economic sciences began to tease him like this: “And what do you do?” “I don’t know what you do, but this is what I do.” "What would you like?" “I would like to work in this direction, perhaps with your help.” “We can, of course, hire you on a voluntary basis after hours.” That is, please study this science of yours for free and during non-working hours. They just unsubscribed.

I was also called to the Central State Bank. I don't remember now. I have a whole folder of documents.

Maxim: Lev Evgenievich, I understand you.

13:15 Contactors of the Soviet Union. Korshunov, Malyshev, Belesin, Kostrykin, Meksiter.

Maxim: Please tell me, have you seen many contactees with extraterrestrial civilizations in your practice? Have you communicated with contactees?

Lev Evgenievich: Yes. Communicated. This is Korshunov.

Maxim: Victor.

Lev Evgenievich: Yes. Viktor Aleksandrovich Korshunov, who recently died. Although his contact always caused me some confusion.

Maxim: What exactly?

Lev Evgenievich: I can’t explain it to you exactly now, I don’t want to waste time on it. Firstly, he is already a deceased person, it’s not good to say.

Maxim: Were there any doubts?

Lev Evgenievich: There were certain doubts.

Maxim: That this is the work of the brain, that this is not real contact?

Lev Evgenievich: No.

Maxim: What are the doubts?

Lev Evgenievich: In my opinion, there were contacts, but he began to add more details and add more details. He exaggerated his role as a contactee. In my opinion.

Anatoly Malyshev. Country guy. Education - eighth grade. They took him on the device. Village near Solnechnogorsk. At first he thought that some of our spacecraft had crashed. Then I understood. I have a description of his contact here so I don’t waste your time and mine.

In this almanac, one is my story, a practical story, and the other is a contact with Malyshev. "Walking three light years." That's the name of

the article. You will read how I communicated with Malyshev, how I went to the places where he was taken, etc. It was a genuine contact, I had no doubts. Korshunov will forgive me, I treated him with great respect. Lots of questions about his contact.

Valentin Ivanovich Belesin. I have all the reports in the archives. I won't show it. It will take you a whole day to see it. He performed with Azhazhi at that time. He came to me and said: “Do you see my hands? These are the hands of a mechanic. I am a mechanic of the seventh category, an electrical engineer.” Krasnodar region, in my opinion. There is an address.

I have a report that he wrote to the Academy of Sciences, but they threw it in the trash. I caught fish early in the morning on the river. He hears a voice: “What, it’s not biting?” He turned around and wanted to send them somewhere in Russian. “I see the guys are very nice. Three. You can't be rude to them. Came up. We started talking. He started talking. Then I hear that their voice is sounding right here in the back of my head.” Like Malyshev, practically. He hears a voice in the back of his head. Then they began to tell him: “Do you want to know everything?” Further more. He realized that he was talking to aliens.

Then they started giving him information. I have Belesin’s entire report. A man with an eighth-grade education got into quantum mechanics, astronomy, and chemistry. I studied this report carefully. I talked and worked. He realized that he needed to develop a mercury engine that would remove the Moon from orbit. The Moon seems to pose a threat to the Earth.

I had doubts about this. But, nevertheless, I got him mercury, although it was difficult to get, you understand. Firstly, it is an aggressive substance that can cause poisoning. I got him a vacuum pump. I made a vacuum tube, there was mercury there. We tried to test it all at the dacha. We couldn't do it. Then he wrote me a letter: “Lev Evgenievich, I was wrong.” I also thought: “What if we remove the Moon?” His report is long, I'll keep it short. He is also a real contactee. His understanding was different.

Kostrykin Viktor Petrovich. I did not meet him directly. Two contacts. He wrote the magnificent book “Beyond the Unknown.” He wrote me

one letter. Personally, I did not communicate with him, because he lived in the Nalchik area. The contact was in the mountains. Twice.

Meksiter Mark Aronovich. There also seemed to be contact, but again I have a lot of questions. There are many questions about Korshunov and Meksiter. There were no questions regarding Malyshev, Belesin and Kostrykin. Mark has been deceased for a long time. Mexiter gave me a book. Translation of “Inside the spaceships” - “Inside the spaceships” - American contactee George Adams. Great book. I have it, translated from English. I used it when describing the works and made links. They talk about our civilization.

Maxim: Please pass the book. I'll show it to our viewers. Here's a book. It's called "Keys to the Great Mysteries of Existence." The structure of the Universe is described here. Our interstellar friends would now help to correct the structure of the Universe in their own way.

20:13 The attitude of scientists and the media towards ufology. Einstein. Prokopenko channel.

Lev Evgenievich: Kunitsyn, Doctor of Science, professor, philosopher. He knew this very well. He performed at Moscow State University. They kicked us out. Including him, although he is a professor. We got together, he gave us a lecture, told us his vision. Many scientists admit.

Others do not recognize it because Einstein formulated that there is no speed greater than the speed of light. He put the cross on flying saucers. He is still praised to this day. Although Einstein was cut to smithereens by at least five hundred respected scientists, including academicians, Vernadsky and others. Atsyukovsky, who, in my opinion, is still alive, is a Doctor of Science. Works at TsAGI.

I collected all the works and showed them. Which word should I choose? An attempt to distinguish oneself from others, without any reason. That's what Einstein is.

You are wrong; not all scientists admit this. Another thing is that few people dare to express this officially: in the media, etc. Igor Prokopenko is cut out, he is quiet again. Apparently they threatened him. He intersperses with what kind of vodka Americans drink, etc.

Maxim: Well, yes. What kind of tablets?

Lev Evgenievich: He has a channel. He earns a lot of money. Publishes books. Uses the same as mine, books and others. It all adds up. Sells at huge prices. On a larger scale.

Why didn't he invite me? He knew very well about my existence. He knew that I gave lectures in Voronezh when you guys were still children, and maybe you weren't even alive yet. I gave a lecture in Voronezh with these "star sons", in the Palace of Culture. There was a queue for my lectures; there was mounted police so that people would not break windows. When the "star sons" bought my books: "Don't give more than two copies to one person!"

Prokopenko also knows all this, although he was a snotty boy at that time. He knows Korshunov and Korshunov's wife. She talked to him.

Maxim: That is, it is not beneficial to show them the contact.

Lev Evgenievich: It is not profitable if you are a real contactee who does not lie or dissemble. Which goes ahead on this issue. He won't show me.

23:17 Presentation of conference participants. Contacts Chulkova L.E. Chips. Consent to contact.

Maxim: Irina, please introduce yourself. Many viewers will now watch the program and not understand who you are.

Irina: Hello, dear friends. My name is Irina Podzorova. I have been a contactee with extraterrestrial civilizations since 1999, since I was 13 years old. We have a project called Cassiopeia, the purpose of which

is to disseminate information from the Interstellar Union (ISU) of our Milky Way Galaxy. Not only the dissemination of information, but also working with each person to increase their level of awareness and perception of the Spiritual world. This, according to the alien friends who are in contact with me, is the main task in this period of development of earthly civilization.

Now next to us there are four representatives of alien civilizations in astral bodies. This is a representative of the planet Shimor, the constellation Andromeda, LiShioni, a specialist in astral interactions. MidgasKaus, my curator, from the planet Esler, the constellation Boötes, biologist, psychologist, specialist in alien civilizations. For them, earthlings are aliens, so he is an expert on our civilization. He is in contact with us. Also present here is a representative of the planet Burkhad, a specialist in energy interactions in the environment - a similarity to our physicist - the planet Burkhad, self-name Pikran, constellation Cygnus. There is a representative of the planet Futissa present here, his name is Plearchus, this is the Pleiades star cluster. He claims to be our guest's handler.

Maxim: Lev Evgenievich, I congratulate you. Meet your supervisor.

Lev Evgenievich: Thank you. One night I had a dream that I will probably never forget. They are leading me, or lifting me onto the ship. He is short. I think: “Wow, I wanted to, but why am I so afraid?” There are three of them, I think. One says: “Don’t be afraid, we won’t kill you.” And the other says: “Yes, if we kill, then we will revive.” Literally. I'm coming. And he, apparently, is their main doctor, elderly, dwarf, wearing gloves. He feels my head, apparently testing some abilities. The dream was so clear, as if in reality.

Maxim: We can ask the curator if you had physical contact. Irina, please ask.

Irina: Plearchus, was there? He says: “Repeatedly.” He shows me the boy. This happened in childhood.

Lev Evgenievich: For a long time. Yes, it's possible.

Irina: 11 years old.

Maxim: 11 years? How many physical contacts were there?

Irina: Nineteen.

Maxim: Nineteen?

Irina: He showed me the number. It shows that this happened in different parts of the country.

Lev Evgenievich: Naturally.

Irina: He has the chip.

Maxim: Where?

Irina: Two.

Lev Evgenievich: What is this? It doesn’t hurt and it doesn’t go away.

Irina: Shows that it is somewhere in the back of his head, at the level of the 6th cervical vertebra, only inside.

Maxim: Biological chip?

Irina: He shows me a ball that changes shape, some kind of polymer material. How to put a star.

Maxim: What about the second chip?

Irina: And the second chip, he says, is in the brain. I don't know what a cortical structure is. He says that somewhere in the subcortical

structures, he is responsible for translating their speech into earthly speech.

Maxim: That is, in constant contact. How often do you contact on the astral, mental level?

Irina: Almost constantly. I am his curator, but others come. He communicated with Ashtar Sheran and other Pleiadians. He communicated with the MS, with the Pikrans, but not with Raom Tiyan, with others. The contact he talks about is one of many. He consented to contact as a child.

28:48 Reason for memory blocking Chulkova L.E.

Irina: He himself asked to block his memory. He said that if I was not adequate in that scientific environment, if I accidentally talked about contacts, I could be removed. He said it back when he was working. When he was a child, we ourselves asked whether to block the memory, how his relatives and environment would react, he doubted that he would be understood and accepted. And so as not to accidentally ruin this child's life, they decided to block it too.

Lev Evgenievich: I remember that. As a child, I always regretted that I would never be able to get to the moon.

Irina: He was there.

Lev Evgenievich: In early childhood. "I will never go to the moon!" I didn't have the thought of death, that everyone was dying and I would die. But it was a great pity when I was a child that I wouldn't get to the moon.

Maxim: Where were the chips installed: on Earth or in other places?

Irina: The first one is on the lunar base, the second one is on Futissa, on our planet. We moved him to the Pleiades.

Maxim: You were on the Moon, but you don’t remember about it.

Lev Evgenievich: Perhaps I wrote a book. I can't publish it. "Alien base on the Moon." With artifacts. With photos.

Maxim: Why can’t you publish it?

Lev Evgenievich: Firstly, we need money. I paid for all these things from my pension, you know?

Maxim: What if we help?

Lev Evgenievich: I cannot accept this, because you are not oligarchs. After all, you also live on your labors.

Maxim: People help us.

Irina: Yes, people can collect.

Lev Evgenievich: Guys, it’s better not to help me, but to help my scientists, colleagues with whom I am connected. That would be better.

30:42 Discoveries of scientists that need support. Invaluable works of Chulkov.

Maxim: How can we help our colleagues?

Lev Evgenievich: For example, one nuclear scientist is from Sarov, one is from Dubna. One receives artificial diamonds. Very accurate, very high quality, not much different from natural ones. Another - I don’t remember which of them is in Sarov, which is in Dubna - receives the purest aluminum, without impurities, there is no such aluminum. They need money to conduct experiments.

I personally have several suggestions. In particular, I have a proposal: it is possible to organize the fight against locusts without using any chemicals, poisons, etc. Effectively control locusts using electric current. The whole system has been worked out. I told my friend: “Yes, when we get the money, Lev, definitely.” Many years later.

Maxim: I found out who your curators are and I feel them. I understand that we are doing the same thing. You knocked on closed doors. Now these doors have opened slightly. The Internet appeared in the form in which it was supposed to appear. Then - books, gatherings, stampedes, now - the Internet. We can shine in the Internet space. Even if we are closed later, it doesn’t matter. We will give people...

Lev Evgenievich: The first impulses.

Maxim: Yes. The first impulses are for them to come to the realization that it exists. When I met Irina, I had no other thought other than “People, look, I want to show you that this is all real.”

I believed in this since childhood. I have contacts since childhood. I stopped them because I was little, I was afraid. As I could see it as a child, that’s how I imagined it.

Having met Irina, I have been living with aliens for a year and a half, every day. I had already gotten used to the fact that 90% of my friends said that Max had gone crazy, joined some sect, was doing something.

Lev Evgenievich: Well, I see. It's business as usual. Ignoramuses, rogues, charlatans. Spreading harmful rumors. “They like to tear caftans...” - I quote myself. Classic.

Maxim: You laid out the books. Regarding energy, you said: “Only 50 years of my work.” There is 50 years of priceless information here that must be passed on. I believe that these 30 copies should be released in a circulation of 30 thousand copies. I'm speaking tentatively.

Lev Evgenievich: Maxim Sergeevich, you understand who I gave the

books to: honest people, good people, with higher education. “Lev Evgenievich, we can’t do math.” “Don't look at the math, look at the conclusions from the math. The conclusions I draw from mathematics. If you don't understand math, don't. As a mathematician, I understand you.” There is not a single mathematician in the world who would say: “I know all mathematics.” There is not a single physicist in the world who would say: “I know all of physics.” And what they know is half a lie, half a delusion. In physics and mathematics.

Maxim : One of the stages of the growth and development of humanity: lies and delusions.

Lev Evgenievich: I see. Trial and error method.

34:20 Contacts with different types of civilizations - humanoids and plasmoids. Plato's beliefs. Mathematical model of the world. Misconceptions of physicists and priests.

Maxim: There are different civilizations. We communicate with different types of civilizations. You are with humanoids. You are supervised by the Intergalactic Federation of Light, the Interstellar Union. And there are contactees who are supervised by thin-material plasmoid civilizations. They are trying to convey through the human brain the conscious perception that, for example, the whole world is a mathematical model. Everything can be described in numbers. But, due to the fact that a person has a very narrow perception, they begin to transmit in a form in which people can realize it.

Lev Evgenievich: Plato started with this. He showed that mathematics is not an abstraction. These are mathematical processes of the movement of all celestial bodies and all microbodies. Why does an atom rotate around the nucleus? I always asked physicists: “Why does an electron revolve around the nucleus of an atom?” “And that’s how it’s supposed to be for him.” What force rotates it? What pushes it around the nucleus, that it breaks away from the atom and runs along the conductor? Moreover, it runs along a sinusoid. What is pushing him, what force, material or not?

Ask the priest: “What pushes the planets around the Sun? What

pushes them to spin around their own axis? No priest will answer. If he says: “God.” Explain: “How is this God?” Is he pushing or blowing on them with his hands? Any priest and any physicist will be out. This is what I understood, this came to me.

Maxim: We do the same. We film scientific conferences, where we are given the structure of the Universe in an open form. What are energies, how are they formed, what clusters are they divided into? They are trying to explain it to us in an accessible form. There wouldn't be any problems if they didn't look at us like idiots.

Lev Evgenievich: I see, yes.

Maxim: Because a huge number of people are materialists. 99% of scientists are materialists. It turns out that they need to throw away 35-50 years of work in order to accept the theory of some crazy person.

Lev Evgenievich: I’m counting on young people. I understand: if he has been a Doctor of Physical Sciences for 50 years, it is useless to talk to him. He will deny everything. Here is Einstein - yes, the great scientist of all times and peoples. He did not have a higher education. There is a biography.

Maxim: He is a contactee. Received information and presented it. But the scientific community put him in a framework.

Lev Evgenievich: Contacts are different, with different civilizations.

Maxim: Yes, I mean subtle-material civilizations.

Lev Evgenievich: Is there a fascist sense of civilization?

Maxim: Destructive, parasitic. Yes, I have.

Lev Evgenievich: These are the people he came into contact with.

I'm just convinced.

Maxim: We cannot know or talk about this yet.

Lev Evgenievich: And I'm talking about this.

Irina: Raom Tiyan from the planet Burkhad, greets your curator and you. (He listens to our conversation with interest.)

38:11 Raom Tiyan about Einstein. Speed of light. The principle of "gravity jump". About the nature of gravity.

Irina: I didn't know Einstein personally, but I know from sources. (He talks about the speed of light). In ancient times, people on Earth believed that there was nothing faster than sound.

Lev Evgenievich: Yes, 336 m/sec.

Irina: When they were able to reach this speed, they thought that there was nothing faster. Then theories began to appear that it was possible to overcome the speed of sound, but a person could not withstand it, that he would go crazy, and some kind of illness would begin, mental and physical. There was even a theory that stones could not fall from the sky because there was a solid dome.

Lev Evgenievich: The French academician criticized. I'm writing all this.

Irina: It was a completely scientific theory, it was supported by the majority.

Lev Evgenievich: And then they missed it.

Irina: Yes, then they said that the stones were falling.

Lev Evgenievich: Guys, we were wrong.

Irina: When meteorites were shown, scientists said that they were fakes. You picked them up somewhere. You give it out to make money. There were also some other accusations. Then, when it turned out that the speed of light, the speed of radial energy (that's what we call it), the energy of material light, because... this speed was unattainable at your level of technology, then they began to automatically assume that this is the final speed that a material body can achieve.

He justified it mainly by an increase in mass and destruction, because he proceeded from the law of inertia, according to which the mass of a moving object increases.

Lev Evgenievich: The mass of the object increases.

Irina: He proceeded from the law of inertia. We studied some of his theories. He said this because he did not know the laws of gravity that we have known for the last ten million years.

The laws of gravity are very simple. Based on them, it is possible to create devices that will not reach the speed of light, but will have the ability to release gravitons and, due to the energy of the released gravitons, instantly move a moving ship. Perform a gravity jump. Gravity beacons need to be placed so that the ship leaves at a certain point.

Your civilization at this stage of development, in order to build such devices, must first have theoretical developments that will allow you to understand what gravitons are, what the 3rd level energy in atoms is, etc.

And with the real theories that Lev Evgenievich just listed - the theory of relativity, it is impossible to achieve more speed, with the teaching that gravity is generated by space itself, curving it, etc., from these formulas that he wrote, but did not take into account all the data, contradicting them - earthlings cannot reach the stars. Until they stop

looking for the nature of gravity in the curvature of space, which does not exist, but will look for it in the substance itself. To search in the substance itself, you need to understand where the energy that forms this substance comes from. She comes from the Spiritual world.

42:50 The spiritual world is a source of energy for the formation of the material world.

Irina: At this stage of science, we need to look for saturation of matter and fields with energy in order to move forward. Your general field theory has not yet been compiled. To compose it, it is necessary to take a fundamental step - to recognize the source of energy that forms the material world, the Spiritual world, that is, spiritual reality. While you have a gap between the Spiritual world and the material world. The origin of spiritual reality from material reality is postulated, that is, everything is reversed.

Lev Evgenievich: Absolutely right. This is what I did. These are my poems. For my great-grandchildren. I have two great-grandchildren.

Maxim: Poems about nature, right?

Lev Evgenievich: Yes.

Maxim: For children of middle school age.

Lev Evgenievich: Look, please. You'll appreciate it better.

Maxim: If we don’t publish your materials, we can publish them here, to our entire audience of 100,000.

Lev Evgenievich: Yes, for God's sake.

Maxim: On our website. Electronic. Any books of yours, any brochures that you consider necessary for publication so that people can see them. We can publish all your works, all your works that have

not reached people, to our audience of 100 thousand.

Lev Evgenievich: Please. Why did I write? Not for oligarchs. I wrote for normal people, mostly young people.

This was written for children, to distract them from all sorts of outrages that are propagated everywhere. These are photographs of genuine nature.

During and after the war, my mother and I went to the village. We often went to the forest with her. That's why I was so used to the forest, I knew the forest so well, mushrooms, berries, I knew everything, I was still small, I was 3-4 years old. And after the war, my mother and I walked through the forests for a long time.

Then I myself, as an adult, traveled. I carefully studied nature, in addition to the fact that I was engaged in my professional, technical, mathematical, etc. affairs.

45:22 Interest in ufology in the Communist Party of the Russian Federation. Book "The Sun of Hermes Trismegistus".

Lev Evgenievich: One more thing I want to say, Maxim Sergeevich, please. For four years, somewhere at the end of the last century, I worked in the Duma on the Security Committee in the Communist Party faction. On a voluntary basis. I am used to working on a voluntary basis: for free and outside of working hours. The department there was headed by Pavel Timofeevich Burdukov, he was the chairman of the collective farm at one time, then he was elected to the Duma. He headed the Committee on Food Security in the Communist Party faction. And I'm actually on the safety committee, because they were a little interested in ufology. So I spoke there with ufological things. But that's not the point. I studied six volumes of Helena Blavatsky. I have all the volumes of Helena Roerich's "Agni Yoga". I have many works by Roerich himself. I have all the volumes of Plato.

Conference participant: All contactees: Roerich, Blavatsky.

Lev Evgenievich: Yes.

Maxim: With subtle-material civilizations, with dense-material civilizations.

Lev Evgenievich: Having summarized all these materials, I wrote the work “The Sun of Hermes Trismegistus”. I studied inside and out. For me it was a reference book. There is no higher philosophy than this in the world.

Maxim: This book was written on a completely different level of consciousness.

Lev Evgenievich: Of course, definitely. I wrote this book.

There was one deputy there. A simple rural school teacher. He was responsible for publications in the Duma. Unfortunately, I don’t remember his name, it was a long time ago. He gave it to two doctors of science who were State Duma deputies. They both gave a positive review, although this is a religious and philosophical work, I emphasize. The Communist Party of the Russian Federation published it as an information express for State Duma deputies. Here you go, take a look.

There is a table of contents at the end, it contains the content. The Duma published 100 copies. Half was left for the deputies, half was given to me, as the author. Mostly they dispersed among my family, friends, and good acquaintances who were like-minded people. This work is very original, guys. Unfortunately, I only have 2-3 copies left. You won’t find it on the Internet: when the materialists read it, they immediately screamed, and when our Orthodox priests read it, they also screamed. They anathematized me, essentially, for this.

Maxim: When I started projecting, I said that we would be anathematized when Archangel Gabriel, the representative of the planet Burkhad, who is still alive, well, exists.

Lev Evgenievich: Look at the contents. I dug through a lot of

literature, including apocryphal gospels, etc. There is a list of literature there.

One more thing. I apologize, because I wanted to tell you a lot, but time is passing. Difficult. Look at this, please. Let Maxim Sergeevich especially take a look.

49:18 Current inventions in the fuel energy sector. Engine with 200 percent efficiency. Vacuum energy.

Maxim: Vortex thermal generator, efficiency 200% or more.

Lev Evgenievich: That’s not the point. This is just one of the pictures of the current installation. And there are dozens of them.

Maxim: Wait. Are you saying that this is a 200% efficient motor?

Lev Evgenievich: Yes. I don't want to say. He works, he acts. Moreover, our author. Listen to me now, Maxim Sergeevich. Want to listen?

Maxim: Yes. I'm listening to you.

Lev Evgenievich: I collected all domestic and foreign materials, including issued diplomas, in the field of fuel energy. Everything I could. I worked on this book for ten years. I've included my perspective here. There are already operating energy installations that produce energy using the energy of the physical vacuum or ether. We don’t get it from anywhere else. Only from a physical vacuum. Active. I list everything, show everything, photographs. Everything is here. Ten years of my work with other works in parallel.

Energy must be drawn from the physical vacuum. These installations are operational, ours and foreign ones. Here there is a French installation, there is ours, a domestic one, there is a German one, and a Swiss one. This is such work.

Maxim: I'll know that you have it.

Lev Evgenievich: Maxim Sergeevich, in this book "Keys to the Mysteries of Existence", the last chapter is one to one. And this is my only copy. Nevertheless, I deliberately placed the last chapter in this book, since it did not reach our leaders.

I received these fuel energy magazines. I studied them carefully. I did it all, guys. Nekrasov wrote: "I spent the holiday of life and youth under the weight of labor, and therefore I was never the darling of freedom, the friend of laziness." This applies to me too, not only to him.

Maxim : Lev Evgenievich, tell me, are these generators in the world in samples, do they exist in samples?

Lev Evgenievich: Read it, you'll see there. There is such a generator in Switzerland that supplies an entire religious community. They do not consume energy from anywhere, they do not pay anyone for energy. They have their own harvests from this energy. Operating generator. Uses etheric energy. And ether is a physical vacuum. Or Spirit, it's the same thing. Spirit, there is nothing else. The basis of the Universe is Spirit. Matter is secondary. Derived from Spirit. That's all. I'm writing all this here. You can argue with me any way you like.

Conference participant : No, we don't argue. We are of the same opinion.

Lev Evgenievich: Astronomy is touched upon here, physics is also touched upon.

May 20, 2021.

Conference participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Maxim Rusan – head of the Cassiopeia Project and the Center for Spiritual and Physical Development,

Chulkov L.E. - ufologist;

LiShioni - representative of the planet Shimor, constellation Andromeda, specialist in astral interactions;

MidgasKaus – representative of the planet Esler, constellation Boötes, biologist, psychologist, specialist in alien civilizations;

Raom Tiyan - representative of the planet Burhad (Pikran), constellation Cygnus, specialist in energy interactions in the environment;

Plearchus - representative of the planet Futissa, Pleiades star cluster, curator L.E. Chulkova.

#338 Truth is born in dispute. How to conduct a discussion correctly? Psychology of alien communication.

https://blog.cassiopeia.center/v-spore-rozhdaetsya-istina-kak-pravilno-vesti-disk

https://www.youtube.com/watch?v=HJ02gbBMUAU

00:20 Dispute. True. The right. Discussion.

Irina: You say: “Truth is born in a dispute.” The word "dispute" means different things to different people. If truth is born in a high-vibration dispute, then it will be born only when there is one who gives birth to the truth. And if those who argue do not give birth to the truth, then they will bury it. Even the one that was.

Truth can be buried under tons of irritation, judgment and rejection that make a person's heart resistant to distinguishing between truth and lies. I want to say that in a dispute the truth is not born, a lie can be born. Not only lies can be born, but also hatred.

01:24 Rules for discussion in the Interstellar Union.

Irina: Do not write about the qualities of the person who is arguing, on the other side of the discussion, neither about his moral qualities, nor about his intelligence, nor about the level of intelligence, knowledge. Don't write about this.

Write only, if you are corresponding, about the subject of discussion, provide facts, analyze them, and, especially, do not evaluate the emotions of the interlocutor. If you switch from the subject of discussion, for example, vaccination, its benefits or harm, to the words “you are outraged” or “you are annoyed”, “offended”, this puts the person in the position of justifying his emotions.

Even if you see that this is really the case, that the person is outraged and wants to prove that he is right, remember that it is absolutely normal to want to prove that he is right. To do this, a person enters into a discussion.

02:36 The right.

Irina: What is rightness? Rightness is the feeling of being right. To

prove that he is right means to spread his truth, his Light, as he understands it, to others.

Discussion begins when ideas about the truth diverge. I think that Irina could write some short article with the rules of discussion. I can help her.

03:10 Attitude towards the opponent in the Interstellar Union.

Irina: We have a subject at school, besides psychology, called “Interaction with others.” Like yours - “Psychology of Communication”. It is studied in high school. We teach how to express one's thoughts, including discussions. How to conduct a proper discussion, how to understand your opponent’s thoughts, how to tell your opponent, in his language, what you yourself understand.

The main thing is to treat your opponent, not as an opponent, but as a divine Spirit like you, but who looks at this subject from a different angle, from a different level. He's just different.

Stop dividing people into a hierarchy of higher and lower levels. This will get you nowhere. At the highest level of the Spiritual world, on the Angelic worlds, an Angel differs from a demon in that he sees the Divine Light in everyone. The more Light he sees in the demon, the higher his level.

(He says). It is very difficult for highly vibrational Souls, especially in childhood, to be in this world, especially for Angels. He's too tough for them.

Olesya: Goodbye. Bye, Irina.

September 11, 2021

Conference participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Olesya Smelova - administrator of the YouTube channel, projects "Cassiopeia Level" and "Cassiopeia Color";

MidgasKaus - representative of the planet Esler, biologist, psychologist and specialist in alien civilizations;

LiShioni is a representative of the planet Shimor, a specialist in the astral world and its interaction with the material world.

#343 Mesopotamia and Sumerians. Aliens of ancient civilizations. Are the Sumerian gods aliens?

https://blog.cassiopeia.center/mesopotamiya-i-shumery-prishelcy-drevnih-civilizac

https://www.youtube.com/watch?v=7EbSo67NRMg

00:23 Introduction of participants. Sumerian civilization. Lifespan of the Sumerians according to the royal list.

Irina: Hello, dear friends! My name is Irina Podzorova. I am a contactee with extraterrestrial civilizations. Today next to me are present in astral bodies: a representative of the planet Esler - MidgasKaus, a biologist, psychologist, specialist in alien civilizations and a representative of the planet Burkhad - Anglich Phyer, a specialist in the history of ancient civilizations of the Cosmos and the study of the mythological picture of the world. Hello, Oleg!

Oleg: Hello, Irina! Hello, our space friends! My name is Oleg Ilyashenko. I am a philologist, but I have long been interested in the history of ancient civilizations, in particular, Mesopotamia, Sumerian and Ancient Mesopotamia.

I read many books on this topic and found that there were many blind spots in them that were incomprehensible not only to the ordinary reader, but also to scientists. Many mysteries remain. At the same time, this theme is used by fans of alternative history. They largely speculate on the history of the Sumerian civilization.

When I began to seriously study the works of leading orientalists and Assyriologists, I saw a lot of inexplicable facts. For example, according to the so-called famous "Sumerian king list", the beginning of the Sumerian civilization was laid when "the Kingdom descended from heaven." Or, for example, the first king in the city of Eridu ruled for 28,800 years - this is Alulim. After him there was Allargal, who ruled for 36 thousand years. This is a semi-historical document, but scholars and many readers cannot take such dates seriously.

The first question is: when did the event, the so-called “Kingdom Descend from Heaven,” take place? Who were the first kings of Sumer?

Irina: English and MidgasCaus welcome you, our dear viewers!

(English) I will provide answers to your questions based on the information stored in the Interstellar Union database. I studied this information in connection with my activities not only as a historian of ancient civilizations of the Cosmos. Earthly civilization for us is the civilization of Space, one of the space civilizations. I am interested as a psychologist-linguist, a specialist who studies the mythological picture of the world among ancient peoples and the influence of this mythological picture on social processes.

What you have said matches the fragmentary records that have been found by your archaeological scientists. Of the entire heritage of the Sumerian-Akkadian civilization, you have found no more than ten percent of all mythological records that lined up in a certain structure of the Universe.

You spoke about two rulers (he says their names differently). I want to start with the fact that the city of Urak (Uru) existed many thousands of years ago, even before the war 12 thousand years ago with the reptilian race. The civilization, which was later called Sumerian, consisted of the descendants of people who 12 thousand years ago came to the valley between the Tigris and Euphrates rivers. This happened 12 thousand years ago, as we remember. 11 thousand years, a thousand years after the war. But the descendants of these people remembered the events before the war.

Before the war, your civilization existed for almost 3 million years. People remembered and passed on to their children those historical events that took place in the pre-war period. They wrote it down as the legends of their own ancestors. Their book was called “Testaments of the Ancestors.” The book has been partially preserved. I know that your scientists, according to our data, have found excerpts from this book.

By the way, they wrote books not only on clay tablets. They had something that resembled your paper in wide circulation. They engraved on metal plates, on dishes, and even on the walls of houses.

These two rulers, who ruled for 24 thousand years and 36 thousand years (that’s only two, and there were seven of them), their images meant certain eras of earthly civilization, when certain alien representatives arrived.

In the Interstellar Union (IC) at that time there could be one of the representatives (not that the most important one, the IC does not have the most important one), let’s say so, one of the important humanoid beings who controlled the Contacts Commission. They appointed chiefs of bases, for example, on Earth. The commanders of the bases were considered gods by ancient people (people even before the flood, before the catastrophe). If you read the Sumerian tablets, Egyptian manuscripts, you will see that their first kings were gods.

Oleg: Yes, yes, naturally.

Irina: These gods are aliens. 24 thousand years was not the period of their life (it was less), it was the period of their influence. How long did this ruler and his descendants influence? For example, a descendant could fly to Earth. He could be a descendant not physical, but spiritual, i.e. successor of his work. People considered them to be one and the same god. They said: “This one ruled for 24 thousand years.” There was one who ruled for 72 thousand years. These are certain historical periods of contact with different races, even before the war. What you found in the tablet, in the myth, is only a memory of this period.

11:05 Annunaki. Good luck. Ratringi.

Oleg: I see. According to the same ancient legends and myths, the Gods were divided into two large groups - the so-called “Anunnaki” and “Igigi”. Is there any real reason behind this?

Irina: The second name so that he can hear.

Oleg: Good.

Irina: Annunaki is “one who came from heaven.” They were painted in unusual costumes, on heavenly chariots, surrounded by Light. There was Light around their heads, hands, and heavenly chariots. They appeared when it was dark. They were described as "emerging from the night."

The Anunnaki were an image of humanoid aliens. The second (he says a different name, there is an “r” there) are ratrings. They were representatives of plasmoid worlds. Glowing creatures, like jinn in Islam. They were gods and also made contact.

Among others there may have been people who were deified later, during the late period of the Babylonian kingdom. People who could be recognized as one of the types of gods first moved into the category of elders, ancestors, ancestors of some kind of clan system, and only then became gods. Tales about them were overgrown with mythological details. Mythological tales depicted in figurative form the deeds of this man, and for his admirers he became Annunaki or Igig. This indicated that he was in contact with either aliens or plasmoids.

Oleg: I see. According to Sumerian myths, the Anunnaki and Igigi were together, acted together, but the leadership belonged to the Anunnaki.

Irina: He says that for an ancient person, everything that comes to him in contact acts together. Even the Spiritual World. Angels, disembodied Spirits, came to them. They also considered them gods and called them in some way according to their characteristics. We separate them, but the ancient Sumerian priests were right: “The whole world is one.”

Oleg: I see. Thanks for the answer.

14:52 Oannes is a fish man. Civilization of the planet Khayran.

Oleg: According to another mythology, also Sumerian, there was a Sumerian priest Beros, who described the ancient history of Sumer. According to his story, in the city of Eridu, the first city on Earth, a rational creature Oannes or Ea appeared. His head was human, but on top was the head of a fish. The legs were like those of a man, but he was all covered in scales, like those of a fish. He came out of the sea, apparently from the Persian Gulf, and taught people various arts: how to build cities, how to carry out irrigation, taught all crafts and arts.

Irina: Are you interested in who it was in our records?

Oleg: Yes.

Irina: This is a fairly well-known story in the Interstellar Union. She is associated with the representative of the planet.

Oleg: I can show you the drawing.

Irina: Yes, fish man. Beautiful.

Oleg: They were portrayed this way.

Irina: He says that this is connected with a representative of the planet Khairan, which is located in the constellation Sagittarius. One of the reptilian races lives there. Their body structure is similar to lizards, like Selbetians. Only their scales are not gray-green, but shiny, and stand on end on their backs, like a comb. The flat head ends in a cone. Deep-set eyes. Moreover, the head is brown, like an onion.

The Khairan made contact about 8,400 years ago. They flew to Earth. The city where they located their base was called Urartu in the local

language. It means "starlight village". (They show me) He was not on the shores of the Persian Gulf, but in a mountainous area. Some rocks. This mountainous area was the base of the Khairan from the constellation Sagittarius.

This is a reptilian race. Reptilians are very peaceful. They never fought with anyone. They were accepted into the Interstellar Union. There have been a small number of wars on their planet that can be counted on one hand. Even before, when they were not developed spiritually, when civilization was on the path of development.

Their representatives flew to the ancestors of the first kings and the first tribes, whose priests had already become the kings of the first Sumerians. Khairane was taught by the peoples who lived there before the Sumerians. They taught how to build cities, practice medicine, taught astronomy, natural history, how to communicate with nature, increase the fertility of the earth, how to take care of your Soul, how to observe moral laws.

Why did you come out of the sea? In many myths, the sky is also called the sea. Look at the color of the sky. It is the same, especially in areas where the sea is nearby. You can look at the sky and at the calm sea and not discern where the border is. One is reflected in the other. Therefore, he “came from heaven.”

Oleg: I see. Tell me, do the figures that were found in the area of the city of Eridu accurately reflect the appearance of these creatures?

Irina: The head is cone-shaped, that’s for sure. Only these eyes are visible, but those were deep-set. Oh, what anatomical details.

Oleg: Yes, anatomically detailed images.

Irina: They look more like people. The head is similar. Their nose didn't stand out that much. Rather, they were no longer aliens, but hybrids. There were experiments with representatives of this race, when they received hybrids together with earthlings. According to the laws of the Interstellar Union of that time, hybrids were given the

opportunity to live in a physical body longer, join the Interstellar Union and fly to another planet.

Oleg: I see. And one more interesting fact. It lies in the fact that the ancient first city of the Sumerians is Eridu, it has another name - Nunki. At the same time, in the constellation Sagittarius there is Sigma Sagittarius, and it is also called Nunki. Is there some connection?

Irina: Sigma (he shows the card and speaks). You need to look at your astronomical maps. I can show the contactee in images, but to get an idea of how it will be on your cards. This planet will be on ours. And where will it be, near which star, according to your calculation methods? You count stars differently. And many stars are not visible from the earth's sky. Even from Earth's orbit, when photographs are taken without an atmosphere, not all stars are visible. In the direction of the center of the Galaxy, where the constellation Sagittarius is located, many stars are hidden by dust clouds. These are the cradles of future stars, not clouds.

Oleg: I see.

24:08 Burkhadian base at the North Pole. Images on Sumerian reliefs.

Oleg: Did the Sumerian god called Enki really exist? He was called “master of the earth” and at the same time subordinate to the god Enlil, which can be translated as “god of the air.”

Irina: (He speaks) You named names. According to our records, many base commanders were deified, for example, the Burkhadians, who were located there about five thousand years ago. Both Enki and Khemkor appeared later. There was such a representative of the base of the planet Burkhad. He was around this time, 5,500 years ago, living on Burkhad. They, of course, were in contact.

The base under their command was not in this area. She was (he shows) in the area of the North Pole under the bottom of the Arctic Ocean. They studied the tectonic processes that occurred after the

war. At the North Pole, where the Arctic Ocean is now, there used to be an expanse of land.

After the war, the continents were divided. There was a peninsula there, it was connected. It sank from being bombarded with gravity bombs. Cataclysms have begun: shifts of huge tectonic plates that make up not even the Earth's crust, but the mantle. They began to move apart and approach differently. That's why it sank.

Burkhadians explored the cities that remained at the bottom. They flew all over the Earth; they could be called gods of both earth and air. They were both on the ground and flying through the air.

Oleg: Were the aircraft depicted on the cylinder seals really of this type?

Irina: Looks more like lamps.

Oleg: What kind of devices were these, if they really existed?

Irina: The one depicted above, as in the form of a bird, is not a device. They were in the form of a ball and a disk. The device you showed on top is a probe or robot. What is below resembles a candle, like a torch, they depicted their sacred objects. Perhaps they saw robots and various probes that were flying and exploring. The ships (he shows) were in the form of flying disks, triangles, pyramids (the Tumesoutians flew in), and balls.

Oleg: Thanks for the answer. On many reliefs, images of Sumerian and Assyrian, the gods are depicted with bags in their hands. In their other hand they usually hold cones that resemble pine cones. Were these images of some real things that belonged to the gods or not?

Irina: Perhaps instruments. What you called the "bag" may have been artifacts that they passed on to people when they were being taught or shown something. There were some screens, some robot control panels. People could picture them with anything.

Oleg: I see, thanks for the answer.

30:16 Ziggurats of Mesopotamia. Features of the pyramids.

Oleg: Why were huge ziggurats built throughout Mesopotamia? This took a huge amount of time and labor. At the same time, no practical use has yet been found. For what practical purpose could they be built?

Irina: He shows me some kind of pyramid.

Oleg: Yes. These are step pyramids.

Irina: She's kind of strange. It has a diamond at the top.

Oleg: Every city had a ziggurat, and every city was ruled by a certain god. The gods divided the cities among themselves, or each god built his own city, so to speak.

Irina: The God of the city was the Spirit of Nature of this area. People could call him god. Every city, town, house has its own Spirit, which is responsible for the energetic order in this area. This is a plasmoid of a certain density level. Called the Spirit of the Area.

As for the ziggurats, like the pyramids (he shows me some stupas), they were in Ancient China and Tibet, like stupas made of stones. Some, where there were wooded areas, they made from trees. Even nomads from the steppes of ancient Central Asia built their homes in the form of a pyramid. Not only because of the convenience that it will be convenient to build a home made of leather. They could have done it with a flat roof, but they built a lot of pyramidal shapes.

Many pyramids exist on Earth, on the shores of the seas, as well as on Mars, Venus and the Moon. There were especially many of them before the war 12 thousand years ago. These were spaces built like the starships and houses of the Tumesout people. Tumesoutians believe that the pyramidal shape of the space in which you live

contributes to the opening of the upper centers and enlightenment.

They believed that the pyramid repeated the structure of the Spirit. Just as the Spirit consists of three structures: mind, energy and spiritual heart, so does the pyramid: a top and two corners, like a triangle. Therefore, their pyramidal shape was developed. They had a lot of contact with earthlings. Earthlings saw them on pyramid ships and asked: “Why this shape?” The Tumesout people said that on their planet this is a form of cleansing space, increasing its vibrations, and therefore comfort, coziness and accelerating spiritual evolution.

This space is protected from low vibrational entities. It regenerates faster at the physical level. People began to pass it on to each other and wanted to be in such a space. Then they passed it on to their descendants, and they began to build.

Aliens themselves helped build some of the old pyramids. The Tumesoutians mainly did this so that people would feel like they were part of the Universe in the pyramid. In it you sit in a state of meditation and enter easily.

The small pyramids were built by the people themselves; incredible efforts were indeed made. There was a slave system back then. Thousands of slaves died on construction sites from overwork, from the hot sun, and from epidemics. They still built pyramids, even tall ones. The beauty you see was achieved at the cost of millions of human lives.

Oleg: I see.

36:08 Gilgamesh.

Oleg: Thanks for the answer. If possible, next question. Was the Mesopotamian culture hero Gilgamesh a historical figure? They said that he was two-thirds man and one-third god.

Irina: His parents were people. My father was a contactee with the Interstellar Union, and my mother was a priestess in the temple. The

temple was dedicated to the lunar deity, contacts with plasmoids that created the Souls of animals. She was in very close contact with one plasmoid, which took the form of a female goddess.

Yes, Gilgamesh existed. He was a ruler (shows him with a staff in his hand). By birth, on his father's side, he descended from one of the branches of the descendants of genetic experiments of the Tumesout people 10 thousand years ago. 2 thousand years after the war, they also carried out these experiments so that humans and Tumesoutans would be a common race.

The Tumesoutians created some taller ones who lived for a long time. Such experiments took place both before and after the war. The descendants of these people were born with Tumesoutan genes, the number of which was increased compared to other people.

He was not directly the son of an alien, but was a descendant of one of the branches of the tribe that came from genetic experiments. Due to this, his body was stronger, he was more resilient. Gilgamesh loved to swim (shows him with white skin, lighter, about two meters tall).

Oleg: Yes, he was tall.

Irina: Dark hair, wavy. (He shows me). We have video recordings that depict him. I saw them. He was a very brave man. He was a physical contactee, he was taken away. Due to the increased number of genes, he had a body more resistant to physical stress.

He loved to swim in the sea, could swim for long hours, dive and hold his breath under water for up to six minutes. He had this peculiarity. Everyone considered him supernatural, a demigod, a special person if God gave him such power. Gilgamesh was a hunter, especially in his youth. He could shoot very accurately and run faster than a doe.

He radiated such energy that if he met a lion, lions lived in that area, only they were smaller than African ones, and there were also tigers (he shows me), then the lion lay down in front of him. Gilgamesh looked the lion in the eyes, ordered, and the lion ceased to understand

where he was. He could come up and treat the lion like a kitten, he could pet it, absolutely wild. Because of this, people were afraid of him and considered him a sorcerer.

He was a very wise ruler. When he became ruler, he waged defensive wars. He issued the Law of Justice, judicial laws (he is shown with scales, like a judge). His Spirit was from a high level.

Oleg: I see, thanks for the answer.

42:17 Marduk, Baal, Baal.

Oleg: There was the god Marduk, who suddenly came to power. Perhaps he was called Baal or Bel. What kind of god was this? Was there some real person behind him? He was associated with the planet Jupiter, for some reason.

Irina: This word was used to call several creatures. They were not alike. Even somewhat opposite. Especially Baal or Baal, this was the name given not only to God, but also to any slave owner or master. It was the owner. A person could be called that, an alien, a plasmoid.

"Marduk" was originally the name of a person. The name of one of the Tumesoutians (the image was shown, I see that he is taller), who was at war 12 thousand years ago with the reptilians. He cleared the Solar System of them and protected the planet Mars. He participated in the rescue operation of some earthlings. He participated in the transportation, several years later, of these earthlings from a base on the Moon, back to Earth, when the consequences of the disaster ended: they cleared the Earth of radiation, stopped volcanic eruptions, cleared the atmosphere, and so on.

Later he flew to the builders of the first cities and taught them. They called him Myrtux. He flew on a ship (the big ball shows). At that time he was about four and a half thousand years old. He lived for about six thousand more years.

From time to time this Tumesoutian flew to Earth and to other planets.

He was a specialist in the integration of non-sentient life forms. That is, animal life forms that have recently evolved into intelligent beings, in which intelligent Spirits have recently incarnated.

He was an expert in integrating these newly created civilizations into the environment. In your opinion, a sociologist. He was a sociologist-educator, that is, one who educates young races. And also in the military, fought, defended. Later he was deified by many peoples. Somewhere he was known as Thoth, somewhere as Marduk. It has had many names in different cultures. Then the word “Marduk” began to be used to refer to plasmoids and military commanders. People knew that he fought. There are five known beings who were called Marduk, that is, “Great God.” This name was also given to some low-vibration plasmoids.

Oleg: Yes, I see. Thanks for the answer.

47:38 Reasons for the disappearance of the Sumerian civilization.

Oleg: For what reason did the Sumerian civilization cease to exist around 1700 BC? Were these natural disasters or something else?

Irina: At that time (he shows me), 4000 years ago, there was a period when the solar activity of your star increased sharply. This was accompanied by heating of the Earth's core. The Sun's magnetic field intensified, and this caused a change in the Earth's magnetosphere, in its core. There is also a source of magnetosphere in the Earth's core, not only in the air. All this caused a change (he shows). Water evaporated from the surface of the oceans, circulated in the atmosphere and did not fall out.

Oleg: Drought.

Irina: And the winds were still blowing. The Earth's magnetosphere acted on the Earth's atmosphere in such a way that tornadoes were formed. This led to poor soil fertility and there were many epidemics. All this together led to famine in the cities that subsisted on agriculture

and hunting. Society by that time was divided. There were warriors, priests, artisans, peasants, slaves, scientists. Scientists were priests; there were no individual scientists. There were warrior soldiers. When food became scarce, they began to turn into robbers, while only those with a more aggressive nature became warriors. When the king they served began to give them little food, they turned into bands of robbers and attacked civilians.

All this created such horror in the Earth's noosphere that people's vibrations began to decrease. As a result, solar activity increased because people began to spread low-vibration energy on Earth. The plasmoids of the Sun and Earth reacted to this. Solar activity has increased and intensified all these phenomena.

People went to other countries that were more favorable, closer to the north, where there was a temperate climate. Then they scattered among other nations and abandoned their own. I would not say that this happened because of the war. There were wars, but this is not the main reason.

The main reason is that there was an increase in solar activity for about 350 years. We made contact with solar plasmoids to find out why this happened. They said that this was a necessary stage in the life of a star. Plasmoids call the existence of a star "the life of a star." The star passed through a place in the Galaxy where a higher temperature was necessary in order to maintain the harmony of the planets. The temperature, pressure and concentration of the flux of hard radiation must be higher there. That is, the star passed through a place in the Galaxy that provoked these phenomena.

Oleg: I see, thank you.

53:27 Sumerian language. Termination of open contacts between aliens and earthlings.

Oleg: The question is related to the Sumerian language or cuneiform. Was the language of artificial origin? Or did it develop naturally? This is the only language on Earth that has no related languages at all.

Irina: Any language on Earth, ancient or modern, developed from some branch of the proto-language. The proto-language was a mixture of the original simplified Tumesout and various dialects that appeared in the period before the war. People living on different ends of the Earth of a single continent, in contact with plasmoids, formed a syllabic proto-language. This is the first.

Secondly, after the war they gave several new languages to different tribes so that they could develop their peoples, civilizations and could live in different parts of the Earth. Their descendants created a variety of languages that resembled either one of the original ones, Tumesout, or the proto-language, or those that were given, but most likely a mixture.

You can trace in the words, if you break them down into syllables, the meaning that was originally intended by the priests. They spoke to the plasmoids and to each other in a syllabic proto-language. They modified the words of the Tumesout language, which the aliens gave them, syllable by syllable in order to put into the words their own meaning, which corresponded to the syllables.

Let's break down the word "Marduk", if you like.

Oleg: Yes, yes, very interesting!

Irina: Cuneiform is a writing method, but not the only one. There was also a runic one, from which all modern hieroglyphs originated as a type of icon. In one city there were forty of them, in another there could be 59, different numbers. There was no strictly defined alphabet approved by the Ministry of Education. In the absence of the ministry itself.

"Marduk" (he points). One, two, three, four icons that denoted this word. These are runic icons. Individual letters also had their own meaning. Two letters together made a syllable. And a single letter also had its own meaning. We'll figure it out now.

MA-R-DU-K consists of four characters: “MA”, “P”, “DU” and the letter

“K”. What does it mean? "MA" meant the meaning of birth, in this case "born". “R” (he shows) is an icon very similar to the modern R, a prototype of the hatchet used to cut down trees. "R" means "separation". “DU” stood for everything invisible, “invisible energy.” And the letter “K” meant “striving” for something. Aspiration, movement, desire, accession.

We see that it stands for “Born to share invisible aspirations.” This denotes the property of his Spirit when he shares in himself what is invisible to others. This name does not reflect Marduk the Tumesoutian, but a personality characteristic. In our opinion, it would be: he divides well, separates his desires from each other.

The language of the ancient priests, based on the proto-language, was very figurative. Sometimes they encrypted their knowledge so that ordinary people not privy to priestly secrets would not know something. They encrypted their meaning into these words. Sometimes, when we look at a particular word, we see what meaning was put into it. And he was clear to them then.

For you, of course, this is not surprising, because you know, like any scientist engaged in sociological and natural science research on Earth, that this is where it began, the philosophy that formed the basis of modern esotericism, among other things, was born.

Oleg: Thanks for the answer. At what time did the last representatives of alien civilizations leave Earth?

Irina: They didn’t leave her. They still live at the bases.

Oleg: When did they stop living with earthlings?

Irina: When did you stop making open contact?

Oleg: Yes.

Irina: The final decision was made around the fourth, fifth century,

already a new era, after the Christian one.

Oleg: That is, until that time they could live among people.

Irina: They could appear more openly, but with each century they did it less often.

Oleg: I see.

1:02:00 Hexadecimal number system. Number meanings.

Oleg: Question about the sexagesimal number system in mathematics, which was discovered by the Sumerians. They actively used it, and we use it to this day, dividing the circle into 360 degrees and hours. Was this number system transmitted to people, or invented by earthlings?

Irina: I would not say that it was transmitted or invented. This is more of an earthly invention. It is firmly tied to your solar system. I'll go back again. For ancient peoples, including the Sumerians, the sky was the home of the gods. Therefore, only the priests looked at all celestial objects, the stars, the Sun and the Moon. There were even decrees of kings in different states that prohibited ordinary people from engaging in any kind of calculations.

The priests devoted most of the time of their incarnation to observing celestial objects: the Moon, the Sun, when which star would rise (after the rising of the stars). They quickly learned that the Sun repeats its path in the sky.

Due to the peculiarity of their consciousness, their world system was geocentric, that is, the Sun revolved around the Earth, went around it, the Solar God in his visible image. When we say: “God of the Sun” for any civilization, we are only saying that it is Spirit, and the Sun in the sky is only its image, visible to the eyes. The Spirit goes around the Earth in the form of the Sun to give life, Light.

The priests noticed that the path of the Sun across the sky was repeated every year. They saw that the Sun was passing through the same constellations. It was they who divided the constellations into a circle, which already in Greece began to be called a horoscope. That is, “visible sky” was translated as “I watch the sky.”

Oleg: Zodiac.

Irina: The Zodiac is the constellations, but here I am “watching the sky.” The Sumerian priests were the first to draw the horoscope. They saw that it consists of 12 constellations. The number 12 was sacred to them even before, because it reflected 12 as 4 elemental forces multiplied by the trinity of the human Spirit. They knew the laws about the trinity in man: body, soul, spirit. They called it differently, but it was there. And four elements. That is, it was 12, a sacred number. The priests saw that the sky also reflected the sacred number. The sacred number is repeated.

Every five years they had a holiday. That is, “5” was considered the number of a person, like all ancient peoples, because the distinctive feature of a person is that there are five fingers on the hand. This is the first reason. There is also an image of a five-pointed star (he shows it to me): a head, a human image - it’s like a person’s number. A very ancient expression.

The number 12, repeated 5 times, was 60. They divided the entire sky for observation into 360 degrees, since they measured a circle. The circle was divided into 360 parts. And each segment of the circle was called a degree. Then their hour began to be 60 minutes. That was later. At first it was specifically for the needs of astronomy. Everything was strictly tied to the solar system and to universal earthly numerology, which reflected the secret meaning of numbers.

Oleg: I see. Thank you very much for your answers. It was interesting to listen to the answers and learn a lot.

Irina: Thanks everyone! I was also very interested to listen. Thank you very much, dear friends. (He says) Thank you, Oleg, for the interesting questions. (He liked it too).

September 21, 2021.

Conference participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Oleg Ilyashenko - philologist;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms;

English Phyer is a representative of the planet Burkhad, a specialist in the history of ancient civilizations of the Cosmos and the study of the mythological picture of the world.

#344 Petr Garyaev - a contactee with extraterrestrial civilizations? Wave genetics, Garyaev matrices.

---

https://blog.cassiopeia.center/petr-garyaev-kontakter-s-vnezemnymi-civilizaciyami

https://www.youtube.com/watch?v=har82QR5mxs

00:22 Introduction of participants.

Ekaterina: Hello, dear listeners! It's a pleasure to speak to you. It is very important to hear answers from Irina to those questions that are very relevant. My name is Ekaterina Garyaeva, I am the wife of Pyotr Petrovich Garyaev, who will soon be a year old since he left this world. He and I worked together for more than 30 years, developing new directions - linguistics, wave genetics.

Irina: Dear friends, my name is Irina Podzorova. I am a contactee with extraterrestrial civilizations. Hello, Ekaterina! Glad to see you.

Today our curators are present with us - MidgasKaus from the planet Esler, a biologist, psychologist, specialist in alien life forms, LiShioni from the planet Shimor, a specialist in astral interactions and the study of the influence of the astral world on the physical world and the exchange of energies between these two worlds. I also asked my curators to invite to us today representatives of those civilizations who were the curators and mentors of Pyotr Petrovich Garyaev, your husband, whose Spirit is now in the Spiritual World.

And indeed, there were such civilizations. Your husband was a contactee, and with more than one civilization. I was told that there were many of them. But two main curators came. They are also representatives of the Interstellar Union, which includes the planets Esler and Shimor, whose representatives I named. This is a representative of the planet Saama, his name is Lakhresh, he is a scientist. If translated into earthly language, he studies the energy components of human internal organs - he is a biologist, one might say, a geneticist. But he studies more energy components, the etheric field, its influence on the physical body of humans and other anthropomorphic humanoids. This is a representative of the planet Saama.

Also present here is Tukhti Khor, who is a representative of the planet Gihor. He studies methods of healing, therapy, treatment with energy waves and various energies of the surrounding space - both physical and energetic. And he also had contact with your husband. (Says Tukhti Khor from Gikhor) Our contact continues now that he is in the

Spiritual World. I'm in contact with him. He had been in contact with him since 1955. Lakhresh with Saama joined later, around 1982.

Maxim: Yes, and I want to remind our viewers that the planet Saama and the planet Gihor are the planets that participated in the formation of cosmic energy channels on planet Earth. But as far as I understood correctly, Peter Garyaev had a large number of contacts with extraterrestrial civilizations, who conveyed information to him about the gene-wave theory, about energy interactions, about vibrations of physical and other bodies, therefore, Ekaterina, we listen to you carefully. Your questions.

04:47 Prospects for wave genetics.

Ekaterina: The first question is that I would like to know: how relevant is what Pyotr Petrovich Garyaev studied is relevant in his own perspective? Pyotr Petrovich introduced the term “linguistics”, “wave genetics”. What can you say about the development of this new science? And how true is the theory of Pyotr Petrovich Garyaev that all the molecules of our body emit sign fields, with the help of which they exchange information with each other, with the environment, with the cosmos?

Irina: The representative of the planet Saama, Lakhresh, is answering. He is specifically engaged in the study of subtle bodies, including humans.

(Lakhresh speaking) Hello, Catherine! Hello, dear TV viewers! The prospects for the development of the science that you call “linguistic-wave genetics” are very great, but they will not immediately be understood by the official, one might say, government circles of your earthly science. Because the science of your planet at the present time is based on the materialistic paradigm of development. And everything that most of your scientists see in cells, organs, tissues and subcellular substances are substances of a dense material nature. Their subtle component is ignored. And those scientists who notice it prefer to talk about it among themselves. My contactee Peter, your husband, he met with me in the astral body when his body fell asleep. And he repeatedly told me that those scientists who were officially against his theory told him something completely different at unofficial meetings.

How correct is his theory? His theory is correct, but it still needs to be refined and clarified. As a scientist, you know that the validity of any theory is confirmed, first of all, by practice. And secondly, if a fact contradicts a theory, then it is necessary to reject the theory and recognize the fact. As a scientist, you know this. Therefore, for the development of this science, it is now necessary for those enthusiasts who exist, and in fact there are many of them, to show a large group of people - about 200 people - how they came together. Now the main task is to collect factual material that will be accepted, regardless of the materialist paradigm, simply by virtue of its factual component.

Maxim: Yes, Ekaterina, we are now opening centers all over Russia, our health centers. And in these centers we use scientific developments, which Peter was interested in, and in the development of instruments in which he participated, in some. But as I understand it, he went in a different direction, and these devices began to develop further. Therefore, we are very pleased to now organize this conference in order to maybe even help each other develop this direction around the world.

Irina: (Tukhti Khor from Gikhor adds) I, too, have been this man's curator since childhood. And I can say that Peter, in order to enter the framework of official science, what I, Lakhresh and other representatives conveyed to him, translated everything into the same official materialist language and, in my opinion, did it even too actively. That is, adjustments are also needed in this direction.

(Says MidgasKaus, my curator). I just talked with a representative of Gihor, he is also a biologist, studies biology, all energies. I talked with representatives of Saam and Gihor, and I already know the theories of earthly science. Through Irina, I talked with many scientists, doctors, and biologists too. And I want to say that the facts that will be presented by you and the Cassiopeia center for the study of these energies, even if official science gives them its own materialistic explanation, this should not stop the widespread introduction of this knowledge into practical implementation. Even if they explain it in their own way, you don't need to argue with them, but let them introduce it.

11:22 Energy interrelation of all cells of the body.

Maxim: Yes, Ekaterina also asked (I just want to remind you) about the fact that each of our cells communicates with the entire body, with cells, using special waves of energy, is this true?

Irina: Yes, it's true. In general, these questions have been studied in the Interstellar Union for many millions of years. What we are talking about now is studied in our schools and, as you say, in higher educational institutions - institutes (we will speak this way, in the language of the contactee). But this is more than an institute. And it differs from your institutes in its more practical teaching method. We have few lectures and more practical classes. In our institutes this science is called “Ethereal dynamics of the viviparous field.”

Maxim: Great, let's continue, Ekaterina.

12:30 Development and formation of the human embryo.

Ekaterina: How does the body form during embryogenesis?

Irina: I see. Lakhresh answers as a specialist specifically in the study of the formation of etheric matrices and their transmission to the physical level.

(Says Lakhresh) I will begin with the fact that the Spirit is primary in this process. That Spirit, a spiritual essence that incarnates in a certain body, receives vital energy for incarnation, which subsequently becomes a person’s “etheric body” or “etheric field,” as people call it. But when the Spirit received its vital force (not the whole Spirit received, but 30% of it, which is called the incarnate part, this is for an earthling), this part, so to speak, the Spirit separates from itself. This is not an image, but something from oneself. He is now showing me how a bubble separates a smaller bubble, how a cell divides. Only they remain constantly in touch. They don't break their connections.

That is, the Spirit, if viewed from a material point of view, is divided into two parts. And from a spiritual point of view, he simply embodies a part of himself. Both will be true, but only this is a view from different sides. This incarnating Spirit, which is called the "Soul", awaits the conception

of its body, being in the astral world next to its parents at this time. And at the moment when the physical sex cells of his father and mother unite, and the first cell of his new body is formed, the exchange of genetic information begins between the cell of a man and a woman. And at this moment the Spirit, which has come to incarnate, combines the flow of its vital force, its etheric force with this cell. How he saturates her. We say the word “introduces,” but it doesn’t just insert like a needle, but he puts his life force on it, and it is completely under the influence of his etheric body, his life force.

He himself does not enter this cell until the earthling's embryo reaches the age of seven weeks. But for seven weeks his life force is still present in this embryo. It is not just present, it controls the speed of transcription, that is, the rewriting of genetic information at the physical level, already at the level of cell construction.

How is it controlled? The speed and quality of this rewriting. That is, the genetic information contained in a person’s physical DNA can be transferred to the level of all three types of human RNA at different transmission frequencies and to varying degrees. It depends on the vitality of this coming Spirit.

How does it depend? The Spirit already has a ready-made image of its physical body. He is in it, in the form of the so-called “etheric matrix”. That is, every future physical organ has an exact copy of it. Only it does not have dimensions, weight, or any physical parameters. It is on the energy level. But, nevertheless, this is a very real structure, and it begins to be filled with cells of the future physical body. This process is also influenced by the vital force of the mother and, to a lesser extent, by the vital force of the father. The biggest influence is the life force of the Spirit itself, even though his body is small, but his Spirit influences it the most.

I want to say that from the moment of conception the embryo is, in fact, a separate organism. Although not yet independent, it is an energetically separate organism that takes only the necessary substances from the mother’s body. And energetically he is more independent than you think.

Irina: How does this process happen? You know that at the level of

physical DNA all the features of the physical body are recorded, on which the quality of the manifestation of the Spirit in this body will then depend. But you know that some sections of DNA can be activated, or they can suddenly fall asleep. This is due to the influence of the Spirit through its life force on this process.

What influences this? This is influenced by his experience and his life tasks. The Spirit who came. I will give a simple example: if in a previous incarnation the body of this Spirit, for example, died from gunshot wounds, then the Spirit can remember this, put it aside in its unconscious or, as you say, subconscious memory. Only in the memory of the Spirit. This is not the memory of the brain, this is the memory of the Spirit. And then, when incarnated into the next body, this Spirit can transfer to its body the memory of this in the form of some marks at the site of these wounds. They will even be located the same way.

How does this happen physically? This happens in such a way that the Spirit, influencing the formation of the body through DNA, codes those cells that will be on the surface of the skin in such a way that they secrete a special coloring pigment, and the neighboring ones do not. This is all at the level of embryogenesis, in this case. This is the simplest example that can exist in reality, and most of such influences are not so clearly visible on the physical body. But they can influence the rate of metabolism, for example, the level of secretion of any hormones, the speed of their release, the speed of their metabolism and excretion from the body, on which, one might say, the manifestation of the Spirit through the body will depend.

Maxim: Thank you. I even drew the entire picture for myself.

Ekaterina: It turns out that first a certain energy structure descends, to which the molecule already adapts, right? That is, first the energy plan.

Irina: Yes. I also understood that molecules are controlled at the DNA level. DNA is essentially a control tool. These are like the buttons on a computer keyboard.

Ekaterina: These are just the main buttons, let's say the leading buttons are DNA molecules.

Irina: By the way, what you studied, what genes are contained there, you (terrestrial scientists) did not reveal the meaning of all of them.

Ekaterina: Yes, especially combinations with each other. Yes this is correct.

Irina: Yes, one gene can have more than two dozen functions and meanings, and that's just one. And there are even more combinations.

23:17 Principles of operation of the DNA molecule.

Ekaterina: What are the basic principles of the genetic apparatus? What are the working principles of the DNA molecule? Essentially, this is one question.

Irina: Yes, what are the principles of operation of DNA and the genetic apparatus? All living organisms have the same principle of genetic apparatus. This is the transfer of information not only from the physical level, but, as I already said, from the mental level, from the astral level, through the etheric level to the physical body. That is, DNA and the number of its genes, and the number of genes included, and their fermentation among themselves is not a static system, it is a dynamic system. Moreover, in the cells of the same organism, at the same time, there may be different genetic information, which depends on spiritual understandings, on spiritual inclinations, in other words, the work of some organ can be disrupted by some emotion, for example . And then the genetic information will be disrupted, cell mitosis will be disrupted, and so on, which can even lead to cancer.

25:22 The concept of reason. The role of plasmoid civilizations in the creation of dense material worlds.

Ekaterina: Thank you. Can we say that the DNA molecule is pseudo-intelligent? That is, in addition to the fact that there is, say, a sign intelligent field that descends and which determines the work of the

genetic apparatus, that the molecules themselves have some kind of primitive intelligence, or what? Or are they just performers?

Irina: Everything here depends on what we call the mind. The mind is a certain structure that has the ability to be aware of itself. The main energy of the mind in understanding the psychology of the Interstellar Union is consciousness and self-awareness.

There are, of course, instinctive forms of intelligence that exist in animal Souls, in group Souls of microorganisms, in group plant Souls, and so on. But they do not have this form of consciousness, their mind is instinctive. It manifests itself in dependence on perception, but this perception is not directed towards the memory of other perceptions. They simply have a “fixation consciousness,” so-called. This concerns animal souls. Of course, it can be developed to varying degrees. Depending on the type of body, on the type of central nervous system, on the type of irritation organs and response organs in some bodies.

What I want to say is that all these physical bodies and all these molecules do not appear out of nowhere. They are created from elemental elements. The elements are collected into atoms by representatives of subtle-material civilizations called “plasmoids”. And they are just the smart ones. Simply put, the Spirit, incarnating into a body, brings with it this vital force. He brings with him information that is recorded in his etheric matrix. And transfers it to his physical body. Moreover, this process is two-way: the Spirit influences the body, and the state of the body influences the Spirit. They are combined into a single whole.

At the same time, the Spirit, incarnating, takes elements from the nature of the Earth to build its body from the plasmoid civilizations of the Earth, which are at different levels of density. And when the Spirit incarnates, before incarnation it in any case turns to plasmoids. There is a special appeal to the plasmoid civilizations of the planet where you are incarnating, with a request to provide elements for the construction of a dense material body to carry out the tasks that the Spirit has outlined for itself before incarnation. And there is a promise to take care of the body, fill it with Light and Love. And with love, return this body to the elements of the Earth after incarnation so that the plasmoid civilizations of the Earth, through insects and microorganisms, can decompose this body again into elements for the incarnation of others.

There is such a cycle there.

Maxim: Ekaterina, I'll ask again a little. For me, now this conference answers those questions that even I still haven't gotten around to. It turns out that subtle-material civilizations of different density levels are responsible for creating the cellular structure of our body?

Irina: Yes, through molecules. To create a molecule, it must be assembled from an atom. To collect atoms, you need to collect energies.

Maxim: This is from the four elements - the energies of water, fire, earth and air.

Irina: Yes. Therefore, on each planet the number of plasmoid civilizations is many times greater than the number, for example, of people. For example, on Earth, if you count all density levels, there are approximately 880 plasmoids for each person.

Maxim: And this entire army of 880 plasmoids is involved in the creation of our physical (dense material) body?

Irina: Not only. They still have to create the biosphere. They must create plants, animals, insects, they must eat something and transfer these atoms, and replenish their body with some atoms.

Maxim: That is, they participate in the structure of the entire universe in which you are, like the structure of the perception of a point in space?

Irina : Yes. And not only that, the spiritual mentors who guide you through more than one incarnation, the Consulting Angels, before you want to incarnate on any planet, they first recommend going through several incarnations in the plasmoid civilizations of this planet in order to build this matter for more dense ones. And then you yourself, as it were, put your energy into this planet, into this civilization, so that you can then incarnate there yourself, so that they can create it for you.

Maxim: For me now there is a lot that is falling into place - in terms of my not being able to perceive some things. Thank you very much, let's continue.

31:45 People's thoughts. Human consciousness. Human thinking.

Ekaterina: Then the next question is a little related to what we talked about now. The body has formed and grown. What is the thinking substance in the human body: our brain or, say, a kind of collective intelligence of our cells? What shapes our thoughts, actions, etc.?

Maxim: Very good question.

Irina: The thinking substance in your body is the intelligent Spirit. It manifests itself through the physical body, through the brain. And the brain, in turn, controls the whole body. That cellular mind that is at the cell level, the mind of the organs - this is, one might say, parts of the image of the body that is in the Spirit.

By communicating with your body, you can communicate with every cell. You can ask her something. You may get the answer. You can communicate with some organ. (I remember, Mead, you told me). He even showed it to me, I remember. You communicate not with the cell itself, but with that part of the Soul, with that part of the Higher Self, with the part that is responsible for the functioning of the body. It simply communicates through the image of this organ. Because it is easiest to tune the consciousness of the embodied Spirit through an organ, because you turn specifically to an organ or specifically to a cell, and you receive a response from them.

For example, if a person has pain, he can ask her: “Why did you appear? What do you want to tell me?" And the answer will come precisely not from the pain itself, but from the Higher Self. Because a conscious appeal to it, that is, from the Higher Self, is from the disembodied part of the Spirit, which makes up 70% of us. And he has 70% of our memory, 70% of our imagination, 70% of our thinking, our spiritual heart. Most, one might say, of our spiritual qualities, including the mind, are contained there.

Therefore, the Spirit thinks and makes decisions, but it does this through the body. Therefore, materialistically minded scientists do not see anything in thinking other than a brain process, some kind of waves. Because consciousness is the energy of the Spirit, where the perception of oneself and the surrounding world, where it is located. Consciousness, in order to perceive the world, can be said to charge the entire brain to the last cell. It charges him with itself. And through the brain, through the receptors of the body - eyes, ears, skin, tongue, nose, it reads the space where a person is, in general, through his body, through his sense of body position, sense of gravity, and so on. And as soon as consciousness reads this space, for example, through the eyes, consciousness reads information about where he is, what objects are around him, but in the form that the physical body can perceive, what are the capabilities of his receptors. But this is not (what your receptors read) that very real reality, not just reality, but the only reality, let's say so. If you look at the same world through other receptors, you will see a different picture. And consciousness makes a decision, perceives and transmits information to thinking. Thinking is the ability of the mind to process information and make decisions.

Ekaterina: Is there something higher that forms thoughts that then come to us in our brain, and the brain processes them, gives commands to our body, and it functions?

Irina: Thinking produces thoughts. Thoughts can come from thinking, or they can come from the spiritual heart. Those feelings and desires that are in the spiritual heart can give rise to thoughts, but again, they pass through thinking, that is, through the conceptual apparatus of a person.

This happens often, for example, when you feel something. What he now means by the word "feeling" is not a physical sensation, but a feeling of the Soul. That is, it is not a "hot-cold" feeling.

They call feeling "the attitude of the Spirit." Feeling is the attitude of the Spirit to itself, to some phenomenon or person. There are a lot of feelings, this is a long dynamic process that changes in its strength, in its direction, sometimes in relation to the same phenomenon. And it happens that a person feels, one might say, is in a state of this feeling, but he cannot express it in words, because the conceptual apparatus of his thinking cannot take these words from the memory of the Spirit.

Or he can take them, but he cannot connect them, pick them up in this way. Therefore, the process of thinking and making decisions is also a spiritual process, but it simply passes through the body. You also say that thoughts, feelings and emotions, desires affect the whole body.

39:20 Incarnations of the Spirit in the Universe. Levels of the Spirit.

Catherine: If I understood correctly, the more developed a person is, the more the Spirit enters the body. And it turns out that the more he can embody in the body. Yes or no?

Irina: What does it mean – a developed person?

Ekaterina: Let's say the level of development is both intellectual and the ability to feel, love, and perceive the world. That is, I mean all the positive qualities that a person has, associated with the extent to which the Spirit has entered this body.

Irina: The spirit always enters this body by 30%. This is specifically for earthlings. All people have this. 30% is embodied, maybe 31%, 29% - minor fluctuations. On average, 30% of the Spirit enters the physical body.

But Spirits come in different levels. In the Spiritual World, from where Spirits incarnate on all planets of the Universe and on all levels of density of the universe, that is, any Spirit can incarnate anywhere in the Universe. Not only on Earth, on Gihor, or anywhere else, he can incarnate anywhere. As LiScioni has already said, that before the Spirit incarnates on Earth into a dense human body, he may be offered to incarnate several times on Earth, but at other levels of density.

Now I will simply explain: other levels of density, plasmoids of the Earth are those creatures that we, earthlings, call "Spirits of Nature". Maybe you have heard something: Spirits of the elements, Spirits of water, Spirits of the forest, Spirits of houses - these are the so-called "earthly forms of plasmoid civilization." They also have a body, but it no longer contains a biological component. They have it inorganic. It

consists of various energies. They reproduce in a certain way - by budding, for example, by emitting various rays, by emitting various rays from themselves. They create energy bodies that are invisible to the physical eyes of people due to their high vibrations. The vibrations of their bodies are higher than the eye can perceive.

But sometimes they can, if they lower their vibrations (this is usually quite difficult and unpleasant for them), become visible. A person can physically see something like a ghost, for example, or some kind of ball lightning. They can do this for various purposes. Not all plasmoids can do this. Only those who do this can.

The same Spirit as in us is also embodied in these plasmoid civilizations. For example, you, as a Spirit, could incarnate somewhere in subtle worlds - plasmoid worlds, and then into a person. After human life you can go to the other world. (Says Lakhresh) Now I talked about how the physical body is built, from what molecules. And that they are also built by subtle-material civilizations. When you asked if a molecule has intelligence, it is like its creator has intelligence.

That is, in the Spiritual world there is a universal creator - the Creator, who is usually called “God”. But he does not create the whole world himself, but he provided this creation of the whole world to his children - us, because he gave us matter. Matter is the material for creation. So that we are his children, his little parts can become like him. To do this, he gave us matter so that we could be embodied in it and use it to create our worlds. Some people build with bricks, others with molecules.

You asked what determines (given that 30% is included) different intellectual abilities and feelings - did I understand your question correctly?

Ekaterina: Yes, that's right.

Irina: In the Spiritual world, where all Spirits live between incarnations, there is no time. This is also called "Eternal Peace". This is a state of eternity. There are, according to the terminology of the Interstellar Union, 24 levels. Everything above the 24th is just Light for

us, that is, there is an infinite number of them, but for us it will still be the 24th. We don't differentiate between them.

They are called like this: 1st to 6th are called “demons”; The 7th and 8th are those who often incarnated in the subtle worlds. They occupy the 7th and 8th level. Why do they occupy such a level? Because they believe that they do not have enough experience to incarnate in the dense worlds. From the 9th to the 16th are the so-called “middle Spirits”, where each level has its own name. They are already engaged in the construction of the material world, both in the dense worlds and in the subtle worlds. These are more universal, so to speak, Spirits. And from the 17th to the 24th are the so-called “Angels”. These are Spirits who, one might say, have found Light in themselves, have found Love in themselves. And they can incarnate into any world in order to help others in this. Light is understood by them not only as the Light of Love, but is understood, for example, as the Light of knowledge, as the Light of healing, and so on. These are some high-vibration, as we call, “good deeds” that lead everyone to perfection, and the highest perfection is precisely in becoming like God, because it is believed that he is selfless and unconditional Love. And at the same time, this Love allows him to possess all qualities in absolute measure.

47:01 Junk DNA. Activation of dormant genes.

Ekaterina: Is the fact that (as you said) only 30 percent of our Spirit is in our body somehow related to the fact that the DNA molecule functions only a few percent? And most of the DNA molecule is the so-called “silent genes”, some call it “junk” DNA?

Irina: 30% of the Spirit that is embodied is enough to activate approximately 70% of your genetic information. But this cannot happen right away. This cannot happen with the help of any devices, drugs, any chemical, physical, biophysical or energy methods of influence. These are all just helper methods. This can only happen with the growth of awareness in each Spirit. We call this “raising his vibrations.”

Now I will explain what raising vibrations is. Vibration in the material world is considered to be the vibration of some medium. And in the Spiritual world, vibration is a certain spiritual quality. Vibration is

named by analogy: the higher the vibration, the closer to the Primary Source. Increasing vibrations means increasing one's qualities and bringing them as close as possible to the reference source, the same Light of unconditional Love, which is the basis of life, happiness, harmony and the absence of all opposite qualities, and therefore low vibrations. And only by raising its vibrations in each person will his Higher Self allow him to gradually activate dormant genes. Otherwise, in an unconscious person, their activation can lead to the degradation of this person and the people around him, since the forces and energies hidden in him can be used for evil, for harm. It's like, without teaching a child to love, but simply teaching him to write and read letters, you immediately teach him, for example, to fight, that is, give him weapons.

Ekaterina: This means that after perhaps a long time, or maybe not, but when people are more developed, then the DNA molecule will function much more, more fully?

Irina: Yes, of course, as your civilization develops, as your spiritual, intellectual and cultural development progresses. It all depends on each other. I just named three, but one depends on the other. As you spiritually develop, not every individual person, but your entire civilization as a whole.

Now your planet is going through a period of the so-called "quantum transition," that is, an increase in the level of vibrations at the physical level of all atoms and molecules included in the space-time continuum of phenomena. This all happens gradually, and this will also contribute to the awakening of dormant sections of people's DNA, but only in agreement, their harmony with the Spirit. And subject to their spiritual growth.

Ekaterina: Then our body will also change a little, it will not look the same as it does now.

Irina: It will look the same as it does now, but it will have more functions. These people, in whom this DNA is activated, they will have energetic capabilities, for example, directing their life force to move objects, to heal people, to self-regenerate, to regenerate themselves. And also they will have such a power of faith that they (of course, if

they develop it, because even with activated DNA, if it does not develop in this direction, this life force will not act), if they develop it, They will even be able to learn to push away from the Earth's gravity. And with their thoughts they will also be able to easily, for example, create phantoms of various astral and mental beings that will help them in their affairs and so on.

There are many different functions. But the physical body itself will remain the same forms. It’s just that, for example, they will communicate more consciously with their Higher Self, with their curators, with extraterrestrial civilizations. They will more easily and consciously leave the body for astral travel. A lot depends on this. And now, of course, a person can learn this, but he has to put in more effort.

Ekaterina: Thank you. It turns out that dormant genes are responsible for paranormal abilities? That's what we call them now. In fact, these are apparently normal abilities that should exist, but we don’t have them yet.

Irina: They’re not just paranormal, it enhances these dormant genes, most of them. They increase the percentage of the conscious influence of the Spirit on the body and on matter, in general.

54:33 Spiritual causes of diseases. Medicine in the Interstellar Union.

Ekaterina: What is the basis of any disease? What comes first?

Irina: You know, any disease has a physical cause, and any disease also has a spiritual cause. It's just your earthly habit to think as you think, logically. You separate the two processes.

In the civilizations of the Interstellar Union, the connection between Spirit and body has long been studied, and therefore the cause of any disease is read in a complex manner. Even if this is a purely spiritual reason, it causes a chain of biochemical and physical changes in the body, which will already connect to this spiritual reason and cause

diseases. And if it is a purely physical reason, for example, injury, infection or poisoning, this is also a disease. This purely physical reason was also led to by a complex of human actions on the physical level, which depended on his spiritual components - on his feelings, thoughts, emotions that led this body to these consequences. This also affects.

Ekaterina: Can we say that treatment using fields, using information-wave effects on the body, is a complement to treatment using physical methods? And this cannot be called an alternative, rather as an addition?

Irina: This can be an alternative, it can also be an addition. Depending on the specific person. Even two people with the same disease experience it differently. Their tissues react completely differently. Therefore, in the Interstellar Union it is not customary to prescribe the same standard treatment in the same cases. Now we have more preventative medicine.

But in those years when our scientists were actively studying the diseases of our races, in any case, the decision was immediately made to make an individual diagnosis and individually take a set of measures to restore the body. We didn't call it treatment. We gave the body the opportunity to recover itself, helping it first of all with spiritual methods, secondly with energetic methods, and thirdly, only if necessary, with physical and chemical methods. This is our approach. It was not customary for us to prescribe any treatment only physical, for example. Some kind of spiritual advice was still attached to it.

Ekaterina: That is, everything as a whole should work.

Irina: It's all in one complex. This was on the worlds of the Interstellar Union. (Now MidgasKaus is already speaking) I also studied earthly people together with Irina, carried out diagnostics, that is, a study of people with their consent. I explored on a subtle level how their organisms work. I see not the physical body from the Astral, but its ethereal copy, which at the etheric level is the radiation of all living cells. Radiation also of those microorganisms that are in it. Microorganisms exist in every person. And they are very different. But it immediately becomes noticeable if their number exceeds the norm.

They are already beginning to move from a symbiotic community into parasitism. Cause any damage. This is also visible. (Mead speaking) I've done research on over a thousand people.

I asked representatives of the planet Tashig, who study earthly pharmacology, to provide me with information about earthly medicine. I also studied information from planet Esler's research about your vegetation and healing herbs. Moreover, I studied the drugs of your medicine, not the chemical component, I just read the chemical one. I studied on a subtle level, because any tablet, even saline solution, has its own energy. And indeed, any vitamin, any ordinary medicinal substance has its own energy. I did research when I recommended any medications to people, but I did it by vibrational coincidence.

I checked the person's aura, compared the radiations that I felt with the knowledge about the radiations of substances, their doses, and their timing of use. For example, when an organ was damaged by microorganisms, I could not conduct an analysis because I was not physically close to this person. I looked at the energy plan and recommended it. But it became more clear to me as a result of my activities that if a person did not follow the spiritual advice that I gave him, it either gave a minimal effect, or gave a maximum effect, but his illness, disease could return to him. And even in a different form, in a different organ or in the same one.

1:02:05 Effects on the human body. Treatment methods at the Cassiopeia center.

Irina: We talked with Zaliatar and decided that when a sick person converts, he first works with his spiritual cause of the disease (he recognizes it from his Higher Self). And only then (if necessary) do I examine him. Physical, chemical and energy methods are just for you, earthlings who live in a classical materialistic reality. Very few of you acknowledge the existence of the Spirit at all and believe in it. You have such an understanding that, as you say, the proverb: "Ignorance of the laws is no excuse." Likewise, ignorance of spiritual laws does not exempt one from the consequences of violating these laws. Therefore, it is for you, earthlings, that physical, that is, physiotherapy, chemical medicines, vaccines, among others, are also chemical methods of prevention. In any case, it is created chemically. Let these be, one might say, biochemical methods, because this affects the

immune system. But in any case, this is medicine, even preventive medicine. Physical methods of treatment and prevention are physiotherapy, various use of various insects, for example, leeches, bees and so on. All of these are considered more physical therapy methods, because they not only affect the body with chemicals, but also with their energy. Physical, chemical, biological and energetic methods of treatment, prevention and restoration of the body, they must be available for earthlings. Recovery is when someone has already recovered, but requires rehabilitation in order to return to normal work activities. It's not always easy.

Maxim: Yes, there is an example. In our wellness center we work with the spiritual cause of the disease. Then, when we have worked through the spiritual cause of the disease through energy information equipment, we help to recover on the physical level. And ultimately, a person, after visiting our wellness center, receives a complex, that is, we are trying to solve the problem on a spiritual level, and at the same time we launch it not by chemical methods, as our medicine and pharmacology do, namely bioenergetic methods. And the most interesting thing is that the equipment that we have and the cosmoenergetics that we have, in principle, do the same thing. Only cosmoenergetics work with the structures of extraterrestrial civilizations, relatively speaking, energy space, and health equipment has come close to reproducing those frequencies that have a beneficial effect on certain functions, properties of the body, even on certain organs.

Irina: Physical methods, chemical, biological and energy methods, which include: cosmoenergetics, as well as wave therapy by Peter Garyaev, there are other people who have researched this, for example, bioresonance therapy.

Maxim: Magnetic resonance imaging.

Irina: Yes, there is magnetic resonance, vegetative resonance, there are many of them. Homeopathy is also considered more of an energetic method of influence. Not physical, but energetic. Cosmoenergy, treatment with Reiki energies, treatment with bioenergy methods, when a person shares his energy. Treatment with various magical rituals, shamanic rituals. There, the energy of plasmoid civilizations, which can also share energy, is already used for

treatment. That is, those Spirits for whom this is such a mission incarnate.

Maxim: I'll tell you a secret, we have already patented the five-cluster water method, and applying information to this method either from a healthy organ or from a certain chemical structure that affects the body itself. That is, a person does not ingest chemicals, but simply consumes water on which information is applied. And this already exists, it already exists, and it is very difficult for our medicine to admit it.

Irina: Yes, and as I said, these biological, chemical, physical methods and energy methods of treatment, they should be auxiliary precisely in the spiritual restoration of the integrity of the Spirit, its source of divine intelligence. Once this integrity is restored, all blocks in the chakras will dissolve. They will not dissolve on their own, but the person will dissolve them with his consciousness, his conscious attitude, his flow of love and the utterance of the opposite emotion. There is a special method. Only then can these energy methods, and the treatments I have listed, be more than 90% effective. So they can also have an effect, but, as I already said, the disease can return. And not even in the people themselves. It may go away for them and come back in their children, for example. Until the age of 14, they are energetically connected with their parents.

01:08:26 Garyaev's matrices.

Ekaterina: The next question directly follows from what you just said. Petr Petrovich proposed a new way of obtaining information, sound, and wave matrices, which consist in the fact that with the help of a special laser one can read information from any substance and transmit this information to patients. We take information from substances of natural origin, as well as from children's photographs in which the child is healthy and happy. We called such informational cues "Garyaev's Matrices." Question: can Garyaev's information matrices be an addition to classical treatment?

Irina: Yes, they can. Now I will explain how this happens.

Maxim: It is necessary to explain how these matrices work, because our viewers will be really interested in whether all this is true. Because many people don't even believe in it.

Irina: Yes. (Meade is now telling both you and me) This is a good thing. They are on the Internet, you can listen to them.

Maxim: Are these Garyaev matrices?

Irina: Did you listen?

Maxim: Yes, he listened.

Irina: So what?

Maxim: They are very rich in correct, harmonious vibrations and structure.

Irina: I'll listen.

Ekaterina: There are a lot of fake matrices on the Internet, unfortunately, that is, not all of them.

Irina: I'll go to Peter Garyaev's website.

Ekaterina: There are matrices freely available on the website.

Irina: (Tukhti Khor speaks) Listen, really, what is this all about. The thing is that any object, any photograph, any substance contains information on the etheric level about this substance or about this person. There is such a device called an "ethereal wave reader," that is, an ethereal converter. He does this with the help of a beam of light, a certain wave and a certain intensity of glow (he is showing me now). A ray that descends on an object and begins to feel it.

Maxim: This can be called a laser, right?

Irina: This can be called a laser, but what it shows me is not a white laser, but some kind of reddish one.

Ekaterina: Yes, we have it red, in fact.

Irina: It depends on the wavelength, and also depends on the temperature, but in any case, you can also read with another type of laser. But the main thing here is not even the ray itself, but the main thing is that this ray does not just run across the surface of this object, it does not stand still. (It shows like this). He makes moves like this. But these movements are only chaotic at first glance; they repeat the outlines of the ethereal matrix of this object.

Why? Because light is such energy. You call it “laser”, but we simply call it “light energy”. The flow of light energy can come into contact with these ethereal matrices, on which information about the substance is recorded.

As I already said, any substance consists of atoms and molecules. Atoms and molecules are created by plasmoid civilizations, which, when creating these atoms, still invest their energy into them. This is with natural substances. If we are talking about artificial substances, the same drugs, for example, then, as I have already said, any drug has an energy component in which the effect of this substance is recorded. In addition, he is also influenced by the person who stood behind the machine, for example, and also invested part of his vital energy. Although to a small extent, during energy transformations this small degree can also affect the energy sector.

If we talk about photography, photography contains energy. When a person is photographed, his image contains information about his vital energy at the moment when he was photographed. Not about what he will be like later, in the future, but precisely at this moment. And this ray of light, light energy, it can remember (I will speak very simply now) this ethereal information, which it reads from objects.

But not any ray of light is capable of this, but only one that is directed and can make these movements (shows). And as soon as he remembers, he returns to this device and transmits this information. He shows a drawing that I don't understand. And now it shows some kind of cubic-shaped transformer, and its top is directed downward, like a pyramid, a cone. This is a converter of light signals, like flashes.

What the beam of light considered, it converts into radio waves. One energy, light, is the first level. As we remember, the first level is in atoms. And radio waves are also the first level in atoms. That is, these are different types of energies, and they can be transformed. This light is converted into radio waves. And these radio waves already contain this information, which he read from the object. And then these radio waves can be converted by your special computer into some kind of sound, you call it “recording”, so that a person can hear it. These are usually radio waves of a vibration frequency that is not perceived by the ear. There is a special converter that already converts them, that is, lowers the frequency. And the person begins to hear this sound, read from some object using light.

We also have such research in Gihor. They were a long time ago. But only we translate this into radio waves, mainly in the centimeter range. This will be a more complete reading of information than radio waves of the decimeter, and even more so the meter range. And then, using a special converter, you can lower the vibration frequency of these radio waves to audible by humans. And he will then hear the sound of this substance.

The sound will be incomprehensible to humans, chaotic. We can say that there will be the sound of these molecules and atoms themselves. If this is read from a photograph, then it will be the sound of his own etheric field, but he will not understand, there will be no words there, it will be noise. And if a person listens to this, then at the level of consciousness he will not understand what he is hearing. It will not distinguish one matrix from another. But at the level of his etheric body, when he hears it, these sounds, like any others, will enter through the auditory nerve into the auditory cortex of the brain. And there they will not be processed by consciousness (it’s like disordered noise), but they will be perceived precisely by the etheric field, the body.

The etheric field of the body does not distinguish, so to speak, whether it was the ingestion of the substance, or it was its etheric energy. It (by analogy) will charge all the cells of the body. The ethereal field is located not only around the physical body, but around every cell, like a shell. The ethereal field, which reads this information from sound, these sounds that passed by consciousness (and the etheric field counted), transmits to the cells that it is as if the person actually took these substances. And if from a photograph, then the etheric field considers the state that was at the time of the photograph and will transmit it to the cells.

Maxim: Yes, that's why it's very important that the person in the photo not only looks good, but also feels comfortable.

Irina: Yes, if he is upset about something, this can also have an effect.

1:19:20 Photo information.

Ekaterina: When we read information from a photograph, it would seem that we are simply reading information from a sheet of paper on which something is depicted. However, we get a healing sound that is healing for that person. How does this happen? How do we get information about a person when we read information from paper?

Irina: This is not information from paper, but from the etheric field of the one who is depicted there. There is simply an energy trace left on this sheet of paper, but it is invisible, like a field.

Ekaterina: We are reading the information-energy component. It could even be, as you said, some kind of plasmoid component.

Irina: This is not a plasmoid, this is the person himself, at the time of his photograph.

Maxim: You can call it truly plasmoid. Why? Because the energy that makes up the atoms of a cell is the energy of a plasmoid civilization. In principle, we can call this plasmoid energies, but we call this energy

the etheric field of the person himself.

Irina: They have already given the elements to man, so it is considered the energy of the person himself.

01:20:46 Perception of sound waves by body cells.

Ekaterina: There is an opinion among scientists that a sound wave is perceived and analyzed by the brain through hearing, through the vibration sensations of the body. Can the cells of the human body hear and perceive sound, and change under the influence of sound? Without analyzing the brain center, react to sound influence on your own?

Irina: Of course they can. Your science has evidence that sound can influence individual cellular structures, that is, not an organ of the body, but those cellular structures that are grown in some devices. And they can be influenced by a certain sound, the speed of biochemical reactions, the rate of division, the rate of accumulation and introduction of useful substances. Yes, this is possible, because sound is like a wave in the air - of different frequencies, different strengths, different tonality, tone. It passes through the cells. When it passes through them, the cell itself (it has such semi-liquid contents - cytoplasm) vibrates. Micro-oscillations of the cytoplasm can already change reactions. The cell at the mental level will not understand what is happening, what kind of sound it is, but this may already have an effect. Especially infrasounds, they can destroy a cell at a certain number of decibels and at a certain wave frequency.

01:23:00 Impact of bell ringing and Tibetan bowls. The effect of aromas of incense, sandalwood, myrrh.

Ekaterina: The next question concerns the ringing of bells. It is believed that bell ringing can destroy the painful environment in which viruses develop, for example, influenza viruses, jaundice, cholera, plague, coronavirus and the like. They also affect the psychosomatic central nervous system and the body as a whole. Is it so?

Irina: Yes, in general, this is true, but the operating principle is slightly different. The ringing of bells, as well as the ringing of metal objects in general. (He is now showing me Tibetan bowls).

Maxim: We use them in our center.

Irina: Yes, did you see how the water boils from them?

Maxim: Yes, vibrations cause the water in the bowls to boil. Boils conditionally.

Irina: You just do it like that, and bubbles appear from vibrations. The ringing of bells and Tibetan bowls create such vibrations in space, such sounds (and not only in the audible range, but in general) that are attractive to high-vibration plasmoid civilizations. About the same as the smell of incense is attractive to them.

There are aromas - aromatic resins, for example, frankincense, sandalwood, myrrh and so on. When they are sprayed with smoke, when the substance burns and the smoke begins to disperse, this smoke at the energy level attracts high-vibration plasmoids, which with their presence begin to cleanse the space of all low-vibration forms.

Those pathogenic viruses and bacteria that you named are also animal group Souls of microorganisms, which were also created by plasmoid civilizations. But what kind of civilizations do these Souls create? The fact is that plasmoids are also different: in their character, in their development, in whether they perform their tasks or not, they are also different, just like people. If a plasmoid has negative qualities, blocks (only they are not in its chakras, but in itself), then the created group Soul (for example, microorganisms) also turns out to be distorted. In the sense that he subsequently switches to parasitism and already creates distorted generations of his children.

Those plasmoid civilizations that create Souls for them, they also have certain vibrations. They are in this space where there are a lot of these microbes. Therefore, when there is the ringing of bells or the smell of incense, or the ringing of Tibetan bowls, then these low-vibration

plasmoids are uncomfortable in this space. They leave it unless they have a special, defined purpose for which they can endure this discomfort. As you know, they can even be in church. But in any case, it will be more difficult to be there, so the space will clear. Including the sound of bells.

Maxim: By saturating space with high vibrations, are we getting rid of low destructive civilizations in this space?

Irina: Yes. And the Souls that exist (for example, if there are just microbes, but these plasmoids are no longer nearby), in any case, are a group animal Soul, and microbes also hear. They do not hear sounds with their ears like we do. But they perceive it on an energetic level, they feel it. And if this is incompatible with those plasmoids who created them, then their development is also suppressed. That's what he says.

01:27:43 Garyaev's Health Matrix. Information and energy pyramid. Information capsules of Garyaev.

Ekaterina: Okay. We have now developed a new matrix, it is called the "Health Matrix". This is a combination of bell therapy, bilatherapy and the Garyaev matrix. What will space experts say about the new health matrix program?

Irina: Bells, and what else?

Ekaterina: This is a combination of the sounds of the bell and our Garyaev matrix. We made one general program.

Irina: This means that there will be at the same time, as I already said, a transfer of the ethereal properties of what was recorded on this sound matrix, as I said earlier. And at the same time a call for high-vibration plasmoid civilizations to help in this.

Maxim: They will just saturate this matrix with high vibrational energies for a speedier recovery.

Irina: And the person will be charged.

Ekaterina: Does this increase the impact?

Irina: Of course, it enhances it.

Ekaterina: In our center we also use the information-energy pyramid, Garyaev's information capsules. How effective are these structures?

Irina: (LiShioni speaks) Yes, I also heard about these devices. He reminds me now. Ashtar Sheran has similar ones on his ship, but there they simply work on different energies. In fact, this is all the technology of the Interstellar Union, part.

It's not that technology was not transferred, but knowledge was transferred, and on the basis of it, your husband and his assistants created these devices. You were also involved in them. And how he says that he experienced them on himself, their impact. Both the pyramid and the capsule contain (the representative of Gikhor is now showing me not an image, but as if from the Astral) energies of metal, wood and for some reason glass. And something else, like plastic, like wires.

Ekaterina: This is a combination of wood, metal, and the sound of the matrix. Maybe that's how he sees them.

Irina: From the Astral it is not visible that this is some kind of capsule, a pyramid. I can imagine, of course, what a pyramid is. He simply sees it in the form of energy. And he now says that the capsule and the pyramid have a similar mechanism of action, when the metal and glass that are located there enhance the energies of the person himself, aimed at healing. This is especially effective, for example, when listening to sound matrices or even just music. It will intensify its effect. Or you can simply meditate there, connect with your Higher Self. This will strengthen its field, because it will not dissipate in space, but will be directed upward through the spiritual channel as a stream.

Maxim: We still miss Kozyrev in this conference.

01:31:49 Treatment effectiveness.

Ekaterina: Why is treatment with the matrix not always effective? And what can be offered in order to increase their healing effect?

Irina: (Mead speaking) Because it is an auxiliary method. This is a method of restoration, treatment, but it can also be a method of disease prevention.

It can be a method of treatment, a method of recovery after treatment, and it can also be a method of preventing a healthy person so that he does not get sick in some difficult conditions. And this method is not considered chemical or physical. Unlike physical therapy, it is not considered a physical modality. Despite the sound, it is still considered an energetic method because it affects the human etheric body.

What enhances its effect? First, as with any medicine, healing substance, any healing agent (be it chemical, physical or energetic in nature), its action, as it is known in your medicine, is enhanced by belief in it. This is known even to those who have practiced acupuncture. There is such a method - acupuncture. This is also a combination of not only a physiotherapeutic method, but also an energy one, because they influence human energy through the hands, when they stick needles. Those diseases that were healed in the country where acupuncture came from (these are Asian countries), when these methods were transferred to European countries and other countries (America, Great Britain) by the Koreans themselves, the Chinese noticed that the effect was much lower. Because they did not have the necessary faith, there was no image that their body would be healed, and therefore they slowed down.

Maxim: To do this, it is necessary to carry out the information component of the method that you use, so that a person consciously perceives what will happen to him, how it works, how it is structured, and in general, in principle, believes in it.

Irina: This is the first one. The second, of course, enhances the effect (I have already said) of identifying the spiritual cause of the disease

through the Higher Self, through contact with it, and eliminating this spiritual cause. Or at least start working on eliminating it. If a person does not do this or returns to old patterns of behavior and stereotypes of thinking, then everything can return to him again.

01:34:56 Reaction of plants and animals to healing matrices. The influence of prayer in treatment.

Ekaterina: Then the question is also related to this: we also use our matrices when treating animals, small children listen to them, we turn them on to stimulate plant growth, and they respond very well to them. But they don't believe it.

Irina: They don't believe at the level of reason. But they have animals. Animals have souls. And plants have plant Souls. And they respond to energies. That is, they, bypassing faith, react to it, directly to the energy itself. And a person, since he still has consciousness, he can speed up or slow down this process with his mental operations and his feelings.

Ekaterina: That is, a person puts a block on himself?

Irina: Yes, with his doubt he can slow down his healing, and with his faith he can speed it up. There was even a study by one of your scientists, Russian scientists. (He is showing me images now). I don't know his name, but I know he was around back in the 80s, maybe. Your husband knew about this study.

The patients were divided into two identical groups, with the same wounds and wounds. It was a surgical department. They were interviewed and told that they would be given the same chemical treatment, that is, wound-healing antibiotics. In this case, one group will pray to God, but the second will not. For example, after two weeks they compared the results, although the treatment, nutrition, care - everything was the same. It was noticed that the wounds of the first group healed 30-35% faster, all other conditions being the same. It was a study, your husband was familiar with it.

01:37:29 Prospects for the development of Garyaev's therapeutic matrix.

Ekaterina: Yes, I heard about it. There is speculation that using a blue laser will enhance the effectiveness of our recordings. Is this true or not?

Irina: You can use blue, you can use white. But no matter what color you use, it is better to translate sounds into centimeter wavelengths and then into sounds. This is a stronger impact.

Ekaterina: You shouldn't focus on the blue laser, it's much more important to use what you said?

Irina: The higher the frequency of the Light itself, the more varieties of energy it will take from this etheric matrix. After all, the etheric matrix itself is written at high energies. Yes, the blue color will record more, but if it is recorded through the low radio frequency range, then there will not be the same effect there either.

Ekaterina: So you need to change the receiver itself and try to switch to other recording frequencies?

Irina: Yes, you need to install a slightly different converter there so that the frequency is higher, and then it's possible. You will just hear a different sound, but you can experience it.

Ekaterina: Yes, but will this sound be perceived by the human ear?

Irina: For radio waves there is a converter that converts them into sound. But this range can also be translated (he says so).

Ekaterina: Okay.

Irina: Because radio waves are not audible below. Now they are, for example, indoors, but people don't hear them. It's just translated.

01:39:30 Energy of the Shroud of Jesus Christ. A universal matrix for harmonizing space.

Ekaterina: Is it possible to create some kind of universal matrix, the sound of which would harmonize space? The world would become a little better. And if so, then from what substance or from a photograph of what or who can information for this matrix be obtained?

Irina: Again it depends more on who listens to her. And if you want to broadcast it to large masses of people, then the image or the substance from which it will be read must be universal.

In your reality, in your egregorial structure of your noosphere, Jesus Christ possessed and has possessed such energy of universal Love and acceptance for two thousand years. This is the Firstborn Son of God, and can be considered his image. But only take the icon, which is called the Savior Not Made by Hands, where he himself depicted his image.

Catherine: Or maybe take information from his Shroud, from a photograph of the Shroud?

Irina: There he emerged from the state of Resurrection; the information about his suffering had not yet been completely erased. I would not recommend broadcasting such harsh broadcast recordings to unprepared people. This may cause any disturbances in the cells.

Ekaterina: Okay. That's probably all for now. Thank you very much for your answers. Thank you very much, Irina. I think that this interview can greatly help further research, further work that continues and will continue.

Maxim: Ekaterina, we are ready to harmonize with you, we are ready to exchange scientific research with you. And we are ready to involve our interstellar friends for faster and more accelerated implementation of technologies. They will not give us technology, they will give us information that we ourselves, by our awareness, will have to translate into what we were just talking about. Therefore, Ekaterina, see you

again! It was very nice to chat!

Irina: See you again!

Ekaterina: Goodbye!

September 23, 2021

Conference participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Ekaterina Garyaeva - wife of Pyotr Petrovich Garyaev;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms;

LiShioni – representative of the planet Shimor, sociologist, specialist in the astral world and its interactions with the material world;

Lakhresh is a representative of the planet Saama, a biologist, a geneticist who studies the energy components of human internal organs, the etheric field, its influence on the physical body of humans and other anthropomorphic humanoids;

Tukhti Khor is a representative of the planet Gihor, studying methods of healing, therapy, treatment with energy waves and various energies of the surrounding space - physical and energetic.

#346 The afterlife. How does the universe work? The structure of the Spiritual world, levels of incarnation of Spirits.

https://blog.cassiopeia.center/zagrobnyj-mir-kak-ustroeno-mirozdanie-struktura

https://www.youtube.com/watch?v=vDpZGhMjLLQ

00:20 Incarnation of the Spirit into a material body.

Irina: On average, 30 percent of the Spirit enters the physical body. But Spirits come in different levels in the Spiritual World, from where they incarnate on all the planets of the Universe and on all levels of density of the universe. Any Spirit can incarnate anywhere in the Universe, not only on Earth, on Gihor or somewhere else, but he can incarnate anywhere. As LiScioni has already said, before the Spirit incarnates on Earth into a dense human body, he may be offered to incarnate several times on Earth, but at other levels of density.

01:15 Plasmoids of the Earth - Spirits of Nature.

Irina: Other levels of density, plasmoids of the Earth are those creatures that we, earthlings, call Spirits of Nature. Maybe you heard something: Spirits of the elements, Spirits of water, Spirits of the forest, Spirits of houses - these are the so-called earthly forms of plasmoid civilizations. They also have a body, but it no longer contains biological components. They have it inorganic, it consists of various energies. They multiply in a certain way (by budding, for example, emitting

various rays, emitting various rays from themselves), they create energy bodies that are not visible to the physical eyes of people due to their high vibrations, that is, the vibrations of their bodies are higher than the eye can perceive.

Sometimes they can, if they lower their vibrations (but this is usually quite difficult and unpleasant for them), they can become visible, that is, a person can see something like a ghost, for example, or some kind of ball lightning. Physically see - with your eyes. They can do this for various purposes, but not all plasmoids can do this. Only those who do this can.

02:48 Creation of the universe.

Irina: The same Spirit is also embodied in these plasmoid civilizations as in us. For example, you are your Spirit, so you, as a Spirit, could incarnate somewhere in the subtle worlds, in the plasmoid worlds, and then into a person. After human life you can go to the other world. Now LakKhash was talking about how a physical body is built from such molecules, that they are also built by subtle-material civilizations. When you asked, “Do molecules have intelligence?” It's like its creator has. That is, in the Spiritual world there is a universal Creator - the Creator of everything, who is usually called God. But He does not create the whole world Himself, but He provided this creation of the whole world to His children - us, because He gave us matter, that is, matter is the material for creation. So that we, His children, His little parts, can become like Him. For this purpose, He gave us matter so that we could incarnate in it and use it to create our worlds. Some build with bricks, some build with molecules, in this way.

So you asked what determines what 30 percent includes: intellectual abilities, feelings, reason. Did I understand the question correctly now?

Ekaterina: Yes, that's right.

04:32 The structure of the Spiritual world.

Irina: In the Spiritual World, where all Spirits live between incarnations,

there is no time - this is called the Eternal World, the state of Eternity. There are, according to the terminology of the Interstellar Union, 24 levels. Everything above the 24th is for us just Light, that is, there is an infinite number of them, but for us it will still be the 24th, we do not distinguish them.

They are called like this: from 1st to 6th, they are called Demons; 7th - 8th - these are those who often incarnated, just in the subtle worlds, they occupy the 7th - 8th levels, and why do they occupy such levels, because it is read that they do not have enough experience, incarnation in dense worlds. From the 9th to the 16th - the so-called middle Spirits, each level there has its own name, they are already engaged in the construction of the material world and in the dense worlds, in the subtle worlds there are such more universal, so to speak, Spirits. And from the 17th to the 24th are the so-called Angels. These are Spirits who, one might say, have found Light in themselves, have found Love in themselves and can incarnate into any world in order to help others in this. Light is understood by them not only as the Light of Love, but is understood, for example, as the Light of Knowledge, as the Light of Healing, etc. These are some high-vibration, as we call good deeds that lead everyone to perfection, and the highest perfection is precisely in likeness to God, because it is believed that He is Selfless, Unconditional Love and at the same time, this Love allows Him possess all qualities in absolute measure.

#347 Conspiracy against humanity or illusion? Global trends in world development. Human evolution

https://blog.cassiopeia.center/zagovor-protiv-chelovechestva-ili-illyuziya-global

https://www.youtube.com/watch?v=JI9KvrHZWUc

00:21 Introduction of participants.

Eleanor: I greet you in the light of the One Creator of all worlds! My name is Eleonora Tellerias-Castillo. I am a practicing crisis psychologist. I teach, conduct practice, lead groups, supervise. I deal with issues of psychosomatics, healing, symptom relief, traumatic experiences and other very interesting topics. I was also a manager in the past and have management experience in business structures and companies. And my question today, all my questions today will concern very topical topics that interest most of my colleagues, as well as people in all the communities in which I am a member. We represent a fairly large group that would like to ask such questions.

Irina: Hello, dear friends! My name is Irina Podzorova. I am a contactor with extraterrestrial civilizations. And today, the questions of Eleanor and many others who collected these questions are answered by several representatives of the Interstellar Union (IC) and the Galactic Federation of Light (GFS). Now I will introduce them. As always, these are our general curators - MidgasKaus from the planet Esler, biologist, psychologist, specialist in alien life forms, LiShioni from the planet Shimor, specialist in astral interactions.

Also today, a representative of the planet Burhad Laom Street came to answer questions, who is a representative of the commission for contacts with young races of the MS from the planet Burhad, a specialist in the study of civilizational processes and the formation of egregorial structures that allow directing the spiritual and social evolution of anthropomorphic races (like our psychologist, sociologist). There is also a contact specialist here. His name is Harshis Mnemor. He is from the planet Futissa, a specialist in interaction with the MS on the study of intelligent races in the Milky Way Galaxy. This is something like our consul. They talk about different worlds.

I also asked to invite a specialist from Tumesout. He has come, his name is Tiar, he will be present here. He is a specialist in contacts, in the study of brain waves from representatives of planet Earth, in telepathic contacts and in the installation of astral and mental chips.

If you ask a question, then either one of them, you can simply call the GFS or someone from the MS, you don’t have to name the name if you don’t remember it. If you just ask a question and it doesn't matter who answers, then anyone who wants to will answer.

Eleanor: Okay.

Irina: We are listening to you. We welcome you, Eleanor. And everyone who composed these questions. We will try to clear up some of the fog that exists on Earth regarding some issues that are important to your development.

04:54 Global players of the Earth.

Eleanor: Thank you. And it sounds like this: is the process of uniting the forces of global players, visible to humanity, namely oligarchic structures, international organizations, associations of governments of different countries, such as the G7 and G20, in the arena of finance, digitalization, merging the biological environment with artificial intelligence, approved, encouraged and controlled by our official creators? In general, at the level of policy for the development of planets like ours? And perhaps in your classification we are one of the

rather backward worlds.

Irina: So, who is responsible? Who wants? The representative of Burkhad - Laom Street would like to respond, as a specialist from the capital of MS, who is directly included in the contact committee. He wants to answer this question.

The political and economic situation on Earth is not under our control, one might say, for the last 5,000 years, from the moment when such a Spirit as you know as Krishna was incarnated on Earth. He was a hybrid. That is, in addition to the fact that you know him as a representative of the Earth, he was also born from a representative of another planet. From the moment of his disincarnation on Earth, a global series of wars began.

People then did not live in big cities, and they did not have the same technology as now. But, however, they made wars with each other. Entire ancient kingdoms that formed after a war 12,000 years ago were buried. There was a redistribution of territory 5,000 years ago, when younger tribes that developed separately from older civilizations raided. This happened with the Roman Empire and with Byzantium, but only on a much more serious scale.

Because of these constant wars, the MC Commission, which still existed at that time, was convened. I am familiar with the materials of its meeting, as is our archive. It was stated there that due to the fact that people follow the path of wars and aggression, it is customary not to influence their politics anymore, not to appoint or recommend rulers for them, much less not to interfere with their genetics. Because no matter how much we teach people, they still fight. We decided to leave them to go this route.

There were those who were against this decision. They said that it was necessary to extinguish aggression by some methods, including biological, chemical, and genetic, there were different solutions. But the majority were in favor of letting you develop yourself. There they argued that representatives of many races, including my home planet Burhad, also went through a series of such revolutionary changes.

And from that moment on, any meaningful control over your politics ceased. By the word “control” I mean direct control. But contacts continued with the aim of forming spiritual egregors, because those Spirits who came for incarnation very often came from other planets, from other civilizations, and therefore the contact with them that was on their planet continued.

At the moment, your civilization is what you just listed, those various associations, financial, digital, that exist, we consider them temporary associations, because it is clear from the egregors that these people have different interests. Even when they sit in the same room and negotiate with each other, they have different interests in their heads, they have different energies. There is no unification on the spiritual level, it is not visible.

Therefore, these are external, such visible associations, unions, including what we call such a temporary association and the UN. At the United Nations, when there is a meeting, everyone has their own interests. The most interesting thing for us is that even the interests of various political, economic and financial groups within one country may not coincide with each other, not to mention across different countries.

It's about our approval. In any case, we do not approve of policies that lead to destruction - wars, capital punishment, abortion, moral corruption of people, drug addiction, and so on. We do not approve of this policy. If these phenomena exist in society, and there is no strict intersection of these phenomena, then, of course, we do not approve of this. But in any case, it is your right. We do not approve of this because it is incompatible with the ideas of the MS.

11:46 The attitude of the Earth’s political structures towards the coronavirus.

Eleanor: Yes, I understand. However, I would like to clarify again. Do you sufficiently understand the processes of unification and global transformation that are taking place right now? In particular, the amazing unanimity of the governments of all countries in some measures taken over the past year and a half.

Irina: You need to be more specific about what you are talking about, because in some ways the countries are unanimous, but in others they are not.

Eleanor: For example, the policy of lockdowns, which you should know about, at least even from the understanding of the contactee, which were adopted almost everywhere, except for just a few selected countries. Even in those countries in which there were no cases of such a massive disease, absolutely no manifestations were observed at all. But even there measures were taken.

Irina: I understand what the question is about. I'll clarify it again now. That is, you are asking what is our opinion about the reason why most countries that disagreed with each other on other issues united against the backdrop of such a struggle that exists - economic, medical, with the epidemic of a new disease, the so-called " coronavirus."

Eleanor: Yes, and they demonstrate the amazing unanimity and simultaneity of all the introduced actions - restrictive ones, including.

Irina: I wouldn't call it unanimity. But, indeed, similar processes are observed. I know (he sees the reason). If we talk about an external reason. The reaction of your political and military structures, for example, to a disease, is largely determined by knowledge about this disease and its degree of study. And since politicians themselves, the military, and especially local officials, most often do not study biology, genetics, virology, or epidemiology. These subjects are outside their area of interest. Their interest is different.

For this reason, they use the opinions of so-called experts. These experts (I speak the language of the contactee, but they may be called differently in different countries) are something like the Russian Academy of Sciences, only in the field of infectious diseases. There are people who study the impact of a new emerging disease and make predictions. They make a prediction based on their beliefs on how quickly this disease will spread and what the fatality rate will be.

Since these experts have different scientific experience and personal experience, their information differs, and radically, in the same country.

As you, Eleanor, know very well, when the coronavirus epidemic first appeared, in the same country there were completely different conclusions from these experts, contradicting each other.

Eleanor: Yes, I know. Moreover, they continue to be unequal.

Irina: Yes, they were different from the very beginning, already at the beginning of the epidemic. At first, different mortality figures and different coronavirus disease figures were cited. But I want to say that in your government circles (one might say, in the intelligence services), if many did not know, the intelligence services also have their own scientists, in your opinion, like the military. They are not doctors, but scientists who work under their supervision. And they, too, are intelligence officers and at the same time scientists. You have those. When they studied the new virus, its action and difference from those coronaviruses that were known around the end of the 40s. And they studied the effect of the new strain, even if many did not know that it was artificially created, as a bioweapon (biological weapon), but many of them guessed, because from the actions it was possible to understand that these were specially bred, although experimental, but still specially bred genetically modified organisms.

Since many people guessed about this, but did not say it out loud, so as not to blame anyone for it, but they had no evidence. But, nevertheless, many guessed about this, and therefore they treated him with increased caution. We first began to apply protective measures against the epidemic, not knowing what to expect from a combat virus, in fact. They only began to defend themselves from him. And when data on the consequences of coronavirus had already accumulated, these measures began to be strengthened in all countries. Because with a relatively low mortality rate from the disease itself, the consequences of the coronavirus turned out to be somewhat more serious than previously thought. People were being watched. There were long-term consequences in the form of heart disease, diseases of the nervous system, a large percentage, as you call it (MidgasCaus just told me), when a person is declared unfit for work and is assigned social support.

There were more of these during the year than expected. For this reason, the power structures of any state are interested in a healthy working population so that the society is stable. Otherwise, society

begins to degrade, it may be occupied, or it may collapse. For this reason, government politicians set scientists the task of either finding a cure or finding a vaccine. In principle, this happened faster than required by all laws and instructions, but this was a direct order from the governments themselves, for obvious reasons.

20:05 Development of civilization in the context of the coronavirus situation.

Eleanor: I understand the answer, and the next question stems from it. Since you mentioned, we have become aware that the structures we are talking about, your structures, are aware of the artificial origin of this virus as a combat virus. And if your union knows about the artificial creation of this virus, is it possible to explore the probabilistic lines of development of the planet, taking into account who, how and in what way wants, wanted and will want to take advantage of this situation? And how will the countermeasures used against these weapons change the political, social and genetic landscape of humanity?

Irina: Probability lines - there are always several of them. Moreover, if we are not talking about one person, but about a large group of people. You are now talking about an entire civilization.

Eleanor: Yes.

Irina: To view the vectors of development of civilization, you need to take into account the vector development of every person in the world or a larger circle of people, so as not to make a mistake. But if we look at it in the most general terms, we can only say approximately that the probability that this virus will be neutralized by all preventive measures together over the next three years is somewhere around 65%. Nowadays. I said this in very general terms; individual issues still need to be considered, because this percentage depends on the choices of many people. We can only approximately say that at the moment the choices of people have led to this percentage.

As for the consequences for politics, economics and the entire noosphere of the Earth, we believe that in general, at the moment, the impact of this virus on the noosphere of the Earth, on its vibrations, is

rather negative. The Earth's noosphere accumulates negative energy of all types. If this continues, then the probability that this negative negative energy accumulated in the egregors will break out in the form of some kind of war or revolution (about 7-10 years after the events described) is about 35-37%. If the situation does not stabilize in people's minds and emotions, then this percentage will increase.

23:25 Genetic modification of humanity.

Eleanor: Okay, I understand the answer. The very last phrase contained the germ of my next question about the change in the genetic landscape of the inhabitants of the Earth, the human race. And, in this regard, I will have the first question: does the MS welcome genetic modification of humanity in the near or more distant future? Is such a modification, at least in part, being carried out after the adaptation that happened, according to your version, 12,000 years ago? And if suddenly it is carried out, then to what extent?

Irina: By genetic modification, do you mean the breeding of new hybrids specifically on the territory of the Earth or on the territory of the Galaxy in general?

Eleanor: Yes, for living on Earth.

Irina: For living on Earth, the MS does not approve of the production of new hybrids and hybridization with any of the races. For the reason that, according to most geneticists and biogeneticists, the genetic potential that is inherent in you now has not yet been revealed even by 15%. It is revealed to approximately 15% of its possible potential. Therefore, adding new genes to your population, if these new hybrids live on Earth, will cause these hybrids to interbreed with ordinary people, and a new people will appear that will destabilize your society.

We believe that first you must master some of the functions of the genes, the functions of your body that are now embedded in you. This applies to the functions of the brain and the whole body, control of one’s organs, and so on. You can do this, that is, your Spirit can do many things through this body. But you haven’t mastered this yet, so adding other genes specifically to your race will bring destabilization.

Which one?

These hybrids will, for example, look different. They will have a different metabolism. And you haven’t learned the lesson of xenophobia even towards those races that already exist on Earth. This could lead to wars, to the destruction of these hybrids and to even greater distrust and rejection, both from the MS and from other extraterrestrial races. You call them aliens.

As for hybridization with earthlings in general, it is possible only if hybrids are grown outside the Earth and with the consent of female contactees who give their genetic material for crossing with other races. But this requires physical contact, not astral. This person (and it may not necessarily be a woman, it can also be a man), firstly, according to the rules of the MS, she must be an adult, precisely for this development. Not just for physical contact, but in order to give your genetic material. Moreover, our research shows that children's genetic material, which previously could be used to grow hybrids, produced unstable hybrids, because children's cells do not yet have the necessary vital energy to give rise to the full development and infusion of a new Spirit. That is, it does not develop fully there.

Only from adult contactees, with their consent, can genetic material be taken for crossing, for experiments, but with the condition that these genetic hybrids are genetically modified, that they will not then live on planet Earth. There is a special law that with the consent of these genetic hybrids and with the consent of their source, that is, a person, they can meet in physical contact if they both agree.

This is mainly done by representatives of the planet Tashig and their colonies, but sometimes representatives of the planet Shimor also do this. Representatives of the planet Selbet and other reptilian races are trying to do such experiments, but their incompatibility is too great. Viable individuals are not obtained. The spirit does not inhabit them; they are incompatible there.

Eleanor: I understand this answer. However, I must note that gene editing is not only an improvement in qualities or the creation of hybrids, but also an improvement or, conversely, a change, a reduction in the qualities and properties of already presented, sufficiently

developed organisms. Using different mechanisms. We know that even now, even in civilizations on Earth, there are certain techniques that make it possible to change the genetic material not only in an embryo or in a zygote that has begun to divide, but also in adult individuals.

Irina: We don't call this hybridization. We call this mutagenic effect.

Eleanor: I call it gene editing. This can be called differently. Perhaps your terminology will be more precise. Can the MS approve such things in principle?

Irina: Similar things, gene editing. Do you mean someone-directed mutations? By reason?

Eleanor: Yes.

Irina: If these mutations are aimed at those cells that are passed on to another generation, that is, children will be born with new properties, then this is considered a type of genetic modification of the body and breeding with new properties. That is, it is considered interference with your race.

But if any genetic mutations that are positively directed in cells, for example, for the purpose of healing, can be caused in those cells that are not responsible for reproduction, and in those organs where there is a dysfunction of these organs, then these changes are possible. But not through biological or chemical influence, because this will already be evidence of physical contact. But through bioenergetic influence by special fields.

During various healing sessions, the targeted influence of energy fields created by both the HFS and MS representatives, the cells of the organ that is sick in a person begin to change their DNA. As you said, carry out gene editing in order to return to the state of purity of the cell that was before the disease.

Eleanor: Okay, I also understand your answer, it could be called a

cure, healing. This was part of my question.

Now I would like, if possible, to ask a question to representatives of different civilizations. To the question that will be indicated next, I wanted to get an answer from two representatives of different civilizations, namely, Tumesout and the Pleiadian representatives. Is it possible?

Irina: Yes, of course.

32:25 Man in the understanding of Galactic Unions.

Eleanor: And that's what it sounds like. What kind of person (human hybrid, from your point of view), as a social model, is welcomed in your two associations, unions? Attention, two options:

– the most conscious, independent individual with a high level of logical and emotional intelligence, based on spiritual ethics.

Or, the second option:

- the most calm, non-emotional, obedient and controllable individual with a clear specialization in only one direction, for example, the logical solution of applied problems or emotional-empathic influence, or immersion in work in the spiritual sphere, and so on.

Irina: The first to answer is the representative of the planet Tumesout. (He says) You have just made an interesting division. In our opinion, the degree of emotional intelligence does not in any way determine subsequent obedience or disobedience. Okay, I'll answer this question.

Eleanor: It was a division. That is, an individual with a high level of both logical and emotional intelligence is option number one. Or as obedient as possible. What does he think?

Irina: He can be obedient due to his high emotional and logical

intelligence, if this meets his goals and objectives at the current moment. He may be deliberately obedient. Such people do exist. Does the word “obedience” mean following? How do you understand the word “obedience”? I have to figure out your term now. Does the word "obedience" mean following the orders of someone?

Eleanor: Yes, following orders from above, without critically thinking about the situation, without an internal deep commitment to ethical and moral standards, one’s own. And only following what is charged in certain communities for the necessary necessary qualities and behavior.

Irina: (Tiar speaks) According to the teachings of MS, criticism is a natural component of thinking. Everyone has it. However, it is aimed at different things. I'll explain now. Those people who follow someone are less critical of the source of those orders, but they are more critical of their own ideas. They don't follow themselves, as you just said.

The word "independence". Independence is the ability of a person to perform his own actions, but at the same time it is accompanied by taking responsibility. If a person is critical of himself (criticism has not gone away, it is aimed at himself), then he will follow the images of that (we now do not use the word “ideas” and “decrees”, but use the word “images”), whose goals and objectives , embedded in these images, will be close to his heart, his images, his desires.

The rational Spirit has the ability to desire. He has a spiritual heart than he desires. Desire is a conscious need of the Spirit. If the desired thing is significant for him (this desire is significant for him), he recognizes it as a high degree of need. This means that his criticality towards this thing decreases. He just wants it. And if his criticality towards this thing increases, it means he wants the opposite.

The person who is most desirable for us is as seen by the MS, or at least (I cannot answer for the entire MS), myself and most of the scientists and politicians I know. We would like to see a person as something between the first and second options. That is, a person who knows how to set his own goals, achieve them and be responsible for their consequences, for the consequences of this achievement. At the same time, so that he does not destabilize society by violating the

hierarchy. There is a hierarchy in any society, both yours and ours. There is a certain leader, there are some entities, beings that take on the image of this leader.

This may not be one creature, but a group of creatures. There is an MS council that makes management decisions. So, we would like a person to be an independent being, but so that his independence does not lead him to pride, conceit and destructive actions in relation to himself and to the society where he is, and to his loved ones.

(Now representative of the Galactic Federation of Light). I listened carefully to your conversation, which included a question and answer. I don't quite agree with the MS policy regarding the hybridization of those earthlings, those earthly genes that create hybrids, even which will not exist on Earth. The State Fiscal Service does not welcome this.

First, we believe that it causes mental suffering to the source of these genes, that is, the genetic parent - mom or dad. The man and woman who become the genetic mother or father of this child, even if they have consented to this contact. Moreover, realizing that they provide cells for hybridization. But in the future, situations are possible, not that when they change their mind, they may begin to think about where the particle from their body is, for the reason that many people have a very strongly developed reproductive instinct, which allows them to want to want to give birth to children.

We believe that the instinctive nature of people is still too strong for the majority of the population to cope with their feelings. There are people who can tell themselves that no matter where they live, I still love them. But many people cannot cope with this. And they begin to emit negative emotions and direct them towards their own curators, to whom they gave consent. This all together creates a negative image of all aliens on Earth, we think so. This is the first point about genetic modification.

And the second point is the unsuccessful experiments carried out by representatives of the planet Selbet and its colony to obtain a joint hybrid with humans, to increase the percentage of genes. Since the Selbet people themselves do not have contact with earthlings by decision of their own government, genes for experiments are taken by

their employees from the planet Tashig. They have a joint agreement with the planet Tashig, which is in physical contact.

We believe that attempts to crossbreed with people lead to the fact that the Spirit can move into this fetus, this embryo, which will then suffer from the shortcomings of the body. This hybrid will still not work, but for now it simply does not take over. But such a combination of genes can be selected that the Spirit will enter him, settle in him, but will be genetically sick with something, which will prevent him from completing the task of incarnation.

Eleanor: Okay.

Irina: About what kind of person we would like to see. We would like to see a person more independent, more conscious. And a person who listens only to his heart. But this is only possible if there is Light in this heart. Because the law of the One Creator, the Creator of all worlds, is the law of Love. It must either be in the heart of every being, and if it is not there, then its analogues, more or less perfect, exist in society.

Eleanor: This is what I call spiritual ethics. And many of the people call this spiritual ethics.

Irina: Of course, we would like people to be spiritually ethical, so that they are independent, so that they have emotional intelligence. But I say again that based on the vibrations of the noosphere that exist, and the level of instinctiveness that exists now, I believe that there still must be psychological, social, spiritual development for the majority of people. Therefore, many people are not able to be controlled by themselves. If they are given this opportunity now, they will simply refuse it or begin to destroy it.

To the extent that we have studied the noosphere of the Earth, its culture, including through your radio waves, which transmit to us your television and radio broadcasts, this has long been studied. We also look through contactors who have chips. We see through their eyes what is happening in society. Plus research of the noosphere at the astral level. These are the three main sources of our knowledge about your planet.

We have fewer bases than the MC, only a few on Earth, so we have more exploration through astral travel. Naturally, we share observational data with MS. I personally spoke with Ashtar Sheran, who communicates a lot with earthlings and is a member of the State Fiscal Service.

The fact is that many people are not able to control their feelings, are not able to control their emotions and desires. If they showed a desire, for example, to have a child, then they simply expressed it without logical understanding that they need to be responsible for him throughout his life until he reaches adulthood, that he needs material resources. It happens.

This is impossible neither in the worlds of MS nor in the GFS, because all of our educational institutions, the ideology of our entire society as a whole, promotes not only the development of independence or obedience, but most of all it promotes self-analysis. Ask yourself the question: “What will happen if I do this? What will be the consequences? And does this (MidgasKaus suggested) correspond to my life task?” This is how they communicate with the Higher Self.

46:53 The ability to study human intentions. Globalism, transhumanism. Coronavirus as an exam for civilization.

Eleanor: Thank you. I would like to return accordingly to the beginning of our conversation. I don't know who will answer. It was assumed that these would be representatives of the MS. In connection with all of the above by me and you, I would like to ask the following question: has your current political system or direction, a tendency that could be called globalism, and a direction in social philosophy that is called, been sufficiently studied by your structures, scientific and administrative? transhumanism? Because we see that the consistent development of everything that happens on our planet leads to the implementation of these plans. Are all players who implement these concepts “transparent” to the MC about their motivations? Do you understand why I ask this question?

Irina: Are all players “transparent” in their motivations? That is, you are asking us the question, do we see their intentions?

Eleanor: Yes.

Irina: You see, we can look at intentions according to our, as you put it, spiritual ethics. Looking at intentions means scanning a person's mental and astral field. I will say it more clearly for those people who may not have studied esotericism. It's like entering a person's Soul, the door of his Soul, and studying it. Like that.

Such scanning of the field is possible and ethical from a spiritual point of view only with the direct permission of a person, because this is an intervention in his energy. If such permission is not given, but is carried out by us without consent or without notifying the person at all about this, then any human Spirit has an internal guard. This is the part of thinking that is responsible for self-control. There is a conscious one, and there is a subconscious guardian, like an instinct.

If, for example, you scan a person without his consent, his Higher Self, his subconscious, will feel this through the changed energy. For example, the astral presence of another entity or a scanning beam of a saucer directed at it. His Higher Self will feel this, because it lives in the Spiritual world, and all the vibrations of the material and Spiritual worlds are visible and felt from there.

If consent is not given, it is considered a violation of the spiritual law of free will. Because of this disturbance, the person's Higher Self gives orders to his subconscious, his subconscious memory, the contents of the unconscious, and it can turn on this inner guard. And the information will either be completely closed, or it will be distorted and incorrectly accepted by the entity that is researching. We call this in short – "a person is closed." It's about recognizing intentions.

As for how studied your political process is, and how we feel about globalism and transhumanism. We believe that your political process has been sufficiently studied by us, but we may not know some of your intrigues, subtleties that pass between you if our contactee is not nearby. Their consequences can only be tracked in the noosphere.

We are on your planet, our representatives, but they are at their bases,

not in political offices or anywhere else, or in medical institutions. They are simply at their bases. They have special devices, they have contactors. But I want to say that among the government circles of different countries there are also contactors of the MS and the State Fiscal Service, who, among other things, provide us with information about the decisions made by their colleagues, but only if the colleagues publicly voiced them. That is, again, without violating human free will. This is unethical.

Regarding transhumanism and globalism. We consider these two processes not to flow in parallel next to each other, but in some ways even contradictory. Because, despite the rhetoric of globalism and the unification of all nations, all peoples and religions, there is still internal resistance to this unification not only of peoples, but also of the governments themselves, at the level of egregors in general. This is aggravated by the fact that in the same country there is confrontation between different demographic groups of the population.

The most common confrontation, which especially emerged in the era of coronavirus, including in Russia, in the era - we now call it the “new era”, because this problem was the trigger, the starting point, the trigger. How they pulled a thread (he shows me) of deeper problems, deep processes that have been ripening in your society for a long time. Now due to the coronavirus epidemic. It was not accidental at this time. This is like your test, a lesson, as MS representatives have already said, an exam for the awareness of your entire civilization as a whole. And governments, and science, and ordinary citizens who do not even know what it is. It was an exam.

If we look from the position of the Spiritual world, which allowed all this - the creation of the virus, its reproduction. Representatives of subtle-material civilizations also participated there, who created Souls, and are creating now. Representatives of the Spiritual World allowed them to do this. For what? Why didn’t the plasmoids themselves, for example, completely extinguish all this? They could do this, the virus would not survive in the environment. Why did they allow it? Because it was an examination of the humanity, humanity, awareness of each of you, no matter where he worked, no matter what social role he played, no matter what position he occupied. This was and is an examination of your overall awareness as a civilization.

We believe that so far, at the present moment in time, your civilization has not passed this test (now I will talk about the confrontation) for the reason that the confrontation that has been going on for a long time has just begun, or rather has been revealed. This is exactly what you were talking about. We can roughly call it a confrontation between the government (he is now showing me an arrow on one side, a little higher) and the people.

In the public consciousness, this confrontation has been going on for a long time, and it was initiated and supported by both sides. There is a desire (in words) to stop this conflict and unite to solve this problem together. But these desires are only in words. There are no significant cases for this unification either on one side of the already general civilizational conflict or on the other side of the conflict. These conflicts and confrontations just continue.

On the one hand, the government is a reaction of suppression, administrative measures, instead of the necessary clarification, answers to questions and openness. On the other hand, instead of listening and comprehensively studying this process, there is simply confrontation and aggression. There is no mutual desire to unite, for example, around the problem of getting rid of the coronavirus and its consequences.

Instead, destructive processes continue to grow in the Earth's noosphere at the present moment. Despite the fact that it was decided to combat the coronavirus in the form of vaccines, they appeared quickly, even faster than predicted by the MS or the State Fiscal Service and our scientists. Despite the appearance of these drugs, substances for elimination, no attempt was made to unite the entire Earth; not the scientists separately, the government separately, the people separately respect their interests and do not compromise, but only intensify aggression. Moreover, the government naturally has more ways to show aggression and somehow influence people, which causes retaliatory aggression. As a result, the entire noosphere of the Earth suffers.

What is most unpleasant and terrible for all of you is that the vital vibrations of every person who is involved in this and actively participates in it suffer, and the fulfillment of your life tasks, those who participate in this conflict in some way, suffers.

There is only one solution here. We see that at the general level there is no reconciliation of the parties and no search for a compromise solution; there is no desire on either side of the conflict. This means that every person, no matter what level he is at from these three: scientists, the government or the people, we invite him to withdraw into himself, connect with himself, with his Higher Self, and following his recommendations, his advice, get out of these vibrations, get out of a state of confrontation with someone, harmonize. Ask: “Why do I need this lesson? Why did I incarnate at this particular time? What am I going through here?” That is, ask your Higher Self why I chose to incarnate this time and place where such civilizational processes are taking place, where I need to either confront a group of people that is not mine, or refuse confrontation and become a stranger among my people. Such a choice. Moreover, in each of the three social groups of people that I named, if each person talks to himself, his Higher Self, his curators, Angels, mentors will tell him how to act in this situation.

The MS recommendations here are clear. On both sides, and on the third side, compromises are necessary with each other. Not confrontation, but openness and compromise in decisions.

We hold all parties to the conflict equally responsible for the situation that has developed now with the coronavirus and with vaccination, and in general with all the vibrations that have changed for the worse, because no one has agreed to reconciliation.

01:02:15 Observation of the Earth's political processes by the Interstellar Union.

Eleanor: I understand your answer, but my question contained a very important message, the answer to which is very important for us to receive. Summarizing everything you said, do you still confirm that the intentions of some global players, for example, represented as individuals or groups of individuals, may not be transparent to you?

Irina: If they did not consent to scanning, of course, they can be opaque. We simply will not even have the intention of recognizing him. This is unethical. If he didn't give his consent.

Eleanor: I see. That is, if there is some kind of global intent, design, plan and consistent actions before its implementation, plus maintaining this opacity and closeness on the part of those global players who are starting some processes, it may well turn out that some processes will turn out to be a surprise, including including for you.

Irina: Their consequences will still be visible if they take on a more or less widespread scale. It's not clear what you're talking about. It depends on what this idea is about. If it manifests itself at the event level, then it will become known in any case. Whether this will be a surprise for us depends on many factors. It may, of course, be a surprise. For example, the decision in the early 60s of the twentieth century to launch nuclear bombs on two leading powers was a surprise for us. True, they were stopped.

Also surprising were the decisions of the governments of some countries to test underground nuclear explosions, as well as to research chemical and biological weapons on their own citizens, even prisoners. This was also a surprise for us. However, it was there, monitored by us and recorded. And in different states.

Eleanor: Okay. It’s just that those forces that very closely monitor the development of the situation in the political arena and all the processes currently taking place in the field of finance, for example, are picking up the trend of population decline. At least that part of it that is financial ballast, that is, people who are much older than the working population and so on.

Moreover, these ideas are not even hidden; they can be found precisely among the apologists of that same transhumanism, to some extent. And this is not the first time such trends have arisen; these opinions have existed for about thirty to twenty years. Now we are seeing a trend towards the implementation of these plans. So, these plans might come as a surprise to you? Plans of a certain elite?

Irina: They can, of course, if we didn’t know about them. I have already said what our sources of information are. This is observation of society through contactees. This is monitoring your radio wave transmissions. And this is the study of the Earth’s noosphere, your egregors. That is, if it does not reach the egregorial level, but is a

conspiracy of some smaller part of people, which will not affect the egregor.

But, as soon as it reaches a level where it will cease to be an idea, just an idea on the mental level, and when this idea will be embodied, it will no longer be a secret. She'll come out anyway.

Eleanor: Okay, thank you for your answer. Can you clarify who answered this now?

Irina: Laom Street.

01:06:51 Analysis of terrestrial vaccines by the Interstellar Union.

Eleanor: Thank you. The next question: did representatives of any of the unions - MS or SFS, selectively take substances in ampoules, which are now called vector vaccines, for chemical analysis in the laboratories of your unions? Were the samples taken from advanced, perhaps even military, development laboratories? Because these can be two different directions - industrial production and advanced developments.

Irina: Do you mean physical analysis?

Eleanor: Yes, physical.

Irina: Not on the energy plane?

Eleanor: Yes.

Irina: No, we did not take such an analysis, for the reason that, firstly, there was no such task to study them specifically, and secondly, and this is the main reason, to take any substance for analysis, you need it first purchase. If representatives of the MS or State Fiscal Service examine your medications or some substances, we can take them, so to speak, in two main ways.

Or, if these are publicly available drugs, then through the pharmacy chain. The same representatives of Tashiga have physical contactees who, according to lists, purchase certain medications (if available) in pharmacies and physically bring them to the contact. Then they are brought to the base and studied their chemical composition, bioenergy composition, and so on.

There is another way when the substance is not available for sale, but it is necessary to study its composition so that the physical contactee of the MS accepts this substance, receives it in some way and then comes into contact no later than two days from the moment of introduction and reception of this substance on Earth . Then he takes an analysis of not only his blood, but also his lymphatic fluid, lymph, which contains all the metabolites. And the enzyme composition of humans is already being studied using these metabolites. According to the protein nature, there will be metabolites that will differ from the metabolites of the person himself.

Since you just asked about vaccines specifically, that is, there are enough physical contacts to whom they were administered. However, they were examined at the energetic level, and these substances are visible as if from the Astral. Since there were no negative vibrations that would be harmful and incompatible with the body of contactees, greatly disturbing their internal balance, we did not need to physically take this analysis. If necessary, of course, we will invite anyone to contact us.

01:10:35 Pharmaceutical nanotechnologies.

Eleanor: Okay, thank you. It might make sense to do this. It is reliably known from public legal sources open to public scrutiny that now various researchers in different countries, in particular, for example, China and other countries, who are involved in the development of new pharmaceuticals, that different researchers are patenting nano-pharmaceuticals. That is, the content of substances in them in a nano-state or the form of nanites is already specifically patented for some purpose. On Earth, they can only be patented if the substance itself already exists, has passed the testing phase and has been demonstrated by the appropriate patenting authority. Do your unions - MS and SFS know about such patents and such substances produced

by the Earth, and do you know enough?

Irina: We understand the word “patent” as some kind of permission from government bodies to use this substance or device on the general public. Is this a patent?

Eleanor: What a “patent” actually means is that a substance or components are in development, have passed the research phase, and are confirmed by the copyright holder. That is, the patent confirms the copyright holder for these developments. Accordingly, this has nothing to do with whether it will be applied or not, because the patent holder has the right to withhold this discovery for discovery to the general public. Or somehow combine it with other patents. However, such a substance or such drugs exist if they are registered. That is, this indirectly confirms their existence on Earth. And my question, I repeat, does MS or GFS know about such pharmacological, pharmaceutical substances containing nanites already on Earth?

Irina: Are organic substances in nanoform called “nanites”?

Eleanor: Yes, perhaps in the form of connections. In particular, we are now talking specifically about graphene oxide, which can be attached to some protein structures.

Irina: Graphene oxide is a carbon monoxide substance in a special allotropic form?

Eleanor: Yes, exactly. Super small in size, the size of one layer of crystal lattice.

Irina: Graphene technologies, which are known on Earth, according to MS, do not involve their grinding to a nano state. Nano, your state is considered to be somewhere around 500 nanometers, as far as I remember.

Eleanor: This can be clarified. The contactor has access to those patent production materials where the dimensions, substance, and so on are indicated. All characteristics.

Irina: If we are talking about growing nanotubes from graphene and its derivatives, then we do not know any components or technologies that can do this with this substance, making its particles smaller than 500 nanometers. I don't know if this is considered nanotechnology in your country. As far as I remember your rules, particles of this size cannot be considered nanoparticles.

I meant that even if they are used in some technology, for example, in laser technology, construction technology, possibly in diagnostic technology, because this graphene may contain particles of radioactive carbon-14, for diagnosing, for example, a condition an organism that accumulates radioactive isotopes, followed by filming as a medium. You have special diagnostic methods of radioisotope scanning.

Eleanor: Sorry, I'm not talking about technological use right now. I mean only pharmaceutical, pharmacological agents.

Irina: Those pharmacological, pharmaceutical agents that use nanotechnology now, as far as they have been studied by MS, this is about the last 15-17 years, developments are underway to use pharmaceutical nanotechnology based on lipid and lipoprotein films, some artificially created in the laboratory , or any vegetable oils. Their drops (he shows) are not drops, but spherical balls; they can be up to 10-25 nanometers in size, which quite fits the definition of nanotechnology.

But they are not used in pharmacology as independent carriers, for example, nanorobots, you don't have that yet. They are used as carriers, for example, in vaccines, carriers of any pieces of proteins of some pathogen, namely lipoproteins or lipids.

This can be done from graphene. But for what? If lipid films penetrate much more easily into the blood, lymph, fat and muscle tissue of a person. Moreover, these proteins and genes, genetic inserts of the pathogen (we will call it an antigen) or pieces of its amino acid chains from some of its proteins are much better attached to the lipid film (it is sticky) than to the molecule. Moreover, as you say, the graphene film is inorganic. Meaning?

Eleanor: Yes, we know about this, and we have the same questions, why? Same questions as you.

Irina: But this doesn't make any sense, because it's better to do it with your natural fats (artificial ones, let them be hydrogenated, processed with water, or obtained by emulsifying vegetable oils with some preservative liquids). Either way, it will be more efficient. The fact is that if it is a particle of graphene, like an inorganic substance, introduced to you, it is like a speck of dust, it does not carry any information, what can be attached to it?

Eleanor: Yes, the only property that graphene oxide exhibits very well is its excellent susceptibility to electromagnetic wave radiation.

Irina: There are many metals from which it is even easier to make nanoballs that are even better susceptible. Graphene, like graphite, is a semiconductor. But there are materials - metals, alloys - that can cope with this much better, and "nano" can also be made from them.

Eleanor: Yes, perhaps. Dear friends, I thank you very much for your answers to the questions I asked. I hope that this discussion will continue and we will meet again, perhaps next time. And let's prepare the following questions. Because this topic is very important for everyone who listens to Irina, as an MS contactee and for everyone who is related to the processes that we are now observing. This meeting was very educational for me. Thank you!

Irina: And I thank you.

Maxim: See you again!

Eleanor: See you again, goodbye!

September 30, 2021

Conference participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Eleanor Tellerias-Castillo – practicing crisis psychologist, teacher;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

LiShioni - representative of the planet Shimor, sociologist, specialist in the astral world and its interactions with the material world;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms;

Laom Street - representative of the planet Burhad, psychologist, sociologist, specialist in the study of civilizational processes and the formation of egregorial structures that allow directing the spiritual and social evolution of anthropomorphic races;

Harshis Mnemor – representative of the planet Futissa, consul, specialist in interaction with the Interstellar Union on the study of intelligent races in the Milky Way Galaxy;

Tiar is a representative of the planet Tumesout, a specialist in the history of planet Earth and in mental, telepathic contacts with earthlings.

#348 Are people in power

random? Political egregors of the planet. Levels of spiritual development of politicians.

https://blog.cassiopeia.center/lyudi-u-vlasti-sluchajnye-politicheskie-ehgregory

https://www.youtube.com/watch?v=t53Xpe-wVGI

00:21 Personal code of a government representative.

Irina : In general, in all government structures there are not random people.

Olesya : I already understood that, yes, that power is given to test a person. Pass the lesson.

Irina : And so that he can learn management, so that he can manage. No one in this society can cope with this task better than him. There are no such vibration characteristics. Each level of power in the state corresponds to some vibrational characteristic, some qualities of the Soul, an individual personal code that no one has except the one in power. And this is all done in agreement with the political egregor of the planet, with the guardians of this egregor.

01:10 Spiritual tasks of Spirits in power structures.

Irina: It happens that the president is the keeper of this egregor in the Spiritual world for a long time, and then incarnates himself in order to do on the material level what he did on the spiritual level. This happens quite often.

It happens (this depends on the level of the president or ruler) that he

came to learn how to govern. Then he ends up among the people who, according to their combined karma of all beings, must go through the reign of a ruler-disciple who is not yet experienced. Gorbachev and Yeltsin are generally from the tenth level, both of them. In the Spiritual World they were on the same level. In any case, they knew each other. They were level ten.

Of all our politicians, only Zhirinovsky from the eighteenth. But imagine if he comes.

02:14 Preparation of the Spirit for incarnation.

Irina: In front of the spiritual consultants and in front of the Spirit who wants to incarnate, there is such a white screen (he shows it to me). And on this screen, pages and documents appear. And it’s written there in letters, like a photocopy. Only it, of course, is not paper, but like a hologram. It is God who gives access to that part of the Time Tape from the future in which he must incarnate. It's like that there.

02:55 Mentoring in the Spiritual World.

Irina: Because the twenty-second level has access to the kingdom of heaven. All Spirits have so-called patronage through the level. That is, those who are from the twenty-fourth level are the bosses of those from the twenty-second. Chiefs - this does not mean bosses, but as mentors. Like spiritual gurus. That is, those who, from the twenty-fourth level, train consultants to be consultants. And, in turn, consultants teach there from the twentieth level.

00:22 Introduction of meeting participants.

Irina: Hello, dear friends! My name is Irina Podzorova. I am a contactee with extraterrestrial civilizations. Today my curators are present with me: MidgasKaus from the planet Esler, a biologist, psychologist, specialist in alien life forms, and Erwin, a plasmoid of the 37th density level, from the Betelgeuse system, who will also answer questions. Today the two of them decided to answer Alexander's questions. Hello, Alexander! Tell us about yourself.

Alexander: I am engaged in spiritual development, self-development, self-knowledge with the help of different schools, maybe movements. My main movement, which was a priority, was Castaneda. Teachings from the Altecs, Don Juan Castaneda.

01:11 Plasmoid Erwin.

Alexander: As I understand it, Erwin is a plasmoid. Is he just a plasmoid or did he have something to do with shamans in Mexico?

Irina: (speaks Erwin) I talked with these people and with their curators. I am the Guardian of the Order of Ice Fire Mages. I'm from the Betelgeuse system. We have been busy for many thousands of years restoring the balance of positive and negative energies in the chromosphere of our star. In your opinion, this is a war between dark and light, but on a different level.

02:03 Dark entities.

Alexander: Who are the dark ones relative to the light ones?

Irina: (Erwin) These are low vibration civilizations that are parasitic in nature for organic beings. They can feed on the negative energies of people and even animals, they can cause fear in them, for example, and feed on energies.

Alexander: Is this their passion? They like to do this and that's why they reproduce this way, exaggerate?

Irina: (Erwin) There are such Souls that incarnate in plasmoid civilizations and switch to parasitism. In your opinion, these are selfishly minded Souls. Only an egoistically minded person in a dense body will try to make his desires prevail over the desires of everyone. He will do this with material means. He will try to achieve power not in order to help the development of society, but in order to gain some benefit for himself, even if it causes negative consequences in his country. Have you seen such people?

Alexander: Yes, I saw and heard. There are such. But I interpret them in such a way that they are simply trying to take over the free will of other people, thus increasing their own will.

Irina: (Erwin) They do this because they have lost contact with the source of Light and Love. Now they are looking for a replacement for them in the worship of the masses of people and in the enormous opportunities that material acquisitions give them. They can easily commit some kind of criminal act if it means they will benefit. They can easily slander, for example, their colleague in front of their boss in order to take his place, even if it is not true.

Alexander: It’s on different vibrations. He operates on different principles.

Irina: (Erwin) This is also a Spirit that emits negative energies. He is in a dense body. And if such a Spirit is in a subtle body, then it has other methods.

He has methods of suppressing the will of other Spirits and extracting energy from them, if it suits them in vibration, similar to his own. For example, if this Spirit experiences fears of any creatures, then it loses the ability to feed on pure divine energy at its density level, because the energy of fear begins to approach it. He begins to look for similar people. Also with the energy of despondency, hatred, anger and so on.

Alexander: It's his free will, right? Did he switch to this to maybe have that experience? Or realize some kind of karma of the person he joins, right? This is also a scheme based on the principle of attraction of one to another.

Irina: (Erwin) This is his will, but often it is determined by his activities in several incarnations.

Alexander: Like developments.

Irina: (Erwin) His accumulated experience influences his formed character, and he does not have the strength within himself to get away from these negative manifestations. He can do it, but he doesn't make that choice.

06:49 Karma and retribution.

Alexander: By the way, this is an interesting question, I often think about it. If the police and judges saw our karma and past lives, that is, the accumulated experience that provoked the crime? This is on the one hand. On the other hand, is there a crime that is caused by the karma of a person who, say, was stolen because he stole before? In this case, this thief would not have been convicted, given that there is a vision of karma and awareness of this?

Irina: (Erwin speaking). The fact that he was stolen does not make him obligated to steal too. Karma is devoid of the process of revenge. Karma has a different meaning.

Alexander: How would it be implemented then, I wonder?

Irina: (Erwin) The meaning of karma is to show a person who has violated God’s law why this should not be done. But not forcibly show it through pain and suffering, but through other examples, so that he himself realizes it.

Alexander: Some kind of loyal karma results.

Irina: (Erwin) Let's sort it out now. If a person steals, he has a certain quality due to which he stole. What do you think this quality is?

Alexander: The quality of owning something that does not belong to one. The quality of passion. I think passion.

Irina: (Erwin) What is this passion called?

Alexander: Possession? The passion of possession.

Irina: (Erwin) Greed.

Alexander: Greed? Maybe. Yes.

Irina: (Erwin) Greed, love of money.

Alexander: Yes.

Irina: (Erwin) What else should a person have, besides the love of money, for him to decide to steal?

Alexander: Ignoring some laws. Ignore the wishes and rights of other people.

Irina: (Erwin) What could motivate him to not pay attention to the rights of another?

Alexander: It could be a lot of different factors. He just gives himself the right.

Irina: (Erwin) Most often it's pride. Understanding that a person needs this thing more than the one from whom he stole. Selfishness, pride, and love of money are combined in him, and he allows himself to do such an act. And when he has already stolen, when he has done a physical action, these qualities intensify in him. It will be easier for him to do it next time.

Alexander: Yes, of course.

Irina: (Erwin) This lowers his vibration because he does not see unity in the flow of Divine love between himself and other people. A person cannot realize that in fact he is stealing from himself. A son or daughter of God who is the same as himself is, therefore, a son or daughter of God himself. Because whoever loves and in whom the Divine truth shines, he sees oneness in everything.

Alexander: But then he doesn't steal from anyone, in fact, he just borrowed it for a while, and then it will just be taken away from him, the only thing is that he lowers his vibrations.

Irina: (Erwin) The whole point is that if some other person takes it from him for a while in the same way, he will be very indignant.

Alexander: That's for sure.

Irina: (Erwin) He will not be able to recognize the right of another person to do the same. Then you ask the question: "Why does he allow himself such a right?" Because he elevates himself above others. Elevates his rights, making them more important than the rights of others.

Alexander: I went through it and this is how I also experienced it all myself. But I quickly realized that all these principles were also starting to work for me, against me, let's say. And it turns out that I don't want this, so I think: "Okay, I guess I'll give up on this, I won't use it, because somehow everything happens too unexpectedly."

Irina: (Erwin) So, if he leaves the incarnation as a thief, that is, with accumulated negative qualities, then the level to which he will end up will be low, because he did not love his neighbor, did not love God, did not love himself. Because it is not true self-love when there is self-indulgence, neglecting spiritual development. This is not self-love, but hatred. That is, there is no true love here. Since he didn't love anyone, he will fall into the lowest level. Which one will be determined by the specific vibration that he has. If he decides to go into incarnation again, then it will be useless to choose for him an incarnation where everyone will be stolen from him. This will only increase his fear of losing material things. Most likely, his mentors, his Consultant Angels, will send him to such conditions where he will learn to manage material property.

That is, he may be given, for example, by the middle of his life to collect a large fortune or acquire some wealth. And then they can somehow, not necessarily through theft, make it so that he loses everything and will be at the very bottom of society.

Alexander: Will this be according to plan?

Irina: (speaks Erwin) This could happen. This will happen to him so that he can compare his life as a rich man who had a lot of opportunities and pleasures, and the life of a man who has nothing. And it will depend on what choice he makes. Either he will make a choice to accept this experience and again begin to climb the steps, work, earn money, or he will choose despondency and isolation from God.

Alexander: This is a difficult quest, roughly speaking, of course, to understand this.

Irina: (Erwin speaking). This is just one of the options. There can be many of them. He may, for example, be born into a middle-income family and be raised by religious parents, under strict rules. In his next life, he may have a child who will have problems with the law, which he had in a previous life. And he will, while convincing them, convince himself.

Alexander: I see. Yes, everything is complicated. In our country, for example, they punish people - they put them in prison.

Irina: (Erwin). Only the physical body can be imprisoned. We are talking about the life of the Spirit, which cannot be limited by any walls.

16:02 “Voice of Vision.” Replenishment of vital energy.

Alexander: Then I would like to reveal a few concepts from Castaneda. First, they have a concept called “voice of vision.”

Irina: What?

Alexander: “Voice of vision.” That is, at a certain stage of the student’s development, a voice appeared that prompted the student and answered certain questions. He appeared by himself. I mean the student didn't call him. He didn’t ask anyone, didn’t try to make contact. In principle this was not practiced. And this “voice of vision” arose, answered questions, even thoughts, that is, he read them, knew them.

But the nagual, specifically Don Juan, warned not to put too much faith in this voice, not to dwell on it, because this is simply a stage before vision, before pure vision, before pure perception. So I wonder what this “voice of vision” is (because the answer is not given)? This voice, as they said, knows the answers to any of your questions, but it knows exactly what you know, no more. It seems to emerge from the depths, somehow existing. Is it possible to discuss this voice? What it is? And how is it different?

Irina: (Erwin) Anything can happen. There may be contact with the curator, perhaps with the Higher Self. We must look in the context of what is written there.

Alexander: In context? As I say, in context, no. The description is that he appears on his own at any time and answers even in a dream, when you don’t ask him. He can comment on the events that are happening and give answers to mental questions.

Irina: (Erwin) This could be a form of contact with someone, with some kind of curator. In the sense that he will not be able to communicate what you do not know, it was explained that any curator acts, transmits contact through the mental images and concepts of the contactee.

Alexander: Yes.

Irina: (Erwin) If the contactee does not have these understandings in his vocabulary, the curator can simply switch to images. Or rather, he will say in words, but the contactee’s field will perceive concepts in the form of images, because it passes through the brain.

Alexander: I understand, yes. That's what you said. Fine.

Irina: (Erwin) This is called relaying.

Alexander: They moved on. He encouraged him to develop further. Fine.

Irina: (Erwin) Yes, Castaneda, or rather, his teacher and the teachers of this teacher in general had an understanding that you need to develop more independently than rely on voices or vision from curators. Because they developed independence as the development of will energy, and it was believed that independence in some everyday issues and the choice of spiritual teaching allows one to develop such an important quality as responsibility. This means preserving your consciousness, your personality after the death of your physical body.

What did this mean? This meant that when the embodied part of the Spirit merged with the Higher Self (with the 70% part of the Spirit located in the Spiritual World), they wanted to remain in their consciousness, so to speak.

Alexander: By the way, this is an important question, I think, to remain in your consciousness. It's like preserving your past, perhaps there will be no transition to the new.

Irina: (Erwin) In general, merging with the Higher Self is not accompanied by a loss of this consciousness, it is accompanied by expansion. That is, even when you merge here in the body, being in the body, in human form, when you begin to go out through the spiritual channel to the Higher Self, you already feel expansion here. It can even be physical. You may feel like you are taking up the entire room.

Alexander: Yes.

Irina: (Erwin) This is such an expansion. And there is mental expansion when you cannot distinguish yourself from space. You are space. You are the Light. This expansion is merging with the Higher Self.

After the death of the physical body, the final merging of the incarnate and disembodied parts of the Spirit occurs after about forty days. The embodied part of the Spirit, before merging with the Higher Self and becoming the Spirit (this is called “from the Soul to becoming the Spirit”), must lose the last bioquanta of vital energy. Bioquanta is only a conditional name that can now be picked up through a contactee, because your language does not have a name for this energy.

Alexander: Is this some kind of personal strength, personal characteristics?

Irina: (Erwin) Life force is a type of etheric force that is given for embodiment in order to connect with the body and control it.

Alexander: Is it replenished?

Irina: (Erwin) The embodied part?

Alexander: Is this energy replenished regularly, or does it have a certain volume and that’s it?

Irina: (Erwin) It is replenished regularly and spent regularly. Man, as a biological and spiritual being, is an open biospiritual system. Man is the link between the material world and the Spiritual. It contains both.

Alexander: Yes.

Irina: (Erwin) Therefore, there are two ways for vital energy to enter it, and they cannot exist without each other. This is a path from the physical body that occurs through the absorption of food plus the absorption of oxygen. That is, for example, you must take sixteen breaths per minute to replenish your energy. The oxygen you inhaled will react with the substances you ate. They passed through your digestive tract so that energy was released in every cell of yours for movement, immunity, metabolism, so that you could generally be in this brain and see through it, through your eyes, and so on.

During intense thought processes, more than thirty percent of the vital force from the entire body is taken by the brain. When the beta rhythm of the brain sets in, it spends a lot of energy.

Alexander: For imagination, for thinking?

Irina: (Erwin) Not necessarily for imagination, perhaps for solving some logical problems. For some serious conversation. Especially if it is associated with some negative emotions. A lot of energy is spent on negative emotions. Because it is not customary to show them in your society, and therefore you have to spend a lot of energy to hide them.

And the second way to receive vital energy is through the spiritual channel. It is continuously open while a person is in a state in the body, and when a person falls asleep and goes to the Astral, he is also replenished with special energy there. At this time, the physical body is restored, other processes take place in it, some substances that have accumulated during the day are removed, and at the same time the astral body also receives a charge of energy. When they connect, the person emerges as renewed.

Alexander: This happens in meditation, in sensations, if you walk around the body with attention, let's say. I understand.

25:35 "Assemblage point."

Alexander: Let's quickly, if we have a little more time, I would like to discuss the "assemblage point" and the "death defier", there was such a character.

Irina: (Erwin) So, "assemblage point."

Alexander: Yes, "assemblage point". There is a paradox here, so I want to discuss it. The full name is "consciousness assemblage point" or "perception assemblage point." It is believed that this is a point from a set. I have a cocoon, a personal personal cocoon - this is an intricacy of spiritual emanations that form my energetic cocoon. My body and my consciousness are placed here and are called life, like the body is a personality, such a distinguished subject. This is considered to be the illuminated amount of these emanations, energies, flows. They call it emanations. These are conscious fibers of energy. The whole world is energetically conscious and so on. Here is the "assemblage point" on a specific part of these emanations.

That is, I find myself in a certain area, in a certain body, in a relationship, and so on. And at the same time it is said that the “assemblage point” is located on this human cocoon. And, for example, in general, in principle, many seers, Don Juan in particular, used different methods to shift this “assemblage point” in order to change perception. Stopping the dialogue, for example. They smoked, say, grass (they had their own there, they now have ritual ones, peyote, for example, and so on), all sorts of herbs.

It is stated that the “assemblage point” is at the level of the shoulder blades. Thirty centimeters from the shoulder blades behind the back. The nagual could move this “assemblage point” simply by his intention, and the student’s perception would change. He gained clarity of perception, even some abilities. That is, they could even teleport through a certain area, thanks to precisely such movements.

Irina: (Erwin) So he hit him on the back, and he teleported away?

Alexander: It’s close to the back, without touching the back.

Irina: (Erwin) Oh, that is, he waved near the back, and he teleported.

Alexander: Yes. And if he lends him part of his consciousness, part of the accumulated energy and experience. That is, the student himself does not know how to do this, and the nagual is able to show him this experience. Thus, they showed him a lot of different experiments before to show that force exists. At first they convinced. It’s their tradition: no one came of their own free will. They were all found, caught, so to speak, lured, because they had a certain power.

Apparently, that was how people were found at that time. It says that no person can become a magician of his own free will, because it means losing his social life, changing some of his habits, changing his worldview. This means giving up your upbringing, childhood, and so on. There was too much to reconsider in order to move into a spiritual way of life, and so the force pointed, or maybe the plasmoids pointed to the nagual, the person they wanted to attract, and the nagual was already doing everything possible.

That is, he could shift the “assemblage point” for him and pretend, heal. First, for example, infect it with some kind of shifting disease, that is, affecting the energy, then restore it.

Irina: (Erwin) Interesting! Very clever. Give poison, then give an antidote and say: “I cured you.”

Alexander: No, not so that I can supposedly cure you, but in order to show a person that there is a world larger than his social life. Just to show him strength. That there is a bigger world at all.

Irina: (Erwin) What does it mean: there is a world larger than its social life?

Alexander: Social life is principles, foundations, morals that were passed on from parents, from society, values that were passed on. In our society, people are not raised to believe that we have an astral body, that we can travel in the Astral, that we can isolate duplicates, that there are energies in general. They don't tell us that. Accordingly, people need to be rubbed in there, roughly speaking. Make them do it.

Irina: (Erwin) I'm surprised. People go out into the astral world for eight hours a day and don't know that they have an astral body?

Alexander: No. It seems to them that this is all an imaginary world. That this is just a dream, inspired by past life experiences, I just rested and that's it, and everything that happens there is a whole technique.

Irina: (Erwin) So the world in which they live and call it material is also imaginary. He was imagined by that being whose particles are those who imagine dreams.

Alexander: Once again.

Irina: (Erwin) This world, which they call material, is also imaginary. It is imagined by a being, endowing it with density, whose children we are.

Alexander: I understand.

Irina: (Erwin) They also live in an imaginary world. Doesn't everyone know this?

Alexander: Those who watch Cassiopeia already know about this. But just to make sure of this... You know, I even communicate with my friends, having already had my own experiences, I tell someone about energy, they say to me: "What kind of energy, what are you talking about? What are you making up?

Irina: (Erwin) You can ask them to feel your forehead and ask what temperature it is.

Alexander: So, let's say.

Irina: (Erwin) And ask: "Is it warm or cold?"

Alexander: Come on, I'll try. Warm.

Irina: (Erwin) Is heat energy?

Alexander: Yes.

Irina: (Erwin) Where did it come from in your body?

Alexander: The explanation may be physiological.

Irina: (Erwin) Let it be. Let's go physiological.

Alexander: Energy particles are released from food, burned, carbohydrates are burned, and thus substances are transferred along with the blood, the blood itself heats up, and hot blood circulates throughout the body.

Irina: (Erwin) So you need this energy?

Alexander: Yes. Not much without her.

Irina: (Erwin) So, what you now call blood energy and heat energy, some people who in modern language are called esotericists, and in ancient language are called mystics, this energy is called ether. This ether, as esotericists and mystics believe, some people also call them occultists, what are all these words talking about? For example, the word “esotericas” means “inner”, “inner teaching”.

So I’m explaining it to you now, as a materialist. The word "mystikas" means "mystery" in Greek. The word "occultus" already means "secret" in Latin. That is, you see that all these words denote some secret teaching that has existed at all times of human history.

You, of course, will ask what is so secret about it, and what difference does it make what to call it - ether, heat. But the fact is that this energy can be controlled. The energy that manifests in your body as heat, it manifests not only as heat, it manifests in your body as the force that controls the beating of your heart, as the force that controls the acuity of your vision, the acuity of your hearing, the movements of electrical signals along the cerebral cortex.

Tell me, would you be interested in learning how to control this power in order to always be healthy and full of strength?

Alexander: Of course!

Irina: (Erwin) How will the materialist answer?

Alexander: A materialist, if he is open to new experience, will say: “Yes.” And if not, he will say (I just communicate often), materialists often answer me that this is very difficult and

incomprehensible. Too complicated and unclear.

Irina: (Erwin) It's difficult and incomprehensible only because there were people in ancient times who were called ancient priests and sorcerers. They deliberately confused everything, created their own sacred language so that it would be incomprehensible to ordinary people, like you and me. And now there is the Cassiopeia project, thanks to contacts with extraterrestrial life forms. Agree, Earth, the whole Galaxy, can there really be one civilization here? Just imagine how many stars there are in our Galaxy.

Alexander: Yes, that's logical. Let's go back.

Irina: (Erwin) "Cassiopeia" took on such a mission - to tell ancient esoteric mystical secrets that were hidden, in simple language, accessible to everyone.

Alexander: This is great, in general! This is so cool! I don't know, others understand.

Irina: (Erwin) Will he be interested?

Alexander: I am sending links to the Cassiopeia video. Many people watch, many like it.

Irina: (Erwin) Do you think a materialist would be interested in something like this?

Alexander: The question here is whether he will actually move on to practice. Will he start trying?

Irina: (Erwin) This is his will. That is, he can just look if it's close to his heart. He also has a spiritual heart, Soul, desires, need for love, for example, and so on. If he feels that he is interested in it, and his intuition, his spiritual heart tells him, he will practice.

And if he doesn't need this, maybe he came to this world for the experience of material existence, and maybe he should have material convictions in order for him to build something in this world and only then engage in spirituality, then that means , The Higher Self will turn him away.

Alexander: Well, yes. Still, tell me, can you discuss such a concept as "assemblage point"? Is it observed?

Irina: (Erwin) I understand what was said. This is perception. The fact is that some plasmoids, as I already said, see the world differently from humanoids. So, some plasmoids see a person and his biofield in the shape of a ball or an elongated oval, depending on the strength of the energy. They see the most active chakra, where the Spirit's attention is directed, as a brighter point on this ball, which moves along the surface.

It usually comes in a darker color for them. If I now look at the contactee with this vision, her aura color is white-blue, for example, of a certain diameter - about four and a half meters, but this spot is not like a point. The more attention is focused, the larger the stain may be. She has a dark red color and is located somewhere in the area just above and behind her head, because she is now responding through her mind and is focused, she has chips in this area, she transmits information, and here her attention is concentrated.

If you look at her state of consciousness, as you would say, the “assemblage point” has shifted. Why is it called the "assemblage point"? Because the word “assembly” means the assembly of attention. In this case, this is where the energy of the mind is concentrated. What is thirty centimeters between the shoulder blades is thus seen by the plasmoids of that person who is focused on his fourth chakra, on his spiritual heart. They don't know where it's behind or in front, it's just a ball for them.

Alexander: Could this be their special interest in this point? Something personal. In that area of plasmoids.

Irina: (Erwin) Shifting the “assemblage point” helped them get into contact. If they raised it higher, pulled it into the area of the sixth and seventh chakras, they could direct a ray, so to speak, to this point. (Irina) He is now showing me how a white ray enters this point, like a hole.

(Erwin) And already there begin to transmit information, without even removing the human Spirit from the body. But it happened that from a very rapid shift of this point, that is, if energies were applied to the cocoon, then from the point of view of plasmoids, this attention, this point moved, and from the point of view of humanoids, human vibrations increased. Different words describe the same process.

They saw that the point moved upward, to about the top of the head, and they were able to make contact. But if it moved very quickly, the person felt such a flow of energy that he was carried upward, he simply flew out of the body and found himself in the astral world. Very often with those plasmoids in their world that brought him out.

There is such a method of inference, but it is only good for trained people in the sense that they themselves must be astral travelers. And if this is done to someone who does not know how to do it himself, his astral body can be seriously damaged, and he can then get sick. He may acquire mental abnormalities and forms of contact such as hallucinations. Or in general, a person under some kind of stress, under some kind of physical exertion may lose consciousness, his astral body will simply fly out. This can damage the astral body, but if you take out a person who already knows how to do this, nothing will happen to him.

Alexander: There are some kind of teachers there, they are needed in order to do this safely for some specific purpose. For them, in fact, almost everything was aimed at mastering this “assemblage point” in dreams and in everyday life, at fixing and shifting the “assemblage point” in order to preserve this consciousness.

Irina: (Erwin) Yes, a person can do it himself.

Alexander: Yes.

Irina: (Erwin) Only by shifting attention can we, for example, give some specific exercises specifically for fans of this teaching in their terminology. Together with Irina, I can carry them out, how to move this point in meditation almost to the top of the head and enter any world through a spiritual channel.

Alexander: I think it will be very interesting. Let's.

Irina: (Erwin) But only people who have not read this, in my opinion, will not understand.

Alexander: Yes. Anyone who wants to will understand.

Irina: (Erwin) Yes, but Irina didn't read it either. But I'll explain. There is nothing complicated in this terminology, I will simply explain to her what these terms mean.

You need to direct attention, create an image. You will remember that energy always follows thought. And in order to control any energies, it is necessary to direct this thought so that the energy can follow it. The easiest way to do this is with the help of mental images.

Alexander: Some kind of emotional, probably for myself.

Irina: (Erwin) The easiest way, for example, to receive a message from the Higher Self is to imagine that you are walking.

43:32 Technique for accessing the Higher Self from Erwin.

Irina: (Erwin) Now, give me five minutes. Close eyes.

Alexander: Yes.

Irina: (Erwin) Clench your right hand into a fist as if you were holding a torch.

Alexander: Can I use the left one?

Irina: (Erwin) Come on.

Alexander: Let's go.

Irina: (Erwin) What does the torch feel like?

Alexander: Metal.

Irina: (Erwin) Is it burning with a bright flame?

Alexander: Yes. Yellow-blue.

Irina: (Erwin) Now you are already shifting your assemblage point. You begin to switch your attention to the Spiritual world.

Alexander: It turns out that when I create, I move on, right?

Irina: (Erwin) Yes, because when you create an image with your eyes closed, you are distracted from the perception of the material world that comes through your eyes.

Alexander: Yes.

Irina: (Erwin) Further, in order to strengthen this deviation of the “assemblage point” from the midline in which it is used to being on the leading chakra, you imagine that you are not just holding, and other images appear that you, for example, are walking with it with a torch through the cave. Imagine what her walls are like, what color are they?

Alexander: These will be such stone walls, grayish stone.

Irina: (Erwin) Imagine that you are shining a torch on them. How uneven they are. And now imagine that you are inhaling air. What does it smell like there?

Alexander: I have a wet underground tunnel.

Irina: (Erwin) Yes. And now slowly, with your eyes closed, mentally - physically you should not strain - together with this torch, turn to the right, to the left, if you are holding it in your left hand, turn to the left and dedicate the torch to the nearest wall. There you will see an inscription - a message from the Higher Self. Read it.

Alexander: Message from the Higher Self. So, to the left. Knock, knock, who's there?

Irina: (Erwin) What does it say there?

Alexander: It is written: “I am here.”

Irina: (Erwin) Here. What you read, you did not create yourself. It answered you itself.

Alexander: So I turn there with the intention of seeing?

Irina: (Erwin) Yes. You look at the empty wall with the intention of seeing. When it says, “I’m here,” say, “I’m glad to see you!”

Alexander: I can only see the inscription yet, but I’m glad that I see it.

Irina: (Erwin) I'm glad to see you. And then say: “I am glad to see a message from you!”

Alexander: Yeah. I'm glad. By the way, the wall becomes transparent and the inscription hangs in the air.

Irina: (Erwin) Now look what kind of inscription he wants to show you.

Alexander: There are some blue fibers there.

Irina: (Erwin) Here. This is your Light.

Alexander: Mmm.

Irina: (Erwin) Do you have a beautiful light?

Alexander: Yes, he's cool! It feels like being under water.

Irina: (Erwin) And it's you. Do you like yourself?

Alexander: Yes.

Irina: (Erwin) This is what you look like in the Spiritual World.

Alexander: Oh, this is my Higher Self, that is, I came out to myself?

Irina: (Erwin) Yes. You decided to descend through the spiritual channel and appear to yourself in the body.

Alexander: Uh-huh.

Irina: (Erwin) Say: “Thank you!”

Alexander: Thank you! Cool!

Irina: (Erwin) My Higher Self.

Alexander: My Higher Self.

Irina: (Erwin) It is important to thank and love yourself. Great! Dear friends, today we had a conference instead of Castaneda, it turned out to be a session of the Higher Self. One thing leads to another. Yes, he decided to show what it was.

Now Mead was also watching, listening, he sometimes watches me. I didn’t learn anywhere to lead to the Higher Self, I just have curators and that’s it. They teach me. I didn’t learn from earthly people, so to speak. Practically. They teach me. (MidgasCaus) He is now standing, smiling and saying: “Instead of a conference, you decided to show him what an “assemblage point” is, a displacement, and showed him in practice.”

Alexander: Yes. I think it's a cool experience. Show right away how it works. Not just tell the theory, but directly show it.

Irina: (MidgasKaus) Yes, it’s better to see once than to hear a hundred times. You now have experience of what it is.

Alexander: Yes, thank you very much!

Irina: See you again, friends!

Alexander: I hope the Castaneda people will not be offended or upset, but on the contrary will join this.

Irina: I think they will be interested in knowing all this.

September 22, 2021

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Alexander is a conference participant, a fan of Castaneda's teachings;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms;

Erwin is a plasmoid of the 37th density level from the Betelgeuse system, Guardian of the Order of Ice Fire Mages.

#352 Live broadcast. The result of the Interstellar Union's investigation into the activities of reptilians.

---

https://blog.cassiopeia.center/itog-rassledovaniya-mezhzvezdnogo-soyuza-o-deyatel
https://www.youtube.com/watch?v=gXrqw6zawVM

00:05 Introduction of participants. Cassiopeia News.

Maxim: Dear friends, hello everyone!

Irina: Hello, dear friends! We are all here. We are in a new place. In the new Center. Hello everyone! Good evening! How can you hear us? We have a new place and new equipment here.

Maxim: And these are my bolts and nails that fell down. We hung pictures. Hi all! Great. Good evening! Heard well. Hello everyone, dear friends! We will have a very interesting live

broadcast today.

Firstly, we moved to our new Center. We are located outside the city, in a beautiful landscape location. We are on a hillock, from here we can see the flood of the Don. Plus, we have a real lake below. I think that in the summer you will be able to come visit us, swim in the pool, go to the lake. I think so, it will even be possible to set up summer tent camps. But we will tell you about this later. In the meantime, I will be next to Irina.

“Is Mirakh Count coming?” Bergaster is with us today. Today with us are LiSioni, Bergastre and MidgasKaus. The topic of today’s broadcast: “An investigation on Mitya’s instructions is the activity of reptilians, the activity of the Tashigans on our planet.”

Irina: For those who don’t know who the Tashigans are, let’s put it simply – the activities of reptilians and gray aliens, and not only them. Bergastre is now telling me that not only them, but also representatives of all alien civilizations who flew to Earth not only from the Interstellar Union.

Maxim: Irusik, hello too! Hello Khakassia! Hello from Kherson! Guys, our geography is very large, and we are glad that the Cassiopeia project has really gained such a large geography. And I want to thank you all separately for helping our Center, for helping us develop, for helping us move. During the move, two people came to help us. We spent a whole week moving. Nails fell out of my pocket.

People have already stopped by today. Eight people have arrived, and eight more are on the way. We will have them tomorrow. We have just a school of contactees.

Irina: The fifteenth issue is already on.

Maxim: Yes, the fifteenth one is visiting the contactee school. Plus, we have a school “Healing through the Higher Self,” where there is both an educational and health aspect. People come, learn to communicate with their Higher Self, remove blocks. And using the latest equipment, we help them get healthier.

The equipment that our Center has is practically not available in other centers. We have completely new developments. Scientists are making discoveries on this matter, and we already have this equipment, because our mentors and curators have already led us to this equipment.

Irina: Everyone who was at the last Baikal retreat has already experienced the capabilities of this equipment.

Maxim: But there was only testing, we did it on different equipment.

Irina: But it was a certain device. And several people told me that they were examined in other centers using similar devices, but with other specialists, it was a little different, but their schedules were the same. Our specialists, our masters were examined without telling them that they had been examined before and did not show these graphs. And then they were given the result, and they said that everything matched. They even surprised themselves at this.

Maxim: And then they asked: “How do you know?” We know because we have the equipment. In our Wellness Center we have equipment that we call the “Chamber of Light”. Getting into this “Chamber of Light”, the body is completely rejuvenated, the cellular structure and energy structure are restored.

Irina: Yes. “Are you planning a retreat in the south of Russia?”

Maxim: We are planning a retreat in Abkhazia, but we will inform you about this later. I completely forgot to say that we have opened the “Sacral” school. A link to this school is on the website, where a huge number of very interesting teachers work with us, with the Cassiopeia project. These are energy practitioners, tarot readers, runologists, regressologists and many other specialists who can provide you with their knowledge on a donation basis, that is, it is a gift from your heart that you can leave to support the Center and teachers.

“Can we come in winter?” Of course, you can come at any time, guys. We have a specially separate building for those who are resettled, and a separate building for specialists. We set aside one day to swim in the pool and take a steam bath in a real good Russian bathhouse. Basically, I have already said everything I could. I'm leaving the air, off the track. And I completely leave Irina to you. She and our interstellar friends will now talk about the investigation that was carried out.

Hello to Israel too! I take care of it as much as I can! I'm doing everything I can. Irina won't let you lie. Yes?

Irina: Of course, we take care of each other and take care of our project together with you. At the very beginning, we were two of earthly people, we started together. Well, of course, we were not alone, our mentors were with us. That's why he is very dear to us. This is our child, whom we raised, educated, and invested our energy in. Now, together with you, we continue to develop it. I am sure that almost each of you tells people about this, about the information that you learn here, and, most importantly, about how it changes you, what changes in your life. Both this story about your life and internal changes are already changing the future of our planet.

Maxim: Guys, once again with great gratitude for your support that you provide on projects: cosmohealing, cosmoenergetics, meditation, women's practices and many other projects that we open specifically in order to position esotericism, to show that all this is real, that all this exists.

08:40 Project “Cassiopeia” about “black PR”.

Maxim: I would also like to talk about the amount of negativity that has been written about us on the Internet. I'm probably even glad. Why? Because black PR is also PR. So many groups that have begun to unite! I'm glad that we're bringing you guys together. For the fact that you form some interest groups, for the fact that you call “Cassiopeia” a sect, for the fact that you throw mud at it.

You know, that's good too. At least you do it together. One day you were sitting at home alone, and now you are uniting in some groups and starting some kind of military action in order to denigrate our project. Well, that's okay! I believe that the dog barks, the caravan moves on. To the detractors of Cassiopeia, I wish you the best of luck in your growth and development, in increasing your level of awareness and perception of what the Cassiopeia Project is about.

The Cassiopeia project positions the energies of Love, happiness, joy, health, and prosperity. Regarding everything you came up with there, I can only wish you good luck. I'll say goodbye to you. I will be here next to you, I will help Irisha broadcast, because you will ask a lot of questions. And I will try to voice these questions to Irina.

Irina: I also wanted to add that chats and channels are actually being created that are directed not even against Cassiopeia, but against us, the creators, against the leaders, against everything that is said here.

What I want to say is that if a person saw this information and he is not indifferent, he gives some kind of reaction (for example, a reaction of rejection, a reaction of anger or a reaction of fear - everyone has different motives), this suggests that this information entered his heart. And let him not accept her yet, let him laugh at her for now. And ridicule is a defense, as we know. This is protection from some thoughts that he does not want to think about. And this information changes them in any case. I sometimes go to these YouTube channels, where they show all sorts of things about us, not even critical, but satirical things. They are.

I want to appeal to everyone who comments on me, because I know that some are watching me. Dear friends, even from your comments it is clear how you have changed, you don’t even notice.

Mashenka, this especially applies to you. And the videos have changed a lot, and the comments have changed a lot. You watch all our videos, you know that I had a fourth meeting with the phantom of Christ. You are watching us. For this I am very grateful to you, for your attention. And you, dear friends who write comments, know very well, if anyone can hear me, who I’m talking about now. You are actually changing. And you change towards the Light. This can be seen from the comments you give. Just a year ago there was much more anger in them, a desire for us not to exist at all, for us to disappear somewhere. And now it just goes over (although there is still disbelief there - that’s your right), but there is already just a kind mockery. The negativity is already being eliminated. You don’t even notice how your Higher Self brings you to our channel, if only to laugh. I wish you to continue watching our videos, if you want to, of course.

Maxim: Dear Lev Tulyakov, we don’t just believe in those reptilians, we know that they exist. We know that there are phyllinoids, humanoids, insectoids, and other types of races. Plus, Leo, I’ll tell you especially for you that in addition to reptilians, there are also subtle-material civilizations, which many do not see, but feel.

Irina: Yes, they can introduce themselves as anyone.

Maxim: They can pretend to be anyone, they can joke, they can deceive. And even if low-vibration Spirits are embodied in them, they can also do mischief. Therefore, Leo, have no doubt - they exist. And the fact that you haven't seen them is only because it's too early for you to see them.

Irina: I will say that if on the planet of reptilians some reptilian suddenly treats earthlings with fear or disdain, with some kind of negative feeling, anger, then by this he will lower his vibrations. The reptilian planet has its own plasmoid civilizations, and there will be a plasmoid there (we call them parasitic) that will like its negative energy. And, in order to feed him even more negativity, this plasmoid will come to the reptilian in the form of an earthling.

Maxim: Come on, Irish, we'll start the broadcast after all. We will bring people up to date.

Irina: " Do you have a cat?" No, Maxim did not move.

Maxim: No. I didn't move. I also stayed in Voronezh, guys. I will come here quite often. But I stayed in my apartment. And the cat remained there too.

Irina: Here! "At first I felt the same way about you and your activities. Everything has changed". Thank you for your frankness.

Maxim: Yes. This is why our project was created, so that you change your awareness, your perception and increase your level of Love, joy and happiness.

Irish, let's get you up to speed. Why is our topic of investigation today about the reptilian and gray bases?

Irina: Our curators are present with us today. They listen carefully to what we say. They read your comments through me, through the chip, and talk to each other. This is Bergastre from the planet Burkhad, a specialist, the head of the Galactic Security Service in this sector of the Galaxy, where our planet is located. MidgasKaus is a biologist and psychologist, a specialist in alien life forms on the planet Esler. LiShioni is a specialist in astral interactions, curator of the Cassiopeia project. He already has a lot of contacts. Planet Shimor.

Maxim: They are very much asking for any galactic news.

16:22 Violations of the law on contacts with earthlings.

Irina: Bergastre will now report galactic news.

(Bergaster speaks) I salute you! The investigation into the activities of the supposed negative civilizations that Miti from the planet Mantuk mentioned when he met with Irina on Ashtar Sheran's ship has been completed. And also other civilizations that he did not mention. All physical contactees, all bases in the Solar System were checked for compliance with the rules of contact. Civilizations that were not members of the Interstellar Union and the Galactic Federation of Light were even tested, specialists who have visited your planet for the last two hundred and fifty years.

How exactly were they checked? Video recordings in the archives of space expeditions that were provided to the Interstellar Union were checked. In six cases, these records were not provided, and a detailed description was compiled of the reason why they were not provided, for example, equipment failed or something else. This was being investigated. There were also visits to alien bases in the solar system. I myself, together with Ashtar Sheran, even visited abandoned bases, where for decades there was no one except the robots supporting the work. These are not biorobots, but simply equipment.

What did you find out? We found and stopped two serious violations of the Earth Contact Law. First: on the abandoned base of the planet Tashig, which had not functioned for sixty-six Earth years, according to Tashig data provided to the Interstellar Union, biorobots were found that were not listed in the property of this base. These biorobots monitored the devices that created hybrids of humans and Tashigans, with the help of which they performed experiments. A total of thirty-five genetic materials were found that were taken from earthly women and men. Experiments were conducted on them, but we did not find viable hybrids. We only found that these genotypes were not in the Tashiga database, which they provided to the Interstellar Union. At the first physical contact, the so-called gene matrix, the gene code, is removed from the contactee. Data about it is sent to the Interstellar Union database. This is how we recognize contactees. His physical appearance, his place of residence may change. This is for us the most important document of a physical contactee. We recognize an astral contactee by vibrations, which, by the way, also change, but we can recognize changing vibrations. We recognize a physical contactee by their gene map. So, the gene maps of all thirty-five contactees, whose genetic material was found at that base, were not entered into the database as contactees.

We have initiated an open investigation with the authorized individuals of the planet Tashig and their government. Nineteen scientists and their assistants, including spaceship operators who had contact with earthlings in this way, were sent to the planet of criminals for various periods of time.

Maxim: Oh, how interesting!

Irina: Yes. And the second case is unauthorized contacts of the reptilian race. This is a colony of the planet Selbet, not part of the Interstellar Union. But Selbet himself maintains contact with her. This planet is not part of the Interstellar Union due to its reluctance to join and subordinate its policies to the policies of the Interstellar Union. They want to be independent in their politics, although there are no serious violations that prevent them from joining us. This is their own reluctance. However, Selbet is in contact with them. This is the planet Umindron, the Leo civilization, which is located approximately thirty-five light years from the star Regulus.

Maxim: Irin, it turns out that the genetic material was stolen from people?

Irina: They didn't steal them. They took their germ cells, from which they wanted to make hybrids. They were taken, created an environment where they could reproduce, then they divided. There are those who took it fifty years ago, and others who took it recently. They simply maintain their viability.

Maxim: MC is what we call the Interstellar Union for short, guys. And then there is the Galactic Federation of Light - GFS.

Irina: Yes. Unauthorized contact of the planet Umindron is the civilization of the Selbet colony, their humanoids, representatives of their race, together with the Selbet people, visited Earth on their ships. Over the past twenty years, six unauthorized contacts with representatives of the Earth have been identified from countries such as North Korea, China, Japan, Libya, Russia, Brazil, and the United States of America. Cases of contact have been identified that were not reported to the Interstellar Union. This was revealed thanks to the detection equipment that the Interstellar Union installed in ships in order to record the energy characteristics of everyone who entered the ship. Now I'll say it more clearly. These energy ships had chips built into them that stored information. These chips are built into the unit, without which the engine cannot fly, and monitor the energy of everyone in the room. Unlike video, which can be deleted, for example, this data is immutable. To do this you will have to break the engine. And unauthorized contacts were identified on Selbet's ships, on which there was a mixed crew of Umindron and Selbet.

The reasons and purposes of these contacts are currently being clarified. All that has been learned so far is that these contacts were consensual. They did not provide data to the Interstellar Union, allegedly at the request of the contactees themselves, who wanted to remain incognito in this way.

Now this information is checked through special devices that reveal the true motives for the behavior of representatives of the reptilian race. They are on Selbet itself. But, nevertheless, three hundred and fifty representatives of Umindron and Selbet, who were involved in these contacts or knew about them, but did not report to the Interstellar Union, also received various sentences on the planet of criminals.

Maxim: Everyone is punished.

Irina: Yes. They broke the law.

Maxim: Irin, question: how to protect yourself from these creatures and unauthorized contacts?

Irina: (Bergastr speaks) These unauthorized contacts may have generally been by consent and even at the request of the earthlings themselves. They could have been for purposes, not like showing Irina the planet or telling about something, but, for example, taking something from the Earth or transferring it, exchanging some materials. This could have been by mutual agreement, which was still in the Astral. However, any physical contactee must first be approved by the Interstellar Union Contact Commission. His motives are always revealed

there, for example, as happened with Irina.

She did not submit a request for physical contact with Kirchiton; Kirchiton himself submitted it. The Contacts Commission contains those entities that can contact the Spiritual World. Kirchiton provided evidence that he had such an agreement with her before the incarnation. Through her Angel Consultants, with whom the Contacts Commission is in contact, it was possible to initiate such contact without her conscious request. This is exactly from the side of a specialist from the Interstellar Union. If such a desire comes from an earthling, the Interstellar Union must consider it. The goals of earthlings who make contacts with aliens, with interstellar brothers, with your interstellar friends are not always pure, noble, just like knowledge of space. Earthlings have different goals too.

30:04 Planets of criminals.

Maxim: Irina, they ask: “Where is the planet of criminals?”

Irina: We have two planets of criminals. The main one is in the constellation Aries, and the second one is in the Southern Cross constellation. It is smaller in size and located further from the center of the Galaxy and from the planet Burkhad. Used when additional space is required. Because there must be a certain number of inhabitants on the planet of criminals. They get different terms there. It happens that for serious crimes they receive life sentences. They live there without the right to enter the society of the Galaxy. If, for example, several dozen of these appear, plus those who are temporarily there, then the population of the planet may exceed a certain limit. Then the second planet is used for this.

Maxim: Irin, Kirchiton came today and asked where our administrators would choose a flight for you? Maybe let's go to YouTube and ask live? Guys, where would you like Irina to go with Kirchiton on the ship and then broadcast live? Please write here, live, where you would like Irina to fly. Irina has already been many places. We no longer know where to fly next.

Irina: Yes. He visited me last night and asked what we had decided about physical contact.

Maxim: Irina was on Mars, she was on Disara, she was on Burkhad.

Irina: **“** To the quasar.” I don't need to go there.

Maxim: **“** Constellation Cancer”, “to Red Square”. Would you like to go to Red Square, on a flying saucer with Kirchiton?

Irina: **“** To Saturn.” ABOUT! "To the planet of criminals."

Maxim: Listen, it would really be interesting to fly to the planet of criminals!

Irina: I need to not just fly there, just go out, look and come back. I need specific questions that I need to decide what to find out there.

Maxim: “ To Burkhad to Jesus.” Oh, listen! Don't you want to meet in person?

Irina: He told me that there have already been four meetings through a phantom. The physical contact that may be on this island, I can spend on any other place, because I have already communicated with it. Any questions for him? We've already asked four times.

Maxim: Listen, it happened four times through a phantom. Maybe let's really, really try?

Irina: It’s not just going out to say hello. You need to ask something.

Maxim: Ask how to further develop our project. Let him, as a teacher, give some instructions.

“To Jupiter”, “to Taus”. Okay, guys, we understand that you also have a lot of different proposals. Mercury is very interesting.

Irina: (Bergaster speaks) The investigation was carried out at Mitya’s request. Data on all the results of the investigation were sent to him and the government of his planet.

What do you need to understand from this investigation? You need to understand that the evil deeds and crimes allegedly committed by the alien races present on Earth are greatly exaggerated. And all that we have been able to learn over these months through a thorough investigation of almost every contact case is what I said.

Maxim: Yes, it is possible to enter the Spiritual World. We sometimes make requests to Irina so that she can go to the Spiritual World and watch incarnations there.

Irina: “ Futissa”, “Nibiru”, “beyond the Universe”, “to Burkhad again, closer to Jesus”, “on a visit to MidgasCaus”, “Pleiades”.

Maxim: Bergastr, really, how do they live on the planet of criminals? What conditions have been created for them, how long can they stay there?

Irina: (Bergaster speaks) Planet of criminals - I’ve been there more than once. It is divided into different sectors. These are like cities, but they do not touch each other, they are separated by walls. There, criminals are grouped according to different crimes. Together with biorobots and medical workers, and with so-called spiritual psychologists, you call them criminologists.

Spiritual criminologists help them reach their Higher Self and correct the block in their Soul that

led them to crime. It happens that a humanoid has fully realized his crime and got rid of its causes, from the block that led him to this crime (murder, an attempt to start a war, as you call terrorist actions). It happens (on some planets) that nationalist hidden groups are created within the planet, which are supposedly trying to free the planet from the Interstellar Union. Usually such people are condemned by the planetary authorities themselves and sent to the planet of criminals.

If a humanoid corrects his Soul, and this is confirmed by three independent spiritual psychologists who work specifically with the criminal tendencies of intelligent Spirits, he may even be released early or, if the sentence is for life, then this punishment may be lifted. If he commits the same or any other offense again, then he is again sent (forever) to the planet of criminals. And also those who approved his exit are subject to removal from their positions. They are responsible for it.

Maxim: I understand. What are they doing there? Do they work and live? They are kept in our prison, they eat and drink.

Irina: They work there, producing everything they need in special factories.

Maxim: I see. Are they all there together: reptilians, phyllinoids, humanoids?

Irina: (Bergaster speaks) They are all there together, but are divided into sectors depending on the article of violation of the law.

Maxim: So your neighbor could be a reptilian or an insectoid, right?

Irina: Yes. They can move within their sector. They have some group of representatives of the Galaxy Security Service there who are watching (they are not there all the time). Convicts can, with permission, visit other sectors with other criminals, but cannot leave the planet.

Since cruelty, aggression, anger, and many grievances live in their Souls (I am now calling earthly emotions, so that you can understand), together they create a certain structure that may contain conflicts within.

They must definitely work. If he refuses to do this or rebels, the robots simply isolate him in a special room where he does not receive nutrients. His food is limited and he is given the bare minimum. Then they wait until he wants to get out of there. Criminal psychologists have many different ways to encourage an intelligent being to think about his or her behavior.

40:55 Why is there a short lifespan on Earth?

Maxim: I see. Irina, people are often interested and ask: why is there such a short lifespan on our planet? Burkhadians can live for twenty-five thousand years. Why do we only have a

hundred years?

Irina: Which one of them is the question?

Maxim: Bergastra.

Irina: (Bergaster speaks) Such a short life span is due to the state of your planet, your physical bodies, and your social structure. The spirit that incarnates into the body of an earthling makes plans precisely for several dozen earthly years. For him, the Earth is an opportunity for a short life of incarnation, so that in a short time he can solve problems that will help him in the future live a long period of incarnation on another planet. If now an earthling who has not been trained according to galactic standards of education is given the opportunity to live for a thousand years, then in two or three hundred years he will not know how to use this life in the future.

We have been living on more than one planet for several thousand years. We are moving around the Galaxy. We have our own life tasks, designed for thousands of years. And when the planet is not in the Interstellar Union, then the life span is shorter than in the Galaxy in general.

We also didn't have the same life expectancy as we do now. We have already achieved them with the help of both our scientific knowledge and, naturally, agreements with our mentors in the Spiritual World, who are sent for incarnation (Consulting Angels) into precisely such bodies. I summarize what has been said: different planets, different possibilities for civilizations, which means different life spans on these planets.

Maxim: Bergastr, are you physically aging, like us, on your planet?

Irina: (Bergaster speaks) We can pause this process, but it does not stop completely. Metabolism is still slowing down, cell division is still slowing down. But we can significantly slow down this process compared to you. There are special means, energy fields, there are special practices that we use for this.

I want to say that very many representatives of the planet Burhad, whom I know, leave incarnation earlier than ten thousand or twenty-five thousand years. Their incarnation period can be a thousand years, and they come out. But it should be on Burkhad. Either to develop its quality, or to bring something new to our planet. Each Spirit incarnates on a specific planet with certain tasks. And before earthlings think about a long life, it is necessary, during the period of short life that is given to you, to learn to accept this whole life as an opportunity for development, and not degradation. Then you will be given the opportunity to discover how to prolong life.

45:55 Why are there no women among the curators?

Maxim: That's understandable. Irin, why don't you have female curators? Why Zaliatar,

MidgasKaus, LiShioni, Bergastre, Raom Tiyan, and why are there no women?

Irina: (Bergaster speaks) You see, of course, a woman can fly in space and become a curator. This exists on Burkhad, and in the Galactic Federation of Light, and on any planet. Due to the fact that our female representatives very often recognize themselves as guides for other Spirits who come here to incarnate, they still remain, like parents, with their children.

We have opportunities for even small children to be in small groups where they will have second mothers, so that mothers can be in space. You need to be in more or less constant contact with the contactee, you need to devote your time, your energy to this and think about the contactee. He becomes the “second child”. If the curator, of course, treats his contact responsibly. Very often (especially if he is an earthling) contactees and curators establish such a spiritual connection that the curator becomes aware of his whole life, all his relationships: family, work. He gives strength and energy in order to give some kind of recommendation or life advice.

To do this, he must be close not physically, but spiritually. Being close spiritually is even more difficult than being close physically. To do this, it is necessary to direct the amount of mental energy and warmth that the curator has in the Soul to the contactee and include him in the members of his family, figuratively speaking. Men in the Interstellar Union have more opportunities to do this because they have wives (if they are married), who at this time give a portion of warmth and love for themselves and for their father to their children.

If women do this, it will be more difficult for them to do this. There are more men who work in the space industry. A woman must somehow combine these activities. Many do not find this possible and may become too attached to contactees. As a result, their communication with children begins to suffer. Or, on the contrary, they completely refuse to incarnate Spirits through themselves. Our girls, just like boys, are taught in school to communicate with their Higher Self from childhood. And also through the Higher Self to talk with the Spiritual world. Already in adolescence, many of our girls already know which Spirits want to incarnate through them, and talk with them. This is our civilization. Although, of course, there is no ban, few people want it.

50:35 Civilizations on the Moon. The essence of healing. Limis. Eromes.

Maxim: They ask: what civilizations live on the Moon? This means subtle materials. Are there civilizations there?

Irina: Plasmoid?

Maxim: Yes, plasmoid.

Irina: (Bergaster speaks) Yes. On the Moon, as on any celestial body, there are plasmoid civilizations. Specifically on the Moon there are six civilizations of different levels of density. Why six? Why are there fewer of them than on Earth? Because, unlike terrestrial plasmoids, they do not form a biosphere there. They simply maintain the state of the energy fields of the

Moon itself, and there are also Spirits of the elements who create and support the law of conservation of substances of their civilizations. Those Spirits who create atoms are present there to keep it all in this space.

Maxim: The question is: is it possible to ask an alien to heal a person?

Irina: Of course, you can ask. Again, Mead is now telling Bergastre that they understand healing a little differently. Healing is the restoration of wholeness. This is the restoration of the integrity of the Higher Self, the embodied part of the Spirit and body. As soon as integrity is restored, physical health will allow the Spirit to perform any bright deeds in this space.

If for some reason the body becomes ill in such a way that a person is unable to fulfill the purpose of his incarnation: to create something on Earth, to work, toil, to understand the world (knowledge of the world is work). This means that the harmony between the body, the embodied part of the Spirit and the Higher Self is disturbed. Illness of the body only shows this on the physical level, which, I think, MidgasKaus has already told you about. We know that any physical organ is a projection of some spiritual quality. We need to look at where integrity has been compromised. Only through its restoration can the physical body be restored. This concerns earthlings.

To heal the physical body, we have technologies that can recover from your illnesses. If you use this device or a certain substance, you can restore it regardless of the restoration of spiritual structures and integrity. Since these technologies of the Interstellar Union are not available on Earth, their use for an earthling is a violation of the law of non-interference. It is believed that the Spirit, who has a sick body, is called to understand the cause of the illness of his body and bring it to harmony. He incarnated for this. He incarnated on this planet, precisely on the one where there is no Union technology that can eliminate his illness.

Maxim: Guys, if anything happens, come to our Wellness Center. We will look at your energy structures, your physical body. We have very interesting equipment on which we can do this. There is no need to take any tests, no need to suffer. You can come and see the whole thing, right down to the cage. And plus, regarding your health, you can attend our sessions of cosmohealing, cosmoenergetics, Interstellar Union practice, meditation, women's practices and many, many others. There you can try for yourself how your healing process is going.

“What is the largest and smallest limis known to the Interstellar Union?”

Irina: What does big or small mean?

Maxim: I don’t know what big or small means. Limis and eromes are the Spirit of the animal and the Spirit of man.

Irina: (Bergaster speaks) They do not differ in size. They differ in their level of spiritual development. There are limis that are from the first to the twenty-fourth level. Everything above twenty-four is still twenty-four for us.

Maxim: “The sound rumbles.” Guys, this is how our system unit works. Maybe you just need to make a silent system unit or hide it somewhere. We literally have five minutes left.

Irina: In any case, we will decide this issue of where should I fly. This requires questions. That is, first indicate the place, indicate why, and what questions to ask. If the Interstellar Union commission approves this, then, of course, Kirchiton will take me there.

Maxim: Guys, the equipment was made using earthly technologies, according to developments that have been and are still underway. It is now impossible to incorporate these developments into medical standards; it is very expensive. About two million dollars are needed to change medical standards. Plus about 3-5 years of research.

Our equipment is registered as health equipment, not medical. We are not a medical center. We are a health center that adjusts your energy-informational spiritual structure and helps your body heal through new equipment that is certified as a health center.

58:20 Euthanasia.

Irina: “Attitude towards euthanasia.”

Maxim: Come on. Attitudes towards euthanasia.

Irina: This is a question for any representative, because the law of the Interstellar Union is one.

(LiScioni speaking) I welcome everyone. Euthanasia, as we understand this word, is the deprivation of a person’s embodiment at his request due to illness, at his request, at his request, and the assistance of other people in this. For us, this is a form of premature exit from incarnation at the desire of the Spirit itself. This is a form of killing one's body, but, unlike suicide as such, it is not performed by oneself (for various reasons), but with the help of other Spirits. This is facilitating the exit from incarnation, when the Spirit itself, for some reason, does not take full responsibility for its action, depriving itself of life on Earth, but wants to lay it on other Spirits so that they can help it do it.

There are Spirits who find themselves in difficult circumstances, in some kind of trouble, in some kind of illness. In order not to feel physical or spiritual suffering, they decide to completely leave this body. Subconsciously, with the help of their intuition and conscience, they understand that this act contradicts their idea of good and evil, their idea of Light, and then they ask someone to help them in order to share responsibility with him. So it turns out that if euthanasia is consented to by the person who will help him leave the incarnation, then two people will bear responsibility for the premature exit from the incarnation, as for murder: the one who asked, and the one who committed it.

Maxim: Accessory to murder.

Irina: (LiSioni speaks) By this act they lower their vibrations.

Maxim: Guys, thank you so much again! Write if you need to open health centers like ours. I would recommend that you come to us, see what kind of center this is, what we do, how we conduct testing, what equipment we use to carry out health procedures. Only then can you think about opening a center. At the same time, I will tell you how to document, how to become self-employed, how to become an individual entrepreneur, I also give certain lectures on financial literacy and answer your questions.

So, guys, see you later! We were glad to see you and talk with you again. Ask more questions. My personal contacts are on VKontakte, you can write to me on WhatsApp and Telegram if you are really interested in opening a health center or a Cassiopeia school. Be sure to come and see our new teachers at the Sacral School.

We decided with Irina and our interstellar friends not to limit ourselves only to the teaching staff who were trained in the Cassiopeia project, so at the Sacral school there are teachers who have not even been trained by us, but have a lot of experience and work experience in their own field. certain techniques.

Irina: We wrote clarifying questions about euthanasia. “If the children have made a decision, if the person is in a coma and not viable.”

There is such an understanding as disconnection from life support. For example, a person has brain damage (damage incompatible with life). Our technologies allow you to maintain heartbeat, breathing and other functions for a long time. But the brain cannot function; it cannot be brought to its normal state so that the Spirit can unite. What happens in this case? This is a different situation.

(LiScioni says) First of all, someone who is in a coma can no longer ask for anything, at least not consciously through the body. What to do with his body? When I talked about suicide, I talked about euthanasia as a request from a person who is conscious, in the awareness that certain actions of the doctor (an injection or other method of euthanasia) will lead to his death. I talked about a person’s conscious desire to die with the help of some kind of drug, for example, a sleeping pill.

You are now talking about a completely different situation, when a person fell into a coma, a state when he left the body. His body is so damaged that he cannot fully connect with it. But your technologies make it possible to maintain the circulatory and respiratory system without bringing him to consciousness, to restore the brain in such a way that reunification becomes possible. Your technologies, with the help of special preparations and devices, will be able to maintain this state of the body for a long time.

There were cases when the life thread was broken, the Spirit left, and in fact could not return, but the heartbeat and breathing were maintained artificially. What to do with someone who has fallen into a coma? With someone whose brain (according to indications) cannot perform the function of consciousness (according to your medicine)? According to our data, according to our teaching, the brain cannot accept the energy of consciousness so that the Spirit can enter through it, for various reasons (oxygen starvation, injuries, infections, etc.). Maybe there was a

stroke, brain damage. In this case, of course, it is best to contact this Soul, this Spirit through your Higher Self and talk to it.

Maxim: I went on air early.

Irina: (LiShioni speaks) So ask: “What is happening to your body? What should we do? And the Spirit will answer. He has already left the body, he can connect with his Angels-mentors, ask about the period of his incarnation (whether he has already left or not). What should relatives do? He will answer. This is a completely different case. The disconnection of a person in a state of coma, when he cannot return to consciousness because the brain was severely damaged, cannot be equated with the situation when he himself asked to be taken out of incarnation.

Maxim: Great. Guys, I saw something about bifidobacteria. These are not dietary supplements, these are bifidobacteria. Next week we will have a video, under which we will post all the information about the possibility of purchasing them. We have collected all the reports and all the reviews. I won’t say anything, look for yourself on the website for other people’s reviews about bifidobacteria, which were developed together with our friends.

About retreats. We will definitely be doing a New Year's retreat in Abkhazia. Next year we will set up a retreat program immediately after we arrive from Abkhazia. A very interesting program. We will go abroad if the lockdown is lifted. All information will be a little later.

Thanks again everyone! Until new meetings, until new retreats. Come. We are always waiting for you!

Irina: See you again!

October 10, 2021

Conference participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

LiShioni – representative of the planet Shimor, sociologist, specialist in the astral world and its interactions with the material world;

Bergastre is a representative of the planet Burkhad, a specialist in contacts with the Earth, a

specialist in safety in contact situations, director of the security service for contacts with worlds not included in the MC sector of the Milky Way Galaxy;

MidgasKaus is a representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms.

#353 Vedic astrology. How to learn karmic lessons correctly? Compatibility Horoscope

https://blog.cassiopeia.center/vedicheskaya-astrologiya-kak-pravilno-prohodit-kar
https://www.youtube.com/watch?v=WYUSYveF9Ms

00:21 Introduction of participants.

Irina : Hello, dear friends! My name is Irina Podzorova. I am a contactee with extraterrestrial civilizations. Today my curator is present with us - a biologist, psychologist, specialist in alien civilizations MidgasKaus from the planet Esler. And also the Spirit from the 22nd level Alakhiel, who was at our conference on Vedic astrology. Today is the second part of the conference. Dmitry, a Vedic astrologer and volunteer of our project, will ask questions.

Dmitry: Hello, dear friends! I greet dear Alakhiel and MidgasKaus. Today I will continue the topic of Vedic astrology. Can I ask questions?

Irina : Ask. He says: “I greet and send you the Light of my Soul.”

Dmitry: I accept.

Irina : I send you the Light of my Spirit. I wish your vibrations to always be on a divine wave.

Dmitry: Thank you very much. I accept with Love and thank you. In response, I send the Light of my Love.

01:47 Exchange of energies and information at different levels of density of the Earth, Solar System, Galaxy.

Dmitry: The first question, as a continuation. Previously, we found out that the planets are symbols and show actually occurring processes in the Spiritual world.

Planets, like celestial bodies in the dense material world, have a certain structure and are located at a certain distance from the Earth. Do they have any physical effect on people living on Earth, if we do not take symbolism, but take a physical or energetic effect based on the laws of the magnetic field and other types of energy?

Irina : Now MidgasKaus and Alakhiel speak differently, but they say the same thing.

Each planet has its own patrons - plasmoid civilizations that live on it. It may not have inhabitants in dense bodies - inhabitants, but there are plasmoid-type civilizations. They are also in the central star, that is, on your Sun and on all the planets. The influence that plasmoid civilizations have on each other, on other planets, passes through the subtle worlds. Not as a magnetic field, but as the energy of their feelings, desires, and thought forms.

The solar system is a multifunctional and multifactorial matrix in which the planets are embedded as denser visible bodies. But on subtle planes there are more of them.

On subtle planes, the planet is surrounded by other levels of density. Plasmoids live there. These density levels exchange energy and information with each other.

The earth is a full participant in this exchange. The Earth also has its own field, not only the magnetosphere, but other levels of density.

Plasmoid civilizations of the Earth are in contact with civilizations of similar density levels of other planets, the Sun, the Moon and the entire Solar System as a whole, as well as the entire Galaxy. He shows me a spiral, and energy exchange occurs along the spiral.

Dmitry: Does the continuous interaction between each other at a subtle level of all celestial bodies affect the inhabitants themselves, humanoids?

Irina : And star speaks to star.

Dmitry: On a dense level, in third density, are the inhabitants affected by the mutual influence of the planets?

Irina : Through the dense shells of planet Earth, through the lithosphere, hydrosphere, biosphere, noosphere and atmosphere, other levels of density pass through all spheres. So the exchange of energies at density levels invisible to humans affects all its other denser shells, and therefore those who live there.

05:55 Impact of the Moon and Sun on the Earth.

Dmitry: Great. Let's take the Moon. It is closest to Earth. This is a satellite in the dense material world. In addition to these influences, does it exert additional, rougher influences? If we take the energies of the first level, does it influence the Earth and people's lives with these energies? Does the Moon's magnetic field affect it?

Irina : Life on Earth is most influenced by the magnetic field of the Sun. Not the magnetic field of the Earth itself, which is several thousand times stronger than the magnetic field of the Moon, but the Sun. The magnetic field, the magnetosphere of the Sun, has the strongest influence on your planet. Gravity, the gravitational waves of the Sun, also influence the most. Gravitational waves of the Moon are in third place.

07:15 The reason for the effectiveness of new beginnings on the new moon.

Irina: The Moon can be further from the Earth or closer. When closer, it attracts more strongly everything that is on Earth, including people. These changes are microscopic. They can only be recorded with precision instruments that you do not yet have.

During the new moon, when the Moon and the Sun are on the same line, their attractions add up. The attraction from the Sun becomes greater, and a person's blood and lymph flow to the upper part of the body. Metabolism in the brain can be activated, due to this the blood vessels open. Therefore, it is believed that on the new moon it is good to start some new business, as there is an influx of strength.

08:46 Mutual participation of the Earth and the Moon in the ebb and flow of the tides.

Dmitry: Got it, thank you. Consider the ebb and flow of water. Is third level energy involved in these phenomena? The moon interacts with the gravity of the Earth with its gravity, and this is the effect?

Irina : She says that in the ebb and flow of the tides, not only lunar gravity matters, but also the harmony of the movement of the Earth and the Moon around each other and around themselves.

Dmitry: Is centrifugal force taken into account?

Irina : Yes, if the Earth rotated around itself at a different speed or at a different angle, this would not happen.

09:33 People's well-being during the new moon and full moon. Constellations.

Dmitry: Got it. What explains the fact that on the new moon and full moon, when the Moon passes through the constellation Scorpio, if observed from Earth, people's emotional state worsens? What is the reason for this? It's getting bad, it's hard. I noticed this during practice. During the new moon and full moon, people become restless.

For the Moon, from the point of view of Vedic astrology, Scorpio is considered the constellation of fall. This is a symbol. Symbolizes that the passage of the Moon through Scorpio increases the emotional concerns of people.

Irina : The energy of the Earth does not depend on the sign where the Moon is located, but on the totality of the planets. From the influence of subtle civilizations and from the noosphere, that is, one's own mind.

I know people whose mood, on the contrary, improves. They don't even know the position of the moon.

Stars form constellations. Constellations are areas of the sky. The stars that are in the constellations are located at different distances from the Earth and from the Sun. It appears that the points are at the same distance. But they are at different distances and may be from different galaxies. There may be many galaxies in one constellation that are not visible.

When constellations were grouped, they took a bright star and named a constellation around it. Different cultures had different names. We take modern, scientific ones. In India they have different names. In Ancient Rus' - others, etc.

They could call him a man, a hero, a God, an object. The stars did not change because of the name change. It was a patch of sky. There could be other boundaries, but basically it is a bright star and smaller ones around it. Noticeable objects were called constellations.

13:22 The Moon is an amplifier of the influence of constellations. Influence of the constellation Scorpio.

Irina: In the constellation Scorpio there is a star, which in your modern astronomical reference book is called "Antares". There are currently 178 plasmoid civilizations that exist within its boundaries. 42 percent are parasitic in nature. They feed on the darkness of human auras.

The ancients noticed this and named the constellation "Scorpius", and Antares was placed at the end of its sting. They also noticed that emissaries of the subtle worlds came from there. When the Moon is there, it has the ability to reflect, like an amplifier, like a magnifying glass, it amplifies the energies that come from more distant space, from the constellations.

That is, during the period when the Moon is in one constellation or another, this is the most favorable time for contacts with the worlds that are located on these stars. More favorable compared to other constellations.

During the period when the Moon is in Scorpio, all contacts with these civilizations intensify. If a person has some kind of attachment, negativity, portal in himself, which is connected with this negative civilization, they intensify.

I will emphasize that not everyone in Scorpio is negative, 42 percent in Antares. They come to Earth. They have contactors and portals. If the Moon passes, the contact increases by approximately 72-79 percent. Sensation of contact and increased energy intake by 50 percent.

Also exchange. Plasmoids took away negative energy from a person: fear, hatred, resentment, they fill the aura with their energy. They have the energy of aggression, bad, depressed mood. They don't have anything else. They share what they have. That's why it's like this.

Dmitry: Thank you. Very detailed and clear. It’s great that we know this now thanks to you, dear curators.

16:59 Constellations with positive plasmoid civilizations.

Irina : I can tell you how to distance yourself from negative influences, how to attract light plasmoids to yourself when the Moon is, for example, in the constellation Taurus, where there are plasmoids friendly to you in Aldebaran.

Dmitry: Yes, please tell me.

Irina : Also in the constellation Leo - the star Regulus, the constellation Virgo - the star Spica, there are also a lot. There are a lot of galaxies in the constellation Virgo. Contact with plasmoids from these galaxies is intensifying. They have an impact on a person, encouraging him to learn.

Dmitry: Everything fits.

Irina : Therefore, the constellation Virgo was previously associated with the planet Mercury. They were depicted as a girl with a spikelet in her hands. At a time when the Moon is in Virgo, those people who are in contact with plasmoids from the star Spica and with plasmoids from distant galaxies want to create, create, and learn. In the constellation Virgo, if you count the entire projection, there are more than two and a half mega thousand galaxies. All this is intensifying.

18:34 Moon in the horoscope 12,000 years ago.

Dmitry: I see. Exhaustive answer, thank you. The next question is this. It is known that before the hostilities 12,000 years ago, the Moon was between the Earth and Mars, but not as close as it is now. Was this planet considered in symbolism as a symbol of some influences on a person’s life, as a symbol showing certain events in a person’s life? She was not in this place.

How was it taken into account earlier, up to 12,000 years ago? Astrology didn't have it, or did it? Has its influence been taken into account?

Irina : She was like a planet between Mars and Earth. Its position in the horoscope was taken into account like planets. She was a symbol of learning something new and shared the functions of Mercury.

Approximately how Mercury is designated now. Mercury in Virgo and Mercury in Gemini. Its characteristics are labeled slightly differently. It is also called evening and morning Mercury. At that time, the characteristics of the Moon were similar to those of Mercury in Gemini: knowledge, desire for new things.

There were many alien bases on the Moon at that time.

20:38 Tenth planet of the solar system.

Dmitry: Were the other planets the same? Has the quantity decreased? As it was nine, was it considered?

Irina : We are considering in the Spiritual World (Alakhiel is speaking now) the position of the tenth planet, which is located beyond Pluto. The position of Pluto and some satellites of the major planets is taken into account.

Dmitry: Do they influence too?

Irina : Relative to each other is taken into account.

Dmitry: In the Spiritual world, what is the name of the planet that is located beyond Pluto? It is also taken into account, but it has not been opened by us yet, right?

Irina : (Alakhiel speaks) We call her Aisha.

(Mead speaks) And in our language - Nier.

Dmitry: Got it. Amazing. We will, therefore, discover this planet too.

Irina : It is not in the ecliptic plane, it has an additional meaning.

Dmitry: The devices can’t detect it?

Irina : She is not in the ecliptic plane, she does not move through the twelve constellations. It's located differently.

Dmitry: You can't see her from here?

Irina : The constellation in which she is currently located needs to be looked up in the reference book. She is now in the constellation Sculptor, in the southern hemisphere.

Dmitry: Is it inhabited by humanoids?

Irina : No, it is very far away, further than Pluto.

Dmitry: So there are only plasmoids there?

Irina : Plasmoids live in the soil.

22:56 Symbolism of the lunar nodes Rahu and Ketu in astrology.

Dmitry: Thank you very much, very interesting. The next question concerns, using the Vedic definitions of the planets Rahu and Ketu. If we take analogues in Western astrology, then these are the northern and southern lunar nodes, the points of intersection of the Moon's orbit with the ecliptic.

In Vedic astrology there are legends, myths that Rahu and Ketu are parts of the same demon, how they appeared. Much attention is paid to these two planets. The question is: what real space objects reflect the essence of the actions of Rahu and Ketu? What do these symbols show?

Irina : He told me that they exist in Eastern astrology. In Western astrology, planets are reflected that are not taken into account or are partially taken into account. They are not taken into account as much as in the east. This is the position of the planets behind Saturn. They are not in Vedic astrology. Uranus, Neptune, Pluto all stand for the same thing that these two lunar nodes stand for.

Dmitry: Got it. There is no need to consider Uranus, Neptune, Pluto. Rahu and Ketu are enough.

Irina : There are methods that take into account everything: this, that, and the third. There is a combination of Western and Eastern astrology.

25:02 The influence of solar and lunar eclipses.

Dmitry: A more complete system. Fine. Question to our mentors and curators. There are solar and lunar eclipses. In the course of my practice, it has been noticed that during these periods people do not feel very well and they become anxious. What is this connected with during solar and lunar eclipses? Is it considered an unfavorable period?

Irina : It's not unfavorable for everyone, only for those who are energetically weak. This is especially true for a solar eclipse. As I said, the view of the new moon when the gravitational fields add up. Thin-material fields, plasmoid ones, are also formed.

Irina: Plasmoid civilizations send energy from the Sun. It passes through the subtle structures of the Moon. It comes to us already changed if it is an eclipse.

Changes occur in the thin and dense shells of the Earth: quanta in substances begin to rotate around themselves differently. This is the time of the leap, one might say, the stage of the quantum transition. This time is favorable for those who are pure and purified. They receive complete purification of the field and access to a new level.

If there is a negative, then the altered waves of the subtle worlds will act on their field. There will be a cleansing. The blocks may move and he will feel unwell.

Dmitry: Is there an opportunity to cleanse yourself at this time?

Irina : Yes, cleansing. Especially if you approach it correctly. Prepare with the help of the settings of the planet Esler, Burkhad, reading mantras, lighting a fire, contemplating your Soul in meditation.

27:47 Period Sade-Sati. Saturn.

Dmitry: Thank you for your answer. The next question concerns the planet Saturn, which symbolizes certain things. I am interested in the so-called Sade-Sati period. This is the period when Saturn in transit passes through the zodiac constellations closest to the natal Moon. On average, it lasts seven and a half years.

Why do people undergo very serious transformations in their lives at this time? People change their place of residence, start families, and often separate from relatives. Seven and a half years, when a person's life completely changes. This is due to Saturn transiting the natal Moon and nearby constellations. What's really happening? How to live through this difficult period correctly?

Irina : This is symbolism. Every person approaches this period if he is aware. This is a symbol that is in his plan of incarnation. It may not match. Everyone's plan is different: it can come at

the beginning, in the middle or at the end of this period. It may be due to another period, which will be indicated in the natal chart. There will be an indication of this. But we are talking about the cases you mentioned.

Saturn is now a symbol of karmic tests, an exam, testing a person for his spiritual level. This is not a stern father who punishes his son for an offense, but rather an examiner who allows him to advance to the next level in an educational institution.

The moon is a symbol of mother, family, and femininity. Women and men experience this period differently. When it occurs in a person, it is a hint, a reminder. At this time, the plan for its implementation includes passing a karmic lesson, testing, and moving to the next level associated with the family. Before this, he takes lessons, and at the end he passes exams. Final test. If it passes, it goes to the next level.

Dmitry: Is this period associated with family for any person?

Irina : With family, often with mother, sister, wife and daughter.

31:22 Practice during Sade-Sati.

Dmitry: Got it, thank you. How to live it correctly? Give me some advice please. People often ask me. I would like to know your recommendations on how to go about it correctly in order to pass the exam?

Irina : Go into yourself. Put all the members of your family before yourself and pay special attention to women. This advice also applies to men, but first of all, get in touch with women.

Place their images in front of you and call them to you one by one. Set before yourself and ask yourself: “What are my feelings, desires, emotions towards this person?” Then look into his eyes and mentally ask: “What are your feelings, emotions and desires towards me?”

This will be real contact at the level of the Higher Self. Even if people are far away, even if they have already disembodied. If they are disembodied, then their Spirit is, and if they are embodied, then the Higher Self will come to this contact.

To do this, you must enter a state of communication with the Higher Self, merge with your Spirit, and feel like a whole being. Say: “I call upon my entire race in the Light of God.”

Then, one by one, they begin to call according to seniority. You don’t need to remember everyone if you have a large family. Usually those who come to mind. For example, before my great-grandmother, great-great. If you don't know her, you don't need to do this. Call on those you know and interact with.

In this Light that you will be in, if you have any negativity towards this person, you will be unpleasant. When you ask the question, “How do I feel about him?” - you will receive the answer: “Irritation, resentment, fear for him,” or some other negative. It needs to be dissolved.

Ask: “Why the offense?” Forgive. "Why the irritation?" Forgive. If a feeling of guilt comes: “Are you guilty of something?” Shame is a type of feeling of guilt, then asking for forgiveness. At the end, exchange Light. “I send you the Light of my Love. You and I are united in the Light of God.” Mentally hug how to merge. Do this with everyone.

Practice before the beginning of this period, in the middle and at the end, and you will pass this period.

34:58 Positive results of the Sade-Sati period.

Dmitry: Very interesting. Tell me, what is an indicator that the period has been completed correctly and the exam has been passed? How can this be understood in human life?

Irina : New plans, new opportunities, new energies, a surge of energy and a desire to do some new thing. New people appear, new events occur that make it possible to realize your most cherished, but always bright and kind dream.

Dmitry: Thank you very much! Wonderful, very deep. This is what I will tell others.

35:45 Compatibility of people according to the horoscope. Education on Esler.

Dmitry: The next question concerns a different topic, but it relates to Vedic astrology. The topic of human compatibility. This may be "earthly" knowledge, but I'll ask.

Vedic astrology uses a method for assessing the compatibility of psychology and physiology of people. It is based on an analysis of the relative position of the Moon in the birth horoscopes of two people. This is the so-called 8 and 10 Kut system. Two horoscopes are taken, and the relative position of the Moon in these horoscopes is assessed.

Irina : I’ll have to order a quote from you.

Dmitry: (laughs) The question is: do other civilizations use such knowledge, and what is this system based on? How to determine through planets? Is there symbolism used in this?

Irina : In the natal chart, each position of the Moon, Sun, Ascendant and other nodes and points indicates a certain quality, a certain vibration. These vibrations can be compatible with each other in different ways, with the other person's natal chart.

If the horoscope shows incompatibility, this does not mean that you cannot start a family. You'll just have more lessons. It happens. You have met incompatible data in order to accept each other as you are.

Dmitry: Got it. Lack of compatibility is not always a bad thing. It could be a lesson or a task that these two people have been given for this life.

Irina : Yes. It happens that they are perfectly compatible, but do not find a common language. Because these data are at the time of birth. Their character and qualities could change.

Dmitry: Do other civilizations use this knowledge? Question for MidgasCaus.

Irina : Mid! (He smiles and says) We always consult our Higher Self when choosing life partners. Both women and men. Is this person suitable? We have a subject "Psychology of the Spirit". We analyze in detail what the Spirit consists of, how emotions and desires manifest themselves, and how to determine them. "Control" is the wrong word. Consciously manifest them so that they lead to an increase in vibrations.

Do you need such an item?

Dmitry: Of course, we need it. Necessarily. I think this will happen in the future. We need to be given this knowledge. We will try to let as many people know about it as possible. So that the people who determine the education system, course, and school program know. All this will be in demand over time.

Irina : He says that he is ready to help through Irina. Or through any other contactee who imparts knowledge in writing a teaching manual on this subject.

Dmitry: Yes, great. It can be implemented in private schools, no one prohibits it. You can have your own program. A license will need to be obtained for this. And the methodology needs to be done (laugh).

Irina : They also have “Psychology of Family Life,” where they tell children how to properly communicate with their parents, how to understand them, how to get in touch. They are told how to meet the opposite sex, what Love is, how to live in a family, how to conceive, bear, give birth and raise a child. They tell all this to children.

They have a subject, like ours - “Fundamentals of Life Safety”. They have “Fundamentals of the security of the life of the Spirit in the body.” How to manage your body correctly, how to prevent diseases, how to communicate with internal organs, how to understand what they want. Good item?

Dmitry: Yes, great! You can open a school in the Cassiopeia project. Prescribe the

methodology, subjects. I think that there will be no end to people. I think this is the future. We can start by setting an example. Show others that there is demand. This is in demand (laugh). Very helpful.

41:04 Upaya. The role of faith in human life. How to choose your crystal?

Dmitry: Thank you. Next question. This is another branch of astrology. It's called Upaya. Upaya, translated from Sanskrit, means "means". What it is? This section is devoted to describing ways to mitigate unfavorable combinations of astrological factors.

For each planet there is a so-called “corrective.” Pronouncing mantras, wearing precious stones, eating foods, fasting, rituals, worshiping the deities of the planets. You do this, and something in life changes and improves. Harmonizes the influence of planets on life. So it is considered.

Question: what energy processes occur when using correction products? Let’s say you put on a stone and your thinking changes. Or I worshiped the deity of the planet, and something changed in my life. What's really happening?

Irina : (MidgasKaus speaks) Alakhiel will answer now. From the point of view of the Spiritual world, I studied earthlings, I just talked about the school that exists on Esler, and which does not exist on Earth.

These rules that you listed were written during that period of earthly civilization, when there were other technologies. There was another power of faith. There was a different civilization, not a technocratic one. What do you call “mythological thinking” now?

They did not think in illusions. Their thinking was in alliance with plasmoid civilizations, with the Spiritual world. They lived outdoors, close to nature. There were few books. They were rare. Knowledge was transmitted orally. Oral storytelling for children, adolescents and young men - by the teacher. It was written in the form of the Upanishads. There are a large number of Upanishads. Not just the ones that are famous. There are also astrological Upanishads.

Dmitry: 108, considered classic.

Irina : There are those dedicated to astrology. This is how it is translated: “The one who listens to the teacher’s lesson.” Listens to an oral transmission. There was rarely a scroll. This was an oral transmission. This is an opening of the ears, aurally. Processing images through consciousness and hearing. Contributed to the development of imaginative thinking and visualization.

While you said: “I put on a stone - my thinking changed. I worshiped the deity - my life changed,” - all sorts of magical practices that were introduced into astrology were very closely intertwined with each other. They worked better and more efficiently than now, due to the technocratization of the world and materialism.

A materialistic person with doubts reduces the effect of these actions or nullifies them. Have you heard of such a phenomenon as acupuncture treatment?

Dmitry: Yes, the impact on the energy centers of the etheric body.

Irina : Your earthly scientists (England shows Great Britain) have conducted large-scale research. I got to know them through materials from the Interstellar Union.

They took Chinese and Europeans with the same disease and carried out the same treatment, using the same method using Chinese methods - acupuncture. They found that the effect for Europeans is less, almost by a third. At first they linked it to race. Then some of your psychologists and psychotherapists began to guess that we were talking about consciousness, about the power of faith.

What you just said “put the stone on” and so on is good. But these are auxiliary methods to fill your space with high vibrations.

A materialistically-minded person subconsciously does this, because his Light in the Soul still tells him to surround himself with beauty. He can hang pictures, wear beautiful clothes, hang or draw ancient symbols on his car, without even believing in their meaning, just for beauty, amulets, etc.

There lives in him a subconscious desire to decorate his space, raise its vibrations, and deify it. At that time, all this worked better than now, due to faith, due to the absence of doubts, due to imagery.

There were special people - priests, brahmans, astrologers, who compiled an individual list of herbs, food, stones, etc. recommended for a person at a given period of life. Then the time came when this knowledge was hidden from the uninitiated. Why did they do this? They had an interest: to maintain their influence, their significance, their material well-being.

The task of the Interstellar Union is to reveal one truth to everyone. Which is best for you? Your Higher Self knows.

Go buy yourself a stone if you are a fan of minerals. You like their shine, great! You are in good contact with the plasmoids who created these crystals. Go to a jewelry store, look at the entire assortment, listen to your heart. Look at them with an absent-minded gaze.

Imagine that a beam comes out of your chest and illuminates them all. He will stop on one or more stones himself. Come, if possible in this store, ask to hold it. If you feel warmth from him and that he is a living being, he is yours. It will help you raise your vibrations and reduce the intensity of negative ones.

Dmitry: It turns out that through this stone there is contact with the plasmoid that created it?

Irina : Contact with the plasmoid and raising your vibrations when you look at it.

Dmitry: This beauty and harmony delight a person, his vibrations rise. What does such a person get from a plasmoid?

Irina : He receives contact with the plasmoid that created him, or with a group of plasmoids, depending on what mineral and where it was found. It contains the energy of those people who processed it, who found it. The one who processed it held it and put his thoughts into it. Also the energy of the store where it is sold, of the person who owns it, like an egregor. This is inherent in him at a subtle level, in his subtle structures.

50:44 Stages of energetic cleansing of crystals and minerals. Fire in the ritual of purification.

Irina: How to make it pristinely pure, without the influence of people. For some, the influence of people does not interfere at all, and if they are positive people, it even helps.

How to determine this? Take the stone. If you feel the Light in it, it means that Light has been put into it. If you only want to influence it yourself, then you can do this: buy it. First, find out how much it costs and pay exactly the same amount so as not to take change. Or a slightly larger amount, but leave the change to them, if this is possible according to the store's rules. If this is not possible, and you have no other money, then give the change to any poor person. It's like disconnecting from the egregor of this store. This is the first stage.

Second: bring it home. Salt cleanses crystals very well from possible negativity. Take salt (preferably coarse), large crystals. Place this stone or a product with this stone in a glass vessel. From above, on two fingers, it should be covered with salt. Leave it for three days and three nights on the windowsill so that both the sun's rays and the moon's rays fall on it. So that he experiences all the elements.

Then, after three days and three nights, during daylight hours, take it and pour it onto clean paper. Take the stone or product and place it aside, separately. Light the candle fire. Hold the candle and look at the fire so that it is opposite. Read the cleansing fire mantra: "AUM SRI AGNI SURYA JAYA RAM" 12 times.

Put out the candle without blowing on it, but put something in it. Wrap the salt in paper, do not use it anywhere, make a package and take it outside the house, to where they throw out the garbage. From this moment on, the stone will be considered pure, belonging only to you, without influence.

Dmitry: This is complete cleansing, I understand. It was said that the fire should be covered, not blown on. Can I take this opportunity here to ask a question too? I know that you can't blow on the fire and put it out, why?

Irina : You can't do this when you read this mantra. This is cleansing. If you blow on the fire, you will blow away the energy with this wind.

Dmitry: In a normal case, you can put out a fire by blowing on it?

Irina : If not for these rituals, then it's possible.

55:03 Worship of the deities of the planets. The main plasmoid of the Earth.

Dmitry: Thank you. Question. Many astrologers "prescribe" means of correction: worship of the deities of the planets. As I understand it, the deities of the planets are plasmoids that belong to these planets and live there. I would like to know how they receive the energy of worship from people? What does this worship accomplish? How do they respond to this?

Irina : Yes, this is contact with plasmoids. Each planet has not only plasmoid civilizations, but also one plasmoid, which is responsible for all of them, as for the Earth. There are a lot of plasmoids on Earth: earthly elements, natural places, rooms, atmosphere, magnetosphere.

There is a plasmoid that is responsible for everyone, density level 48. They call him Demeter. Her body is several times larger than the Earth. She feels the Earth with herself. She is present everywhere. Anyone can talk to her.

Dmitry: Is there interaction with the main plasmoids that control all others on this celestial body?

Irina : Yes, she keeps order. Like a caring mother takes care of her children and gives instructions to her children. They are at the same time like children and like her employees. So that they properly manage the Earth, nature, and the elements.

57:03 Plasmoid's gratitude for worship.

Dmitry: What does the plasmoid receive when worshiping?

Irina : When worshiping, he receives the energy of thoughts, words and feelings. If these are bright feelings, he receives bright energy. According to the law of exchange, he gives the energy that he has.

Dmitry: Can he give more than he receives?

Irina : He will give as much as a person can accept. For him, a person (his body) is like a droplet.

If it gives more energy, the person will not be able to stand it, his blood vessels and nerves may be damaged. Therefore, he gives so much that he harmoniously receives it. A small piece.

You call God Ganesha, God Vishnu, etc. When a person thanks him, he feels it. To send his joy, love, to thank a person, he “takes a drop of dew” from his skin and gives the person water with this drop of dew. The droplets are called "Divine Nectar".

Dmitry: Is Vishnu also a plasmoid?

Irina : He incarnated in those worlds.

Dmitry: This Spirit? It's clear. Last question for today.

58:58 The reality of myths.

Dmitry: Last question about the myths that exist that tell about the deities of the planets. How do they look? How do they interact with each other? All this in the images of mythical figures similar to people? Myths, how real are they, or are they symbols that people have made up?

Irina : There are different myths. This is a presentation in figurative form of some real events. Either on Earth, among people, or between a person and some kind of curator, a plasmoid. Either a presentation of events in the subtle world, on other planets or in the Spiritual world. All this is in figurative form. To interpret it, to unravel the meaning, you need to know what your ancestors put into this image, what meaning it means.

Dmitry: Do you need to contact a history specialist?

Irina : You can contact MidgasCaus with any myth. He studied it. You can go to LiSioni. They can contact the plasmoids that transmitted this, with spiritual entities.

1:00:21 The science of imagery.

Irina: Esler’s students, in addition to the sciences he named, study the “Science of Imagery.” If we take the Earth, they study why the symbol of God is Light? Why is the symbol of the devil darkness? Why have Light and Dark earned a reputation as images of good and evil? What kind of image is this? Where did this come from? They begin to look at it from the point of view of psychology, the Spiritual world, instincts, etc. They have such an item. MidgasCaus asked me if we have a “Science of Imagery” at school?

Dmitry: I don't know. Maybe in private schools, advanced ones.

Irina : I say: “Partly there is, like literature.” There we look at the images. As on Esler, we do not consider.

Dmitry: I see. I thank our dear curators and mentors. I send you the Light of my Love. It was very interesting today. I think that we will continue in the near future, if you do not refuse us to gain knowledge. I really liked it. I thank you from my heart.

Irina : And I thank you. Thank you, dear friends. Until next time.

October 08, 2021

Conference participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Dmitry – Vedic astrologer, volunteer of the Cassiopeia project;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms;

Alakhiel is a disembodied Spirit from level 22, Consulting Angel.

#354 Archangel Michael about Vedic astrology and the laws of the Spiritual world. Recommendations for astrologers.

https://blog.cassiopeia.center/arhangel-mihail-o-vedicheskoj-astrologii-i-zakonah
https://www.youtube.com/watch?v=-PpUiqU2eaY

00:20 Introduction of participants.

Irina: Hello, dear friends! My name is Irina Podzorova, I am a contactee with extraterrestrial civilizations. Today Dmitry is with us, he will ask questions. Archangel Michael expressed a desire to answer his questions on Vedic astrology and the laws of the Spiritual world. Hello Dmitry!

Dmitry: Hello, dear friends! Hello Irina! Greetings to our dear mentor Archangel Michael! Thank you for the honor of asking him questions and receiving answers from him!

Irina: (Archangel Michael) Let's listen.

01:10 Section “Prashna” in astrology.

Dmitry: Let's start with the “Prashna” section. Prashna is a Sanskrit word. It means "question". This is a branch of astrology that deals with questions. Vedic astrology allows one to answer questions asked by an astrologer at a specific time and place.

Moreover, if you decipher the horoscope drawn up in this place and at this time when the question was asked, then the horoscope shows the answer to this question.

My question is: what law or processes underlie this phenomenon? A man came to an astrologer, asked him about something, the astrologer drew up a chart at the time of the question, read it and gave him an answer. What law underlies this? What phenomenon?

Irina: (Archangel Michael) Greetings to you all! I send you the Light of my Love! This phenomenon is based on direct contact with the curator, who gives the astrologer an answer to the question that worries the person. He can be anywhere and anytime.

There are teachings where certain questions can be asked in a certain place. But initially this is contact with the curator, with the Higher Self of a person or with his Angels, Guardian Angel, or with other curators. When a horoscope is drawn up, the curator mentally shows the astrologer how to decipher it.

Dmitry: I see. Gives knowledge on how to answer. Thank you. Is someone guiding the questioner at this moment? Does it help him to ask the right question to change his life? Someone influences the one who asks the questions, who came to the astrologer so that the person gets the answers he needs?

Irina: The Higher Self, his supervisors can lead him to an astrologer to help him get answers

to his questions.

Dmitry: Can an astrologer, acting through his supervisor, answer absolutely any question?

Irina: Anything within the terminology of this contactee, his knowledge about the world. For example, if you ask a person who speaks Russian what is the main street in the Spanish capital, he will not answer. He has no conceptual apparatus.

Within the limits of his terminological apparatus, his spiritual experience, beliefs, and the internal fullness of the contactee with certain linguistic structures, one can get an answer to any question.

Dmitry: The memory of the astrologer is used, and from this memory he can respond based on what is there, like a contactee?

Irina: Astral contact is characterized by the fact that if the curator invests knowledge that is unknown to the contactee, it will be white noise for him, not perceived or perceived, but at his level of concepts.

Dmitry: Thank you! Is similar knowledge used on other planets besides Earth? Precisely the “Prashna” technique? When someone asks someone, and he answers him using certain techniques?

Irina: In the Interstellar Union there are teachers who do not give advice, but teach students something material. Everyone learns to ask themselves about their life.

Dmitry: Does everyone ask their own Higher Self?

Irina: Yes.

Dmitry: I see. Thank you!

06:30 Section of astrology “Mukhurta”.

Dmitry: The next section, on which there will be questions, is called “Mukhurta”. “Mukhurta” literally translated from Sanskrit means “hour”. This section is devoted to choosing a favorable time to start any activity. For example, a family created at a favorable time exists long and harmoniously. Conceiving a child at this time leads to the appearance of pious offspring. Or, if a business or campaign opens at an auspicious time, it causes it to prosper.

I would like to receive confirmation from the respected Archangel Michael. Is there a law of

dependence of the result of an activity on the time of its beginning?

Irina: Yes, the result of an activity depends on the time it began, but this understanding comes from the Spiritual world. In terms of implementation, there are certain ramifications. They are visible on the Time Tape, it is clear what events these ramifications will lead to.

If you find a branching point and superimpose on real time, which in the material world, the beginning of this event or some process, then it is more likely to follow the path of incarnation faster and will be filled with more blissful energies. If it is backward or forward in time, then obstacles may appear. This is a view from the Spiritual world.

Dmitry: It turns out that this will all materialize?

Irina: From the Spiritual world it is clear in what favorable period it is better to start this business. In the Time Tape you can still see the timelines of other people that are not visible to humans. The course of a particular process, event, the embodiment of a dream in society, in the earthly world, often depends not only on the person, but also on the people around him, on their actions, on their line of events. The person himself cannot take this into account. He doesn't know who will want to help or hinder him. From the Spiritual world this is more clearly visible.

There must be an experienced person both spiritually and in contact with Angels who will do this. In order not to make a mistake, but to have a precise impact on the fabric of reality, so that the flowers of Divine grace are embroidered on it.

Dmitry: Beautiful! I imagined it all. It turns out that this law applies to any type of activity? Is any activity susceptible to this manifestation?

Irina: More significant events. I mean significant events that are important for the spiritual and material development of a person, which will be aimed at increasing vibrations.

There are significant events in a positive sense, and there are in a negative sense. Both events can be significant. In the Interstellar Union and in the Galactic Federation of Light, the time when it is best to begin or continue an action is learned through the Higher Self and through the Guardian Angels.

11:31 A person's influence on his destiny. Synergy.

Dmitry: Great. Mikhail, it turns out that you can change a person's destiny if he knows when to start this or that important activity? Maybe even change something in his life that was not planned if he has this knowledge?

Irina: He will gradually approach the incarnation that he himself planned. If he fulfills his task,

then his mentors, Angels and curators will help him to continue to follow this path, giving him the opportunity to enjoy this life, this mission. They will give him the opportunity to realize not only spiritual goals, but also material ones.

How will they do this? They will arouse in his Soul an impulse of desire to begin some action at the right moment. This is why it is so important to learn to trust yourself, learn to trust the Universe and completely trust God. And remember that the result of our actions depends on both people and God almost equally.

God gives us strength, intelligence and energy to embody material, any natural entities, objects. We accept it with our will, our desire, our energy. This joint action of God and man is called synergy.

Synergy is life in the consciousness of God. No matter what it is called, in any language of the Earth, no matter what name people give it, it is always the same Divine essence. It can be recognized by the active spread of love, joy, life, truth. If you see these signs in some seemingly mythological creature, then that's what people called God. True.

Dmitry: Thank you!

14:24 Joy for the Angels.

Dmitry: Mikhail, you say that Angels guide, help, advise. They do so many things for people. Tell me, please, what can a person, an incarnate Spirit on Earth, do to please the Angels and thank them? How to do it?

Irina: Angels rejoice when people become like them. Then they don't feel useless, unnecessary, they feel united with people. When a Spirit who was below their level joins them, a holiday begins in Paradise. They rejoice and flap their wings.

Dmitry: Great! Thank you

15:30 Obstacles on a person's path. The ability to wait. Naive.

Dmitry: The next question is to conclude the "Mukhurta" topic. When people contacted me, I noticed that some people were able to start something important at a favorable time, which I recommend, and for some, it seemed like obstacles were coming. Who can create obstacles? Why can't a person start activities at this time?

Irina: This often happens when a person is deceived by his desires and rushes to start an activity when the time has not yet come for its implementation. His spiritual mentors, Consulting Angels, Guardian Angel, all his Light curators see this from the Spiritual world and put an eventual barrier to the series of events so that he does not spoil the whole thing with his

haste.

For example, you saw a fruit on a tree, but it was not yet ripe. If you, tormented by severe hunger, pick it and eat it, it will bring you neither pleasure nor benefit. You will only throw away the tasteless, bitter or sour fruit in disgust; this will not make the whole thing grow.

Dmitry: Thank you! Can you explain to people that if something didn't work out for them, then perhaps the time has not yet come to start this activity?

Irina: Let the fruit ripen. It is very important to be able not only to sow wheat, but also to wait until you can reap the ripened grain. At this time, it is very important to pray for the necessary sun and rain, for their harmony, so that this seed in the care and Love of God will grow and bear fruit.

The beginning of any business is a thrown seed. This could be a spoken word, a signed document, the first written word of a great novel, the first flower given to a beloved, still innocent girl, one who has not known the joy of union with a man. Why is she called innocent? Not because she has any guilt, but because she has not yet experienced those feelings that will make her ready for the birth of a baby. "Innocent" is more modern; it used to be called "naive."

"Naive" is a child's state of mind. It happens that a guy, having given the first flower to his beloved girl, who is still naive and romantic, rushes to take action when she is not yet ready. This spoils the whole thing. It even gets to the point where the girl begins to feel fear, wariness and mistrust caused by the guy's haste. Because of this, their relationship collapses and a child is not born.

Know how to wait. Know how to invest your energy and strength into any business. And know how to wait without expecting the result you need. Don't focus on the result. Know how to let the raft go with the flow in order to meet it in another place filled with the treasures of your mind and the wealth of your Soul.

Dmitry: Thank you, Mikhail! I like the way Mikhail speaks. Very beautiful!

21:21 Choice of incarnation and conception of a child.

Dmitry: Question about activities. Does the time at which the intimacy of a man and a woman occur affect the gender of the child, the vibrations of the incarnate Spirit, and health? Does the very time of intimacy leading to conception influence which Spirit will incarnate?

Irina: Astrological systems are created in the material world with the help of material organs. You call it the brain. They are tuned only to a linear perception of reality (linearity, counting in order). From the material world it really appears that certain structures of the Spirit depend on the time of conception.

From the Spiritual world everything is the other way around. The time of conception and the sex of the child are determined in the Spiritual world. And at the moment of conception, the gender is already known to the Spirit who comes to the parents at the moment of conception. At the moment of conception of your future body, you were all present with your parents. You saw them, not physically, but energetically.

What can affect the Spirit? It can have a negative effect if future parents merge with each other not in a state of pure love. If this happened in a state of anger, fear, negative emotions, then conception will still happen, because it is destined for the Spirit. He has such a plan for implementation.

When two cells (mother and father) connect, and the Spirit injects its life force into this cell, if they are in the field of the mother and father in low vibrations, the Spirit will not be able to do it 100% correctly. There will be some distortions. Then, if they were small, the Spirit can level them out, reduce them, completely dissolve them, especially if it is from a high spiritual level. It is very important to be in harmony at this moment.

Human conception is a great sacred sacrament. Ideally, as my very good friend Krishna, who will be tomorrow, said (he already knows, I told him, we have already talked), he told his lovers who were looking for intimacy with him in the body on Earth: “I can spend every a drop of his seed only for the conception of an Angel or for one who in the future can become one.” He had such an ideal that it was a very valuable substance.

Why did he say that? Because ideally from the Spiritual world, every conception is sacred. And I personally know people who made such contacts for the birth of a child more consciously. I don’t blame people at all for making a different choice. I am simply saying that any act of union between a man and a woman, which may be accompanied, at least theoretically, by the conception of a child, must be carried out in a state of sacred awe, delight and expectation of the Spirit.

At least in love, acceptance, and not when two people quarreled, seemingly loving each other, but not knowing how to accept the other for who he is.

Dmitry: And if, let’s say, the Spirit introduces life force, conception occurred, and the parents had low vibrations at the moment. He cannot level out, compensate. What do these low vibrations affect? For the health of the body? Or what?

Irina: This affects the formation of all organs of the body. First of all, the brain, heart, skeletal system, as well as the psyche of the Spirit, character. This can give rise to a feeling of danger and fear in him. Feelings of anger from his father, who, for example, in a fit of his feelings, showed some violence towards a woman, may be transmitted to him.

This can cause hidden irritation and aggression, which will manifest itself in childhood. Then parents will have to compensate and correct this. Imagine that you planted a young tree, and while the sprout is small, it begins to grow in the wrong direction; in order to correct it, you have to make an effort.

Talk to MidgasCaus. At their Esler school, children are taught the subject “Family Psychology,” including “Culture of Conception, Birth and Raising of Children.” This helps the entire civilization to follow the path of Light.

Dmitry: I would go to such a school now and teach myself. Michael, please tell me, how long before conception does the Spirit of a child choose its parents? If you look from the point of view of the material world. Can he choose his parents before they even meet?

Irina: Yes. He can choose them before they meet, or after. This time is individual. They show him his parents. Several people whom he is suitable for, and he chooses from them whom he wants to go to. If this is Earth, and he chose his parents, he is shown a specific mom and a specific dad. This could be a specific man and woman who may not yet know each other.

He himself, especially if it is a high-level Angel, can come to them, try to build a series of events in such a way that they meet, so that they develop sympathy or love, so that they come into contact, and he can enter the body.

Dmitry: Great! Thank you for this precious knowledge.

31:12 Nimitta section. Signs, warnings.

Dmitry: The next section that we will look at is called “Nimitta”. This is a section devoted to the interpretation of signs.

It is believed that if you think about a relationship with someone and see a cat and a dog, then this indicates that this will be a collapse in the union, in this relationship that you are thinking about.

If, for example, a cat crosses the road from right to left, then this is considered a bad sign. You need to cancel the meeting and not go to where it happened. Or, let’s say, seeing a rabbit or hare while traveling is also a very bad sign. An equally bad sign is to see a crow standing on one leg or preening its feathers. This is in mortal danger.

Lots more. If your chin itches, this means an increase in income; if your nose, on the contrary, means failure. Question: Are there signs in the waking state?

Irina: Of course. “Once upon a time there was a black cat around the corner, and the whole house hated the cat.” Do you remember?

Behind each sign there are some specific symbols that were most likely passed down orally from generation to generation. Each one needs to look at what it meant in ancient times. Then people tend to convey experience, but they could forget the original meaning of some event, lose it in the process of transmission. Then it all turned into a bad sign.

For example, take a crow preening its wings. Where did this sign appear, and why is it about mortal danger? This is explained quite simply. This appeared around the time when Krishna lived. Maybe even a little earlier, in an era of very frequent wars. Especially in the middle zone, where the climate is like in Russia, there are a lot of crows. If there was a battle, a skirmish between small tribes, they killed a certain number of warriors. Someone was wounded and he also died. The winner did not bury the corpse of his enemy. There was no need to do this. He left it where it was. If it was a robbery, he would take a bag of coins or something else from him. If there was a girl with him, the winner took her with him. But the corpse remained. After 3-4 days, many crows flocked to this place to consume the food that was there.

They came from all over the area, there were quite a lot of them. Especially if there was a place with a lot of people. Crows have such a feature, which ancient people also noticed, that, having eaten, they fly a little to the side and begin to clean their feathers and put themselves in order. They flew away from the battlefield or from the place where robbers often attacked. This place could be invisible, for example, behind bushes. Crows could sit on the road and preen their feathers.

The walking traveler saw that the crow was preening its feathers, but could not have paid any attention to it. But this was a sign that there was a dangerous place nearby, where robbers attacked. Usually, robbers could come to the same place and hide in ambush. And the traveler also became a victim of robbers. And the crows were already flocking to him.

People noticed that if a crow was sitting, there might be an attack, but then this connection with the battle was lost. It remains that if a crow cleans its feathers, then this is a sign of mortal danger. And so it was. Have I explained this?

Dmitry: Yes. It turns out that knowledge is the accumulated experience over many millennia. This knowledge was tied to certain places and events. Now it can be applied to everything, to other places.

Irina: The original connection with the event was lost. They simply said: “Son, if you see a crow preening its feathers, it’s better to turn to the side and go another way, further away. Or, in general, go back." They said so, but they didn’t mention why they needed to go back. A connection was formed.

Dmitry: Got it. Michael, please tell me, can an Angel send a sign to a person? What signs do they usually send? Let's say a person is waiting for some kind of answer from an Angel. Or he doubts something. Can the angel give him some advice?

Irina: It’s always very individual. There may be a word in a book, a person will pay attention to it. There may be a set of numbers that have a certain meaning for him. For example, the time on the clock will be made up of identical numbers; an Angel can send a thought or desire to a person at that very moment to look at the clock. And so several times so that the person understands what this message is about, depending on the symbolism of the numbers. To decipher, it is better, of course, to ask the Higher Self.

If a person reads a book and watches a movie at the same time, it happens that he reads a word and at the same moment hears it on TV. This could be a clue; this is exactly the kind of event that the Angel could have set up.

Dmitry: Are events sent by Guardian Angels or mentors? Who usually?

Irina: And Guardian Angels, and mentors, and curators: humanoids, plasmoids, whoever.

Dmitry: I see, thank you! Can a person see a sign in a dream? Can he be warned about future events? Who does it, and does it exist?

Irina: Yes, they can warn you about events. His Guardian Angel or Higher Self, who are in the Spiritual world, can show some negative branch of events and signs so that he does not do this, does not go there.

For example, the Angel or the Higher Self of a person knows that it is dangerous to sleep in a certain place or go there. They can show in a dream that a person is dying there, and if he does not go there, he will avoid it.

Dmitry: Surely, so that a person understands this, it will be shown for him?

Irina: Sometimes it happens unambiguously, sometimes it happens in the form of symbols. Depends on the individual perception of the person.

It happens that the Higher Self shows through dreams some problems with the physical body. A person may constantly have the same dream several times a week. For example, he choked on a fish bone. The Higher Self hints at examining this area. A man is being examined and has a throat tumor.

Dmitry: The Higher Self prompts.

Irina: She knows that this exists, but has no other means of communication.

Dmitry: Can all people see such a sign in a dream or only those who are at high vibrations? Or is this available to any person if the Higher Self wishes to convey it?

Irina: If the Higher Self wants to convey it, it will convey it to any person at any vibration level. How much a person hears and understands will depend on his level of awareness, desire, and courage. Some people just don't want to notice.

42:40 Section “Goals”. Seven Divine Sages.

Dmitry: Thank you! We have passed this section. The next section is called "Gola". “Gola” is a branch of observational astronomy, also related to Vedic astrology. It all started with astronomy, with the observation of celestial objects.

This question: in the famous Vedic literature, saptarishis are described, this is a term in Sanskrit. Translated: “seven divine sages.” Vedic literature connects them with human origin and knowledge. Their names are: Gautama, Bharadvaja, Vishwamitra, Jamadagni, Vasishtha, Kashyapa and Atri.

These seven sages are considered the creators of the Universe and the progenitors of all people. Why do I attribute them to astrology? In Indian astronomy, the seven main stars of the constellation Ursa Major are named after them. Who exactly are these seven wise men?

Irina: These are the ancestors of the tribes. Some of them are sages in the tribes that existed after the war 12 thousand years ago, when people began to multiply, spread across the Earth, and break into tribes. Some tribal leaders and priests were called clan leaders, ancestors. Those from whom an entire clan or nation descends.

In ancient times it was believed that the son comes out of the inside of the father. If such a son became the leader of the tribe, then his father automatically became the ancestor. It was believed that the entire people, for example, take the Israelites, came from the seed of Abraham. A piece of it was transmitted to each of the Jews. Energy cast of DNA. There was no such terminology then, but the essence was the same.

Dmitry: Thank you! Michael, tell me, what is the connection between these ancestors of the tribes and the constellation Ursa Major? Why are their names associated with the main seven stars? Why with the Big Dipper? This constellation is called Saptarishi graha.

Irina: The names of the constellations in India appeared approximately 1500-2000 years after the war. The constellation of the northern hemisphere is non-setting, located close to the celestial pole, i.e. from the highest point in the sky. It is very noticeable, easy to find in the sky, and the stars have been named as the most important, the most noticeable.

Dmitry: I see. The most notable stars were named after the most important, notable people.

Irina: A person strives to define everything in familiar terms. Some people designated this constellation as a bear, others as a cow, others as a ladle, and others as a cart with a horse.

Dmitry: Thank you!

48:17 «Ranshkaka» civilization.

Dmitry: The story from Srimad Bhagavatam about Maharaja Dhruva. He is the son of King Utanapada, who received a planet called Dhruvaloka as a gift from Vishnu. It is described that this planet is the center of the Universe, around which all the stars revolve; judging by the description, this is the North Star. It is described in the Vedas that the planets of the solar system, all the stars, revolve around the planet of Dhruva Maharaja, the Polar Star.

My question is: has Polaris been explored? Who is Dhruva Maharaj? How is he related to this star?

Irina: There is a civilization that lives there, what you call the North Star. It is not part of the Interstellar Union. Member of the Galactic Federation of Light. Its name is in the galactic language of Ranshkaka. There live creatures like people, but with legs like grasshoppers. These are not grasshoppers. They evolved from some semblance of large flying creatures, somewhat similar to bats. You don't have such animals on Earth; they look like insectoids, but are warm-blooded.

This is a closed civilization. You can get information about her, but they don't really let anyone into their world. As far as I know, they have no contactees on Earth. Maybe there are astral ones, but I haven't met them.

Dmitry: Is this one of the planets in the system of this star? Or the North Star itself?

Irina: One of the planets. She is the eighth from the star. These creatures live there, they can rise into the air. Their body is brown and they have wings. But they no longer know how to fly, it's just an attribute. Lost the ability to fly as their physiology changed. They have gained greater body mass. Those cavities that were filled with air have now disappeared, giving way to the nodes of the nervous system, which performs a function like your brain. The rational Spirit is embodied in them.

Dmitry: Thank you! Is the North Star itself the center of the Universe? Why did ancient people call it that?

Irina: The center of the Universe for our Milky Way Galaxy is the center of the Galaxy. The North Star is the point around which visible constellations revolve. The sky rotates when a person looks up. This is a person's perception. In different eras, the role of the North Star was performed by different stars. Once upon a time it was Vega. A very bright star, everything revolved around it. This is approximately what happened during Krishna's time. In a few thousand years, this Polaris will be Thuban Alpha Draconis.

Dmitry: I see. Thank you And what connection does Dhruva Maharaj himself have with this star? What does it mean that he was given this planet? Is this a symbol of something?

Irina: If you gave us a planet, that means you gave us an embodiment on it.

Dmitry: So that's what it means! Got it, thank you. From an astronomical point of view, when

viewed from Earth, all stars and groups of stars are located in the northern or southern hemisphere of the celestial sphere. The constellations of the southern hemisphere cannot be seen from the northern hemisphere of the Earth. We can only see the constellations of the northern hemisphere. And the civilizations of the Interstellar Union, first of all, which come into contact with us, such as Burkhad, Tumesout, Esler, Shimor, Disaru, Futissa (this is the Galactic Federation of Light, but, nevertheless), Tashig, Selbet, Daraal, have central planets in the northern hemisphere of the celestial sphere. What explains this? Is there any pattern to this?

Irina: Planet Tikht in the constellation Sculptor. This is the southern hemisphere. It's just that this part of the Galaxy is more populated for the reason that everyone was grouped around Burkhad, Futissa, etc. In the southern hemisphere there are planets that are also part of the Interstellar Union, the Galactic Federation of Light, but there are really fewer of them there. Now there are colonies of many planets there.

Dmitry: It turns out that this is connected with Burkhad? Did you try to colonize and populate those planets that are located in the same part of the celestial sphere?

Irina: All civilizations that were annexed to the Interstellar Union were relatively close to each other.

Dmitry: I see, thank you!

56:23 Help to an astrologer from the Spiritual world.

Dmitry: Final question: can consulting angels help an astrologer advise people? How to properly tune in to a consultation in order to get their help?

Irina: The same rules apply here as in contacts with other curators. You come into contact with your Higher Self and ask to invite a curator from the 22nd level of the Spiritual World, a disembodied Spirit, for example, your own mentor, to contact you. Every person has it, usually even several. Be sure to say the goal. For example, for the exchange of information and energy. You need to invite and listen to your feelings. You will feel its presence, energy or see Light. Everyone feels differently.

As soon as you realize that you are not alone, say: "I thank you, my mentor, for coming. Please tell me your name." When he speaks, you will hear it not with his voice, but with his thoughts. Say: "Thank you for coming, I send you the Light of my Love." And ask a specific question. The more specific the question, the more specific the answer will be.

Dmitry: During the consultation process, the astrologer needs to give answers that require intuitive understanding. Somewhere even he doesn't know, but he speaks. Feels like he needs to say that. Is it possible to receive information from Consulting Angels during the consultation process?

Irina: Learn to do it without a visitor first. Get used to its energies, get used to its vibrations. Once you adapt, you will understand how your contact is going. During the consultation process, you can mentally invite the Consulting Angel through your Higher Self and ask. With the person's permission, you can contact his mentors. It is better, of course, if it is through his Higher Self. If you are doing an astrological consultation, you can invite your mentor and his mentor through your Higher Self. The two of them will talk.

Dmitry: Thank you, wonderful! I think this is how consultations should be conducted. This will bring maximum benefit.

Irina: As soon as the mentor of another person comes, it is also necessary to thank him, send him the Light of Love, ask his name. Say: “I thank you for coming, I know that it was you who made the implementation plan for this person. We are interested in how this plan was realized through the horoscope, what does this mean? What interpretation will you give? They are usually happy to provide clarification that will contribute to the spiritual development of the person they are mentoring.

Dmitry: Thank you!

1:00:21 Recommendations from Archangel Michael to astrologers.

Dmitry: Dear Archangel Michael, what would you like to wish to all astrologers of the Earth when working with people? What recommendations should you consider?

Irina: Hello, dear friends! I would like to wish all astrologers on Earth to remember that any star is a reflection of the beauty of the Supreme Creator of all worlds, His wisdom and Love. Any star is controlled by divine energy and will in the form of the will of the representatives of plasmoid civilizations who agree with it, who collected these beautiful balls shining with Light and warmth from the primary substance of the Universe.

Remember that the symbols of planets, stars, aspects, signs are letters and words from which you can compose a text for each Soul of a person who comes to you. And, the main thing is that you do this with Love for each person, without bringing him destructive emotions, fear, guilt, helping to develop in him the Love of our common Heavenly Father. May the grace of the Holy Spirit and the source of energy of all worlds be with you.

Dmitry: Thank you and accept the blessing. I am very grateful to Archangel Michael for honoring us with his appearance today and answering these wonderful questions. The answers were even better than the questions.

I would like to wish on my own behalf to all astrologers of the Earth to bring the Light of their Divine Love to those who are looking for it, who need it, so that you will be real conductors of Light. We have always pleased the Angels by doing the work on Earth that Angels do in the Spiritual World. These are wishes from me. Thank you again, Mikhail! Irina, thank you!

Irina: Thank you everyone! Thank you, Dima! Thank you, Archangel Michael! Thank you, dear viewers, for being with us. See you again, friends!

Dmitry: See you again!

October 15, 2021

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Archangel Michael is the guardian of the Christian egregor, patron and curator of the Earth in the Spiritual world;

Dmitry – guest, astrologer.

#357 Numerology of colors by date of birth. How does color affect a person? Calculation of the Life Task.

---

https://blog.cassiopeia.center/numerologiya-cveta-po-date-rozhdeniya-kak-cvet-vli
https://www.youtube.com/watch?v=4i1xw8OsacY

00:00 The influence of color on a person during sleep.

Irina : The color and vibration of this Light helps you see your life task and not deviate from the path. It is very good to sleep on bedding that is a single color or the dominant color of your life task.

Olesya : Wow!

Irina : It’s good to make the fabric of the pillowcase that you put on, where your head lies, in a color that is responsible for your astral body, then it will quickly separate and retain consciousness longer.

If you are sick, the color of the blanket you cover yourself with may be the color of your physical body. This will protect the energy vibration of your body, throughout your entire body. This color will suit.

In order to quickly follow the path of spiritual development and feel this path, you can generally make the entire bed the same color as your life task.

Conference participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Olesya Smelova - administrator of the YouTube channel, Cassiopeia Level and Cassiopeia Color project;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms;

LiShioni is a representative of the planet Shimor, a sociologist, a specialist in the astral world and its interactions with the material world.

#359 Alien medical technologies. How to boost immunity? Nanorobots, extraterrestrial chips, brain.

https://blog.cassiopeia.center/inoplanetnye-medicinskie-tekhnologii
https://www.youtube.com/watch?v=Aw_QR7ftCZY

00:18 Introduction of the participants.

Irina : Hello, dear friends! My name is Irina Podzorova. I am a contactee with extraterrestrial civilizations. Today my curator is present with me - a biologist, psychologist, specialist in alien life forms MidgasCaus from the planet Esler, a doctor named Peter asks him questions. Hello, Peter!

Peter: Hello, dear friends! Hello, dear viewers! Greetings Irina, greetings Maxim, greetings MidgasCaus! My name is Peter, I am a neurologist, a former military doctor. It so happened that in my life from early childhood there were manifestations that can be attributed to the manifestations of the Spiritual and subtle worlds, and I still see them in my profession.

Not so long ago I completed training at the Cassiopeia school, literally the other day. Taking this opportunity, I would like to express my deep gratitude and gratitude to Irina, Maxim, all the staff of the Cassiopeia Center, spiritual entities and representatives of other civilizations who took part in our training. For that unique knowledge, and most importantly for the unforgettable spiritual, emotional atmosphere that permeated the entire process. Thank you

Irina : Thank you! I remember how you studied, and I thank you for supporting us all with your kind words, your very warm, bright energy and your optimism.

Peter: Thank you! Can we move on to the first question?

Irina : Yes, Meade says hello to you.

02:26 Health care system in the Interstellar Union.

Peter: Greetings! I want to ask a question to Mead. What is the structure of the Medical

Service of the Interstellar Union using the example of the entire Interstellar Union or a separate civilization. Step by step, starting with obstetrics, and further in the process of life, until withdrawal from incarnation. How does medical care occur, what does it consist of?

Irina : (MidgasKaus speaks) Greetings! Our medical facilities are on planets, at bases on other planets, and in space at space bases. During an expedition, there is always a medical specialist on board the ship. Unlike you, we have many robots in our medical institutions. They participate in almost all medical processes, starting from birth. I can take, as an example, the planet Esler. On other planets it is practically the same, with slight variations that are characteristic of one or another race.

On Esler it is customary to give birth to children while at home. The husband, mother or anyone who will be nearby can help the woman in labor and the baby. Due to her physiology, due to the fact that every girl communicates with the Higher Self, with the Soul of the child, from childhood, this help is required very rarely. Our race is characterized by the fact that our women give birth to children quite easily.

On other planets where intelligent life evolved from creatures similar to your primates, there are times when help is needed. The child is born more helpless. There are special houses, just like you have a maternity hospital. It is large, and each woman who is admitted there is assigned a separate specialist. It could be a robot, a specialist from her planet, or an alien specialist.

In the Interstellar Union, in any medical institution (for example, on Esler), not only an Eslerite can work, but also a specialist from any other planet of the Interstellar Union and even the Galactic Federation of Light. The Galaxy Medical Union is an association that does not bridge the boundaries of political unions. This is a supra-political structure, like all scientific associations. Our medicine is part of our science. Our science about the world around us, naturally, is not separated from spiritual knowledge; we have it all together.

What kind of doctors do we have? There are surgeons and traumatologists. You can get injured in space. There are specialist psychologists who help determine the spiritual cause of the disease - psychologists of the Spiritual world. It’s like your Higher Self specialists, only they additionally have the ability to see this spiritual reason. They don’t voice it, but help the humanoid they addressed see it.

All medical institutions are directly subordinate to the Government. Private medical institutions exist only on some planets, but they are also under control. There is a government commission. Only those humanoids who pass special, more practical tests are hired there. A student (what is your name) who has graduated from an educational institution to become a physician speaks before a commission of physicians (usually 5-7 physicians who already have at least 20 of your earthly years of experience). They offer him to examine the patient, make a diagnosis, and prescribe a certain set of treatment. Or even take him to the Higher Self. They will decide whether to accept him into their community or not. If they decide this (they do it by voting), if everyone agrees to accept it, then this student must work for three of them. They are responsible for it.

Some time passes, he practices, and becomes a specialist like them. First he is a beginner, then he gains qualifications. After acquiring qualifications (it depends on the percentage of

successful, as you call it, medical histories, but ours is not a medical history, but a history of disruption of the energy-informational structure, including the physical body), doctors of the Interstellar Union participate in training others.

Who has the right to study to become a doctor? The one who was still a child (in his middle cycle of education) chose the science of man, the humanoid - anthropology. They study it more than the science of the Cosmos, technology, art, the Spiritual world, etc. This specialization begins in childhood.

Doctors, naturally, are constantly in contact with each other and with doctors from other planets. They can contact, fly in and discuss some cases together at any time. Doctors' assistants (in your country this is called nursing and junior medical personnel) have practically been replaced by robots.

This is how our healthcare system works. In terms of the availability of medical workers: according to our standards, there are 50-60 doctors per thousand population, which is on average. They mainly practice preventive medicine. It depends on the planet. If the situation on it is more unfavorable due to some disease, then this number increases, because they fly in from other planets to help solve this problem. Conversely, if there are medical workers who do not have jobs even in the field of preventive medicine and teaching, they fly to planets where their work is needed.

Our medical worker is a very respected and significant profession. It is associated with constant movements in Space. The ship's crew must also include a medical robot. For 15 crew members on average, according to the rules of the Interstellar Union, this is for anthropomorphs, there should be 1-2 medical robots and one doctor. He must have a specialization not just as a surgeon, a therapist for spiritual reasons, but also know all of medicine, like a general practitioner.

On the bases of other planets, including on Earth (for example, on our Esler bases on Earth), since it is considered a high-danger planet for some reasons, for every 50 humanoids there should be one medic and four robots with appropriate equipment. This is the rule.

The professions of doctors are very well paid by our Government. Their prestige rises in society. The salary level depends on the qualifications of the doctor, which (as I said) in turn depends on the percentage of the ratio of successful and unsuccessful cases of maintaining a medical history, and necessarily patient reviews. All this affects his qualifications, which means his place in the hierarchy of doctors and, accordingly, earnings and respect in society.

Peter: Thanks for the answer! I started my career on the island. I was alone, I had three thousand people. I felt like I was on a very remote base because when there were problems with the weather, I was completely cut off from the mainland.

Irina : One doctor for 50 people, that’s not bad.

Peter: I was with 3,000 people.

Irina : And for 50 people, is that not bad?

Peter: That's great. This is the ideal state to strive for.

Irina : They already have the opportunity to pay attention to prevention and education. They not only treat, they can give lectures on health to them.

16:08 Availability of the healthcare system in the Interstellar Union.

Peter: I understand. Then the next question, if I may. Are there any legally approved measures to monitor and maintain the health of civilization? I mean medical chips, vaccinations, mandatory examinations, medical examinations, that is, what is legally approved either in the Interstellar Union in general, or somewhere on a separate planet or civilization?

Irina : (MidgasKaus speaks) The Interstellar Union has left freedom in this matter. There is only a general, most important Law, which is included in the Constitution of the Interstellar Union, on the universal availability of medical care for absolutely everyone. Belonging to the Interstellar Union gives the right to receive full medical care on any planet, and payment for this is transferred by the Government.

When a citizen of a planet that is a member of the Interstellar Union is born, the Government puts certain funds into his virtual account for his future: treatment, rehabilitation, restoration, prevention - everything that is included in medicine. Just like, for example, you allow everyone to walk on the roads. There are joint agreements with the Galactic Federation of Light and the Intergalactic Union on similar techniques for each other. You never know where a humanoid might end up.

This is the task of all doctors of the Interstellar Union. I received a qualification in psychology, and I am considered one of them. I am a biologist, I study living beings, and a psychologist means working with people. You consider psychology as a secondary, maybe, education. For us it's all a doctor. Moreover, I studied aliens, including I studied you as alien organisms. I am considered not just a doctor who lives on Esler, but a scientist, a scientific worker. I may not be involved in treatment directly with Esler, but I will not lose my specialty as a doctor; I can take it up at any time.

Peter: I see.

19:30 Chipization at Esler. Housing for the population on Esler.

Irina : Now, what are the laws on the planets? For example, on Esler there is a law that at birth a solution containing copper ions on which nanorobots are deposited is injected into the child's subclavian vessel through a catheter. The usual dose for a child, depending on weight, is 12-15 thousand nanorobots. They perform not only a medical role, but also an identification one.

Distributed throughout the vessels of the body, some of them are purposeful - they have a control system, according to their program they are directed to the legs, arms, and throughout the body. Some of them settle in the palms. When confirmation of the identity of an Eslerite is needed, he places his palm on a special panel, and these nanorobots communicate a code that belongs only to him, that is, an individual code. This combination of letters, numbers and symbols is an individual code that is put into these nanorobots even before they are introduced, on a special device. This is a modification of the device that will recognize them.

The next function of these nanorobots is medical. They cleanse the body of various toxins, repair blood vessels, for example. If there is some kind of microcrack in a vessel or endothelium, the nanorobot will recognize it using special signal molecules and will come there through the bloodstream. A special discharge is released, and a protein is released from the blood, which sticks together like glue. Not a blood clot, but glue.

For example, among earthly people, microcracks in blood vessels prevent blood from passing smoothly, without jerks, causing congestion.

Peter: Turbulence is forming.

Irina : (MidgasKaus says) Your body fights these microcracks on the inner sides of the walls of the arteries (especially large ones) by depositing the only possible substance - cholesterol. This causes problems. Bacteria begin to precipitate on cholesterol, since it is a substance of a fatty nature, and chronic inflammatory arteritis of a certain stage begins, then blood clots and, ultimately, calcifications. Fencing of the body leads to atherosclerosis.

Atherosclerosis leads to increased pressure, tissue hypoxia, damage to the kidneys, liver, hypoxia of the heart, brain cells, which begins to fight this condition and increase blood pressure, etc. These are the results of my research.

Peter: I see.

Irina : If you had nanorobots, they would glue them together at an early stage of these cracks, there would be no precipitation. Moreover, it is possible to introduce a program into nanorobots that will dissolve and convert cholesterol into a compound that will be excreted through the liver and bile acids.

There are planets where nanochipping is not mandatory, it is voluntary. They pass him there too, but they have some other identification documents, cards (shows).

We do not have a mandatory medical examination like yours.

I remind you that the Interstellar Union provides each citizen with free living space, certain square meters, without the right to sell, but with the right to exchange and inherit it to their children and relatives. Naturally, only those who do not have it can receive it. If he has already

inherited a premises, he cannot apply for a second one. If, for example, there are several children, then the oldest usually receive housing (or according to the family's internal agreement). Everyone else gets space somewhere else. It is not for sale.

In special areas designated for purchase, they can buy themselves more housing. To do this you need to save money and resources. If he wants to move to another city on his planet, or even fly to another planet, if he doesn't want to live there, where the state has allocated space, he can find through special networks (an interstellar analogue of the Internet with great functions) in the city such people who will agree to exchange with him. If they don't agree, then he can buy it there himself; he can't sell it.

Peter: I see.

28:02 Medical robots. Biocomputers.

Irina : (MidgasKaus speaking) In a dedicated apartment or living space, depending on the planet, there is different equipment. If we talk about anthropomorphs specifically: Burkhadians, Eslerites - with similar humanoid physiology, then in one of the rooms there is a biocomputer built into the wall. He can talk and ask questions. It includes, among other things, a medical function. You asked about examinations, medical examinations, and this is a personal biorobot doctor for everyone at home. The one who knows everything about you and your family. You approach this wall, put your hand on the wall - there is a special panel there. A small screen opens, an image appears, if it is Esler, then an image of an Eslerite, a doctor, appears (you would have an analogue - a man in doctor's clothing). He has a name, and he himself addresses himself by name.

He says, for example, that you need to conduct an examination today. He conducts an examination on radiation from the hands, on the chemical composition of the contents of subcutaneous fat, in your case this is called lipidoproteins. He can ask by voice to exhale air into a special panel, determine the composition of the blood based on the frequencies of radiation from the organs, determine what kind of microbes he has, carry out some kind of diagnostics and display a graph for him.

He also gives recommendations. For example, he can say that your energy is in a state of decline, this somehow, for example, affects the kidneys. Gives certain recommendations: you should take, for example, 200 milliliters of something or devote time to rest or physical activity. We call it a "medical robot." A child might come. All the residents of the house are in his memory. It's in the house.

On expeditions there is usually no robot on ships. They can deliver it in some large ships. Most often, if it is some kind of flying saucer, there are no such robots there. Usually they take with them what you call a mini first aid kit. You apply it to the skin of the arm, where the artery comes close to the skin, with a round element (like a metal button). Based on blood radiation and vibrations, the entire body is diagnosed: what substances got there, maybe some toxins, microbes, other damage. This first aid kit contains a minimum of medications. If this is a space mission, for example, painkillers, an antibiotic against the most common specific microorganisms, an immunostimulant in case of injury. The first aid kit itself will calculate the required dose. A short needle will come out and this substance will enter the blood. Recommendations will be given by voice or on the screen (how to set up).

Peter: Thank you.

Irina : This is only in houses and first aid kits. In clinics there are various devices for restoring the physical body. We have few drugs - this is only emergency help. In general, we use energy treatment, energy and astral fields. We have devices that produce waves of frequencies identical to the astral or mental body, and they restore this, cleanse the etheric channels, etc.

Peter: Physiotherapy.

Irina : Yes, like your physiotherapy, only we have it controlled. This is not just some kind of directed high-frequency field, but the screen shows how it affects the body, which organ it penetrates, how it affects energy. This is all shown with graphs.

Peter: Thank you.

Irina : I answered two questions like this, but we don't have much time. (MidgasKaus speaking). This needs to be told in detail, he hasn't told everything yet.

34:41 The uniqueness of humans as a biological species.

Peter: Mead, please, what is the uniqueness of humans as a biological species from the point of view of an alien researcher?

Irina : (MidgasKaus speaking) What a good question. Need to think. I believe that the uniqueness of man as a biological species lies, firstly, in the capabilities inherent in your DNA, which you can reveal by developing spiritually, and then the abilities of your brain, your consciousness, your inner strength of the body will open.

Secondly, I see the uniqueness of humans as a species in the fact that you still have very good, complete and rapid regeneration of some tissues. You have a fairly strong immune system compared to some similar races of the Interstellar Union. This is explained by the fact that you are constantly encountering some kind of microorganisms.

Another unique thing is that your immunity, although strong, is a fragile system that can be easily broken, and all its power can be directed against the owner. This happens at the behest of the Spirit, depends on the vibrations of his Spirit. All humanoids have such a connection between the Spirit and the body. You have a unique system, a very strong influence of the Spirit on immunity through hormonal regulation, etc.

37:00 Immunity from a subtle point of view. Pathogenic flora.

Peter: Thank you, the answer is very good, I liked it. In this regard, there is the following question.

What is immunity from an energetic and subtle point of view, what structures provide it, and how to correct it? Are there energy levels, an automatic immune response, similar to normal immunity? I mean when the body encounters energy structures, some thought forms, energy dirt, so to speak.

Irina : (MidgasKaus speaks) I want to say that bodily immunity is a reflection of the Spirit's ability to purify, to raise its vibrations, to bring them closer to the Divine. This is a reflection of the omnipotence of God, his omnipresence. The Divine Spirit is omnipresent.

Also, immunity, in one form or another, permeates any cell of the body. It is included in the cell itself, any cell, not only the immune cell, but in any cell there is a protective structure that is also part of the immune system. The purpose of immunity is not only to resist microorganisms and substances harmful to the body, but also to adapt and adapt to the effects of these pathogens.

I'll tell you that the immune system never strives to kill immediately. He strives first to come to an agreement and enter into symbiosis. This is common to varying degrees in all humanoid races. This is also typical for animal bodies, in general for the dense material form of life that I studied. This happens because, according to Divine laws, symbiosis is a better solution than parasitism and complete sterility.

Peter: Very interesting.

Irina : It happens that it was not possible to come to an agreement with the pathogen (they agree, naturally, not with their lips, but with chemical formulas), and an immune reaction of rejection begins. When it will turn on in response to the aggression of antigens that have arrived in the body, and with what force it will occur - this is always a very individual question. At the level of the human body, the immune system is represented by bone marrow, lymph nodes, thymus, leukocytes, lymphocytes, monocytes, basophils, neutrophils and eosinophils. I think it will be interesting. I'll explain now. I have listed the types of leukocytes. Each of these species plays a different role in the immune response and its regulation.

The immune response includes recognition of the antigen, its neutralization, the conversion of protein substances of microorganisms into their own and the removal of toxins, those substances that were formed during this digestion. Naturally, storing the antigen in order to start an immune reaction before a significant number of body cells are damaged.

The immune response also includes the restoration of tissue structure after this attack. If these are damaged cells, dissolved by the digestive enzymes of bacteria, and they have already experienced necrosis, then normal immunity transfers them to a state of autolysis. Amino acids are directed to their destination, ammonia nitrogen compounds are excreted through the kidneys, etc.

Peter: We know physiology. I'm very interested in symbiosis. It turns out that all chronic diseases that occur in the body are precisely symbiosis? Why is there such a large number of chronic diseases now, if there were fewer before? It turns out that the body has less spiritual strength?

Irina : (MidgasKaus speaks) If the immune system does not fight this pathogen, but is in symbiosis, then the person will not have the disease. He will not feel this state. The cells of the body will not be damaged, they will be in symbiosis. Pathogens will give away something useful, and the body will voluntarily produce something useful for them.

Peter: Is this what is called “opportunistic”? There is a conditionally pathogenic flora, which can then become pathogenic under some circumstances.

Irina : (MidgasKaus speaks) The fact is that what you call pathogenic flora is no more than 1-1.5% of all flora on Earth. Microorganisms, which have now become pathogenic, in former times were the same opportunistic flora and took their place in the niche of microorganisms, solving some problem. For example, at Esler we pay great attention to the study of microbiology from the point of view of subtle worlds. Let's look at why plasmoid civilizations created this or that type of microbe. What problem did they solve, and how does it help them, for example, to correctly manage the natural elements of nature, some animals, their food, etc.

Peter: Very deep.

45:03 Microbes in the human body.

Irina : (MidgasKaus speaks) We need to take some specifics. A microbe that enters the human body is not just some kind of irrational force that acts like an automatic robot. They have their own system for communicating microbes with each other. Even if they do not have a nucleus (nuclear-free microbes), they still have a communication system. This is not a nervous system, like that of multicellular organisms, but an energy analogue. They may not necessarily touch each other. Microbes of different types located in one person are connected with each other by some kind of communication.

The goal of microbes, as living beings, is to give birth to another generation, to go through some kind of evolution. To obtain food for oneself in order to give birth to the next generation, so that certain group animals of the Soul can incarnate in them. Souls of microorganisms are called group souls.

If a person dies from an infectious disease caused by microbes, the task of the microbes will not be solved. They, as soon as the tissues begin to disintegrate, will lose their ability to continue in their generations further. Death from infection is always a failure not only for the Spirit, which came out of incarnation and went on to develop further, but also for the colony of microbes that lived in it.

We also explored the question of why regulation is disrupted, that the body dies or gets sick, suffers from a lack of nutrients, etc. Why doesn't regulation happen? We found out that to a

large extent it depends on the Spirit of man.

I will tell you that in two different people the same infection in the same organ will never occur in the same way. The condition of the patients will be different, the condition of the organs will be different, and the damage to these organs will be different. At the energetic level, immunity is provided to a greater extent by the etheric body. The first, fourth and fifth chakras of people are responsible for this. These energy points include immune control.

49:16 The coronavirus .

Irina : (MidgasCaus speaks) Correction. You have a lot of people who have lowered immunity. This is a direct path to both cancer and viral pathologies of the respiratory system that we are now seeing. What you call coronavirus (our scientists managed to find out) is the name given to more than 15-17 different types of viruses, which do not necessarily belong specifically to coronaviruses in topology. Similar symptoms make such diagnoses possible.

If coronavirus is found in any test in a patient with the same viral pneumonia, this does not mean at all that it is the culprit of the pneumonia. There may be another virus running in the background. Or even avian chlamydia (Chlamydia ornitalis), and sometimes even Chlamydia trachomatis. It may well arrive in the respiratory organ through the blood flow in leukocytes. This is possible with your immunity.

We investigated the reasons for this phenomenon, they are cumulative: spiritual, energetic and physical. Man is both Spirit and body. As long as this person remains in the body, the body is part of him. What affects the body affects the Spirit. And what affects the Spirit affects the body.

51:18 Reasons for decreased immunity.

Irina : (MidgasKaus speaks) There are many reasons for decreased immunity. There are physical reasons - environmental pollution and food additives that reduce the percentage of oxygen in the blood and change the hormonal status of the brain, such as aspartame.

Peter: There are a lot of food additives that the food industry uses now that have a negative effect.

Irina : Environmental pollution with various pathogens that people inhale - nitrogen oxides, carbon monoxide, etc., also reduce immunity, including local immunity in the alveoli of the lungs. From them, leukocytes begin to shrink and die.

Immunity is also reduced by radiation, long exposure to the sun, prolonged frosts, and temperature changes can also reduce immunity, because it does not have time to adapt, and imbalance begins. Also, of course, this is your spiritual state.

Peter: This is more interesting to us.

Irina : (MidgasKaus speaking) What suppresses the immune system? This is despondency, fear, guilt. Not just fear, but unreasonable fear. Just fear that has grounds, that arose situationally and passed - this does not reduce immunity. Namely: chronic anxiety conditions, panic attacks, and certain anxiety-depressive disorders reduce immunity.

53:55 Consequences of negative emotions.

Irina : (MidgasKaus says) They also reduce immunity: anger, aggression, especially directed at oneself, non-acceptance of oneself, feelings of guilt, resentment towards oneself and others, sadness, despondency. To one degree or another, all negative emotions negatively affect the immune system, because negative emotions, thoughts and feelings arise as a reaction to the rejection of something from the world around us. The one who, with his Soul, rejects something from the world, crosses it out of the Divine plan, and himself leaves it, because he does not accept this world.

As I said, immunity is a reflection of the omnipotence and omnipresence of the Divine Spirit. A little bit of omnipotence, and partly omnipresence, there are two functions. If a person does not accept something in the Divine world around him, then he closes himself off from the energies of God's omnipotence and omnipresence, including a decrease in immunity, which is their material manifestation.

Peter: Great. Everything that was required, thank you!

56:04 Function of the nervous system. Hypothalamus.

Peter: One more question – the hypothalamus. At the beginning of the last century, scientific work was carried out by Professor Milman. He conducted post-mortem studies of this endocrine gland. Significant changes were identified in patients who died from cancer, up to complete replacement with adipose tissue. I know that devices have now been created that determine the degree of health impairment based on the state of the hypothalamus. A Swiss company has produced such a device. What is the role of this gland in the development of the disease? Is it possible to influence the course of the disease in the body through influence on the hypothalamus?

Irina : The hypothalamus, pituitary gland and pineal gland are the three pillars on which the brain rests. Previously, it was believed that the Earth rests on three pillars. These glands are the three pillars on which the autonomic and central nervous systems rest.

The central and autonomic nervous systems are the main instruments of influence of the Spirit on the body and bodies on the Spirit. It is a transmitter of spiritual vibrations to the physical level and vice versa. Those nerves that run through the body are the strings of a musical instrument that transmits invisible vibrations of the Spirit into the physical body. (He shows the image: a man is standing, and he has threads all over his body).

Peter: I understand what you are talking about.

Irina : (MidgasKaus speaks) This is the nervous system. The state of the nervous system depends on the harmony of mediators and hormonal substances, which, in turn, are regulated by the pineal gland, pituitary gland, and hypothalamus. If, for example, the pituitary gland or hypothalamus releases some substance that has a certain vibration, then in response to this substance the entire body begins to change (shows a cascade of changes). For example, one thing was released in the thyroid gland, protein synthesis became more active elsewhere in the body, glycogen breakdown became more active in the liver, etc.

Peter: We know that.

Irina : These are supports. In the brain, the embodied part of the Spirit is located on a pyramid-shaped throne. This is a luminous star, within which the sphere is the spiritual heart. (He draws diagrams). The throne stands on three pillars, like a pyramid on triangles. These three supports are the pituitary gland, pineal gland and hypothalamus. It's not for nothing that they are located not at the top of the brain, but at the bottom.

If you look at the structure of these organs, you will see that almost all nerves, nerve connections, nerve bundles and large vessels approach them. They entwine them. (He shows a spiral). This spiral, if you look at the architectonics of the brain, rises upward (the brain is not a plane, it is three-dimensional), and along these paths goes the energy of consciousness of the embodied Spirit. This is a tool for connecting vibrations - spiritual, subtle and physical.

Peter: From here, by influencing the hypothalamus, can you improve your health?

Irina : (MidgasKaus speaks) Yes, you can improve your health, you can worsen your health. He is influenced mainly by the state of the Spirit.

Peter: The state of the Spirit after all.

Irina : These three organs are quite well protected from drugs and substances. (He shows a wall through which substances selectively penetrate). One substance penetrated and the other was retained. What kind of guards are there? (He says) These are not guards, but signaling molecules.

Peter: Blood-brain barrier.

Irina : (MidgasKaus speaks) He is where the brain is. Where are these three: the pituitary gland, the hypothalamus and the pineal gland, there is also such a semblance of a barrier, a second one. It is in double protection from the effects of substances that can disrupt their work, and therefore the work of the entire body.

01:02:47 Placebo. The effect of faith. Definition of faith.

Irina : (MidgasKaus speaking) Emotions, feelings and thoughts are very easy to influence. This is why they say that there is a “placebo effect”. If we now translate this word into Russian, it means “believer,” “I believe.” It's called the "belief effect."

Your scientists also studied how faith affects the state of the body and why. Belief in something positive and belief in something negative. Faith can have a positive effect, or it can have a negative effect. Faith is a feeling that is located in the spiritual heart. The spiritual heart simultaneously manifests itself through the Anahata chakra and through the brain; it is a flow. Not static, but a flow of energy, including through these three endocrine glands.

If a person believes in something positive, he raises his vibrations with this belief. Faith is the establishment of a bright ideal and the pursuit of it. If he believes in the positive, then by this he increases his vibrations and conveys to the pituitary gland, hypothalamus and pineal gland that everything is fine with him, he is protected, in a state of harmony. These glands begin to listen to the Spirit and resonate with it. Accordingly, harmoniously manage the nervous system, digestion, respiration, hormones, biosynthesis, removal of harmful substances, and immunity. They also control immunity through other hormones. The spirit begins to manifest through the body in a positive way. He does not destroy it, but creates it.

If a person believes in something negative for himself, creates a negative image that (he thinks) will overtake him in the future, he lowers his vibrations with this belief. It affects these three glands in such a negative way that they become disharmonious with each other. They begin not to “talk” in chemical formulas one by one, but in disharmony and disharmony. It frustrates their work. This affects the entire body. The glands begin to randomly secrete some substances, some are not released in time, some more, some less, and this begins an imbalance in the body.

Peter: Thank you, great answer. How much time do we still have? There are many interesting questions.

Irina : It’s already an hour. I think such a conference will not be very easy for unprepared people to listen to, especially for more than an hour.

Peter: One question, as Vladimir Goldstein likes to say. One question, small.

Irina : Ask, okay.

01:07:13 The effect of sleeping pills on the body.

Peter: Sleep disorders and synthetic, chemical sleeping pills. How do they generally affect the astral body, the organism? Is this a dream under the influence of synthetic sleeping pills?

Irina : (MidgasKaus speaks) These are exactly the substances that can penetrate the brain structures and affect the ratio of hormones. There are substances that cause muscle relaxation and reluctance to move. For example, "Luminal". It is more characteristic of muscle relaxation, its psychotropic effect is quite insignificant, and is more related to movement. "Luminal" and its analogues act faster and in smaller doses in combination with ethyl alcohol, for example. How do they work? They cause some kind of sleep paralysis and relax the muscles. The astral body does not want to linger in a body that simply lies and does not want to move. It believes that sleep paralysis has set in and leaves.

The effect of this substance especially affects memory, which remembers events that happened a long time ago. At the moment of action, this causes a disruption in the astral body's ability to remember dreams and generally remember its astral exits. The person will feel darkness, as if he has failed. (Shows). Because of this, when the effect of the drug wears off, he feels as if he was just lying there and did not sleep, and dissatisfaction appears. And it takes time for the muscles to regain tone. It will appear faster if a person gets up, starts moving, and does physical work. But this is difficult to do because you will feel weak, everything will be relaxed. You will feel like you didn't get enough sleep. You may get a headache because a toxin, a certain metabolite, can cause headaches.

There are substances - this is the group of "Phenazepam" and analogues. They penetrate certain molecules in the brain and there reduce the amount of hormones that are a reaction to anxiety. At the same time, there is anxiety, but the person does not feel it through the brain. These are, for example, "Sibazon", "Phenazepam", there are many different ones. The most famous are Diazepam and its numerous analogues. They are all different, but they all relax the muscles, although to a lesser extent. They act more specifically on hormonal metabolism. In small doses they do not cause sleep as such, there may be some sleepy states, but they do not cause separation of the astral body.

As the dose increases, disruption of the pituitary gland, hypothalamus and pineal gland begins. When a person is still in the body, a state of consciousness occurs as if he had already separated from the body. And this causes separation. There may be intoxication, dizziness, headaches. It happens that a person takes these drugs for a long time, his liver secretes special antidotes that quickly remove them from the body. And then he simply will not feel these drugs, and he will need to be given a larger dose. But if the dose is exceeded, a microtoxic effect is caused, which, on the contrary, increases anxiety. A person may develop certain fears. There will be such vibrations in the brain that it can begin to sense subtle beings and will be on the verge of intoxication.

01:13:29 Causes of insomnia. Recommendations for sleep disorders.

Irina : (MidgasKaus speaks) Personally, if you have sleep disorders, I would advise you not to take any medications or even herbs. In general, do not drink anything for sleep. I would recommend doing meditative practices and autogenic training, especially before bed. Review and improve your entire lifestyle.

If you smoke, quit this habit. This can cause sleep disturbance due to hypoxia. Or at least the last cigarette at least three hours before bedtime. Your blood vessels may constrict, plus carbon monoxide, and oxygen is not supplied. This makes a person feel internal anxiety, his instinct of self-preservation becomes more acute - he needs to run, to save himself, and not to sleep. So he has insomnia, but he cannot explain it to himself.

Possible sleep disturbance due to frequent alcohol consumption. If (for men), say, on average, more than two or three times a week alcohol is present in an amount greater than a certain minimum (a low-alcohol drink in a small amount that a person will not feel practically), the amount of acetaldehyde increases in the brain tissues, in the liver. This shifts the acid-base balance of the blood to the acidic side. It will take time until the acetic acid is removed. Moreover, liver enzymes begin to work slower over time. They must be cleansed and restored before preparing for the next holiday.

If you do not have time to prepare, a certain amount of acetaldehyde accumulates, which causes tension in the muscles, blood vessels, and changes in the composition of intracerebral enzymes. There is already an impact on the vibrations of the Spirit. There will be anxiety, irritability, it will be difficult to fall asleep, and you will wake up early. The astral body cannot leave the physical body in this state for a long time; it needs to recover.

Abuse of sleeping pills can also cause (if they are discontinued) long-term insomnia, since the astral body no longer wants to separate itself, it needs an assistant. It happens. This, of course, can be overcome, but with time.

And chronic stress, anxiety, fear, some kind of somatic illness that causes pain, tension in the muscles or some parts of the body can also cause insomnia in the absence of adequate pain relief.

Some forms of contact with subtle-material entities can also cause insomnia. When exchanging energies with the contactee, they begin to influence the brain in such a way that it completely loses the ability, even the need, to sleep for some time. The plasmoids pump so much energy into him that his consciousness changes from lack of sleep, and he more easily comes into contact with them. You call this the beginning of psychotic episodes. This is not only schizophrenia, various psychotic personality disorders.

Why is this disorder? If he comes into contact with certain plasmoids, then this goes out of his control and affects adaptation in the social sphere where this person is located. Therefore, your doctors quite rightly called this condition a psychotic level disorder. This can also disturb your sleep. They make contact with him, he has no time for sleep. Contacts are different: sometimes they arouse his interest, sometimes he fears. He has no time to sleep anymore, he needs to communicate.

(He advises). Harmonization, walks in the fresh air before bed, breathing exercises before bed using the Pranayama method.

About the food. You know, I recommend not to overeat two hours before bedtime, this may interfere with going to the Astral. For some people, the fullness of the stomach is associated in his mind with the time of wakefulness: if I am full, then I have to do something, and therefore the astral body does not leave the physical. This doesn't happen to everyone, but it does happen.

At the same time, it is not recommended to go to bed with a completely empty stomach. A

person should be neither full nor hungry, in between. Hunger can prevent you from falling asleep, and the instinct of self-preservation can kick in: “Why are you falling asleep? You need to go get food.”

Very good at astral travel techniques. Those who have mastered them can fall asleep in 5-6 minutes. Go to the Astral without awareness. Don't strain to go on astral travel, but just fall asleep.

Will begin to do exercises in preparation for astral travel. When he feels that the sensation of the body is being lost, he will let go of his awareness and leave. I recommend this to you.

Peter: Thank you. There are many special questions, but they are highly specialized. They will be of interest only to a narrow circle of specialists. I hope there will be another opportunity to ask them.

Irina : I think we will try to meet again, we need to think about it. Yes?

Peter: Yes, I would be very grateful.

Irina : Okay. Dear viewers, I thank you for listening to this conference. I hope you found it interesting and useful. See you again, friends!

Peter: Thank you all, goodbye!

October 27, 2021

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Peter is a neurologist;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms.

#360 Neurology. How to get rid of anxiety? Panic attacks - contact with plasmoids? Reptilian genes.

https://blog.cassiopeia.center/nevrologiya-kak-izbavitsya-ot-trevogi-panicheskie
https://www.youtube.com/watch?v=XABUb_M_WKA

00:18 Introduction of the participants.

Irina: Hello, dear friends! My name is Irina Podzorova. I am a contactee with extraterrestrial civilizations. Today with me is my curator MidgasKaus from the planet Esler, biologist, psychologist, specialist in alien civilizations. Today we have the second part - “issues of our medicine, issues of neurology,” led by a doctor. Is his name Petre. Hello, Peter!

00:47 The influence of genetics on the human brain.

Peter: Hello, Irina! Greetings, Mid! Hello, dear viewers! In the first part of the conference we touched upon general issues of medicine. Mead told how medicine is presented in the Interstellar Union, how medical care is provided and many, many interesting things. Today I really want our second part of the conference to be devoted to neurological problems, because there are a lot of questions in earthly medical science, including plenty of them in neurology.

Therefore, if I may, the first question: modern science in relation to the human brain distinguishes the “old” brain, the “middle” brain and the “new” brain. She defines that the “old” brain exists for about 50 million years, the “average” one – 5 million, and the “new” one – 1 million. In addition, the “old” brain is, in some cases, called “reptilian.” Reptilian, that’s exactly what they say! Is this seen in terms of the evolution of our primate ancestors, or in terms of the fact that we didn't quite evolve ourselves?

Where, whose part? That is, taking into account the fact that we are hybrid creatures. Where, whose part is in the brain? Gene composition, the number of such genes, the number of “native” genes. If I may.

Irina: (Mead speaking) I understand the question. What you call the “reptilian brain” is that part of the brain that is responsible for the simplest, as you call “plant” functions of the body. You share it with the animal world.

The brain contains traces of the influence of various genetics. You have 45% primate genes. From them you get the size, shape of the brain, its overall structure. The size and weight of the brains of those primates from which the genes for your creation were taken were not much

different from modern ones. The general structure, internal structure, architectonics of all parts of the brain - this comes from primates. You have 45% of their genes, which means they have a greater influence on your body structure.

Another thing is functions. For example, from the Burkhad representatives you inherited genes that allowed the anterior frontal parts of the brain to develop to a greater extent. And also to those parts of the brain stem and cerebellum that are responsible for balance, upright posture, and for the formation of the visual cortex of the occipital lobe of the brain, which more accurately recognizes visual signals from the outside world than the same primate.

The primate sees the overall picture, and a person, thanks to these genes, which determine the structure of neurons and the distribution of axons throughout the neural network, can isolate some particular signals from these signals and process them, pay attention to something, and concentrate. This is from the Burkhadians.

From the Tumesout people, genes influenced more not the brain, but the structure of the digestive organs, the structure of the musculoskeletal system. Those that affected the brain had an impact on your senses, on the area that distinguishes odors. You did not react as sharply as primates do to the smell of a primate from another family, from another herd, which immediately evoked a protective instinct in them. There was such sensitivity.

Each herd had its own smell, which was characteristic of a certain leader. Contact with him spread molecules specific to his body. You as humans wouldn't be able to tell them apart at all. And that’s how they communicated. In appearance, these primates did not distinguish between strangers and their own, from their herd. They were gregarious. They were distinguished by smell, and from a distance they could already understand whether it was worth making contact. They could be aggressive because they were fighting for territory.

They had special olfactory cells in their nasopharynx, which led through dominant nerve pathways to the olfactory zone of the brain. If it had not been artificially removed by adding some Tumesoutian genes, it would have been very difficult later in this creature to reduce aggression and wariness towards these odors. It was at the level of instincts.

The genes that were inherited from reptilians formed parts of the brain that were responsible, for example, for the formation of conditioned reflexes and for maintaining unconditioned reflexes. Most of them affected the areas of the parietal and temporal lobe, which are responsible for memory.

What are the characteristics of the reptilian brain? Their brains can store and reproduce information after a long time. At the same time, their speed, the speed of formation of conditioned reflexes, exceeds the speed of both primates and the species from which the Burkhadians and Tumesoutians were formed.

Reptilian genes also influenced vision: they helped form the retina, which began to distinguish, for example, blue and purple colors (primates were more prone to red-orange), and thereby expanded the spectrum of perception of the world.

The totality of all genes was responsible for the infusion of the intelligent Spirit. It is impossible to say which is larger and which is smaller. The combination of all genes made it possible to form a nervous system through which the intelligent Spirit could incarnate.

09:26 Alzheimer's disease.

Peter: Thank you. I'm afraid we won't have time, so I want to move on to specific issues. Alzheimer's disease has become widespread nowadays. What can Mead say about this about the spiritual causes, about the subtle aspects of this disease.

Irina: As you know, this disease does not always develop. I looked at and diagnosed people who were officially diagnosed with this. They showed a fairly similar picture, which, however, differed in the details of the energy of their bodies. On a subtle material level, these were negative blocks in the sixth and seventh chakras, which consisted of emotions of despondency, lack of self-acceptance, criticism and condemnation towards loved ones.

These blocks often contained ideas and feelings of not accepting one's body. Life energy, charged with these destructive emotions and feelings, accumulated in the chakras. This is the spiritual reason: feelings and thoughts.

Any block wastes human energy and vitality. This life force became charged with negative thoughts and emotions and began to influence the etheric matrix of the brain. Each organ has an etheric matrix that follows its outline. The etheric matrix of the brain is responsible for the contact of the Spirit with the brain. It's like a "bridge". Negative energy began to corrode him, destroy him (he shows me), that is, erase this etheric matrix. It began to lose its structure, becoming softer and jelly-like. Because of this, the Spirit lost the ability to access short-term memory. Short-term memory is what you currently have in your mind.

Your consciousness is much wider than just perception. Your consciousness is a corridor of reality in which there are different structures, for example, that part of the memory that you always need. That memory that you rarely need is in another structure of the Spirit. It is simultaneously recorded in the brain at the level of chemical signals.

The contact between these records and the Spirit is carried out by the etheric matrix of the brain. When it is damaged, the sequence and connection are broken. As a result, a person cannot remember what he knew before. Memories are not lost, they are simply closed because of this matrix, because of this block.

Later, he begins to experience even more negative emotions about his memory. To protect him from stress, his Spirit, his mind, with the help of imagination and those parts of memory that are available, create a certain reality for him in his consciousness. For example, to compensate him for stress, so as not to lower his vibrations. He may think that he remembers everything exactly, but he will "remember" something slightly different than what he had in this reality. He may think that it is a different year, or that he is younger than he really is.

He will be confident of this because his Higher Self will tell him so to relieve him of the stress

of being “inferior.” Sometimes this doesn't work, and the person is in what you call a state where he is no longer aware of himself. There is his Spirit, there is his “I”, but to the question: “Who are you?” and “Where are you?” - he can’t find words. For him, all that remains is perception through the brain. It's like the "reality tunnel" narrows to a point. We call this “narrowing of consciousness.” In this state, the Spirit is in the body, but the body is damaged by the block.

The nutrition of nerve cells with vital energy also depends on the etheric matrix. The body must receive energy from the physical world in the form of food and oxygen, and from the Spiritual world in the form of spiritual Light. If there are any blocks, then both energies are blocked.

On a physical level, this manifests itself in the form of blood stagnation, nerve conduction disturbances, and so on, and manifests itself later. First - energy disturbances. In this case, the Spirit remains in the damaged body until it leaves the incarnation. It is believed that he must live in it in order to spend the energy that was released. This is the reason. This is a violation of memory plus consciousness due to negative blocks.

Peter: Can it be energetically corrected?

Irina: If a person realizes that he himself created this, he can dissolve it through contact with his Higher Self. And if he is not able to realize himself as a person, you can only maintain his state, but only he himself can fully.

18:15 Multiple sclerosis.

Peter: Great answer! Thank you. Another question. Demyelinating diseases such as multiple sclerosis. Mead's opinion on this issue.

Irina: Multiple sclerosis is a more complex disease. It has many causes, more than Alzheimer's disease. I, too, have diagnosed people with this disease and found that what you called demyelinating disease looks to us like the breakdown of certain tissues. This happens due to impaired immunity.

Some immune cells and antibodies disrupt the lining of what you call nerve cells—the axons—that carry signals to control the body. They are well protected from harmful factors, but it happens that the body itself destroys them at the energy level. This comes from hidden blocks, but they are not in the head, but most often in the fourth chakra, which is responsible for the immune system and the cardiovascular system. It is, as you call it, “central”.

Peter: Yes, the central chakra.

Irina: Blocks that have accumulated in the fourth chakra from negative emotions can negatively affect the functioning of the heart, lungs, immunity, or cause nervous diseases. All over the body.

It is possible to completely cure and restore a person if he, firstly, dissolves the blocks that led to this, and secondly, eats food with a large amount of organic sulfur and phosphorus compounds that are part of the lipoproteins that make up these membranes. The body can recover.

21:05 Nerve nodes in the abdominal cavity, their functions. Third chakra. Animal group soul of microbes.

Peter: Thank you, great answer. Next question. The number of nerve cells in the nerve ganglia of the abdominal cavity is comparable, and maybe even greater, than in the spinal cord. What functions do they perform, in addition to the regulatory connections known to us, viscero-somatic, somato-visceral? I am interested in the aspect of the relationship between the nervous tissue in these places with the microflora of our intestines and with immune cells.

Irina: About nerve nodes?

Peter: The nerve nodes that are located in the abdominal cavity, in the intestines, “accompany” the intestines. There is a lot of nervous tissue there. A large number of.

Irina: The functions of nervous tissue at the energy level are the manifestation of energy through the body, the energy center, which you call “manipura”. This is a chakra, an energy center through which the will of the Spirit is manifested. Volitional energy is the energy thanks to which the Spirit can do something in the world. (He shows) This chakra is located in the solar plexus area.

Peter: Yes, the third chakra.

Irina: The nerve nodes that are located there are the physical substrate through which a subtle energy etheric formation, an etheric structure, is manifested. In terms of its influence on the physical body, this chakra influences the regulation of digestion, for example.

By the words “regulation of digestion” we also mean the process of peristalsis, the process of secreting enzymes, including the regulation of microorganisms that help digestion. By the word “digestion” we mean the extensive process of assimilation of energy that enters the body in dense form. We understand the gastrointestinal tract as a connecting link between the physical world, between the food that has arrived, and the etheric body, where the energy will need to flow.

The nerve ganglia contains cells that can distinguish which substances can be taken more from food through the intestinal wall, and which ones can be left behind. For example, this function: how much enzymes to secrete after a particular meal. A person’s appetite largely depends on the state of the nerve nodes, what he will like to eat, whether he will strive for food, or whether it will be indifferent to him.

Usually, the more energy of the third chakra in the energy center, the more actively this center

works, the more a person loves food, the faster he eats, and the more he enjoys food. This is known to your people, who have noticed that a person who eats a lot and quickly is capable of more decisive volitional actions.

Peter: There is a saying.

Irina: Of course, this doesn't always work, but in most cases such a person has the ability to love food, strive for it, for its variety.

If a person is indifferent to food, this may be a sign that he has a weak will of his own, the ability to change something in the world.

Knowing this law, those who understand human energy, through the third chakra, can try to reduce a person's will, redirect it under their control, for example, by changing the diet. This often occurs in various religious groups, where food becomes less plentiful and varied, more often there are no animal proteins, which contributes to less expression of will, and closes the third chakra.

Your spiritual leaders and spiritual teachers, who are well versed in human energy, if they want to dominate their followers, can often introduce rules in their groups: either fasting or limited food intake in order to reduce the work of the third energy center, the will. Since it is associated with the element of fire, there is less "fire" in a person. Such a person is less inclined to speak his mind, to go against those laws that he does not like: it is better to remain silent. He becomes, as you say, more humble. It is difficult for him to show his will. It's energetic.

About contact with microorganisms in the intestines and immunity. Microorganisms have an animal group Soul (they are alive), which is created by plasmoids. Microbes in the intestines are in symbiosis with humans. In symbiosis, this means not only that it is useful for them to live with each other. A very good word "symbiosis" means cohabitation, which is beneficial for Souls.

But a person does not maintain conscious contact with the Souls that live in him. This contact with them is maintained by his Higher Self, through the etheric body in the area, most of all, of course, of the third chakra. Maintains contact with microorganisms.

If a person is without blocks, Light departs from his third chakra (he shows his will with Love, and not with malice), his microbes are filled with Light, their animal Souls, they bring more benefit to a person. They do not die, protect against the invasion of other microbes, begin to synthesize vitamins two and a half times faster, and so on.

Peter: This is very important.

Irina: Yes, this concerns contact with the body. I have noticed that on Earth little attention is paid to both the influence of the body on the Spirit and the influence of the Spirit on the body.

Peter: Absolutely.

Irina: Therefore, you can mentally talk with all the animal Souls that live in you and direct them to mutually beneficial cooperation. As for immunity, its task is not to destroy all strangers, but to maintain order.

The fact that they destroy microbes does not mean that they harm the animal Soul of these microbes. Many microbes are embodied in one Soul: up to several hundred. If immune cells have destroyed more than half of the animal Soul, the rest begin to adapt, preserving the life of the remaining ones. They reduce their toxic effects on the body.

This happens in an organism that is harmonious. If he has left the state of harmony, unity: a feeling of unity and peace with himself, unity with the surrounding world and with God, then disturbances begin in him. The immune system, for example, does not work on time or, on the contrary, works too hard, destroying beneficial cells, or even its own. This causes disruption of various systems, up to and including multiple sclerosis, which you mentioned.

33:02 Cause of panic attacks. Self-help for panic attacks.

Peter: Great, thank you. Panic attacks are now the scourge of psychiatrists and psychotherapists.

Irina: Panic attacks are associated with contacts with destructive plasmoids.

Peter: Only just?

Irina: In most cases. A panic attack occurs suddenly. This is contact on an unconscious level. The destructive plasmoid comes to its contactee, who somehow attracted it earlier.

Peter: That's understandable.

Irina: When a destructive plasmoid comes into contact with a person, it may be one of those species that feed on energy charged with horror. In order for a person to release energy, the plasmoid comes into contact with him through a binding, usually in the head area, less often in the fifth chakra.

The plasmoid arrives and through its binding part, just like you inject a solution with a syringe, and the plasmoid “injects” energy. He spends a little of his energy. And this energy affects the brain, causing a decrease in vibrations and a feeling that a person is about to fall unconscious, for example.

This energy artificially increases his heart rate and causes the reactions that occur in him when he is afraid, although there is no reason, not even an unfounded reason for fear.

A person can be in any most comfortable place, even next to a loved one. “Contact” occurs because the plasmoid, his “curator,” wanted to eat and introduced some of his energy into his aura, which begins to affect him.

If a person does not remember that he is an immortal Spirit and nothing threatens him, he will believe that death is really facing him. A plasmoid can change a person’s consciousness that he is standing somewhere, looking at him and pursuing him. The person begins to be afraid and, in response to the energy of the plasmoid, release ten times more energy. The plasmoid “sticks around” its field like an amoeba and “licks” the energy.

As an exchange, it charges a person with energy, usually despondency. Plasmoids that lack the energy of fear are most often in a state of despondency. Fear is like a drug for them, it excites them. After this, a person feels weakness, fatigue, headache, nausea, not only from panic, but also from the exchange of energies with the plasmoid.

After several contacts, a person develops a subconscious anxiety that this will happen again. With anxiety he lowers his vibrations. Plasmoids will be able to come more often. The only advice in this case: if you experience palpitations and a feeling that there is not enough air and you are losing consciousness, close your eyes, turn to Heavenly Father and say: “Heavenly Father, if You want me to appear before You right now, I am ready for You come." Remember that nothing bad will happen to you, as the Spirit. By doing this you will prevent your instinct from being aroused in response to the energy of the plasmoid. The energy in you will subside, and the plasmoid, not receiving what it wants, will leave.

If a person suddenly experiences unreasonable fear, it is better to understand that this energy is from the outside, so that he can release even more, and say in response: “My God, if You think that I am now ready to appear before You, that I have completed the task of my incarnation, I am ready "

There is a feeling of suffocation. Typically, spasms in the chakra begin, and the plasmoid contributes to this by supplying a large flow of energy to create the impression that the person is suffocating. The more a person tries to inhale, the more the spasm will intensify, because it will clog the chakra more with fear. In this case, as far as possible, take a breath and continue talking to God, but not breathe yourself, hold your breath: “Have I already agreed to lose consciousness and appear before God? So I’m not even trying to breathe.” When the body feels a lack of oxygen, it will even out its breathing.

A person should not be afraid that he will lose consciousness or not breathe. He must remember that when he sleeps, the breathing process occurs without his control. This is help during an attack.

The problem is radically solved by contact through the Higher Self. Finding out who comes to him, for what purposes, where this fear or other negative feeling that attracted the plasmoid originally came from, and dissolving them. Send Light and Love to the plasmoid, the binding will dissolve. If the plasmoid arrives, it will not be able to energetically influence a person. The

word "attack" speaks of attack. This is an attack not by physical bandits, but by energy ones.

Peter: So, due to the huge increase in the number of attacks recently, plasmoid attacks have intensified?

Irina: Recently, the Earth's noosphere has been lowering its vibrations due to the fact that there is a lot of fear and rejection in society. This makes destructive plasmoid civilizations more active and stronger. They come to people more often because they find more places to eat.

42:00 Synthetic vitamins. The concept of slag. Nutritional features.

Peter : I see. Great answer. Thank you. Can we have time for another quick question? The synthetic vitamins that we sell in pharmacies - there is a lot of debate about how useful they are and how they are absorbed. These are synthetic, non-natural vitamins that we sell in our pharmacy chain.

Irina: I know what you are talking about. I researched several drugs and found out that the ratio of vitamins in them is different: there are drugs in tablets and capsules, in which substances that are opposite to each other neutralize each other. There are drugs in which a certain ratio compensates for vitamin deficiency. It must be remembered that the person who drinks them does not always have a deficiency of these particular vitamins. There may be a deficiency of some and an excess of others, but the tablets contain everything together, and instead of helping, the result is an imbalance.

For example, almost all B vitamins are more or less compatible with each other. For any vitamins, in order for them to have maximum effect, the preferred method of administration is through injection. This way they do not pass through the gastrointestinal tract, which may contain parasites and microbes that feed on the same vitamins. For example, B12 (cyanocobalamin) and folic acid are very popular with roundworms, tapeworms and other parasites. The larger the dose of vitamin in the tablet, the faster they will grow. In this case, the person will still experience a deficiency.

If you have a vitamin deficiency, you can understand this by weakness, pain in the eyes when looking at bright and especially white light. There is dizziness, poor condition of hair and nails, when they often fall out and break. Dry skin, prone to the appearance of various pustular rashes, has a reduced ability to self-cleanse. Also signs of vitamin deficiency are psychological states: irritability, drowsiness.

In this case, before taking any vitamins or mineral supplements, it is advisable to undergo a cleanse of parasites in the intestines. There are special drugs. After this, begin to restore your vitamin and mineral balance by taking an element that is very quickly depleted in the body, but is vital for it - iodine. Iodine is involved in all reactions of the body - in protein synthesis, in protecting the immune system, and so on.

Very often there is not enough of it, because iodine is actively removed from the body during

stress and other conditions, and there is not much of it in food. The amount of iodine in meat and plants depends on how much it is contained in the soil. It is advisable to take magnesium and potassium supplements, which help the functioning of the heart, muscles, nervous system, and B vitamins, which help to properly transmit impulses throughout the nervous system.

Whether they are synthetic or natural is not as important as their ratio, because the molecule itself remains unchanged. You need to understand that synthetic vitamins may have additional additives added to them, just like medications. You call them dyes, fillers, preservatives that maintain a long shelf life. Vitamins can oxidize in air and can react with each other. To do this, they put special substances that prevent this, so that they do not spoil.

All this can have an unpredictable effect on your body, ranging from allergic reactions to some kind of intoxication. If, for example, you cannot tolerate titanium dioxide compounds, which are found almost everywhere, you may experience hives or an exacerbation of herpes: this substance will begin to come out through the skin.

Natural elements (if the food is familiar to you, there are no allergic reactions to it) are preferable. In order to receive all the necessary vitamins and minerals in food, microelements and macroelements without synthetic additives, it is necessary that the food be varied, not plentiful, so that there is no monotonous nutrition. Monotonous, but plentiful and frequent meals lead to an excess of some substances and a lack of others, and it is important for the body that everything comes in balance. Moreover, in an individual balance for you, because you may already have these substances in stock.

It is very important to listen to your Higher Self through the body. I recommend that Irina teach every person who comes to school to communicate with internal organs. For example, to the liver, which is the energy station of the entire body, as well as its supply of nutrients and a library of knowledge about its organs. Biochemical reactions take place in the liver, which even affect the toes. All information, all substances that are in the blood and lymph pass through it.

That's why talking to your liver is important. The answer is a cluster of liver cells that work under the guidance of a single mind, although this would be an imprecise expression. It is rather part of the instinctive mind. Looking more deeply, of course, your Higher Self is the answer. When you turn to your liver, fill it with Light and ask what it likes, your energy will go there and renew your cells. Through it, the Higher Self will give an answer about what food suits you, what doesn’t suit you, and what you can replace it with if you don’t like it.

To get these substances in sufficient quantities, you need a varied diet. It is important that it is fully absorbed. It is advisable to eat food often, but in small portions, so that there are enough enzymes to extract vitamins and minerals from food, from the compounds that are there, and transfer them into your blood and your cells. The optimal meal for you is approximately five to six times a day, but in small portions. Between meals, fluid intake is required.

As I already said, the optimal ratio for most people, but not for all, is: 70% plant foods, 30% animal foods. By “animal” I don’t mean just meat. This is 15% dairy products, including fermented milk, cheeses. Milk contains many different substances. In addition to proteins, fats, carbohydrates, vitamins and minerals, it includes hormones and hormone-like substances for young animals. They have the ability to help renew human cells and support their immunity. Milk that has not been subjected to long-term temperature treatments, maximum pasteurization, and no preservatives are especially helpful. Powdered milk contains proteins, fats, calcium, but it does not contain the substances that are necessary to maintain immunity.

Peter: I would argue with some statements. In particular, in terms of the frequency of meals. Previously, we had, and currently in the Hindu tradition, food is maintained when meals are spaced at least eight hours apart. When the stomach is cleansed, food is completely removed from it, and cleaning at the cellular level is activated. American scientists did this and called it intermittent fasting, with enormous benefits for the body. Previously, our ancestors ate twice: the first time they ate when the sun was at its zenith, the second time when the sun was at sunset.

Irina: He’s talking about quantity now. If they caught a mammoth, can you imagine how much they could eat? In my opinion, I won’t feel like eating for twenty hours.

Peter: From the point of view of digestibility, maybe five times is useful, but from the point of view of cleansing of toxins, you still need to give the body an interval.

Irina: Toxins are formed not from food, but from cells that decay in your body. The food leaves a certain amount of ballast that goes down below. If another portion of food comes from above, this will encourage peristalsis to push down. Therefore, constipation in fasting people is common, especially if a person has weaned his intestines from contracting with enemas. Not because he has little food. He may have stool in his lower colon. But due to the lack of food intake in the morning or when he has not eaten food, the gallbladder does not contract, there is no release of a certain amount of bile, it does not stimulate the intestinal walls, it does not contract.

I have seen enough such people in my research. I studied people who fasted, did enemas, washed out all the microflora from the intestines and said that they were “cleansing themselves of toxins.” I don’t know what methods they advocated.

I told them that in this case it is necessary to take certain microorganisms protected in gelatin capsules when dysbiosis has arisen in the small intestine. They may not reach the thick one, there are pancreatic enzymes there. It was necessary to prescribe Lactobacterin with Bifidumbacterin in rather high siphon enemas, after cleansing ones.

As for cleansing from toxins, if you eat five to six times a day, you will, on the contrary, stimulate cleansing. Again, it depends on what you eat. Maybe that's what you mean? If you eat sausage, sweets or flavored chips, you should eat them after eight hours to cleanse your liver.

I'm talking about regular food that is available to everyone. Chips, lemonade, candy, sausage, alcohol - this is not everyday food. Even in Soviet times it was considered a holiday food. They didn’t buy lemonade for the child every day; it was a holiday for him. People like to buy Coca-Cola from you now (he shows). In this quantity, if it is a holiday food, it will not cause harm.

Waste products are toxins that are left over from your dead cells or from cells destroyed by microbes and parasites, as we have already discussed. Or, if a lot of substances are supplied that do not have nutritional value, but are preservatives, dyes, and other substances that protect against fungal infections.

If minced meat sausages are kept in the refrigerator for more than ten days, cold-resistant molds can feed on it and turn it into an unappetizing piece of meat with mold blooms and a very bitter taste, full of toxins that destroy the liver. People won’t want to eat this, so they add a special antifungal substance to it. Once in the body, it is considered a waste product, as it has no nutritional value. It begins to destroy Candida albicans in the intestines, but the same Aspergillus can grow in place of its colonies. Especially with reduced immunity.

Especially Aspergillus flavus.

I don't understand what kind of flags you got. Do you understand what he's talking about?

Peter: I understand what he's talking about.

Irina: He calls food overloaded with dyes, flavors, preservatives, and antibiotics toxins.

Peter: Medicines come out after twenty years - those that a person took in childhood, if he took them constantly, this has been proven.

Irina: He calls three substances slags. The first - from the destruction of our cells, those substances that could not be processed into useful amino acids, which remained unnecessary, like waste. The second are waste products that are formed from what is destroyed during chronic inflammation in our cells or as a result of the action of microbes, viruses, worms, and so on. They destroy and release their toxins, which need to be somehow removed from themselves - metabolic products. For example, when a person eats something, he expels metabolic products in a special room. If it is a microbe, a protozoan, something like Giardia or Trichomonas, some kind of worm, then they do not have a special room, they do it in you. Where it eats, it gets rid of metabolic products. These are all toxins for you, they have no nutritional value, they need to be removed. And third, the substances that go into food - dyes and so on, they also have no value.

All other substances are not slags. As for the substances that are formed from the digestion of food, these are metabolic products, they are eliminated successfully. Your kidneys and other organs are designed for this. Metabolic products do not become waste as a result of digestion of regular food. This is already different.

Nitrogenous metabolic products have never been considered waste in our science. These are the products that need to be removed. The kidneys have a special nephron. In the nephron there is a special part of the cell that records the amount of nitrogenous substances in the

blood and in the primary urine, which goes below. Measures. Only with this ratio, when the percentage of nitrogenous substances in the blood has dropped to a certain level, does this cleansing, that is, the passage through the nephrons stop.

Nephrons are able to very effectively separate these substances from others, so only in certain diseases of the genitourinary system can there be an accumulation of these substances in the blood. Then they are also considered slag, since this begins to interfere with the functioning of internal organs. Basically, I consider something else to be trash if you're talking about food.

Peter: Thank you, very informative answer. Lots of very interesting information. May ordinary people forgive us, those who were bored, but I think it will be useful for specialists. For me, some of my guesses were confirmed. I think I will use this information to my advantage. Mid, thank you!

Irina: Thank you, dear friends. See you again!

30.10.2021

Conference participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Peter is a neurologist;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms.

#362 Creativity for healing the Soul and body. Artist contactees, meeting with the Higher Self, art therapy.

https://blog.cassiopeia.center/tvorchestvo-dlya-isceleniya-dushi-i-tela-hudozhnik
https://www.youtube.com/watch?v=-hPRJBDlXTM

00:21 Introduction of participants.

Irina : Hello, dear friends! My name is Irina Podzorova, I am a contactee with extraterrestrial civilizations. Present today are: representative of the planet Esler PiosNior, who is an art historian and specialist in the study of arts on different planets, and Oksana Leadbeater. Hello!

Oksana: Hello everyone! I, Oksana Leadbeater, am an artist. I taught art classes in England for 24 years, went to Bali a year ago and now teach them here live and online.

01:05 Creativity for healing the Soul and body.

Oksana: If I may, I will start immediately with issues of interconnection. How does drawing people heal?

A little preface. I have been very active teaching people in England in private classes for the last ten years and I noticed one thing. People of all ages came to see me. Women came very often. I saw that perhaps people had some problems at home. Depression. Then this manifested itself in some serious physical ailments. But they started going to art classes once a week and little by little they started having fun. They were getting better, their relationship with their husbands and their health were improving.

It was so interesting and strange to me. I think: how interesting, I actually teach drawing, drawing techniques and painting. People sit, paint in oils, and at the same time I see that their relationships are improving, they are becoming kinder, happier. I thought maybe it has to do with drawing, that they become happier? Could you tell me what the relationship is? Why is this happening?

Irina : (speaks PiosNior) Hello, I greet you, beautiful Soul! I greet you, dear viewers! This question is actually very important, because with its help you can discuss the topic you need: using creativity to heal the Soul. This includes not only drawings, but also other manifestations of creativity.

When a person begins to turn on his imagination - one of the abilities of the mind, he activates his hidden powers of the Soul and opens a spiritual channel for communication with the Higher Self. First.

Second: he becomes himself in the sense that he expresses hidden feelings and desires through art, through creativity. At the moment of drawing, you may not control the information that comes from the depths of consciousness. You can be who you are. People often restrain themselves in behavior and speech and accumulate negative emotions. As a result, blocks are formed in a person's etheric body, which affect not only the mental state and spiritual level, but also the physical body, creating certain diseases.

Drawing, music, sculpture, writing books, poetry, literature, all forms of creativity (shows embroidery) contribute to the healing of the Soul. Those feelings and emotions that have been suppressed come out in consciousness and are somehow displayed on material media. Thus, this negative block is already partially discharged. It no longer has such a detrimental effect on the physical body and the human psyche. That is why it became easier for those who came to you. Through drawing they removed from themselves the energy that was destroying them. If you look at those drawings, their theme was related to experiences.

05:28 Mandalas.

Oksana: It's appropriate to ask: let's say, when people draw mandalas, what happens to them? Is this also some kind of therapy?

Irina : (says PiosNior) Mandalas are an image (very often transmitted in contact with subtle civilizations) of symbols of the Spiritual world according to the laws of sacred geometry, symbols of the inner world of man. Sometimes portals to other worlds are drawn in the form of mandalas.

He asked you and the audience to show the drawing so that you, as a person with an artistic mindset (such people are usually very sensitive) could appreciate the energy and general tone of the picture. I want to emphasize that it is not drawn, but embroidered. She was brought to me as a gift.

Oksana: Yes, very beautiful, great.

Irina : How do you feel?

Oksana: Energy of the heart, beauty, love, very beautiful.

Irina : Yes, do you feel your consciousness expanding?

Oksana: Yes, yes, it is somehow expanding. Great job.

Irina : See, there are symbols here. This is a mandala. There are a lot of symbols embedded here. There is spirituality. Here are the beings of the Spiritual world, the circle, the triangles, which also represent certain energies. Angels are also painted here and embroidered with beads. Beautiful?

Oksana: Yes, very beautiful, great. You said that the human Soul is healed during the creative process. Does this then transfer to the body? Because sometimes people go to my classes for several months, and little by little some aspects of them are healed. Is this a coincidence, or is everything connected?

Irina : It seems to me that I have already answered this question and said that physical illnesses can be gradually cured if they are caused by certain blocks. Gradually (he says), not right away.

08:04 Drawings as tips from the Higher Self.

Oksana: The next question is also from my long-term practice. A girl, for example, decided that she wants to get married. I came up with an idea and started drawing the guy's face. At some point this happens, she meets such a guy with the same face, then marries him. Another girl wanted to get pregnant. I started drawing a little baby and got pregnant. What it is? Is this a visualization? How and why does it work?

Irina : Where do you think this woman got the image she drew? This image already existed in the memory of the Higher Self, information was laid down about which Spirit she agreed with for life together, and the second - with which Spirit she agreed so that he would incarnate through her. When these girls began to worry about the timing of the fulfillment of what they had thought out in the Spiritual world, their Higher Self reassured them in this way, sending an image as a sign that what they had planned would soon be accomplished. This is contact with the Higher Self (says PiosNior).

Oksana: Could this still be a catalyst for events? She drew him and met him faster, or not?

Irina : What do you mean faster? In the Spiritual world there are no concepts faster or slower. Everything there is one in time. When she drew him, in the Spiritual World it was at the same time that she had met him, and even at the same time that they had already lived for several years.

10:10 Contacting through drawing.

Oksana: Next question: we know of cases when, through a chronicle, through "writing," a person became a contactee. Can any normal person become a contactee through painting?

Irina : What does normal mean?

Oksana: Anyone, even not a very good artist. He just starts drawing and through drawing he enters this state.

I heard about a case when a person simply starts moving a pen over paper, writing something, and ultimately he comes up with words and phrases. It turns out he is a contactee?

Irina : A person of any occupation, any profession can become a contactee, if he desires it, if his vibrations match some curator (they are different), and if his sensitivity is sufficiently developed, and this depends on faith. If there is not enough faith in the Spiritual world, the words and actions of the curator will be perceived by the person as his own, and he will simply discard them as some kind of nonsense.

11:34 The talent of the artist.

Oksana: Okay. Tell me, please, where does an artist's talent come from? Why are some people considered naturally talented while others are not? Although, for example, in my opinion, every person can develop talent. There are no people who cannot draw. People often come to me and say that they don't know how to draw.

Irina: I can't draw.

Oksana: My question: is it something innate, or is it still, if we do this...

Irina : If we consider talent as a set of qualities, then the talent of an artist really requires several conditions. This is not only a rich and developed imagination, but also the ability to control fine motor skills of the hands, for example. And the ability not only to remember visual images well, but also to transfer them to paper, and not to be distorted during memory. This is called photographic memory. Of course, it can be developed within some limits.

But I want to say that if a person has this set of innate qualities, which depends on the total experience of the Soul in all incarnations and its individual tasks, the Higher Self enhances certain qualities, depending on the task. Moreover, this gain can change during life. A person can be a janitor and suddenly become an artist, and vice versa.

His mentors, through the Higher Self, with the consent of his Higher Self, strengthened these abilities so that he would complete some other tasks of his incarnation, if he completed the one with which he came into this incarnation. Other tasks may appear, including not only for him, but also for the people around him, so that he can help them with something, for example, and thereby raise his spiritual level and the spiritual level of other people. This artist's talent (a set of certain qualities that make him more capable) does not in itself make him an artist. If he does not develop these abilities in himself with constant practice, then his results will be worse than those of someone who does not have talent, but has worked on himself.

To test the presence of photographic memory, you need to put a simple object in front of you, for example, a glass (PiosNior shows) with some kind of color pattern. Look at it for about a minute, turn away, take colored pencils and try to depict the drawing, the location of the glass, and how the shadow fell. A true artist will depict these details without difficulty. He won't forget anything because it will be stored in his mind.

But it happens that fine motor skills of the hands are not developed. It happens that they do not move in the direction in which the mind sets, there is not enough conditioned reflex. A person may not be able to draw what he remembers. This may upset and disappoint him, and he will give up trying to learn.

Fine motor skills can be developed in many ways. There are exercises, and again constant practice. Not a single artist was born the way he became, for example, after 10 years of work. Everyone made mistakes. Everyone had pictures that were drawn schematically. The volume and reality of the picture do not appear immediately.

16:15 Art on the planet Esler.

Oksana: Please tell me, did our humanoid friend draw himself either in previous incarnations or in this one? Or is he a plasmoid? Let him tell you a little about himself, if possible.

Irina : No, I'm a humanoid. I live on the planet Esler, where art is very developed. Our drawings are created not with paints, but with a tool (PiosNior shows), similar to a stick from which a ray emerges. The result is lines in space, which are displayed on a certain medium, just as light is imprinted. We don't have paper like you. There is some kind of fabric. We can draw on it, somewhat reminiscent of crayons. We teach this to children. At one time, when I was younger, I taught art history to children. We learned to convey images and put our attitude into them. For example, three artists, looking at the same landscape, will depict it a little differently, focusing on the sky, plants, or something else that will fit more into the artist's Soul.

I feel that I was, among other things, embodied on Earth as an artist. I didn't consider this question in detail, I didn't find out about the last name, but I was embodied in several. Not only in the artist, but in the people of art on Earth. I saw from the outside when I looked through my incarnations, but I did not recognize who it was.

18:40 The meaning of creativity for the Soul.

Oksana: Please tell me how important it is for any Soul to express itself through art, through singing, dancing, music, drawing? Is it desirable for every Soul to do this in every incarnation? I believe that through creativity a person receives charge and energy for all other things in his life. Such a strong, powerful charge. Does he agree with me?

Irina : Yes, of course, I agree with you. But each person must decide for himself how important art and creativity are to him. This is not only pleasure, but also work. Indeed, the creativity of the Spirit increases vibrations and allows us to become like the Creator of all worlds. This, in turn, enhances the energy of a person's thoughts and, among other things, strengthens his thought forms that he sends into the world. This, indeed, can bring the embodiment of these thought forms closer into reality, if, of course, this corresponds to the goals and objectives of the embodiment. If a person dreams of something that does not

correspond, the Higher Self can block this embodiment.

It is very important to do this not in isolation from your Higher Self, but in contact with it. And not for yourself, but for the entire people where you live, with the desire to give this beauty as a form of Love to everyone who will look at it. When you create, stand in the place of someone who will contemplate your creativity, then you will merge with him and convey what the Souls of many need.

21:00 Spiritual levels before and during incarnation.

Oksana: Please tell me, if a person is considered a talented artist (he was born already talented), from what spiritual level, from what physical level, does this Soul usually come? Or are these some kind of Pleiadian civilizations (I mean previous incarnations), or some certain spiritual levels? You said there are from 1 to 60?

Irina : These are plasmoid civilizations. Our spiritual levels are from 1 to 24. (Says PiosNior). The experience can be anything: on Earth, in Space, and in plasmoid civilizations. Regarding spiritual levels, there are Spirits who most often engage in art. There are even special names for them. For example, level 13 is called “aesthetes”. These are those who are fascinated by the beauty of the world around them. Even in childhood, they can look at a butterfly on a flower for hours and not disturb its tranquility, forgetting about everything in the world.

There is a level 15, which is called “inventors”. There they enjoy not just the contemplation of beauty, but the beauty that they themselves create. They can invent not only objects of art, but also new ideas, new technologies, some new psychological techniques. This is also creativity. The 13th and 15th are the levels of Spirits who enjoy this process.

Other levels, naturally, can also engage in creativity at their own level. For example, Angels from the 17th to the 24th can create for the sake of salvation, cleansing, and healing of others.

Oksana: Please tell me, level 14, what do they do?

Irina : The 14th is called “researchers”. They study the world around them, take it apart, they have a very developed desire for knowledge. These are analysts, mathematicians, physicists. Since childhood, they can organize experiments that are not understandable to the people around them.

Oksana: Can I also ask about the 11th and 12th levels?

Irina : The 11th is “consumers”. This refers to consumers of the pleasures of the material world. They came here to enjoy the material world and understand that there is spiritual pleasure.

And the 12th is “builders”. These are the builders of the material world, they came here to learn how to build something and be responsible for their actions.

Oksana: And the 16th?

Irina : “Seekers.” The 16th is the transition from the average level to the level of Angels. Angel levels from 17th to 24th.

The 16th is a transitional level, it is considered very difficult. A seeker may not be at peace in his Soul since childhood. He seeks spirituality in all philosophical and religious movements he encounters. He can go from sect to sect, from religion to religion, nowhere finding the Light that he feels.

It will be bad for him, negative, if he leaves these religions and sects with condemnation. This will lower his vibrations. And if he finds something common in all the religions and books he has studied, then he will raise his vibrations and already in this life will move to the Angelic levels. The seeker constantly strives for perfection.

Oksana: Tell me, what about the 18th?

Irina : This is “Guardian Angel”.

Oksana: Please tell me what spiritual level does a person's Soul get to when a person enters this stream and draws?

Irina : (says PiosNior) It depends not on what he draws, but what feelings he puts into it. The level is determined by vibrations. Spiritual vibrations consist of several components: thoughts, states of desire, emotions, will, feelings. The instinctive part acts through feelings.

After leaving incarnation, the Spirit returns to the spiritual level that it has reached at that moment. And over the course of life it can change.

26:30 What is important before leaving embodiment?

Oksana: In connection with this question. Maybe it makes sense for us all to prepare for death? When a person is old, for example, maybe it is necessary for him to draw? When he already feels, for example, that he is dying tomorrow or the day after tomorrow, so that he sits, enters this state, draws, raises his vibrations? And when he left, he went to higher levels?

Irina : (says PiosNior) I believe that it is more important for earthlings before the death of their physical body, firstly, for themselves and their relatives to admit to themselves that they will soon leave incarnation. After this, if he wants to raise his vibrations, he must not be afraid, calm his fear, calm his instinct of self-preservation, know the eternity of his Spirit, which will not disappear along with the body. It is very important to connect with your Higher Self, talk to him, ask how far the tasks of incarnation have been completed, what can be done in the remaining time before exit. The last time left can be the most precious if a person passes it consciously. The most precious spiritual experience. Drawing can help if a person is conscious, if he, without fear, without condemnation, conveys the images that come in connection with death.

It is very important to treat death correctly. It is quite natural not to seek death for the physical body, but to strive to live. But don't run away from death, don't be horrified by this thought. Death is as natural a phenomenon as life. You don't need to strive for it, you need to meet it calmly.

28:52 How to start drawing?

Oksana: And the last question. What advice or guidance can you give today regarding painting as therapy?

Irina : (says PiosNior) Don’t be afraid to express yourself creatively. Even if you don't have a teacher nearby, take a piece of paper, a set of pencils and simply draw, for example, what you remember from yesterday. Depict the feeling of your Love, the Sun as you imagine it, the stars, the Universe. Draw your Soul, what it looks like, what features differ from its body. You don't have to be an artist to create. The main thing is not to think about mistakes, but to express yourself as best you can.

You don't have to show this creativity to anyone. It may just be personal for you and your family. You should not be afraid or embarrassed that you will be judged for, for example, your inability to draw. Fears need to be completely let go. Yes, you are not perfect. But your imperfection is an opportunity to learn something. This is actually a wonderful state of inexperience, naivety, when a person has a path of knowledge ahead of him.

Teach your children to draw. Don’t just draw, but take it more calmly. So that they do not evaluate, do not compete with each other, but look into their Soul, try to express it. Do not judge your comrades, but help others with your approval.

Oksana: Specifically for children, does it make sense to ask them to enter a light meditative state before starting to draw? Will this help the process?

Irina : You can do it that way. Some children do this themselves very well. Some may be asked to concentrate. There is a very good technique in your psychology (I learned about it from MidgasKaus, who studied your psychology), when a child draws his family, himself in this family. Your psychologists can say a lot about what kind of family relationships a child has when they see his drawing. And, as I said at the beginning of our conversation, these are really the child’s

experiences, which he may be hiding from everyone because of some fears. And in the drawing he will reveal this, because otherwise it will not work. His feelings will come out on paper in one line or another, or in the facial expressions of the people drawn.

Oksana: Great! By the way, when I work with children, I also feel that they don't have this: I don't know how to draw, it doesn't even occur to them. Nobody told them that they couldn't draw, so they just drew. It's the adults who are more afraid. Thank you very much for today's broadcast, it's very nice!

Irina : Thank you, very interesting questions.

And I thank you, dear viewers! See you again!

Oksana: See you, goodbye!

November 03, 2021

Conference participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Oksana Ledbiter - artist;

PiosNior is a representative of the planet Esler, an art critic, a psychologist, a specialist in the transmission of sound vibrations for the purification and harmonization of space. Specialist in the study of arts on different planets. Previously on Earth he was repeatedly incarnated and developed as a man of art and an artist.

#364 Sacred geometry: the path to understanding reality. How to be conscious in every moment of life?

https://blog.cassiopeia.center/Jrfy6jCgPeH
https://www.youtube.com/watch?v=TbEVwn9VSOY

00:21 Introduction of participants.

Irina: Hello, dear friends! My name is Irina Podzorova. I am a contactee with extraterrestrial civilizations. Today next to me are MidgasKaus from the planet Esler - a biologist, psychologist and specialist in alien civilizations, as well as a representative of plasmoid civilizations of the 19th density level from the planet Jupiter. He, at his level of density, directs the transfer of artistic images to Spirits embodied in third density. His name is Harbius.

Maria: Good afternoon, dear friends. Today we have a very interesting conference on sacred geometry. Our guest is my friend, master of sacred geometry Reinhard Nau. Today he will ask some questions to our friends about sacred geometry.

Райнхард: Yes, my main name is Reinhard Nau, I have been dealing with the subtle world with its effects on us humans for over 30 years, how does sacred geometry affect us. During this time I attended many training seminars and continued to expand my own potential.

To find an explanation for creation, why creation works the way it does. Years of experience from working with people and the findings from research into geometry and creation mean that I am now able to offer people help with a wide range of topics.

Maria: I'll translate what Reinhard said. For more than 30 years he has been working on thin-material worlds, as we call them, plasmoids. He receives information about various geometric figures, tries to

understand how they act on our universe, on our level of density, tries to help other people with the help of sacred geometry in their lives. Today he is especially interested in communicating with our guests.

Irina: Very nice. Harbius said that the sounds of the Russian and German languages are equally incomprehensible at his level of density, but he senses people by the movement of their Souls.

Райнхард: Sacred geometry is the basic building block of all living universe.

Maria: Reinhard would like to know if sacred geometry is the basic building material of all life in the Universe?

Irina: He just asked me why the Spirits living in the same density invented different languages? It would be easier to communicate on one.

Maria: I think our handlers from the Interstellar Union can explain why the hybrids they created were given different languages in different parts of the planet.

Irina: (Harbius) They gave you the opportunity to combine these different languages into one and communicate, understand each other.

Maria: Obviously, we are given different languages, as I understand it, and different appearances (we have four main races based on skin color and face type), so that, despite our different appearances and languages, we learn to unite. This is preparation for a meeting with interstellar friends, with other civilizations.

Irina: I understand, there are many languages in the Interstellar Union. There the planets developed autonomously from each other, independently. There could not be one language, and now there are many languages. And you have one planet. You are constantly in contact with representatives of other regions of the planet. Just for their convenience, they could come up with some kind of common earthly language. We have Esperanto, why not?

Maria: English is also a very common language.

Irina: (Harbius) Every earthling should know the universal language along with his native one. Then it would make communication easier.

(MidgasKaus) Indeed, this is difficult for a plasmoid to understand. They all understand each other (at their level of density) at the level of thought.

Mead suggests telling us what our new guest looks like before starting the conversation. It looks like a white ball, approximately 80 cm in diameter. Inside this white ball are two tetrahedral pyramids, one with its apex up and the other with its apex down. They are connected like this.

Maria: Do they rotate?

Irina: Not yet.

(Harbius) But can rotate in different energy states that correspond to your emotions and feelings. This internal reflection of our chakra is the “spiritual heart”, and they have such a pyramid. Now golden rays have begun to emanate from this pyramid, from the upper part, and violet rays from the lower ones.

Ready to answer questions.

06:05 Sacred geometry in the Universe.

Maria: We have already asked the first question. We would like to know if sacred geometry is the basic building block of all life in the Universe?

Irina: The main building material of all life in the Universe is the various energies that come from the Source of the Universe according

to the laws of the Divine Mind.

Sacred geometry is a way of describing reality based on the formation of spatial structures. This is not a building material, but a way to describe how this material forms various material forms - from huge galaxies to tiny microorganisms.

Maria: Does this apply to both dense-material and subtle-material worlds?

Irina: (Harbius) Yes, only at each density there are different spatial structures. There is no such word in our language. In other densities, space is different. It is more extended, one might say, it has a different extent. Dimension, as you said.

07:46 Plasmoid about people's awareness.

Райнхард: Into the sacred geometry of the development of human consciousness on Earth.

Maria: Next question: does sacred geometry contribute to the development of human awareness on Earth?

Irina: He, like the Sun, has rays in all directions. Sacred geometry contributes to the development of human awareness if they approach it with a sincere desire to understand the source of sacred geometry. And this sincere desire to understand is manifested in people through contact with the Divine within themselves and through contact with those curators who conveyed these images and signs, putting their own meaning into them.

Maria: How is it possible to raise the awareness of humanity on Earth?

Irina: Awareness is raised not for the whole Earth, but for its individual representatives. The people themselves who want to raise it with their own labor of their Souls: Love, faith, hope, wisdom, good deeds and

high vibrations of their feelings. It is possible to come to God not in a crowd of your own kind, but only in person. This does not negate mutual assistance to others, but includes a moment of personal responsibility. Everyone should want to increase their awareness.

The awareness of a civilization consists of the awareness of individual Spirits embodied in this civilization. True awareness is impossible without acceptance, without recognizing the right of every being to be unconscious. For some Spirits, unconsciousness is a necessary way to understand reality and get out of this unconsciousness. All you can do to help your loved ones is to become conscious, to show the advantage of awareness in every moment of your life.

(MidgasKaus) Indeed, to express the fullness of the concepts he talks about, even words in the language are not enough.

(Harbius) Your words are very flat, clumsy, not voluminous and do not express even a hundredth part of the reality that can be expressed by our ultra-frequency language.

Maria: Harbius, this is a feature of our civilization. I think that the Creator's plan was for conscious Spirits to learn to communicate and transmit information to each other even on such a simple level.

Irina: It would be even worse if I tried to explain to him what a bus is in the language of his concepts, in ultra-frequency language. In the image, he would understand how this car drives, due to what - it would take a long time to explain. Harbius, I remember one interaction with plasmoids in the forest, with me and my students. One of the students came into contact with a plasmoid, which began to question him: “Why are you moving on some carts, under which some black circles are rotating, and what does this mean? How do you move on these carts?

11:56 Sacred geometry and Divinity.

Райнхард: Now surrender to sacred geometry and get the connection to your own divinity.

Maria: Reinhard wants to know if sacred geometry is used to connect with one's own Divinity?

Irina: Are you separated from her?

Райнхард: Partly yes, partly no.

Maria: Partially yes, partially no.

Irina: “Partially yes and partially no” - this does not happen, there is only “yes” and “no”.

Райнхард: Yes, there are those who are connected and there are those who are not for wanting to feel that way.

Maria: There are people who feel that they are connected to Divinity, and there are people who do not feel connected to Divinity.

Irina: What are they connected to? He is a bit of a researcher himself.

Райнхард: Yes, I would just say that the sacred geometry makes it easier for you to find your way into this area.

Maria: Reinhard says that through sacred geometry it is easier for people to connect to this area.

Irina: Yes, he repeated. Does sacred geometry make it easier for people to connect with this area?

Maria: It's about Divinity.

Irina: No, he asked now: what are those who are disconnected from the Divine connected to?

Maria: I just told him what he wants to explain. All people are truly connected to God, it's just that some people realize and feel it, while others don't realize it and don't experience it that way.

Irina: They don’t realize it and don’t live it. Now it's clearer. Thank you Maria, you made my day happier.

Maria: I am very glad, I am sending you the Light of my Love, my Heart. I feel you as a very close being.

Irina: (Harbius) To increase the percentage of awareness of the connection with your Divinity in connection with sacred geometry, many conditions are necessary at once. How can sacred geometry help in increasing the percentage of awareness of connection with your Divinity? Helps to see Divine beauty and harmony in the world around us. It brings us even closer to Divinity and unites us with Him into an inseparable entity if a person can see the symbols of sacred geometry in the surrounding nature.

15:00 The meaning of geometric shapes. Number 3.

Irina: The outline of your plants, mountains, clouds, animals, animal body parts, their colors are not a random combination of elements. Sacred geometry uses geometric shapes, which are often symbols of inner mental states.

For example, an angle in any geometric figure is understood as a symbol of limitation and isolation. This isn't always a bad thing. Sometimes narrow-mindedness and isolation happen for negative things. I am aware of the custom among your people of placing their children in a corner as a symbol of restraint on their actions. This action is very ancient, older than your civilization. It comes from the subconscious memory of the fact that this figure limits freedom.

And then we look at the main geometric figure without angles - it is a circle, a circle or a sphere. What does the absence of angles in this figure mean? It acts as a symbol of harmony and connection with your Divine Self. This is the original designation of the source of Divine

energy, all-accepting and all-pervasive, because there are no angles, limitations or contradictions in it.

Now look at round objects in nature. Round objects in nature are primarily stars, including your Sun. These are all planets where humanoids live. The shape of a sphere is the part of your body in which the organ responsible for your mind is concentrated. Also round... (no, that's too much!)

Maria: Don't be shy, you can tell me, everyone is very interested. We are having a scientific conversation.

Irina: An oval is a shape close to a circle; an oval also has no corners. You can look at other oval and round parts of your bodies. The organs found in men and women, where cells are produced to reproduce their own kind, are also round in shape.

What does earthly and cosmic nature hint to you? She tells you in the language of sacred geometry that all of these objects are a source of Divine energy at their level of manifestation.

Further, if we look at information about other figures, we will see that the number of angles in them differs. If there is more than one angle, then this figure denotes a certain quality, limited in time. Let's take a triangle for example. It has three corners. Each number has its own energetic vibration. The number "3" denotes the vibration of manifested strength, activity and the establishment of one's own order.

19:40 Values of numbers from 1 to 3.

Райнхард: From number 3 onwards, life is only possible.

Maria: He says that life begins from the number "3".

Irina: I was already given approximately this information.

(Harbius) The number "1" denotes the Absolute or sphere.

The number “2” denotes the line or deployment of the Absolute in space, creation, the first creation of someone. Contact can mean a connection, the appearance of someone in the Universe.

The number “3” denotes the activity of the Absolute and the mind it created to change the Universe. It is indicated by a triangle. Look at triangular-shaped objects in nature: mountains, volcanoes, also some parts, animal and human organs. They also have a triangular shape. All these organs are responsible for activity. For example, humans have triangular-shaped skeletal bones, and the skeleton allows you to move in dense environments and resist external forces, pulling, and squeezing. A mountain is a symbol of movement, the aspiration of the Earth towards the sky. The volcano is a symbol of the aspiration of earthly fire towards heavenly fire, towards the Sun.

He has now turned into some kind of orange ball and is rejoicing.

(Harbius speaks and shows the waves) Waves in the sea, if considered not dynamically, but statically, also have a triangular shape. Waves are a symbol of the movement of water. Very often they are directed towards the earth, like the desire of the elements of water to merge with the earth.

The leaves of some plants also have a triangular shape. A leaf is also a movement of energy (shows the Sun: the energy of the Sun passes into the earth). If you look at the shape of the tongue, it has a base and a tip. This is also a triangle. This is a symbol that you show your activity energy through speech. And even your dogs and cats have triangle-shaped ears because they spend more of their brain energy listening to their environment.

People create triangular-shaped artificial objects as a symbol of activity. For example, ancient spears and arrows were triangular in shape because this is a symbol of flight. A pyramid, you talk a lot about pyramids, is not just a triangle. This is a connection of several triangles under one apex directed upward, which means the direction of all mental, physical and spiritual forces of a person towards the Absolute.

24:10 Balance of chakra energies and the inner vision of a person.

Райнхард: General question in advance: why do people react to this sacred geometry in a way that you don't normally experience? Can you see that?

Maria : Irisha, do you see the figure he is showing?

Irina: Yes, this is an octagon and a hexagon. Yes?

Maria: Yes. He makes these rings. A bag made of silk fabric, inside there is a ring. On top he draws various geometric shapes. When people stand above them, they enter different states, begin to move somehow, to see something.

Irina: I'm looking at it, let him show it again. If the inner circle is made blue, the triangle that is directed downward is red, and the one that is directed upward is yellow, then this will harmonize the first, third and sixth chakras of a person. The same percentage of energy in the first, third and sixth chakras allows you to turn on your inner vision using the energy of your will and your instincts.

26:06 Influence of copper on contact with plasmoids.

Райнхард: ...made of copper or gold and gold-plated, it depends?

Maria: I asked what material the ring was made of. For example, it can be gold plated, i.e. from different materials. He had a question: How important is the material from which the rings are made?

Irina: If you want good contact with representatives of plasmoid civilizations, then pure copper, 97-98 percent pure, is most tuned to the frequencies of plasmoid civilizations.

Maria: He really has these copper rings inside, in bags.

Irina: The plasmoids told him.

26:55 Plasmoid Ashua. Drawings that influence people's energy.

Maria: Can you see who his curators are, who gives him all these ideas? Is there someone next to him now?

Irina: Masha, if you look carefully, do you see such space on his right hand? Standing a little further away, I see, is an Angel with white wings, and closer to him is a crystal changing its shape. It has now become transparent, but violet rays are coming from it. I'll try to talk to him, I'll send my phantom to him.

(Ashua) My name is Ashua, I am from the planet Venus, 32nd density level. My city in my world is known on Earth as Asgard.

Maria: How interesting what kind of guests we have! Stands aside, doesn't say anything. We salute you!

Irina: He says that he knows Harbius, they know each other.

Maria: That Curator Reinhardt?

Irina: (Ashua) Not only me, he has many curators from the Spiritual World. His prayers more than once saved loved ones, because with his prayers to God he sent them the Light of his Love.

Райнхард: Yes, there are more rings, so there are different rings on these levels that you can work with that reach people on different levels.

Maria: He made several different rings with different shapes that affect people differently.

Райнхард: Yes, because these rings work at different levels.

Maria: For example, this ring. Do you see him?

Irina: Yes.

Maria: Six-pointed with a flower of life inside.

Irina: (To Ashua) “Flower” is the “matrix of life.” This is how the energy structure manifests itself in the subtle material world when it is assembled into an atom for the first time.

What effect does it have on a person? Harmonization of the fourth chakra. A person begins to feel his feelings better and distinguish pure from distorted ones.

Райнхард: Yes, there are now two basic rings, I can make one now that looks a little different, he still has it. A calm...

Irina: I see just blue.

Maria: The blue one is not a rhombus, probably an octahedron. I didn’t have time to see how many corners there were.

Irina: Also the “matrix of life”, slightly different colors.

(Ashua) This design with a white ball in the center is aimed at opening and strengthening the spiritual channel with the Higher Self.

Райнхард: Yes, then there are now teenagers, those are the sand

Maria: ...noch diese Ring.

Irina: This helps to harmonize the first and seventh chakras, so that a person is both in contact with the Earth and in contact with the sky.

Even I felt that the first and seventh chakras were activated.

Райнхард: This ring leads to the higher self, that's true.

Maria: Confirms that this ring connects to the Higher Self.

Irina: (Ashua) This strengthens the general field, strengthens immunity, health and at the same time activates the sixth chakra. Makes the etheric field dense.

Maria: I also felt the sixth chakra. Such light pressure.

Irina: Yes.

Maria: From one picture. I will say that I tried these rings. I stood over them. He gave me two rings. I chose one (it symbolized “air”), he gave me the other with “fire”. I began to be lifted off the ground. My hands rose, I literally stood up on my toes. I stood barefoot, but on the very tips of my toes, like a ballerina, and felt that I was about to be torn off the ground. Naturally, I was scared by such an unusual sensation, opened my eyes and tried to ground myself as quickly as possible. Some rings have this effect. I think that by using these rings in various combinations, we can help people harmonize and improve in various directions.

32:22 Colors in sacred geometry.

Maria: Please tell me what role do colors play in sacred geometry? Does a certain color matter?

Irina: (Ashua) Yes, often red triangles are drawn, like Irina’s in the picture.

He asks me to show him and you the painting that was given to me. I will not speak. How will you feel? The creatures of the Spiritual world are depicted in conjunction with symbols of sacred geometry. Moreover, it is not drawn, but embroidered.

Maria: Maybe you can show this to the camera?

Irina: Show me? And you say what you feel.

Reinhard: Das sind ja Gesichter drin.

Maria: My head started to expand.

Irina: What does he have?

Райнхард: Yes, assuming that is different has something to do with this.

Maria: He says that it is connected with this figure.

Irina: Which is responsible for the third eye?

Райнхард: So writing the spirit, opening the main.

Maria: This figure serves to open the sixth chakra, expand consciousness. Now it’s as if my pineal gland began to expand, as if my head began to expand.

Irina: Tell me, is the drawing beautiful?

Maria: Very beautiful! It's all embroidered.

Irina: Did you see pearls there?

Maria: Yes.

Irina: In the center is Jesus Christ. And here are the Angels, this is the Mother of God, this is the Lord of hosts - God the Father. Tell me it's beautiful!

Maria: Very beautiful!

Irina: Ask: does this correspond to sacred geometry?

Reinhardt: Yes, definitely!

Maria: Yes, that's exactly it!

Irina: I think, how did this man sit and embroider?

Maria: Yes, the work is really amazing!

Maria: Reinhard also built quite large objects. The dodecahedron is huge, where a person can even stand, or objects can be placed. He built a figure, a wooden circle with a copper spiral embedded in it, which you can also stand on and harmonize with.

Irina: (Ashua) Stone circles on the Kola Peninsula and labyrinths such as Stonehenge are also built according to the laws of sacred geometry.

Райнхард: Can you access the subtle control levels of the mental, astral and physical body with this ring?

Maria: Last question: is it possible to influence different levels (astral, mental) with the help of these rings?

Irina: What does it mean to influence? How and why?

Райнхард: To simply either regenerate or clean a field?

Maria: Is it possible to influence subtle bodies through these rings?

Irina: For what?

Maria: To harmonize them, strengthen them, regenerate them.

Irina: Rather, they are conductors from the subtle world to ours.

Райнхард: So the question is to what extent the spiritual world can now do this in people in the future?

Maria: He asks how else you can interact with plasmoid worlds and receive help or some kind of hint from them?

Irina: With the help of the Higher Self. In different ways: with the help of poems, songs, speaking in other languages, in the end.

Maria: We thank our friends for very interesting answers and information, for getting to know us, for their Light and Love towards us!

Irina: And I thank you, Maria, and Reinhard, and all the curators for the very interesting answers. Thank you, dear friends and viewers, for watching this video! See you at new conferences!

Райнхард: I didn't understand that.

November 10, 2021

Conference participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Maria Sokalskaya – moderator of the VKontakte group, head of the “Online Learning” project and other “Cassiopeia” projects;

Reinhard Nau – master of sacred geometry;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms;

Harbius is a representative of the planet Jupiter, a plasmoid of the 19th density level, the leader of the transfer of artistic images to Spirits embodied in third density;

Ashua is a representative of the planet Venus, a plasmoid of the 32nd density level, Reinhard’s curator.

Video in text
May 31, 2023

#365 The process of incarnation of the Spirit on Earth. Communication with a specialist on alien life forms MidgasKaus from the planet Esler.

---

https://blog.cassiopeia.center/process-voploshcheniya-duha-na-zemle
https://www.youtube.com/watch?v=t7Ly7c-WxOc

00:21 Introduction of participants.

Irina: Hello, dear friends! My name is Irina Podzorova, I am a

contactee with extraterrestrial civilizations. Today my curator is present next to me - a biologist, psychologist, specialist in alien life forms MidgasCaus from the planet Esler. We will talk with Maria. Hello Maria!

Maria: Hello, Irina. Hello MidgasCaus. Very nice.

Irina: Introduce yourself, who are you, where do you live?

Maria: I am a general practitioner and acupuncturist, working in the field of Chinese medicine in Canada. I have been running my own clinic for many years.

Irina: Okay. Do you have questions for MidgasCaus?

01:05 Differences in the energy of earthlings and aliens. Chakras.

Maria: Yes, I have questions regarding the bioenergy of people: humans and humanoids. At first it would be very interesting to know how much we have in common, and what differences there are in the energy system of humans and humanoids.

Irina: (MidgasCaus answers) You, earthlings, have an energy field based on seven layers, has seven layers of manifestation. Representatives of the planet Esler have twelve fields. That is, you have seven chakras, and we have twelve. They are about the same as yours, but there are others in between. Each chakra has a specific spectrum of color. We have more of these flowers. For example, we have two more types of green, white in our aura, and all the colors that are characteristic of you. There is also (he is showing me now) something between red and brown.

Maria: Ok. Does the number of chakras they and we have depend on the planet we live on?

Irina: Yes, it depends on the energy of the planet. Depends on body type. Chakras are a symbol of the manifestation of the Spirit through a specific body - the physical. The spirit manifests itself through the body

in such a way that its energy, which contains certain qualities, is reflected through certain places in the body. It depends on your body type.

Maria: Does it depend on genetics?

Irina: So this is the type of body - genetics, energy, climate, magnetosphere, gravity, many factors.

Maria: Okay. What if, say, you take a person and place them on their planet? With human genetics on their planet, will there be a difference in energy development there? This refers to a small child or even a pregnant woman who carries a developing fetus within her.

Irina: Of course, there will still be an earthling with seven chakras. If you already have such a nature, he will be born on any planet.

Maria: Ok. That is, the planet does not have such a strong influence on the number of chakras. Mainly genetics.

Irina: This genetics was formed on a certain planet, so it will be the same there.

Maria: Absolutely, yes.

Irina: (Mead speaking) You are influenced not only by the genetics of the animal from which the evolution of your species began, but also by the genetics of those creatures from outer space who shared the gene pool with you. Their genetics also influences their energy.

05:05 Energy processes during conception. Formation of chakras. When does the Soul enter the child's body?

Maria: This is an interesting question. Bioenergetics during conception. Initially, as I understand it, energy always leads to physiological changes, cell differentiation, and so on. What happens

energetically during conception? It is interesting to know the energy picture at conception. And how does the organism, the fetus, begin to develop energetically?

Irina: At conception, the Soul of a person appears together with his guides from the Spiritual world. The soul is that part of the Spirit that has vitality. We can say that she is completely imbued with vital force, and, figuratively speaking, she holds part of her vital force in her hands. She doesn't have physical hands, but how she holds it (he's showing it now). They appear at the time of conception. And the Spirit is present, that is, that Spirit, the Soul that will incarnate.

Spirit, Soul are one and the same. There is simply a life force, and the Spirit is a common whole. They are present at the conception of their body - one or two Angel Guides and the Soul itself. And when the sex cells of the father and mother unite, the first exchange of chromosomes begins (he is showing me now - they united, and the exchange began).

At this time, the Soul introduces life force into this cell. And all this happens in the mother's body. But since the father's reproductive cell is also charged with her energy, and the mother's reproductive cell is charged with her energy, the three vital energies of father, mother and child are mixed. One might say, a prototype of the future etheric body is formed. This prototype of the etheric body already contains microprints of all future organs. They are written in this etheric matrix. This body does not exist yet, but it exists on the etheric level.

Maria: First, the heart chakra is formed, and then all the others are formed according to the chakra system? Or are they all developing at the same time?

Irina: They do not form immediately. (Shows from the head). This is how energy comes in. As the fetus forms, there are no chakras yet. They only begin to develop after birth. They exist, but in their infancy. They begin development after the birth of the child. During the period from conception to seven weeks of pregnancy, the Soul is next to the mother; she herself does not enter the child's body, but her life force is there. The body cannot yet admit the Soul due to the fact that its structure and nature do not fit into it.

Maria: There is no body yet, it is very small, there are cells there.

Irina: When seven weeks are completed, the central nervous system of this fetus becomes sufficiently developed for the Spirit to join it and to move in on its own. He enters according to his own vitality, which is already in this fruit. She kind of dresses it up like a blanket. A thread is formed between the Soul and this body. And along this thread it enters, just as the Soul enters after sleep.

When she first enters her body, she has a memory loss. She feels as if she is locked in a confined space.

Maria: Like she was locked?

Irina: Yes, as if she was placed in a confined space, and she loses her memory of what happened.

Why is she losing her memory? Because she directs all her energy to shaping her future body. Then this fruit begins to be influenced by her karmic, accumulated energies. The energies of mom and dad continue to influence. Negative and positive energies affect metabolism, growth rate, the development of various mutations, and so on.

Maria: This is interesting, because clinically it is known to science today that on the fifth day of pregnancy there are already cells in those cells. They're not even differentiated, they're just cells multiplying. They still all look the same on the fifth day after conception. But already among these cells there is a zone that begins to pulsate. The same cells. And where this zone pulsates, in the future there will be a heart!

Irina: This is precisely the reflection in these cells of the etheric matrix of the future heart.

11:51 Interaction between mother and child during childbirth.

Maria: There is such information that we have in our hearts an

“assemblage point” of supposedly the whole organism. Energy "assemblage point". What can you say about this?

Irina: We need to clarify the term “assemblage point” here and make it more specific.

Maria: As I understand it, this point, with its radiation, contributes to the further development of all chakras and all organs that depend on each chakra.

Irina: From seven weeks before birth, the Soul is in the body, but it is maybe an hour or two a day in the body. The rest of the time she travels, because the baby in the womb also sleeps. That's why she travels. At the moment of leaving the body, while it is not yet born, she partially - not completely, but partially gains the memory that she lost when entering the body. She begins to remember, communicate with her Angels, Mentors, she can return to the Spiritual World, she can communicate with the Soul of her mother and father. It remains connected to the body by a vital thread when it leaves.

But at birth, about 6-7 hours before birth, the woman releases hormones that pass through the umbilical cord of this fetus and act on his brain in such a way that he connects with his Soul to go through this moment consciously. Because if he just passively sleeps - leaves the body, he can damage his body. When he is born in consciousness, in awareness, he feels that something is bothering him somewhere, and he can turn around.

More importantly, his Soul is in contact with his mother’s Soul at this time. They seem to regulate each other, harmonize.

This is a compensatory natural mechanism based on the fact that the hormones that are released from a woman before childbirth act on the Soul of the child, keeping him in the body, despite the rather significant pain that appears when passing through the birth canal. After all, the child still has very delicate skin and very delicate bones. The pain receptors have not yet adapted to these compressions, so he experiences pain from the compression.

It is further strengthened by the fact that, being in the body, as I already mentioned, he has no experience of life in this body. He doesn't know the words yet, he just feels the emotions, but doesn't know what's happening. Like the Soul, all his instincts are already formed. The Soul, when it is united with the body, already has them. Because of these instincts, because of this pain, he begins to experience fear, which causes even more pain. Fear always increases pain, even if it is minor, because fear causes concentration on the part of the body where the unpleasant sensations occur.

Maria: If the Soul of the child is so strongly connected with the mother, when the child's position before childbirth is problematic, then a well-trained mother who can communicate with the Soul of her child can somehow explain so that he turns in a more favorable direction, vector? It happens that they are turned somehow wrong, upside down, and so on.

Irina: Yes, she can do this if she is aware of this contact with the child. She can make the child hear if he is not unconscious at the time. Some women take medications that have a calming effect on her nervous system. They pass through the umbilical cord into the baby's blood and into his brain, causing a disruption in connection with the Soul. In such a semi-conscious state, the child no longer hears anything.

Also, this contact is disrupted by those methods of anesthesia for women giving birth that are associated with general anesthesia. There are electrosleep, various gas methods. Local anesthesia, which is given to some women with various drugs that remove the sensitivity of her genital tract (you have such methods), does not cause her to lose consciousness or enter the astral world. If you use those that cause her to be stunned and lose consciousness, then the woman's Soul parts with her body and no longer affects the process in any way. The woman not only went into the Astral, she went there unconsciously, as she lost consciousness. Then the child does not feel her energy nearby, he becomes scared, because he seems to be left alone.

Maria: I see.

Irina: I remember, Mead, we already had this topic, pregnancy and

childbirth, this has already happened.

Maria: Yes, but I'm asking more about energy, about the laying of organs. The pineal gland, we know, it is extremely important for organizing all the functions of the body and the perception of the external world by this organism, and mainly the non-physical world, right? I would like to know if there are any peculiarities in the energetic production of the pineal gland, again immediately after conception, during the development of the fetus?

Irina: What do features mean? There is not a single organ that is less important. They are all important to you. You have body harmony. Any organs are important; you have a non-random number of teeth, ribs, and certain organs. They are all important for your species, for energetic health, for physical health. This is all formed in a complex manner, according to the DNA program of the body, but under the influence of the energy of the Soul.

19:30 Scanning a heart into a Mobius strip.

Maria: Okay. A question. There is information that during autopsy of people, the human heart, the heart muscle unfolds into a Mobius strip. You know, the Mobius strip, like an infinity sign, like an infinity sign? I would like to know if this is an explanation for how energy moves through the heart throughout life? I understand that this is not accidental. I would like to hear how the very fact that the heart unfolds into a Mobius strip, how does this affect the energy of the whole heart and the whole organism? And does it have an effect?

Irina: The physical heart is the central organ in the human body. Hence the ancient word "heart", from the word "middle". In the projection of this physical heart is the anahata chakra, which is the symbol and energy center of the manifestation of the spiritual heart. The spiritual heart is the heart of the Spirit, the eternal immortal Spirit, in which its essence is located. Simply put, where is the very essence of the Spirit, which consists of three structures - feeling, desire, instincts. Therefore, yes, the physical heart unfolds into a Mobius strip. God arranged it this way to show people that the physical heart is a reflection and continuation of the spiritual heart, the source of eternity in man. The Mobius strip is a symbol of the eternity and infinity of the

Universe, as the entire totality of material and spiritual energies.

21:45 Perception of various energies by chakras.

Maria: Very beautiful, wonderful. Which chakra perceives the energy of our planet more? I think it's the heart. And I think that this (the fact that there is this Mobius strip, and the energy goes in an endless circle) is also somehow connected with the rhythms of the planet. I'd like to ask about this.

Irina: There are many types of energies on your planet. There are physical energies, there are subtle energies, there are spiritual energies. Physical energies - gravity, heat, etc., you feel more through the first chakra, which is located in the tailbone area. You feel subtle energies, the energies of your emotions, more with the help of the second and third chakras.

You feel the energies of the astral world, where your feelings and desires are located, more through the heart chakra and the fifth chakra.

And you feel the energy of the world of disembodied Spirits more through two chakras - the sixth and seventh. Your energy system is something like this. Developing one chakra without developing the others is ineffective. It will not give anything, because a person must have everything harmoniously developed. Work on cleansing and opening your spiritual heart, and gradually all your chakras will come into harmony, because as the center of the scales, it is in the middle - three above and three below. The heart chakra is in the middle and balances the two sides.

23:57 Self-cleansing of the Earth from negativity. Fighting infections in the human body.

Maria: Is it possible with collective consciousness to help our planet make this transition?

Irina: Yes, it’s possible if you love yourself, love all your neighbors,

love God, and are conscious of nature. You will not consider it a temporary home, which you will leave and go to the Spiritual world, but you will consider it one of the manifestations of the Spiritual worlds.

Your Earth is also part of the Kingdom of Heaven. If you treat the Earth this way, it will respond to you with the fruits of joy, pleasure and ease of your spiritual path. That light energy that is invested in it reaches its core and returns with bright flowers and delicious fruits.

Maria: Very beautiful, metaphorical explanation.

Irina: Low, dirty, heavy energy of rejection, negativity, envy, condemnation, anger (directed at oneself or others), settles down in a dark stream, goes to the core of the Earth and begins to be processed in the core of the Earth. Because of this process, the Earth responds with earthquakes, volcanic eruptions, hurricanes, and forest fires. This is how she processes your negativity (shows how the cleaning is progressing).

If a virus enters your cell, it begins to signal with special, very small molecules that something has happened to it. She does this despite the protection of the virus itself, which exposes its protein molecules throughout the inner membrane of the cell for a while so that its endoplasmic reticulum can produce the proteins it needs to assemble new viral particles (shows how the assembly proceeds there). Despite this, the cell still signals. Then the whole body becomes activated, that is, special antibodies are produced that destroy its own cell so that these viral particles can escape into the external environment, into the space surrounding these cells, and can be neutralized.

When it is one or two cells, the body will not feel it. But when there are a lot of such cells, the body begins to increase the temperature in order to slow down the proliferation of viruses and remove unfavorable conditions. A person begins to cleanse. His temperature rises, he becomes ill, he develops weakness, as an obligatory component in infectious asthenia. This is an essential component of any infection in order for a person to spend his energy on immunity and cleansing. They put him to bed so that he can be with himself and send the Light of his Love to this organ, which will help harmonize even harmful microbes. They have been proven to become less virulent and less evil

in the body if Love is consciously sent to them.

Maria: This is very interesting.

Irina: (to Meade) I think you sensed a medic in Maria.

Maria: That's wonderful. This is what I usually talk about with my patients, that basically good energy internally directs everything, it gives a vector.

Irina: Maybe you also incarnated on Esler?

Maria: It would be great, but I don't know.

28:55 Heart of the Earth.

Maria: Such a question. A person, we say, has a Sushumna channel that unites all the chakras. Maybe (since we are children of the Earth), the Earth also has a Sushumna channel that connects the poles? If there is such a parallel (we have already said that the heart is exactly in the middle - three above and three below), then in the center of the Earth - does this mean its “heart”?

Irina: Yes, but there is more than one energy flow. (Shows) A ball, a core in the middle of the Earth, and like spokes extending from it. They rotate. A geomagnetic electric field is created, which begins to exchange with space.

Maria: You can say metaphorically that the center of the Earth is the “heart” of the Earth, and on the surface of the Earth there is mainly the “brain” and the perception of everything.

Irina: You can say so. But we can also say that the “heart” of the Earth is all of you. Understand that if you appeared on this planet, it is for a reason. She was waiting for you so that you would develop here yourself, so that you would develop her, so that you would be happy

here and share your happiness with others. Realize that you are at that point in space, at that moment in time, which is the best for you for the present period.

30:47 Terrestrial plasmoid Demeter.

Maria: Okay. On the planet where MidgasKaus is located (he is with us now), do they have the practice of communicating with the “heart” of their planet?

Irina: Yes, of course. I have already passed on this practice, in relation to the Earth, to Irina. And other curators spoke.

There is a plasmoid that is responsible for the entire Earth. His subtle body is very large. It is several times larger than the Earth. Thirty-third density level. We talked about this yesterday. This plasmoid is responsible for the Earth, for all Spirits, he is like their boss, of all areas. Each area has its own plasmoid and its own Spirit of Nature. They are the same full-fledged earthlings as you, the same masters of space as you, just at different levels of density.

For example, a brownie living in your house is also the same full owner of your space, your home, as you are, although he did not buy this house. He is there, placed by God in this place through the Angels, through his immediate superiors. Exchange the energies of Love with him, and he will never scare you, but, on the contrary, will protect you from all low-vibration entities.

Maria: Very interesting!

Irina: It happens that the Spirits of the house stay in the house for a long time and some treat people patronizingly, like children, and some, on the contrary, like their parents. They like to exchange energies with people, especially such light ones. They often become similar in character to their owners. Not at their owners, but at the other owners of this house, at the people who live there.

I also wanted to say that the Spirit of the entire Earth is in a female

form, she is known to you as “Mother Earth”. She feels the whole Earth, the whole planet not with her body, but with her part. She can hug and stroke her. She protects and gives tasks to the plasmoids of individual countries and cities, which are responsible for specific areas, for the creation of animal Souls, and the purification of nature. She is level 33 density. She is already more than four thousand years old, her name is known as Demeter.

Maria: Demeter?

Irina: Yes.

Maria: Is this like the Greek goddess Demeter?

34:27 Practice communicating with Demeter.

Irina: Yes, she was known and deified in Greece. You can meet her and talk. She has her own contacts.

Maria: Very interesting.

Irina: I can give practice on how to communicate with her.

Maria: Great, how can we do this?

Irina: It’s better to do it in nature. It is very good to do this at the time of sunrise or sunset, in the warm season. Not at the very moment of sunrise or sunset, but when it is already warm, but at the same time not hot, before noon and after noon. It is very good to do this in a sunny clearing, among the trees. In a harmonious place so that your Soul likes it. You can do it on the shore of a reservoir, or in the mountains. The main thing is that you are either alone or in the company of people who know what kind of practice this is and will not ask you unnecessary questions, much less subject your experience to any skepticism. Because it can create your doubt and ruin your connection. The energy of doubt immediately closes the threshold.

Maria: Yes, like a wormhole. And here we are standing in this clearing, and what next?

Irina: You can sit down, you can stand up without shoes. (Shows) Barefoot. It's better to stand on soft grass, close your eyes, relax and just listen to the sensations of your feet, focus on how pleasant it is for them to stand on the grass. Note that this carpet was grown for you by the Earth itself. (Mead says) Either squat down - squat down, or on your knees, whichever is more comfortable, or take a position so that you can sit down, kneel down or squat down, or squat down in such a way that you can relax. At the same time, place both palms on the ground. Close your eyes and listen to the feeling of your palms.

Ask yourself: "I am now touching the Earth. Do I feel like she is a living being? What is it like? You will feel that it is like an animal. You touch him, you want to stroke him. Your instinct will just kick in. Not instinct, but your deep sense of communication. There is something, it is embedded in your Soul - communication with those natural plasmoids where you are. It is in every person. It's just that among ancient people it was more developed due to the fact that they lived in nature.

For it to awaken in you, just be alone with yourself or with people who know it. So touch it and you will feel that it is a living being. You can address her in your own words: "Mother Earth, I greet you and send you the Light of my Love, to your very core, to your very heart." She will definitely feel it. Now you energetically feel what will happen there. What do you feel?

Maria: I can already feel that warmth is coming from there, from the center.

Irina: Look. You didn't do this, did you? Do you know where you get these feelings that this will happen? Because your Soul's memory of how to communicate with the world of plasmoids on your planet is already waking up.

You then thanked him and took a slow breath. At the same time, imagine how energy rises along with the air from below, filling you with fertility, happiness, strength, and purity. You will feel what the Earth is

like. How an affectionate mother strokes you with her energy. Say: “I thank and accept, love and bless, Mother Earth! Can I ask my question?

You will communicate with her on a mental level. She will say: “Yes, my child, ask.” And you can ask. It’s better to say it out loud, in a whisper. Ask questions, get an answer in the form in which you are accustomed: figurative, verbal, but it will be the answer just for you.

You can contact her with any request. You can contact her with words of gratitude. You can communicate with her as with your mother. This will be exactly the plasmoid, whose name is Demeter. You can address her by name. You can say “Mother Earth.” It is the same. She hears everyone, because her channels are tuned to the noosphere of the Earth, to all egregors, to each of you, through such tubes (shows).

Maria: From the inside, from the Earth, it turns out that these tubes go up?

Irina : Yes. You can ask to fill you with energy, heal you, harmonize you. Thank her. Ask, ask, and at the end of the conversation, be sure to thank the Earth, thank your Higher Self for this contact. Say: “I thank and accept, I love and bless. I promise to direct this energy to good purposes, to the development of unconditional Love.”

Then open your eyes, sit for a few minutes, take a few deep breaths. Look around and you will see this world differently. It will become more beautiful for you, because in every flower, every tree, every bush you will see the eyes and smile of the one with whom you recently communicated. Touch children's perceptions, they feel it.

Maria: Thank you very much. I will definitely try this technique. I do similar things with Qigong techniques with my students. I will definitely do this. Thank you very much, thank you very much to MidgasCaus for coming.

Irina: Dear viewers! Thank you too. You can do this practice, you can write about the results in the comments or on our page in the

VKontakte group. There is a “reviews” page, you can write there. I think that the experience of connecting with our planet, with its mind, Soul and its divine heart will help many people. See you again, friends!

13.11.2021

Conference participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Maria is a general practitioner, acupuncturist;

MidgasKaus is a representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms.

#370 Conference with the Spirit of Baikal! Alien bases, ecology, causes of earthquakes and disasters.

https://blog.cassiopeia.center/konferenciya-s-duhom-bajkala-inoplanetnye-bazy
https://www.youtube.com/watch?v=r1nhH6lXdho

00:20 Presentation of conference participants.

Irina: Hello, dear friends! My name is Irina Podzorova, I am a contactee with extraterrestrial civilizations. Today we have a conference with scientists from bases that are located under the bottom of Lake Baikal and partially under the surface of the earth in the

Baikal region.

There is also a subtle-material being present here - the curator of this lake, density level 38. He asked to call it “Baikal”. As far as I understand, the lake was named after him. This is not even his name, but his position.

Our curators are here: LiShioni from the planet Shimor, MidgasKaus from the planet Esler and representatives of the planet Tikht: the head of the base, Lax Rhios, and a scientist who studies biology and the influence of plasmoid civilizations on biological processes, Ashrim Coasti. Also present is the head of the Pleiades cluster base on Lake Baikal, a representative of the planet Futissa, a leader and scientist, geologist, and planetary scientist. He studies geology, geography, planetology with us. His name is Ishirod Roshikh. You can call him Escherod.

They welcome you all. You can ask questions.

03:27 Place for alien bases on Lake Baikal.

Guest: Greetings, our interstellar friends! Tell me, what determines the choice of a site for the construction of alien bases in this particular place?

Irina: To whom is the question? To the Tikhtians or Pleiadians?

Guest: You can go to both.

Irina: I ask representative Tikht to answer the question: what determined the choice of a location on the opposite bank of Lake Baikal from us? I remember you talking about this during physical contact.

(Representative Ticht) Greetings! I told Irina about this when she was in her physical body at the base. I will repeat my answer with pleasure. This location was chosen because Tikhtas are very sensitive to energy

fields. And this place in the area of 200 square kilometers turned out to be the most energetically acceptable and comfortable for our residents. But it didn't become like this right away, but after 280 Earth years this place was prepared for us by representatives of earthly plasmoid civilizations. They charged it, cleaned it of harmful negative emissions from the noosphere, and it became suitable for our permanent place of residence. Let me remind you once again that we built our base on Lake Baikal only in 1993.

(Ishirod Roshih) I greet you! I haven't talked to Irina yet, but her curators have already told me about her and your Cassiopeia project. I'm from the planet Futissa. I have been at this base periodically for the last 47 years. I work as a geologist, geographer and planetologist of other terrestrial planets. I am a little over 2000 Earth years old.

Maxim: What period of life?

Irina: The one on Futissa is the same as on Burkhad. We are his children, his colony, his genetic part. Our life expectancy is the same as on Burkhad, on average 12-16 thousand Earth years. This is the average implementation period. There are representatives of both Burkhad himself and our world who leave ahead of schedule for the Spiritual World, for example, at 600-700 years, if they believe that they have completed their task. And there are those who linger until 22-25 thousand Earth years, if they believe that they are still needed on a given planet or in the Galaxy.

Everyone does different jobs. For example, as I already said, I have been periodically on Earth for the last 47 years. I'm flying to Futissa in my world; on average, I'm there no more than 3-4 months in your year. The rest of the time I am on Earth.

My task is to explore the underground world, geological processes in the earth and their impact on your civilization, as well as the influence of the man-made impact of your civilization on all layers and spheres of the Earth. I am a scientist who studies the interaction between civilization and the planet.

Why did our base appear on Baikal much earlier than the Tikhtian

one? It appeared in the 3rd century before the birth of Christ. At first it was the base of the planet Futissa, a little later representatives of the Galactic Federation of Light, other civilizations, and not only from the Pleiades began to fly to us. Now our base is considered in the Galaxy not only the base of the Galactic Federation of Light, but also the Interstellar Union, because representatives of Burkhad also visit our base. This is the general basis.

Why did you choose her? According to the history of this base, I studied it; at the time of its creation, here, on the shores of the northern part of Lake Baikal, there lived a people who had many contacts with those of our ancestors who built the base. Any place on Earth was favorable for us.

At that time there was a different atmosphere and noosphere on Earth, and we could use special, as you call it, psychotechnics and technical techniques to cleanse and adapt any space for ourselves. For this we did not even need the help of such a volume of plasmoid civilizations, because we have and have had such specialists on the planet who can do this. We call them “masters of the formation of spatial structures” - we have such a profession. Tumesout has it too. I am not this specialist.

11:39 Physical presence of alien ships during the retreat.

Vladimir: Question to the representatives of Tikht and the Pleiadian base: please tell me, during our entire retreat and specifically now, are the physical ships of the Tikht and Pleiadian bases somewhere present at some relatively close distance from our location? How many were there, will they be, and what are the plans? It is the physical ships of both bases.

Maxim: And not only these bases.

Irina: (Iskhirod Roshih) You said “for the entire duration of our retreat.” I thought from the contactee: you call a retreat a gathering of people to work together on a spiritual plane. We are mainly engaged in scientific work, so we did not track your retreat period specifically. How many days are you here?

Maxim: 9-10 days.

Irina: Ships within the nearest 10-15 square kilometers from where you are are constantly present. They do not hang, but take off and fly back under a protective field that creates an image of invisibility, especially over Lake Baikal, but they fly here too. The closest ship belongs to Futissa. Now I'm in the Astral Plane, I'll try to feel the physical world spatially.

From here, if the contactee looks straight ahead and takes this as zero degrees, 128 degrees from the direction of her gaze there is a Pleiadian ship at a distance of approximately 3 km and at an altitude of about 12 km. He is flying, now the distance is already 3500 km.

15:28 Impact of industrial waste on Lake Baikal.

Guest: Good evening everyone! I have an environmental question. I live in the city of Baikalsk, which is famous for the Baikal pulp and paper mill. It has already been closed, but there remains an environmental problem in terms of disposal of waste that remains from production. There are a lot of sludge reservoirs there. Our goal is to resolve this problem in the near future so that this waste does not end up in Lake Baikal, because there is such a threat.

Maxim: I will add to the question. Have you been involved in helping solve this problem? And how did this plant affect Lake Baikal?

Irina: (Iskhirod Roshih) Tikht is mainly involved in environmental problems - he has many specialists. Therefore Ashrim will answer. He is a biologist and works on environmental issues. They do not separate biology from ecology, it is a single whole, the science of life.

(Ashrim Coasti) Yes, indeed (shows an image) this plant was needed for people. He produced the things and objects you needed. I would not say that you do not have the technological capabilities to transform the residues from chemical reactions, as you call them "industrial waste," into other substances that are also necessary for you.

You have such technologies. In order to implement them, it is necessary to build processing complexes. They weren't built. For those who were there, it turned out that it was easier not to recycle what was left, but to throw it away.

There were cleaning elements that had to be changed. During inspections of the plant, they found out that the filters that were there, the catchers, were, unfortunately, only fictitiously replaced. There was a document that a replacement was made, but in fact the filters were not changed. Either they installed low-quality ones or they didn't change them at all. There was such a problem.

We have several mental contactees in the government of this region. We talked with them about this problem, due to which death and illness are possible not only for animals, birds, but also for people. We told them about this so that they would issue laws that would lead to a balance between resource consumption, their processing and the safety of nature. They answered us that there are such laws (they really do exist). We asked them to monitor their implementation. Then it turned out that the plant closed for a reason, something broke there, something happened. The contactees contributed to this: they issued an instruction that others did not want to follow. One reason overlapped with another.

The question is: what to do now, and will humanity be able to cope with this problem? Yes. We believe that it can, if we apply the technological discoveries that you have on how to process these substances. This can be done if you wish. You know what to do with them.

21:32 Seismic activity on Lake Baikal. Reasons for the formation of Baikal.

Guest: Thank you! We welcome you, our interstellar friends! Please answer: why was Olkhon not chosen as the site for the construction of the base?

And the second question: we have a very earthquake-prone area, can you help our scientists, transfer technologies that will allow us to

predict earthquakes and warn us?

Irina: (Iskhirod Roshih) First question: why was Olkhon not chosen as a base? Representative Ticht and I spoke about the reasons why specific locations for our bases were chosen. No other civilization has expressed a desire to build bases here. Perhaps some other places on Lake Baikal and in the surrounding area will be chosen by other civilizations. In the meantime, the bases that we have are optimal for us in the places in which they are located.

As for technology. Your area is seismically active for a reason. I'm a geologist, just studying the underground layers of your particular region and comparing them with the underground structure of the rest of the globe. I talked with the plasmoid civilizations of the underworld, those whom you call the Spirits of the Earth, learned their point of view on this issue and studied for myself where this activity comes from.

The thing is that your territory is located in a place where 12 thousand years ago, on the site of Lake Baikal, there was another body of water, a smaller lake. People lived on its banks. As a result of the fact that Selbet’s weapons were aimed at this lake, a split occurred, a fracture in the earth’s crust (shows), which extends from Baikal in three directions. These faults run deep. At the site of one of these faults, a hole later formed and filled with water.

All the rivers that flow into Baikal appeared later. In any case, this lake was the result of the war. It wasn't like this before. There was a lake in its place 10 times smaller. All the people who lived on the shore of the lake and in the surrounding area died from the weapon, which was so strong that a dent appeared in the earth's crust.

Cracks extended from this dent: three larger ones and a network of smaller ones. Later, when your civilization came here, minerals began to be mined around. This area has previously been a seismic region due to these faults. In the depths of the earth, heterogeneous processes occur that depend on solar activity. And the core of the Earth expands and contracts. Volcanic activity can also intensify and deactivate every few decades. Damage to the earth's crust caused shifts.

During those periods when mineral development was carried out around Lake Baikal and to the north, the imbalance within the Earth continued. This could cause earthquakes to become more frequent.

Shows that there is a fault under the bottom of Lake Baikal, and there can also be tremors from there. Because one edge is higher than the other, which can creep onto it, and therefore is reflected on the surface.

It's become calmer here lately. We work with plasmoid civilizations of the Earth, which can also influence these processes from an energy point of view. Stop them, slow down the divergence of faults.

You, too, can influence this if you treat each other with positive energy and love in this region. Any cataclysm, any earthquake, volcanic eruption, among others, can be provoked not only by man-made reasons, but also by energy ones.

Certain groups of plasmoids can bring goodness and harmony, while others can bring destruction, including in these forms. The number of thin-material plasmoid civilizations in a particular area that will cause destruction depends on many factors, including the people who live there.

If you yourself are harmonious in this territory, then those plasmoid civilizations that will be there will protect you from this. If not, then they will also become negative. Negative Spirits will be embodied in them. They cannot directly cause earthquakes; they can only contribute either to the calming of the Earth, or, conversely, to its energy movements. First energetically, and then they move to the physical level. They can indirectly influence.

As for the device, your scientists have seismographs, which are very sensitive at present, recording even small ground tremors that you cannot feel. This could be a signal for the start of a major earthquake, or things could calm down. There are special signs in these devices that can predict with varying accuracy that this will be probable, for example, 70%.

Bringing technology to you requires you to become part of our community. We have a special law according to which we transfer the scientific knowledge that leads to technology only to those who have agreed to comply with our laws on the planet.

31:28 Formation of Lake Baikal.

Vladimir: Clarifying question: how many similar impacts were there on the planet then? And why did one of them come exactly here from Selbet?

Irina: I think none of them are historians. They need to open up the story. How many specific blows have historians studied? And they only studied this in the school curriculum.

(Mead speaking) There was a targeted strike on Lake Baikal, a beam, not bombs. As far as I remember the history of that war, in the area of maybe two thousand. They flew in orbit and hit people with pinpoint beams.

Vladimir: Was it here by accident or intentionally?

Irina: Intentionally, because there was a settlement around (shows from above the house).

Maxim: I want to clarify. Lake Baikal, when viewed from above, looks like a quarry. First there was development, then the water came? How did this happen? First they hit with a beam, and then development began? When did water appear in it?

Irina: Water did not appear immediately. At first there was a hole, a crack (shows), and there were no rivers. Water appeared maybe 2-3 thousand years after the war, and what you see was completely formed. Even those rivers that previously flowed to another place turned away from this blow.

Maybe you've heard the expression that some types of soil build on top

of each other in layers? These were heterogeneous layers. They still exist in the area today. Somewhere there is one type, for example, sand, somewhere there are only stones, somewhere there is mixed with each other. When the impact occurred, it was not only at this point that there were cracks. In the surrounding relief there was a gradual decrease in relief towards the shores of the future Baikal. And these hills you see were higher. Rivers that flowed to another place changed their course and went to Baikal.

35:41 Matrix of Burkhad on Earth and on Burkhad.

Guest: I wanted to ask my alien friends: do they get Burkhad's matrix? How does she help them in their work? And does it help?

Irina: (MidgasKaus) No, we don't. The Burkhad Matrix is an energy-informational matrix that is intended specifically for the inhabitants of your world, for earthlings. In order for each of you to have the opportunity, through the matrix built into the aura of a person, namely a person (with your number of chakras, with your energy structure, with genetics characteristic of earthlings) to connect at a distance to the noosphere of this planet and send questions there, receive answers, strengthening your energetic and mental capabilities. It strengthens the spiritual channel for communication with the disembodied part of the Spirit, which every humanoid, plasmoid has (it's just in different percentages).

The Burkhadians do not have an energy matrix in the form in which you have it. They have a similarity, and it is called the "pyramid of spiritual growth."

Each of them has a part of this common pyramid. They, for example, 250 Burkhadians (each has a "pyramid of spiritual growth"), through a certain mental image, a certain practice, merge into a common pyramid. But its structure does not resemble a matrix. Rather, it is a vortex enclosed in a cocoon, like a tornado.

Maxim: Thank you. More questions please.

38:07 Material evidence of the existence of civilizations 12 thousand years ago.

Guest: Thank you for the opportunity to ask a question. Is there any material evidence left today of the existence of civilizations 12 thousand years ago that our modern archaeologists around Lake Baikal could study?

Irina: (MidgasKaus) Remained, and not only around Lake Baikal. In general, throughout the entire territory of the Earth, more specifically, on the territory of Russia.

Around Lake Baikal there are circles of stone, (shows) pointed sticks dug vertically into the ground. They have been standing for a long time. And underground in these areas there are also old round buildings. They can be distinguished: the stones that were used in construction are themselves very ancient.

There are still settlements that existed even before the war 12 thousand years ago. They can be found, what is left of them. There are such on the shores of Lake Baikal and beyond.

There are young mounds under which people are buried. And below them, below, there are preserved bones, skeletons, and fragments of dishes from an older civilization.

40:15 Underground rivers of the Earth. Migration of fish and mammals.

Guest: Hello everyone! We have unique flora and fauna on Lake Baikal. And I would like to know where the seal came from. Is there a connection between the Arctic Ocean and Baikal? And how did omul appear?

Irina: I remind you that, unfortunately, they do not know Russian. Now I will introduce whoever I introduce. Who is this seal? Especially omul? The form I saw it in is how I will present it.

(Mead speaks) The rivers that flow into and out of Baikal are not the only means of communication. There are water tunnels underground. (Shows an underground river). It connects Lake Baikal with other bodies of water on Earth. Fish and those mammals that can swim some distance underwater can move there.

I sensed such energy that these animals were not found in the surrounding bodies of water. This means that it was here that a favorable biosphere was created for them. Who brought them here along these underground rivers, and how the migration routes of animals spread - this is precisely the subject of study of Ashrim from Tikht. He studies biology. MidgasCaus also studies the biology of the Earth, but MidgasCaus is more about the earthly civilization of people.

I am in contact with subtle civilizations. For animals, whose Souls create plasmoid civilizations, they look for ways where these animals can settle, any favorable place for them. And on land, and under water, and underground. Other animals may even be used. For example, birds that can carry fertilized eggs.

What is caviar? These are fish eggs. He doesn't know Russian. I'm confusing him even more now. His eyes got bigger: a new word in biology.

44:30 Stages of forest development and plasmoids.

Guest: Good evening! My name is Andrew. Thank you for the opportunity to ask our extraterrestrial friends a question! I represent planet Earth, the hero city of Moscow, the Cassiopeia community. Economist.

Over the past few years, environmental disasters associated with deforestation have occurred in the Trans-Baikal region. Accordingly, the question is related to the plasmoid civilizations that were located in these places. What's happening to them now? Did they leave these places or not? What plans are there to improve forest health? How long will it take to restore them? And how could this subsequently affect the ecological situation of Lake Baikal itself and the people living in this area?

And another question: has any intergalactic news appeared during our stay here? Thank you.

Maxim: I focus on the problem of forests. Why are forests burning? Why are they being cut down?

Guest: What happens to plasmoids where forests are cut down?

Maxim: What happens to plasmoid civilizations where forests are cut down or burned?

Irina: Somewhere forests are being cut down, and somewhere the forest itself is burning. In those places where there is no one to cut it down, it burns itself. I remember. This question was addressed to the main plasmoid of Yakutia, there was an interesting answer. I think the patron of Lake Baikal himself will answer this question. He is present here and also wants to answer the question. Moreover, this falls within his competence. He asks to address him specifically as “Baikal”.

It all depends on the area of the forest, its specific type, and the plasmoids living there. A very general question. We need to be more specific. What does it mean - the forest has been cut down?

Guest: Destroyed. Yes and no.

Maxim: Our forests are cut down in huge plantations and sent abroad. What's happening to this area? Do plasmoids leave it? Or are they starting to help grow another forest?

Irina: Thank you for the clarification. If this happens in an area larger than 2.5 hectares (a hectare is 10,000 square meters), it begins to affect the biosphere of that place and animals on a large scale. The plasmoids that created the Souls of forest animals, plant Souls of trees, bushes, forest herbs, mushrooms, all of them have unclaimed energy. If they destroyed the vegetation whose Souls they created, the plasmoids understand perfectly well that they will not be able to create other Souls of trees. It takes time for a tree to grow in a dense material

world.

The fate of these plasmoids depends, firstly, on their desire. What will happen where the forest has been cut down? If there is just grass growing there, a meadow, then they can stay to create the Souls of herbs, flowers, microorganisms, animals that will live there.

If the plasmoids do not want or cannot stay there (many are able to give birth to the Souls of only certain trees), then they go to another territory, to where they are needed. There are many areas where there used to be a meadow, pasture, field, but now no one lives, and a new forest is growing there. He's still short. They can go there.

The process is reversed. For example (shows), there was a village, a village where people lived about 30-50 years ago. When people left there, the streets became overgrown. It takes about 25 years for this village to be completely overgrown with quite large bushes and trees to begin to grow so that it is difficult to distinguish the former houses. If a person does not stay there and remove vegetation, then the plasmoids will create Souls to return it to nature. Not to take it away from a person. But because a person left it, he doesn’t need it.

If the forest was cut down, the trees were not simply cut down and burned, or thrown into Baikal. They were aimed at some people's goals. Plasmoids understand this very well. They simply move to the place where there is a need for them and their services.

If a forest stands for a long time, for the last 250-300 years, and people do not enter it, their own processes begin there. Trees that have stood for a long time grow old (he shows me dry branches). The rings that you see inside the tree grow on top of each other and are less well supplied with sap from the ground.

Don't forget that every year any mature coniferous or deciduous tree bears seeds. They fall to the ground. It's raining. Tree seeds have the ability to germinate even if they are not buried. All they need is rain and a certain temperature, and a shoot of young trees forms around the tree. One tree can produce up to several tens of thousands of seeds.

Some die from the cold, while others find themselves in such conditions that they begin to sprout around the tree, and the wind can blow them away. After several decades, it turns out that young trees begin to take food from their parent. This makes him weaker and he is attacked by parasitic fungi and insects.

Inside this old tree there is such a mass that it no longer holds it together. If the wind blows, it may fall. This is a natural change (without people). She naturally walks slower. Everything happens without people, there is no order, it fell or did not fall. Over many years of falling leaves, a layer is formed on the ground through which, for example, grass cannot grow. It rains, everything begins to gradually decompose. A swamp may form.

If the plasmoids of this area do not call upon the plasmoids of fire and start a fire that will cleanse it all, then this will happen. You probably know that the forest where people do not interfere often burns. If it doesn't burn, it turns into very impassable rubble not only for people, but also for animals. These territories are also useless for plasmoids, because even animals cannot be around this place.

Guest: Don't plasmoids with forest burn?

Irina: Plasmoids cannot burn, they have a thin body.

Guest: They just leave?

Irina: They can be there, why would they leave? At least there may be a plasmoid in this fire. Temperature doesn't affect it. He has a thin body.

Guest: Thank you.

55:53 The influence of a retreat on the energy of the area.

Guest: Dear Baikal, please tell me how our event, the energy of our

community, affects the energy of this area? And how long will the changes last in this area? Thank you.

Irina: (They all answer) It has a great influence. The energy of your event, yourself, your Love, your Light harmonizes the space. They encourage plasmoids to communicate. There are sensitive and kind people, but they are gathered in one place. Here is an event that is surprising for many plasmoid civilizations. We are at the bases and we know that there are such people among earthlings.

Even the patron of Baikal said that it is precisely such an event, in such a volume and with such energy, with different energies of alien civilizations and all sorts of energy healing systems (he also feels them), that affect space. He sees this for the first time. It is quite difficult to predict how long these changes will last. But they are quite significant, and here it has become calmer on the energetic plane.

57:41 Connection between Baikal and the Black Sea.

Guest: When I stood near Baikal (I myself am from the Black Sea), I had the feeling that there was some kind of connection between the ancient basin of the Black Sea, which was fresh, and ancient Baikal. There was a feeling of kinship. Was there and is there this connection between the Black Sea and Baikal, although it is very far away?

Irina: There is no physical connection between the Black Sea and Baikal, at least not now. We need to chronicle what happened then. I think that there was no physical connection in the form of any physical river, and no. You felt a connection. Perhaps these are representatives of plasmoid civilizations that were responsible for the Black Sea and moved here. Maybe with one of the participants who came from there.

In the Baikal area there are many portals to various plasmoid-type civilizations, including a portal to plasmoid civilizations on the Black Sea coast. It is likely that you felt this.

59:18 The impact of global warming on the flora and fauna of Lake Baikal.

Guest: Please tell me how global warming affects the flora and fauna of Lake Baikal? We know that warming in Russia is occurring at a rapid pace. Faster than in the world because we have more land. What is the forecast for the plants and animals of Lake Baikal?

Irina: The plants, flora and fauna of Baikal have an adaptive capacity much higher than your scientists predict. Warming could have occurred at an even faster rate if the atmosphere had not been cleared by the same plasmoid civilizations. They are holding back this process. Everything is in balance at the moment.

Organisms have time to adapt. They give birth to their offspring, which already have the genetic ability to live in the conditions that will exist in the future. Our prognosis is quite favorable. We will also help this process. If necessary, if there is a danger to your civilization, we will intervene directly.

1:00:49 Unknown underwater creature in Baikal.

Guest: Hello everyone! I would like to clarify about Baikal. Specifically on the Irkutsk side. Exercises once took place there. Several swimmers died because they tried to grab an unknown swimmer underwater. He forcefully pushed them from the bottom to the surface, which led to decompression sickness. Some died, some were damaged. Are these rumors, or did it actually happen? And what is the reason for what happened?

Irina: Now I'll rephrase the question for them. What year was this?

Guest: I don't remember exactly, but around the end of the 80s.

Irina: There was no Tikhtian base here, and the Pleiadian one was not on the Irkutsk side, but to the north.

Guest: It turns out that the base is located on the side where divers train. During the first dive, we saw an unusual phenomenon that looked like a person. The second time they dived, they tried to catch him. After they tried to catch him, they were thrown back by something.

Irina (Representatives of Tikht and the Pleiadian base) We can only comment that this has nothing to do with contact with us. Because our databases do not record encounters with people under water that could be interpreted in this way.

(Spirit of Baikal) Similar cases, when people see someone and drown from fear when they see someone in the water, have happened more than once. This may be contact with subtle entities. Not with Baikal itself, but with its Water Spirits. Plasmoid civilizations can appear in human form. The swimmers could have tried to grab this man, but since he is thin-material, he simply disappeared. Out of fear, they themselves could surface too quickly and die from it.

Guest: The swimmers are quite experienced. Maybe these were rumors? Experienced divers knew that if they rose sharply to the surface they would get decompression sickness. Here they could not surface on their own even out of fear, because this would be death.

Irina: Why do you think that experienced people are not subject to fears? They may be susceptible to the same extent as those who are not experienced. This is affect. A state when a person cannot explain to himself what happened.

Guest: Are there any animals in the waters of Lake Baikal that have not been discovered or identified by earthly scientists?

November 23, 2021

Conference participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

Vladimir Goldshtein – journalist and Facebook group administrator, assistant director of the Cassiopeia project;

Baikal - plasmoid, curator of Lake Baikal, 38th density level;

LiShioni - representative of the planet Shimor, sociologist, specialist in the astral world and its interactions with the material world;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, xenobiologist, specialist in alien life forms;

Lax Rhios - representative of the planet Tikht, director of the base on Lake Baikal, biologist - oceanologist;

Ashrim Coasti - representative of the planet Tikht, base employee, scientist, studies biology and the influence of plasmoid civilizations on biological processes;

Ishirod Roshih - representative of the planet Futissa, head of the Pleiadian base on Lake Baikal;

Guests of the conference.

#371 Conference with the Spirit of Baikal (part 2). The aliens' plan to develop and maintain life on planet Earth.

https://blog.cassiopeia.center/konferenciya-s-duhom-bajkala-chast-2-plan-inoplane
https://www.youtube.com/watch?v=cR4D8ZHMYv0

00:20 Introduction of meeting participants.

Irina: Hello, dear friends! My name is Irina Podzorova, I am a contactee with extraterrestrial civilizations. Today we have a conference with the leaders and scientists of the bases that are located under the bottom of Lake Baikal and partially under the surface of the earth in the Baikal region. There is also a subtle-material being present here, the curator of this lake, density level 38. He asked to call him that - Baikal, that is, that is his name. As I understand it, the lake was named after him. It's not even his name, but his position.

Our curators are with us: LiShioni from the planet Shimor, MidgasKaus from the planet Esler, as well as representatives of the planet Tikht: the head of the base, Lax Rhios, and the scientist. He studies both biology and plasmoid civilizations, the influence of plasmoid civilizations on biological processes. His name is Ashrim Coasti.

Also present here is the head of the Pleiades cluster base on Lake Baikal - a representative of the planet Futissa, a geologist who studies geology, geography, and planetology with us. His name is Eskhirod Roshikh, you can call him Eskhirod. They welcome you all.

I told them about you too (replica to the audience). So, if you have questions, you can ask.

03:27 Large animals and fish in the waters of Baikal.

Question from the audience: Are there any animals in the waters of Lake Baikal that have not been identified by earthly scientists? Undiscovered, unknown, unstudied species of animals and fish?

Irina: To do this, you need to understand which ones you have already studied. We do not have a database of your scientists that we could look at. Or in some other way, except through contactees. The contactees we have do not belong to the required category of the population. We have contactees among different people, but these are not those who deal specifically with Baikal, its flora and fauna.

Question from the audience: Suppose, animals or fish that are more than ten meters in length?

Irina: Are there animals and fish more than ten meters long in Baikal?

(Shows an image of a fish, but I don't know what it's called, with a wide tail, somewhat reminiscent of a catfish, but without a mustache). Do mammals eat more than ten meters?

(It looks like a seal, it is more than ten meters). These are not mammals, they are smaller. No.

05:35 Circles on the ice of Lake Baikal.

Question from the audience: Periodically, in the north of Baikal, in the area of the Selenga delta, circles appear on the ice, this was noticed from Space. What is the nature of these circles?

Irina: What time of year? You should at least know.

Question from the audience: On the ice.

Irina: Do circles appear on the ice?

Question from the audience: Yes, they can be seen from space. They are large in diameter.

Irina: I remember very well that this question has already been asked, it was answered, but okay, the answer is for everyone. Indeed, when the water in Baikal freezes, it freezes unevenly due to the fact that there are different molecular lattices of the ice roof, resulting in inhomogeneities in its color that look like circles. They can be big. There is heterogeneity in the composition of the water itself and the suspension that is in it - chemical, biological. Water freezes unevenly, so the color is different.

06:56 Blessing of the Spirit of Baikal.

Question from the audience: Greetings, Baikal, our beloved Spirit! I would like to ask: where did the ritual of taking a blessing from you by drivers or fishermen for good weather, on the road, come from? Or just people passing by who bring you gifts, their love, and in the end take a blessing?

Irina: (Spirit of Baikal) From past experience. Generations of people who interacted with me and other Spirits of the area. People of the Earth just a thousand years ago (for plasmoids this is approximately the same as for you - five or six years, maybe ten years) people of the third density of the Earth were more sensitive to our world. They didn't have so much mistrust; they accepted natural phenomena. They called it the actions of gods with each other, sometimes even the play of gods, divine beings.

People called “God” a divine being who is more powerful than man in the sense of controlling nature. People could feel them and communicate with them. And any communication involves the exchange of, in your opinion, gifts. These rituals that you just talked about are like a gift. This is not just an object (shows some kind of fabric or some object was burned), not just a donation (to give something of oneself), but the translation of an object into energy, in order to put into this energy a feeling of love and gratitude for the fact

that this The spirit guards this place.

Later, requests appeared to him to promote good luck in fishing, in other matters, a successful road, and protection. What is luck? This is positive energy that protects a person from possible negativity. Since ancient times, people have learned to interact with plasmoids in ways that express their love to them in various ways, and the plasmoids that were inspired by these actions responded in kind.

10:27 Shamanism on Lake Baikal.

Question from the audience: What is the reason for the development of such a form of religion as shamanism in Buryatia? Is there any connection with the place of power of Baikal?

Irina: (Spirit of Baikal) Not only in Buryatia.

Question from the audience: There are many shamans in Buryatia.

Irina: (Spirit of Baikal) In general, there are shamans in Siberia, and there are also in Altai. Where there is no lake, where there are mountains (shows).

Shamanism is an ancient form of communication with the Spirits of nature, with plasmoids; it was preserved here due to the fact that the people who lived here were far from the central part of Russia, from the influence of those religions that could prohibit shamanism. You know what I'm talking about. There are religions that could prohibit these practices because they preached a different path, and shamanism, communication with the Spirit of Nature, could interfere.

Here he did not bother anyone, he simply joined the life of the people, even in some everyday form, and began to acquire fairy tales, beliefs, and myths. Dishes, house decoration, some special words, for example, wedding rituals - all this began to merge with folk life. The religion that came here, you call it Buddhism (I know that Irina will have a conference on this topic tomorrow), did not deny the beliefs of the ancients, ancient communication with plasmoid civilizations, because

this coincided with its teachings in the worldview. They had a single ideological base: there are different divine beings, and you can communicate with them. With the help of what material means - this already depended on the desire and capabilities of the person.

13:10 Connection with the Spirit of Baikal.

Question from the audience: Dear Spirit of Baikal to our hearts, allow us to ask you this question. We, of course, are spiritual beings, but we also have a lot of material things. While enjoying the beauty and Light of this place, we still want to take a piece of material things with us. We walk along your beautiful shore, collect these pebbles shining in the sun, and want to take them with us to our native places. Are we, your guests, doing the right thing by doing this?

Irina: Good question, now Baikal will answer itself.

(Spirit of Baikal) The very desire to preserve the memory of me, even in such a part of me - after all, every stone there is charged with my personal energy, because I am constantly present there and fill this whole place with my energy - is commendable. I really like and am very pleased by such attention to my area, to my energy. But it is important that this is not a momentary desire to take with you just a beautiful stone. So that this stone that you took will help you in the future to remember about communication with people who are kindred in Spirit, so that it becomes a connecting link with me and with other plasmoid civilizations that exist in this area. They are all friendly towards people. The more you raise your vibrations, bring your energies closer to the energies of the Creator of the worlds, the brighter and more harmonious we become. The easier it is for us to follow the path of our development and create, among other things, the conditions for the existence of our worlds and for the existence of the dense world, investing our energy in it.

If you sow Light into the surrounding nature, you receive it back in different forms. It is important, when you take this pebble, to do it consciously, to send Light and gratitude instead. Some do this in material form, leaving something behind. You can do this if your heart tells you so.

A kind word, a kind thought is valued no less than the half of a cookie that you throw to the fish, for example. There must be your conscious desire, your gratitude to this place. Gratitude is not an obligation, but a gift of good energy, simply a free gift. If you have this feeling, you will see Light everywhere. Then the stone that you take will absorb the fullness of my Love for you. You can communicate with me (shows) by picking it up at home and placing it on your forehead, remembering what my lake looks like, what the sun looks like here, what the air is like here. Close your eyes and remember how you stood on the shore. And you will be able to communicate with me.

17:55 Kolchak's gold.

Question from the audience: I have the following question. The bases that are located on Lake Baikal, naturally, you study the bottom of Lake Baikal. In our country, more than a hundred years ago, a world event took place - the First World War. At this time, the gold reserves of Tsarist Russia were transferred to Admiral Kolchak for evacuation deep into Russia from theft, most of them. This train, more than forty cars, disappeared without a trace on the shores of Lake Baikal. Does this gold lie at the bottom of Baikal, and will it be found?

Irina: (Tikhtians) According to the results of the study, there are no such reserves of gold, especially artificially created ones, that you mentioned.

It hasn't disappeared. These carriages were moved to a place that was well known to those who later said that it had disappeared. They created a legend. This, of course, needs to be asked of historians.

As far as I heard, this legend was needed so that some people from other countries would not be suspected, so that they would not be accused of the loss of this precious metal for you. A myth, a legend was created. But according to the results of the study of the bottom, no such deposits were found.

Question from the audience: Where is the metal itself?

Irina: This must be sought through the Astral.

20:22 Maintaining and protecting the planet's ecosystem.

Question from the audience: Dear Baikal, our dear Tikhtians and Pleiadians, thank you very much for helping our civilization in a single Light! And a question for the Tikhtians: we have analyzed the relationship with political structures, but how can we, ordinary people, help ourselves every day and, thereby, support the Earth's ecosystem? Even when we take out the trash, we use some chemical elements and products in the kitchen. What can you tell us? Precisely on the physical level. How can we physically support the ecosystem of our planet? Thanks a lot.

Irina: (Lax Rhios and Ashrim Coasti speak) How can each of you physically support the ecosystem of our planet and Lake Baikal in particular?

The first is to remember that those organic wastes and substances from your chemical industry that fall into the ground on the banks of Baikal and its rivers that flow into it - all this sooner or later ends up either in Baikal itself or within its shores. All this will be carried to Baikal - every year with the melting of the snow the water will rise, and all this will be carried there. If (shows) people throw garbage in the forest, into a ravine, without thinking that anyone is seeing (from a car, for example), then sooner or later the garbage or substances that are there will end up in the water.

In order for you to take care of the environment on a physical level, you first need to take care of the ecology of your Soul. Physical dirt, environmental damage, pollution are only a manifestation of what is happening on a spiritual level. A person who has blocks, negativity, his spiritual heart is polluted, he begins to consider this state of the world around him as natural. It costs him nothing to pollute this world. He considers this natural, his nature, because he himself is not pure inside. He has no inner purity. Therefore, first of all, you need to take care of the purity of your spiritual heart. And it is possible only in a state of Love. This is the first, main condition.

The second condition is to explain to your children, your younger generation, that nature does not just accept from a person everything that he throws into it, but that then these substances can decompose into components and harm nature. All this needs to be conveyed to children in a simple form. But this is only part of the job. The main emphasis should be on making sure that the garbage that people have, that they no longer need, has somewhere to send it. So that they don't leave it in their houses or bury it in the ground on their plots. Of course, you say, you can burn it, but not everything. For example, there is a big problem with alkaline substances, surface active ones, which naturally flow into rivers with sewage, and then into Baikal.

What can you change here? They sell it all in your stores in beautiful packaging, nice-smelling shampoos, soaps, etc., but then you wash it all off with water, and it all goes, naturally, into our lake. When it's one person, ten people, a hundred people, it's not scary. But when there are already a hundred thousand of them using these substances every day, this naturally turns into problems. The problems are not for you, but for those small algae and fish fry that drink it all.

What can you do here? They sell such substances. They may even have a beneficial effect on your skin, but when they enter the digestive systems of fish in large quantities along with food, they, like alkali, corrode them. This is harmful for them, they may die. This is the first.

The second problem is that there are a lot of boats on Lake Baikal that use fuel. Both it and the products of its combustion end up in the same lake. And these are also poisonous substances for birds, fish, animals, and the most unpleasant thing is that organic substances that are in the fuel do not just spill on the surface, but can react with substances in plants and sink to the bottom, and then remain there.

The only thing I can recommend to every person as conscious as he is: do not use detergents with surfactants (for example, sodium sulfates, which are difficult to decompose; a very large amount of reagents is needed to decompose it into harmless components), and if you do use it, then within reasonable limits: two to three times a week will be enough. Or look at the composition of the products, where it is contained in smaller quantities. There are low-alkaline detergents.

As for fuel, try to minimize its entry into the water. For example, refuel and wash a boat not in open water, but somewhere on the shore, in a separate place. Otherwise, everything ends up in Baikal. This is, to the extent of your consciousness, what you can do directly.

29:55 Oil, its origin.

Question from the audience: Hello! In our world there is a substance called oil, and we love to burn it. My question is: what is oil, according to our esteemed geologist, and how can we best use it?

Irina: (Iskhirod Roshih) The whole point is that you call oil homogeneous, but it comes in several types. We say “several types” because it is formed in different ways. This is not only an earthly concept; there are planets where it is also present in the soil layers.

On Earth, it can be formed in several ways, depending on the place where it is located. If any small animals, insects and plant matter, as a result of some catastrophe, for example, were covered with earth (a layer of earth turned over and fell, as in a flood). This all turned out to be without access to oxygen, air, or light. The microorganisms that were there can slowly begin to process everything into a mass where only separate chains of flammable substances exist, which you call hydrocarbons. These are chains of carbon with hydrogen attached to it in completely different modifications. There are also sulfur, phosphorus compounds, all substances that were previously in the proteins of organisms, but they disintegrated under conditions of oxygen-free decomposition. You call it “dead organic matter”, the most diverse. There could even be bodies of living beings that died in a catastrophe or as a result of natural death. They lay on the ground, later they were flooded with water, a swamp formed, they went into the ground, and decomposition began there. Such ways of education.

There is another option when there is a reaction between sea water and those substances that are below the seabed. They touch. There are channels under the seabed where water is poured, and reactions slowly occur there, which also collect carbon and hydrogen from these rocks. It turns out a similar substance, only not from organic matter, but from these substances.

That is, oil deposits are possible even where there were no living beings. For example, under the seabed. The formation of such reactions is also possible on other planets.

Question from the audience: How does oil that comes from the bottom of the lake affect the nature of Baikal?

Irina: (Tikhtian speaks) We have no data that it came from the bottom of the lake. It came from outside. Not the oil itself, but the products made from it. At least, under the bottom of Lake Baikal there are no such significant cracks or where it could come from. That is, this oil is “external”.

How does this affect the environment? Negative. People need to reduce this oil ingress. There is no evidence that it can come from the bottom in any significant quantity. Although there is, of course, under the bottom, and around Lake Baikal, deep, deposits. But we have not recorded the ingress of any significant amount of oil greater than the introduced petroleum products.

36:17 Interaction of Earth plasmoids.

Question from the audience: Dear Baikal, please tell us, do the patron spirits of large bodies of water, at least freshwater, say, lakes, interact with each other? Do they have any interactions with each other? Or maybe some kind of joint “events”? Because we are talking about some intelligent civilizations and specialization among plasmoids. Baikal reminds me of Ladoga in a certain way, and I understand that perhaps there are some common programs. Thank you

Irina: (Spirit of Baikal) There are, and not only lakes, but also other places of nature - forests, seas, we communicate with each other. For example, I am at the 38th density level, but I can communicate with any other density level, I just move between them, like you move in astral travel. This is a shift of consciousness.

Now, for example, I have moved part of my consciousness, what we

call part of my conscious attention, into the world of third density. But the main part of my consciousness remained in my world. I can also move, for example, to the seventh level, to the twenty-second, to the level of the plasmoids of this forest, which is next to you, to the level, for example, of the Arctic Ocean or the same Black Sea.

Do we have joint events? I wouldn't call them events; we rather have a common joint plan for the development and maintenance of life on planet Earth – plant life, animal life, and the life of human civilization, which is adjusted depending on the influence of people on nature.

How do we conduct meetings? To do this, we don't need to fly somewhere, we communicate mentally, just as I communicate with Irina now. Just as I can communicate with humanoids, I can also communicate with plasmoids, tuning into their energy; each plasmoid has its own individual vibration frequency, just like a person. Therefore, when I tune in to it, I can be, for example, above Baikal (now my main subtle body is located just above it), and here I am present with part of my consciousness.

Question from the audience: Water sources are a valuable resource for any state. Lake Baikal is one of the largest water basins in the world, and due to the fact that the environmental situation in the world is deteriorating, including in our country, and, if you look at the Time Line, is there a high probability of geographical refugees and migrants coming here?

Irina: Who will watch on the Time Tape? Zaliatar? Indeed, whoever will watch on the Time Tape needs someone specific for this. Who will watch? (MidgasKaus and LiShioni speaking) We'll see for now, but it takes time to tune into this particular layer of the Astral, and we need to look at the probability. But there you need to know the time period of the probability - for what time?

Question from the audience: One hundred years.

Irina: A hundred years. The next fifty years.

Question from the audience: Okay, thirty, let's go!

Irina: (MidgasKaus and LiShioni speak) There will be migration for the next thirty years, but there is also migration now.

Question from the audience: For the sake of water sources, for the sake of water.

Irina: For the sake of water?

Question from the audience: Yes, pure water.

Irina: Should we also look at their motives?

Question from the audience: What is the probability? For the sake of gold.

Irina: For the sake of oil, too. (MidgasKaus and LiShioni smile and say) We understand that we need to look at the likelihood of mass migration of people from other countries to Baikal in the next thirty years. From any countries or specifically? China? Totally funny!

Maxim: Judging by the economic situation, it’s easier in Siberia!

Irina: They will need time, they are already adjusting, I feel, because they have moved from this space. Let's have some questions for now.

42:00 Funnels on the surface of Lake Baikal.

Question from the audience: Dear Baikal, today we asked the Baikal plasmoids a question about the reasons for the appearance of giant craters in the center of Baikal. We received an answer that this is a connection with underground rivers, but the question arises: why does this happen periodically, once or twice a year?

Irina: What arises periodically, what kind of funnels? This is what we need to understand now.

Question from the audience: Funnels appear on the surface of the water in clear weather.

Maxim: Just ask a question, otherwise “you were looking, you were looking somewhere, you were looking once, why were you looking.”

Irina: What are these craters on the surface of Lake Baikal?

Question from the audience: Yes.

Irina: (Spirit of Baikal) This is most likely not connected with underground rivers. Movement in a circle, flow is precisely the effect of plasmoids of water and air together. They make circles like this. In your opinion, it’s not a game, but a way of showing yourself that they exist. There may be big ones, but they are not long-term, but short-term. At first the water spins, then it stops and becomes quiet in the same place. It may not produce these craters for a long time; they may no longer appear in this place at all. And then suddenly appear in another place. If you are talking about these funnels, then yes.

If you are talking about permanent funnels - there are those that are permanent, like gyres, only they move more slowly in a circle, then this is really connected with underground currents. Baikal also has its own currents, which run along the shores and in the depths. Connected with them.

A funnel, depending on what it is, if it exists for a long time, then this may be due to the bottom topography and the underground river. There is another example: from the mouth of a flowing river several kilometers along the bank to the side and opposite this place there can also be a funnel, because water of different temperatures and different compositions is mixed. This causes different densities, and it begins to curl.

Question from the audience: Question for LiSioni or Mead, which of

them is free...

Irina: They went to watch the Time Tape. We can ask a Tikhtian or a Pleiadian.

45:28 Discovery of an insectoid civilization near the center of the Galaxy.

Question from the audience: Intergalactic news over the past week. We miss the news.

Irina: The Tikhtian wants to say something now.

Maxim: 15 minutes until the end of the event.

Irina: I don't know how much time has actually passed, right then.

(Lax Rhios) The galactic news that I noticed is connected precisely with my homeland, the planet Tikht. Not a week has already passed, but we need to look at the calendar, 12-14 days. The planet Ticht, which is located in the constellation Sculptor, organized a joint expedition with the planet Tashig, which is located in the constellation Northern Crown, and with the colony of the planet Tashig, which is located in the constellation Hercules. These three civilizations organized an expedition to the core of the Galaxy to study one of the insectoid civilizations, but not the one that you know in the constellation Pegasus, but the one that is closer to the core of the Galaxy, to the center of the Galaxy. An insectoid civilization of an intelligent type, which was discovered more than 48 years ago.

It was discovered by representatives of the planet Disaru, but they curtailed their research. And now the planets Tikht, Tashig and its colony, which they take with them, have organized a joint expedition to study this civilization.

The immediate news was that this civilization is at a level of development that roughly corresponds to the Earth's Stone Age, that

is, it has just independently evolved. And the interest lies in how a civilization of the insectoid type will develop from this period. They fly there to study.

Question from the audience: I wanted to ask - you answer our questions so well, our alien friends, but maybe you yourself want to ask us something?

Irina: They are talking. They are thinking about what question to ask us.

Question from the audience: We gave them a task.

Irina: Who asks this? It seems that everything is clear to humanoid civilizations, they just smiled. But sometimes we are less understandable to plasmoid civilizations; we are even more aliens to them than to humanoid ones. For them, we are some strange three-dimensional creatures.

49:30 Body of the Spirit of Baikal.

Irina: (speaks the Spirit of Baikal) Now, through the contactee, I'm looking at what your bodies look like. My body looks harmonious. This structure is made up of twelve small spheres connected in a figure that resembles two pyramids - that is, there are six spheres in each pyramid, and they rotate in different directions. I don't see anything similar with you.

Question from the audience: (laughter in the audience) What was the question?

50:17 Pain is a person's energetic state.

Irina: (Spirit of Baikal) I have a question on a different topic. I address you, Spirits, embodied in bodies of the third level of density (no matter how it looks, but in the Spirit we are one). And I would like to ask you: how do you feel when you hurt a living being? Anyone.

Question from the audience: The one who causes does not feel anything (conversations between those gathered).

Irina: The one who causes.

Question from the audience: Then he feels it, of course. (Discussion). Hardly.

Irina: (Spirit of Baikal) No, at this moment. Do you feel it as energy? (Discussion in the hall). Who will be responsible?

Question from the audience: Let Anya answer.

Irina: Come on, let him answer.

Answer from the audience: There is a level of human awareness. This level shows what thoughts a person is experiencing at this moment. If a person consciously causes pain to another person (this person is conscious), then he probably still experiences pain. And if a person does not understand and acts unconsciously, then he does not experience anything. Maybe he even feels a sense of joy.

Irina: So he has a goal?

Maxim: So we will mislead.

Irina: Maxim will answer.

Maxim: Experiences either a feeling of jealousy or pain.

Irina: Now Maxim will answer the plasmoid.

Maxim: In any case, if a person already causes pain, he causes it for

his own internal reasons. Either he himself wants to get rid of the pain that was caused to him and transfers this pain to another being, or he does not feel anything and feels a sense of satisfaction from the fact that he can torment someone.

Someone will now say that there is conscious and unconscious. But if you are aware, you will not definitely cause pain. Only those who do not feel anything and are unconscious cause pain. Therefore, in most cases, those who cause pain either do not feel anything, or they feel their inner pain, but not because he causes it, but because it is simply there inside. He simply transfers it to another creature.

Irina: (Spirit of Baikal) Oh, what a good answer! Do you mean specifically to humans or living beings in general?

Maxim: I mean that a person, who is also a living being, can cause pain to both a person and a living being.

Irina: (Spirit of Baikal) I understood the answer. Pain for you is an energetic state that you can impart to another being so that it is on your level.

Question from the audience: To feel the same. (Discussion).

Maxim: By causing pain, we put a person in the same state that we experience.

Irina: (Spirit of Baikal) This is a certain energetic state of vibration that a person feels unconsciously, but with his own energy. And he hurts another in order to draw him into this state with himself, so as not to be alone in it. Did I understand correctly?

Question from the audience: Yes, yes, great! (Discussion).

54:20 The influence of the energy of different waters on a person.

Question from the audience: How does water affect a person, his abilities? Is there a difference in the effects of fresh and salt water?

Irina: (Spirit of Baikal) Water is very important for the human body. It is in every cell, even in the cell of your bones it is there. Only with its help can the processes of your life go through.

He asked about the effect of water in general in the body. How does it affect energy? How does salt and fresh water affect energy?

Question from the audience: Per person, is there a difference?

Irina: There is a difference between salt and fresh water on human energy. Salt water is a solution of salt, or rather not just one salt, but a collection of salts. Each salt, as a substance, also has its own vibration. These substances also have an impact on human energy, especially since salt is a crystalline substance that, like water, can absorb energy.

Fresh water can also absorb energy, but in a different way. Salt water, for example, can preserve it longer. Through salt water, the energy states of other people are better transmitted. They are transmitted through fresh water, but they are not stored for a long time, especially if there is flow and mixing there.

Due to these salt crystals, the energetic state of the water, which people have charged with their auras, their mental and astral fields, is preserved. If you look not through the contactee, but simply through the Astral, to me you look like ovals of different colors, nested one inside the other. I counted seven shells. You have one that is denser, and around it are six more subtle ones, and one of them, the subtle one, generally manifests the Spirit. They are not the same colors, each has its own. Right now for me in this space there is a whole rainbow of mixed colors.

Question from the audience: Which one prevails?

Irina: (Spirit of Baikal) Green, bluish. There are different ones,

(shows) something in between bluish-green.

How do you charge water and the surrounding space? When you think about something or feel, your feelings and thoughts go into space, into the Astral. They take with them your subtle life force, the type of ether that you have. It is this ether that provides the vitality of this thought or this feeling. The more vitality and energy a person has, the greater the impact his thoughts and feelings have on space.

If a person who is bright in soul and pure in heart is also energetically strong, he can cleanse a large space. And if a person with darkness inside, which brings destruction, is also energetically strong, he can suppress those light ones who have little energy. There is also a dependence on the amount of energy. Therefore, water acts only as a conductor and amplifier of your own qualities.

Oh Meade and LiSioni! For some reason (shows). LiSioni passed first, followed by MidgasCaus.

Question from the audience: Where are they now?

Irina: Here, in front of me. Mid is now between me and the camera, I hope the camera can see me just as well! Left. No, you can see me!

1:00:06 The likelihood of massive expansion of other peoples to the shores of Lake Baikal.

Irina: (say LiShioni and MidgasKaus) We looked at the likelihood in the next 30 years of massive expansion, as you said, of other peoples on the shores of Lake Baikal and adjacent territories. We saw that there are such options for the development of events, and at the moment they are, in terms of the probability of materialization, somewhere around 22 percent.

Question from the audience: Thank you!

Maxim: Let’s have a couple of last questions and we’ll end the

conference.

Irina: There will be another one right away.

1:00:52 Quantum transition.

Question from the audience: The Earth is now undergoing a quantum transition. What changes are happening to our planet? I heard that even the poles are shifting. Is it true?

Irina: In fact, the displacement of the magnetic poles has occurred more than once in the history of the Earth. This is the influence of the energy of the Sun, the energy of the center of the Galaxy, which influence the Sun itself and all magnetic, planetary bodies in this area.

What you call a “quantum transition” is a change in the energy of space, which comes from the Spiritual world, to an increase in the frequency of vibrations of quanta. Quanta are the components of your atoms. In itself, an isolated increase in quantum vibrations cannot affect the position of the magnetic field. This influence comes from changes in the magnetosphere of the Earth itself, which, by the way, is associated with your man-made causes, and with the influence of the Sun, and with yourself. It's a combination of reasons.

The significance of the quantum transition for you is that many civilizations, subtle material and Spiritual worlds are now investing energy into your civilization, so that those Souls who have embodied here can have a chance to develop in more favorable conditions for themselves, in order to make their path easier. Many civilizations believe that joining other stellar civilizations, be it the Galactic Federation of Light, the Interstellar Union, or both of these interplanetary organizations, will most ease the path. They will help you feel like you are in a single family, where each civilization plays its role. But in order for you to become ready for this, you need to go through a quantum transition, so that the vibrations of your quanta themselves will help and contribute to the purification of your Souls.

1:04:04 Swimming in the waters of Lake Baikal.

Question from the audience: Dear Spirit of Baikal! It's September now. We humans love to swim. And, despite the cold and cold temperature of the water, we still want to plunge into your waters. The second stream of people will arrive soon, and they will not be stopped by the fact that it will be the end of September. How to swim in the waters of Baikal in September so as not to lose your health, but, on the contrary, to be filled with your energy, health, and goodness that comes from your waters? Thank you

Irina: Interesting questions, these are probably more for biologists. Okay, let the Spirit of Baikal answer.

(Spirit of Baikal) In my waters, without harm, as you said, to your health, to the condition of your dense body, you can swim only with trust, with an open heart, with Love. The residence time, of course, depends on the temperature. If you are guided by the sensations of your body, your very instinct, your, as you call it, Higher Self will tell you through the body when to do it, when not to do it, what weather it is, and how long to stay there.

All that is required of you is not to interfere with your own body with your mental attitudes. Do as you feel. Measures are needed here. Even in the summer, people don't stay in the water for a long time - the temperature here is so deep, because the lake is very deep, it takes a lot of time to warm it up with the sun. Moreover, here is a place where active air currents create winds. The wind raises waves that mix sun-heated areas of water with unheated layers. Everything mixes and circulates according to its own laws.

To be safe, when approaching the water with a desire to swim, remember me. Remember that I see you on an energetic level. Before entering the water, send the Light of Love and gratitude. Come in and you will get a feel for what to do next. This can be done repeatedly.

There are people who live here who do this even in winter. On Lake Baikal and on the rivers nearby, in winter they cut ice holes and swim, although the temperature outside and in space is lower at this time. Hypothermia itself occurs not only when the body is in the water, but also when the person comes out of it. Heat transfer begins.

The main thing is to do it in moderation, as a pleasure, so that it does not bring any suffering, some pain, some discomfort, so that you like it, so that you do it with positive expectations, with positive moods. For example, I don't advise, I don't recommend that you go into the water if you don't want to. For example, if someone calls you, or “not to seem weaker than him.” If you don't want to, just refuse. Each person is individual.

Maxim: Well, let's applaud! Thank you!

26.11.2021

Conference participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms;

LiShioni – representative of the planet Shimor, sociologist, specialist in the astral world and its interactions with the material world;

Lax Rhios - representative of the planet Tikht, director of the base on Lake Baikal, biologist - oceanologist;

Ashrim Coasti - representative of the planet Tikht, base employee, scientist, studies biology and the influence of plasmoid civilizations on biological processes;

Ishirod Roshikh - representative of the planet Futissa, head of the Pleiadian base on Lake Baikal, scientific geologist, planetologist;

Baikal - plasmoid, curator of Lake Baikal, 38th density level.

#374 Invisible life: biochemistry, viruses, microbiology. Experiments on controlling human consciousness.

https://blog.cassiopeia.center/nevidimaya-zhizn-biohimiya-virusy-mikrobiologiya
https://www.youtube.com/watch?v=95GKvn_9uHw

00:18 Presentation of conference participants.

Yuri: Hello everyone, dear friends! My name is Fidrya Yuri, I am a contactee with the Galactic Federation of Light and the Spiritual World. Today I am with you to ask questions on the topic of biochemistry on the Cassiopeia channel.

It so happened that my first education was a bachelor's degree at the Lomonosov Moscow Institute of Fine Chemical Technologies, specializing in biotechnology. My main specialty and diploma were defended on the topics "Carcinogenesis" and "Breast Cancer", so I am familiar with biological systems, of course, not all, but many. And therefore, today I would like to ask some questions that interest us regarding biochemistry, both our earthly and alien ones.

I run a YouTube channel called Quantum Healing, and we mainly do meditations there.

I would like to ask questions that are painful, worrying, and very interesting, and that I am also asked.

Irina: Hello, dear friends! Hello, Yuri! My name is Irina Podzorova, I am a contactee with extraterrestrial civilizations. Today we have with us three representatives of alien civilizations from completely different planets. This, as always, is MidgasKaus - biologist, psychologist, specialist in alien civilizations.

With us is a representative of the planet Tikht, he is an astrobiologist. He studies healing and the effect on the etheric body, including the etheric DNA matrices. His name is Apertis Tuar.

Also present is to represent the planet Selbet, the reptilian civilization, the same one who was with me in my first conferences with the reptilians, his name is Te Per Hredours. He is an expert in genetic changes, in biology, in all the experiments in this field that their race conducts on planets like Earth, with contactees.

He welcomes everyone and is also ready to talk about his planet and our differences and similarities.

Yuri: Very nice, interesting!

Irina: If you have a specific question for someone, you just ask and say Apertis, Mid or Te Par. If anyone wants, then any of them who wants to answer.

Yuri: Okay. If possible, first question.

03:44 The difference between earthlings and the Disaru civilization.

Yuri: The first question is quite general; it concerns human biochemistry in general, as opposed to the biochemistry of aliens. How does human biochemistry differ from the biochemistry of aliens? We have very close relatives - these are representatives of Disaru. How do we differ from representatives of Disaru and other alien civilizations?

Irina: Others, which ones? A lot of them.

Yuri: Let's first Disaru, then Tikht, and then Selbet.

Irina: These three. Who is responsible? Anyone, right?

Yuri: Any.

Irina: (MidgasCaus) I greet you. I studied the organisms of different representatives of different planets, their biochemistry, biology.

Representatives of Disaru and representatives of the Earth can have common offspring without the intervention of drugs that correct the genome. They are very similar to each other and the only difference is that the genes of the Burkhadians and Tumesoutians remained in the same ratio that the earthlings had before the war. But the difference from those earthlings who were on Earth for up to 12 thousand years is that the representatives of Disaru are still less tall, because they are on a planet where gravity allows them to be slightly taller than earthlings, but not 4 meters, as it was originally among earthlings. By the time of the war, shorter earthlings were born. Over these millions of years, such a mutation prevailed in the human population that shorter people began to be born. It was no longer 4 meters, it was a little more than two meters. They maintained their height on Disaru.

Another difference is the type of food. They do not have genes that encode the production of enzymes for processing animal proteins, excluding dairy, and in very small quantities those proteins that are found in bird eggs, for example.

I would like to remind you that even before the war there were individual representatives among people who, despite the absence of such genes, still hunted for the sake of some kind of rituals. They still consumed animal food, meat as part of their rituals. If they ingested enough, they could get sick and even die from it. Their gastrointestinal tract was disrupted.

Yuri: Can you clarify?

Irina: Yes.

07:25 Rh factor and blood group among representatives of Disaru.

Yuri: It turns out that we and the representatives of Disaru have a very similar biochemical blood composition, I mean, do our Rh factor and blood groups coincide? Do they have a Rh factor, a blood type?

Irina: There is only one Rh factor and blood group. The one you think is the first. Those mutations that occurred later did not affect them. But this does not prevent them from being genetically compatible. These mutations that occurred and encode proteins and their combination appeared after the migration to Venus, which was ten thousand years ago.

08:40 Visit by representatives of Disaru in the physical bodies of the Earth.

Yuri: Okay. A very interesting question follows from this: do our dear representatives of Disaru visit the Earth in physical bodies?

Irina: Yes.

Yuri: And they have contacts?

Irina: Yes, they have contactees, including physical ones. They meet through physical contact.

09:00 Coronavirus and representatives of Disaru. Alien medicine in virology.

Yuri: In connection with this question. We now have a disease that cannot be named. Can it be transmitted from contactees to Representative Disar?

Irina: Theoretically, it can, since their cells of the epithelium of the respiratory tract and alveoli of the lungs are almost identical in protein composition to people, their DNA is almost the same.

Their medicine is at such a level that they will defeat this disease. They do not have antiviral drugs, but they have a special device with a certain radiation on the physical body.

Now a different technology has prevailed in the Interstellar Union to combat damage to the body from infections and pathologies. Not with drugs, whether they kill any pathogen, or, of course, vaccine prevention (neither one nor the other approach is no longer popular in the Interstellar Union). A preventative approach is popular: filling yourself with energies of different frequency ranges, psychological spiritual attunement to high vibrations, talking with your internal organs, including this virus.

And if these are some life-threatening, acute cases, then there are special devices that send a frequency that is incompatible with their life. This is not a chemical effect. If there is a need for chemical exposure, then such a drug will be created in a few hours. A formula that will destroy any virus or microbe will be recognized. This is a matter of several hours.

But he believes that such a need will not arise.

Yuri: They can't even get infected in principle because of their high vibrations?

Irina: Theoretically, they can become infected. But they will feel it. They are used to communicating with their body, and it will tell them that a foreign virus has entered their body, and their immunity has become more active. They also have immunity.

All living beings have immunity in one form or another. Their blood cells are roughly the same as yours. They can talk to their blood cells, and in meditation, as you say, they will be told that a virus has entered that their body does not have the resources to cope with. Since they

will already know about this, they will use special methods - radiation. We have diagnostic instruments.

(Shows a capsule, a person gets into it, and the computer screen shows everything that is in it, including at the microbiological level). Down to every type. It will be written there that this species is unknown, but it has the following characteristics: size, protein composition, everything.

Based on these characteristics, they will select radiation that is opposite to the frequencies of the virus that penetrated them. But this is only if their immunity cannot cope with it and they feel unwell. In general, immunity is strengthened from childhood with special nutrition, walks in the fresh air and, naturally, a positive attitude.

I wanted to say that in order for a person with Disaru to fall ill with your disease, he needs to be exposed to a very large dose, which his immunity cannot cope with. Even their children's immunity is initially stronger.

14:15 Calcification in the body of earthlings. Pineal gland, pituitary gland and hypothalamus.

Yuri: I see, yes. Okay, thanks for this answer. It is very interesting. Another small question. There is a rumor in our society that the pineal gland, as well as the thymus gland (a gland located in the chest), either atrophy or calcify with age in a person.

There is a theory that this is due to the consumption of fluoride substances. It is known that fluoride-containing substances are added to various products, such as toothpaste. Sometimes they are added as chlorination or fluoridation of water.

Question: could this be related to calcification of the pineal gland, and has any research been done in this direction?

Irina: (MidgasKaus) I was asked a similar question - about fluorine-containing substances. I can answer. The question has been asked on

several topics, but I will answer the main one: “Can fluoride affect the pineal gland?”

I want to tell you that in order for the thymus or pineal gland to calcify, it is necessary that the level of calcium and calcium protein compounds in the blood be quite high. Then by this moment the renal pelvis has long been calcified (shows like stones), by the time the pineal gland calcifies, calcium will already be deposited in the kidneys and around the mouth of the aorta. The person will already feel very unwell, his bones will be at risk of fractures (you call it osteoporosis). You attribute this to a lack of calcium and vitamin D.

In fact, anything that contains fluoride, which comes in large quantities through water, food, plants (there is even fertilizer with fluoride), and through toothpaste, is absorbed. By the way, sodium fluoride is taken through the oral mucosa. Elevated blood fluoride levels can actually affect calcium replacement. Calcium is forced out of the bones and begins to be deposited in different parts of the body, because an increased level of calcium is dangerous for thrombosis. To protect itself from this, the body puts it aside. But this is only one of the factors influencing the pineal gland and thymus.

The most important factor due to which an organ can become calcified is an infection in it or some kind of parasite, and the body takes this into a capsule. Or any destructive process, tissue necrosis, which can be caused by injury. For example, the same micro-stroke, which often occurs in the vessels surrounding the pineal gland. This is a physical reason.

There is also a spiritual reason. This is a failure to use the capabilities that these glands provide. Any gland is an instrument of the human body through which the Spirit can influence the body, releasing certain hormones. In particular, the thymus is an immune gland. If a person does not strengthen his immune system, this organ may atrophy.

The pineal gland is the organ of those hormones that are responsible for mood and emotions. If a person is in negative emotions, then her work is suppressed. And not only the pineal gland, but also two other glands on which the work of the brain is based - the pituitary gland and the hypothalamus. Even tumors can form due to calcium deposits. For

example, there is a pituitary adenoma - also from negative emotions. These are the three pillars on which the brain stands.

19:55 Chemical mind control.

Yuri: Then a question. It is known that our emotions are very strongly connected with the hormones released. There are substances that can control certain mental reactions.

Question: We have heard from some representatives from your ethers with reptilian civilizations that there are civilizations that have chemical control of consciousness. They prefer to use chemical influences on the body to prevent crime or disobedience among their citizens. Question, in particular, to the representative of Selbet. Does he know about such technologies, do they use them?

Irina: (Tae Per Hredours speaks) Yes, it is known.

(MidgasCaus speaking) I was at a conference that Irina held with representatives of the Order of Six. I noticed the representative said that they have chemical spray control. At the same time, when asked about those who do not comply with the laws, he replied that everyone is happy with them, and those who are dissatisfied are isolated or destroyed. That is, the death penalty.

I immediately noticed this and told Irina about it that if chemical management were effective, then there would be no need for any restrictions in society. Yes, it can affect consciousness. But, if the Spirit has sufficiently strong vibrations and self-confidence, it can resist any chemical influence as well as instinct.

You know very well that, unlike animals, humans can resist the effects of hormones. For example, the fear hormone - adrenaline - will tell him one thing (this is a chemical substance that affects consciousness), and he may act contrary to his beliefs. An animal cannot do this, unless because of some kind of instinct, but a person can do it because of Faith. The same goes for chemical exposure.

(Says Te Per) Indeed, I know such civilizations. These substances can be added to food, drinking water, or as chips that are administered at birth. Many civilizations use such chips. Many people simply use technical devices, but there are those who put certain chemicals into these technical devices. They are released, for example, in response to an order to the chip from the outside, like a computer command for a substance to be released in a certain situation.

For example, if a humanoid has committed a crime and they are looking for him, then this chip may contain a substance that paralyzes the muscles. From a distance, they can command his chips to release a substance into his blood to immobilize him. So that he would be found and neutralized quickly, and he would not have time to cause harm.

24:00 Technologies of consciousness control on Earth.

Yuri: Thank you. Another question. We know such a technology, which was studied by the CIA, called “MK-ultra”. She just talks about the technique that you describe. A question for all three of our representatives: were they able to document that research in this direction was being carried out on Earth? Is it possible that we are currently using this?

Irina: Is it used on Earth in general or anywhere?

Yuri: On Earth. Exactly on Earth.

Irina: Chips or substances?

Yuri: I mean all this combined technology, some substances. I don’t know about chips, just substances.

Irina: Naturally, experiments on influencing consciousness with the help of substances were carried out by many intelligence services, in almost all countries, especially in the USSR, Germany, Japan and the USA. Almost all large states that had the appropriate funds and capabilities conducted research. Basically (if it was during the war) - on

prisoners of war, and if it was during a period of peace - on their own criminals. Especially the impact on consciousness with the goal of, for example, telling him what he knows in order to control his behavior.

We look at the laws of states and the degree of their implementation by citizens, the degree of loyalty to the state. I said that if these experiments did take place (say Mead and the Tikhtian), they were not particularly successful, because the crime situation in leading countries leaves much to be desired.

If states governed with the help of substances or some fields, as you say, then the first thing they would introduce into government is obedience to laws. Any state is interested in stability so that its image does not decline. And if crime, corruption, unemployment and everything that provokes popular unrest increases in the country, then this damages the image of the authorities and makes it difficult to govern the people. They have to create a large apparatus of police officers, prosecutors, judges, and spend money on them from their treasury. Instead of just managing.

26:59 Controlling the consciousness of people on Earth.

Yuri: I understand that the situation with the obedience of citizens has not changed much. Question: has there been research into whether similar technologies are currently used on Earth? Some people have suggested that we have something sprayed into the atmosphere, something added to food, that modern methods of electromagnetic radiation, electromagnetic influence, such as cell towers, can somehow affect the brain. Could this be possible?

Irina: I understand the question. To influence your brain, your consciousness, you just need to create some idea in the media, say that something is approved and something is not approved by certain authority figures. This, of course, is carried over electromagnetic waves. From this point of view, control of electromagnetic waves is possible, but it is at the advertising level. Advertising is also a type of public opinion management. For example, election campaigning, when several party representatives participate. People cast their votes not for the one who will present a real plan for the country's exit from some crisis or solution to pressing problems, but for the one who promises

them the most. This is also management.

Yuri: Yes, I understood you, thank you.

Irina: This is management with the help of ideas. In fact, this is much more effective than chemical, physical influence or a direct directive to do something. A person himself believes in this and directs the power of his Spirit to accomplish a task that is beneficial to the one who controls him. The stronger the chains on a person, the more he believes in the freedom of his opinion, his choice.

He did not choose his opinion freely, but because he believed promises that were not even intended to be fulfilled. This is deception, such manipulation.

Yuri: Got you. This is a method that we call neurolinguistic programming. Is that how it works?

Irina: This is not even programming. A very interesting word (Mead smiled). Linguistic – does it mean related to language?

Yuri: Yes.

Irina: So, programming neurons using language. Yes, but he has many more methods than are outlined in this teaching.

Yuri: Can I clarify? Mead likes to give detailed answers. At the moment, they have not found or recorded any evidence of the use of such technologies on Earth?

Irina: No, we did not find or record any electromagnetic or chemical controls. There's simply no need for it. It's expensive, ineffective, unsafe and simply makes no sense because it's more efficient to manage, as stated.

30:43 Difference between external electromagnetic signals and

human brain signals.

Yuri: Got it. My second education, master's degree, is in technosphere safety. Question about this.

We have maximum permissible indicators both for the concentration of substances in the atmosphere and for electromagnetic radiation, which is considered the norm per square meter. The question is this. Nowadays, almost every apartment has Wi-Fi routers with varying numbers of antennas and degrees of overlap. In addition, in large cities there are also cell towers located everywhere. A high density of overlap of electromagnetic waves can affect the functioning of the brain as a whole, because electromagnetic impulses also pass through our brain? Can this have, so to speak, a generally stultifying effect on a person?

Irina: It depends on the frequencies and on the intensity of the frequency electromagnetic radiation directly in the space where the person is. It depends on the purity, the strength of the radiation, what do you call it, the strength of the flow.

Yuri: Power?

Irina: Yes, the power of this flow. If you are talking about 5G now, then there is more transferring ability of these electromagnetic waves. You know, these towers are located quite close to each other, often. This is due to the fact that the frequency is high and, accordingly, the area of propagation of this frequency, the propagation power drops very quickly. There is a need to strengthen each other. If the frequency is low (meter range, for example, radio waves), then the penetrating power, the flow power, is high, even at a distance.

You have had such radio stations for a long time; television and radio stations operate on them. For example, you are in an apartment, but if you go out into nature, move away from Wi-Fi routers, from 5G towers, or be in the forest, this does not mean that you are not exposed to radiation. Thousands of radio waves will pass through you.

Yuri: Yes, but there are also radio waves that propagate over a long distance, these are long radio waves, the so-called large ones.

Irina: They just have more flow power due to the fact that they are long. Their flow power spreads out more.

Yuri: Such waves can almost go around the globe, as far as I know.

Irina: At the same time, leaving the power that was acquired by them at the moment they were allocated by the transmitter. They may not even lose their power.

Yuri: Got it. What if, for example, the size of the wave corresponds to the size of the fiber length of the neuron?

Irina: Axon you mean?

Yuri: In the brain. Yes, I mean pathways.

Irina: So this is a fraction of a millimeter. This is gamma radiation, this will already be radiation.

Yuri: I understand. Yes, they intersect, we have a high density. Could this somehow suppress consciousness? After all, electromagnetic impulses constantly pass through our heads.

Irina: Our electromagnetic pulses travel at other frequencies. At frequencies that are higher than those at which radio or cellular communications operate, for example. They are associated with electrochemical reactions. Neurons, when they produce an electrochemical signal, produce it for the nerves. No other signal can override this signal. The human nervous system is configured specifically to transmit an electrochemical signal, which is obtained due to the waste of adenosine triphosphate; it splits off the remainder of phosphoric acid, and because of this, energy is released, which is converted into electrical form as an impulse. And this impulse is sent along the myelin threads, which consist of a special protein, so that the

body carries out the commands of the brain, and through the brain – the commands of the Spirit.

No other frequency can interfere with this. It will not be able to enter this nerve, spread along the myelin, it is not electrochemical. This is completely different.

Yuri: Got it. I'm a curious person, I'm interested in everything, that's why I ask. We know that when a charge moves along any conductor, a magnetic field appears around it. It is, in principle, of the same nature as electromagnetic radiation. Question: does a magnetic field arise in a nerve fiber when an impulse moves?

Irina: Yes, just a small one.

Yuri: If the frequency of the tower, suppose, is adjusted to the frequency of the electromagnetic field in the neuron, can this have an effect?

Irina: So what? Transmitting signals this way? Or what?

Yuri: For example, to exert an influence so that the signal is transmitted as a whole along nerve impulses more slowly than usual. Slow down brain activity.

Irina: Slow down brain activity? All the same, this axon along which the signal propagates will still not carry it through. You can somehow adapt to the neurosignal by external influence, but it still won't carry it through, because it will be a different signal.

Even if you wear a helmet. We have, for example, such devices. They put a helmet on the head and send impulses to the brain, there is a type of electromagnetic radiation, it is adjusted to the frequencies of the brain. They might show a movie there, etc. On the contrary, a person can control a computer, for example.

But you need to adapt to a specific person, these are settings. We

need direct producers of frequencies of electromagnetic waves through which the brain can communicate, for example, with some external program.

The same is possible through chips. For example, many of us install chips through which we can mentally access a computer network. This chip gives us the opportunity, by closing our eyes, with a mental desire, an effort of thought, to direct ourselves to the exit there. It's almost like a type of connection. For us, all this is harmonized with our consciousness and brain. And to do it at a distance, you need a very large transmitter, whose energy will exceed the energy of the planet's core.

40:27 Origin of coronavirus. The purpose of its distribution.

Yuri: I see. Thank you for your reply. The question is this: we recently had news in the news that a certain group of scientists have proven that there are signs that a disease that cannot be named in our public space is artificially created. It may be of artificial origin. What do you know about this issue?

Irina: Yes, according to research from the Interstellar Union, this virus was created artificially. By changing the genome, introducing genes into it that are not originally characteristic of the natural virus of this disease. It was characteristic of viruses of related species that were not considered dangerous to humans. We genetically crossed the genotypes of several viruses and did this for experimental purposes. This happened in a laboratory in China. Few people even know about this.

Yuri: Question for Tikht's representative. We had rumors that this disease was started for some purpose. Do you know what these goals might be and what kind of impact this disease has on a person?

Irina: Exactly for the purpose for which it was created? Specifically in China?

Yuri: Basically, on a global scale. When this all started, there was a

feeling that all measures taken to contain this disease were taken after the fact of infection in a particular country. The feeling was created that they were deliberately waiting for infection, and then introducing precautionary measures. The question is: could there have been any intentional actions related to this virus?

Irina: Intentional on the part of whom?

Yuri: From the human side.

Irina: Deliberate infection of other countries?

Yuri: Yes, deliberate distribution. There are many microbiological laboratories, including in Russia, that work with biological preparations that are dangerous to people. There are no leaks from them that create such problems. Could the leak have been intentional?

Irina: We think yes. This could have been intentional. Again, I express my personal opinion, I know those scientists in the Interstellar Union who will agree with me. We discussed the issue of the appearance of this disease on Earth, dangerous not only for human health, but also for civilization (its development, politics, economy). It lowers vibrations due to the emotions associated with it and with measures to combat it, which cause far from bright emotions. The disease itself, the measures to contain it, all of this together, greatly reduces the energy vibrations of the Earth and prevents the quantum transition from occurring.

We believe that, if we look at it from a physical point of view, the purpose of these people who distributed, sprayed this virus, made it appear to be leaking, they had several goals. The first goal is to conduct an experiment on the effect of the created virus on a wide population of people of different ages. And the second goal is to improve the susceptibility of this virus as a biological weapon so that it can be used, first, by warriors against enemy states, and second, to reduce the population of one's own country.

Yuri: Thank you for your answer. It is indeed clear that this leads to a decrease in vibration on Earth and is possibly associated with a

quantum transition. Could the representatives of the Council of Six be connected to the people who spread this disease?

Irina: If only in astral contact. We cannot assume physical contact with anyone without Interstellar Union approval until it has been proven. Of course, we can assume anything we want, but it will be at the level of our assumptions.

It is possible to assume astral contact of these people both with the Order of the Council of Six and with the negative plasmoid civilizations of the Earth itself - they are about 30 percent of the total plasmoid civilizations of the Earth that have switched to a parasitic lifestyle. They can take on the image, for example, of the same reptilians or aliens in the Astral Plane. This, too, cannot be ignored or overlooked.

Third: they may be in contact with the demonic world, that is, with generally disembodied Spirits who are interested in discrediting governments in the eyes of people and thus lowering vibrations.

Fourth: people themselves can be at a low level of awareness, their consciousness, and not be in contact with anyone. It was just their decision because there were some negative blocks inside, some negative complexes that were destroying them. And they bring this destruction to the world.

All these four factors can be combined, in any combination. Judging without knowing them can lead to general judgments. Anything can happen, anyone negative can be in contact with them.

48:08 Adrenochrome.

Yuri: The answer is clear. And the last topic. Not so long ago, there were a lot of rumors and information about a substance called adrenochrome on the Internet. I don't know whether you know about it or not, so I'll tell you a little about what it is.

Adrenochrome, as we say, is a substance that is produced as an oxidized product of adrenaline during moments of an intense state of

horror in a person. In this case, a lot of adrenaline is released into the blood, hyperventilation of the lungs occurs, and adrenaline is oxidized to the state of adrenochrome.

The topic is complex, in our society they said that this substance is used by some people on our planet as, perhaps, a narcotic, and perhaps some other substance.

Do you know what adrenochrome is? How can this be connected again with contacts of the Council of Six, because according to our information, there is a connection with representatives who worship demonic structures?

Irina: (MidgasKaus) Adrenochrome is really a product of adrenaline metabolism. It is formed as its product before excretion. When adrenaline levels rise, it is processed in the liver into adrenochrome, just like in your chemistry lab. This happens before it is removed from the body. But this is regardless of how much adrenaline gets into the blood - a lot or a little, it will still be processed, including into adrenochrome.

In a state of very great horror, as you say, there will be a lot of this substance. If it is not horror, but aggression, for example, the same thing will happen - adrenochrome. It can be obtained in any stressful situations.

If we are talking about its properties, adrenochrome itself does not have any narcotic properties; on the contrary, it has the property of depressing consciousness. If adrenaline excites it - the heartbeat increases, ventilation of the lungs improves, metabolism accelerates, glycogen is released from the liver, and so on, then adrenochrome has a depressing effect, it can cause headaches, for example, despondency on an emotional level. It also reduces immunity, like cortisol. The body gets rid of it; it does not need it as a by-product.

Do you remember yourself in a state, if you were very frightened of something or were in aggression, what state you were in about two hours after this emotional state, when adrenochrome in the blood is at a high level. There will be a loss of strength, energy, despondency,

maybe a headache, trembling in the limbs. I've heard about this. They say that some take adrenochrome, their blood - he will feel all these states that you have two hours after fear or strong aggression, anger. He will feel it even more strongly. It's strange to take such a drug.

Under this myth, the legend about adrenochrome, there is a very big Truth hidden. It lies not in adrenochrome, but in the fact that there are negative plasmoid civilizations and representatives of disembodied Spirits from the demonic world from the first six levels, with which some people come into contact, since they correspond to their vibrations.

If these are plasmoids, then they feed on the energy of fear and aggression. They instill thoughts, for example, of showing sadistic tendencies: torturing animals, children in any way, causing them pain and fear. From the aggression of such people and from the fear of their victims, a cloud of energy arises, which feeds negative plasmoids. At the same time, demons can also inhabit their bodies and receive these sensations through their bodies.

If we examine this issue in detail, this leads to crimes against children, against their sexual integrity. This also leads to sadism in sexual relations between adults, to sadomasochism, for example. To various phenomena that in your world are not usually discussed publicly, but they exist and occur much more often than you can imagine. But not in some basements, where adrenochrome is allegedly extracted from children, but what is even worse - in the most ordinary families behind closed apartment doors and windows covered with curtains. People live, you meet them on the street every day. They may be buying milk from you, you give them a lift in your taxi. You communicate with them, but you don’t know that they may be the very people who torture the weak, their children, their wives.

I want to tell you that we looked at the noosphere of the planet. It’s not customary to talk about this, but somewhere around 30-35 percent of the deaths of children from various types of injuries, including in Russia, occur at the hands of their parents. These are the people who live next to you. This is actually an indicator of aggression and low vibrations of the entire society. Your society and your government do not create conditions and educational standards. There are no performances in the family so that people raise their vibrations, they do

not explain the importance of the Spirit, communication with the Higher Self.

These crimes are hidden, but they exist near you. Maybe even in the next house.

56:18 Aggression in society and the quantum transition.

Yuri: Thank you for your answer. You said in the middle of our video that if we had a manipulative effect on people's consciousness, then our crime rate would decrease. I have a question: if the purpose of this influence is, on the contrary, to increase the aggressiveness of society in order to lower the vibrations of the Earth and prevent the quantum transition? Could this be possible?

Irina: This will create instability in the board. I have already explained the reasons why instability will be caused. People who exhibit increased aggressiveness will not only exhibit it at home. They may manifest it, for example, at their place of work, they may not obey the laws. People who are in power understand this very well. Aggression cannot be one thing; it can entail other negative character traits that will be much more difficult to control. If there are many such people, they can destroy the entire country along with the rulers.

This is what happened, for example, if you were watching (I was in contact), with the Spirit of Lenin. He had in his mind that those who disagreed had to be killed, shot, and when there were a lot of such people, you know what happened. And this did not serve to stabilize the society, the country, the government under which these people were born, but led to its destruction. The accumulation of aggression in them (even if against some category of the population, according to some idea) led to destruction.

If we, for example, take ancient Rome and Byzantium, these civilizations were also destroyed, not even by barbarian raids, but from within. There were also popular riots, popular unrest against the laws adopted by the patricians. And all this undermined the combat capability of the state, its defense against other nations. This happened because aggression was building up among the people.

Homosexuality, pedophilia, sadism, and various forms of behavior that provoked a decrease in vibration and submission to one's instincts were also developed there. This did not lead to anything good; there was destruction in these countries.

That's why I said that any state, any government that has come to power, even if it is negative in itself, but in its state, in its country, it will be interested, first of all, in stability.

Remember, for example, the same Lenin and Stalin, who were essentially destroyers. When they came to power, what did they do? They began to destroy those of their friends who were next to them and who were already trying to destroy their state. They began to lead the state to stability. Or, for example, take Adolf Hitler. What did he do for his country? It's not at all the same as for the Soviet Union. These were different actions.

Yuri: Got it. And the very last question. Recently, in Moscow, and I think in central Russia, there was an anomalous fog that reigned for more than a day. Many people sent me messages asking what it could be?

Do our representatives, perhaps the Tikhtians, who are exploring our atmosphere, know what it could be, what kind of fog it was?

Irina: The number again?

Yuri: I don't remember the exact date right now, it was about two weeks ago, but they talked about it in the news.

Irina: (Mead speaks) I was just at the base, it is located on the border of the Moscow and Vladimir regions, naturally, in this forest we have the opportunity to take air samples if we suspect any pollution. But I don't remember any emissions in the next month. This needs to be found out. Specifically the territory of Moscow, right?

Yuri: There were more of the Moscow region, and even the central part of Russia. There was a very wide area.

Irina: I am now in the central part of Russia. This is a very broad concept - the central part of Russia.

Yuri: European.

Irina: I am in the European part of Russia, in the central part. From us to Moscow is 500 kilometers. We didn't have any fogs or strange smells at all in the coming year.

Yuri: Got it. That was the question.

Irina: He's asking me now: "In Moscow?" I can't say, because people also live in Moscow, there is a center. And no one told me anything. From there, 10 days ago, people came for training and kept in touch with their relatives. Nobody said anything about any fog.

This point needs to be clarified. This might be a region? Then they will send a probe to that area. If there was some substance, even if it is gone, dissipated, you can take a sample of vegetation and soil. Traces of this impact could remain.

He's asking me now, and I don't even know what to answer him.

Yuri: What is he asking?

Irina: Did they tell you? How can I say they reported it if no one said anything to me personally?

Yuri: It was even on the news, and we all saw it on the street.

Irina: Where is it?

Yuri: In Moscow, it was a large area. I can't say exactly the geography, but the territory was larger than all of Moscow, larger than

the Moscow region.

Irina: He asked me just now: “Did they send it to you from Moscow?” I say "No". Okay, then give me the date.

Yuri: I can tell the date now, two seconds.

Irina: So that you can understand what can be done to find out.

Yuri: It was November 2, 2021.

Irina: At that time I was just from Moscow. Moreover, if there is more than the Moscow region, they should have told me.

Yuri: This news was in our media that it was November 2, 2021.

Irina: Perhaps there was some kind of chemical release.

Yuri: I wonder what kind of emission it was?

Irina: What was the smell of this fog? Chemical?

Yuri: Some people say it was chemical, and they even had difficulty breathing.

Irina: Did you go outside?

Yuri: I went out, but that day I tried not to open the windows.

Irina: Did you even go out that day?

Yuri: I went out, I personally didn’t notice any special smells, but I don’t know.

Irina: Was it just fog?

Yuri: Yes.

November 30, 2021

Conference participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Yuri Fidrya – contactee with the Galactic Federation of Light, the Spiritual World, biochemist;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms and space civilizations, xenobiologist;

Apertis Tuar - a representative of the planet Tikht, an astrobiologist, studies healing, its effect on the etheric body, including the etheric DNA matrices;

Te Per Hredours is a representative of the planet Selbet, a biologist, an ecologist, a transformer of genetic information in the cells of reptilian-type humanoids, a specialist in genetic changes and experiments on planets like Earth.

#375 What is Hydroplasma? Alien comments. Living biogenic water by academician Inyushin M.V.

https://blog.cassiopeia.center/chto-takoe-gidroplazma-kommentarii-inoplanetyan-zh
https://www.youtube.com/watch?v=qMZGqMfn3c8

00:21 Introduction of participants.

Irina: I am a contactee with extraterrestrial civilizations. Today my curator is present next to me - a biologist, psychologist, specialist in alien civilizations from the planet Esler, MidgasCaus. And today Elena is with us. Hello, Elena.

Elena: Good evening. My last name is Urazhevskaya. I am a partner of the Imagine people company. That is, the company that deals with biogenic water.

In my hand is water with hydroplasma concentrate, ionized with the bioflavonoid complex of alpha dihydroquercetin. Information is taken from Daurian Siberian larch.

Hydroplasma is the fourth state of water in nature. Revitalizes, makes it clean, structured.

Irina: The topic of the conference? It needs to be something that people can understand.

Elena: The topic of the conference. I want to imagine.

01:28 The influence of Earth plasmoids on water.

Elena: Mead, you said that water can clean itself, change its structure.

Irina: Not even water, but plasmoid civilizations do this. There are plasmoids that do this. They have a vital task of incarnation into subtle worlds, into subtle bodies, at different levels of density, namely caring for the liquid states of matter, the element of water.

(MidgasKaus) You know that in nature there are four elements - fire, water, earth, air. This is not just the same water and the same fire that you know physically. These are etheric forces from which the already physically manifested elements of different atoms are created. According to the teachings of the Interstellar Union, each atom consists of more than just energies, as we used to say. Any atom consists of the energies of all four elements. Take an oxygen atom, a hydrogen atom, a sulfur atom.

What, for example, is the difference between an oxygen atom and a sulfur atom? In fact, it is no different, except for the amount of energy invested in it. That is, the quantity and ratio will be different.

On Earth, this will be a different number of protons, neutrons and electrons. You're so used to explaining things. And we are accustomed to explaining the first, second, third levels of energy, which are distributed among the levels in the atom and which are built on three levels from the condensed energies of the four elements.

And that’s why there are special plasmoids - creatures in subtle bodies that are embodied in the element of water. They are the ones responsible for the water bodies. There are Spirits of the elements of water, and there are also Spirits of individual places in nature. For example, if this is some kind of body of water, this is also some kind of place of nature. And there is also a separate Spirit of this reservoir, which watches over the Spirits of the elements of water, as their ruler. But this is very remote; one can only imagine in earthly language that the ruler. In fact, he helps them there. He watches them take care of purifying the water.

When Irina went to talk to the plasmoids at the pond, she took the students, where they talked with the plasmoids of a small local pond. Although it is small, it has its patrons, its plasmoids. And they said there that the pollution that comes from human activity: various pesticides, all the garbage that people throw out there, if people throw away some plastic compounds, etc., still partially these compounds end up in the water, although it is, of course, practically insoluble in water. But the water envelops it with its molecules, its film, and still some molecules get in. And all this pollutes the water.

What does pollute mean? Makes it unsuitable for the life forms that exist there, or even dangerous, depending on what gets into the water. So, plasmoids take care of cleaning it. They direct such energies there so that all the large debris that can be collected into dust particles (he shows me that they settle to the bottom), some evaporate, then fall back. That is, they already act together with the Spirits of the air.

This natural self-purification mechanism always works, because besides people on Earth there are still many forms of life, animals, birds, fish that need water. The entire animal world of the Earth, all flora and fauna, all plants and animals that feed on water, unfortunately, are deprived of the opportunity to use your wonderful hydroplasma, so the plasmoids themselves have to do this.

06:52 Viktor Inyushin – contactee.

Elena: Then the question is: does hydroplasm exist in nature?

Irina: In nature?

Elena: Mead, do you know such a scientist, he is a professor, academician, biophysicist - Viktor Inyushin, who studies precisely this very hydroplasma?

Irina: Yes, I saw his photo on the Internet through a contactee. We don't know each other personally. But I can say that in terms of energy, he is definitely a contactor with plasmoid civilizations, there are definitely there. Energy comes from him, like from a contactee.

Elena: I think so.

Irina: But without his request, without his permission, establishing exactly what kind of contact this is is not ethical. I feel that the energy of the contactee, and if he is interested, he can contact him and see. Or talk to your supervisors. But energy passes through it (through the eyes), like the energy of a contactee.

08:12 Hydroplasma in nature.

Irina: As for whether hydroplasma exists in nature, that is, in this form, right? Hydroplasma, as I understand the word, is water in which the energy of Light is embedded.

Elena: Yes, this is the energy of life.

Irina: We take the energy of Light, as you say, photon energy is like sources of Light of natural or artificial origin, they can enter water and change its structure. One might say that portions, quanta of energy can remain between molecules. This happens in nature.

Where does this happen in nature? In nature, this happens in open areas where, for example, the Sun shines. There are solar plasmoids there, they also come in when the Sun sends rays of Light, that is, plasmoids come along with these rays. They live in them. But they live on a subtle level, not on the physical, that is, on a different level of density. And they all interact with plasmoids of water, earth, air, etc. And the energy of the Earth is born. Even in the earth there is (in the soil and ground itself) a flow of energy that you call “geoelectricity”. And it is in the water, it is also charged from this.

Lightning strikes also charge like atmospheric electricity. And even charges moonlight if the moon is shining. And the reflected sunlight from the Moon is no longer like from the Sun, but there is already the energy of the Moon, that is, it changes the energy. Even when water is in nature, stars shine on it, although the stars are far from the Earth (further than the Sun), but through the Astral these distances do not play a role. The energy of each star still affects the water, that is, there

is also Light there. Let him walk, for example, two hundred years from a star that is two hundred light years away from the Earth. The light will last for two hundred years. That is, you see this star, and two hundred years have already passed there. And this energy also hits the Earth and charges.

And water, as a receptive, fluid structure, perceives all energies. And moreover, she perceives the energies of not only all the heavenly bodies, she also perceives the energy of the person who is nearby. She perceives the energies of his thoughts. She perceives the energy of his feelings and words. It perceives energy, can store it and transmit it further.

For me, the word “hydroplasma” is the state of water into which Light has entered and its energy remains there. I have already said what natural sources of Light there are. And artificial, it is possible to create artificial light sources with a certain electromagnetic spectrum, for example. The photon stream will also enter the water and generate water charged with this Light.

12:12 Light treatment from aliens.

Irina: On the planet Esler, on the planet Daraal and on the planet Burkhad, etc., there is such a direction in medicine as phototherapy - treatment with Light. And not just light therapy, but color therapy. In our medicine it is more like a preventive one. Restores cell energy. And it also restores the energy of cells when the disturbances in them are very minor, that is, they have not yet caused the disease. And due to this, there is no need to use any serious medications, which may be required when there are already serious violations.

Elena: I just have the product “Water for life” in my hands. “Water for life” is the commercial name of our product. There is a concentrate of hydroplasma here. And it is very important that this concentrate is stabilized. That solar, let's say, positive energy, it is unstable in nature. And this hydroplasma is stabilized by ions, that is, the information of alpha dihydroquercetin. And exactly what Mead said now, we have had clinical trials for several decades, they took place in Russia, in Kazakhstan, first of all. But we also recently had European clinical trials. And just what Mead said now, we have confirmed that Invitro on

glass damaged the membrane of the fat cell. A solution of this concentrate was dripped, and within an hour this membrane returned to normal by 80%. And the rest of the damage healed within 24 hours.

And we also have a similar product - “Absolute Energy”. Here the vectoriality of hydroplasma (there is such a concept of vectoriality) is 2329. European clinical trials have also confirmed that it is capable of recognizing cell damage at the membrane level, when no one can see anything yet. And this substance already sees it. She either repairs it or destroys it and removes it from the body.

I want to ask what Mead, as a biologist, can say about hydroplasma with the bioflavonoid complex alpha-dihydroquercetin. And this bioflavonoid ring (this is precisely the ionic form - information) is removed from the matrix of the Daurian Siberian larch.

Irina: (MidgasKaus) Yes, now I understand. Because when I looked at this water on an energy level (Maxim and Irina gave me a look), I felt that there was the energy of a tree. But it was similar to the energy of either pine, or cedar, or larch. There was too little energy because the vessel was small. But still, I felt that the energy of the tree was there. How can it act, and on what?

I even conducted such an experiment. Irina and Maxim drank a drop of this water, and I saw what was changing in their energy. Do you want me to look at you?

Elena: Great, I really want to.

16:22 Energy of water with hydroplasma.

Irina: (MidgasKaus) When I started looking, I saw that when this water enters the body, there is no effect on the physical level, it is like water. Also, judging by the energy that is visible from the Astral, it was as if it was not water in a dark bubble. And in terms of energy from the Astral, it was similar to water that flows and is under the Sun. Like mountain rivers. It's as if the sun is falling on her. That is, he saw such an image.

Elena: That's true.

Irina: And although she was in a static position, that is, she was not flowing anywhere, she was in a vessel, but from the Astral it was clear that it was as if it was a current, a stream. That's what I told Irina and Maxim, despite the fact that it is in a vessel, I see flowing water. This suggests that the energy of Light in this water has been preserved. It is only in appearance that the water appears to be standing still, but processes are taking place inside it (he shows me), like molecules flowing in a circle, in a spiral.

Elena: Right-hand rotation?

Irina: Yes.

Elena: Thank you, it's just important.

Irina: And there was no energy from stagnant water, there was just flowing energy. I also noted this. It's strange, despite the fact that it is in a vial (in a bottle), it should be static, like in a vessel.

18:28 Composition of water with hydroplasma.

Irina: And also in terms of composition. I said that the composition is water, but there are no impurities in it, namely, those from the tap. It is similar to water that has been purified, as they say - chemically neutral, like distilled water. I even said that it resembles, as if water was evaporated and then collected from the steam. Or they passed it through a good filter so that there was no chlorine or any impurities. When it flows through the pipes, something still dissolves in the pipes themselves.

Elena: Absolutely true.

Irina: If it were mineral, there would be minerals in it, depending on where it was mined from. When Irina drinks mineral water, I feel, for example, vibrations of silicon, silicic acid, depending on the

composition - various sulfides, chlorides, etc.

There were no substances here. It was chemically inert water. But there was still the presence of the energy of the tree, weak energy, but it was still felt. It was as if a substance had been added, but not the tree itself, but some substance taken from there.

Elena: Absolutely true.

Irina: It was on a physical level. Your earthly instruments will not show more. For them, you can simply pass tap water through a good filter (there are those that purify through multi-stage filters), if you pour and put this water, passed through a filter or distilled (there is also distilled water), then they will not find any differences, that is, chemical ones. There will be no differences in temperature or physical parameters either. Because your scientists have not yet learned to measure the energy of Light that has entered the liquid.

Photon energy on Earth is in a rather rudimentary state. And you have not studied the effect of waves of Light, as vibrations of Light on liquids, specifically.

We have made these discoveries a long time ago. And we know that the different spectrum of a star or the different spectrum of sunlight, which depends, among other things, on the time of day, gives different properties to water.

Your ancient ancestors always knew this. They always knew that water, for example, collected at dawn, is different from water that is collected from the same source or well into which the Light falls at noon or at sunset, and even more so at night. But they did not explain it scientifically. They said that there was not energy there, but like different forces of nature in this water. And it’s not for nothing that your ancestors always considered water, like the earth, to be a living creature. They figuratively conveyed the exact purpose of water - to revive, to cleanse.

22:48 Practice of cleansing with water.

Irina: Water is the source of life. In addition, it is a source of purification. Because water washes away physical, chemical, and energy pollution from you. If you feel that you are full of negative energy, you are in a bad mood, and you will stand under the pressure of water so that it flows down your head, along the back of your head and along the spine where the chakras are located, and you will stand for a couple of minutes. It should be a comfortable temperature for your body, but this is individual. There should be quite a strong water pressure.

If you stand for 2-3 minutes, you will feel refreshed because it will be washed away from your etheric field. If you read a prayer or mantra at the same time, the effect will intensify. Even without detergents, just stand under the pressure. And so that the point where the water gets in is just above the back of the head and flows down.

Elena: Thank you for such a great answer. For me this was confirmation. And this water really changed my life. Changed the lives of my loved ones.

24:28 The influence of water with hydroplasma on humans.

Elena: Here's a question for Mead: what will happen to a person who starts drinking "solar energy water," as we'll call it? What will happen to the body? Because I clearly feel the energy. And this is not just physical energy. I feel inner strength that I never had, even in my youth. I am now 51 years old, soon to be 52. My physical and spiritual condition today is much better than when I was 20 years old. The question is: what will happen to a person who takes just such water?

Irina: (MidgasKaus) Yes, I have already looked at the effect on the body when taken orally. The physical body does not change state, but the state of the etheric field changes. This effect does not affect the physical body, but the ethereal one.

The power of the etheric field gives just the feeling of vigor. And the stronger the etheric field, the greater the efficiency and vitality. When I looked at the effect, I saw that it stimulated the release of energy from the physical cells. There is energy metabolism in cells. So, the energy

exchange in the cells continued at the same level, but most of the energy extracted from the air and from food went to the etheric body.

This can be seen from the Astral: the etheric field is so smooth before receiving, for example, yellow in color, and as soon as water got there, then after a few seconds it literally resembled that in the etheric field, such as waves appear from drops. The drop hits, and the waves diverge around. And then it began to expand. This is an influx of energy from those sources that exist in the etheric body and physical body. Why might this be needed? To enhance the effect of vitamins, food, and medications. That's pretty much what he says.

And plus another influence through the etheric body on the astral body. This Light passes into the human body and affects thoughts, they become lighter.

There are etheric channels in the hands and palms. And in the palms they end with mini chakras. This is how you need to do it (shows).

Elena: That's what we do.

Irina: Now close your eyes and tell me how you feel?

Elena: I feel like the neon color has gone.

Irina: Yes, so silver.

Elena: And a very powerful current flows, but it is painless - it goes through the arms and legs into the ground.

Irina: Very good sensitivity.

Elena: It’s just that we are earthly people, it’s difficult for us to speak with energies. But I actually got answers. And I understand why Inyushin always talks about the energy of water. He always says this word - “energy”, “energy of water”. I got answers, at least at my level. I

was happy for myself.

Irina: MidgasKaus looked when we sprinkled this water in the middle of our palms and began to exchange with each other, you saw. He also watched this process. And he said that when water gets on the skin of the palms, the water physically enters, and the energy enters the etheric field. As we began to exchange, it enhances energy transfer and sensitivity.

Elena: Yes, that's true. When you did it like this, it was even written in the instructions that you should spray it here - on your palms.

Irina: No, I didn't read the summary.

Elena: And in the centers.

Irina: Or you can also go here (shows).

Elena: They also told us to spray here, on these points. You're talking now, and I'm getting goosebumps. Because you didn't read the summary!

Huge gratitude. Indeed, I received confirmation for myself. I am very happy with everything that I just heard. I thank Irina. Mid, thank you. This, of course, is an event today that will once again change my life.

Irina: (MidgasCaus) I'm happy to help too. I want to emphasize once again that this water, charged with Light, cannot be a panacea for all diseases. It can be like strengthening a person's own energy, but subject to his working on himself on a spiritual level.

Elena: Yes, and agree, Mead, with me that when a person has energy, he can think about himself and what is happening in his life. Because many people in such a fast-paced world live automatically. Not because they are bad people. No energy, really no energy.

Irina: Of course, yes.

Elena: And when we raise our heads and look up, it turns out that there are still stars, the Sun, the Moon, Mother Earth. Mother Earth is with us. She heals us and loves us. And you need to contact her too.

Many thanks to you for the meeting. I love you very much. I appreciate you very much. Irina, my deepest heartfelt gratitude to you.

Irina: Thank you.

December 3, 2021

Conference participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Elena Urazhevskaya - partner of the company “Imagine People”;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms.

#380 PHYSICAL CONTACT! Visit to the Draconian planet Shentricussa - the capital of the “Union of Six”!

---

https://blog.cassiopeia.center/poseshchenie-planety-drakonovyh-

shentrikussa-stoli
https://www.youtube.com/watch?v=GVAgEwVLS9s

00:18 Introduction of the participants.

Vladimir : Dear friends, hello! My name is Vladimir Goldstein. I'm in the suburbs of Chicago. It's now 16:40 for me, and for Irina it's late at night, as I understand it, more than 2 am. What time is it now, Irina?

Irina : Twenty minutes to two.

Vladimir : Twenty minutes to two in the morning. Irina Podzorova is in direct contact with me, you will see this in the recording. As many have already guessed, our almost spontaneous broadcast, our recording was caused by the fact (we only have this in these cases) that Irina just recently came home after yet another, but special, physical contact. Now with you (I don't know anything yet, I'll ask her) we'll find out everything. I know now only one thing: Irina, with questions prepared by the administrators of the Cassiopeia project, flew to the planet Draco, to the planet of the Union of Six, the same Draconians who oppose themselves to the Interstellar Union of the Galaxy. There was a special flight, and now we will find out what happened there. Irina, greetings, good night!

Irina : Good evening! Dear friends, I convey greetings from the planet Burkhad from Raom Tiyan and Bergastre, as well as from Kirchiton. It was the three of them who took me to the capital of the so-called Union of Six Planets, which is opposed to the Interstellar Union in our Milky Way Galaxy, and is their opposition. They do not have a military confrontation, but the ideological contradictions are quite serious, judging by what I managed to find out and write down in this notebook.

Vladimir : Who was there with you?

Irina : Yes, I took it with me. I rewrote the questions that the administrators wrote in advance, and Vladimir sent them to me, in a notebook so that I could write answers, because my phone doesn't work there.

02:37 How does a contactee get on an alien ship?

Vladimir : Let's start from the beginning. How did it all happen?

Irina : I came to the place of contact, as always (for me it's the same place). It wasn't Kirchiton's plate that took me away. I didn't see anything, now they are masked by an invisible field that we cannot see with our eyes. A light green beam just comes out. It shines right in front of me, you stand in it, you begin to be attracted. I wouldn't say it's like going up in an elevator, you're just being pulled up. It looks like my hair is about to rise. It lifts quickly enough so that it is not visible that the person is being lifted. From the outside it looks like a person is being pulled by a beam into an empty place that is not visible to anyone.

When I found myself inside, the first thing I saw was Bergastre's smile and his glowing eyes. They glow for him.

I say: "Where is Kirchiton?" He says: "Everyone is here, don't worry. Say hello to all participants in the Cassiopeia project, all contactees on Earth, all bright people, all bright personalities. I am sure that we will now have a very important flight. Thank you for your desire to explore all the civilizations of the Galaxy!"

I looked around: the walls were absolutely white and everything was glowing, along the walls, opposite each other, there were chairs. I counted six on one side and six on the other, 12 seats. Raom Tiyan sat on one. Then Kirchiton came out of some door when I had already sat down.

Vladimir : Was it Kirchiton's ship?

Irina : No. Kirchiton was with them. I asked whose ship it was. Bergastre said: "This is my personal ship, which I fly on to carry out various tasks."

Vladimir : Let me clarify, sorry for interrupting. This was a special flight to a planet that is not part of the Interstellar Union and is opposed to it. I personally asked that this be a flight on a ship where Irina's safety

would be guaranteed. I asked for a cruiser (there is, of course, more than one military fleet there), but in the end it turned out to be a Galactic Security Service ship, the personal ship of Bergastre, who is the head of the Galactic Security Service of the Interstellar Union in our sector of the Galaxy. Obviously, security was ensured. An unusual ship, probably, all the safety equipment (I don't know what, we'll ask Irina) was present. That's it, we can continue.

Irina : (Bergastr) I know about the request of Vladimir and other administrators for a military cruiser, but on such ships we can only transport contactees to planets where real combat operations are taking place. The planet of the Union of Six, where we are taking you, is their capital, there are no military operations there now. I will personally accompany you with Raom Tiyan and Kirchiton. Kirchiton is your curator specifically for physical contacts. We agreed in advance with the government of this planet, they learned about the issues. One of them will date you.

It turns out that they need to take permission to contact aliens.

Vladimir : With foreigners. It is not yet known who they are.

Irina : I found out later when I started asking them. It turns out that in order to receive this permission, you need to wait about two earthly weeks. They are being checked. And not just with aliens, with earthlings or with the Interstellar Union, even with the aliens who are part of the Union of Six.

Vladimir : A serious system, totalitarian, to be honest. We'll find out further. Tell me how you flew.

Irina : Raom Tiyan said: "I also say hello to everyone. Indeed, an unusual flight. I myself have never been there, I have not left the group of planets for which the Interstellar Union is responsible." And Kirchiton said that he was on one of the planets of this group of Six, but not on the one where we were flying. Kirchiton also said hello to everyone.

While we were talking, I didn't notice how maybe several minutes had

passed. There was no noticeable movement. They have artificial gravity, there is no weightlessness, so nothing changed, we just sat and talked. At one point, Kirchiton said that it was time for us to leave. I was also surprised why all three of them were sitting and no one was steering the ship. To this they answered that it has an automatic program.

08:20 Ship Bergastra. A spacesuit for visiting other planets.

Vladimir : A cigar-shaped ship?

Irina : Yes, I saw this when we left it. At first I saw a long room, larger than in the plate, the cabin there was small. The window in the room was not round, but a long slit.

I say: “What kind of gap is this?” It runs along the entire length of the ship, maybe at a height of about three meters. They replied: “It’s just a window, but we don’t look through it. It's decorative. We can see on the computer screen where we are flying.” “Why don’t any of you control the ship?” “Why should we control it? This is not a ship that requires correction. You just sat down, he determined by the mass of people (by the changed mass) that it was already necessary to begin the journey according to the laid down program. Everything is automatically planned, right down to the second it will fly.” They don't need to interfere.

Looking ahead a little: I then spoke with a representative of that planet of the Order of the Six, which we were talking about, when they refused to convey through Vasily that he should write. I spoke with a representative of this planet, but not with the one who then made contact. Then there was a scientist. He was a little loyal to the earthlings. Today I spoke with their politician, who is responsible for the contacts department, foreign policy. This is their Ministry of Alien Affairs, a clear military structure. He talks like a military man. Now you will see everything for yourself.

Vladimir : Let's move gradually.

Irina : I'll say right away that his position, from my point of view, is still much tougher. Representatives of the Interstellar Union - Raom Tiyan, Kirchiton and Bergastre - heard all this, but practically did not comment at all at the beginning. They gave me the opportunity to ask questions and answer him.

Before leaving the ship, I was told that I needed to put on, first, spacesuits. Their protective suits are called that. They are also white, just like on Daraal. Only they are slightly different in shape. If on Daraal there is a rectangular window opposite the eyes through which to look, then on Burkhad there is a square thing, quite hard, and a window on the whole face, you can see the facial expression.

How does he dress? It doesn't just come down from the ceiling when you stand in the middle. There you need to stand in a special booth, and it also descends from the ceiling. They leave there one by one. First I entered, and then the three of them. A spacesuit was prepared for Kirchiton, a different one, because he has a slightly different body shape, different height.

Vladimir : Is this some kind of special spacesuit? Does it have more protective properties than those that used to exist?

Irina: Kirchiton is higher than them.

Vladimir: Does the spacesuit itself differ in characteristics from the one in which you and Kirchiton went into outer space?

Irina : It differs in that for me there was more of an overview, everything is visible. You can walk in it.

When we got out, I asked: "Why a spacesuit?" You can hear each other there too. They say: "First, their atmosphere has three and a half times higher levels of carbon dioxide than Earth. There is oxygen there, but there is still a lot of carbon dioxide. Secondly, now the temperature is about plus 40 degrees."

13:01 Planet Shentricussa.

Irina: “At the moment it’s daytime for them, this is their temperate zone, between the equator and the pole.”

This is the city where the Planet Council is located. We were told that our ship could be landed on the square. Due to the fact that it is small, it fits. Otherwise we would have had to fly to the cosmodrome. They do not have transport that uses an atmospheric engine to quickly fly to the capital. It would be necessary to travel on their train, which is on a magnetic levitation (they also have such technologies there). This train from the cosmodrome to the capital would take about two hours.

Vladimir : Tell me more precisely, where is this planet located? Where, at what distance from Earth?

Irina : It is located in the constellation Orion. Then this reptilian showed me a galactic map. It is located in the constellation Draco, about 1600 light years from Earth.

Vladimir : Stop. Orion or Dragon?

Irina : Orion. And in the constellation Draco they have a planet. I wrote down all six planets (at his request), what they are called and in what constellations they are located.

Vladimir : Is this all our Galaxy?

Irina: This is all our Galaxy. They have two planets in Orion, in the constellation Draco, in the constellation Centaurus, in the constellation Eagle, in the constellation Cepheus.

Vladimir : Constellation Centaurus. What do we mean? Another Galaxy? Centauri, is there such a thing? Or do we mean the Alpha Centauri star system, which is not far from us?

Irina : They said “the constellation Centaurus.”

Vladimir : I'm trying to understand. These are two objects with similar names, but completely different.

Irina : They didn't say alpha or beta or anything else. They said "the constellation Centaurus." I wrote down these names. They said that if they needed details, they would give them, and they were ready to come to the conference.

15:30 Society management on Schentricus.

Irina: I was surprised that when we got out, I saw asphalt. The same as on Earth, the same color. There were multi-storey buildings. The walls were yellow and had many square windows. Probably the same height as our 20-story buildings, maybe a little higher. There are quite a lot of them, dense buildings. A long street, at the end of this street I saw a red pipe. Wide, becoming narrower towards the top. There was no smoke coming from the chimney. I say: "What kind of factory is this?" Bergastre or Raom Tiyan answered, one of them - they stood nearby. They said it was not a factory. This pipe is one of those antennas that produces the same electromagnetic waves that, with the help of nanochips, control their behavior.

Vladimir: They have nanochips built into their bodies, a signal comes from this pipe, and through them they control the behavior of their fellow citizens, right?

Irina: This is not the only pipe, there are many of them, we saw the closest one. Then we stood near a building with yellow walls. There were orange barrels. There were six or seven of them standing in a group. Small in size, about a meter high. I asked: "What kind of barrels are these, what is in them?" They say: "These are not barrels, this is a device that itself is underground, under the ground. The device can automatically spray chemicals that are inhaled into the air. They react with their chips. All of this together allows electromagnetic waves to influence behavior."

Vladimir: Let's be clear that this is exactly the technology that everyone on Earth fears. Implemented nanochips, chemtrails, all this is implemented there, and from there the legs grow.

It is from there that they want to instill all these fears among earthlings so that we, with the help of the principles of the Science of Imagery, will attract this to ourselves, and this happened with us too. If we are collectively afraid of this, then it will be possible for us to implement all this in some way in the future. Although now this is not the case.

Irina: Bergastre said that spraying these chemicals without nanochips and without electromagnetic influences, without these two components, will do nothing. This should all be in one package. I asked: “How does it work?” They say: “We are now wearing spacesuits, although we can withstand more carbon dioxide than you (our body is more adapted). But there are suspensions in the air of very small dust particles consisting of lead oxide, and it is harmful to us. You don't see them, but they are in the air, so small that they are invisible. When humanoids inhale this lead oxide, it penetrates their respiratory system and spreads through their blood vessels. From birth, they are given nanochips that consist of an alloy that contains the element niobium.” Is there one?

Vladimir: Of course there is, yes.

Irina: This niobium forms a molecular network in their vessels that covers all vessels.

Vladimir: I see. The technology is advanced. If you are afraid of this, you can ensure that, due to fear, this will appear on Earth.

Irina: Bergastre said that this technology, development, is known in the Interstellar Union. Such nanochips are not used in the Interstellar Union; the principle is different there. These niobium chips react with lead oxide, which is inhaled. With a substance, one of the proteins, that is found in the tissues, this all together creates a field or substance in the brain that can be influenced by these signals. How do they influence? They create such a consciousness that they only think in one direction.

Vladimir: I quickly found “niobium”. I read from Wikipedia: niobium is an element of the fifth group, according to the outdated classification -

a secondary subgroup of group 5, the 5th period of Mendeleev's periodic system of chemical elements, atomic number 41, etc. The simple substance niobium is a shiny metal of silver-gray color with a cubic body-centered crystal lattice, etc. The outdated name is columbium. Further, if you wish, read the details, you will find it easily.

It's clear. There this system exists in full and has been tested. Impact on all their fellow citizens through nanochips and sprayed substances, which we would call chemtrails.

Irina : Plus electromagnetic waves of certain frequencies. I was told that at the bottom of these towers sits a group of specialists who print certain thoughts and words. They are somehow converted into electromagnetic pulses and transmitted to everyone.

Vladimir : And they control the consciousness of all residents.

Irina : I don't quite understand how this is possible. They said that with the combination of these substances and the proteins found in the tissues, this is possible.

Vladimir : Interested: how much is the population on the planet?

Irina : I didn't ask that. I asked questions, this question was not there. When I started talking to him, he asked how much time we had. They said maybe about an hour, a little more, however, it passed. Today I visited two planets.

Vladimir : Now tell me. Let's start.

23:00 Appearance of the inhabitants of Shentricussa.

Vladimir : What do they look like? The appearance of the person you were communicating with.

Irina : Outwardly very similar to the image that was sent to me. I call it

an astral image. The image that they conveyed to me over the phone when we talked with them in the presence of Vasily.

These are such crocodiles. They have an elongated front part of the face, round eyes, with round, light yellow pupils. Green skin color, not light green, but dark. They have a comb. Their tail is not like Selbet's. I wouldn't call it a tail. The comb ends slightly below the back. There is no pronounced tail, it is covered at the back. We have a coccyx, and their ridge ends there.

Vladimir: What about falling? Teeth?

Irina: Like a lizard.

Vladimir : Like a lizard, not like crocodiles. Fine. And did you communicate with them through the device?

Irina : We entered the building and took the elevator. In the same way, you press the button and call the elevator. These technologies are similar to ours. We got up, went in, one of them was there. There was something like our TV hanging on the wall, he then turned it on and showed me some pictures. I sat down on a chair like ours. There was a flat table. The Burkhadians and Kirkhiton did not sit down, they stood nearby, I had to write. I didn't take off my spacesuit.

When they came in, I said: “Greetings.” Bergastre adjusted the translator to set up the translation of their language into Russian. It also took time to combine the two languages. He said that they are not similar, many concepts are different. The translation will be approximate, inaccurate, because there are no analogues of the words.

Vladimir : It’s clear that the analogues were artificially selected by the translator. Did they introduce themselves, say their names?

Irina : The one who talked to me said a name at the end, it’s there. This is someone else, not the one who talked to me.

When they put the box down, I greeted them, and it was translated into their language. By the way, the translator's voice was very pleasant. Female. Some representative of Burkhad wrote it down.

Vladimir : Beautiful Burkhadian lady, in Russian.

Irina : Then this box began to translate things like this for me...

Vladimir : I want to warn you, dear friends. You can't remove the words from the song. There is no obvious obscene language, perhaps, fortunately, this was not in the translator, otherwise he would have found it there. Just harsh, rude words in Russian, but they are still in the censorship field, but as is, you understand? But this is exactly what was closest to how the representatives of this planet expressed themselves. We tried to convey their thoughts as closely as possible. What is the name of this planet, after all, in their language?

Irina : I wrote. Shentricussa, the one where we talked.

Vladimir : Shentricussa, I see. Okay, now you can transfer the content of your communication.

Irina : It's not like he was wheezing, his tongue is a little like Selbet, there are a lot of growling and wheezing sounds. His voice is quite low, it comes from his throat. The long, elongated area where his lips are is slightly open, and a sound comes from there, as if from the throat. This was translated into Russian. When I asked, the box made a chain of the same sounds, he listened and then answered.

We tuned in for a conversation, Bergastre said that the translator was on, and we could start. The first thing I did was greet the inhabitants of this planet, as well as the entire Union of Six: "We welcome you, we send you the Light of our Love. I flew here to listen to you and convey to people your opinion, your position. What you think is also very important to us, because you are intelligent beings just like us, beloved children of God." He listened and said, "I thank you. I'm ready to answer questions."

Our dialogue began more or less neutrally. But then it happened...

Vladimir : Tell it like it is.

Irina : I say: “I have questions from Vladimir Goldstein, greetings from him too.”

When we talked, sometimes we came in maybe two or three times. They'll come in, they'll come out. Green scales on the face, and the whole body is hidden by a black jumpsuit. I looked: he would come in, he would come out. Then another. So they came in and out. Maybe have a look, I don't know. The doors there open like our elevator.

Vladimir : You said that in order to communicate with you, each of them had to undergo verification within two weeks in order to communicate with any foreigners, such are the rules there.

Irina : When I asked questions, he said it. It's on the record. The first thing he asked me was: “I will answer, but I ask you to first write down the list of planets of our Union, as they are called.” As I understand it, this is not in the language of Daraal, but in the language of Shentricussa. It is a little general and applies everywhere. At least that’s how the box translated what he said. For example, “Shentricussa” sounded something similar in their language, it was, perhaps, without vowels. “Shntrks”, something like that.

“And you will write the constellations in which these planets are located, if viewed from the earth’s sky, if oriented from the Earth.” They have studied our map of the Galaxy and know what we call which constellations, but they have different understandings. But they have an automatic program that translates their stellar coordinates, where this or that star, our constellations, is located.

Vladimir: I see.

32:00 Planets of the Union of Six.

Irina: I will now read the list of planets from the Union of Six that they told me.

1. Shentrikussa or Shantriukussa, approximately, between “i” and “u” sound. This is the constellation Orion, where we were.

2. Planet Arzinak in the constellation Orion. From the conversation it was clear to us that white dragons live there. White creatures, also with crests, flying, who used to be in the Interstellar Union, and who were expelled. This is the constellation Aquila.

3. Planet Gaphum, constellation Draco.

4. Alshit, constellation of Hercules.

5. Nutrilan, constellation Cepheus.

6. Getrem, constellation Centaurus.

7. Lernesi, the constellation of Orion, where we flew. This seventh planet is not part of the Union of Six, it is a subordinate planet, like the Shentricussa colony, where they have biorobots. We then flew there. I saw a whole field of rooms with absolutely glass walls, transparent. I'll tell you later.

Vladimir : Just “Shelezyak’s Planet, inhabited by robots,” that was a Soviet cartoon.

Irina : Lernesi is not just populated. Robots are doing experiments to permanently transfer the consciousness (they call it consciousness, not Spirit) of a rational being into the body of a robot, and thereby achieve immortality.

Vladimir: That’s it, the idea is clear.

Irina: This is the first one. The second purpose of this planet: there are mutants whose brains do not perceive signals normally. They can still go against the government or commit some crime. They explain this by mutation. These mutants are identified and sent to Lernesi, where experiments are performed on him on how to influence him chemically in such a way as to bypass the mutation and change consciousness. They told me this later.

Vladimir: Fun.

Irina: And third. When we were indoors, we stood on a platform from which we could see the field from above; there were some creatures there that looked like people. I thought: “Are they holding earthlings there?” They told me: “These are not earthlings, but biorobots. They just look like you in shape. We are now conducting experiments so that they are perfect and cannot be distinguished from yours. You can make them any shape, even similar to your rulers.”

Vladimir : Yes, I see. So, has this already been implemented?

Irina : No, he said that these are only experiments for now. There are no such advanced technologies that they cannot distinguish. He clearly said that their technology and weaponry lag behind the Interstellar Union and the Galactic Federation of Light.

Vladimir : Fortunately, they are lagging behind, I must add. Yes, clearly. Further.

Irina : When I wrote down these planets, we moved on to questions and answers. He says: “I am ready to answer any questions, but within the limits of my competence, so as not to give away military secrets.” There are no special secrets here, the questions are very simple.

36:33 Ideology on the planet Shentricussa.
